Teamsters OK new agreement

Members of Teamsters Local Union No. 8 employed by Penn State have ratified a new collective bargaining agreement with the University to replace the current agreement, which expired June 30.

Teamsters Local Union No. 8 represents the bargaining unit consisting of approximately 2,600 technical service employees at all University locations throughout the Commonwealth.

Earl Lutz, president of Teamsters Local Union No. 8, announced the decision Wednesday afternoon after the count of mail ballots by Union members to accept or reject the offer made by the University.

The new agreement is effective July 1 and covers the three-year period through June 30, 1999. It provides for a 3 percent wage increase, effective July 1, and additional 2.75 percent wage increases effective with the second and third years of the agreement.

Other negotiated items of the agreement include the University's health care contribution rates and certain modifications in working conditions.

President Graham B. Spanier said he was pleased the negotiations had been concluded successfully with the acceptance of the agreement by the union membership.

State of the University address Sept. 6

President Graham B. Spanier will present the annual State of the University Address at 4 p.m. on Friday, Sept. 6, in Eisenhower Auditorium on the University Park Campus. The address will also be broadcast live via local television downlink to all campuses. All faculty, staff and students are encouraged to attend.

More information about the address will be included in the Aug. 29 *Intercom*.

Mural in Chambers

Joseph Sevello of Altoona, a 1959 graduate of the College of Education, has completed a 40-by-10-foot mural in Chambers Building on the University Park Campus. The mural depicts the College of Education's mission to prepare teachers, scholars, researchers and leaders. Besides illustrating more than 35 books, Sevello has painted murals in New York, Philadelphia, Pittsburgh and Altoona.

Teamsters OK new agreement

Members of Teamsters Local Union No. 8 employed by Penn State have ratified a new collective bargaining agreement with the University to replace the current agreement, which expired June 30.

Teamsters Local Union No. 8 represents the bargaining unit consisting of approximately 2,600 technical service employees at all University locations throughout the Commonwealth.

Earl Lutz, president of Teamsters Local Union No. 8, announced the decision Wednesday afternoon after the count of mail ballots by Union members to accept or reject the offer made by the University.

The new agreement is effective July 1 and covers the three-year period through June 30, 1999. It provides a 3 percent wage increase, effective July 1, and additional 2.75 percent wage increases effective with the second and third years of the agreement.

Other negotiated items of the agreement include the University's health care contribution rates and certain modifications in working conditions.

President Graham B. Spanier said he was pleased the negotiations had been concluded successfully with the acceptance of the agreement by the union membership.

Spanier outlines extension changes

As part of the re-examination of the University's mission and organizational structure, President Graham B. Spanier Wednesday outlined a plan to strengthen university outreach programs including Penn State Cooperative Extension, which has provided outreach services to the Commonwealth for more than 75 years.

In a speech at Ag Progress Days before an audience including legislators, local, state and federal agricultural officials and agricultural industry representatives, Spanier shared his vision for strengthening outreach by increasing the cooperation and coordi-

nation among Cooperative Extension and other University outreach initiatives.

As part of the plan, Spanier said Cooperative Extension should have its own director, responsible for policy, program and administrative leadership. The dean of the College of Agricultural Sciences currently serves as the director of Cooperative Extension.

The president also said Cooperative Extension must remain closely tied to the College of Agricultural Sciences and maintain its historical commitments to production agriculture and other current program areas. Spanier's concept would join Cooper-

ative Extension to other segments of the University, expanding the education and research base for extension programs. College administrative structures across the University would change to reflect a broadened outreach mission, including supportive ties to Cooperative Extension.

"Cooperative Extension programs, which serve all citizens of the Commonwealth, can gain by drawing on faculty expertise and resources in such colleges as Health and Human Development, Medicine, Engineering, Science, Business Administration and

Academic calendar shifts in fall of 1997

Starting with the fall 1997 semester, Penn State's academic year will begin about a week later in August than it currently begins. The change means that students will have more time for wrapping up summer jobs, work/study programs or internships — or even going on vacation — before they and their families have to pack their bags for the trek back to State College or other Penn State locations.

Under this permanent change, fall 1997's arrival day for new students will be Aug. 23 and classes will begin on Aug. 27 — in both cases, six calendar days later than in fall 1996.

"Before we made the decision to push back the start of the academic year, we consulted widely with students, faculty and staff," said **John Brighton**, executive vice president and provost. "We believe this change will better accommodate the needs of students and their families, by giving them as much time as possible for work, study and family-related activities during the traditional summer months."

Despite the later start, the fall semester will continue to include 15 weeks of classes, followed by two study days and a six-day final examination period.

"Because of the consultation process we went through, we're convinced that the change in the calendar is going to ease the transition from summer to fall as the academic year gears up," Brighton said. "As the new calendar takes effect, we will welcome comments from students, faculty and staff, and other segments of the University community."

The calendars for academic years 1996 through 2000 are detailed in the accompanying chart.

UNIVERSITY ACADEMIC CALENDAR

	FALL SEMESTER 1996	FALL SEMESTER 1997	FALL SEMESTER 1998	FALL SEMESTER 1999
Arrival day for new students*	Aug. 17	Aug. 23	Aug. 22	Aug. 21
Classes begin	Aug. 21	Aug. 27	Aug. 26	Aug. 25
Labor Day holiday	Sept. 2	Sept. 1	Sept. 7	Sept. 6
Thanksgiving holiday	Nov. 28-Dec. 1	Nov. 27-30	Nov. 26-29	Nov. 25-28
Classes end	Dec. 6	Dec. 12	Dec. 11	Dec. 10
Study days*	Dec. 7-8	Dec. 13-14	Dec. 12-13	Dec. 11-12
Final exams*	Dec. 9-14	Dec. 15-20	Dec. 14-19	Dec. 13-18
Commencement*	Dec. 15 (Sun.)	Dec. 21 (Sun.)	Dec. 20 (Sun.)	Dec. 19 (Sun.)
	SPRING 1997	SPRING 1998	SPRING 1999	SPRING 2000
Arrival day for new students*	Jan. 8	Jan. 7	Jan. 6	Jan. 1
Classes begin	Jan. 13	Jan. 12	Jan. 11	Jan. 10
Spring Break	March 10-14	March 9-13	March 8-12	March 6-10
Classes end	May 2	May 1	April 30	April 28
Study days*	May 3-4	May 2-3	May 1-2	April 29-30
Final exams*	May 5-10	May 4-9	May 3-8	May 1-6
Commencement*	May 17-18	May 16-17	May 15-16	May 13-14
	SUMMER 1997	SUMMER 1998	SUMMER 1999	SUMMER 2000
Intercession begins	May 12	May 11	May 10	May 8
Memorial Day holiday	May 26	May 25	May 31	May 29
Intercession ends	June 6	June 5	June 4	June 2
Eight-week classes begin	June 11	June 10	June 9	June 14
Six-week classes begin	June 25	June 24	June 23	June 28
Fourth of July	July 4 (Fri.)	July 3 (Fri.)	July 5 (Mon.)	July 4 (Tues.)

Faculty/Staff Alerts

Class attendance/scheduling

Class attendance on the days immediately before Thanksgiving and spring break is often so poor that some instructors cancel classes altogether. This is inconsistent with Penn State's obligation to be fully operational on all scheduled class days.

The administration and the faculty (through the University Faculty Senate) have consistently communicated that class attendance is fundamental and have encouraged regular class attendance by students. Classes are rarely canceled.

Faculty members should hold classes for all assigned periods. Instructors may always accommodate individual absences, as appropriate, by making alternate arrangements and providing opportunities to make up work.

Intercom online survey

As part of an ongoing process to evaluate content, design and readership of the *Intercom*, both its paper version and online form, readers are asked to go to the *Intercom* World Wide Web site at <http://www.sur.psu.edu/Intercom/home.html> and read the online version. From there, click on the link for the "Readership Survey" and fill out the short questionnaire. The information you provide will be confidential and helpful in guiding the *Intercom* staff in its work.

Individuals who have read the *Intercom* online in the past, can go directly to the survey at URL

<http://www.sur.psu.edu/intercom/survey/consent.html>. Your participation is appreciated.

Support group formed

A support group for women with cancers of the reproductive system has been formed at the University Cancer Center at Hershey. COVE, which stands for cervical, ovarian, vaginal and endometrial, is the first support group of its kind at The Hershey Medical Center.

Meetings of the group will be held the second Thursday of each month at the Cancer Center from 6:30 to 8:30 p.m. Participants can discuss concerns related to reproductive cancers and some topics will include updates on medical information, family problems, sexuality issues and stress. No registration is required. For more information, call the center's Cancer Careline at (800) 531-1535.

Adolescent eating program

A new program to help adolescents with eating disorders opened at The Hershey Medical Center. The Adolescent Eating Disorder Program, coordinated by John Horn, of the Department of Psychiatry, offers patients coordinated care from a registered dietitian, an adolescent medicine physician, a psychiatrist and psychologist. Group therapy sessions are also available.

For more information on eating disorders or the

new program, please call the medical center's Department of Psychiatry at (717) 531-6771.

Fall reception

Everyone is welcome at the Fourth Annual Reception for the Lesbian, Gay, Bisexual and Ally Community. The reception, sponsored by the Commission on Lesbian, Gay and Bisexual Equity, will take place from 6 p.m. until 7:30 p.m., on Friday, Sept. 6, in 110 North Henderson Building, the Living Center, on the University Park Campus.

LIAS seminars

The University Libraries is offering a series of seminars during the fall semester to help library users learn more about the growing number of databases accessible through the Library Information Access System (LIAS) and on CD-ROM. LIAS searching techniques that enable users to maximize their searching power also will be presented.

In an effort to accommodate as many participants as possible, some sessions are offered more than once. To register or learn more about the seminars, send an e-mail to signup@psulias.psu.edu. If you have any additional questions, contact Doris Herr at (814) 863-0325. Information on the seminars can be found by typing **HELP WORKSHOP** when using LIAS or on the Libraries' Web site at <http://www.libraries.psu.edu>.

Lazy days of summer

The sidewalks on the University Park Campus may be empty today, but they'll be overflowing soon. Arrival day for new students is Saturday, Aug. 17, and fall semester classes begin Wednesday, Aug. 21.

Extension

continued from page 1

Education," Spanier said. "Cooperative Extension also can make good use of the resources of Penn State's Division of Continuing and Distance Education."

The plan, which is the culmination of a year of discussion with both internal and external constituent groups, seeks to bring together all University outreach units while enhancing the programs offered through Cooperative Extension. Cooperative Extension is a community-based educational network that provides people in all 67 counties of Pennsylvania access to Penn State, their land-grant institution.

One of the great strengths of Cooperative Extension, according to Spanier, is its delivery system — its ability to reach so many Pennsylvanians. Each year, more than 8 million people in the state participate in seminars, workshops, conferences, short courses, computer-assisted learning, learn-at-home programs and other activities offered by Cooperative Extension.

Under Spanier's plan, the role of the University's senior officer for outreach, **James Ryan**, vice president for Continuing and Distance Education, will be redefined. Ryan will adopt the new title of vice president for outreach and Cooperative Extension and will be responsible for creating partnerships with academic deans, administrators, faculty, staff and advisory groups. He will also administer the budget and programs of Continuing and Distance Education and Penn State Public Broadcasting. In close cooperation with the dean of the College of Agricultural Sciences, he will jointly oversee Cooperative Extension.

"I look forward to working closely with Dr. Ryan to strengthen our system for delivering the educational and research resources of Penn State to the people of Pennsylvania," **Theodore Alter**, dean of the College of Agricultural Sciences, said. "This expansion of our support base and delivery capabilities will strengthen Cooperative Extension programming for agriculture and the food system, Pennsylvania's young people, families, businesses and communities."

The new director of Cooperative Extension,

who also will serve as an associate dean in the College of Agricultural Sciences, is expected to create cooperative, coordinated programming relationships among faculty and extension staff across departments, colleges and disciplines, and to secure additional funding.

"This [initiative] will create a more integrated and coordinated statewide presence for Penn State outreach overall," Spanier said. "In addition, this new relationship will ultimately improve Cooperative Extension's capacity to address pressing issues and needs through the involvement of a broader array of University faculty and staff expertise and fiscal resources."

Once again touching on a theme that has been sounded throughout his first year as University president, Spanier said that in order for Penn State to remain true to its land-grant mission, all of Penn State's outreach and extension initiatives must be better coordinated and supported.

"Client needs are changing with demographic trends, economic conditions and more mandated programs," he said. "New electronic delivery methods also are altering the way Cooperative Extension and outreach systems are operating nationwide."

All told, Penn State's efforts to share its resources show that more than 100 major outreach and extension programs provided by various units within the University reach half of Pennsylvania's nearly 11.9 million population.

Some of the other highlights planned for University outreach and Cooperative Extension include:

- the creation of regional councils to aid communication and cooperation among Penn State outreach and Cooperative Extension personnel and programs. This change should help Penn State respond better to local needs.

- changing the titles and duties of the assistant or associate deans responsible for Continuing and Distance Education in each of the colleges to include a liaison role with Cooperative Extension.

Kevin Spicer, shipping and receiving attendant in Applied Research Laboratory.

Ronald Walk, power plant worker in Office of Physical Plant.

Timothy Wisor, power plant worker in Office of Physical Plant.

Three named 1996-97 Administrative Fellows

Three Administrative Fellows have been appointed for the 1996-97 academic year. The Administrative Fellows Program is designed to enhance the administrative talents and qualifications of participating Penn State women and minority faculty and staff members through mentorship experiences with top-level administrators at the University.

The new fellows and their mentors are:

— **Cheryl Achterberg**, professor of nutrition and director of the Penn State Nutrition Center, will serve under the mentorship of **John Brighton**, executive vice president and provost.

— **Gail Ann Hurley**, director of residence life in the Department of Student Affairs, will serve under the mentorship of **Gary C. Schultz**, senior vice president for finance and business/treasurer.

— **Sophia Wisniewska**, director of graduate program administration at Penn State Great Valley, will serve under the mentorship of **Robert E. Dunham**, senior vice president and dean of the Commonwealth Educational System.

At University Park, Achterberg teaches at the undergraduate and graduate levels and administers the Nutrition Center's nutrition resource collection, consumer behavior research, laboratory and diet assessment services. She also currently serves as a College of Health and Human Development representative to the University Faculty Senate and a member of the Special Committee on General Education.

She came to Penn State in 1985 as an assistant professor and co-director of the center, was promoted to associate professor in 1991, to director of the center in 1992, and to professor this year. She earned

her bachelor's degree in biology from California Polytechnic State University in 1975, her master's degree in human development from the University of Maine in 1981, and her Ph.D. in human nutrition from Cornell in 1986. She also has worked as a community nutritionist for Washington County, Maine.

Her recent honors from Penn State include the 1995 Milton S. Eisenhower Award for Distinguished Teaching, the 1995 Panhellenic Outstanding Faculty Award, and the 1995 Continuing and Distance Education Faculty Excellence Award. She also earned the 1993 Mead Johnson Research Award from the American Institute of Nutrition and the 1995 Ruth M. Leveton Award in Nutrition Education from the American Dietetic Association.

Hurley, also at University Park, is responsible for managing and supervising the residence hall system housing 14,000 students in 86 halls across nine Penn State campuses. She is chair of a system-wide committee on security standards and practices at residential campuses, a member of the University-wide committee on recycling and chair of various quality teams for the Office of Student Affairs.

She joined Penn State in 1984 after working in residence life and student affairs at Ohio University and DePaul University. She earned a bachelor's degree in Spanish secondary education from Westminster College in 1975 and a master's degree in college student personnel work from Bowling Green State University in 1976.

Her work earned her a 1992 Outstanding Service to Students award. Beyond her Penn State affiliations, she is a member of the Association of College and University Housing Officers International and a graduate of Leadership Centre Country.

At Penn State Great Valley, the suburban Philadelphia campus dedicated to master's studies, Wisniewska has served as the chief enrollment officer since 1988 and helped increase enrollment by 60 percent in that time. Her duties also encompass leadership in program and curriculum development.

Earlier, she had worked in continuing education with Penn State's King of Prussia Center, the Penn State Abington-Ogontz Campus and the Penn State Berks Campus. She earned her bachelor's degree in Russian from Penn State in 1974 and her master's degree and Ph.D. in Russian language and literature from Bryn Mawr College in 1984 and 1992, respectively.

She has taught for the Bryn Mawr Russian Language Institute and Department of Russian and won a 1995 U.S. Department of State Fellowship to support research on Russian women writers of the post-Perestroika period at the Moscow Linguistics University. Her recent professional activities have included directing funded projects for the Equal Opportunity Planning Committee and representing Penn State on the Pennsylvania American Council on Education's National Identification Program for Advancement of Women in Higher Education.

The Administrative Fellows Program provides opportunities for Fellows to participate in a wide range of decision-making processes, learning activities and program management so they are better equipped to handle the challenges of higher education administration. The program also will help create a pool of qualified women and minorities for potential administrative vacancies, both inside and outside the Penn State community.

Sophia Wisniewska

Gail Ann Hurley

Cheryl Achterberg

Secretary of Agriculture an Alumni Fellow

Charles C. Brosius, secretary of the Pennsylvania Department of Agriculture, has been named an Alumni Fellow by the Penn State Alumni Association. He will be honored at 5:30 p.m. Sept. 12 at the Nittany Lion Inn ballroom on the University Park Campus.

A native of Chester County, Brosius received his bachelor's degree in dairy science from Penn State in 1952. He was named Pennsylvania's secretary of agriculture in 1995 by Gov. Tom Ridge. Brosius, a resident of West Grove, owned and operated Marlboro Mushrooms, a commercial mushroom farm with 115,000 square feet of growing facilities. After assuming the duties of secretary of agriculture, Brosius ended control of the business to his three sons, **Mahlon, Thomas and Harold**—all Penn State graduates. Brosius' wife, **Jane**, also a Penn State alumna, works in the business as well.

After graduation, Brosius began his career as a dairy

farmer but soon sold his herd and invested in mushrooms. Marlboro Mushrooms is now a multi-million dollar business, supplying more than 2.5 million pounds of mushrooms to markets up and down the East Coast.

Brosius was elected to the Board of Trustees in 1989 and also served as chairman of The Hershey Medical Center Advisory Committee. He served on the University Presidential Selection Committee and was named a distinguished alumnus of the Department of Dairy and Animal Science in 1993.

Brosius formerly served as vice chairman of the board of trustees of Agway Inc., and was a member of the board of directors of Telmark Inc., an agricultural leasing and financing firm. He is a former director and secretary of the American Mushroom Institute and served on the board of directors of the Pennsylvania Chamber of Commerce and Industry. He also served as the chairman of the Chester County Agricultural Development Council and served on the board of directors of Curbitus Farms Foods Inc., a food processing firm, from 1989 to 1995. He was named a master farmer in 1979.

The Alumni Fellow Award, presented by the Penn State Alumni Association, is administered in cooperation with the colleges of the University. The Board of Trustees has designated the title of Alumni Fellow as permanent and lifelong.

Charles C. Brosius

News in Brief

Child care

The Office of Human Resources Work/Life Programs will provide temporary care for school-age children (ages 6 to 11) on the University Park Campus between the University's opening schedule and the start of public school classes. Care will be provided for children of faculty, staff and students from 7:30 a.m. to 5:30 p.m. Monday through Friday, Aug. 26-30.

A wide variety of activities will be offered, including ice skating, basketball, football, soccer, bocce ball, badminton, recreational swimming, arts and crafts, science exploration and soap carving. Activities will be supervised by staff and volunteers from the Office of Human Resources.

Fee is \$75 per child for the week. For more information, call the Office of Human Resources Work/Life Programs at (814) 865-5886. To volunteer to work at the camp, call **Prudence Johnson** at (814) 865-9193 or **Cathy Kanour** at (814) 865-5886 or e-mail pp1@oas.psu.edu or rc14@oas.psu.edu.

Appointments

Beaver Campus names director of athletics, intramurals, recreational sports

Donna J. Kuga has been appointed director of athletics, intramurals and recreational sports at the Penn State Beaver Campus. Kuga, associate professor of kinesiology at Penn State, has been a faculty member since 1981. She replaces the former athletic director who left to take a teaching and coaching position at another institution.

In her new position, Kuga will be responsible for directing the development and operation of the Beaver Campus varsity teams, including golf, baseball, women's volleyball, women's softball and men's basketball. She will oversee all intramural activities and sports camps, and will continue to teach and advise full time.

Donna J. Kuga

DuBois Campus appoints grants coordinator

Kathryn M. Neureiter has been appointed grants coordinator at the Penn State DuBois Campus. Her responsibilities include overseeing the search for and administration of federal, state and local grants in addition to coordinating the growing Tech Prep program.

As grants coordinator, Neureiter will administer existing grants including the Ben Franklin grant, now in its fourth year of funding. In addition, she will coordinate new grant efforts; search for additional sources of funding; and act as liaison between grant partners.

As Tech Prep coordinator, Neureiter will facilitate the implementation of Tech Prep curricula at each of the 14 DuBois Campus consortium schools, act as liaison among them and work to extend the Tech Prep advantage to additional schools and school districts. The Tech Prep program encourages secondary students who do not wish to pursue baccalaureate degree study to take more in-depth technical courses in preparation for associate degree study or to enter the work force with increased technical skills following high school graduation.

Neureiter holds a bachelor's degree in elementary education with a minor in science along with an associate degree in business administration, both from Penn State. She also has completed advanced course work in the field of financial accounting. Before joining the DuBois Campus administrative staff as Tech Prep secretary in 1992, Neureiter worked with a social service agency in Emporium as Head Start program assistant director, later advancing to the role of director. In addition, she worked in the Summer Youth Training Program, the Day Treatment Program and the Elk County Job Training Program. She also worked with the St. Marys Area School District.

Former WQED executive joins Penn State Public Broadcasting

Mark Smukler, former vice president and station manager at WQED in Pittsburgh, has been named director of media solutions for Penn State Public Broadcasting (WPSX-TV). He will oversee this production department with the mission of using media to extend the training and marketing expertise of Penn State to Pennsylvania's businesses and institutions.

Smukler started in production at WQED in 1984 and became station manager in 1990. He was involved in public affairs programs such as "The People's Business," "The Editors," the "Pennsylvania Road Show," "Pittsburgh History Series," and outreach projects in elder abuse, workplace literacy and health education.

Mark Smukler

A little help

Ann Mencher of Lemont gets a hand from her mom, Jan, while her sister Katie watches. The family was skating at the Penn State Ice Pavilion on the University Park Campus during a Diversions activity sponsored by the office of Summer Sessions. The skating rink is returning to fall semester hours, which are: Sunday, 1-3 p.m.; Tuesday and Thursday, 2-4 p.m.; Thursday, 8-10 p.m. (adults and Penn State students only); Friday, 7-9 p.m.; and Saturday, 1-3 and 8-10 p.m. The rink closes in the afternoon on football Saturdays.

For the Record

■ In the July 18 issue of *Intercom* under the academic promotions listing, the name of **Marc L. Harris**, who was promoted to associate professor, was misspelled.

■ Also in the July 18 issue of *Intercom*, the story on Penn Staters participating in the Olympics failed to list **Paul K. Canavan**, physical therapist/athletic trainer with the Center for Sports Medicine, as a certified

athletic trainer for athletes in the weight lifting, gymnastics and fencing venues.

■ Evan Pugh Professor **Hellmut Hager**, head of the Department of Art History, is stepping down after 24 years to devote more time to his scholarly research. His title was incorrect in a headline on page 7 of the Aug. 8 *Intercom*.

The ARTS

AT PENN STATE

On stage

Subscriptions for Center for the Performing Arts events are still available. Good seats for all 35 events, including the season-opening Haworth Shakespeare Festival presentation of "Romeo and Juliet," above, at 8 p.m. Saturday, Sept. 21, in Eisenhower Auditorium, can be had. The Center offers nine subscription packages, including the Cool Heat series featuring four jazz concerts. The Roy Hargrove Quintet opens the series with a concert Saturday, Oct. 5, in Eisenhower Auditorium. For tickets or more information, phone (814) 863-0255

Visiting dance scholar offers workshop

Angela Diki-Yannoukalis of Athens, Greece, will be a visiting scholar on the University Park Campus from Aug. 22 through Sept. 2. A Greek-Macedonian dance workshop and choreography for the Penn State International Dance Ensemble is scheduled for 9 a.m. to 7 p.m. Saturday, Aug. 24, in 133 White Building.

Yannoukalis is a 1991 graduate of the Penn State International Dance Ensemble and former assistant director.

She is a dancer with Lykeion Ellinidon in Athens, and owner-director of Dance Palette Studio in Athens. Her visit is hosted by Elizabeth Hanley, assistant professor and director of the Penn State International Dance Ensemble.

■ Greek-Macedonian dance workshop and choreography for the Penn State International Dance Ensemble, 9 a.m.-7 p.m., 133 White Bldg. Angela Diki-Yannoukalis, visiting scholar from Athens, Greece.

Monday, August 26
School of Music, 8 p.m., Recital Hall. Mark L. Lusk, trombone.

SEMINARS

Friday, August 23
Accounting, 3:30 p.m., 333 Beam BAB. Marilyn F. Johnson on "How Firms Responded to the New Tax Law Limiting the Deductibility of Certain Executive Compensation."

Geography, 4 p.m., 206 Walker Bldg. Lynn Liben on "The Pliagellan Water-Level Task Revisited: Why Can't People Get It Straight?"

Wednesday, August 28
Gerontology, noon, 101 H&H East. Adam Davey on "Pat- terns of Exchange and Older Adults' Mental Health: Do 'Matters Matter'?"

Friday, August 30
Geography, 4 p.m., 206 Walker Bldg. C. Gregory Knight on "The World Map of Precipitation Variability."

Partings

Hazleton director of Student Affairs retires after nearly 40 years of service

After nearly 40 years at Penn State, most of them at the Hazleton Campus, Joseph L. McCallus, director of Student Affairs at the campus, retired June 30.

In the various positions he held, McCallus has seen thousands of students make their way through his office either in the admissions process or as active members of the Student Government Association and its clubs and organizations.

From 1958 until his retirement, McCallus was responsible for student affairs, admissions activities, financial aid, cultural programming, veterans' affairs, residential life, student clubs and organizations, student disciplinary actions and health services.

McCallus taught accounting, management and finance for students in resident instruction and in continuing education courses. He also taught principles of economics, money and banking, supervision and principles of management for the American Institute of Banking.

Longtime employees retire from University service

LaRue E. Miller, staff nurse at The Hershey Medical Center, from Sept. 8, 1980, until June 1.

Lois R. Yohn, program aide, The Hershey Medical Center, from April 7, 1980, to May 1.

Dorothy M. Campolongo, medical assistant in the College of Health and Human Development, retired May 1 after nearly 22 years of service.

William L. Hilgar, HVAC maintenance mechanic in the Office of Physical Plant, from Jan. 26, 1968, to June 30.

John P. Houlland, instructor at the Penn State Beaver Campus, from July 1, 1989, to June 30.

Philip H. Lockard, electrician A in the Office of Physical Plant, from June 18, 1973, to June 30.

Martha G. Rossman, janitorial worker, Office of Physical Plant, from Sept. 19, 1977, to June 30.

CONFERENCES

Tuesday, August 20
Monoclonal Antibody Production and Purification, The Nittany Lion Inn. Through Aug. 23.

Friday, August 23
Bernstein's Traditions in Motor Control, The Penn State Scanticon, Through Aug. 25.

Wednesday, August 28
Columbia Gas Management Conference, The Penn State Scanticon, Through Aug. 29.

Thursday, August 29
Short Course on Powder Injections II, The Nittany Lion Inn. Through Aug. 30.

EXHIBITS

Palmer Museum
"Centennial: State College Remembers, 1896-1996," through Aug. 25.

"Selections of Contemporary Art from the Pincus Collection," through Dec. 15.

"The Wood Engravings of Warren Mack," through Jan. 5, 1997.

Zoller Gallery
"More is More," Visual Arts faculty collections. Aug. 27 through Sept. 17.

■ Reflects an international perspective

"The development of students is what has mattered most to me," McCallus said. "To see students in the Student Government Association and at the campus learn new skills they will take with them wherever they go...has been most gratifying to me."

McCallus received his B.S. and master's degrees in business administration from Penn State. He is a member of the National Association of College Admissions Counselors, National Association of Student Personnel Administrators and the Pennsylvania Association of Secondary School and College Admissions Counselors. He and his wife, Margaret Treibel McCallus, are lifelong residents of West Hazleton. Their four sons are all Penn Staters, and Margaret had a career as a library assistant at the campus in the 1960s.

In announcing his retirement, McCallus said, "I would welcome being invited back to serve the campus on committees if I might contribute my interests and energies to a place I love very much."

Verna V. Schwartz, staff assistant VI at The Hershey Medical Center, from Feb. 4, 1974, to March 30.

Eugene A. Waite, groundskeeper, Landscape A, Office of Physical Plant, from July 1, 1971, to June 30.

David L. Walker, plumber-fitter, Office of Physical Plant, from July 15, 1966, to June 22.

Nancy R. Warefield, janitorial worker, Office of Physical Plant, from March 19, 1979, to June 30.

Rhoda A. Williams, staff assistant VIII in the College of Health and Human Development, from Sept. 18, 1970, to June 30.

Richard L. Williams, research assistant in the College of Agricultural Sciences, from Nov. 1, 1973, to May 1.

Patricia L. Zimmerman, grill cook, HUB, Housing and Food Services, from Jan. 23, 1971, to March 30.

LECTURES

Multicultural dialogue on family violence Oct. 22-23

Health professionals, human service providers, advocates for women and scholars in related fields may want to attend "United in Our Diversity: A Multicultural Dialogue on Family and Intimate Violence," on Oct. 22-23 at The Penn State Scanton.

Intimate or domestic violence is a widespread health crisis with serious economic, political and human rights ramifications. At least 1 million women seek medical care for abuse-related injuries each year.

"United in Our Diversity" will address these multicultural issues of family and intimate violence for diverse populations in the United States. The program will provide an

opportunity for researchers to frame questions for further study based on the experiences of advocates, service providers and other researchers.

The closing ceremony of the conference will inaugurate the Women's Global Peace and Healing Alliance at Penn State as a place to archive, study and distribute the information shared and collected during the conference.

Anyone who would like more information about the conference agenda, please contact **Dee Frisque**, program planning associate, by phone: (814) 865-7679; fax: (814) 865-3589; or e-mail: dmr108@cds.psu.edu.

The deadline to register is Sept. 22.

Adult development, emotion topic of talks

An Emotion and Adult Development Conference will be held Oct. 7 to 9 at The Penn State Scanton on the University Park Campus. Registration deadline is Sept. 27.

The conference will address key topics in the study of emotion as applied to aging and adult development. Points of view will be considered that are relevant to biology, medicine, neuropsychology, developmental psychology, social psychology, sociology and anthropology. The major focus will be on the emotional processes characteristic of the general adult and aging population. However, the entire range of emotional function from normal behavior to emotional expression in pathological states will be addressed.

The conference, chaired by **M. Powell Lawton** of the Philadelphia Geriatric Center and **K. Warner Schaie**, Evan Pugh professor of human development and psychology,

will begin with an overview, followed by four topical sessions: Biopsychological Aspects of Emotion; Cognitive and Experiential Aspects of Emotion; Interpersonal and Social Aspects of Emotion; and Cultural and Environmental Contexts of Emotion.

A limited number of rooms have been set aside at the Scanton for conference participants. To make a room reservation, call (800) 893-4602 or (814) 863-5000, or fax (814) 863-5001 by Sept. 6.

Application has been made for APA credit. Each conference participant will receive a certificate for Continuing Education units earned.

For more information, call conference planner **Judy Hall** at (814) 863-5130, fax (814) 863-5190 or e-mail Conference@cds.psu.edu. For up-to-date conference information, visit the conference Web site at <http://www.cds.psu.edu/CCr/Emotion/>

BOOK SHELF

Simon Bronner, Penn State Harrisburg distinguished professor of folklore and American studies, is the author of *Popularizing Pennsylvania: Henry W. Shoemaker and the Progressive Uses of Folklore and History*, published by the Penn State Press.

Bronner's work is the first full-length biography of the late Shoemaker, America's first state folklorist and a pioneer of national conservation. Shoemaker worked with national leaders such as Theodore Roosevelt and Gifford Pinchot to heighten America's appreciation of nature, history and common folk.

Sintering Technology, edited by a group of Penn State researchers, is an up-to-date reference of the latest advances in the application of sintering to the most important industrial materials.

Published by Marcel Dekker Inc., New York, the book is a compilation of papers presented at an international conference on sintering held at Penn State. The publication was edited by **Randall M. German**, holder of the Brush Chair in materials and professor of engineering science and mechanics; **Gary L. Messing**, director of the Particulate Materials Center and professor of ceramic science and engineering; and **Robert G. Cornwall**, associate director of the Particulate Materials Center.

Sintering Technology is intended as a practical resource for mechanical, materials, ceramic, manufacturing,

metallurgical, chemical and electrical and electronics engineers; materials scientists; powder metallurgists; ceramists and physicists.

Sintering Technology provides guidance for start-up operations, explains new techniques and supplies new models for particle bonding and improvement simulations.

Wendell V. Harris, professor of English, is the editor of *Beyond Poststructuralism: The Speculations of Theory and the Experience of Reading*, a selection of essays which critique the excesses of poststructuralist theory and suggest ways in which the study of literature can be improved.

The book, published by Penn State Press (1996), points out fallacies of structuralist and poststructuralist thought and provides ideas that would bring literary study into closer relation with human experience and the world.

Nancy L. Herron, director of academic affairs at the Penn State McKeesport Campus, edited *The Social Sciences, A Cross-Disciplinary Guide to Selected Sources*, Second Edition, published by Libraries Unlimited, Englewood, Colo.

Prepared by practicing librarians, this guide offers researchers access to some of the best and most commonly used social science resources. It also can serve as a teaching text for students wanting a clear, straightforward

approach to learning about the most popular and important reference sources in the social sciences.

Contributing authors include **Kay Harvey**, head librarian, Penn State McKeesport Campus; and **Christine Avery**, **Debora Cheney**, **Cindy Faries**, **Kevin R. Harwell**, **Sally G. W. Kalin**, **Karl H. Proehl** and **Diane Zabel**, all from the University Libraries.

Proponents of legalizing hard drugs say that legalization wouldn't significantly boost drug use or the availability of drugs, and would relieve prison crowding and lower the costs of the criminal justice system. But **Kathleen Lodwick**, a Penn State Allentown Campus history professor who has written a book about the opium trade in 19th-century China, says history shows us that legalization won't work.

In her book, *Crusaders Against Opium: Protestant Missionaries in China, 1874-1917*, Lodwick tracks the history of the opium trade in China, the British government's involvement and the effect on both nations.

Opium use in China in the 19th century caused the physical decline and death of hundreds of thousands, destroyed families and brought about the collapse of many institutions, such as China's army, its businesses and its banking houses.

William J. Rothwell, associate professor of human resource development in the College of Education, is the author of *Beyond Training and Development: State-of-the-Art Strategies for Enhancing Human Performance*, published by AMACOM, a division of American Management Association in New York City. *Beyond Training and Development* provides a comprehensive new model for human performance enhancement and offers practical strategies for carrying it out.

In the book, Rothwell shows how human performance enhancement widens the landscape of training, transforming it from an isolated function to a driving force behind company achievement.

Rod Troester, associate professor of speech communication at Penn State Erie, The Behrend College, is the author of the book *Jimmy Carter as Peacekeeper: A Post-Presidential Biography*, published by Praeger. Troester shows how Carter, through his international humanitarian and peacekeeping efforts, both refurbished his image as president and redefined the role of a former president.

Carter left the White House in January 1981 in the wake of the Iranian hostage crisis, a faltering economy and a stunning defeat at the polls by Ronald Reagan. While most former presidents left to write their memoirs, establish presidential libraries, serve on corporate boards or assume the role of elder statesman and adviser to succeeding presidents, Carter took a different path.

According to Troester, Carter has shown that through active involvement in world affairs and humanitarian causes and through the careful investment of post-presidential credibility and political capital, a former president can make significant contributions to a more peaceful world.

Vladimir M. Zatsiorsky, director of the Biomechanics Laboratory, Department of Kinesiology in Health and Human Development, wrote *Science and Practice of Strength Training*, published in the United States by Human Kinetics Publishers.

A German edition of the book is published by Meyer & Meyer Verlag, Aachen, Germany.

Penn Staters

Micela Amato, associate professor of art and women's studies and area head of painting and drawing in the School of Visual Arts, presented a paper and at the Fifth Conference of the International Society for the Study of European Ideas in Utrecht, The Netherlands. The conference, "Memory, History and Critique: European Identity at the Millennium," was held at the University for Humanist Studies, Utrecht. Amato's paper was titled, "Another Form of Blood, Memory is also Truth and Life."

Associate professors of music, **Dan C. Armstrong** and **Eleanor Duncan Armstrong**, The Armstrong Flute and Percussion Duo, have released a new compact disc, "Exotic Chamber Music," on the Centaur label.

Andrew T. Bergstein, instructor in marketing in The Smeal College of Business Administration, has been named to a second two-year term on the bi-partisan Trade Policy Advisory Committee. The committee advises the U.S. Commerce Department and trade representative on federal programs to support trade and exports by American industry. The 25-member body includes representatives from major U.S. corporations, industry groups and business consultants.

Anthony Castro, senior research associate in veterinary science and associate director of the Animal Diagnostic Laboratory, was elected to the Board of Governors of the American College of Veterinary Microbiologists. The board certifies graduates in veterinary microbiology.

Julie Heffernan, assistant professor of art in the School of Visual Arts, recently had a solo exhibition of her paintings, "Julie Heffernan Paintings," at the Littlejohn Contemporary, a gallery in New York City.

Dale Jacquette, professor of philosophy, presented the paper "Intentionality on the Installment Plan" at the Rijksuniversiteit Utrecht, The Netherlands, as part of the J. William Fulbright Commission for Cultural, Educational and Scientific Exchange between the United States and The Netherlands.

He also presented "Truth as a Regulative Concept of Philosophical Semantics," at the Conference on Truth, Inter-University Centre of Dubrovnik, Croatia, held in Bled, Slovenia; "Neurobiology and the Soul," at the Ciclo Sobre Cien-

cia Cognitiva, Universidad Complutense de Madrid, Spain; and "Searle's Antirealistism," at the Universidad del Pais Vasco, Spain. In addition, he was the invited speaker on "Wittgenstein: Logic and Ethics," where his lectures included: "Wittgenstein on Logic in the Tractatus and 'Some Remarks on Logical Form,'" and "Wittgenstein on the Transcendence of Ethics." The lectures were given at the Universidad del Pais Vasco, Institute for Logic, Cognition, Language and Information.

Budugur Lakshminarayana, Evan Pugh professor of aerospace engineering, has received the Fluids Engineering Award from the American Society of Mechanical Engineers for major contributions in the area of fluid machinery engineering which have directly benefited industry and researchers worldwide. He also was honored for educating an "impressive cadre of students who now hold key positions in the turbomachinery industry." The award was established in 1968.

Ruth Anne Mears, senior extension agent in Clarion County, received one of 10 national 1996 Leaders Awards from the American Association of Family and Consumer Sciences.

Robert E. Newnham, Alcoa professor of solid state science; **Aydin Dogan** and **Sedat Alkoy** for the Intercollege Materials Research Laboratory, presented "Miniature Piezoelectric Hollow Sphere Transducers" at the 50th Anniversary of the International Frequency Control Symposium.

Benjamin Nolt, extension assistant in agricultural and extension education, was appointed by Gov. Tom Ridge to serve as the executive secretary of the Pennsylvania Horseracing Commission.

Helen O'Leary, assistant professor of art, has been awarded a grant from The Pollack-Krasner Foundation Inc., of New York City. The Pollack-Krasner Foundation Inc., assists the careers of artists of merit. O'Leary, a painter, participated in a residency at the Tyrone-Guthrie Centre, Monaghan, Ireland.

Joan Thomson, associate professor of rural sociology, served as a member of the 1996 U.S. Department of Agriculture Higher Education Challenge Grants Program Peer Review Panel. The panel considered proposals in curricula

design and materials development, faculty preparation and enhancement, instruction delivery systems and student experiential learning.

Fred Vondracek, professor of human development in the Department of Human Development and Family Studies, presented an invited talk at the Bergische University of Wuppertal in Wuppertal, Germany. The title of his presentation was "Studying Career Development from the Developmental-Contextual Perspective: The Sample Case of Identity Development."

Richard Walter, assistant professor of education, will serve as the editor of *Occupational Education Forum*, a publication started at Penn State in 1971. The publication previously was housed at North Carolina State University, Texas A & M University and Volusia County Schools in Florida.

A video titled "23 Hours in County Government," produced by **Steven Williams**, senior producer/director in agricultural information services, won the 1996 Award of Excellence sponsored by the National Association of County Information Officers. **Timothy Kelsey**, assistant professor of agricultural economics, was a consultant for the project, which was a joint venture with the County Commissioners Association of Pennsylvania and Penn State Cooperative Extension.

Richard A. Wysk, Leonard Chair in engineering and professor of industrial engineering, was recently named a Fellow in the Society of Manufacturing Engineers.

Charles Yesalis, professor of health policy and administration and kinesiology, has been elected to the Alpha Chapter of Delta Omega Honorary Society in Public Health. The honor is reserved for distinguished alumni of the Johns Hopkins University School of Hygiene and Public Health.

John Yocum, senior research associate in agronomy, received the Man of the Year Award from the Pennsylvania Plant Food and Protection Educational Society.

Vladimir M. Zatsiorsky, director of the Biomechanics Laboratory, Department of Kinesiology in Health and Human Development, gave an invited lecture on "Strength Training for Power Performance" at the 1996 Conference of the National Strength & Conditioning Association.

25-year Awards

Wanda Ayers

Nancy Struble

Sharon Becker

Rebecca Young

James J. Kelley

Anne L. Robbins

Observing 25 years of service at the University are, from left, Wanda Ayers, staff assistant V, and Nancy Struble, staff assistant VI, both in the University Libraries; Sharon Becker, administrative assistant II, and Rebecca Young, administrative assistant III, both in the Office of the President; James J. Kelley, senior associate director, Division of Undergraduate Studies; and Anne L. Robbins, administrative assistant IV, Department of Comparative Medicine at The Hershey Medical Center.

Program keeps alive the lessons of hard labor

By PAUL A. BLAUM
Public Information

Walter Prozialek, 76, wants to give away his wealth — wealth of experience, that is. A program called the Open Hearth Education Project (OHEP) is helping him do that.

With assistance from Penn State professors **Howard Harris** and **Fred Schied**, OHEP draws on the past to help retrain and educate dislocated workers.

Workers like Prozialek know well the lessons of hard labor, having been employed in the mines at Bethlehem Steel for three different stints and with the New York Central Railroad. During his varied career, he was both worker and supervisor.

"People who work hard with their hands will look for better and easier ways to do their jobs. They have to be able to think," he said. "For instance, I remember young miners who thought digging coal was all muscle and then were surprised that they couldn't keep up with their dads. The thing was, their dads had figured out ways to pace themselves and save their energy."

Prozialek still lives close to his roots, in the rural coal-mining town of Dunlo (population 850), east of Johnstown. His dream is to pass on his knowledge of working class life to succeeding generations, for whom steel mills, railroads and coal mines are fading relics belonging to another time and place.

OHEP, founded by **Jim Abrams** and **Danny Pfeilsticker**, allows the voice of working people like Walter Prozialek to be heard by teaching them to be educators, interpreters and tour guides at industrial and ethnic heritage sites.

Based in Johnstown, OHEP grew out of the Folklife Division of America's Industrial Heritage Project. The

Steel making

Labor-intensive jobs of the past will not be forgotten, thanks to the Open Hearth Education Project. The program retrains dislocated workers from the coal, steel, railroading, garment, glass and aluminum industries to act as educators, interpreters and tour guides at industrial and ethnic heritage sites.

Folklife Division, coordinated originally by Abrams, started collecting oral histories and producing collaborative research projects with working people in 1989.

In cooperation with Penn State, OHEP offers a two-month retraining program for dislocated and retired workers from the coal, steel, railroading, garment, glass and aluminum

industries. Harris, associate professor of labor studies and industrial relations at the Penn State New Kensington Campus, and Schied, assistant professor of adult education, worked with Abrams to coordinate this certification program which began last summer with two classes: "History of the American Worker" and "Interpretive Techniques for Workers' Education."

The classes teach former miners, railroaders and factory workers how to use media technologies to educate the public about working people and the labor movement. Near the end of the course, participants give presentations which combine their newly acquired skills as interpreters with their knowledge of labor history and their own personal experiences.

"Many workers, unlike some academics, reject the notion that current economic processes are always inevitable," Schied said. "To be specific, they don't believe the U.S. steel industry necessarily had to collapse in the 1980s. In their view, if the owners had put money back into aging mills 20 or 30 years ago, steel workers might not be so economically hard pressed today."

Through OHEP, steel workers can have their viewpoints included in the public record. Otherwise, later generations will simply assume that the decline of steel was a natural progression, Harris added.

"Were going beyond the conventional, Disney-fied touristic approach," Schied said. "The labor movement is still going on in America and around the world. It isn't ready to be embalmed in formaldehyde."

Prozialek takes a more personal approach.

"I've really enjoyed sharing my work experiences with students, both boys and girls. I must distribute my wealth before I go to the cemetery," he said.

Obituaries

Katharine H. Clouser, secretary in the Graduate School, from June 1, 1954, until her retirement July 1, 1970; died July 12 at the age of 91.

Clouser was a graduate of State College High School and is survived by her daughter, **Nancy C. Thompson** of Helena, Mont.; two grandsons; and one great-grandson.

Raymond P. Cullen, community services officer at the Penn State Delaware County Campus, from Oct. 28, 1991, until his retirement Sept. 1, 1995; died June 19. He was 65.

Charles A. Gilson Sr., janitorial worker in the Office of Physical Plant, from Aug. 25, 1966, until his retirement Oct. 22, 1977; died May 4. He was 80.

Janis Russell Kokat, 58, a former music and piano teacher at Penn State, died June 8 of cancer at her home in Malvern, Pa.

For the last six years, she was employed by Rhone-Poulenc Rorer Inc. in Collegeville, working in the firm's regulatory affairs department in research and development.

A native of Great Bend, Kan., she earned a bachelor's degree in music from Oberlin Conservatory and a liberal arts degree from Oberlin College in 1959.

In 1984, she earned a bachelor's degree in mathematics at West Chester University and then went to work for Roy F. Weston Inc., an environmental management firm in West Chester, before joining Rhone-Poulenc Rorer.

Wirth V. McCoy, professor of art in the College of Arts and Architecture, from Sept. 1, 1964, until his retirement July 1, 1979; he died May 11 at the age of 82.

Paul W. Musselman, who retired from Penn State as a janitor in 1981, died Tuesday, July 9, at Centre Community Hospital. He was 80.

Musselman was a 1936 graduate of Selinsgrove High School and attended Susquehanna University, where he majored in business. He served in the U.S. Air Force for 14 years and was a veteran of World War II.

Maria E. Noss, dining hall worker for 10 years before retiring in 1958, died July 6 at the age of 93. She was a mem-

ber of the State College Evangelical Free Church and is survived by one daughter, **Elizabeth M. Byers** of State College; one son, the Rev. **Charles N. Noss** of Clinton, Tenn.; one brother, seven grandchildren and four great-grandchildren.

Phyllis Arline Durst Reeves, 73, who worked at the chemistry and physics library as well as Pattee Library, died Friday, July 5.

A 1942 graduate of Otterbein College, Reeves died graduate work at Penn State. She also worked at Schlow Library in State College. She was a member of numerous civic and charitable organizations and a volunteer at Centre Community Hospital.

Awards

Professor named 1997 Alliance Scholar

R. Scott Kretchmar, professor of exercise and sport science, has been named the 1997 Alliance Scholar by the American Alliance of Health, Physical Education, Recreation and Dance (AAHPERD).

Kretchmar is the sole recipient of the award this year. The program began in 1975.

Kretchmar, who was selected from a pool of researchers in the fields of kinesiology, health education, leisure studies and dance, will deliver the Alliance Scholar Lecture during the AAHPERD national convention and will speak before groups chosen by the AAHPERD executive committee. AAHPERD is committed to encouraging and facilitating research and creative activities to enrich the depth and scope of health, leisure, sport, dance and related activities.

Kretchmar has been at the University since 1984. From 1984-89, he served as head of the Department of Exercise and Sport Science. He also has taught at the University of Southern California, Emporia State University, SUNY Brockport and the University of Massachusetts. He is currently chair of the University Faculty Senate and is a Fellow of the American Academy of Kinesiology and Physical Education. In addition, he has written three books and had more than 30 articles published in professional journals.

R. Scott Kretchmar

Associate professor is Shenango Campus teacher of the year

Kevin Berland, associate professor of English and comparative literature at the Penn State Shenango Campus, has received the Teacher of the Year Award from that campus.

Instituted in 1984, the award recognizes outstanding educators at Shenango. Berland was selected for his willingness to support, encourage and facilitate his class students and those who participate in the honors program.

Berland received both his bachelor's degree, with first-class honors, and master's degree in English from Carleton University, Ottawa, Ontario. He also received his Ph.D. in English from McMaster University, Hamilton, Ontario, in 1983.

He began his career at Penn State Shenango in 1982 as an assistant professor of English. Since then, he was promoted to associate professor. Over the years, he has served on various campus and University committees and is a member of the University Faculty Senate; serves as coordinator of the campus Honors English Program; and co-chairs the campus honors program. In 1995, he was given the Penn State Outstanding Adult Mentor Award.

Russian Distance Learning project earns accolades

The Russian Distance Learning Project, a cooperative distance education venture between Penn State, the University of Minnesota and the U.S. Peace Corps, has received a 1996 Award for International Programs from the Association of Continuing Higher Education.

Since its inception in 1995, 80 Russian students and professionals have participated in the project. The second of two groups of 40 students is now enrolled in distance education courses in business, American government, international relations and educational systems at both universities. Students receive course materials by U.S. mail and submit lessons and communicate with instructors by electronic mail via the Internet.

The Russian Distance Learning Project also has the endorsement of the chairman of the Russian Federation State Committee on Higher Education, which is equivalent to the U.S. Secretary of Education.

The project is the first to use distance education technologies to extend American educational programming to people in the Russian provinces. Other similar programs have involved students in Moscow.

Peter K. Forster, assistant director for the Department of Distance Education, a unit of Continuing and Distance Education, and Richard Brown, program director for Independent Study at the University of Minnesota, collaborated with U.S. Peace Corps officials to develop the project for students in the cities of Volgograd and Saratov. Forster and Brown are planning to increase the involvement of Russian higher education institutions. In addition, they are culturally adapting the project to the Russian environment.

Future plans for the Russian Distance Learning Project include the development of joint certificate programs by two Big Ten universities.

Beaver Campus assistant professor honored for excellence in teaching

Robert Szymczak, assistant professor of history, is the recipient of the 1995-96 Penn State Beaver Campus Award for Excellence in Teaching.

The award is presented annually by the Beaver Campus Advisory Board, which solicits recommendations from campus students and faculty.

Szymczak also received the Beaver Campus Award for Excellence in Teaching in 1991 and has been nominated for four other University-wide teaching honors. In 1994 he received the Beaver Campus Award for Outstanding Research for his scholarship in the fields of eastern Europe, World War II diplomatic history and American ethnic politics.

Robert Szymczak

Szymczak holds a bachelor's and a master's degree in history from West Virginia University, a master of arts degree in liberal studies from Duquesne University and a doctorate in history from Carnegie Mellon University. He also received a certificate of study at the Jagiellonian University in Krakow, Poland, and has held visiting fellowships at Yale, Princeton and the University of Pennsylvania.

A Penn State faculty member since 1982, Szymczak is the author of 30 articles which have appeared in academic journals, historical magazines and other publications

and has presented 40 papers at professional conferences.

Assistant professor wins national honors

Karl Todd Mueller, assistant professor of chemistry, has been selected as one of 18 young faculty scientists nationwide to receive the 1996 Cottrell Scholar Award from the Research Corp., a foundation for the advancement of science.

This year's recipients include seven chemists, 10 physicists and an astronomer selected from among university faculty nationwide for their "excellent research proposal, good plans to improve science teaching and a vision for the improvement of the academic science community."

Mueller was recognized for his contributions to undergraduate and graduate teaching and his commitment to pursuing a career as a teacher-scholar.

This award will help support Mueller's research in nuclear magnetic resonance spectroscopy.

The Cottrell Scholar Award is named in honor of Frederick Gardner Cottrell, the scientist, inventor and philanthropist who established Research Corporation in 1912. The foundation's goal is "to make inventions more available and effective in the useful arts and to provide means for scientific research and experimentation."

Scientist garners Searle Scholar Award

J. Martin Bollinger Jr., assistant professor of biochemistry and molecular biology, is one of 15 scientists nationwide to receive a 1996 Searle Scholar Award.

According to the Searle Scholar Program, this year's winners, chosen from 160 candidates at 86 universities, were selected for exhibiting "evidence of having the potential to make significant contributions to biomedical research over an extended period of time." The awards are intended for young biomedical scientists who are newly appointed assistant professors. Each Searle Scholar is awarded a three-year grant of \$180,000 to support his or her research efforts. Bollinger's research concerns mechanisms of assembly of complex metal ion cofactors in enzymes and regulatory proteins. His research addresses this issue in several systems with relevance to human health.

Bollinger earned his bachelor's degree in chemistry in 1986 at Penn State and a doctoral degree in biochemistry in 1993 from the Massachusetts Institute of Technology. He was a postdoctoral fellow at Harvard Medical School before joining the Penn State faculty in 1995.

Although there is no single accepted procedure for determining the load-carrying capacity of a masonry arch bridge, Thomas E. Boothby said just looking at the bridge may become an important part of the rating process. Boothby's research shows specific wear patterns on this type of bridge that may help predict bridge failure.

Photo: Greg Grieco

Engineering study tells when stone bridges are falling down

By BARBARA HALE
Public Information

Nursery songs to the contrary, it's not easy to determine whether any given stone bridge is in danger of collapse.

However, an architectural engineer is making progress on identifying the characteristics that signal failure in these historic and often beautiful structures. His work promises to contribute to historic preservation as well as public safety.

Thomas E. Boothby, assistant professor of architectural engineering and research associate in Penn State's Pennsylvania Transportation Institute, published early results of his work in a paper, *Collapse Modes of Masonry Arch Bridges*, in *Masonry International*.

He notes that more than

500 stone, arched bridges are currently in service in the eastern United States alone. Many of these structures, which were built primarily in the 19th century, are listed on or are eligible for listing in the National Register of Historic Places. Their preservation is often mandated by Federal guidelines.

Boothby said, "At present, there is no accepted procedure for determining the load carrying capacity of a masonry arch bridge." However, as a result of the engineer's analyses, just looking at the bridge may become an important part of the load rating process.

In his recent paper, Boothby wrote, "The identification of collapse mechanisms provides an important tool for the visual inspection of arch bridge structures by furnishing a pattern of expected damage."

Boothby analyzed three types of failure unique to stone bridges in his paper, including "hinging," in which a space opens between two stones in the arch; "sliding," in which a stone slips out of place; and a combination of hinging and sliding in which both of the defects occur.

Boothby writes that the combination mode is most likely found in bridges with low rise/span ratios. Hinging predominates in structures with high rise/span ratio and narrow arch rings or structures that are well buttressed.

Sliding modes of collapse have not been observed in the ultimate load tests that have been conducted on masonry arch bridges in England where there are almost 100 times as many stone bridges as in the United States, he said. However, he thinks this is possibly due to the massive

abutments on the bridges in England. Bridges in the U.S. have smaller abutments and it's therefore more important to look for evidence of sliding in the United States.

Boothby, who was trained both as an architect and as a civil engineer, has also received training as a stone mason. He participated in the stone cutting program offered at the Cathedral of St. John the Divine in New York City and also works with local mason Philip Hawk.

He is interested in historic buildings as well as bridges and is collaborating with Elizabeth Bradford Smith, associate professor of art history, on the interpretation of medieval architecture, and with Charlene Roise, an architectural historian in Minneapolis, on methods to preserve buildings constructed in the recent past.

Scientists use zebra fish to unlock mutations' secrets

Geneticists at The Milton S. Eisenhower Medical Center are breeding and studying an inch-long tropical fish to try to gain insight into why and how genetic mutations occur, as well as their potential roles in cancer.

Keith Cheng, assistant professor of pathology and biochemistry and molecular biology, said he and his research team hope to find new methods to detect genetic damage in the fish, which can potentially be used to test for toxicity of environmental cancer-causing agents.

Cheng has built elaborate fish facilities on the seventh floor of the Biomedical Research Building and in the animal facility, where he and his research team carefully breed colonies of zebra fish.

"At this point, we're looking for new genes and their role in the genome," he said.

Cheng believes that the tendency of zebra fish to develop cancer while carrying genetic damage, or mutations, will provide an animal model for certain human genetic syndromes that predispose people to cancer.

He and postdoctoral fellow Jessica Moore are using a traditional approach to study genetic instability. The researchers expose the fish to a potent chemical mutagen, ethylnitrosourea, or ENU. According to Cheng, ENU "breaks up" genes. The researchers will look for mutant fish whose DNA has become unstable, then attempt to identify the genes damaged by ENU that are responsible for the instability.

Developmental biologists have used zebra fish, particularly in the last five years, to learn how vertebrate organisms grow and mature, all the while dissecting the genetics involved. The zebra fish is a developmental biology model, a small, easily manipulated organism that can be studied in molecular detail, much like the classic laboratory fruit fly. Yet the fish essentially provide a vertebrate model to study the development of the brain and spinal cord in creatures such as humans. The fish are inexpensive and relatively easy to use, Cheng said.

The developing fish embryos are transparent and can be examined under a microscope step by developmental step. Within a day after conception, a single fertilized egg develops into a transparent embryo with eyes and a beating heart.

Cheng believes that he and Moore are the first to use zebra fish to study genetic instability and cancer development.

LionCam location suggestions sought

The "LionCam" (pictures from which are viewable on the Web at <http://www.ur.psu.edu/cam/lioncam.html>) is moving to a new physical location soon, but we're soliciting suggestions for other good camera locations at University Park for future use.

Here are the LionCam site requirements:

- A secure, lockable, indoor location with an interesting and unobstructed view of campus.

- A dedicated backbone connection and convenient power supply.

- A loaner computer (preferably a Macintosh of the Mac II line or later, with a NU BUS connection for video card, and ethernet capabilities for networking).

The camera that has been mounted in the fourth floor of Old Main since the Arts Festival is going to be moved soon to Carnegie Building. The new view will be of the mall area between Schwab Auditorium and Willard Building, and the heavily traveled sidewalks on either side of Pollock Road in that area.

Another camera location is being scouted for fall football views at Beaver Stadium.

Please send suggestions via e-mail to Doug Stanfield@psu.edu.

Other Sites

The following Web site is an online reference desk, and there's something here for almost anyone. There are sections on things like time and weather, phone numbers and area codes, postal delivery services, online books, dictionaries, encyclopedias, writing aids, law and legal information and much more.

My thanks to Jane Houlihan for this one. I use it all the time. URL: <http://www.sil.org/general/reference.html>

If you know of an unusual or particularly interesting use of the Web, please send the URL to Doug Stanfield@psu.edu.

Memorable moment

In 1983, President Ronald Reagan, third from left, presented Fred Waring, second from left, with the Gold Medal of Congress. Waring's wife, Virginia Waring, has donated the medal to the University Libraries' Fred Waring Collection.

Archive photo: Courtesy Pattee Library

Waring's Gold Medal of Congress donated to University Libraries

The original Gold Medal of Congress awarded to **Fred Waring**, the well-known composer and musical director, has been donated to the University Libraries' Fred Waring Collection by **Virginia Waring**, wife of the entertainer.

Fred Waring and the Pennsylvanians entertained America for 69 years. Waring was awarded the medal "for his achievements as composer musical director educator ... for the pleasure

given countless admirers through music and song." He was only the third entertainer after Bob Hope and John Wayne to be honored with this award.

The medal was presented to Waring by President Ronald Reagan at the White House on Dec. 15, 1983. A joint resolution passed by both houses of Congress allowed for an appropriation of no more than \$20,000 for the design,

creation and striking of the medal. It also authorized the Treasury Department to make bronze duplicates for sale to the public which would recoup the expense of the medal.

For display purposes the collection has several of the bronze replicas of the medal. The actual gold medal can be found in the Rare Books Room of Pattee Library on the University Park Campus.

Summer fun

There's still a little bit of tree-climbing weather left before fall makes its appearance, and Elaine Tillotson, 3, a daughter of Catherine Harmonosky, associate professor in the College of Engineering, and Rick Tillotson, research assistant in the Applied Research Laboratory, took an opportunity to enjoy it recently. She was spotted outside the Creamery on the University Park Campus during an Office of Summer Sessions-sponsored Ice Cream Diversions program.

Spanier to announce initiatives in State of the University address

By LISA M. ROSELLINI
Public Information

With more than a year of experience as Penn State's president under his belt, Graham B. Spanier will outline his plans for the coming year in the annual State of the University Address set for 4 p.m. Friday, Sept. 6, in Eisenhower Auditorium on the University Park Campus.

An open reception from 5 to 6:30 p.m. in the HUB Ballroom will follow.

Last year, just 15 days into his presidency, Spanier took to the podium to not only introduce himself to the University community but to reveal his vision for Penn State. The blueprint laid out by Spanier during that talk promised change and unveiled a goal of making Penn State the best at integrating its three mis-

sions of service, teaching and research. He also said he would work to expand the public's confidence in both higher education and Penn State.

This year, Spanier plans to announce several initiatives of importance to the future of Penn State. Without disclosing the content of his speech, Spanier said his annual talk with the University community is

See "Address" on page 3

Planning and Analysis, CQI offices to merge

The Center for Continuous Quality Improvement and the Office of Planning and Analysis will be merged on Sept. 1 to create the Center for Quality and Planning, according to John Brighton, executive vice president and provost.

The combination of the two offices, both located in Old Main and reporting to the provost, is the result of a review that took place following the announcement by Greg Lozier, executive director of the planning office, that he was leaving the University to accept a new position. (Please see story on page 13.)

Louise Sandmeyer, executive director of the CQI Center, will assume responsibility as executive director of the combined unit.

See "Merge" on page 3

Airport expansion project taking off

The construction of the extension of the main runway at the University Park Airport in Centre County will begin this fall and continue a long-range improvement plan designed to meet the existing and growing demand for air service by Central Pennsylvania travelers.

The airport serves as a gateway for Penn State and other major employers in the region, and is the seventh busiest airport out of 16 scheduled service airports in the Commonwealth, with nearly 200,000 passengers using the airline terminal last year.

Award recognizes namesake's global efforts

By AMY OAKES
Public Information

Penn State's International Achievement Award has been renamed the W. LaMarr Kopp International Achievement Award in honor of the retiring deputy vice president for international programs, who will step down Aug. 31. Kopp is being honored for his efforts to make the University part of the global community.

Kopp, who has been with the University for more than 33 years — serving in a number of administrative positions for the last 25 years — said he is happy to be remembered in such a way.

"It's the greatest honor I can imagine," he said.

The award, in its third year, recognizes an undergraduate student, a graduate student and a faculty member for their contribution to the advancement of the University's global mission. Criteria for the undergraduate and graduate awards include service to the international community and research with a significant international component. Requirements for the faculty award include achievement in international education and a commitment to meeting the special needs of students and faculty from other countries. Each award carries a \$1,000 stipend and a certificate of recognition.

Kopp said the award serves three purposes: as a stimulus for others to become involved in international studies; as a way to honor the work of people striving to bring the global community closer; and as a way to show the University's commitment to internationalization.

"LaMarr Kopp is truly one of the pioneers of international education," said John Brighton, executive vice president and provost. "Under his guidance, Penn State has streamlined its international

"This is an interdependent world, in which we have to know our neighbors and to understand that they have their own priorities, just as we do. It is incumbent on us in our role as educators to develop a generation of new leaders who are globally informed."

W. LaMarr Kopp
retiring deputy vice president
for international programs

operations and expanded its programs and goals to enhance the intercultural understanding of students and the University community as a whole. It is fitting that this award should carry his name."

The renaming of the award will not only honor Kopp's work in bringing Penn State into the world community but his lifelong efforts to bring the global village closer and make it more accessible.

"This is an interdependent world, in which we have to know our neighbors and to understand that they have their own priorities, just as we do. It is incumbent on us in our role as educators to develop a generation of new leaders who are globally informed," Kopp said.

Kopp was heavily involved in the plan for internationalizing the University put forth in 1994 by the International Council. His office is responsible for Penn State's 42 Education Abroad Programs, for 2,500 international students from more than 110 countries and for international cooperative pro-

grams, including agreements and cooperative projects with some 90 partner universities around the world.

In 1983, Kopp played a key role in establishing and organizing the University Office of International Programs with three divisions: the Office of International Students, the Office of Education Abroad Programs and the Office of International Cooperative Programs.

Before accepting his position as deputy vice president for international programs, Kopp, a professor of German, was also an assistant and associate dean in the College of the Liberal Arts, director of the Foreign Studies Program and associate provost for International Programs. Kopp also has served as an officer for national organizations, such as the American Association for Teachers of German, the Council of Colleges of Arts and Sciences and the Council on International Educational Exchange.

Before coming to the University, Kopp served as executive director of the International Voluntary Service Organization in Switzerland and worked with the Deputy Prime Minister's Office on Technical Service Agreements in the Royal Government in Swaziland.

Kopp was made an instructor of German at Penn State in 1962 and was named professor in 1975.

Finalists for 1996/1997 award will be named in January.

This year, the award's selection committee is chaired by Norman Freed, associate dean in the Eberly College of Science. Committee members are: Thomas Hale, professor of African, French and comparative literature; Courtney Mundy, undergraduate student in music; Noriko Toyokawa, graduate student in health education; and Richard Devon, associate professor of engineering.

Behrend begins construction on residence hall

Ground was broken Aug. 2 for a new residence hall for University scholars and honors students studying at Penn State Erie, The Behrend College, a move that will increase the number of dedicated housing spaces for this group of students from 32 to 108.

The Almy Hall Living and Learning Center will house 128 students in single-sex suites of four students each. Twenty percent of the available space is open to any student. Each wing of 16 students has its own study lounge; all students agree to abide by quiet study policies. The new hall is intended to be a living and learning environment that fosters academic excellence, out-of-classroom intellectual and social experiences and mentoring relationships.

Located west of a trio of suite-style residence halls built in 1991, Almy Hall is named after Thomas C. Almy, sailing master of the schooner Somers, part of Oliver Hazard Perry's fleet. The naming of the hall follows college tradition that residential facilities bear the monikers of people and ships associated with the Battle of Lake Erie.

Construction of the new residence hall, estimated at \$4.4 million, is funded by Penn State Housing and Food Services.

Hands-on learning

Marianna Blue-Lenze, left, Natascha Pockel, Suzie Patterson and Elizabeth Ferry work to devise a delivery system to separate two whistle balls and one golf ball during a Women in Engineering camp for high school students. The three-day summer camp was held on the University Park Campus.

Airport

continued from page 1

officials joined Penn State administrators in a groundbreaking ceremony Aug. 20. With the receipt in May of the final \$11.9 million in grants from the Federal Aviation Administration and the Pennsylvania Department of Transportation, the last of the funding was in place for the runway extension. About \$6.1 million had been previously released from federal and state agencies for design, engineering and the initial construction phase of the project. The total project cost is estimated at approximately \$18 million. The project includes the lengthening of the runway from its current 5,000 feet to an ultimate length of 6,700 feet, as well as other supporting infrastructure improvements.

The runway extension stemmed from the need of corporate aircraft and some commuter aircraft for additional runway length to allow them to carry their designed load of passengers, baggage and fuel on hot days. The project also includes the replacement of aging runway and taxiway lighting and wiring, the widening of taxiways to bring them to current standards and the repair and strengthening of existing 20-year-old pavement.

Up, up and away

The University Park Airport expansion project will extend the main runway, enabling larger planes like this corporate jet to carry their full loads on warmer days. The project will also repair and strengthen existing pavement.

Photo: Greg Grieco

The airport is home to nearly 40-based aircraft and hosts 54,000 take-offs and landings a year. Three airlines — USAir, United and Northwest — have established nearly 40 regularly scheduled daily flights to and from the hub cities of Philadelphia, Pittsburgh, Washington, D.C. and Detroit.

In addition to serving area businesses and travelers, the airport is home to many aviation-related services. It is used by various law enforcement agencies and emergency medical services and hosts the Pennsylvania Air National Guard 114th Air Traffic Control Flight.

The airport tenants and visitors to the University Park Airport generate significant economic benefits on an annual basis, providing 139 jobs and \$12 million in payroll. But a recent report estimated the impact of direct spending and secondary visitor-related spending at \$68 million.

Address

continued from page 1

an important message that would convey some key goals for the coming year. The president urged all faculty and staff to attend because the speech will cover issues vital to the entire University community. The speech will be broadcast via satellite to all campus locations outside of University Park. For information on where you can view the address live, contact the public information officer at your campus. Text of the address also will appear after the event on the World Wide Web at URL <http://www.ar.psu.edu/>

"My vision is still to be the top institution in the United States in the integration of teaching, research and service. That has not changed," Spanier said. "What will continue to evolve is the way we accomplish this vision."

Over the past year, Spanier has announced historic changes to be instituted in both Penn State Cooperative Extension and the 23-campus Commonwealth Educational System — two key components in the University's makeover.

Following the course he charted during his first University-wide speech, Spanier embarked on a yearlong tour of the Commonwealth; met with scores of community leaders, alumni, agricultural and industrial leaders, media and prospective students; traveled to Harrisburg to testify on several occasions on behalf of additional state funding for higher education; took new faculty members across the state to visit various sites; and responded to more than 10,000 e-mail messages.

Who: President Graham B. Spanier

What: State of the University Address

When: Friday, Sept. 6

Where: Eisenhower Auditorium on the University Park Campus; address will also be broadcast live via satellite to Commonwealth Campuses

Merge

continued from page 1

"This restructuring will allow Penn State to continue to move forward with its important efforts in continuous quality improvement and strategic planning," Brighton said. "The center will work closely with the Office of Budget and Resource Analysis to provide staff support for activities related to the planning and budget process."

In recent years the planning office has been involved in the University Future process and more currently in the efforts of the University Planning Council to engage in a five-year strategic planning process for Penn State.

The CQI Center, under Sandmeyer's guidance, has been instrumental in bringing continuous quality improvement philosophy and practice to Penn State. By employing a customer-focused approach, CQI teams at all levels of the University have implemented changes that enhance value and efficiency.

Sandmeyer will join the University Planning Council, chaired by Brighton, and assist in supporting its activities.

"Louise Sandmeyer has been instrumental in introducing CQI ideas throughout the Penn State system in recent years," Brighton said. "She has worked closely with the planning office in the past and this opportunity to combine efforts, and staff, will help us integrate the University's efforts in these two important areas."

Louise Sandmeyer

LECTURES

Seminar gives input on choosing a publisher

The seminar "Choosing the Right Publisher: A Bookseller's Perspective on Academic Publishing," will be presented on three separate dates this fall.

The seminar, designed to help participants clarify their publishing objectives and understand their options better, will include an introduction where participants will define their publishing objectives and goals. Presentations will include topics such as "The Book Business," everything you need to know about the different types of books, distribution methods, and the publishers' and booksellers' points of view; "The University Press," how the university presses—especially the smaller up-and-coming presses—acquire, edit, print and promote their titles; "Making the Best Match," questions to ask yourself, questions to ask your prospective publisher(s), evaluating the answers; and "Marketing Your Books."

Michael Svoboda, founder and president of Svoboda's Books in

downtown State College, and Peter J. Potter, editor of history and social science at the Penn State Press, will present the material.

Svoboda has a B.S. in communication arts from Cornell, a master's in speech communication from Penn State, and was A.B.D. in an interdisciplinary Ph.D. when he opened his store. He also is the host/producer of Libri, a weekly radio book review, for WPSU.

Potter came to Penn State in 1990 after four years at the Wesleyan University Press. A historian by training, he received his B.A. in 1984 from Virginia Tech and his master's in 1991 from the University of Virginia.

The seminar will be held from 7 to 10 p.m. Sept. 10 at the Nittany Lion Inn, and on Oct. 6 and Nov. 4 at The Penn State Scanticon. The fee to attend is \$25. To receive a brochure, send 14 (800) PSU-TODAY or visit the World Wide Web site at [http://www.cde.psu.edu/C&I\(rightpublisher/](http://www.cde.psu.edu/C&I(rightpublisher/)

Lecture zooms in on planets outside our solar system

Penn State Erie, The Behrend College, will hold an open house night in astronomy Thursday, Sept. 5, at 7:30 p.m. in Reed Lecture Hall. Alexander Wolszczan, distinguished professor of astronomy and astrophysics at University Park, will present "Planets Around Nonstar Stars and Elsewhere."

Wolszczan discovered the first planets outside of our solar system and is a leading source of insight on new astronomical findings. Wolszczan will discuss basic techniques of planetary searches, recent detections of planets orbiting pulsars and sun-like stars and future opportunities to identify terrestrial planets and life beyond Earth.

Wolszczan is the 1996 winner of the Beatrice M. Tinsley Prize for innovative and creative contributions to our understanding of the universe.

Free seminar previews all-day session

To learn how to develop an irresistible idea for your grant application, attend a free seminar by Stephen W. Russell of Grant Writers' Seminars and Workshops.

The seminar, to be held from 4 to 5 p.m. Tuesday, Sept. 3, in Kern Auditorium on the University Park Campus, will preview an all-day program, "Writing Winning Grants," to be held Saturday, Oct. 5. The registration fee

for the prize committee cited Wolszczan for his analysis of binary and relativistic pulsars, which led to the discovery of planets outside our solar system.

Wolszczan, who was born and educated in Poland, received his Ph.D. in physics in 1975 at The Nicholas Copernicus University in Torun. He was a professor there during the 1970s and also worked at Max-Planck-Institut für Radioastronomie in Bonn, Germany. Since 1983, he has taught and done research at Arecibo Observatory and Princeton University before joining Penn State's University Park astronomy department.

Following the lecture there will be astronomical viewing, weather permitting. Admission is free. Call (814) 898-6105 for reservations.

for that \$100 for faculty and staff and \$25 for post-doctorate and graduate students. Registration materials for the all-day seminar will be available at the preview seminar and from the Faculty Senate office in Birch Cottage on the University Park Campus.

The free seminar is sponsored by the Penn State Faculty Senate Committee on Research. For more information, call (814) 863-0221.

Noted columnist to launch speakers series

William Safire, perhaps best known for his semi-weekly *New York Times* political column, will present the 1996 Robert M. Pockross Memorial Lecture at 8 p.m. Tuesday, Sept. 3, in Schwab Auditorium on the University Park Campus. Safire's lecture, "What's Going on in Washington," is part of the 1996-97 Distinguished Speakers Series, "Issues and Inspiration," and is co-sponsored by the College of Communications.

Safire began writing his Pulitzer Prize-winning column for the *New York Times* more than 20 years ago, approaching political issues from the perspective of a libertarian conservative. But the writer has won a number of hats throughout his prolific career. He began as a reporter and columnist for the *New York Herald Tribune* and went on to serve as a correspondent for several New York radio and television stations. He also burrowed under political dog's noses to work on the first Eisenhower presidential campaign and to serve as a speechwriter for the Nixon White House.

Today, Safire is almost as well-known in literary circles as in political ones. His first novel, *Full Disclosure*, spent 14 weeks on the best-seller list. He is also author of *Before the Fall*, a history of the pre-Watergate White House; *Safire's Washington*, a collection of his political columns; and *Safire's New Political Dictionary*, a 500,000-word study of words that have inspired and influenced the electorate. His latest novel is *Sleeper Spy*.

The Pockross lecture, named after the late Robert M. Pockross, a member of the journalism faculty from 1948 to 1977, is free to the public. Pockross, who specialized in public opinion and popular culture, served as the former School of the United States. Her talker and taught radio news writing.

Other lectures in the Distinguished Speakers Series are:

■ Wednesday, Sept. 18, Eisenhower Auditorium: Jocelyn Elders, a pediatric endocrinologist, served as the first African-American Surgeon General of the United States. Her talk will relate issues of health care and personal responsibility. Co-sponsored by Health Promotions Education, The Center for Women Students, the College of Health and Human Development and the Black Caucus.

■ Monday, Oct. 21, Schwab Auditorium: Ed Koch, former mayor of New York City, who remains involved in elective politics, will talk on "What it Takes to be Elected in America Today." Co-sponsored by the Undergraduate Student Government. Tickets required.

■ Tuesday, Oct. 29, Bryce Jordan Center: F. W. deKlerk, former president of South Africa and co-recipient with Nelson Mandela of a Nobel Peace Prize, introduced initiatives that led directly to South Africa's first-ever universal free election in 1994. DeKlerk now holds the post of executive deputy president. Co-sponsored by the Black Caucus, the Undergraduate Student Government, ARHS and The Take a Stand Committee. Tickets required.

■ Tuesday, Nov. 19, Schwab Auditorium: Olympia Dukakis, Academy Award- and Golden Globe-winning actress of such films as *Moonstruck* and *Steel Magnolias*, is also a leading advocate for women's rights. Co-sponsored by Panhellenic Council's Women's Awareness Week and The Center for Women Students. Tickets required.

■ Monday, March 24, Eisenhower Auditorium: Tony Kushner, award-winning author of *Angels in America*, is a prominent voice for the gay community. His lecture is co-sponsored by LGBSA. Tickets required.

■ Wednesday, April 16, Eisenhower Auditorium: Jane Goodall, founder of the Combe Stream Research Center for study of the behavior of wild chimpanzees, lectures throughout the world on her discoveries and the plight of chimpanzees and all animals. Hers will be a multi-media presentation, co-sponsored by the Department of Anthropology and The Center for Women Students. Tickets required.

The lecture series is presented by the Programming Coordination Board. For more information, contact Carol German, Office of Student Activities, at (814) 863-3786.

All lectures will begin at 8 p.m. and are free, although some will require tickets which will be available in 225 HUB about two weeks before the lecture.

Lectures to be given in January and February will be announced at a later date.

Transport theory course available

The Penn State Transport Theory Group, directed by Allireza Haghighat and Bojan Petrovic, has established an annual training course/workshop on "Methodologies for Particle Transport Simulations."

The course focuses on deterministic discrete ordinates and statistical Monte Carlo particle transport theory methods. Through a series of lectures, discussions and computer exercises, the workshop introduces the codes,

cross-section libraries, methodologies and available sources of information.

Participants are provided course materials and access to UNIX based IBM RISC workstations.

Anyone interested in attending or purchasing the manual, please contact Haghighat at (814) 865-0039 or by e-mail at haghighat@gracie.psu.edu; or contact Petrovic at (814) 863-2852; or e-mail at petrovic@gracie.psu.edu.

More Lectures

Palliative care lectureship established in Hershey

Derek Doyle of Edinburgh, Scotland, a world leader in the field of hospice care and palliative medicine, will visit The Hershey Medical Center Sept. 16 and 17 as the inaugural lecturer in the newly endowed Driskill Lectureship in Palliative Care.

Palliative care refers to care given to people in the final stages of life.

Doyle's lecture at 4 p.m. Tuesday, Sept. 17, in the hospital auditorium is open to the public. In addition, the lectureship will include such activities as rounds and consultations with members of the medical center's pain medicine and palliative care team and discussions with medical students and other interested faculty and staff.

The Driskill Lectureship was established through the generosity of the Walter S. and Lucienne B. Driskill Foundation. Its purpose is to bring annually to the medical center a nationally or internationally recognized expert in palliative care for the advancement of knowledge and practice related to the care of dying

patients and attention to the needs of their families.

Doyle was qualified in medicine from the University of Edinburgh in 1955 and accredited as a specialist in chest medicine. He was in family practice in Edinburgh and held a hospital appointment with responsibility for 120 beds in a teaching hospital. In 1977 he was appointed the first medical director and consultant physician of St. Columba's Hospice in Edinburgh and he was an honorary consultant in the National Health Service and a member of the clinical teaching staff of the University Department of Medicine. He retired from those posts in 1995.

Doyle was the first editor-in-chief of the international journal *Palliative Medicine*, and a co-editor of the reference *Oxford Textbook of Palliative Medicine*.

Business lecture series starts Sept. 11

"Transformational Leadership: Today's Secret to Corporate Success" will look at the qualities that corporate leaders have in common in an effort to help others motivate and empower followers. The Sept. 11 lecture will be presented by **Stephen P. Schappe**, assistant professor of management at Penn State Harrisburg, is part of the 1996 Downtown Harrisburg Lecture Series: Current Issues in Business.

Issues to be discussed during the noon presentation include how to have transformational leaders; articulate a motivating vision; engage in framing to give meaning and purpose to actions expected from followers; and mobilize commitment.

Schappe received his Ph.D. in labor and human resources from The Ohio State University. He has been employed by the Buick-Oldsmobile-

Cadillac Group of GM and Bernie Hoffman Associates, a health care management consulting firm. In addition, he has worked as a consultant.

Upcoming lectures include: "Organizational Culture and Employee Participation," Oct. 9; presented by **David Morand**, assistant professor of management at Penn State Harrisburg;

"Promises and Pitfalls of Changes in Tax Policies," Nov. 12; presented by **John Harris**, assistant professor of accounting at Penn State Harrisburg; and

"Market Trends in Health Care," Dec. 3; presented by **C.M. Galaher**, regulatory affairs director for Pennsylvania Blue Shield.

To register for any or all of the lectures, call the Eastgate Center at (717) 772-3590.

Trilogy examines the role of religion

"Values in the Community," a series of three presentations sponsored by Student Affairs and the Center for Ethics and Religious Affairs, will be held this fall on the University Park Campus.

The first topic will be "New Occasions Teach New Duties: The Role of Religion on Campus Now (and Then)" at 7:30 p.m. Monday, Sept. 9, in the Fetzel Union Building Assembly Room. **Richard M. Joel**, international director, Hillel, The Foundation of Campus Jewish Life in Washington, D.C., will present the discussion.

The second session at 7:30 p.m. Thursday, Oct. 3, in 101 Kern Building will focus on "Legal Implications for Religion On Campus: Post-Rosenberg-

er." **Gary Pavela** of the University of Maryland, College Park, will lead the talk. **Clay Calvert**, assistant professor of communications at the Pennsylvania Center for the First Amendment, will also be on hand.

The final session will be at 7:30 p.m. Wednesday, Nov. 6, in 101 Kern. **Conrad Cherry** of Indiana University and **Purdue University** at Indianapolis will present "The Role of Religion in the Global University." **Anne Carver Rose**, associate professor of history and religious studies at Penn State, will serve as faculty respondent.

For more information about the programs, contact the Center for Ethics and Religious Affairs at (610) 865-6548.

Leadership conference for women planned for Oct. 3

An Oct. 3 leadership conference for women at the Nittany Lion Inn on the University Park Campus will offer sessions to help women in areas ranging from developing skills and balancing home and work, to managing conflict and understanding menopause.

"Turning Your Vision into Reality," a daylong conference from 8 a.m. to 5 p.m. sponsored by the Human Resource Development Center, will include three sessions with a variety of offerings. The sessions include:

■ "Demystifying Gender Communication: Exploring Differences," presented by **Cynthia M. Finch**, senior lecturer in speech communication;

■ "Developing Effective Study Skills for Returning Adult Students," presented by **Jean Duffy**, academic counselor;

■ "Managing Change So It Doesn't Manage You," presented by **Betty Roberts**, assistant vice president, Business Services;

■ "Managing Conflict: Focusing on Interests, Not Positions," presented by **Jennifer Adams Mastroski**, assistant professor of administration of justice; ■ "Preparing Healthy Meals in a Hurry," given by **Linda Tobin**, health promotion specialist;

■ "Having It All: Balancing Work and Family," presented by **Cynthia Gisco**, employee assistance coordinator with Merit Behavior Care Corp.

■ "Penn State Backbone: Gateway to the World," presented by **Robin Anderson**, information consultant;

■ "Embracing Possibilities: Development Opportunities at Penn State," by **Deborah H. Matson**, staff assistant, **Deborah Hoar**, director of facilities, resources and planning in the Office of Physical Plant, **Kathy Matson**, administrative assistant, and **Kim Townsend**, human resource development specialist;

■ "Writing Your Proactive Biography," presented by **Monica Zeigler**, wellness counselor with Be Well Associates;

■ "Financial Planning and Your University Benefits," given by **Phil Carlin**, benefits specialist;

■ "Understanding Menopause: What to Expect and How to Handle Changes," presented by **Elisha Nixon**, counselor; and

■ "Mentoring Can Make It Happen," to be given by **Louise Sandmeyer**, executive director of CQI.

Registration is required. To register for any session or for more information, call HRDC at (610) 865-8216.

Conference of interest to statisticians, demographers and sociologists

Statisticians, demographers and sociologists familiar with the career of the late **Clifford Clogg**, distinguished professor of sociology and professor of statistics, may want to attend this conference exploring his legacy to the science. "Social Science and Statistics: In Honor of the Late Clifford C. Clogg" will be held Sept. 26-28 at The Penn State University.

This interdisciplinary conference will include invited papers organized around "Methodological Issues in Labor Force Demography," "Demographic Methodology," "Official Statistics: The 2000 Census," "Latent Structure Models and Their Applications," "Categorical Data Analysis," "Mixture Models," "Analysis of Missing Data" and "Model Selection Indices and Strategies." Contributed papers and poster sessions will also be held.

The keynote address will be delivered by **Leo A. Goodman**, professor of statistics and sociology, University of California at Berkeley.

The conference is sponsored cooperatively by Penn State, the National Science Foundation, the Government Statistics and Social Statistics sections of the American Statistical Association and the Methodology Section of the American Sociological Association.

For information on program content, contact **Mark Becker**, program co-chairman, University of Michigan, Department of Social Statistics, Ann Arbor, Mich. 48109-2029, e-mail: mbecker@umich.edu; or **Michael Sobel**, University of Arizona, Department of Sociology, Social Sciences Building, Room 400, Tucson, Ariz. 85721, e-mail: sobel@u.arizona.edu. For information about registration or accommodations, contact **Chris Schultz** at (610) 863-5130, e-mail: ConferenceInfo@cdc.psu.edu.

Deadline to register is Sept. 5. For registration information, call (800) PSL-TO-PDA or Goodman, professor of statistics and sociology, University of California at Berkeley.

Workshop delves into women's pasts

"The Past We Tell Ourselves: Women, History and American Culture," a free workshop at the Penn State Downtown Center in Harrisburg, will be presented from 8:30 to 10 a.m. Wednesday, Sept. 17.

The workshop will feature **Linda K. Kerber**, the May Brodbeck professor in the liberal arts and professor of history at the University of Iowa. Kerber has served as president of the American Studies Association and, in 1996-97, will serve as president of the

Organization of American Historians. She received her Ph.D. from Columbia University and is one of the leading women's historians. Her books include *Women and the Republic: Intellect and Ideology in Revolutionary America* (1980); *Women's America: Rejoicing the Past* (1982, 1987, 1991 and 1995); and *U.S. History as Women's History: New Feminist Essays* (1995).

To register for this workshop, please call the Downtown Center at (717) 783-0433.

Faculty/Staff Alerts

Skateboarding prohibited

The Department of University Safety has released new regulations for users of skateboards and in-line skates on University property. The new rules are:

- The use of skateboards on campus is not allowed.

■ Acrobatics on in-line skates or roller skates are not allowed. "Acrobatics," according to the department, is "any action in which both blades or skates are off the sidewalk simultaneously."

Also, all bicycles and mopeds on campus must be registered. On the University Park Campus, bicycles and mopeds must be brought to kiosks in the visitor parking lots for inspection, registration and permit issuing from 7 a.m. to 4:30 p.m., Monday through Friday. At other times, bikes and mopeds can be registered at Police Services in the Eisenhower Parking Deck. By reciprocal agreement, borough-issued bicycle and moped registration stickers are valid on campus, and vice versa.

To be registered, bicycles and mopeds must be in good condition and be equipped with a rear tail light or reflector that meets department specifications and a headlamp if the vehicle will be used at night.

Harrisburg changes

The Institute of State and Regional Affairs and its affiliate, the Pennsylvania State Data Center, have become a Penn State Harrisburg college-wide resource. The Institute and Data Center were formerly affiliated with the School of Public Affairs. Michael Behney, reporting to Howard Sachs, associate dean for research and graduate studies, will continue as institute director.

The institute will be headed by an academic director, who will, as an appointee of Harrisburg's provost, serve a three-year term. Harrisburg's Academic Council will serve as an advisory committee to the academic director of the institute.

Two study committees recommended the change as a step toward integrating the institute's activities with the rest of Penn State Harrisburg and opening up opportunities for all faculty to participate in the institute's current and future activities.

U.S. Postal Service reclassification

On July 1, the U.S. Postal Service announced its plan to implement the reclassification of mail. The program is the result of the Postal Service's movement toward increased automation, with the goal of increasing efficiency in mail sorting. Mail that has been pre-bar-coded at the point of generation will result in more consistent and timely delivery and will save money. Addressing Services, a division of the Department of Domestic Services and the Office of Business Services, now has the ability to lower postage costs for the University community through address verification and 11-digit barcoding.

Addressing Services has installed software that will ensure your address information is correct and eligible for the maximum postal discount. For more information about list verification and software-compatible formats, please contact Beth Catherman or Ronnie Hay at (814) 865-4051.

Fulbright deadline reminder

The deadline for the student Fulbright competition is rapidly approaching. Completed applications should be delivered to the Undergraduate Fellowships Office, 312 Willard Building on the University Park Campus, by 5 p.m. Sept. 10. Anyone with questions should call (814) 865-8199.

Fulbright opportunities

There is still time to apply for a Fulbright grant for 1997-98. Unfilled faculty and professional positions will be posted on the World Wide Web after Labor Day. The address is <http://www.cies.org>.

Deadline for the Fulbright administrator's pro-

Register early

Terry Altkin of State College, left, has her bicycle registered by Police Services officer John Torres. All bicycles and mopeds to be used on the University Park Campus must be registered.

Photo: Andrea Hurlay

gram in Germany, Japan, Korea and Britain is Nov. 1. Applications and inquiries should be directed to: Mary Gage, University Fulbright program adviser, at (814) 863-8199, (814) 865-7681; e-mail at hmg1@psu.edu

Official use of new lion design

The introduction of the new lion design earlier this month has created some confusion for University departments. Many within the University community have the misperception that the new design can be used interchangeably with any of the existing marks on University publications, stationery, etc. This is not the case, according to the Department of University Publications.

The new lion design was introduced primarily for use by manufacturers licensed to produce products bearing the University's registered trademarks. The new design captures the spirit of the Nittany Lions and Penn State sports and, as such, may also be used by Intercollegiate Athletics and other sports-related departments (i.e. club and intramural sports) at their discretion.

Identification and promotion of the University at large, or any of its academic or administrative units, is done with the University Identity Mark (Penn State with shield) and the established graphic identity system. The University Identity Mark is the official visual identity of Penn State. It represents the entire University on stationery, publications, signage and any and all academic and administrative usage. The new lion designs are not to be used in this fashion.

Questions about the use of any of the marks and designs should be directed to Jeff Hermann (jth3@psu.edu), university editor and director of publications, or Karen Magnuson (kmg9@psu.edu), assistant director of publications, at (814) 863-1870. Questions regarding the manufacture or sale of merchandise using a University design or mark should be directed to Jean Barrett (obj@psu.edu), coordinator of licensing programs, (814) 865-0356.

Smoking cessation classes

The Milton S. Hershey Medical Center is offering two eight-week smoking cessation classes beginning in September. They are open to the public.

The classes emphasize behavior modification and group support. The daytime/evening classes will be held on Thursdays, Sept. 12-Oct. 31. Daytime classes will be held from noon to 1 p.m. in Room 502 of the University Physicians Center (UPC); evening classes will be held from 7 to 8 p.m. in Dining Room D of the hospital cafeteria.

The fee for the course is \$85. The course is approved by HealthAmerica and other health-care providers for reimbursement. Check with your health plan for details.

For more information or to register, call (717) 331-6089. Registration deadline is Sept. 6.

Intercom online survey

As part of an ongoing process to evaluate content, design and readership of the *Intercom*, both its paper version and online form, readers are asked to go to the *Intercom* World Wide Web site at <http://www.ur.psu.edu/Intercom/home.html> and read the online version. From there, click on the link for the "Readership Survey" and fill out the short questionnaire. The information you provide will be confidential and helpful in guiding the *Intercom* staff in its work.

Individuals who have read the *Intercom* online in the past, can go directly to the survey at URL <http://www.ur.psu.edu/intercom/survey/consent.html>. Your participation is appreciated.

Out-of-date forms causing problems

Anyone using the paper version of Penn State's policy manuals and *General Forms Usage Guides* are again being asked to return them to 123 University Support Building 2 on the University Park Campus because they contain obsolete information.

The Office of Systems and Procedures has made these documents available online at URL <http://guru.psu.edu> on the World Wide Web. Since going online, Systems and Procedures has stopped printing the monthly updates for a large portion of the 800 manuals it maintains. No more paper usage guides will be printed.

Anyone not able to access this online site, known as GURU, should contact the Office of Systems and Procedures at form@psu.edu.

Awards

Liberal arts to honor two as Alumni Fellows

Ralph W. Brenner, a nationally known trial attorney, and Kurt M. Landgraf, president and CEO of The DuPont Merck Pharmaceutical Co., have been named Alumni Fellows by the College of the Liberal Arts. The awards will be presented at a ceremony and reception at the University Park Campus on Sept. 12.

Brenner, chairman emeritus of the Philadelphia law firm of Montgomery, McCracken, Walker & Rhoads, is a 1950 graduate in arts and letters of the college. Brenner received an LL.B. degree from Temple University School of Law in 1953. He was elected chairman of the firm in 1988, and served in that capacity for four years. From 1982-88 he served as vice chairman and chairman of the litigation department. A member of the firm since 1953, he has practiced in a variety of areas, including antitrust, securities, environmental law, toxic tort, product liability and complex class action litigation.

Brenner is a fellow of the American College of Trial Lawyers and is a past member of its board of regents; a Fellow of the International Society of Barristers and a Fellow and member of the Board of the International Academy of Trial Lawyers. He also is a member of the International Association of Defense Counsel and the Defense Research Institute and has served on the faculty and as a lecturer at both of these institutions.

Brenner has served as a judge pro tempore for the court of Common Pleas in Philadelphia since 1991. He is a director and past president of the Philadelphia Bar Foundation and has served as pres-

Ralph W. Brenner

Kurt M. Landgraf

ident of the board of directors of Tredegar/East-town School District.

Since 1984, Mr. Brenner has been chairman of the board of St. Christopher's Hospital for Children. He is also a member of the boards of directors of Allegheny Health Education and Research Foundation; Allegheny Health Service Providers Insurance; and the Medical College of Pennsylvania, and is vice chairman of the board of directors of Allegheny Integrated Health Group.

Landgraf, who has held his present position at DuPont-Merck since 1993, is responsible for the research-based pharmaceutical company's annual revenue of \$1.5 billion and 4,000 employees worldwide.

He worked for DuPont Co. from 1980 until 1991, and joined DuPont Merck when it was formed in 1991. At DuPont, Landgraf held a variety of positions of increasing responsibility. Before joining Merck, held positions with The Upjohn Co., The Educational Testing Service and Johnson & Johnson.

He has served as chairman of the board of the United Way of Delaware, board chairman of the Delaware Association for Retarded Citizens, member of the Delaware Business Roundtable, member of the Board of Delaware's Medical Center Foundation and of The Delaware Symphony. He also has served on the board of trustees of Wagner College and the board of advisers of the School of Pharmacy at the University of Maryland at Baltimore. He served as treasurer, vice chairman and chairman of the National Pharmaceutical Council.

Landgraf, who received an M.A. in economics from Penn State in 1969, graduated from Wagner College with a B.S. in economics/business administration. He also received an M.Ed. in administration from Rutgers University in 1974, an M.S. in sociology from Western Michigan University in 1989 and an A.M.P. from the Harvard University Business School in 1992.

The Alumni Fellow award, presented by the Penn State Alumni Association, is administered in cooperation with the University's academic units. The Penn State Board of Trustees has designated the title of Alumni Fellow as permanent and lifelong.

Penn Staters

R. Thomas Berner, professor of journalism and American studies, gave an invited paper titled "Disaster Reportage: A comparison of Qian Gang's *Great China Earthquake* and John Hersey's *Hiroshima*" to the fifth Congress of the Chinese Comparative Literature Association and International Conference on "Literature and Cultural Dialogue," Northeast Normal University, Changchun, Jilin Province, Peoples Republic of China.

Later in Beijing, he gave an invited talk at the Chinese Academy of Social Sciences titled "The Sustaining Nature of the Ancient Chinese Process of Repography." He also gave an invited talk on literary journalism at the New China News Agency.

Gordon F. De Jong, distinguished professor of sociology and director, graduate program in demography, presented "Social Change, Ideology and Migration Intentions" at the Ninth World Congress of the International Rural Sociology Association in Bucharest, Romania.

For his work in designing and maintaining Zembla, a WWW site devoted to author Vladimir Nabokov on the Penn State Libraries Web server, library assistant Jeff Edmunds was elected an ex-officio member of the Executive Committee of the International Vladimir Nabokov Society, an allied organization of the Modern Language Association.

Hector Flores, professor of plant pathology and biotechnology, presented an invited symposium talk at the annual meeting of the Phytochemical Society of North America. Flores talked on "Underground Blues: Phytochemistry of Plant Storage Organs." He also gave an invited address at the annual meeting of the American Society of Plant Physiologists. His talk was titled "Inside/Outside: Reflections on Roots and Scientists."

Alireza Haghighat, associate professor of nuclear engineering, visited seven nuclear research organizations throughout Europe and gave the following invited talks: "Neutron and Gamma Transport Calculations for Deep-Penetration Problems - Uncertainty, New Developments" and "Parallel Algorithms for Linear Transport Equation-Space Decomposition, Iterative and Differencing Schemes."

Steven Heine gave an invited lecture at Tokyo University on his study of the intersection of philosophy and folklore in the Zen Buddhist "wild fox koan." Research for this project is funded by an NEH fellowship as well as by grants from the Liberal Arts Research and Graduate Studies Office, the Office of International Cooperative Programs, the American Academy of Religion and the Association for Asian Studies.

Austin J. Jaffe, holder of the Philip H. Sieg professorship of business administration, made presentations in Belfast, Northern Ireland, and at the University of Auckland, New Zealand. In Belfast, Jaffe gave the keynote address, "Property Investment in the 21st Century," at the annual conference of the European Real Estate Society. In New Zealand, he served as a visiting professor with University of Auckland's Department of Accounting and Finance and Department of Property.

Urszula Kulakowski, graphic design supervisor for the College of Arts and Architecture communications/public relations group, had her design of the 1995-96 Center for the Performing Arts series icons selected for publication in *PRINT* magazine's 1996 regional design award annual. The achievement was recognized with a certificate of design excellence. The five icons represent the five series that the center offers.

Traci Mathis, buyer in Purchasing Services, was granted the accredited purchasing practitioner (A.P.P.) designation. The A.P.P. demonstrates her professional capabilities through a series of rigorous examinations and a combination of education and relevant work experience.

James L. Rosenberger, professor and head, Department of Statistics, has been named a Fellow of the American Statistical Association. The designation of Fellow is a singular honor in the association and has for more than 75 years signified an individual's outstanding professional contribution and leadership in the field of statistical science.

Jogender Singh, a senior research associate with the High Energy Processing Department, attended NATO's Advanced Research Workshop, in Algarve, Portugal, where he presented a lecture titled "Functional Gradient Ceramic/Metallic Coatings by High-Energy Beams for High-Temperature Applications."

Adam J. Sorkin, professor of English at Penn State Delaware County Campus, presented "Postmodernism and Romanian Poetry: The 'Abnormally Normal,'" at the international conference in Iasi, Romania.

Steven H. Zarit, professor of human development, presented a paper at the Nordic Gerontology Congress in Helsinki, Finland. Authors of the presentation, "A Comparison of Day Care in Sweden and the USA," are Shannon E. Jarrott, Zarit, Lennart Johansson of the Ministry of Health and Welfare, Sweden, and Stig Berg of the Institute of Gerontology, Jönköping, Sweden. Also, Zarit was elected as president of the Section on Clinical Geropsychology of the American Psychological Association.

The ARTS

AT PENN STATE

More is More

In its first exhibition of the academic year, the Zoller Gallery presents "More is More," an exhibition of objects collected by faculty and staff members of the College of Arts and Architecture School of Visual Arts. The exhibition will continue until Thursday, Sept. 17.

MetaStages registration

The School of Theatre Arts will hold registration for drama classes for children at the Paul Robeson Cultural Center on the University Park Campus. MetaStages Theatre Centre, an outreach program, offers classes after school and on Saturday for different age groups from K-12. Weekly sessions begin Sept. 14.

Children receive performance training from professionals in acting, voice, movement, mime and masks as they rehearse and perform plays from various countries and cultures. Classes culminate with an afternoon of final performances. Class size is limited. For more information contact Joann Leonard, MetaStages director, at (814) 867-8390.

Logan Wintergarden Series returns

Music at Noon: The Logan Wintergarden Series returns this fall for a seventh season of music performances in the Reed Union Building Wintergarden at Penn State Erie, The Behrend College.

The series encourages lovers of all types of music to enjoy an informal mid-day respite with performers of international stature. Brown-bag lunches are welcome at the performances, which are free to the public.

New this year is the addition of the Logan Chamber Music Award for

Outstanding Educational Programming, a \$2,000 cash prize that will be given annually to one of the six ensembles performing in the series. The award will honor the ensemble that best targets the presentation and programming needs of the diverse audiences it will perform before at Penn State-Behrend.

The 1996-97 series begins Friday, Sept. 13, with a performance by Cello. This quartet of classically trained women defies the traditional chamber music tradition.

On Oct. 8, the Manhattan Wind Quintet performs; Callopie, along with Peter Schickole of IDO Bach fame, will perform Monday Nov. 11. By playing more than 40 instruments, including krumphorn and the double-reed shawm, Callopie brings a Renaissance revelry to audiences around the world.

The second half of the series brings Aureole, a combination of flute, viola and harp, Tuesday, Feb. 18.

The Rackham String Quartet, which is winning residencies through the National Endowment of the Arts, performs on Monday, March 17.

Hesperus closes the season on Wednesday, April 9.

Music at Noon: The Logan Wintergarden Series is made possible through a grant from the Harry A. Logan Jr. Foundation. For more information about the series, phone Penn State-Behrend at (814) 898-6000.

BRYCE JORDAN CENTER

Ozzy Osbourne Sept. 21

Ozzy Osbourne, with guests Prong, Sepultura and Danzig, will appear at the Bryce Jordan Center at 7 p.m. Saturday, Sept. 21. Tickets are on sale at the ticket center, selected Uni-Marts, Commonwealth Campus ticket outlets or by calling (814) 865-5555 or (800) 863-3336. Tickets are \$23 for advance reserved seating and \$25 for reserved seating the day of the show.

Osbourne was the leader of the heavy metal band Black Sabbath in the 1970s. He then went solo in the early 1980s. The Grammy Award-winning Osbourne has sold more than 21 million albums in the United States.

David Copperfield Oct. 1

World renowned magician David Copperfield will appear for two shows at The Bryce Jordan Center Oct. 1. Tickets for both the 5:30 and 8:30 p.m. shows are on sale now and can be purchased at the Bryce Jordan Ticket Center, selected Uni-Marts, Commonwealth Campus ticket outlets or by calling (814) 865-5555 or (800) 863-3336. Reserved seats are priced at \$39.50, \$29.50 and \$23.50.

After years of successful network specials and extensive world tours, David Copperfield has been seen by more people than any other magician in history, including Houdini.

His tour has broken theatre box office records across North and South America and Asia. Five times he has performed for the President of the United States.

"The Magic of David Copperfield" has won several Emmys and have led Copperfield to be twice named Entertainer of the Year.

Upcoming events

■ Sept. 6: George Strait, with Steve Wariner, 8 p.m.; tickets \$23.50 (all seats reserved).

■ Sept. 7: Penn State Tailgait Party, 11:30 a.m., Penn State vs. Louisville. Kickoff 3:30 p.m.; tickets \$15 for adults; \$10 for children 12 and under. Full luncheon buffet; family entertainment; autograph session of the 1986 National Championship team; live music; door prizes and more.

■ Sept. 14: Penn State Tailgait Party, 8:30 a.m., Penn State vs. Northern Illinois; kickoff 12:30 p.m.; tickets \$15 for adults; \$10 for children 12 and under.

■ Sept. 24: WWF (TV shoot), 7 p.m.; Tickets \$18/\$14/\$10.

■ Oct. 12 Penn State Tailgait Party, four hours before kickoff vs. Purdue; tickets \$15 for adults; \$10 for children 12 and under. Full brunch for luncheon buffet.

■ Oct. 19: Penn State Tailgait Party, four hours before kickoff vs. Iowa.

■ Nov. 2: Penn State Tailgait Party, four hours before kickoff vs. Northwestern.

■ Nov. 23: Penn State Tailgait Party, four hours before kickoff vs. Michigan State.

For more information on any event, call the center at (814) 865-5555 or visit the Web site at <http://www.bjc.psu.edu/>.

UNIVERSITY PARK CALENDAR AUGUST 29 - SEPT. 8

SPECIAL EVENTS

Wednesday, September 4
Gerontology, 12-1 p.m., 101 HHD East. Mark Hayward on "Racial Inequality in Life With and Without Disability."

Friday, September 6
Department of Geography, 3:30 p.m., 206 Walker Building. William Welch on "State College at 100 Years and One Week."

School of Music, 8 p.m., Recital Hall. Jury Recognition Recital.

Saturday, September 7
■ Gallery Talk, 11:30 a.m., Christoffers Lobby. Catherine Clemon on "Ancient to Renaissance Art at the Palmer Museum."

Sunday, September 8
School of Music, 8 p.m., Recital Hall. June Miller, organ.

SEMINARS

Friday, August 30
■ Geography, 4 p.m., 206 Walker Bldg.

C. Gregory Knight on "The World Map of Precipitation Variability."

Tuesday, September 3
Faculty Senate Committee On Research, 4 p.m., Kern Auditorium. Stephen W. Russell on "Developing an Irresistible Idea For Your Grant Application."

CONFERENCES

Thursday, August 29
Short Course on Powder Injections II, The Nitany Lion Inn. Through Aug. 30.

EXHIBITS

Palmer Museum
"Selections of Contemporary Art from the Pincus Collection," through Dec. 15.
"The Wood Engravings of Warren Mack," through Jan. 5, 1997.

Zoller Gallery
"More is More," Visual Arts faculty collections. Through Sept. 17.

■ Reflects an international perspective

Fulbright program grants allow 14 students to study, teach abroad

Fourteen Penn State students are starting the academic year studying abroad on grants administered under the 1996-97 Fulbright program.

Seven awardees recently received baccalaureate degrees from the University, and seven are graduate students in master's or Ph.D. programs. The awardees, their major, field of study or teaching and the country in which they are studying, are:

■ **Stephen Bender**, an international politics graduate from Denver; teaching English as a foreign language in Germany.

■ **Andrew Carlson**, a Ph.D. student in philosophy from Denver; philosophy; Germany.

■ **Joseph Ciardi**, a Ph.D. student in horticulture and genetics from State College; horticulture; Italy.

■ **Amy Davis**, a biology graduate from Greensburg; biology; Australia.

■ **Julie Hornick**, a Ph.D. student in French from State College; teaching English as a foreign language in France.

■ **Sheri Howe**, a German graduate from Ephrata; teaching English as a foreign language in Germany.

■ **Amy Kapp**, a media studies graduate from West Chester; teaching English as a foreign language in Korea.

■ **Sean Kelley**, a Ph.D. student in physiology and nutrition from Painted Post, N.Y.; biology; Sweden.

■ **Franklin Perkins**, a Ph.D. student in philosophy from State College; philosophy; Germany.

■ **Kathryn Peters**, a Ph.D. student in comparative literature from State College; comparative literature; Nicaragua.

■ **Scott Phillips**, a graduate in theatre arts from Collegeville; theatre arts-acting; Germany.

■ **Rachel Rohlf**, a graduate in German from Lexington, Ky.; teaching English as a foreign language in Germany.

■ **Pervaze Sheikh**, a Ph.D. student in biology from State College; ecology; Brazil.

■ **Kurtis Williams**, a graduate in astronomy from New Holland; astronomy; Germany.

Beaver Stadium recycles for United Way

Penn State fans, don't leave your recycling habits at home. Money generated from recycling programs at Beaver Stadium and The Bryce Jordan Center goes to the Centre County United Way, and the University wants your help.

When tailgating begins at the first home game on Saturday, Sept. 7, look for 20 recycling stations throughout Beaver Stadium parking lots for used glass and plastic bottles, and steel and aluminum cans. Leftovers also for separate bins for garbage.

"The Beaver Stadium recycling program, which began last year, was an outstanding success," Tim Curley, Penn State athletic director and the University's 1996 United Way chairman, said. "We expected football fans to recycle about 15 percent of the total waste generated during the season, but fans rallied to the cause and recycled about 33 percent. We want to top that this year."

Centre County United Way received \$11,019 last year from the sale of 34 tons of recyclable material collected by the University's Office of Physical Plant and the Centre County Solid Waste Authority, which led the recycling effort. That amount was then allocated to the Juniata Valley Boy Scout Council and the Hemlock Girl Scout Council in recognition of the hard work the Scouts did managing

the recycling bins, helping with the sorting and encouraging fans to pitch in for the cause. The Scouts will be out in force again this year.

The success of the Beaver Stadium Recycling Program was also recognized this spring by the Pennsylvania Department of Environmental Protection, which gave it a Commercial Recycling Award in the Unique Ideas Category for leadership in expanding markets for recyclable materials.

"Our stadium recycling program to benefit United Way is a truly cooperative venture and to my knowledge has not been done at football games anywhere else in the country," Al Matyasovsky, foreman of solid waste management, said. "We have all the players involved, from the football fans to the waste collectors and haulers, the waste buyers and the Boy and Girl Scouts, who will ultimately benefit from the United Way funding."

In addition to the Scouts, others helping OPP and the Solid Waste Authority in this effort are Penn State's Department of Intercollegiate Athletics; the Penn State Bookstore; the Centre County United Way; Joseph Krentzman and Sons Inc., which buys the waste to recycle; and the Steel Recycling and the Glass Packaging Institutes.

A column provided by the Office of Human Resources

"Teen Line"

Beginning Sept. 1, Penn State's Employee Assistance Program (EAP) will offer a confidential and free service to address the issues, concerns and needs of teen-agers. Professional counselors will be available 24 hours a day to talk with teen-age children of faculty and staff. Support will be given and questions answered for such topics as drugs, sex, parents, peer pressure, relationships and eating disorders. To speak confidentially with a counselor, teens should call (800) 955-TEEN (8336).

For more information call the Faculty/Staff Health Promotion Office at (814) 865-3085.

Questions and answers

A number of questions arise on a daily basis regarding the employee benefit plans offered to faculty and staff. While some questions are specific to an individual, particular claim or circumstance, many are of a general nature regarding such things as deductibles, co-payments and eligibility.

Future employee benefit columns will present, in a question-and-answer format, the more commonly asked questions about medical plans, retirement, flexible benefits, life insurance and other benefit plan options. As the annual switch enrollment period approaches, faculty and staff are encouraged to review this information.

Carpoolers

Organizing a round-trip carpool from Allentown/Schuylkill Campus to University Park every Thursday during fall semester. Call Diane at (717) 943-2191.

University vanpool has immediate openings for riders/drivers in the Penns Valley area. Stops are Aaronsburg, Milheim, Spring Mills and Centre Hall. Work hours are 8 a.m.-5 p.m. Call Kathy at 865-5403 or send e-mail to kam8@psu.edu.

Carpooler(s) wanted to drive from Philopolis to University Park. Work hours are 7:45 a.m.-4:45 p.m. Call Melissa at 865-3497 or send e-mail to msc4@psu.edu.

Van pool from Phillipsburg has openings to University Park. Hours are 7:30 a.m.-4:30 p.m. Monday through Friday. Contact Sharon at 865-1255 (day) or 342-7296 (evenings).

Harrisburg to hold arts and crafts festival Oct. 5

Free daylong entertainment, arts and crafts vendors and demonstrations, children's events, an array of food and a concert highlight the Penn State Harrisburg Arts and Crafts Fall Festival, to be held from 9 a.m. to 6 p.m. Saturday, Oct. 5.

The first annual event to benefit the community will be held on the Penn State Harrisburg campus on Route 230 just east of the Middletown Square. Proceeds from the festival will go to the Olmsted Recreation Board which sponsors activities for children and youth in Middletown, Royall and Lower Swatara Township. The festival is being organized through volunteer efforts of the college and the surrounding municipalities.

Three event tents will hold attractions for the entire family. The non-stop musical entertainment in the main tent will include appearances by the Clawhammer Banjo Band, Curlique Square Dancers, the Hershey Community Chorus Ensemble, the popular bluegrass and contempo-

rary group Sweetwater Reunion and the Steelton-based Polka Quads.

As an added bonus, the Middletown Area High School marching band will perform its field show at 11 a.m. on the festival grounds.

The children's tent will feature a special all-day safety program sponsored by the John Hancock Insurance Co. which offers free hand and footprints of youngsters and a photo ID safety card.

Throughout the day, an alumni pep band directed by Penn State Harrisburg Professor Dick Ammon will roam the grounds while the Lion Ambassadors offer free paw prints. A special concert attraction, the popular Class Act with Rita, will be highlighted in the Capital Union Building's gymnasium from noon to 2 p.m. For information on the \$5 concert tickets, call 944-9940.

For festival information, call the Penn State Harrisburg Office of Alumni and Special Events at (717) 948-6272.

Appointments

McKeesport Campus names DUS coordinator

Elsie M. Boucek has been appointed Division of Undergraduate Studies coordinator for the Penn State McKeesport Campus. Boucek has been coordinating DUS functions on an interim basis since July 1 while continuing in her current duties as career development and placement counselor, a position she has held since 1978.

Boucek has extensive experience in program development and delivery of seminars in career decision-making, assertiveness for student leaders, resume writing and job search skills and using the Myers-Briggs Type Indicator in career counseling.

Before joining the McKeesport staff she served as a caseworker for the Allegheny County Board of Assistance from 1969 to 1977. She holds a master's degree in student personnel services from Indiana University of Pennsylvania and a bachelor's degree in sociology/anthropology from West Virginia Wesleyan College.

Elsie M. Boucek

Marketing, psychometrics authority a Smeal distinguished professor

One of the country's leading authorities in marketing and psychometrics is now the Mary Jean and Frank P. Smeal Distinguished Chair professor of marketing. Wayne DeSarbo joins Penn State from the University of Michigan's Graduate Business School.

DeSarbo, formerly the Sebastian S. Kresge distinguished chair professor of marketing and statistics at Michigan, is the second faculty member named to a Smeal chair at Penn State within a year, and the third appointed to a chaired position in the college in two years.

The Department of Marketing has three areas of emphasis: consumer marketing, business-to-business marketing and quantitative marketing modeling. The arrival of DeSarbo at the University Park Campus is expected to strengthen the department's efforts in modeling and statistics.

DeSarbo also is expected to enhance the college's ability to attract graduate students. His teaching and research interests focus on the areas of product/service positioning, segmentation, new product/service design, customer satisfac-

Wayne DeSarbo

tion, market structure, service quality and customer lists in direct marketing.

He holds a bachelor of science degree in economics from the University of Pennsylvania, master of arts degrees in industrial sociology and marketing from Penn, a master of arts degree in administrative science from Yale University and a doctoral degree in marketing and statistics from Penn, where he also pursued post-doctoral studies in econometrics and operations research.

Before joining the faculty at the University of Michigan, he was the Harold Simmons chair distinguished professor of marketing and statistics at Southern Methodist University and the Harold and Judy Berkowitz associate professor of marketing at Penn.

He gained industry experience while at the AT&T and Bell Laboratories. The president of Analytika Marketing Science Inc., DeSarbo also has been a consultant to many Fortune 500 firms. He has won the Marketing Science Institute Direct Marketing Research Proposal Competition, and was one of a few scholars in marketing selected by the Royal Swedish Academy for the Nobel Prize Nomination Committee. He has been nominated as a Fellow in the American Statistical Association and elected chair of the Statistics in Marketing Section of the American Statistical Association.

Continuing and Distance Education unit appoints new director

Wesley E. Donahue has been appointed director of Management Development Programs and Services, a unit of Continuing and Distance Education. He succeeds Samuel C. DeWald, who will continue to serve management development, as well as other C&DE units.

Donahue is assistant professor of business administration and holds a joint appointment in The Smeal College of Business Administration and College of Education.

The unit's 13 faculty members are logistically based throughout Pennsylvania and work closely with the Penn State campuses in their areas. Management development faculty members develop and deliver education and training programs primarily to Pennsylvania businesses both large and small.

Donahue brings more than 20 years of progressive manufacturing, technical sales and managerial experience to his role as director. For 15 years (1973-87), he worked with the Fortune 500 company Brockway Inc., now Owens-Brockway. He joined the company as a project engineer, served as an engineering department head, progressed to manager of corporate technical development and later was manager of technology for the company's international division.

Wesley E. Donahue

In 1987, he co-founded and served as executive vice president of Leffler Systems of New Jersey, a manufacturing company specializing in the production of plastic blow-molded products and fabrication of proprietary machinery. In addition, he co-owned a specialty retail store in DuBois, Pa., from 1982 to 1993.

Donahue earned a bachelor of science degree in engineering from Penn State in 1972, an MBA from Clarion University in 1981 and a doctoral degree in workforce education from Penn State in 1996. He is a registered professional engineer.

Associate dean to chair University's International Council

The University's International Council will be chaired by Ronald L. Filippelli, professor of labor studies and associate dean for administration, planning and personnel in the College of the Liberal Arts. Filippelli has represented his college on the council for four years and served as vice chair in 1995-96. The International Council has senior representation from all strategic-planning units of the University and acts in an advisory capacity to the Office of the President and to the University Office of International Programs.

In his new role, Filippelli plans to further the five strategic goals of the council: providing education abroad experiences for 20 percent of each undergraduate graduating class; increasing international activities of faculty and graduate students; internationalizing the curriculum; increasing recognition of international activities within the promotion and tenure process; and enhancing the climate for international students, faculty and staff.

Filippelli, who is responsible for international programs in the College of the Liberal Arts, has been active in promoting international programs across the University. Under his leadership the college has designed and now offers a minor in international studies. A major in international studies, developed by a University-wide committee under the college's leadership, has been approved and its implementation is awaiting consideration by the Board of Trustees.

Filippelli has held visiting faculty positions at Warwick University, England, the University of Melbourne, Australia, and the University of Calabria, Italy. He is the author or editor of four books and has published numerous book chapters and articles. He also has conducted research under grants and contracts from governmental and private agencies.

Ronald L. Filippelli

Appointments

New STS director committed to strengthening program

Hector E. Flores, professor of plant pathology who holds a joint appointment in the Biotechnology Institute and serves as an adjunct professor of biology and as a faculty member in the Intercollege Graduate Program in plant pathology, has been named director of the Science, Technology and Society (STS) Program. Flores is committed to not only continuing, but strengthening the STS Program, which is housed in the College of Engineering.

Hector E. Flores

Flores came to Penn State in 1988 from the Louisiana State University, where he was an assistant professor of plant pathology and crop physiology for three years. He received his Ph.D. and M.Phil., both in biology, from Yale University. Flores, who originally hails from Lima, Peru, also holds an M.S. in horticulture from the University of Puerto Rico and a B.S. in biology from the Universidad Nacional Mayor de San Marcos in Lima. In 1987, he was a summer Fellow of the National Health Sciences Foundation in Japan.

Flores has published more than 70 technical papers and edited four books in addition to serving as a manuscript reviewer for 18 refereed journals and a number of federal and private grant proposal committees. He is a member of a number of professional and honor societies and the recipient of several awards.

Flores has sketched out several challenges and initiatives for the STS Program under his directorship. They are:

- to promote scientific literacy in a way that relates to everyday problems, and to encourage multi-dimensional understanding of the nature of scientific and technological enterprise;
- to contribute to the education of responsible citizens by promoting awareness of the social and economic consequences of scientific and technological change at the baccalaureate level and through continuing education and outreach programs;
- to promote the integration of teaching and research in STS; and
- to work toward bridging the gap between the sciences and humanities by encouraging a humanistic perspective on "living things and their uses (or misuses)" among science majors, and conversely by promoting biological literacy among humanities students.

School of Nursing director holds joint appointment

Sarah H. Guelndner has been named director of the School of Nursing in the College of Health and Human Development.

Guelndner, who has 33 years of nursing experience, leaves her post as director of doctoral studies in the College of Nursing at the Medical University of South Carolina, where she led formative work in the development of a collaborative Ph.D. degree in nursing with the University of South Carolina. At Penn State, Guelndner holds a joint appointment in

the College of Health and Human Development and in the College of Medicine. Among her long-term priorities for Penn State's School of Nursing will be the expansion of its funded research efforts and the development of a doctoral program.

Guelndner's research is directed to elderly populations focusing on exercise, environmental enrichment, expression of mood, life satisfaction and immunocompetence.

She is a certified gerontological nurse.

She is a Fellow in the American Academy of Nursing and a member of the Academy's Expert Panel on Long-Term Care. She has served as an officer of Sigma Theta Tau International, and was recently selected as one of that organization's 75th anniversary distinguished lecturers. She is past president of the Society of Rogerian Scholars and of the Mississippi Board of Nursing, and is a member of Sigma Xi and the Gerontological Society of America. She was honored with the 1995 Graduate Teacher Award at the Medical School of South Carolina.

Before becoming the director of doctoral studies at Medical University of South Carolina, Guelndner was director of the University's Center for Nursing Research. She was a member of the faculty of the Medical College of Georgia's School of Nursing from 1982 until 1992. She also has held faculty appointments at the University of Georgia's Gerontology Center in Athens, Abraham Baldwin Agricultural College in Tifton, Valdosta State College, Mississippi State University, the University of Tennessee at Chattanooga, and the University of Tennessee in Memphis.

She received a doctoral degree in nursing from the University of Alabama in Birmingham and a master's degree in nursing from Emory University. She earned her undergraduate degree at the University of Tennessee in Memphis where she was named Outstanding Alumnus in 1989.

Hershey names executive director of University Physicians

John E. Madewell has been named executive director of University Physicians at The Hershey Medical Center.

Madewell, chair of the Department of Radiology, assumed the position in July, following the retirement of **John Waldhausen**.

Madewell received his undergraduate education at Central State College, Edmond, Okla., and his M.D. degree from the University of Oklahoma School of Medicine, Oklahoma City, in 1969.

He served an internship in medicine at Madigan General Hospital, Tacoma, Wash., from 1969-70, and a residency in diagnostic radiology at Walter Reed Army Medical Center, Washington, D.C., from 1970-73. He was chief resident at Walter Reed in 1972-73. Madewell also served a fellowship in radiologic pathology at the Armed Forces Institute of Pathology in 1973-74.

Throughout his career, Madewell has held many administrative academic and clinical appointments, through military service and as a civilian.

Madewell joined the medical center faculty in 1987 as chair and professor of radiology and professor of orthopedic surgery.

Sarah H. Guelndner

He has served as the associate editor of *The Year Book of Diagnostic Radiology* since 1990. Previously, he served on the editorial boards of several professional publications, including *Radiology* and *Radiology*. He holds membership in a number of professional societies and organizations and has published more than 100 journal articles and book chapters.

Palmer Museum of Art welcomes new director

Jan Keene Muhler, former director of the Amon Carter Museum in Fort Worth, Texas, has been named the new director of the Palmer Museum of Art.

Muhler served as the director of the Amon Carter Museum for 15 years. Before that she was the director of the University of Iowa Museum of Art, Iowa City, and has held the posts of associate and assistant curator of 20th Century Painting and Sculpture at the National Museum of American Art, Smithsonian Institution, Washington, D.C.

While director of the Amon Carter Museum, Muhler facilitated an updated strategic plan and the development of a master building plan; expanded the museum's membership program; coordinated negotiations for the purchase of Thomas Eakins' *The Swimming Hole* from the Modern Art Museum of Fort Worth; and managed a fundraising campaign toward that acquisition, raising \$5 million in one year. During her tenure at the Amon Carter she encouraged the addition of selected prints, drawings and watercolors from the 19th and 20th centuries by such artists as Winslow Homer, Edward Hopper, John Sloan and James McNeill Whistler, as well as major paintings by William Merritt Chase, Thomas Cole and Philadelphia artist Morton Livingston Schamberg, among others.

As a member of the Association of Art Museum Directors she has been a trustee of the association, chaired the government and art committee and the professional practices revision committee. With the American Association of Museums she has served as the general co-chair of the annual meeting, a member of the ethics committee and the commission on museums for a new century. She also has been a general operating support grant reviewer for the Institute of Museum Services and worked on the National Endowment for the Arts museum program and challenge grant panels.

Muhler is a member of the visiting committee of the Allen Memorial Art Museum, Oberlin College; the Chancellor's Advisory Council on the Visual Arts, University of North Texas; and has chaired the advisory committee for the North Texas Institute for Educators on the Visual Arts, University of North Texas. In recognition of her work on behalf of art education, she was honored with the 1994 Texas Art Association Friend of Art Education Award.

She holds a master of arts degree in art history from Oberlin College and a bachelor of arts from Albion College, Michigan. Her specialty is American art.

Jan Keene Muhler

Two-day event to mark institute's 30th anniversary

The Institute for the Arts and Humanistic Studies will celebrate its 30th anniversary on Sept. 21-22 with a two-day event featuring an art exhibit with wine and cheese reception, a banquet with musical and literary entertainment and a birthday celebration with cake followed by a panel discussion on entering the lives of biographical subjects. The activities will conclude with a one-man show, "Willi: An Evening of Wilderness and Spirit," written and performed by playwright John Pielmeier, the author of *Agnes of God*.

The Institute for the Arts and Humanistic Studies is a center for advanced study in the arts and humanities and for interdisciplinary work across those domains. Established in 1966, it is part of Penn State's Intercollege Research Program, which is designed to allow research faculty from various disciplinary backgrounds to move easily across college and departmental lines in response to innovative ideas and proposals.

The Institute has a permanent body of fellows drawn from the most productive and accomplished senior faculty at Penn State. Its goal is to foster the scholarly and creative life of University faculty by providing research grants and fellowships, and to enrich the cultural climate of the University community and Pennsylvania by supporting theatrical and artistic projects, exhibitions, lecture series, conferences, symposia and visits and residencies for distinguished artists and scholars.

For more information or to reserve banquet and theatre tickets, please contact The Institute for Arts and Humanistic Studies, Ithaca Cottage, University Park, Pa. 16802; (814) 865-0494; fax (814) 863-3499.

Ready for the crush

Summer is officially over, by academic standards. Students have returned in full force to all Penn State campuses for the start of fall semester — and retailers are ready. At the University Park Campus, the Penn State Bookstore has temporarily expanded beyond its walls. Visible from this vantage point atop the HUB Parking Deck adjacent to the bookstore are tables set up outside the bookstore entrance to handle the increased business as students pour in to buy textbooks, supplies, Penn State souvenirs and other items. Classes started systemwide on Aug. 21.

Staff

Cheryl Alleman, staff assistant V in College of Agricultural Sciences.

Brett A. Bixler, senior instructional designer, Commonwealth Educational System.

Helen Brady, program aide in Continuing and Distance Education.

Shane Burris, staff assistant V in University Libraries.

Deneen Cutugno, staff assistant V at The Hershey Medical Center.

Cherie Danz, staff assistant V at The Hershey Medical Center.

Janet Decker, manager, Food Services II, in Housing and Food Services.

Elena De Luca, assistant director, alumni relations, in College of the Liberal Arts.

Jennifer Dunn, operations coordinator in Applied Research Laboratory.

Gwen Eckley, staff assistant V in Continuing and Distance Education.

Kristi Harpster, training and support specialist in Division of Development and Alumni Relations.

Kelly Hartford, lead applications programmer/analyst in Computer and Information Systems, Administrative Systems.

Dorcas Holt, staff assistant VI in The Office of the Executive Vice President and Provost.

Karen Jacobs, senior applications programmer/analyst in Computer and Information Systems, Administrative Systems.

Larry Jordan, manager, agricultural research farm(s), in College of Agricultural Sciences.

Suzanne Keller, development assistant in Division of Development and Alumni Relations.

Valerie Kelley, administrative assistant IV in College of Agricultural Sciences.

Bonnie King, staff assistant VII in College of Engineering.

Diane Kolesar, lead applications programmer/analyst in Computer and Information Systems, Administrative Systems.

Pauletta Leathers, editorial assistant in Research and Graduate School.

Elizabeth McKinley, staff assistant VI in the Office of the Vice Provost for Enrollment Management and Administration.

Barbara Meeker, administrative assistant II in University Relations, Office of the President.

Tina Meyers, staff assistant VII in College of Health and Human Development.

Bryan Moody, admissions counselor III in the Office of the Vice Provost for

Enrollment Management and Admissions, Graduate Admissions.

Lorraine Mrackoski, financial aide and veterans' assistant at Penn State Wilkes-Barre Campus.

Kathy Norris, staff assistant VI in University Relations, Office of the President.

George Pappas, network coordinator at Penn State Great Valley Campus.

Sharon Pishak, research support assistant in College of Agricultural Sciences.

Jeffrey Place, staff assistant VI at Penn State DuBois Campus.

Shelley Readell, staff assistant V at Penn State Erie, The Behrend College.

Joneen Richardella, staff assistant V at Penn State Altoona Campus.

Kathleen Schwartz, DUS coordinator in Office of the Vice Provost for Undergraduate Education.

Bradford D. Singler, supervisor, Emergency Medical Services, at The Hershey Medical Center.

Francine Stackhouse, administrative assistant II at Penn State Delaware County Campus.

Donna Sorensen, lead applications programmer/analyst in Computer and Information Systems, Administrative Systems.

Susan Susi, staff assistant V at The Hershey Medical Center.

Belinda Tyson, staff assistant in Continuing and Distance Education.

Rick Wareham, supervisor, Physical Plant Maintenance, at Penn State Altoona Campus.

Alana Werner, staff assistant IV at Penn State York Campus.

Scott A. Wertz, supervisor, Emergency Medical Services at The Hershey Medical Center.

Maria Werley, senior research technologist in College of Agricultural Sciences.

Rita Williams, staff assistant VII in Office of Planning and Analysis.

Karen Wilson, program aide in Continuing and Distance Education.

Technical Service

Ashley Dutrow, maintenance worker, Utility, in Office of Physical Plant.

Leonard Ginnetto, patient care assistant at The Hershey Medical Center.

Robert Hay, delivery driver in College of Agricultural Sciences.

Rosalie Keller, operator B, Centralized Copy Center, in Business Services.

Carl Lingle, group leader, receiving, at The Hershey Medical Center.

Douglas Miller, maintenance worker in Office of Physical Plant.

Office of Planning and Analysis executive director ends 24-year career

G. Gregory Lozier, executive director of the Office of Planning and Analysis for the past 13 years, has announced his departure after 24 years of service to the University. Lozier will join Coopers and Lybrand as a managing associate in its higher education consulting services, effective Aug. 26.

Although it was a difficult decision for him, Lozier said it was time for him to move on.

"I am pleased to be joining the national leader in higher education consulting," Lozier said. "With my colleagues at Coopers I will work on behalf of many colleges and universities on the pressing issues of American and international higher education."

Lozier joined the University full time as a planning specialist and senior planning analyst in the Office of Budget and Planning in 1972, after working as a research assistant at the University's Center for the Study of Higher Education. He became the associate director of the office in 1979. In 1983, the office was reorganized into the Office of Planning and Analysis, and Lozier became its executive director.

As executive director, he was responsible for advising the Office of the President on the continuing development and implementation of the strategic planning process.

During his tenure, he oversaw design of the strategic planning process linking planning and resource allocations that continues to function as the foundation of the University's strategic planning process. He also advised on the initial framework and

training for instituting the continuous quality improvement program; developed the conceptual design for major institutional reaccreditation self-studies in 1986 and 1995; managed reappointments and relocation of faculty affected by program closures; and chaired and served on various committees responsible for planning, budgeting, capital budgeting, continuous quality improvement and enrollment policy and planning.

As associate director, he supported the University master planning process and designed implementation strategies; directed the five-year reaccreditation periodic review report; and designed and wrote the University's Equal Opportunity Plan.

"Among my many assignments and accomplishments, I am most pleased that the strategic planning process has been embraced by three Penn State administrations and is probably the leading continuously operating strategic planning process among major public research universities," Lozier said.

Before coming to Penn State, Lozier was dean of men at Atlantic Christian College, now Barton College.

Lozier earned his bachelor's degree from Rutgers University, New Brunswick, N.J., in 1966; a master's degree in education from Southern Illinois University, Carbondale, Ill., in 1968; and a doctorate in higher education from Penn State in 1973.

Lozier will relocate to the New York metropolitan area.

the student commons, residence halls and the campus library.

The academic strength of Penn State Hazleton is reflected in record student enrollment; in the 1995-96 academic year, the campus enrollment stood at an all-time high of more than 1,320 students. Many new faculty were added during the past decade in environmental sciences, meteorology, geography and communications.

Aurang also plans to return to his research agenda.

McKeesport DUS coordinator retires

Sarah Haddad, Division of Undergraduate Studies coordinator for the Penn State McKeesport Campus, retired effective July 1 with 28 years of service.

Before joining the McKeesport Campus staff in 1968, she taught chemistry at the Penn State New Kensington Campus for two years. She holds a bachelor of science degree in chemistry from Westminster College and a master of arts degree from the University of Pittsburgh.

She served as assistant to the dean of students at the McKeesport Campus for 16 years before her appointment as DUS coordinator. She was assistant to the dean of women at the University of Wisconsin at Madison from 1965 to 1966.

Haddad is a native of New Kensington.

Sarah Haddad

Head of academic affairs for Penn State Hazleton returns to history teaching

Harold W. Aurand, director of academic affairs at the Penn State Hazleton Campus since 1986, has returned to his teaching duties as a full professor of history at the campus.

Aurang's decade as head of academic affairs at the campus has been a period of strong academic growth and achievement. Through Aurand's efforts, all faculty have computers for teaching innovations and research, and student computer laboratories now dot the campus in classroom buildings,

His reputation for research and publication in the field of Pennsylvania history and the history of the coal industry in northeastern Pennsylvania is international.

A prolific author, his works include several books.

He plans to continue work in academic activities at Penn State Hazleton, and to be active in community work. His community activities include board memberships with the Eckley Miners Village Associates, United Way, United Charities and Leadership Hazleton.

Several retire from service after long careers at University

Dorothy M. Bonson, residence hall utility worker, Housing and Food Services, from Aug. 29, 1977, to July 6.

Doris W. Coldren, instructor of English at the Penn State Fayette Campus, from Sept. 1, 1970, to June 30.

Lillian D. Garbrick, staff assistant IV, University Libraries, from May 10, 1976, to June 30.

Harold A. Groff, assistant professor of engineering at the Penn State Wilkes-Barre Campus, from July 1, 1980, to June 30.

James A. Hale, assistant professor of agriculture at the Penn State Mont Alto Campus, from Sept. 1, 1974, to June 30.

Jon F. Jones, manager, Housing and Food Services II at the Penn State Mont Alto Campus, from Sept. 14, 1981, to June 30.

Beverly J. Keefer, staff assistant VI at the Penn State Berks Campus, retired June 1 after 26 years of service at the University. She has worked at Penn State since June 23, 1969.

Roberta Kevelson, professor of philosophy at the Penn State Berks Campus, from Sept. 1, 1981, to July 1.

James M. Linsky, staff assistant VIII in the Applied Research Laboratory, from July 11, 1977, to June 30.

Miriam E. Mackey, food preparer B, Housing and Food Services, from Sept. 3, 1980, to June 29.

Helen A. Manfull, professor of theatre arts in the College of Arts and Architecture, from Sept. 1, 1973, to June 30.

Betty V. Markel, group leader/snack bar worker in Housing and Food Services, from Aug. 26, 1977, to June 1.

Fred E. McMullin, financial officer IV, Corporate Controller's Office, from Sept. 11, 1978, to June 29.

Richard A. Riddle, administrative assistant II in the College of Education, from Sept. 1, 1978, to June 30.

Sue C. Schnarrs, food service worker, Housing and Food Services, from Aug. 25, 1985, to June 30.

Frank J. Schwab, project manager, Office of Physical Plant, from Aug. 19, 1974, to June 30.

Sibyl L. Severance, associate professor of English at the Penn State Delaware County Campus, from Sept. 1, 1980, to July 1, 1996.

Jean C. Stump, library supervisor III, University Libraries, from Dec. 3, 1973, to June 30.

Thomas E. Tabor, mechanical/electrical engineer III, Office of Physical Plant, from Dec. 7, 1972, to June 30.

James B. Uhl, assistant professor of engineering at the Penn State York Campus, from Sept. 1, 1982, to June 30.

Gardner D. Wagner, foreman, Waste Water Treatment Plant, Office of Physical Plant, from March 6, 1978, to June 30.

News in Brief

Changes in parking fees

As of Aug. 1, it will cost a bit more to park in most areas on the University Park campus. However, the "park and pool" lot, newly relocated to the Research Park, will remain free.

"The rate increase will provide the funding necessary to develop and maintain adequate parking facilities. The soon-to-be-started expansion of lot Red A, by the golf course, and the recent resurfacing of Blue A Curtin, behind Ag Administration, are examples of projects funded by parking registration fees," said Betty J. Roberts, assistant vice president for Business Services. The basic registration fee for faculty and staff parking areas will increase from \$14 to \$15 a month, while the registration fee for reserved lots will increase from \$20 to \$22 a month.

Roberts recently took over responsibility for Parking Services under a reorganization that will merge Parking with Fleet Operations, forming a new Transportation Services unit. The new unit was transferred to the Office of Business Services from its previous home in Safety and Environmental Services.

Fall Blood Drives

The Centre Communities Chapter of the American Red Cross will conduct several blood drives at University Park over the next few weeks. Open drives include:

- Friday, Aug. 30, Penn State Scanticon, noon to 6 p.m.
- Tuesday, Sept. 3, McCoy Natatorium, noon to 5 p.m.
- Thursday, Sept. 5, Kern Graduate Center, 10 a.m.-4 p.m.
- Monday, Sept. 16, Wagner Building, 10 a.m.-4 p.m.
- Tuesday, Sept. 17, HUB Ballroom, 10 a.m.-4 p.m.
- Wednesday, Sept. 18, HUB Ballroom, 10 a.m.-4 p.m.

Two additional drives will take place by appointment. They are:

- Monday, Sept. 9, Ag Administration, 9 a.m.-3 p.m. Call (814) 863-3452 for an appointment.
- Tuesday, Sept. 10, Applied Research Lab, 10 a.m.-4 p.m. Call (814) 865-3031 for an appointment.

Giving blood is safe and easy, and the entire process takes a little more than an hour, including the health check and something to eat. You can safely donate every 56 days; to get eligibility, call the regional Red Cross at (800) GIVE-LIFE. For additional information, call Connie Schroeder, Red Cross campus blood services coordinator, at (814) 237-2713.

Seminar series

The University Libraries is offering a series of seminars during September to help library users learn more about the growing number of databases accessible through the Library Information Access System (LIAS) and on CD-ROM. LIAS searching techniques that enable users to maximize their searching power also will be presented.

In an effort to accommodate as many participants as possible, some sessions are offered more than once. To register or learn more about the seminars, send an e-mail to signup@psulias.psu.edu. If you have any additional questions, contact Doris Herr at (814) 863-0325. Seating is limited so register early. Information on the seminars can be found by typing **HELP WORKSHOP** when using LIAS or on the Libraries' Web site at <http://www.libraries.psu.edu>.

Unexpected help

Carl Seid, a freshman from New Hampshire, left, got some help unloading his belongings on move-in day from University President Graham B. Spanier. Seid is living in Pennypacker Hall in East Halls on the University Park campus. He and other residents were joined by Spanier, who spent a weekend living in Pennypacker Hall to better acquaint himself with the students and share their experiences living in a campus dorm.

Photo: Greg Grieco

University Libraries fall hours

University Libraries on the University Park Campus will maintain the following schedules during fall semester Aug. 21 through Dec. 5:

All areas of Pattee Library will be open Monday through Thursday from 7:45 a.m. to midnight; Friday, 7:45 a.m. to 9 p.m.; Saturday, 8 a.m. to 9 p.m.; and Sunday, noon to midnight with the following exceptions:

- Historical Collections and Labor Archives, Interlibrary Loan, Pattee Copy Center, and the Rare Books Room will be open Monday through Friday, 8 a.m. to 5 p.m.
- University Archives/Penn State Room will be open Monday through Friday, 9:30 a.m. to 5 p.m. and on Saturday from 9 a.m. to 1 p.m.
- The Music Listening Room will be open Monday through Thursday from 9 a.m. to 11 p.m.; Friday, 9 a.m. to 6 p.m.; Saturday, noon to 6 p.m.; and Sunday, noon to 11 p.m.
- The Architecture Library, Earth and Mineral Sciences Library, Education Library, Engineering Library, Mathematics Library and Physical Sciences Library will be open Monday through Thursday 7:45 a.m. to 11 p.m.; Friday, 7:45 a.m. to 9 p.m.; Saturday, 8 a.m. to 9 p.m.; and Sunday, noon to 11 p.m.
- Pollock Library will be open 24 hours a day, seven days a week.
- On Labor Day, Sept. 2, all University Libraries on the University Park Campus will be open from noon to midnight, with the exception of Pollock Library, which will maintain its 24-hour service.

For more information on hours of library service, call (814) 865-3063; type **HELP HOURS** when using the Library Information Access System (LIAS), or visit the Libraries' home page at <http://www.libraries.psu.edu>.

Golf tourney to benefit United Way

The First Penn State University National Way Campaign Golf Tournament will be held Friday, Oct. 4, at the Penn State Blue Golf Course on the University Park Campus.

Entrance fee for the event, a four-person scramble, is \$40 per person and includes green fees, cart, tee prizes, on-course refreshments, catered lunch and team prizes.

The event will begin with lunch at noon. The 18-hole round of golf will begin at 1 p.m.

For an application, visit the Penn State Golf Course Pro Shop; contact your University United Way representative; or call John Dixon at (814) 863-3634 or e-mail him at jwd1@psu.edu.

Women's Club fall reception

The Penn State University Women's Club will welcome newcomers and returning members at its fall reception at 7:30 p.m. Tuesday, Sept. 10, at the Nittany Lion Inn Ballroom.

Women who are Penn State faculty, staff or spouses of faculty or staff members are invited to get acquainted with host and President Maxine Millar, and other members of the club.

Women may register for one or more of approximately 20 interest groups which include sports activities, fun with foods, antique study, book exchanges, bridge, foreign languages, knitting and needle craft, mothers' groups, professional women and special excursions. Two new interest groups have been added this year: downhill skiing and "Investment—Putting Your Money to Work." Service groups include housing referral, reading for the visually handicapped and the volunteer center of Centre County. In addition, the club has established a loan fund for returning adult students at University Park. For more information, call Barbara Dean at (814) 237-7805.

Restoring ecosystems a complex task

By ANDREA ELYSE MESSER
Public Information

Ecologists and land managers may need to take an innovative approach and look beyond fire as a way to restore the ecosystem and encourage endangered species to proliferate in the eastern serpentine barrens.

The eastern serpentine barrens lie along the Pennsylvania and Maryland state lines, east of the Susquehanna River and west of Philadelphia. The terrain is underlain by serpentine bedrock, with a mosaic of forest patches of oak and pitch pine savanna/grassland. The open areas contain seven rare plants and four endangered moths species.

"The barrens are thought to be a fire dependent ecosystem," Karen Arabas, graduate student in geography, said. "However, changing land use practices resulting in fire suppression may be threatening the plant communities there."

Working in the Nature Conservancy's Chrome Serpentine Barrens, Arabas originally wanted to use prescribed burning to create openings in the oak forests that would encourage rare plants to grow and restore the area. Prescribed burning is conducted under controlled conditions using specified levels of relative humidity, air temperature, wind speed and moisture of fine fuels. The fire is contained to a specific area, bounded by firebreaks.

"It seemed reasonable to think that burning would increase plant diversity, encourage serpentine-restricted species and discourage invading species," Arabas said.

Most people believe all fires are bad for forests. Karen Arabas, however, has done research on how some ecosystems are actually fire dependent. She has found that changing land use and fire suppression may threaten some plants.

Photo: Greg Grieco

Historical documents, tree-ring studies and anecdotal evidence indicate that the area burned frequently in the past, maintaining the openings. But since the early 1900s when fire suppression became standard practice, any fires that started have been contained. The last fire in the area was in 1991 with one prior to that in 1963, but these fires were quickly extinguished.

Arabas carried out prescribed burns in both spring and fall. She varied the approach, burning some areas only once, while others were burned during two consecutive years.

"April burning was more intense and severe," Arabas said. "Some of the spring burn actually killed a majority of the trees because it was

hot and traveled into the canopy."

After the spring burn, 84 percent of the red maples, the invasive species, resprouted, while only 34 percent of the oaks did. Also, 30 percent more oaks were killed in the fire than maples.

"There was a huge increase in herbaceous species, but only a few serpentine restricted plants were among them," Arabas said. "However, the area has only been monitored for about two years and not much is known about the dispersal of these rare species."

Fall burns were much less intense, leaving the canopy intact. Those areas with two consecutive years of fall burns did show an increase in serpentine restricted species, but the

increase was modest including only two species, a violet and a sege.

"Large amounts of data were collected from these experimental burns," Arabas said. "We now know that fire's effect on vegetation is very complex and varies greatly with the type of fuels and weather conditions."

"Most important, we have learned that simply restoring the pre-European settlement fire regime may not produce a pre-European settlement ecosystem," Arabas said. "More innovative management techniques, including some combination of logging, prescribed burning and even grazing might better restore the serpentine barrens."

More research is under way to test the effects of these alternative techniques.

Space study yields wet surprise

By BARBARA HALE
Public Information

We'll never be able to get wet quite the same way again.

Results from a Penn State experiment aboard a space shuttle have surprised researchers by disproving a basic, generally accepted principle about how liquids "wet" solids.

The principal holds that a liquid will predictably form regular "beads" on a solid surface, like rain on a highly polished car hood. Evidence from the space shuttle experiment, however, shows that is true only if the surface is horizontal to gravity. The shapes liquids form on non-horizontal surfaces on Earth or on any solid surface in space are irregular, like a teardrop on a baby's cheek.

Randall M. German, the Brush Chair professor in materials and principal investigator on the experiment, said that disproving the principle will have far-reaching effects because it undermines previous knowledge in physics and chemistry and is used extensively in German's own field, materials science, to design new metal alloys.

Wetting wasn't the main focus of the experiment. German and his colleagues had designed their experiment to determine whether a low-gravity environment could help improve liquid sintering, an alloy production technique used to make the fillings in your teeth and other products.

In sintering, several types of powdered metals are mixed, compacted and heated. Some of the metal powder particles melt and surround ones that don't. On Earth, the metal alloys produced this way sometimes have empty spaces where the liquid melt failed to wet the surfaces of some of the unmelted solid particles. The solid particles can also clump together forming grainy areas and the finished product sometimes assumes an unintended shape.

In space, the researchers reasoned, the powdered metals would not settle or clump without gravity's downward pull and any pores would be filled or not-existent.

The experiment, however, turned theory on its head. The samples processed in space had large irregular pores. They also possessed grainy areas and got just as distorted in space as they did on Earth.

German said the experiment showed that wetting isn't the same alloys in space that are very different from the ones on Earth. However, the new insight on the forces governing the formation of alloys gained through the experiment will most likely lead to previously undreamed of applications.

German said his research team are preparing to send another experiment to space in March 1997.

Pinpointing gains stymies many logistics executives

Manufacturing and merchandising executives are pretty sure that careful management of logistics benefits their businesses, but have trouble expressing the results in dollars, a survey of 396 firms shows.

The study by researchers with Penn State, the University of Tennessee and Michigan State also finds that the executives feel logistics management's

greatest contribution to firm revenues comes from increases in product availability to customers. But even this boon can only be measured by a small percentage of firms.

"Although logistics covers a spectrum of day-to-day firm activities like purchasing, transportation, packaging, warehousing, and order processing, its intangible nature makes

gauging effects on revenue difficult even in the best of circumstances," Robert A. Novack, associate professor of business logistics in The Smeal College of Business Administration, said.

In spite of the apparent troubles regarding measurement, "Our other findings suggest that today's leading-edge firms are becoming so 'scientific' in their approaches to logistics

management that the ability to reduce logistics costs, although not exhausted, is quickly diminishing," Novack said.

Novack worked with C. John Langley, distinguished professor of logistics and transportation at the University of Tennessee, and Lloyd M. Rinehart, associate professor of marketing and logistics at Michigan State University.

ATHLETICS

A regular column provided by Intercollegiate Athletics.

Nittany Lion hoops

The men's basketball team will open its 1996-97 regular season with a game against Mount St. Mary's in The Bryce Jordan Center at 8 p.m. Saturday, Nov. 23, following the Nittany Lions' final home football game against Michigan State.

The Nittany Lions also begin their Big Ten season at home against Iowa on Jan. 4 at 8 p.m.

The schedule features six nationally-televised games, including a CBS Jordan Center date with Indiana on Jan. 26. Five other games will be televised by ESPN.

Distinguished service

At the National Association of Academic Advisors for Athletics (NAAAAA) conference, Sandy Meyer was recognized for her outstanding contributions to NAAAAA as convention program coordinator.

Meyer has been an academic counselor in the Academic Support Center for student-athletes since 1987. She works with student-athletes from several sports.

New assistant coach

Dennis Hohenshelt has been named assistant coach of the men's volleyball team.

Hohenshelt, a native of Harrisburg, is a 1993 graduate of Juniata College, where he received his B.S. in secondary education/social studies. While at Juniata, he led the Eagles to Eastern Intercollegiate Volleyball Association Division III Championships in 1992 and 1993, and was named team captain and MVP his senior season. He also served two years as assistant coach at Juniata in 1994 and 1995. After being promoted to the position of head coach last season, Hohenshelt led Juniata to an 18-8 record and a second place finish in the EIVA Division III Championship.

Hohenshelt assisted at the Olympic Festival and World University Games in 1994 and 1995. He also aided at the tryouts for the U.S. National and Junior National teams.

For the Record

Jean Morris, staff assistant at the Penn State Mont Alto Campus, was recently recognized by that campus with the Outstanding Service to the Campus Award, while Jody Eike, Housing and Food Service employee at Mont Alto, received the Support Service Excellence Award. The two awards were incorrectly identified in an Aug. 8 story on page 12.

What's going on here?

Event calls attention to program

If you walked past the HUB lawn on the University Park Campus on Aug. 20, you probably saw this pirate ship (above). The battered and tattered ship was erected for the Third Annual Enviro-Engineer Extravaganza. The ship had a mast height of 24 feet and included a crow's nest and Jolly Roger.

Each year, the student organization puts together a unique production for incoming engineering students. The purpose of the event is to introduce students to the hands-on aspects of the engineering world. The event included activities combining teamwork and creative problem solving, ranging from the creation of innovative name tags to a design competition with prizes donated by local businesses. In one activity, students had to find their way through the ferocious ferns, right.

A whole new kind of benefit

Pilot program lets employees help each other during crises

By LISA M. ROSELLINI
Public Information

Thinking back to that cold day in March when her 1981 Buick left the roadway, Bonnie Stauffer looks solemn as she recalls the accident that nearly took her life, but restored her faith in people.

On March 15, Stauffer, a staff assistant in the Office of Physical Plant, wasn't feeling quite right. She asked if she could go home, but the trip turned into a bad dream when the wheels of

her car dropped onto the berm. Her attempts to force her auto back onto the pavement sent the Buick into a tailspin, rolling and crashing into a ditch.

For a brief instant, Stauffer thought she was okay—although her car was totaled. She climbed from the wreckage and felt a numbing sensation in her neck. Later she would learn that she had nearly severed a vertebra and jammed another vertebra over top of its neighboring disk in her spinal column.

"It happened so quickly," she said.

"I had a seat belt on, but I knew something wasn't right. It felt strange."

In a matter of hours, she was life-flighted to The Hershey Medical Center, where surgeons fused a bone from her hip to her cracked vertebra. After nine days in a hospital bed, Stauffer went home—and began to worry.

That's when her co-workers stepped in.

"I didn't know how I was going to pay my bills or how long I would be off," she said. "You wonder if you'll

See "Policy" on page 3

Planning process will reallocate funds

Although funding from the Commonwealth has been tight in recent years, Penn State is continuing to strategically reallocate funds to strengthen its core missions.

The University Planning Council, which was formed in October 1996, has embarked on a comprehensive effort to scrutinize all of Penn State's activities to make them more cost-effective and efficient. At the same time, increasing levels of support will be directed to the core educational activities of the University.

"We have recently completed a three-year University Future Committee process in which approximately \$31 million was reallocated,

Eisenhower Chapel marks 40 years of service

For four decades, the Helen Eakin Eisenhower Chapel on the University Park Campus has been a place of respite, a site for worship and a spot that has helped many survive the rigors of college life.

Celebrating its 40th birthday beginning Sept. 9, the chapel still fulfills its critical role of supporting the many campus ministries. Originally the vision of its namesake, the wife of Penn State's 11th president Milton Eisenhower, the chapel is now one of the few remaining among the nation's land-grant universities, according to Kenneth Clarke, acting director of the Center for Ethics and Religious Affairs.

"With representation of Jewish, Catholic, Protestant and evangelical traditions, we are truly ecumenical,"

See "Chapel" on page 2

Getting ready

While Joe Paterno drills his football players and fans check their tailgate supplies, another crew gets Beaver Stadium on the University Park Campus ready for the start of the home football season. The first of six home games starts at 3:30 p.m. Saturday as Penn State plays host to Louisville. For details on how the University is preparing, please see the story on page 9.

Photo: Greg Grieco

Inside

Reminder

President Graham B. Spanier will give his second State of the University Address in Eisenhower Auditorium on the University Park Campus from 4 to 5 p.m. on Friday, Sept. 6. The University community is invited to attend. Those located at campuses are invited to attend. Those located at campuses can watch the address live via satellite. WPSX-TV, Channel 3, will broadcast the full address at 11 p.m. the same day.

Research

Recent finding show that all galaxies may not have formed the same way. For details, please see the story on page 11.

Chapel

continued from page 1

Clarke said. "With the presence of Muslim students and other faith traditions, we are truly interfaith."

Following the dream of Helen Eisenhower, who died two years before her idea culminated in brick and mortar, the chapel offers a wide range of services and opportunities that help students develop and explore their faith, as well as a philosophy of life based on sound moral and ethical principles.

More than two dozen clergy and staff of campus ministries work out of Eisenhower Chapel. They represent: the Catholic Center, Christian Student Fellowship, Christians in Action, Episcopal Campus Ministry, Hillel Foundation, International Christians, Latter-Day Saints, Navigators, New Life, United Campus Ministry and the University Lutheran Parish. Another 16 ministries located off campus also serve University Park students.

"The chapel keeps us close to students so that we can fulfill spiritual needs," said Father Leo Aron of the Catholic Center. "Supporting this opportunity for a religious experience is a feather in Penn State's cap."

Tuvia Abramson, executive director of Hillel Penn State, the Foundation for Campus Jewish Life, said the chapel is a slice of the community that is "as diverse as they come, and we serve here as a true inter-faith group."

Many come to the chapel for meetings, classes and other events. The Center for Ethics and Religious Affairs annually lists more than 1,000 worship and prayer activities, 10 or more baptisms, more than 50 weddings, nearly 100 music rehearsals and recitals and more than 1,000 educational programs and conferences. In addition, academic units scheduled more than 200 educational events in the past year.

Celebration planned

The Helen Eakin Eisenhower Chapel on the University Park Campus has served students, faculty, staff and the surrounding community for 40 years. Several events have been planned to celebrate.

Photo: Greg Grieco

40th anniversary events planned for chapel

The official 40th anniversary celebration begins with an inter-faith service at 11 a.m. in Eisenhower's All-Faith Chapel on Monday, Sept. 9, for student leaders, administrators, student affairs staff, faculty, campus ministers and ministers from the community. This group is limited to 125 guests because of the limited seating capacity of the chapel. Call the chapel at 865-6548 to see if seats have become available.

Other activities include:

■ 11 a.m. Monday, Sept. 9, in Eisenhower's all-faith chapel: Inter-faith celebration.

■ 7:30 p.m. Monday, Sept. 9, in the Assembly Room of the Hetzel Union Building: Richard Joel, international director, Hillel, the Foundation for Campus Jewish Life, will speak on "New Occasions Teach New Duties: The Role of Religion in Higher Education (Now and Then)"

■ 7:30 p.m. Thursday, Oct. 3, in 101 Kern: Gary Pavela, assistant professor of communications at the University of Maryland, will speak on "Legal Implications for Religion on Campus: Post-Rosenberger."

■ 7:30 p.m. Wednesday, Nov. 6, in 101 Kern: Conrad Cherry, distinguished professor of religious studies at Indiana University-Purdue University at Indianapolis, will discuss "The Role of Religion in the Global Village."

Awards

Assistant professor garners fine arts grant

Daniel Nadenicek, assistant professor of landscape architecture and director of the Center for Studies in Landscape History, has been awarded a grant from the Graham Foundation for Advanced Studies in the Fine Arts. The grant supported a June conference, "OnSite/InSight: Nature, Humanity and Time: A Symposium on Landscape History."

The mission of the center extends beyond landscape architectural history to the broader field of landscape history. Over the next several years, the center will assist landscape historians in their research, facilitate interdisciplinary sharing, help communities coordinate historical projects in the landscape, publish conference proceedings and other documents of importance to the landscape history field and organize symposia and other public events.

Nadenicek was awarded the 1996 National Council of Educators Award of Recognition for Excellence in Teaching Research and Public Service.

Population Research Institute awarded core support grant

The Population Research Institute, directed by Daniel T. Lichter, professor of sociology, has been awarded a five-year, \$2.3 million core support grant from the National Institute of Child Health and Human Development. Population Research Center funding from the institute is limited to nine leading centers of population research in the United States. Other funded centers are located at Princeton University, University of Chicago, University of Michigan, University of Texas, University of Wisconsin, University of North Carolina, University of Pennsylvania and Brown University.

The Population Research Institute is an interdisciplinary center that provides research support services and facilities to more than 40 faculty research associates and 50 pre- and post-doctoral trainees. Faculty and students are represented from six different colleges and 11 departments. The center grant supports administrative services, computing facilities and programming, statistical

consulting and information access and retrieval. The new grant also provides technical assistance for initiatives in Geographical Information Systems and supports program development in biodemographic research on biobehavioral genetics, endocrinology and health.

The institute also administers about 30 externally funded research contracts and grants from the National Science Foundation, National Institutes on Aging, the Mellon Foundation and the Hewlett Foundation, among others. Researchers in the Population Research Institute are identifying the social, economic and environmental factors associated with high fertility in developing countries in Africa, Asia and Latin America. Penn State demographers also are examining population aging and intergenerational relations, infertility and other reproductive impairments and health and longevity in the American population.

The Population Research Institute is part of Penn State's Intercollege Research Programs.

Policy

continued from page 1

still have a job. I was only working full time for six months before the accident and I only had a minimum number of vacation days. I don't even think I had a week saved.

"You're supposed to be trying to recover, but you have a lot of stress... a lot of worries like this that can really set you back."

But Stauffer didn't need to worry long. A pilot program that would allow her colleagues to donate vacation days was being tested in the Office of Physical Plant. Hearing of Stauffer's accident, her co-workers stepped forward and donated vacation days for her use. That action allowed Stauffer to get back on her feet and return to work full time.

"I don't know how I can explain it to anybody," she said, her eyes filling with tears. "It still chokes me up when I talk about how I know in my heart that their support and selflessness helped me to heal faster."

Stauffer was the first person to use what has now evolved into a trial program for the entire University. For the next year, employees can anonymously donate some of their accumulated vacation time to other workers in their unit who have experienced a personal catastrophe, but have exhausted their own paid time off.

"It is an opportunity to help a co-worker, someone who really needs a hand at a very difficult time in their life," Billie Willis, assistant vice president for Human Resources, said. "The program can be used by people, like Bonnie, who have experienced an accident, or for a serious illness or an illness in the family that would require someone to stay away from work for an extended period of time. This program really shows the human side of the University, which often isn't seen."

UPC

continued from page 1

and now we have undertaken a continuing strategy to reallocate approximately \$10 million to \$11 million over the current and the next two fiscal years," David Wormley, dean of the College of Engineering and a member of the Council, said.

The council plans to develop a University-wide strategic plan and make recommendations to the president and provost by May 1997. Five-year plans will be developed by each academic and administrative unit of the University by January and will be followed up by hearings with each academic dean and unit budget director, to help develop the plan.

"It's an aggressive schedule, but one which we believe can be met and can lead to the formulation of a plan that will help strengthen Penn State as we move into the next millennium," Wormley said.

In the first two years of the plan, support units have been asked to identify 1.5 percent and academic units have been asked to identify 1.2 percent of base budgets for reallocation to the University. In this 1.2 percent recycling, academic units may receive a three-tenths of 1 percent credit or return of funds with the development of an effective plan to re-deploy resources from administrative to educational activities.

"It is in the classrooms with the goal to place more faculty in the classrooms and laboratories," Wormley said, "and to improve our service to our students and the citizens of the Commonwealth while reducing the overall administrative burden in the University."

John A. Brighton, executive vice president and provost and chair of the council, said "We understand that with new recycling effort funds are increasingly difficult to identify in each college and support unit."

"All academic units are asked to recommend high-priority areas for enhancement," Brighton said.

Willits said the idea for the program is not new — a number of corporations already have vacation donation policies in place. But an e-mail message to the president is what set the wheels in motion.

"I guess it was a pretty bold move to suggest a policy change, but I really wanted to see something like this accomplished," Donna Nicely, author of the e-mail, said. "My sister told me they have a similar program at Westinghouse and I thought, 'Why not here?'"

So she asked **Graham Spanier** that very same question.

Nicely, coordinator of research and administrative services in the College of Education, was concerned about a co-worker who was struggling with the problem of finding needed home care for her husband, who was suffering with Lou Gehrig's disease.

"I don't know if I caused this program to be put in place, but it makes me feel great to know that I might have helped someone," Nicely said. "And, you never know when you might be the one who needs it."

Willits said the program will run until July 1997, when Human Resources will assess the program's value to the University community and the feasibility of continuing it.

"This program has to be a comfort to anyone who needs to use it," the still-recovering Stauffer said. "It really gives you renewed faith in people."

Help was there

Bonnie Stauffer needed more paid time off than she had available to deal with a personal medical crisis. Thanks to generous co-workers who donated their unused vacation time to her, she got it.

Photo: Andrea Hurley

Just when you start thinking people really don't care anymore or are just out for themselves, you have something like this happen.

"I just really wish I could thank everyone personally and convey how much it meant to me that people really do care. This is one thing that gets me going every day," she said.

For full details about the program, contact the Human Resources representative or director of Business Services in your work unit.

Study groups guide planning efforts

As part of the University Planning Council's activities in recent months, 10 study groups have been formed to help guide future planning efforts involving some key areas that the council identified during the spring semester.

These study groups will deliver their reports to the council during September, October and November. Each group has a convener and, in total, scores of University faculty, staff, students and administrators are serving on the study groups.

The 10 study groups, and their conveners are:

- Academic enhancement, **Greg Goffroy**
- Academic organization, **Eva Pell**
- Differential tuition, **Gary Schultz**
- Cost centers, **John Brighton**
- Continuing and Distance Education, **David Wormley**
- Undergraduate support services, **Ron Filippelli**
- Graduate support services, **Eric Barron**

■ Research support services, **Peter Luckie**

■ Non-academic support services, **George McMurtry**

■ Multicultural goals, **Terri Brooks**

"The 10 study groups have been initiated to assess the efficiency and effectiveness of critical organizations," according to **John A. Brighton**, executive vice president and provost and chair of the council. Brighton said "The study groups have been asked to identify ways to improve our organizational support for core teaching, research and services activities."

In the case of differential tuitions, Brighton said that study group is reviewing the policies of peer institutions and evaluating possible new approaches for Penn State.

Background stories on the formation of the UPC last October and a list of its current members can be found on the World Wide Web at <http://ur-psu.edu/PresAdmin/PresAdmin.html>.

University community that provides leadership for constructive participation in a diverse, multicultural world.

During the current fiscal year, which began July 1, each unit was asked to identify 1 percent of general support funds for reallocation to the University. These, along with other funds, are now being used for three major areas of support.

The first is to support colleges with increased student demand. The second area of support is for essential educational infrastructure that is important for all students, such as the libraries and computational classroom and laboratory infrastructure.

The third key area to receive support in the current year is a major teaching and research initiative in the life sciences that was recommended by the Future Committee.

LECTURES

Louganis dives into Behrend lecture series

The award-winning Speaker Series at Penn State Erie, The Behrend College, returns this fall to examine the challenges of the millennium in "Approaching 2000: Uniting Science, Technology and Humanity."

Greg Louganis, the most decorated Olympic diver, will be the first speaker in the series.

Louganis' lecture, "Breaking the Surface," will begin at 7:30 p.m. Monday, Sept. 16, in the Reed Union Building Commons. It is free to the public.

Louganis began diving at the age of 9; at 16 he won his first Olympic medal, a silver on the platform. At 24 he became the first man in 56 years to win both Olympic platform and springboard competitions. Four years later, in 1988, he repeated double gold medals in the same events despite a near-disastrous head injury on the platform. He remains the only male diver ever to win two gold medals in consecutive Olympics.

In his recent autobiography, *Breaking the Surface*, Louganis revealed that he was homosexual, HIV-positive, that he had been the victim of domestic abuse and that in spite of his many diving accomplishments and honors he suffered debilitating feelings of low self-esteem and worthlessness.

Other lectures in the series are:

■ **Bradley G. Richardson**, author of the best-selling book *Jobsmarts for Twentiethcentury*, will be the second series speaker. His lecture of the same title begins at noon Wednesday, Oct. 30, in the Reed Union Building Commons.

■ **Wired** magazine founder and executive managing editor **John Battelle** will discuss the importance of being "Wired for the 90s" at 7:30 p.m. Wednesday, Nov. 13, in the Reed Union Building Commons.

Battelle serves as a director of new business for the magazine's parent company, which includes HotWired Online Service.

■ **A Thursday, Nov. 21, appearance by Brother Bob Artman** titled

"Restoring Dignity" will begin at 7:30 p.m. in the Reed Union Building Lecture Hall.

Artman, coordinator of Our Daily Bread, a Maryland soup kitchen that has served more than 2 million meals, will offer insights into the plight of the homeless gleaned from 16 years of work in Boston, New York and Baltimore.

■ "Dumping in Dixie: Race, Class and Environmental Quality" will be the topic of activist **Robert Bullard's** Monday, Jan. 20, lecture. The address, which begins at 7:30 p.m. in the Reed Union Building Commons, will be part of the college's Martin Luther King Jr. birthday celebration.

■ **The Rev. Jesse Jackson**, one of America's foremost political figures, will speak at Penn State-Behrend in February on a date to be announced. The topic of Jackson's address will be "Keep Hope Alive."

■ **Lynne V. Cheney**, an outspoken advocate for improving education in America, is an influential voice in the ongoing debate over our country's culture and values. Her lecture, "Telling the Truth: Why Our Culture and Country Have Stopped Making Sense," will begin at 7:30 p.m. Thursday, March 6, in the Reed Union Building Commons.

Cheney is the former chair of the National Endowment for the Humanities.

■ Capping the series will be the debate "Creation vs. Evolution: Challenging Darwin," to be held at 7:30 p.m. Monday, April 14, in the Reed Union Building Commons. Debaters **Michael J. Behe** and **Niles Eldredge** are both evolutionary scientists, but disagree on the role divine intervention may have played in the formation of human life.

An interpreter for the hearing impaired will be visible at each lecture and assistive listening devices are available upon advance request to the Office of Student Activities, (814) 898-6171.

pus, will also focus on creating and sustaining the necessary climate and positive, as well as negative, effects in achieving multiculturalism.

The talk is free to the public, but registration is required. To register for this event, call the center at (717) 772-3590.

Lion-Hearted Lectures to kick off Sept. 20

The 15th annual Lion-Hearted Lecture Series sponsored by the Penn State Cardiovascular Center of The Milton S. Eshelman Medical Center will be held on Friday, Sept. 20.

The series, titled "The Management of the Patient with Congestive Heart Failure," is designed for cardiologists, internal medicine specialists, family and general practitioners, nurses, physician assistants, pharmacists, exercise physiologists and other allied-health professionals.

The speakers and their topics are:

■ **Dr. Robert Zelis**, professor of medicine at Hershey, on "Pathophysiology and Initial Evaluation of Congestive Heart Failure;"

■ **Dr. Spencer H. Kubo**, associate professor of medicine and medical director of the Heart Failure/Heart Transplantation Program of the University of Minnesota, on "Medical Management of Chronic Ambulatory Congestive Heart Failure: Role of Diuretics, Vasodilators, Beta Blockers and Inotropic Agents—Which Drugs Prolong Survival?;"

■ **Dr. James A. Reiffel**, clinical professor of medicine, Columbia-Presbyterian Medical Center, on "Are

Antiarrhythmic Drugs Useful in Prolonging Survival in Patients with Left Ventricular Dysfunction?;"

■ **Dr. Blase Carabelle**, professor of medicine, and **Charles Ezra Daniel**, professor of cardiology, Medical University of South Carolina, on "Patients with Ischemic Cardiomyopathy: Who Will Benefit from Revascularization?;" and "Timing of Heart Valve Replacement in Patients with Valvular Heart Disease;"

■ **Dr. Gerald V. Naccarelli**, chief of cardiology and director of the Penn State Cardiovascular Center at Hershey, on "Management of Atrial Fibrillation in the Congestive Heart Failure Patient;"

■ **Dr. John P. Boehmer**, assistant professor of medicine at Hershey, on "In-Hospital Management of Refractory Congestive Heart Failure;" and

■ **Dr. Walter E. Pae Jr.**, professor of surgery at Hershey, on "Chronic Mechanical Assist Devices: Their Current and Future Role in Managing Congestive Heart Failure."

The fee for the series is \$60 per person and includes the cost of instruction, handout materials, refreshments and lunch.

Enrollment is limited and registration should be received no later than Sept. 6. To register, call the continuing education office at (717) 531-6483.

Australian labor relations topic of Sept. 11 seminar

Anthony Cooke, secretary of the Trades and Labour Council of Western Australia, will present a seminar titled "Strife or Settlement? Trends in Australian Industrial Relations" at 4 p.m. Wednesday, Sept. 11, in 124 Sparks Building. The seminar, which is open to the public, is jointly sponsored by the Australia-New Zealand Studies Center and the Department of Labor Studies and Industrial Relations.

An official in the Western Australian Trades and Labour Council for many years, Cooke became its principal officer in 1995. He holds an M.A. in social policy from York University

in Britain, and an MBA from Curtin University in Perth. He has been instrumental in extending the Australian labor movement's linkages with counterparts overseas, notably in post-apartheid South Africa, and is a keen protagonist of worker human/social rights in Australia and internationally.

He is currently in America under the auspices of the U.S. International Visitor Program and the Free Trade Union Institute.

Anyone who would like more information should contact **Patricia Corbett** by phone at (814) 863-1603 or e-mail at pac9@psu.edu.

more systematic. The old rules will be valid alongside the new ones until April 1, 1998, after which only the new spellings will be acceptable in German schools.

Eichloff will also talk about the implications of the reform and its principles, as well as provide examples of the changes.

Talk outlines steps for new thinking

"Creating an Organizational Climate for Multiculturalism," a talk that will outline the steps needed to achieve changes in attitudes and behaviors, will be presented from noon to 1 p.m. Thursday, Sept. 19, at the Penn State Harrisburg Eastgate Center.

The lecture, to be given by **John G. Bruhn**, provost and dean of the cam-

Obituaries

Soil conditions engineer dies after short illness

Louis Berger, 82, an engineer whose expertise in soil conditions enabled him to build highways and even airport runways effectively on soft ground, died Aug. 21 in New York following a short illness.

Berger headed the New Jersey-based Berger Group, an engineering and environmental planning company he founded in 1953. The group now employs nearly 3,000 people in more than 70 countries.

Berger graduated from Tufts College in 1936, with a degree in civil engineering. He went on to receive a master's in soils and geology from the Massachusetts Institute of Technology. In 1940, he took his first job, supervising construction of two large dams in southern Illinois. He joined the U.S. Coast Guard in 1942, first designing waterfront facilities along the Mississippi and later commanding a Coast Guard base in Greenland.

After the war, he went on to earn his doctorate in soil mechanics from Northwestern University and then joined the engineering faculty at Penn State.

In 1952, Berger gave up his professorship and opened his first consulting office, in Harrisburg, Pa., a firm which helped design part of the Pennsylvania Turnpike, the first turnpike in the United States. In 1953 he opened a second office, which eventually grew into the Berger Group.

Other deaths

Virginia E. Eckert, tray assembler at The Hershey Medical Center from Oct. 19, 1970 until her retirement Nov. 1, 1980; died Aug. 2 at the age of 81.

Corliss R. Kinney, professor of fuel technology, from July 1, 1943, until his retirement Dec. 23, 1960; died July 2. He was 95.

Presidential prestidigitator

President Graham B. Spanier shows some of his magical skills to children of international students. The children visited Spanier at Old Main on the University Park Campus during the first summer camp run for children living in University housing. The children also visited the Materials Research Laboratory, Bryce Jordan Center, Frost Museum and Palmer Museum during the eight-week-long program.

Faculty/Staff Alerts

Award will recognize faculty

A new award to recognize faculty who have excelled in all three areas of their professional lives as measured by their achievements in the integration of teaching, service and research or creative accomplishments has been created. The award was proposed by the 1995-96 Academic Leadership Program fellows of the Committee on Institutional Cooperation, the academic consortium of the Big Ten universities and the University of Chicago.

Known as the President's Award for Excellence in Academic Integration, this newly established honor carries with it a prize of \$3,000 and will be awarded in the spring of 1997. For more information, contact the Office of the Vice Provost at (814) 863-7494.

Do-it-yourself searching service

Beginning Monday, Sept. 9, through Wednesday, Dec. 4, the University Libraries Do-it-Yourself Searching Service will be available from 6 to 9 p.m. Monday and Wednesday evenings in 105 East Pattee Library.

This service gives students, faculty and staff a chance

to do their own computer search using a choice of more than 150 dial-up databases in a variety of subjects. Self-study guides provide users with the basic skills needed to do searches, but for best results users are advised to consult a librarian in their subject area. The search process is similar to CD-ROM searching but more databases are available, and it provides more years of coverage. For Penn State students, faculty and staff, many searches are provided free of charge.

For more information, contact the Pattee Information Desk at (814) 865-2112 or the search service coordinator at (814) 865-3705.

Penn State Facts available

The Office of University Relations has available the 1996 edition of *Penn State Facts*, a pocket-sized pamphlet containing brief statistical information on such topics as enrollment, academic achievements, research and graduate studies, diversity, budget and campus locations. The pamphlet is free and may be obtained by calling (814) 863-4512 or through e-mail request at als@psu.edu.

Penn Staters

Dr. Julien Biebuyck, Eric A. Walker professor and chair of anesthesia and associate dean for academic affairs at The Hershey Medical Center, was awarded an honorary fellowship by the Royal College of Anesthetists in London, England. Biebuyck also gave the commencement address to the British diplomats of the Royal College who had been awarded their fellowships by examination.

Anthony Cutler, professor of art history, delivered a paper, "The Memory Palace of Constantine Porphyrogenitus," at the XXIX International Congress of the History of Art in Amsterdam, The Netherlands.

Rangachar Kasturi, professor of computer science in the College of Engineering, has been named a Fellow by the International Association for Pattern Recognition, an affiliate member of the International Federation for Information Processing.

Robert E. Newnham, Alcoa professor of solid state science and associate director of the Intercollege Materials Research Laboratory, has been selected as the 1996 MRS Turnbull lecturer by the Materials Research Society. The Turnbull lectureship recognizes the career of a materials scientist who has made outstanding contributions to understanding materials phenomena and properties through teaching and research.

Newnham was also a keynote speaker at the XVII Congress and General Assembly of the International Union of Crystallography. Newnham spoke to the convention about molecular mechanisms in electronic sensors and actuators.

Ranny Singiser, coordinator of field placements in the Penn State Harrisburg Division of Behavioral Sciences and Education, has been appointed to the Phi Delta Kappa board of directors. Phi Delta Kappa is a chapter-based organization of professional educators ranging from early childhood teachers and administrators to college professors and deans. The organization is committed to research and education leadership.

Elizabeth J. Susman, Shibley professor of biobehavioral health, presented an invited paper at the NATO Advanced Study Institute on the Biological Basis of Violence in Rhodes, Greece. The paper was titled "Hormones-Context Interactions and Antisocial Behavior in Youth." It was co-authored by **Angelo Ponirakis**, graduate student in the Department of Biobehavioral Health.

The ARTS

AT PENN STATE

On stage

The musical group CELLO will appear at noon Friday, Sept. 13, in the Wintergarden of the Reed Union Building at Penn State Erie, The Behrend College.

Students to give jury recognition recital

Nine undergraduate students who study with faculty members in the College of Arts and Architecture School of Music will perform in a jury recognition recital at 8 p.m. Friday, Sept. 6, in the School of Music Recital Hall on the University Park Campus.

The performers are students of Susan Boardman, Kim Cook, John Daniel, Marylene Dosse, Timothy Hartzel, Richard Kennedy, Steven Smith and Norman Spivey, all members of the School of Music faculty.

The recital is free to the public.

Ellis to present recital

On Sunday, Sept. 8, at 3 p.m., Evelyn Ellis will present her annual clarinet recital along with Jill Olson, piano, in the School of Music Recital Hall on the University Park Campus.

Ellis and Olson are entering their 14th year of musical collaborations. Ellis is a graduate of the Penn State School of Music. She is the coordinator of minority programs for the College of Arts and Architecture and instructor in the School of Music. Olson is a soloist, piano teacher and chamber music per-

Evelyn Ellis

former in the Centre Region and a graduate of the University of Wisconsin.

The recital is free to the public.

Organist recital set

Jane Miller, associate professor of music, will present a free organ recital at 8 p.m. Monday, Sept. 9, in the School of Music Recital Hall on the University Park Campus.

Miller teaches organ, harpsichord, a figured bass course and keyboard literature course. She is district educational coordinator for western Pennsylvania in Region III of the American Guild of Organists and a member of the Association of Lutheran Church Musicians.

International festival at Penn College

International food, entertainment and displays highlight the International Folk Festival at the Pennsylvania College of Technology on Tuesday, Sept. 10. Activities will take place in and around the college's Alvin C. Bush Campus Center from noon to 10 p.m. The event is designed to celebrate cultural diversity. All entertainment, events, demonstrations and displays are free to the public.

Entertainment on tap includes a bagpipe and Irish step dance performance, an Indian dance and fashion parade, Guyanese afrodance movements and choral singing by the

Williamsport Civic Chorus and Gesang Verein Harmonia German Club Men's and Women's Chorus. Audience participation sessions will feature tai chi and shotokan karate demonstrations. International food and wares also will be on sale throughout the day.

For more on the International Folk Festival, contact the College Activities Office at Penn College, (717) 327-4763.

Bassoon ensemble to open Bach's Lunch series

The Penn State Bassoon Ensemble opens the 1996-97 Bach's Lunch concert series at 12:10 p.m. Thursday, Sept. 12, with a performance in the Helen Eskin Eisenhower Chapel at the University Park Campus.

The 20-minute concert is part of the Bach's Lunch series sponsored by the College of Arts and Architecture School of Music and the University Lutheran Parish.

For the performance, the Bassoon Ensemble will present works for four and eight bassoons.

The is free to the public. Audience members may bring a bag lunch to eat after the concert in the Roy and Agnes Wilkinson Lounge. Coffee and tea will be provided.

CELLO to perform Sept. 13 at Behrend

Music at Noon: The Logan Wintergarden Series debuts Friday, Sept. 13, at Penn State Erie, The Behrend College, with an appearance by CELLO, music's only full-time touring cello quartet.

The performance begins at noon in the Wintergarden of the Reed Union Building. It is free to the public; audience members are encouraged to bring a brown-bag lunch to enjoy.

CELLO leads a growing list of ensembles that are pioneering the next wave of classical music. By combining an eclectic mix of classical, jazz and pop works with performers who are sometimes quirky — and always unpredictable — CELLO makes chamber music that appeals to a broad spectrum of listeners.

CELLO's four women cellists compensate for a limited all-cello repertoire by creating and commissioning their own arrangements.

Tori Amos in Williamsport

Singer/songwriter Tori Amos will appear in concert at the Community Arts Center in Williamsport, part of the Pennsylvania College of Technology, on Saturday, Oct. 5. The show will begin at 7:30 p.m.

Amos, who began playing the piano at the age of 2, was composing musical scores at the age of 4. She emerged into the public glare in 1992 and since that time, has created emotionally challenging music. Her album "Under the Pink" debuted at No. 1 on the UK charts, selling more than 2 million copies. Her latest album "Boys for Pele," contains 18 self-penned songs.

Tickets for the concert are \$30. To order tickets or for more information, call the center at (717) 326-2424.

BYRCE JORDAN CENTER

NBA coming

The Atlanta Hawks are taking on the Los Angeles Clippers in a pre-season NBA game at the Bryce Jordan Center on Sunday, Oct. 13, at 7 p.m.

Tickets are \$19.50, \$15.50 and \$9.50 for reserved seating. For tickets, contact the Bryce Jordan Ticket Center at (814) 865-5555 or 800-863-3336; or selected Uni-Mart's and Penn State campus outlets in Erie, Altoona, Hazleton and Reading.

Upcoming events

Other upcoming events include:

Sept. 6:

George Strail, with Steve Wariner, 8 p.m.; tickets \$23.50 (all seats reserved).

Sept. 7:

Penn State Tailgreet Party, 11:30 a.m.; tickets \$15 for adults; \$10 for children 12 and under.

Sept. 14:

Penn State Tailgreet Party, 8:30 a.m.; tickets \$15 for adults; \$10 for children 12 and under.

Sept. 21:

Ozzy Osbourne, with guests DANZIG, Sepultura and Prong, 7 p.m.; tickets \$23 in advance, \$25 day of show (all seats reserved).

Sept. 24:

WWF (TV shoot), 7 p.m.; Tickets \$18/\$14/\$10.

Oct. 1:

David Copperfield, 5:30 and 8:30 p.m.; tickets \$39.50/\$29.50/\$23.50 (all seats reserved).

Oct. 12:

Penn State Tailgreet Party, four hours before kickoff; tickets \$15 for adults; \$10 for children 12 and under.

Oct. 19:

Penn State Tailgreet Party, four hours before kickoff; tickets \$15 for adults; \$10 for children 12 and under.

Nov. 2:

Penn State Tailgreet Party, four hours before kickoff; \$10 for children 12 and under.

Nov. 23:

Penn State Tailgreet Party, four hours before kickoff; tickets \$15 for adults; \$10 for children 12 and under.

For a listing of sporting events to be held at the Bryce Jordan Center, or for more information on any event listed here, call the center at (814) 865-5555 or visit the Web site at <http://www.bjc.psu.edu/>.

UNIVERSITY PARK CALENDAR

SPECIAL EVENTS

Friday, September 6

Department of Geography, 3:30 p.m., 206 Walker Building.
William Weich on "State College at 100 Years and One Week."

Friday, September 6

School of Music, 8 p.m., Recital Hall. Jury Recognition Recital.

Commission on Lesbian, Gay and Bisexual Equity, 6 to 7:30 p.m., 110 North Henderson Building. Annual Reception.

Saturday, September 7

■ Gallery Talk, 11:30 a.m., Christoffers Lobby. Catherine Ciferri on "Ancient to Renaissance Art at the Palmer Museum."

Sunday, September 8

School of Music, 3 p.m., Recital Hall. Evelyn Ellis, clarinet

Monday, September 9

School of Music, 8 p.m., Recital Hall. June Miller, organ.

Thursday, September 12

The Penn State Christian Faculty/Staff Fellowship, noon-1 p.m., lunch Fellowship Meeting

School of Music, 12:10-12:30 p.m., Eisenhower Chapel. Bach's Lunch concert

Gallery Talk, 2 p.m., Christoffers Lobby. Glenn Willmson on "Contemporary Art From the Pincus Collection."

Friday, September 13

■ Department of Geography, 3:30 p.m., 206 Walker Building. Peter Gould on "The Great Lisbon Earthquake."

Gallery Talk, 2 p.m., Christoffers Lobby. Jennifer Streib on "Highlights of the Palmer Museum."

Saturday, September 14

Gallery Talk, 11 a.m., Christoffers Lobby. Sarah Andrews on "Portraiture in American Art."

SEMINARS

Thursday, September 5

Gravity Center, 11:30 a.m., 339 Davey Laboratory. Lee Smolin on "Emergence of a 3D String Theory from 4D Quantum General Relativity."

Monday, September 9

The Center for Ethics and Religious Affairs and Penn State Hillel, 7:30 p.m., Assembly Room, Hertzell Union Building. Richard M. Joel on "New Occasions Teach New Duties: The Role of Religion On Campus Now (and Then)."

Coming in October

Roy Hargrove and his quintet will appear Saturday, Oct. 5, in Eisenhower Auditorium on the University Park Campus. For tickets or information, call (814) 863-0255.

Department of Chemistry, 3:30 p.m., 339 Davey Laboratory. Thomas Malouk on "Bricks and Mortar Approach to New Solid and Thin Films."

Gravity Center, 2 p.m., 339 Davey Laboratory. Eanna Flanagan on "Backreaction in 4D Semiclassical Gravity and the Averaged Null Energy Condition."

Tuesday, September 10

Graduate Program in Nutrition, 4 p.m., 110 Wartick Laboratory. Sean Kelley on "Effect of the Diet on Vitamin A Metabolism in the Rat: A Compartmental Analysis."

Wednesday, September 11

■ Australia-New Zealand Studies Center/Department of

Labor Studies & Industrial Relations, 4 p.m., 124 Sparks Building. Anthony Cooke on "Strike or Settlement? Trends in Australian Industrial Relations."

Wednesday, September 11

College of Arts and Architecture, Department of Landscape Architecture, 8 p.m., Scanlon Conference Hotel. George Wickstead on "The Blue Ridge Parkway That You'll Never See."

Thursday, September 12

Department of Physics, 3:30 p.m., Osmond Laboratory. Richard Hughes on "Quantum Cryptography."
Gravity Center, 11:30 a.m., 339 Davey Laboratory. Eli Hawkins on "Hamiltonian Gravity and Noncommutative Geometry."

Ceramics Seminar Series, 11 a.m., 301 Steidle. Xiaoxing Xi on "Processing and applications of oxide superconductors/ferroelectric heterostructures."

Friday, September 13

Department of Physics, 2 p.m., 339 Davey Laboratory. Richard Hughes on "Antihydrogen Physics."
Palmer Museum of Art, 3 p.m., Lipson Auditorium. Eric Schreier on "Coal, Oil and Steel: Edward Steidle and the Art of Industry."

CONFERENCES

Sunday, September 15

■ Palmer Museum of Art, 3 p.m., Lipson Auditorium. Mary F. Linda on "From the Himalayas to Home: Hindu Temples in America."

EXHIBITS

Palmer Museum

"Selections of Contemporary Art from the Pincus Collection," through Dec. 15.

"The Wood Engravings of Warren Mack," through Jan. 5, 1997.

"Cooking for the Gods: The Art of Home Ritual in Bengal," Sept. 10 through Dec. 8.

"When Coal Was King: Paintings from the Steidle Collection, College of Earth and Mineral Sciences," Sept. 10 through Dec. 8.

Zeller Gallery

"More is More," Visual Arts faculty collections. Through Sept. 17.

■ Reflects an international perspective

SEPTEMBER 5 - SEPTEMBER 15

News in Brief

Health Promotion programs

The division of Faculty/Staff Health Promotion kicks off its fall lineup of programs with several offerings. To register for any of these courses, call Jan Hawbaker at (814) 865-3085 or e-mail jgh3@oas.psu.edu.

Health Matters Series—The Signature Program of F/H Health Promotion

A health educator assists participants in exploring and examining various components of wellness, setting goals and determining pathways of success. Meets Tuesdays, Sept. 10-Oct. 15, from noon-1 p.m. in 110 Henderson Building (The Living Center). Cost: \$30, reimbursable to HMO participants.

Weight Watchers AT WORK

Fall series meets Wednesdays, Sept. 11-Nov. 13, from noon-1 p.m. in the Paul Robeson Cultural Center auditorium. Cost: \$115 (lifetime members, \$105), reimbursable to HMO participants.

Enlightening Lunch Ergonomics for Everyday

Learn ways to avoid injury while performing home-related tasks such as gardening, child care and cooking. Meets Thursday, Sept. 12, from noon-1 p.m. in 110 Henderson Building (The Living Center). Cost: None.

Employee Assistance Program (EAP) Courses

Overview of Penn State's EAP services and a brief illustration of the counseling process. Meets Monday, Sept. 16, from 1:30-2:15 p.m. in 125 Reber Building. Cost: None.

EAP: The Supervisor's Role

Illustrates how a supervisor may interact with the employee relations division, human resources representatives and the EAP when an employee's personal problems affect his/her work. Meets Monday, Sept. 16, from 1:30-3:30 p.m. in 125 Reber Building. Cost: None.

Diabetes Association walk

An 8-mile fund-raising Walktoberfest to benefit the American Diabetes Association is set for Sunday, Oct. 6. Check-in time for the event is 9 a.m. at Beaver Stadium. The walk will begin at 10 a.m. at the stadium. Participants can stroll past the Trial Gardens, wander through the main campus—passing the Nittany Lion Shrine—to Old Main and celebrate with a tailgate party complete with food, fun and entertainment for all. Shorter routes also will be marked.

Proceeds raised from the walk will be used for educational programs, advocacy and research aimed at preventing and curing diabetes. For registration information, call (800) 254-WALK.

Faculty Senate lists meeting agenda

The University Faculty Senate will meet on Sept. 10 at 1:30 p.m. in Room 112 of the Kern Graduate Building on the University Park Campus. Items to be addressed include:

- Curriculum report of Aug. 23;
- Report on the status of faculty compensation at Penn State (advisory);
- Report on the status of faculty compensation at Penn State, future Senate work on salary issues (legislative);
- Awards and scholarships (informational);
- Summary of petitions for waiver of the 10-credit limit for non-degree conditional students (informational);
- The effect of excessive alcohol consumption (informational);
- Status of construction projects (informational);
- Budgets for 1996/97, process and outcome: budget planning for 1997-98.

Members of the University community may attend. Anyone who is not a member of the Senate may request to speak on any item of business already before the Senate. Such a request must be made to the chair, through the executive secretary of the Senate, at least four calendar days before the meeting.

Alumni Fellows

EMS to honor vice president of Pittsburgh firm

Gary W. Weber, vice president for science and technology for PPG Industries Inc., Pittsburgh, will visit University Park on Friday, Sept. 6, to be honored as an Alumni Fellow of the College of Earth and Mineral Sciences. He will meet with faculty and students of the Department of Materials Science and Engineering and be honored at the college's annual Obelisk Dinner at the Nittany Lion Inn.

Gary W. Weber

Weber is responsible for all science and technology for a \$7.7 billion worldwide business that includes five laboratories which serve automotive, chemical, fiber glass, coatings and architectural businesses. He has been with PPG since 1992. Earlier, he spent 10 years as a research scientist and executive with General Electric, where he served as vice president for GE-Ceramics and as manager of engineering for GE's high performance abrasives business in Worthington, Ohio.

He received his B.S. in ceramic science at Penn

The Alumni Fellow award, presented by the Penn State Alumni Association, is administered in cooperation with the academic units. The Board of Trustees has designated the title as permanent and lifelong. While visiting the campus, Alumni Fellows share their knowledge and expertise through classes, informal discussions and public lectures.

State in 1965, supported by a Naval ROTC scholarship. He subsequently spent five years in U.S. Naval nuclear submarine service as a line officer of Polaris and attack submarines in the North Atlantic. He returned to the University's Department of Materials Science and Engineering in 1970 and received a doctorate in ceramic science in 1974.

He began his research career at Oak Ridge National Laboratories working on the development of chemical flow lasers and carbon-carbon composite materials and numerous classified projects. From 1979 to 1982, he served as manager of technology for Carbocorundum in Niagara Falls, N.Y., working on structural materials for engines and turbine generators.

He is currently director of the Pittsburgh High Technology Council, a past member of the industrial advisory panel of the National Materials Advisory Board, a member of the Industrial Research Institute International Committee and industrial adviser to the American Ceramic Society.

Landscape architect will be feted Sept. 11-14

The 1996 Alumni Fellow for the College of Arts and Architecture, landscape architect George W. Wickstead, graduated from Penn State in 1933

with a bachelor's degree in landscape architecture and went directly into one of the most ambitious and historically significant projects in landscape architecture, the design and construction of the Blue Ridge Parkway. The parkway was the first national parkway connecting the Shenandoah National Park with the Great Smokies National Park.

George W. Wickstead

Wickstead will visit the University Park Campus Sept. 11 through 14 and will participate in several events. His visit will begin Sept. 11 at 8 p.m., when he will deliver a lecture at The Penn State Scanticon titled "The Blue Ridge Parkway That You'll Never See." The presentation is free to the public. Following that, Wickstead will spend the next two days meeting with both undergraduate and graduate students and participating in studio design classes.

Wickstead also has worked in Thomas Sears' private office in Philadelphia and has been involved in WPA projects near West Chester, Pa., country estates in Maryland and North Carolina and campus planning throughout the eastern United States. Wickstead then served in the military during World War II and the Korean War, designing and building Air Force installations in the South Pacific.

As a civilian again, his works included an industrial analysis and development study for the city of Tucson, Ariz., the master plan for Luther College, Iowa, and the 10,000-acre Dresden Industrial District near Chicago. As an associate landscape architect for the firm of Skidmore, Owings and Merrill, Wickstead was responsible for the Air Force Academy master plan report and coordinating the site development. Wickstead was made a Fellow of the American Society of Landscape Architects in 1967.

Wickstead technically retired in 1989, but is still professionally active as a consultant for The Sea Ranch, a planned 5,200-acre California community. Throughout his career, he also was an educator, twice on the faculty of the Penn State Department of Landscape Architecture. He was a visiting professor at the University of Illinois, University of Georgia, Kansas State University, California Polytechnic State University at San Luis Obispo, and on the education committee of the American Society of Landscape Architects. In 1986, Wickstead received the College of Arts and Architecture Alumni Achievement Award.

College of Engineering chooses two top-level executives for recognition

Arthur L. Glenn, president and CEO of Air and Water Technologies Corp., and Russel H. Herman, vice president and past owner of International Energy Consultants Ltd., have been named 1996 Alumni Fellows.

Both Glenn and Herman are sharing their expertise with students and faculty at University Park by participating in classes and informal discussions.

Glenn spent 35 years at GE, where he became a corporate officer and vice president, before assuming his present position at Air and Water Technologies Corp. — a \$600 million environmental services and products company with offices worldwide. Glenn received a bachelor's degree in mechanical engineering and a ROTC commission in the U.S. Army in 1956.

Glenn is an adviser to the National Science Foundation on engineering education reform. He is a member of the Leonhard Center Advisory Board, and was a member of the Industrial and Professional Advisory Committee for six years, serving as president in 1993. He is the founding and current chairman of the Penn

Arthur L. Glenn

Russel H. Herman

State Great Valley Advisory Board and was named an Outstanding Engineering Alumnus in 1990.

Herman retired in 1986 as a vice president of Exxon Corp. after a 34-year career. At that time, he founded International Energy Consultants Ltd. with two associates, and he remains a principal in the company which provides advice and counsel to senior management in the international energy industry. He also is an active member of the board of directors of Ultramar Corp., an independent petroleum refiner and marketer in eastern Canada, New England and California, with headquarters in Greenwich, Conn.

In 1951, Herman received a B.S. in chemical engineering from Penn State, and was an Evan Pugh scholar as an undergraduate. In 1982 he was honored as an Outstanding Engineering Alumnus by the College of Engineering. He serves the college as a member of the Industrial and Professional Advisory Council, and with his wife, Sandra, established an endowed scholarship in engineering.

Art instructor gives Hershey tall sculpture

A sculpture, "The Tool, The Toy, The Child, The Man" has been donated to The Hershey Medical Center by Peter Risser, art history and studio art instructor at Penn State Harrisburg. Standing alone, the sculpture is 18 feet tall, seven feet wide and weighs about seven tons.

In July, the sculpture became a permanent fixture on the lawn outside of the Biomedical Research Building.

For Risser, this sculpture is an eight-year-old idea finally realized. Risser describes the individual shapes within the sculpture as modular elements used as a metaphor for rational thought, in essence, the scientific method.

"It's about how we build concepts and exchange knowledge," he said. "I'm concerned with the aesthetics of geometry and the way things fit together in nature."

The sculpture title reflects how the toy of the child becomes the tool of the man. We toy with ideas; we move them around and try to piece them together in our minds. As ideas take form at different points in our lives and we become adults, our perceptions, those childhood ideas, grow and mature. The sculpture design portrays this principle; as one moves around the sculpture

Gift to Hershey

Peter Risser, above, arts history and studio art instructor at Penn State Harrisburg, donated the sculpture "The Tool, The Toy, The Child, The Man," right, to The Hershey Medical Center. Risser designed the sculpture, which stands 18 feet tall and seven feet wide.

every 45 degrees, the vision of the sculpture becomes strikingly different.

Risser hopes the sculpture will serve as an inspiration to all, especially students, faculty and researchers.

"I donated it to Hershey Medical Center because the medical center is an educational insti-

tution. Art is integrally attached to education," he said. "Connections between art and science have broken down, but I'm returning to it, building new parallels."

Risser designed the sculpture to withstand the ravages of time and nature, even winds up to 100 mph, requiring only minimal care.

It takes an army to prepare for a home football game

As the Nittany Lions and their fans gear up for the first home game on Saturday, plenty of teams are already in action.

Scores of University employees dedicated to pleasing the 95,000 people who fill Beaver Stadium each home game have been busy for months preparing the facility and grounds. In all, about 40 Office of Physical Plant workers from electricians to plumbers, from painters to landscapers, will all invest some sweat and blood in the success of each of the six games played at Beaver Stadium.

Before each game, tradesman from every area of OPP check the scoreboard to make sure it will keep fans on their feet with flashy banter and that elevators are in working order. The plumbing throughout the building needs to receive the go-ahead and the field areas used for parking (and tailgating) need to be cut; the stadium needs to be cleaned, roads need to be graded, litter needs to be removed and the public address system needs to be able to deliver the Nittany Lion's roar on cue.

Four OPP janitors — Jackie Pollock, Denise Sellers, Becky Ray and Buddy Daughenbaugh — are representative of the workers who pull off this colossal feat every year. Together, these four are responsible for preparing what Daughenbaugh calls "a small community spread over three acres and open six days a year." The team of four, all from Tyrone, must prepare and stock the 44 bathrooms, the team

"We have a grounds crew that is preparing the field, but the bulk of the work around the stadium is done, and done well, by OPP."

Robert Hudzik, supervisor, stadium and athletic fields

clubhouses, media room, first aid stations, officials' room, police services area, the press box and several other offices. They also place 36 recycling cans around the stadium.

"It's a big job and the OPP staff is the backbone of it," Robert Hudzik, stadium and athletic fields supervisor, said. "We have a grounds crew that is preparing the field, but the bulk of the work around the stadium is done, and done well, by OPP."

Pollock said working on the pre-game preparation has given her a unique view of the stadium. "I don't think people realize how big this place is," she said.

The area is so big that the four move around on golf carts, carrying supplies from one area to the next.

And there are a lot of supplies that need to be distributed, Daughenbaugh said. For each home game, 20 cases of toilet paper to accompany the 565 commodes and 20 cases of paper towels to fill the 120 paper towel dispensers are ordered. There also are

four to six boxes of hand soap that need to be distributed, as well as other first aid supplies. It is the janitors' job to make sure all the supplies are fully stocked in each bathroom, Daughenbaugh said, adding that supplies have to be ordered separately for each game.

Bathrooms are something this team takes pride in. Unlike last year when they were allotted two weeks to prepare for the first home game, this year the crew started Aug. 5. The extra time afforded them the opportunity to clean the bathrooms from the ceiling to the floor, as well as paint some of the floors. "Hopefully, everyone will notice how clean they are," Pollock said.

But the crew will never see the results of their hard work. For the most part, the four have decided not to attend any games — although Daughenbaugh said he may go to one. For the rest of his crew, it's too painful to watch as their hard work is undone by 95,000 fans.

Knowing they will be back at Beaver Stadium preparing for the next home game, the crew said they are content to watch the games on television. Although they appreciate the efforts of the employees who take care of the stadium game day, the crew said it knows the work that lies ahead. "It's a challenge for us to get all that work done, especially when there are back-to-back games," Ray said.

For the grounds crew, a team of workers from Intercollegiate Athletics

overseen by Hudzik, the work is year-round, but more intense near the start of the season.

The typical pre-game scenario involves mowing the field to just shy of an inch in length, an average of three times a week. The field is reined at least once before every game, sometimes twice, and the end zones are reseeded. "This undertaking uses about 60 gallons of paint and takes nearly 16 hours to accomplish.

"After the games, we sweep the field, fill in the holes and the process starts over again," Hudzik said.

But regardless of their numerous tasks and the repetition of work, the four on the janitorial staff would have it no other way.

"We're a team, we know what we have to do," Ray said. And this team is like no other. They begin at 5 a.m., taking a short mid-morning break, and end in the early afternoon. Time is not the same for them. Their world is dark, and often colder than the outside — about 10 degrees cooler underneath the stadium, making it much more difficult to clean deeper into the football season.

"We're in our own world up here," Sellers said. "Time goes by really fast. We don't even notice."

Kick-off time for the first game, against Louisville, is 3:30 p.m. The game will be broadcast regionally on ABC.

Intercom staff members Amy Oakes and Lisa M. Rosellini contributed to this story.

Appointments

Department of Medicine divisions merge, gain new chief

Witold B. Rybka has been named chief of the Department of Medicine's newly combined Division of Hematology and Oncology, as well as professor of medicine, at The Hershey Medical Center.

He also will serve as associate director for medical oncology services of the Penn State Cancer Center and will institute a peripheral stem cell/bone marrow transplantation program, expanding services for patients in central Pennsylvania.

Rybka comes to Hershey from the University of Pittsburgh Medical Center, where he was medical director of the Bone Marrow Processing Laboratory, clinical director of the Adult Marrow Transplantation Program at the Pittsburgh Cancer Institute and an associate professor of medicine in the Division of Hematology/Bone Marrow Transplant. He also served as an attending physician at the University of Pittsburgh Medical Center, including both Montefiore University Hospital and Presbyterian University Hospital.

During his previous 12 years at Montreal General Hospital, he was director of the Marrow Transplantation Program, an associate physician in both the Division of Medical Oncology and Division of Hematology and a research associate at the McGill University Medicine Clinic.

He received his M.D. from the University of Toronto. He is a member of the Eastern Cooperative Oncology Group, where he serves on the leukemia committee and the marrow transplantation core committee.

He is a Fellow of the Royal College of Physicians of Canada and member of several professional associations. He is dually certified in hematology and oncology by the American Board of Internal Medicine.

Hershey appoints two to chief posts

Bringing a wide variety of experience with them, Dr. John A. Ferriss and Dr. Ralph J. Damiano Jr., have been appointed to chief posts at The Hershey Medical Center.

Ferriss was named chief of the Division of Rheumatology and Damiano was named chief of the Division of Cardiothoracic Surgery.

Ferriss, who also is an associate professor of medicine, joined the Hershey faculty in 1988. Under his direction, clinical service in rheumatology has expanded significantly. He is a Fellow of the American College of Physicians and the American College of Rheumatology. In 1985, he received the American Rheumatism Association Fellows Research Award. He is the current vice chair of the Central Pennsylvania Chapter of the Arthritis Foundation, a member of the executive committee and a consulting rheumatologist at the Veteran's Administration Medical Center in Lebanon.

Along with his professional and fellowship

experience, Ferriss also has military experience, having served as battalion surgeon for the U.S. Marine 12th Regiment stationed at Okinawa, Japan, and as chief, primary care clinic and medical officer, Alcohol Rehabilitation Service, Naval Submarine Medical Center, Groton, Conn. During the Persian Gulf War, he was recalled to active duty and served in Saudi Arabia as chief of rheumatology for Fleet Hospital 15.

Ferriss received his B.S. from Nason College, Springvale, Maine, and M.D. from Jefferson Medical College, Philadelphia. He completed his residency in internal medicine at the Medical Center Hospital of Vermont and completed a fellowship in rheumatology and clinical immunology at the University of Vermont College of Medicine.

In addition to his new appointment, Damiano was named professor of surgery and associate director of the Penn State Cardiovascular Center.

Damiano was previously associate professor of surgery at both the Medical College of Virginia and McGuire Veterans Administration Hospital in Richmond. He also was medical director of the Richmond Memorial Hospital/Medical College of

Virginia Heart Program and director of both the surgical electrophysiology and cardiothoracic surgical research laboratories.

He has been a member of the peer review committee of the American Heart Association and the national American Heart Association Surgery Study Section. He also has been an associate Fellow and Fellow of the American College of Surgeons.

He belongs to numerous professional organizations and was the recipient of the American College of Surgeons Faculty Fellowship Award from 1991 to 1993.

Damiano received his B.S. from Dartmouth College and M.D. from Duke University School of Medicine. He completed his residency in surgery at Duke University Medical Center, where he was a chief resident. Also at Duke, Damiano was a research fellow and the recipient of a National Institutes of Health National Research Service Award, as well as a teaching scholar in cardiac surgery.

Mont Alto assistant director of Student Affairs earns upgrade

Rodd Welker, Penn State Mont Alto Campus assistant director of Student Affairs, was named associate director of Student Affairs. Welker's duties include overseeing campus life, residence life and judicial affairs.

Welker joined the Mont Alto staff in 1990 as the coordinator of student activities and became the assistant director

of Student Affairs in 1992. He also currently serves as the campus men's varsity basketball head coach and has previously served as the assistant coach of the women's varsity basketball team. In 1994, Welker received the Outstanding Services to Students Program Award.

With a B.S. in business administration from West Liberty State College, West Liberty, W.V., and a master's degree in student affairs in higher education from Indiana University of Pennsylvania, Welker also serves as a member of the Council for the Prevention of Alcohol, Tobacco and Other Drug Abuse and the Eastern Christian College Board of trustees.

Director of Women's Studies Program comes from California

Stephanie A. Shields, professor at the University of California, Davis, has been appointed professor and director of the Women's Studies Program. Shields, who received her doctorate from Penn State in psychology in 1976 and taught at the Penn State Altoona Campus for two years before moving to UC Davis in 1977, specializes in the psychology of women and the relationship of gender and emotion.

At UC Davis she was the founding director of the Pro Femina Research Consortium, a management Fellow in the College of Letters and Science, and, from 1983 to 1985, director of the Women's Studies Program.

Author or co-author of more than 45 journal articles, book chapters and reviews, Shields has focused her research and teaching on human emotion, the physiological correlates of emotion, emotion in gender development and the social context of psychological research from the 19th century to the present.

Shields has received grants from the Rockefeller Foundation and the 4H Center for Youth Development Collaborative Research Project. In 1986, she held a visiting professorship for Women in Science and Engineering of the National Science Foundation (NSF) and was a Fellow of the NSF Program for Advanced Study and Research in Social Psychophysiology at The Ohio State University in 1989.

Shields received her B.S. degree in psychology from Santa Clara University in 1971 and M.S. in psychology from Penn State in 1973.

New observations challenge standard model of galaxy formation

By BARBARA K. KENNEDY
Eberly College of Science

Many of the galaxies in the universe could have formed very differently from the process now widely accepted by astronomers, according to a paper published in *The Astrophysical Journal*.

The study concludes that a large fraction of dwarf galaxies — the most plentiful galaxies in the universe — could form not by the stately gravitational accumulation of matter but by the raucous rearrangement of tidal debris from clashes between giant galaxies.

The research is one of the most systematic studies ever done of dwarf galaxies in compact groups, according to **Jane C. Charlton**, assistant professor of astronomy and astrophysics, who authored the paper along with **Sally D. Hunsberger**, a graduate student in astronomy and astrophysics, and **Dennis Zaritsky**, assistant professor of astronomy and astrophysics at the University of California at Santa Cruz.

The researchers used the 60-inch telescope at the Mount Palomar Observatory to study 42 groups of galaxies known as Hickson compact groups, one of the rarest and densest environments in the universe and one in which galaxy collisions occur frequently. In these groups, a few galaxies are packed together as tightly as in the high-velocity centers of giant galaxy clusters, but they move slowly enough to interact as they brush past each other.

"This combination is conducive to the formation of tidal tails," the researchers said, referring to the filmy wisps that the passing galaxies draw away from one another.

"Initially, we just wanted to see how many dwarf galaxies we could find in compact groups, but then we noticed a lot of interesting tidal debris in seven of them," Charlton said. "We took a closer look at the

Jane C. Charlton, assistant professor of astronomy and astrophysics, believes many dwarf galaxies may have formed in tidal debris from other galaxy collisions.

Photo: Greg Grieco

tidal features and detected 47 areas that appear to be dwarf galaxies."

They speculate that some of the dwarfs found elsewhere throughout the compact groups originally formed in the tidal debris, while others formed by normal gravitational accretion.

Dwarf galaxies, roughly 100 million times the mass of our sun, are tiny compared to giant galaxies such as the Milky Way, which is about 100 billion solar masses. Astronomers had found many dwarf galaxies in all environments, including dense galaxy clusters and looser groups of "field" galaxies.

"Dwarfs usually are spread out in field clusters, not located near the galaxies," Charlton said.

Astronomers had assumed that the dwarfs in clusters formed by gravitational accretion, but the new discovery makes Charlton suspect that a large fraction of all the dwarfs in the universe initially formed in tidal debris from galaxy collisions, later to be flung away from the site of their birth.

"Because tidal tails are observed in all environments, this formation

mechanism could have more general implications," the researchers say. "If up to 50 percent of them form in tidal debris in compact groups, then maybe up to 50 percent of them form in tidal debris everywhere," Charlton said.

In order to estimate how many dwarfs form in tidal debris, the researchers first considered how many dwarfs are spread throughout their set of 42 compact groups, then compared that number with how many dwarfs they found in the tidal tails. They then estimated how many dwarfs would be made in tidal debris throughout the full lifetime of each group.

"It is a little tricky," Charlton said. "There are many factors that go into the estimate, but we always tried to err on the conservative side. Our most conservative estimate is that at least one-third and perhaps more than one-half of dwarf galaxies in the compact groups are formed in tidal debris."

Astronomers also see mergers going on today in field environments such as the Local Group, in which the Milky Way resides, as well as in compact groups. So, Charlton said, "a large

fraction of dwarf galaxies are likely to form in tidal debris all over the universe."

Another clue, Hunsberger said, is that the relationship between the surface brightness and the radius of the core region takes different forms for giant galaxies and dwarf galaxies.

"It is hard to imagine that galaxies with these very different properties arise from the same formation mechanism," she said.

In order to test their theories, the astronomers have been granted time on the Hubble Space Telescope within the next year to get a clearer look at the objects they suspect are dwarf galaxies in the compact groups.

"It will be interesting to compare the different properties of the dwarfs inside and outside the tidal tails," Charlton said. The research could help to improve the models astronomers use to understand how structures form in the universe.

"Maybe we will find two populations of dwarf galaxies with different properties from each other, perhaps because they formed in two very different ways," she said.

Research

Roundup

Too much time, not enough to do

Some chronically bored and disruptive adolescents need help learning to do more enjoyable and positive things with their free time, suggest findings from a survey of 2,756 high school students.

The survey found that approximately 8 percent to 9 percent of the students expressed boredom with their leisure time. About twice as many said they used leisure time to actively reject adult authority.

The important crossover we found was that about 41 percent of the females and 59 percent of the males in the "bored" group also said they spent their free time on anti-social pursuits," **Linda L. Caldwell**, an associate professor in the School of Hotel, Restaurant and Recreation Management, said. "These two factors in tandem were also associated with higher rates of a variety of undesirable health behaviors."

But the majority of adolescents find leisure time a positive experience, and among those who do get bored, there remain many who do not become anti-social.

Caldwell studied the matter with **Edward A. Smith**, associate professor of biobehavioral health.

Hangers don't hinder performance

It's not a license to drink, but managers who show up with hangers perform better than they think they do at work. They just feel lousy.

The news is from a medical study which concludes that hangers do not affect the performance of managers.

The equivalent of four to six alcoholic beverages the night before a "strategic management simulation" did not affect participants' ability to manage complex tasks, as long as they were well-practiced, according to the study.

The double-blind, placebo-controlled study at The Hershey Medical Center was organized by **Siegfried Streufert**.

"While alcohol can be extremely damaging to complex decision making when people are intoxicated, one can, in effect, have a couple of drinks and still function well the next day," Streufert said.

"However, if one feels miserable afterward, one should think about whether or not one wants to feel like this."

New center

Effective Sept. 1, the CQI Center and the Office of Planning and Analysis merged to become the Center for Quality and Planning. Louise Sandmeyer has been named executive director of the new center.

New members

The University Council on CQI thanks Nancy Cline, Barton Browning and Greg Lozier for their valuable contributions to the council and welcomes new members William Anderson, assistant vice president for Physical Plant, Rodney Erickson, dean of the Graduate School, and Scott Kretschmar, professor of exercise and sport science and chair of the Faculty Senate. 1996-97 administrative fellows Cheryl Achterberg, Gail Hurley and Sophia Wisniewska also will join the council for the academic year.

The role of quality

A panel discussion will draw on the experiences of three Penn State administrators to examine how CQI can be used as a tool in the strategic planning process. Ron Filippelli, associate dean in the College of the Liberal Arts; Clare Kristofco, assistant to the dean in the College of Engineering; and Bob Surridge, assistant provost, Penn State Harrisburg, will address quality and strategic planning issues in the Fireside Lounge of the Nittany Lion Inn from 8:30-10 a.m. on Thursday, Sept. 12.

Survey follow-up

Another panel will examine how information gleaned from the 1996 Faculty/Staff Survey can be translated into improvement strategies for the University and for individual work units. Panelists include Fred Loomis, director of organizational development in Continuing and Distance Education; Dan Sieminski, director for Finance and Business; and Billie Willits, assistant vice president for Human Resources. The panel will be held on Thursday, Sept. 26, in the Fireside Lounge of the Nittany Lion Inn from 8:30-10 a.m.

For more information about CQI, please contact Louise Sandmeyer, executive director of the Center for Quality and Planning, (814)863-8721, les10@psu.edu.

Making hay

An Office of Physical Plant employee mows a field on the University Park Campus. If this year is anything like last year, there won't be many more opportunities to mow before workers trade in their mowers and clippers for shovels and snow plows.

Six to serve on Professional Women council

Six University women were chosen to serve on the Coordinating Council of Professional Women at Penn State.

The council is a grass-roots group that develops and maintains a communications network and serves as a resource for other Penn State women. The group is composed of 12 volunteers who serve three-year terms, three of which will expire in June 1997.

Joining the council are: June Barczak, staff assistant for the Women's Studies Program; Sandra Grecni, senior promotion associate for Penn

State Public Broadcasting; Rosemarie Hibbler, staff assistant for the Office of Alumni Relations in the liberal arts; Elisha Nixon, program coordinator for the Multicultural Resource Center; Linda Spangler, administrative assistant for the Department of Economics; and Kimberly Townsend, human resource development specialist for the Human Resource Development Center.

They join: Jean Brooks, chair-elect and staff assistant for the Advising Center in the College of Health and

Human Development; Rhonda Decker, treasurer and staff assistant for the Jewish Studies Program; Pat Ellenberger, administrative specialist for labor studies and industrial relations; Ann Harpster, Copy Center service specialist; and Jo Anne Mengle, staff assistant for the Department of Geography.

For more information about Professional Women at Penn State, see the organization's Web site at: <http://rudolph.la.psu.edu/~pellenb/pwps/welcome>.

■ State of the University Address

The answer man

President Graham B. Spanier answers questions from local and state media after delivering the State of the University address at Eisenhower Auditorium on the University Park Campus. The address was also broadcast live via satellite to all Penn State locations.

Photo: Greg Grieco

Spanier outlines ambitious goals, new initiatives for the coming year

By LISA M. ROSELLINI
Public Information

Urging the University community to remain optimistic about the future of higher education, President Graham B. Spanier also spelled out plans during his annual State of the University Address to hire more faculty, adopt tighter admissions standards, launch another statewide tour and seek more state funding.

In his second such address since

being named president, Spanier not only discussed the academic and fiscal concerns of the University, but also addressed the "human side" of the University. He touched on issues of citizenship, tolerance, excessive alcohol consumption, child care and employee morale.

"Humanizing the University continues to be among my top priorities," he said. "I want to re-emphasize that everyone at Penn State has a role to play in creating an open, sensitive, understanding and responsive

campus environment. To me, people come first."

During his talk, Spanier acknowledged that although change in universities is often slow, the past year has been a time of "crucial action" for Penn State. Spanier's address was peppered with new initiatives intended to strengthen academic offerings and keep the University moving forward. One such initiative is his plan to seek ongoing funding from the state for 50 new faculty posi-

State releases funding for Pattee Library addition

The bidding process for the new Paterno wing of Pattee Library on the University Park Campus can begin. On Sept. 5, Gov. Tom Ridge announced the release of \$11.5 million for the project.

The \$26.5 million project includes \$11.7 million in private gifts. A portion of the private funding, \$250,000, was donated by head football Coach Joe Paterno and Sue Paterno. The remainder of the funding comes from the state. The Paternos led the campaign that raised the funds for the expansion.

"Improving educational opportunities in Pennsylvania has been a goal of my administration," Gov. Ridge said. "And one of the ways in which we have looked to do this is by under-

Trustees approve request for state appropriation

A request for the 1997-98 state appropriation of \$305,209,000, an increase of \$24,230,000 over last year's total of \$280,979,000, has been approved by the Board of Trustees.

"For 1997-98, the University is requesting additional state appropriation funds to assist in covering only its most critical operating needs. This includes support for the University's basic operating

cost increases and for high-priority program needs," President Graham B. Spanier said in his presentation Sept. 6 to the board. "Penn State's highest priority is for additional faculty positions to

■ State of the University Address Address

continued from page 1

tions. He also said he was initiating a program of internal reallocation that will earmark funds to bring even more new faculty on board.

Spanier said he also plans to review Penn State's commitment to intercollegiate research programs and invest more heavily in programs that hold the most promise. He believes new intercollegiate relationships that will keep the University on the cutting edge in the 21st century should also be forged.

"We have not stood still, but have tackled the most pressing of problems and pursued our most promising opportunities, moving quickly, collaboratively and with strong commitment to the best interests of higher education in Pennsylvania," he said.

One move announced earlier this year is the plan to reorganize Penn State's 23-campus system to allow various locations to offer four-year degrees. Spanier also recently revealed his vision to retol Penn State Cooperative Extension. These two initiatives are the most profound changes either of these areas has seen in their decades of long existence. The restructuring of these areas is being done to better meet the changing educational needs of Pennsylvania residents.

"Penn State is a large and complex institution whose organizational structure needs to evolve with growth, opportunity and the times," he said. Spanier emphasized that the changes he has proposed will strengthen the University and help fulfill its commitment to the residents of the Commonwealth.

"Without minimizing any of our challenges and problems, I can say I am genuinely enthusiastic about what is possible here," he said. "For the record, I do not buy the concept that because our challenges are unprecedented we must scale back our ambitions. The opposite is true."

One of the challenges Spanier alluded to involves the continual decline in state funding. In 1976, the state contributed 54 percent to the University's general funds budget. Just two decades later, that amount has shrunk to less than 37 percent. During the same time period, the percentage supported by tuition and fees has grown from 37 percent in 1976 to 55 percent in 1996. The lack of state support is affecting all aspects of the University, Spanier said.

"Let me give you a statistic that may shock you. Among 75 public colleges of medicine in the United States, Penn State ranks dead last in terms of how much support we receive from the state—dead last."

Spanier pledged to make a special appeal to the Commonwealth this year for support of programs at The Hershey Medical Center, which in 1995 served nearly 20,000 in-

BUDGET PRIORITIES

- Will continue to make the strongest case possible for increased state support and will ask the state for additional ongoing funding for 50 new faculty positions; launched a multi-year program of internal reallocation of institutional funds to support new faculty positions.

- Will ask for a special allocation for the Libraries and for information technology initiatives.

- Will seek a special allocation to cover deferred maintenance at all campuses.

- Will request an increase in agricultural research and Cooperative Extension budget.

- Will make a special appeal for support for programs at The Hershey Medical Center.

patients and more than 356,000 outpatients at the University Hospitals. He also promised to make the "strongest case possible" to legislators that Penn State deserves increased funding from the state.

But in addition to seeking more public funds, Spanier said the University will also rely more heavily on fund-raising as a source of dollars. In fact, Penn State this fall enters the first phase of a new comprehensive University-wide campaign that will emphasize increasing its endowment support.

Throughout his talk, Spanier touched on the themes that have become hallmarks of his presidency: his goal of becoming the top institution in the integration of research, teaching and service; his pride in the developments that are taking place at Penn State; his desire to make the University a "world campus" through the use of global technologies; and his wish to humanize the university by eliminating intolerance.

The president asked those listening to remain patient about their commitment to higher education and to the University.

"We need to anticipate and take on the challenges of Pennsylvania and beyond at every turn," he said. "This means an institution-wide commitment to our mission ... it means that we here must believe in Penn State."

HIGHLIGHTS OF THE PAST YEAR

- Research expenditures totaled a record \$344 million, up from \$317 million in 1994.
- University Scholars Program: Incoming class is the strongest ever, with average SAT scores of 1430.
- Increased state funding for agricultural research and cooperative extension.
- Dedicated Penn State's Philadelphia Center.
- More high school students, 53,238, sent their SAT scores to Penn State than any other university.
- Minority baccalaureate applications for summer/fall 1996 were up 10.3 percent.
- Received an all-time record \$83.2 million from 158,000 gifts involving 107,000 donors.
- Endowment, a key indicator of the University's economic health, has increased three-fold this past decade.

The full text of President Spanier's address is available at the University Relations Web site at: <http://www.ur.psu.edu>

Audience enthused, encouraged by talk

After President Spanier's State of the University address, Intercom gathered reactions from trustees, administrators, faculty, students and others in the University community. Their reactions centered on the optimism and enthusiasm of the address, and touched on some of the president's specific proposals, such as the ones to increase the number of faculty and to do more to internationalize the curriculum. Here are some of their comments:

■ "What I love about Graham is his tremendous optimism and enthusiasm, which is grounded in a solid plan, a vision and an understanding of how the University operates and what its potential is."

—H. Jesse Arnette, chairman, Board of Trustees

■ "I was particularly enthused by his comments about cynicism and pessimism, and the lack of passion, in higher education. That resonated with me, because of the particular business I'm in, which is communications. To see a national leader like Graham Spanier stand up and speak to this issue, and not in a Pollyannaish sort of way, is a welcome thing."

—Jack Laueter, assistant professor of journalism

■ "I was delighted with his emphasis on improving the faculty-staff ratio ... (it) sends an important message about our values as we attempt to strike a good balance between our teaching and research responsibilities."

—R. Scott Kreichmar, chair of the University Faculty Senate

■ "His speech was courageous and visionary in several ways. The three points that resonated most clearly with me were his calls for optimism and passion, for international perspectives based on pragmatic needs, and for active promotion of the values of good citizenship, particularly civility."

—John Lilley, provost and dean, Penn State Erie, The Behrend College

■ "I was pleased at his continued enthusiasm and optimism for the future of Penn State and higher education ... particularly his commitment to the tripart mission, because it addresses the interests graduate students have in their own education and their contributions to undergraduate education."

—Julie Ann Bubolz, president of the graduate student association

■ "I found his optimism refreshing."

—Dan Stearns, associate professor of landscape contracting

■ "I'm excited about the importance he places on information technology, partly because it's part of my work but also because I think it's what the University should do to be established in the 21st century."

—Mike Halm, senior research programmer, Center for Academic Computing.

A word of encouragement

Eva O'Leary-Chidester of Julian is coaxed from a slight case of stage-fright by Peter Ray, assistant director of the play "A Christmas Carol." Eva was one of nearly 100 children auditioning for a role in the play, which will be staged Dec. 6-7 by the Center for the Performing Arts and the University Repertory Theatre Co.

Pattee

continued from page 1

scoring the tremendous contributions our libraries make to the fabric of Pennsylvania's educational system.

"There is no question that these state monies, in partnership with private donations, will be put to good use as Penn State moves to upgrade their already impressive library system."

The 122,000-square-foot expansion, to be called the Paterno Library, will house the Special Collections Library, including Rare Books Room, University Archives/Penn State Room, Historical Collections and Labor Archives, as well as reading rooms, exhibit areas, offices and workrooms.

The second floor will house the Social Sciences Library and the third and fourth floors, which will be expanded, will house the Business Library, part of the Social Sciences Library and the Life Sciences Library. The fifth floor will house the Education Library and administrative offices.

The addition is designed to create an integrated look to the library, bringing together the original 1939 Central Pattee, 1965 West Pattee, the 1949 Stack Building and the 1972 former East Pattee, now part of the

Paterno Library. The glass facade of East Pattee (facing Curtin Road) will be removed and stone and brick finishes with cornices and columnar windows will complement older parts of the building.

In addition, the project will improve the central facility which also serves Commonwealth Educational Campus libraries and other branch libraries on the University Park Campus, and which serves public and academic libraries throughout the Commonwealth.

President Graham B. Spanier said the library construction project, now slated to begin in early 1997, was a top priority for the University.

"We are grateful for the governor's support of the Paterno Library," Spanier said. "In a time of limited state resources, this project is a great example of how private fund-raising can be conjoined with state support to serve the best interests of the Commonwealth."

"The Commonwealth's financial commitment to the library, when added to the impressive support of thousands of donors, will allow Penn State to expand its already excellent library services," he said.

BOOK SHELF

Jean-Marc Bollag, professor of soil biochemistry and director of the Center for Bioremediation and Detoxification, and Gunther Stotzky, New York University, are co-editors of *Soil Biochemistry*, Volume 9.

The horizons of soil biochemistry have been vastly broadened in the past few years. Soil microorganisms and their enzymes are becoming a more accepted means of pollution control, as recent studies indicate their usefulness in the detoxification of pesticides, heavy metals and other pollutants.

This volume provides up-to-date reviews on the conditions that affect the quality of soil and on the methods of measuring the effects of soil management and bioremediation. Discussion focuses on indigenous or introduced microorganisms with the capacity to remediate pollutants.

Twenty-five internationally acclaimed scientists contributed to the volume which is published by Marcel Dekker.

Far more than repackaging liberalism, diversity is a business initiative that

ultimately heightens productivity and profits according to a new book written by Janice L. Dreachlins, associate professor of health policy and administration at Penn State Great Valley.

Diversity Leadership, published by the American College of Healthcare Executives, says businesses must move beyond image-driven "window dressing" and begin to demonstrate an understanding of the demographic and social changes that have forever altered the face of America's labor pool.

Consider the following:

In 1990, nearly one in every four Americans was Asian, black or Hispanic, as compared to about one in 10 in 1970.

Analysts for the Urban Institute project that, soon after the turn of the century, one in three Americans will be Asian, black or Hispanic.

Diversity Leadership is a primer that guides business leaders through the diversity process. In a five-part framework — discovery, assessment, exploration, transformation and revitalization — the book's 12 chapters

offer a comprehensive foundation for action interspersed with case studies. Though the book focuses primarily on health-care related organizations, its strategies and insights are applicable to all businesses.

Of particular interest to managers are sections on choosing a diversity consultant and dealing with employee backlash to diversity programs.

Akhlesh Lakhtakia, associate professor of engineering science and mechanics, is editor of the latest volume in the SPIE (The International Society for Optical Engineering) Milestone Series, titled *Selected Papers on Linear Optical Composite Materials*. Sixty articles comprise the 720-page volume.

The SPIE Milestone Series was introduced in 1985 to present a limited number of papers written on an important topic warranting a great deal of research and attention. Papers selected for inclusion are those deemed significant to the field and able to withstand the test of time.

The new volume takes readers through three sections: a general introduction to particulate composite materials and the theories that surround them (dating back as far as 1806); a section on laminated composites; and a final section on current cutting-edge research on thin films.

Lakhtakia, who is also editor of Volume 15 in the series, *Selected Papers on Natural Optical Activity*, has

authored or co-authored more than 150 journal publications and two books on linear chiral media, and has recently begun working on research into nonlinear chiral media.

Francis T. S. Yu, Evan Pugh professor of electrical engineering, is the co-editor of *Optical Storage and Retrieval: Memory, Neural Networks and Fractals*, Volume 54 in the Optical Engineering Series published by Marcel Dekker Inc. The 344-page book was released in June and was co-edited by Suganda Jutamulia, general manager of research and development at Kowa Company, Ltd., in San Jose, Calif., and associate professor of biomedical engineering at the University of North Carolina, Petaluma.

In order to improve technology in the information age, scientists and engineers like Yu and Jutamulia are attempting to replicate, as closely as possible, human memory. *Optical Storage and Retrieval* provides an overview of the developments made in recent years in optical memory, neural networks and fractals based on the perspectives of engineers and technicians in the field of optical information processing.

The book was written by international experts representing the United States, Japan and Russia, and is geared toward optical, electronic and computer engineers; physicists; chemists; materials scientists; and graduate students in any of the above areas.

From the Trustees Docket

It's official

The former Classroom Building at the corner of Pollock and Shortliffe roads on the University Park Campus was dedicated on Sept. 5 and renamed the Joab L. Thomas Building in honor of Penn State's 16th president. Thomas, who retired last year, was on hand for the ceremonies. Thomas said the renaming of the \$10.9 million structure to bear his name "exceeds my fondest dreams." Here, Lynn Bigelow, a mason from the Office of Physical Plant, polishes the new nameplate.

Access to Penn State increases

The convergence of digital technologies—interactive video conferencing, computer and audiographic teleconferencing, the World Wide Web, e-mail and telephone voice response systems—is transforming distance education at Penn State.

In a presentation to the Board of Trustees Sept. 6, James H. Ryan, vice president and dean for Continuing and Distance Education, and Gary Miller, assistant vice president for distance education, outlined ways distance education as a University-wide function enhances Penn State's ability to serve students in all parts of the world.

Penn State has been involved in distance education since 1892, when it first offered correspondence courses to relieve the isolation of rural communities. From the outset, its programs spanned geographic boundaries. In fact, the first four graduates of the certificate in agriculture program were from Pennsylvania, the Oklahoma Territories and Canada.

Today, distance education creates a highly interactive, learner-centered environment that is marked by increased access to faculty expertise and increased access to information resources. Priorities at Penn State for developing such programs are:

- Workforce education at a distance to meet the needs of the workforce nationally and internationally;
- Institutional and international partnerships that extend Penn State to a national and international

population of nontraditional students;

- Outreach for economic and community development through Cooperative Extension and other units to reach underserved areas with information and training for success in today's information society;

- Youth and school partnerships, such as Pennsylvania's new Link to Learn project, 4-H programs and individual schools; and

- Pedagogy and leadership by working with other centers to develop instructional theory and principles of good practices in distance education.

Miller reviewed a number of new distance education programs that fit these priorities, such as a new graduate program in elementary education that involves the College of Education and the DuBois Campus; an International Business Logistics Certificate Program with The Smell College of Business Administration; and a program in education that works with community colleges in other states to offer graduate courses in adult basic education.

"In the last two years, we have attracted more than \$1 million in foundation support to allow faculty to create new approaches to distance education," Miller said. "Teleconferencing has extended Penn State faculty expertise to audiences around the nation, especially in the area of workforce education and continuing education for professionals.

Programs tailored to specific clients such as Bethlehem Steel, the United Brotherhood of Carpenters and Wawa convenience stores are examples of partnerships among Penn State colleges and campuses, employers and unions.

Other partnerships for distance education include other universities such as:

- LionHawk, a partnership between Penn State and the University of Iowa to offer a bachelor's degree at a distance for adult learners nationally.

- The Russian Distance Learning Project, a partnership of Penn State, the University of Minnesota and the U.S. Peace Corps to provide American business management techniques to Russian managers using print, video and e-mail to link learners and teachers.

To carry out these initiatives more effectively, the University has made a number of administrative changes to move distance education into the mainstream of University academic life. These included creating Miller's position as assistant vice president for distance education, which occurred in 1994, and creating a University-wide Distance Education Advisory Committee.

Now in the works is a small working group appointed by President Graham B. Spanier to test the possibility of creating a virtual campus at Penn State in recognition that the University is serving a global student population.

Annual report from Commission for Women notes improvements

The Penn State Commission for Women, an advisory group for the president, noted improvement in child care and the number of women on the faculty in a presentation to the Board of Trustees Sept. 6, but expressed some concern for retention of women in leadership roles.

"Obviously we focus on issues concerning women, but whenever we do anything, it benefits everyone at the University," said Ellen Walker, past chair of the Commission for Women. "If we work on child care, everyone benefits. If we look for a voice for the staff, the whole staff benefits."

Child care is one of the areas where Penn State is moving forward, according to the Commission for Women's 1995-96 annual report.

"Between 1985 and 1995, there was an 88 percent increase of women faculty at University Park and a 33 percent increase in the Commonwealth Educational System."

Ellen Walker
past chair
Commission for Women

The Commission strives to work cooperatively and collaboratively and the first "Take Our Daughters to Work Day" was no exception. The program was co-sponsored by the commission, the Office of the President, Document Services, Office of Business Services, Housing and Food Services and the

Office of Human Resources. The program provided the opportunity for girls and young women to learn about career options and to see woman at work, particularly in nontraditional fields.

The student concerns subcommittee identified mentoring as a crucial factor in women's success at the University. They published the *Directory of Mentoring Programs for Undergraduates at University Park* and will establish a mentoring program for undergraduate women.

"Between 1985 and 1995, there was an 88 percent increase of women faculty at University Park and a 33 percent increase in the Commonwealth Educational System," Walker said. "While only 25.6 percent of University Park faculty and 29.6 percent of CES faculty are women, we believe the growth in numbers signals the commitment of the University to increase equity for women."

However, the lack of sustained and substantial growth in the numbers of women in leadership continues as an area of concern. Only 10.5 percent of full professors are women and the numbers of women in academic administration positions has dropped from a high in 1992, but still shows a modest gain over six years ago. While women have made great strides in non-academic administrative positions, the number of women in executive positions has remained constant.

Also of concern to the commission is the development of a mechanism allowing systematic input from University staff members on decisions that directly affect them. Two notable attempts in this direction are the development of the Staff Advisory Group in the Office of Human Resources and the invitation to provide input to the University Planning Process.

From the Trustees Docket

University moves ahead with plans for retirement community

A Penn State review team working on a University-related retirement community project got the go-ahead from the Board of Trustees to enter into an agreement with a project team, consisting of Cooperative Retirement Services of America Inc. (CRSA), of Memphis, Tenn., and Pinnacle Development Inc., of Boalsburg, to conduct a market and feasibility study for the project.

As of May 1996, the Penn State review team had received responses to a request for information from 18 firms interested in developing and operating a retirement community — which has the working title of “The Village at Penn State.” The committee narrowed the list down to six firms. Among those six were CRSA and the Pinnacle group, which decided to submit a joint proposal, and four other companies that decided not to respond to the request for a proposal.

In general, retirement communities of the kind envisioned by Penn State provide several levels of services for retirees: independent living, for those who can care for themselves; assisted care, for retirees who need some help with personal needs, but are largely self-sufficient; and skilled care, which provides high-level care in a nursing-home environment.

The CRSA/Pinnacle team has extensive experience in developing and operating retirement communities and planned unit communities, the board was told. The Penn State team will need to work out agreements with CRSA/Pinnacle that will:

- specify a site for the Village;
- outline University participation on the boards that would run it;
- provide for joint review of project development plans and approvals at key points in the development process;
- allow the use of the University name; and
- define how the Penn State Alumni Association will provide marketing assistance for the project.

CRSA is currently operating retirement communities with 39 organizations — mostly non-profit institutions and groups — in 22 states. Earle Wade is the CEO, and Martin Salava is the executive vice president for development.

The Pinnacle group has put together a strong local team that consists of Robert Poole of S&A Custom Built Homes, of Bellefonte and State College; Philip Sieg, chair of the Sieg Financial Group, State College; Clifford R. Coldren from Brookline Village in State College; William Schreyer, former chair of the State of Trustees and retired CEO of the chair of Merrill Lynch and Co. Inc.; and Joe Paterno, Penn State's head football coach.

William H. McKinnon, Penn State's senior associate vice president for finance and business, told the board that the Pinnacle group “brings extensive experience to the project in the area of planned unit development projects and financial support. They also have a thorough knowledge of the local market.”

Over the last several months, a University

review team has been seeking an outside operator to market, design, finance, build and operate a retirement community, possibly on University-owned land. McKinnon is the chair of the team, which also includes Peter B. Weiler, assistant vice president and executive director of the Alumni Association and interim associate vice president for development and alumni relations; Dr. James E. Meade, a physician at the Hershey Medical Center; Barton W. Browning, associate professor of German and past chair of the University Faculty Senate; James A. Rhodes, director of trusts, estates and endowments; and Barbara Shannon, dean of the College of Health and Human Development.

Trustees Edward P. Junker III, vice chairman of PNC Bank, and L.J. Rowell Jr., retired chairman and chief executive officer of the Provident Mutual Life Insurance Co., participated in the final phase of evaluating and choosing a project team.

As it is currently envisioned, the University-allied community would consist of two distinct kinds of facilities: a planned unit development (PUD) for retirees generally in the 55-75 age group and a continuing care retirement community (CCRC) generally for those over 75.

Penn State would not use any University funds to develop the project, and would not own or operate the facility. But both parts of the retirement village would have access to University programs, services and facilities that would benefit the Village and its residents as well as the University and its students. As a whole, the Village would probably involve:

- the Hershey Medical Center, in providing medical care;
- the College of Health and Human Development, in doing research and providing services; and
- the Alumni Association, in promoting and marketing the Village, especially to Penn State alumni, faculty and staff.

In addition, a retirement community associated with Penn State would be able to provide internships and work opportunities to Penn State students in health planning and administration, recreation and leisure activities, hotel and restaurant management, human development and family studies, nursing, nutrition and other related disciplines. It could also be tied into Penn State classes, athletics and cultural events.

Penn State is exploring the development of a retirement community because it believes that the State College area is highly attractive to retirees with Penn State ties and that the University's involvement will help ensure the success of such a community. Currently, there are about 1,000 such facilities across the country, with about 45 of them located near Philadelphia.

Groundbreaking for the facility is several years away.

HUB/Robeson plans get nod

An architect's preliminary sketch of the new HUB/Robeson center

The sketch/preliminary plans for a joint project involving the expansion of the Hetzel Union Building and the construction of a new Paul Robeson Cultural Center at the University Park Campus have been approved by the Board of Trustees.

Designed by Williams Trebilcock Whitehead Architects of Pittsburgh, the HUB/Robeson project will add 90,000 gross square feet to the HUB's existing 154,000 gross square feet and the Robeson Center's 9,000 gross square feet.

The design incorporates four key concepts: 1) to minimize the impact on the HUB lawn; 2) to create a new major entrance with a better identity on Pollock Road; 3) to consolidate foot traffic along an indoor concourse with a four-story atrium; and 4) to create a distinct, yet connected identity for the new Robeson Center.

OPEN FORUM

Faculty, staff, students and members of the community are invited to attend an open forum on the HUB expansion/Robeson Center project on Thursday, Sept. 12, from 7 to 9 p.m. in the HUB Ballroom on the University Park Campus. A second forum will be held from 11:30 a.m. to 1:30 p.m. Friday, Sept. 13, in the HUB Fishbowl. Members of the Building Design Committee and representatives from the architectural firm Williams Trebilcock Whitehead will be available to discuss the project. Architect renderings and schematic designs will be on view.

Built in 1955, the HUB is the main student union on the University Park Campus, serving more than 50,000 students, faculty, staff and visitors. The HUB was expanded in 1974 and remodeled in 1981. However, over the last 15 years, there has been significant growth in the number of students, faculty and staff at the University Park Campus. It is estimated that approximately 25,000 people use the building daily and nearly 7,000 events are scheduled annually in the building.

The Robeson Cultural Center is housed in a World War II structure that was moved to the campus in the early 1950s and designated as a temporary student union building. In 1995, 561 events were held in the center, attracting 24,000 participants.

The design calls for a linear addition, running from the west end of the HUB and ending in the middle of the south wall of the Penn State Bookstore.

The new Robeson Center, using an oval-shaped element, will be located at the east end of the addition, rising three stories with each story connected to common hallways. The Pollock Road entrance will be modified into a more pedestrian-friendly space in front of the building. A new four-story atrium space with skylights will connect the addition to the existing building. The exterior of the entire project will be constructed of brick veneer, glass and precast stone, matching the existing HUB's brick veneer, stone-like trim and window curtain walls.

There are more than 425 registered student organizations at University Park, with at least 100 of them expected to have or seek office space in the new HUB or Robeson Center. In addition, the project calls for dedicated quiet study lounges, additional meeting rooms, redesigned food services operations, information and computer services, improved access for users with disabilities, recreation and art gallery space, an expanded ballroom and a new auditorium.

This expansion has a total project budget of \$23 million. The student activity fee, which was implemented this fall, along with private support and University funds, will finance \$21 million of this total, while the remaining \$2 million will be funded by Housing and Food Services.

From the Trustees Docket

Final plans for construction get OK from Board

Several projects to increase laboratory and storage space for the University have been given the nod.

The trustees approved final plans and authorized the University to obtain bids and award contracts for an addition to the Noll Laboratory on the University Park Campus. The three-story addition will house a clinical research facility, a joint operation between The Milton S. Hershey Medical Center and the College of Health and Human Development.

The clinic will have a separate ground floor level main entrance facing North Atherton Street. The total project budget is \$2.3 million and the plans were designed by Burt Hill Kosar Rittelmann Associates of Butler.

Also for the University Park Campus, the trustees authorized the University to obtain bids and award contracts for construction of a \$600,000 addition to the University Support Building 1. The addition will provide much-needed storage space for publications of the Penn State Press as they await shipping.

Eventually, the press hopes to consolidate all of its storage at the new site and discontinue its use of the Dry Storage Building for this purpose. As designed by the Office of Physical Plant, the new prefabricated metal building will match the existing University Support Building 1, where the press is located.

Expanding

University Support Building 1 on the University Park Campus will receive a much-needed addition to help with storage space for the Penn State Press operations.

Appropriation

continued from page 1

reduce class size and improve the overall quality of its educational programs. Additional program support is requested for libraries and information technology and for deferred maintenance requirements.

Additional funding is also requested for agricultural research and cooperative extension, the College of Medicine at The Hershey Medical Center and for the Pennsylvania College of Technology.

The Commonwealth's budget instructions require the University to submit its annual budget plan and request for state appropriations to the Department of Education in late September. Although not required, it has been the University's practice to bring the request to the Board of Trustees for review and approval before its submission to the state.

"The University has felt the effects of limited state resources for several years," Spanier said. "Our appropriation from the Commonwealth has increased by a total of only 8.6 percent over the last six years, from \$258.7 million in 1991-92 to \$281 million in 1996-97. When adjusted for inflation, however, the purchasing power of the University's appropriation is actually 6.6 percent less than it was in 1991-92. Underfunding continues to be one of the University's most serious problems."

The lack of state support is also reflected in the fact that Penn State has the lowest total expenditures per student of all its Big 10 counterparts.

The 1997-98 appropriation request of more than \$305 million is for expenses in four major — the educational and general budget; agricultural research and Cooperative Extension; The Milton S. Hershey Medical Center; and the Pennsylvania College of Technology.

The educational and general budget supports most of the University's basic teaching, research and public service programs. On the expense side, it includes basic operating cost increases of more than \$23.2 million and \$5.7 million for additional program support.

It also includes planned budget reductions for academic and support units and selective reinvestment to areas of critical need as identified by a new five-year strategic planning process under the guidance of the University Planning Council.

This is the sixth consecutive year that an internal reallocation process has been in effect. During this

period more than 10 percent of the departmental budgets have been reallocated to areas of critical need. In 1997-98, support units will reduce their budgets by 1.5 percent, while the colleges will reduce theirs by 1.2 percent. These reductions will generate nearly \$3.77 million for reallocation to areas in need.

The requested \$5.7 million for program support will provide support for 30 additional faculty positions to help reduce large class sizes; critically needed support for libraries and information technology; and necessary funds for deferred maintenance.

According to the Joint State Government Com-

"The University has felt the effects of limited state resources for several years ... When adjusted for inflation, the purchasing power of the University's appropriation is actually 6.6 percent less than it was in 1991-92. Underfunding continues to be one of the University's most serious problems."

University President Graham B. Spanier

mission Report, Penn State's current student/faculty ratio is 18 to 1, compared to 15.2 to 1 for the University of Pittsburgh and 16.3 to 1 for Temple University. The University would need an additional 500 faculty positions to bring its faculty ratio up to the average of Pittsburgh and Temple. The shortfall in faculty has resulted in an average undergraduate class size that is the largest of all state-related and state-owned universities in Pennsylvania.

The University has developed a three-year plan to add approximately 75 faculty positions per year, for a total of 225. Funding of \$2.96 million is being requested to help reduce large class sizes and to improve the overall quality of the educational experience for Penn State students. This support would provide 50 new faculty positions each year and the equivalent of 25 new positions per year would be identified through the University's internal reallocation process. At the end of this three-year period, Penn State would still need an additional 275 positions to reach the average student/faculty ratio for Pitt and Temple.

Basic operating cost requests also include salary

adjustments of 3.75 percent; health care cost increases of 6 percent; and inflationary cost increases of 2.9 percent for departmental operations.

On the income side of the educational and general portion of the University's budget, the University anticipates \$9.9 million from a projected tuition rate increase; \$1 million from investment income and 1996-97 Summer Session tuition rate changes; and a little over \$18 million in additional appropriation support from the Commonwealth.

"Because Penn State received no increase in the educational and general appropriation in 1996-97, the tuition rate increase had to be slightly higher than originally anticipated," Spanier explained. "For 1997-98, the University hopes to hold its overall tuition increase to the projected rate of inflation — 2.9 percent — although the actual tuition of each student might vary from this percentage should differential tuition be implemented."

A 2.9 percent increase would result in an average increase of \$78 per semester for state-resident undergraduate students at University Park.

The University's state appropriation request also includes the following:

- Expenses for agricultural research and Cooperative Extension include \$1.45 million for salary adjustments and benefits cost increases; \$84,000 for inflationary cost increases in departmental operations, and more than \$2.1 million for program support. An appropriation increase of about \$3.65 million is requested.

- Expense and income changes for The Milton S. Hershey Medical Center are based on the same planning factors as the Educational and General budget. A total of \$908,000 is requested for salary adjustments, employee benefit cost increases and inflationary cost increases for departmental operations. Also included is \$1 million as the first year of a five-year program to provide additional support for the College of Medicine.

- Expense and income changes for the Pennsylvania College of Technology are based on the same planning factors as the educational and general budget. A total of nearly \$1.25 million is requested for salary adjustments, employee benefit cost increases, inflationary cost increases for departmental operations, and a modest reduction in the scheduled debt service payment. Also included is \$300,000 for additional program funds to support the delivery of distance learning programming at Penn College.

From the Trustees Docket

University's budget request reflects need for more facilities

Penn State has assigned highest priorities to the construction of modern classroom instructional facilities and the renovation of existing facilities in its 1997-98 Capital Budget Request, which the Board of Trustees approved Sept. 6.

The University's request of \$102.4 million will be submitted to the Department of Education in Harrisburg for consideration by the state Legislature.

Of this amount, \$46.75 million is for new construction projects, \$31.5 million is for renovation

projects and \$4.15 million is for original equipment for projects that have been previously authorized by the Legislature.

"This request should not be confused with requests from prior years, which have been authorized but not yet funded by the Commonwealth such as the chemistry building, the new research center and the Leonhard Building," President Graham B. Spanier said.

"Should the items on the capital budget request be authorized by the Legislature, they will join the long

list of projects awaiting capital funding. Last year's capital budget request of \$104.55 million, which was approved by the Trustees in September 1995, was not authorized by the Legislature. For this reason, our request for fiscal year 1997-98 is a slightly revised version of last year's request."

The 1997-98 Capital Budget Request reflects changing priorities of the various academic and administrative units through updates of their strategic plans. Modern classroom instructional facilities have been assigned the highest priority and the capital request emphasizes the renovation of existing facilities.

Criteria for selecting capital projects to be funded were developed by the Capital Project Review Committee and give high priority to:

- Instructional facilities that support teaching and research;
- Specialized technology classrooms and labs;
- Biological and life sciences, because of anticipated growth;
- Modernization of existing science facilities; and
- College of Engineering consolidation.

The following new construction projects proposed for 1997-98 total \$46.75 million and are listed in order of priority:

— Phase II of the Classroom Building at University Park (\$12.1 million). This building, which is the University's top priority, is the second phase of a state-funded project. Both phases will be additions to the University-funded Thomas Building, which opened in 1992. Completion of this project will help

meet an ongoing shortage of general-purpose classrooms suitable for modern instruction and will allow renovations of the Willard classroom building to begin.

Library addition and an auditorium/classroom building at Penn State York Campus (\$11.9 million). The library addition will accommodate the growth of library materials and provide stack, study and user spaces for instruction, while the classroom building will include an area for theater productions and convocation events.

— Academic activities building at Penn State Harrisburg (\$3.75 million). This will address existing space deficits and provide modern instructional classrooms, laboratories, offices and support spaces for graduate instructional and research activities that now occur in a 1950s building constructed for the U.S. Air Force.

— Library depository facility at University Park (\$11 million). The growth of library materials and historical collections at University Park has completely surpassed available space, and the University currently leases more than 30,000 square feet for donated archival and special collections such as the United Mine Workers archives and seismic tape records. The library will be able to consolidate off-campus leased storage areas and return these materials to campus, as well as provide space for new donated collections.

— Addition to a building at Penn State Great Valley (\$8 million). This project will provide classrooms, lecture rooms and instructional support areas to accommodate current and future enrollments.

The \$51.5 million for seven renovation projects addresses obsolete mechanical systems; interior surfaces; building systems; windows, roofing and pedestrian circulation areas; and physical features relating to the Americans with Disabilities Act. All lighting, heating and cooling renovations will incorporate energy-efficient technologies designed to reduce long-term operating costs.

The six renovation projects slated for University Park are:

— Willard Building (\$10.3 million). Originally constructed in 1949 with an addition in 1964, it is the most heavily used classroom building on campus.

— Five Engineering Units, built in 1912-1919, and Sackett Building, built in 1928, (\$8.6 million). These will be renovated after construction of the new West Campus engineering buildings.

— Chandler Laboratory (\$10.2 million). Built in 1964, the lab will be renovated after construction of

the new chemistry building, which was authorized in 1993.

— Portions of Whitmore Laboratory, built in 1951, and Davey Lab, built in 1969, (\$10.2 million). These will also be renovated after completion of the chemistry building.

— Sparks Building (\$9 million). Built in 1915, Sparks will be renovated for academic programs in the College of the Liberal Arts. Existing programs and occupants will be relocated to Chandler Lab during construction.

The seventh renovation project is the General Studies Building at the Mont Alto Campus, which will be renovated for an estimated \$3.2 million.

Priorities for the \$41.5 million original equipment request are for projects that were authorized in previous capital bills signed by the governor. They are equipment for the Biomedical Technology Center at the Fayette Campus (\$660,000); renovation of the Animal Diagnostics Laboratory and Incinerator at University Park (\$240,000); acquisition of land and development of an Ag Instruction Center at the Berks Campus (\$850,000); addition to the Academic Building at the New Kensington Campus (\$260,000); an Electrical Distribution System at University Park (\$390,000); Technology Center at the Wilkes-Barre Campus (\$200,000); and the Multi-Purpose Facility for Student Activities at Penn State Erie, The

PROJECTS STILL ON HOLD

Listed here are a few of the nearly 70 Pennsylvania Department of General Services (DGS) construction projects that have been approved by the Board of Trustees and authorized by the Legislature since 1988, but have not yet been funded by the Commonwealth. They include new buildings, building renovations, upgrades to electrical, water and heating systems, and alterations to facilities to meet Americans with Disabilities Act requirements. Some are approved to be funded jointly by the University and DGS, others are to be funded wholly by DGS. Unless otherwise noted, projects are at University Park:

■ Leonhard Research Building, College of Engineering (DGS \$10 million; Penn State, \$5 million);

■ New Research Center (DGS \$12.7 million; Penn State \$5 million);

■ General Purpose Classroom Building (DGS \$3 million; Penn State \$2 million);

■ Chemistry Building (DGS \$52.5 million);

■ Renovations of Weaver and Patterson buildings (DGS \$3.3 million; Penn State \$2.2 million);

■ Renovations of Burrows Building (DGS \$5.25 million);

■ Land acquisition and construction of Agricultural Instruction Center, Berks Campus (DGS \$5.5 million);

■ Multipurpose Student Activities Building, Penn State Erie, The Behrend College (DGS \$10 million);

■ Classroom Building, Delaware County Campus (DGS \$2.4 million; Penn State \$600,000);

■ Biomedical Technology Center, Fayette Campus (DGS \$4.4 million);

■ Addition to Science and Technology Center, New Kensington Campus (DGS \$1 million; Penn State \$550,000);

■ Technology Center, Wilkes-Barre Campus (DGS \$1.2 million).

Behrend College, (\$1.55 million).

The ARTS

AT PENN STATE

On the menu

"Cooking for the Gods: The Art of Home Ritual in Bengal" is on display through Dec. 8 at the Palmer Museum of Art on the University Park Campus. The exhibit showcases the art of the home rituals, including Krishna, an 11-inch brass statue, left, and Shalagrama stand, a 23-1/4 inch piece. The items, from the collection of the Newark Museum, are gifts of Dr. and Mrs. Richard J. Nalin.

Bassoonist recital

Daryl Duran will present a free recital of music for bassoon at 8 p.m. Monday, Sept. 16, in the College of Arts and Architecture School of Music Recital Hall on the University Park Campus.

Performing with Duran will be faculty members Marylene Dosse, piano; Timothy Hertz, oboe; June Miller, harpsichord; and students David Moore, oboe; and bassoonists Katherine Jones, Matthew Schell and Melissa Etling.

Duran is a member of the Pennsylvania Quintet, principal bassoonist of the Pennsylvania Centre Chamber Orchestra and has served as principal bassoonist of the Music at Penn's Woods Festival. This summer he performed with the Festival of Two Worlds Orchestra in Spoleto, Italy. In addition to teaching at Penn State, Duran has taught at the National Music Camp, Interlochen, Mich., and the American Band College, Ashland, Ore.

Recital of Winterreise

Norman Spivey, baritone, and Robert Hatten, piano, will present *Winterreise* by Franz Schubert at 8 p.m. Thursday, Sept. 19, in the College of Arts and Architecture School of Music Recital Hall on the University Park Campus. The concert is free to the public.

Spivey is assistant professor of voice and voice pedagogy. Before his appointment at Penn State, he was a Fulbright scholar in Paris.

Hatten is associate professor of music theory. His book, *Musical Meaning in Beethoven: Markedness, Correlation and Interpretation* was published in 1994.

Richard Page, assistant professor of German, will give introductory remarks.

Nittany Valley Symphony opens 30th season

The Nittany Valley Symphony opens its 30th anniversary season at 8 p.m. Tuesday, Sept. 24, in the Eisenhower Auditorium on the University Park Campus with music from American and French composers.

Keeping with this year's theme of "Musical Voyages," Maestro Jinbo will take the audience "From New York to Paris" on opening night. Cecilia Dunoyer, a member of the piano faculty at Penn State, will be the soloist for the Ravel Piano Concerto in G.

Major, Timothy Shafer, associate professor of music, will play Gershwin's *Rhapsody in Blue*.

Dunoyer is the recipient of numerous awards and prizes for her solo and chamber music performances and has held concerts throughout the United States and Mexico and in her native Europe. Shafer, who has performed at Carnegie Hall, is well known for his frequent performances as part of Duo Concertant with violinist James Lyon.

Tickets are available at the Eisenhower Ticket Center for \$14, regular admission; \$12 for seniors; and \$6 for student/child. Call the ticket center at (814) 863-0255. For season subscription information, contact the Nittany Valley Symphony at (814) 231-8224.

The Dave Matthews Band at Jordan Center Oct. 7

The Dave Matthews Band, with special guest Boxing Gandhis, will appear at The Bryce Jordan Center at 7:30 p.m. Monday, Oct. 7. Tickets are available at the Bryce Jordan Ticket Center, selected Uni-Marts, Penn State campus outlets in Altoona, Erie, Hazleton and Reading or by calling (814) 865-5555, or toll-free at (800) 863-3336. Tickets are \$22.50 for reserved seating.

One of pop's most striking success stories has been the rise of the Dave Matthews Band, whose 1994 RCA debut "Under The Table And Dreaming" went triple platinum and earned two Grammy nominations for the first single, "What Would You Say."

The Dave Matthews Band plays a complex blend of folk, jazz, rock, world beat and reggae. This year the Dave Matthews Band has broadened its style with the release of *Crash*, the band's third album.

Comedian at Penn College

Comedian Bobby Collins will make his Williamsport debut at the Community Arts Center, part of Penn College, on Sunday, Nov. 17, at 7:30 p.m.

A 10-year veteran of the comedy clubs in New York and Los Angeles, Collins' physical, sometimes outrageous, humor gained him instant notoriety and notice. Comedienne Rosie O'Donnell selected Collins to replace her as the host for VH1's series "Stand-up Spotlight," and Collins garnered a CableAce Award.

Tickets are \$16.50 and \$14.50, and go on sale Monday, Sept. 23. For more information, please call (717) 326-2424 or (800) 432-9382.

Special exhibits at Kern

Kern Exhibition Area on the University Park Campus will display the photographic work of Robert Vander Voort through Oct. 15, and the pottery of Ian Stainson from Sept. 17 through Oct. 13.

The photo exhibit, "Lewis, Untangling Strings," is a dramatic and sensitive series of black and white photographs of Lewis, a man with Parkinson's disease.

Stainson studies at Cumbria College of Art and Design. He has worked in Scotland, England and West Wales; and gained 11 years of experience at Llarnarth Pottery, one of the finest potteries in Wales. He is a working potter in Pennsylvania.

The Kern Exhibition Area is on the first floor in Kern Graduate Building. Hours are 8 a.m. to 11 p.m., Monday through Friday; 10 a.m. to 11 p.m., Saturday; and noon to 11 p.m., Sunday. The exhibits are open to the public.

Ritenour exhibit

"Art on the Move," exhibited in the Ritenour Health Center on the University Park Campus, will display the painting of Marjut Kauphanen-Katz from Sept. 13 through Oct. 16.

Kauphanen-Katz won the 1996 Penn State Creative Achievement Award from the School of Arts and Architecture. As a Penn State BFA student, she exhibited paintings in four shows and has studied in Finland and the United Kingdom.

Watercolors and boxes

The HUB's Art Alley on the University Park Campus features watercolors by Dorothy Grebos through Oct. 13, and an exhibit of Shaker-style boxes by Steve Strouse from Sept. 17 through Oct. 13.

Grebos' exhibit is marked by a multi-layered complexity and expresses certain themes: sea life and the landscape of New Mexico.

In his Shaker-style box exhibit, Strouse combines his strong interest in the elegance of the Shaker style with the beauty of Pennsylvania hardwoods. The exhibit also includes original designs by Strouse.

The HUB's Art Alley is on the first floor of the Hetzel Union Building and is open during all HUB operating hours.

HUB's Formal Gallery

The HUB's Formal Gallery on the University Park Campus features the watercolor exhibit "Geography of the Unconscious" by Nancy Moore, through Oct. 19.

Moore is a professional artist and teacher for 30 years. After she completed her applied and fine arts degree at Penn State, she studied with Ray Loos, Frank Webb, Ed Whitney, Skip Lawrence and Miles Batt. Moore exhibits extensively and among her awards is the Pittsburgh Waterworks, 1994. "Geography of the Unconscious" is her most recent collection.

The HUB's Formal Gallery is on the first floor of the Hetzel Union Building. Gallery hours are noon to 8 p.m., Tuesday through Thursday; noon to 4 p.m. Friday and Saturday; closed Sunday and Monday.

See "Arts" on page 9

Timothy Shafer

Cecilia Dunoyer

On display

This is one of the 57 paintings from the College of Earth and Mineral Science's Steidle Collection on display at the Palmer Museum of Art on the University Park Campus through Dec. 8. The exhibit celebrates Pennsylvania's mineral industries.

Arts

continued from page 8

International artist at HUB Browning Gallery

The HUB's Browning Gallery on the University Park Campus features internationally exhibited artist Shalom Noiman through Oct. 20.

Noiman fuses painting and sculpture to communicate stimulating, thought-provoking subject matter. Born in Prague, Czechoslovakia, in the aftermath of World War II, he says his art is a monument to the graves of his family. Educated at Carnegie Mellon University and Fontainebleau School of Fine Art in France, Shalom completed his master's of fine arts in painting and sculpture.

His art is in numerous collections throughout the world including the Museum of Art in Nice, France; Art Institute of Pittsburgh; Museum of Art, New York City; Paco Das Artes, San Paulo, Brazil; and The Guggenheim Museum.

The HUB's Browning Gallery is on the first floor of the Hetzel Union Building.

Cooking for the Gods

"Cooking for the Gods: The Art of Home Ritual in Bengal" focuses on Hindu ritual activity that expresses the private relationship between the worshiper and the gods in the eastern Indian region known as Bengal. This special exhibition continues at the Palmer Museum of Art on the University Park Campus through Dec. 8.

"Cooking for the Gods" showcases the art used in these home rituals. A home shrine is recreated incorporating

the shiny brass vessels and painted pottery used to present food for the gods' delight.

When Coal was King

Fifty-seven paintings selected from the College of Earth and Mineral Science's Steidle Collection will be on view at the Palmer Museum of Art on the University Park Campus, through Dec. 8.

The paintings are part of an art collection devoted to Pennsylvania's mineral industries that was established by Edward Steidle during his tenure as dean of the College of Earth and Mineral Sciences, from 1928 to 1953.

A majority of the paintings focus either on the mining and preparation of coal, or depict those industries — particularly the production of iron and steel — whose economic success was directly linked to the vast bituminous fields in western Pennsylvania. Other industries represented in the exhibition include oil and natural gas production, stone quarrying, glass manufacturing and railroads.

A free public lecture about the collection, "Coal, Oil and Steel: Edward Steidle and the Art of Industry," will be offered by Eric Schruers, Ph.D. candidate in the Department of Art History, at 3 p.m. Friday, Sept. 13, in the Palmer Lipton Auditorium. Gallery talks: "Some Thoughts on the Steidle Collection," by Patrick McGrady, curator of education, will also be given at 2 p.m. Sept. 20, Oct. 17 and Nov. 1.

Gallery talks begin in the Christoffers Lobby of the museum.

UNIVERSITY PARK CALENDAR

SPECIAL EVENTS

Thursday, September 12

School of Music, 12:10-12:30 p.m., Eisenhower Chapel. Bach's Lunch concert.

Gallery Talk, 2 p.m., Christoffers Lobby. Glenn Williamson on "Contemporary Art From the Pincus Collection."

Friday, September 13

Department of Geography, 3:30 p.m., 206 Walker. Peter Gould on "The Great Lisbon Earthquake."

Gallery Talk, 2 p.m., Christoffers Lobby. Jennifer Streb on "Highlights of the Palmer Museum."

Saturday, September 14

Gallery Talk, 11 a.m., Christoffers Lobby. Sarah Andrews on "Portraiture in American Art."

Monday, September 16

School of Music, 8 p.m., Recital Hall. Daryl Durran, bassoon.

Tuesday, September 17

Biology, 4 p.m., 8 Mueller Lab. Allen Orr on "The Genetics of Speciation in *Drosophila*."

Wednesday, September 18

Gerontology, noon-1 p.m., 101 HHD East. Cleveland Shiets on "Til Death Do Us Part: Later Life Marriages as Attachment-Caring Systems."

Thursday, September 19

School of Music, 12:10-12:30 p.m., Eisenhower Chapel. Bach's Lunch Concert. School of Music, 8 p.m., Recital Hall. Norman Spivey/Robert Hatten.

Hillel, 6:30 p.m., Lipton Auditorium. Film: The Last Seven Months of Anne Frank.

Friday, September 20

Gallery Talk, 2 p.m., Christoffers Lobby. Patrick McGrady on "Some Thoughts on the Steidle Collection."

Geography, 3:30 p.m., 206 Walker. Robert O'Connor on "So What If We Are All Environmentalists? The Political and Behavioral Fallout."

Saturday, September 21

Zoller Gallery, Playhouse Theatre. Palmer Museum of Art, Penn State Scenic Institute for the Arts and Humanistic Studies 30th Anniversary Celebration. Center for the Performing Arts, 8 p.m., Eisenhower Auditorium. Romeo and Juliet.

SEMINARS

Thursday, September 12

Department of Physics, 3:30 p.m., Osmond Laboratory. Richard Hughes on "Quantum Cryptography."

Ceramics Seminar Series, 11 a.m., 301 Steidle. Xiaoxing Xu on "Processing and applications of oxide superconductor/ferroelectric heterostructures."

Gravity Center, 11:30 a.m., 339 Davey Lab. Eanna Flanagan on "Backreaction in 4D Semiclassical Gravity & the Averaged Null Energy Condition."

Friday, September 13

Department of Physics, 2 p.m., 339 Davey Lab. Richard Hughes on "Antihydrogen Physics."

Palmer Museum of Art, 3 p.m., Lipton Auditorium. Eric Schruers on "Coal, Oil, and Steel: Edward Steidle and the Art of Industry."

Sunday, September 15

Palmer Museum of Art, 3 p.m., Lipton Auditorium. Mary F. Linda on "From the Himalayas to Home: Hindu Temples in America."

Monday, September 16

Gravity Center, 2 p.m., 339 Davey Lab. Erik Martinez on "The Postulates of Gravitational Thermodynamics."

Tuesday, September 17

Architecture, 7:30 p.m., 101 Classroom. Kossman Lecturer: Antoine Predock.

Wednesday, September 18

Professional Women at Penn State, 12:05 p.m., 110 Henderson. Jackie Krasas Rogers on "The Growth of Temporary Employment: What's in Store for Women."

Thursday, September 19

Gravity Center, 11:30 a.m., 339 Davey Lab. John Baker on "Collisions of Boosted Spinning Black Holes in the Close-Slow Approximation."

Centre County Ministerial Association and The Center for Ethics and Religious Affairs, 7:30 p.m., Eisenhower. Anthony Campolo on "Is Jesus a Republican or a Democrat?"

Ceramics, 11 a.m., Steidle. Ahmad Safar on "Designing, Prototyping and Manufacturing of Composite Materials."

Friday, September 20

Economics, 3:30 p.m., 420 Kern Graduate Building. Kaushik Basu on "The Economics of Child Labor."

Philosophy, 4 p.m., 124 Sparks. John E. Smith on "Hocking's Insight into the Individual and the State."

CONFERENCES

Tuesday, September 17

"Scale-up Strategies for Animal Cell Culture," 8:30 a.m., Frear Lab. Through Sept. 20. To register, call (800) PSU-TODAY (800-778-8632).

EXHIBITS

Palmer Museum

"Selections of Contemporary Art from the Pincus Collection," through Dec. 15.

"The Wood Engravings of Warren Mack," through Jan. 5, 1997.

"Cooking for the Gods: The Art of Home Ritual in Bengal," through Dec. 8.

"When Coal Was King: Paintings from the Steidle Collection, College of Earth and Mineral Sciences," through Dec. 8.

Zoller Gallery

"More is More," Visual Arts faculty collections. Through Sept. 17.

Kern Exhibition Areas

"Lewis, Untangling Strains," Robert Vander Voort. Through Oct. 15.

The pottery of Ian Stanton, Sept. 17 through Oct. 13.

Ritenour Health Center

"Art on the Move: The paintings of Marjuit Kaunhean-Katz," Sept. 13 through Oct. 16.

HUB Formal Gallery

"Geography of the Unconscious," Nancy Moore. Through Oct. 19.

HUB Browning Gallery

"The work of Shalom Noiman, through Oct. 20.

HUB Art Gallery

The watercolors of Dorothy Grebos, through Oct. 13.

Shaker-style boxes by Steve Strouse, Sept. 13 through Oct. 13.

■ Reflects an international perspective

Appointments

Longtime faculty member promoted to department head

Deborah F. Atwater, associate professor of speech communication and African and African American studies, has been named head of the Department of African and African American Studies.

Atwater's research and professional activities are concerned with intercultural communication, ethnicity and rhetoric, and their interface with the worlds of industry, business and labor. She has been a consultant to the Educational Testing Service for the National Teacher's Examination and active in presenting workshops and seminars on communication skills offered through Penn State and Rutgers University for labor organizations. She helped to develop a comprehensive communication program for the 4-H Clubs of Delaware County and served as a communications development specialist for the training and development department of Mellon Bank (East).

A member of the Penn State faculty since 1972, Atwater was an instructor in speech communication at the Penn State Abington-Ogontz Campus until 1976, when she became an assistant professor of speech communication at the Penn State Delaware County Campus. From 1988 to 1995, she was the senior faculty mentor for the Center for Minority Graduate Opportunities and Faculty Development at University Park. In that position she worked with junior minority faculty through activities such as information sharing, mentoring, peer guidance, review and counseling and support of research opportunities. She continues to serve on the advisory board of the center. Her extensive service to the college and University include chairing the Liberal Arts Diversity Committee and, since 1992, serving on the advisory board for the Commission for Women and Center for the Study of Higher Education.

Atwater received her B.S. in secondary education with distinction and M.A. in speech communication from Penn State, and a Ph.D. in intercultural communication from the State University of New York at Buffalo.

Mont Alto names manager of Housing and Food Service

Randy Fulton has been named manager of Housing and Food Service at the Penn State Mont Alto Campus. Fulton was previously the assistant manager of Pollock Dining Commons on the University Park Campus. Before joining Penn State, he served as the food service manager at Temple University's Ambler Campus.

With a bachelor's degree in business administration and human resources from Temple University, Fulton is pursuing a master's degree at Penn State. He is a member of the National Association of College Food Service.

Instructional design specialist joins staff at Mont Alto

Tim Kochery has joined the Penn State Mont Alto staff as an instructional design specialist. Previously, Kochery was employed as a project director of multimedia applications at the University of Minnesota. Other work experience includes working as a quality adviser to the U.S. Department of Agriculture and as an instructor at the University of New Mexico.

Kochery received his B.S. from New Mexico State University and an M.A. in training and learning technologies from the University of New Mexico. He is in the dissertation phase of his Ph.D., which he is pursuing at the University of Minnesota. Kochery has presented numerous research papers to the Association for Educational Communications and Technology and has been a member of this organization since 1991. He also is a member of the International Interactive Communications Society.

At Mont Alto Campus, his duties as an instructional design specialist include offering technical support and training to faculty, helping produce instructional materials and overseeing Project Vision and Project Empower.

College of Liberal Arts department names new head

Gerald N. Knoppers, associate professor of religious studies and Jewish studies, has been named head of the Department of Classics and Ancient Mediterranean Studies in the College of the Liberal Arts on the University Park Campus. A member of the Penn State faculty since 1987, Knoppers' research specialization is the Hebrew Bible, ancient Near Eastern religions and early Judaism.

Knoppers recently completed a two-volume study, *Two Nations Under God: The Deuteronomistic History of Solomon and the Dual Monarchies for the Harvard Semitic Monographs Series*. This work analyzes differences between the Masoretic (Hebrew) text of Kings and the Greek (Septuagint) Book of Reims to delineate the stance of the Deuteronomist (the author of the biblical books of Joshua through 2 Kings) toward the history of the United Kingdom and the emergence of the divided monarchy. Author of more than 20 scholarly articles in leading journals in biblical and ancient Mediterranean studies and of numerous reviews, he is preparing a commentary on I and II Chronicles for the Anchor Bible Series.

Knoppers has received a summer fellowship from the National Endowment for the Humanities, a Young Scholars Fellowship from the Catholic Biblical Association and he recently held a Skirball Fellowship of the Oxford Centre for Hebrew and Jewish Studies.

Deborah F. Atwater

Tim Kochery

Katie Lakso

Knoppers received his B.A. degree in philosophy from Calvin College, an M.Div. in Old Testament studies from Gordon-Conwell Theological Seminary and M.A. and Ph.D. degrees with distinction from Harvard University in Near Eastern languages and civilizations.

Mont Alto welcomes coordinator of residence and student life

Penn State Mont Alto Campus welcomes Katie Lakso as coordinator of residence and student life. Lakso's prior experience includes serving as coordinator for residence life at the University Park Campus, working as a youth employment counselor/teacher in her hometown of Huntingdon, Pa., and working as an area director at Juniata College.

With a bachelor's degree in English from Mount Union College in Ohio, Lakso will complete her master's of counselor education/college student personnel in December at Penn State. Her current duties include selecting, training and supervising the residence hall assistants in Mont Alto Hall, where she resides, and planning and coordinating various student activities. She also works as a liaison between the Campus Life office and the offices of campus ministries and volunteer services.

Hazleton names new admissions officer

Rounding out a reorganization of the Office of enrollment management at the Penn State Hazleton Campus is the naming of a new admissions officer. Kevin J. Noly has assumed that position and reports to the director of Enrollment Management. Noly is responsible for development and implementation of recruiting and admissions activities for the campus.

Before joining Penn State, Noly held positions at King's College in Wilkes-Barre and was a member of the King's College New Student Orientation Committee, developing and implementing new student orientation programs. He also served as counselor in the Office of Residence Life, providing personal and academic counseling for resident students and helping to develop educational and social programs for them.

Noly is a graduate of King's College, where he received a B.S. degree in human resources management. He also has participated in a number of King's College continuing education programs in public speaking and in health and safety issues.

Appointments

Department of History appoints new head

Anthony Gregg Roeber, professor of history at the University of Illinois at Chicago, has been appointed professor of early modern history and religious studies and head of the Department of History. Roeber is a specialist in the religious and legal history of early modern North America and Germany.

Roeber's study, *Palatines, Liberty and Property: German Lutherans and Colonial British North America* (The Johns Hopkins University Press, 1993), was a co-winner of the 1993 John H. Dunning Prize of the American Historical Association. His other books include *Faithful Magistrates and Republican Lawyers: Creators of Virginia Legal Culture, 1680-1810* (University of North Carolina Press, 1981); and two institutional histories, *Good and Faithful Servants: A Centennial History of the Lutheran Home and Services for the Aged, Arlington Heights, Illinois, 1892-1992* (Arlington Heights, 1991), and *Lift High the Cross: A Centennial History of Grace Evangelical Lutheran School, 1896-1996* (River Forest, IL, 1995).

Roeber has received numerous grants and awards. Among these have been a National Endowment for the Humanities Fellowship, a German Academic Exchange grant, two grants from the American Council of Learned Societies, two Alexander von Humboldt Fellowships and a National Endowment for the Humanities Chairman's Grant.

Before joining the University of Illinois at Chicago in 1986, he was a member of the faculty of Lawrence University and Princeton University. He received a bachelor's and a master's degree from the University of Denver, and an A.M. and Ph.D. from Brown University.

Anthony Gregg Roeber

Development, alumni relations specialist on board at Hazelton

Elizabeth M. Watkins has been named development and alumni relations specialist at the Penn State Hazelton Campus. Watkins is responsible for professional staff assistance in the forthcoming Campaign for the 21st Century at the campus; will act as liaison on activities to encourage alumni to become more involved in the life of Penn State Hazelton; and will be responsible for organizing an alumni constituent society and assisting the campus Annual Fund for Academic Excellence. She also will assist in planning and implementing the Campus Student/Alumni Mentor Program.

Watkins joined Penn State Hazelton in the Office of Development and University Relations in 1987 as a staff assistant and has been active in numerous campus activities. In 1994, she was one of two recipients of the Staff Assistant Award that recognized outstanding staff support in the University's Commonwealth Educational System for development, university relations and alumni relations activities.

She received an associate degree in business administration from the Penn State Hazelton Campus in 1995, and is pursuing a baccalaureate degree in business management.

Shenango welcomes instructional development specialist

Jeanne Vilberg has joined the Penn State Shenango Campus as instructional development specialist. In the newly created position, Vilberg will provide support to the campus faculty in creating multimedia learning resources in the classroom. The position is part of Project Empower, the University's new initiative for the Commonwealth Educational System, which aims to enhance active and collaborative learning in the classroom through the use of computers and telecommunications technologies.

Vilberg received a bachelor's degree in design from Bowling Green State University, a master's degree in communication from Clarion University, and is pursuing a Ph.D. in instructional systems at Penn State. She was formerly an administrator with Clarion University where she was active in promoting computer technologies in education.

Promotions

Staff

Debra M. Ackard, staff assistant VI in Division of Development and Alumni Relations.

Joann A. Altier, staff assistant VI in Research and Graduate School.

Kent Becker, microcomputer systems consultant in Computer and Information Systems, Center for Academic Computing.

Mark Berger, area representative II at Penn State Harrisburg.

Jan Brightbill, staff assistant V at The Hershey Medical Center.

Lisa A. Broniszewski, data archivist in Research and Graduate School.

Ronald Byron, systems project leader I in Office of Physical Plant.

James Caltagirone, regional field director II in Division of Development and Alumni Relations.

Melissa Casey, staff assistant VI in The Smell College of Business Administration.

Joan Delese, admissions counselor II at Penn State Hazelton Campus.

Karen Delmonico, staff assistant VI in University Libraries.

Jerome Fare, supervisor, Area Services, in Office of Physical Plant.

Kathy Gates, staff assistant VII in Division of Development and Alumni Relations.

Janet Gibson, staff assistant V at Penn State Fayette Campus.

Ray Grove, key control/network coordinator at The Hershey Medical Center.

Jody Heckman, staff assistant VIII in Commonwealth Educational System.

Jean Hoffman, staff assistant VI in Student Affairs.

Amy Johnson, assistant to financial officer II at Penn State Erie, The Behrend College.

Lynn Johnson, director of development in Division of Development and Alumni Relations.

Mary Kelly, coordinator, research funds, in Applied Research Laboratory.

Ellen Laun, DUS programs coordinator at Penn State Fayette Campus.

Earl Martin, supervisor, Area Services, in Office of Physical Plant.

Deborah C. McCafferty, publications manager in Housing and Food Services.

Joel McCamley, senior applications programmer/analyst in Undergraduate Admissions.

Catherine Miller, staff assistant V at Penn State Mont Alto Campus.

Marianne H. Miller, employment specialist/training coordinator in Office of Physical Plant.

Catherine Molloy, clinical head nurse at The Hershey Medical Center.

Sylvia J. Morris, program aide at Penn State Mont Alto Campus.

Bettina Noel, senior technician, Research, at The Hershey Medical Center.

Robert Oakes, human resources coordinator III in Division of Development and Alumni Relations.

David Pearlman, assistant director of student affairs at Penn State Altoona Campus.

William P. Piekielek, research support associate in College of Agricultural Sciences.

Rosanne Pogash, manager, Data Management Unit, at The Hershey Medical Center.

Francis Raymond, documentation specialist in Division of Development and Alumni Relations.

Constance Rogers, staff assistant VI in Continuing and Distance Education.

Susan Royer, staff assistant VI in Health and Human Development.

Shannon Seiner, staff assistant VI in College of Health & Human Development.

Lisa Sharkey, assistant to the financial officer II in College of Engineering.

Alumni Fellows on campus today

The College of Education today welcomes Alumni Fellows into classes and meetings. The Hon. John L. Braxton of the Pennsylvania Court of Common Pleas and a 1966 graduate of Penn State, and Wayne K. Hoy, the Novice G. Fawcett chair in educational administration at The Ohio State University, will be honored as Fellows in ceremonies at University Park.

Braxton has served as a judge in Pennsylvania's Court of Common Pleas since accepting an appointment from Gov. Richard Thornburgh in 1981. Re-elected to his second term in 1991, Braxton has presided in family court since 1985. An adjunct professor in the School of Business and Management at Temple University in Philadelphia, Braxton teaches an undergraduate course in law and society.

A former chairperson of the nation's largest organization of African-American judges, Braxton currently serves on the Pennsylvania Sentencing

John L. Braxton

Wayne K. Hoy

the Department of Educational Administration at Rutgers University. His many honors include the Lindback Foundation Award for Distinguished Teaching from Rutgers University, the Excellence in Education Award from Penn State's College of Education and the Meritorious Research Award from the Eastern Educational Research Association.

The fellows will visit with faculty, staff and students within the college, sharing their expertise and knowledge. The Alumni Fellow Award is the highest honor conferred by the Penn State Alumni Association, and is in association with the College of Education.

Commission. He is an Army veteran, having earned a Bronze Star with First Oak Leaf Cluster for Meritorious Service in Vietnam.

Hoy, who earned advanced degrees in 1962 and 1965 from Penn State, is one of the country's leading research scholars in educational administration. He is former academic dean of academic affairs and former chairperson of

LECTURES

Behrend plans science talks

The Division of Science at Penn State Erie, The Behrend College, is sponsoring a fall seminar series. The scheduled speakers are:

■ **Richard Bertram**, assistant professor of mathematics, on "Electrical Signaling in Nerve Cells and the Marriage of Biology and Mathematics," 3 p.m. Sept. 12, Reed 117.

■ **Pamela Botts**, assistant professor of biology, on "Spatial Pattern, Habitat Characteristics and Temporal Changes in Chironomid Assemblages

in Wetlands on Presque Isle," 3 p.m. Sept. 26, Reed 117.

■ **Mike DiSanti**, astronomy, NASA; 3 p.m. Oct. 10, Reed 117 (tentative).

■ **Bard Ermentrout**, mathematics, University of Pittsburgh; 3 p.m. Oct. 17, Reed 117.

■ **Bill Baxter**, assistant professor of physics; 3 p.m. Oct. 24, Reed 117. For more information, check the WWW site: http://euler.bb.psu.edu/science/seminar/fall_96.html or call (814) 898-6105.

Business lecture series continues

The Current Issues in Business Lecture Series at the Penn State Harrisburg Eastgate Center continues Oct. 9 at noon with a look at "Organizational Culture and Workplace Participation."

Guest presenter **David Morand**, assistant professor of management at Penn State Harrisburg, said "programs of employee involvement and workplace participation are recognized as key to increasing productivity and enhancing organizational effec-

tiveness in today's complex business environment. Many such programs, however, falter or fail."

Morand's presentation will analyze and discuss how "organizational culture" plays a vital role in these types of programs.

The lecture series, sponsored by the Penn State Harrisburg School of Business Administration, is free to the public. For registration or information, contact the Eastgate Center at (717) 772-3590.

Dean to examine trends in health promotion

Barbara Shannon, dean of the College of Health and Human Development, will assess trends in the field of health promotion and disease prevention during a noon presentation Oct. 2 at the Penn State Downtown Center in Harrisburg.

Shannon's presentation will also focus on the college's role in the evolving health arena through research, teaching and outreach programs. A question-and-answer session and reception will follow her presentation.

The program, which is free to the public, is sponsored by the Downtown Center and is one of a series of lectures on public policy issues. For more information, contact the center at (717) 783-0433.

Barbara Shannon

Learn how to sell your great works

Do you have a compelling story of love and adventure to sell, but no clue how to sell it? Aspiring writers may attend the first romance and fiction conference "A Passionate Journey: Writing into the New Millennium," Nov. 7-8 at The Penn State Scanton on the University Park Campus.

Workshop presenters include Lock Haven native **Sandra Hill**, author of four novels, and the recently published **Trish Jensen** of Reedsville. The keynote speaker will be **Mary Jo Putney**, best-selling author of *Shattered Rainbows*, the culmination of the award-winning *Fallen Angels* series.

At this conference, romance and fiction masters

will share what editors and publishing houses are purchasing and will be purchasing. Take advantage of this opportunity to meet agents and dealers. Learn how to write and market your romance and fiction for the publishing marketplace of today and tomorrow.

For more information about program content, please contact **Lisa Lyles**, conference planner, by phone at (814) 863-1738, or by e-mail at Conferencel2@cdc.psu.edu

For registration information call (800) PSU-TODAY (778-8632), or visit the Web site at: <http://www.cdc.psu.edu/C&F/1/WritingRomance/>

Lecture examines education options

Is a four-year college education the answer for all Pennsylvania youth?

Kenneth Gray, professor of vocational education, will address these questions and others in a noon presentation

Sept. 25 at the Penn State Downtown Center in Harrisburg.

As part of his presentation, Gray will discuss the need for greater technical education in Pennsylvania and why a bac-

calaureate degree is not the only way to achieve success in a career. A question-and-answer period will follow the discussion, which is free to the public. For information, call the Downtown Center at (717) 783-0433.

Curator to discuss challenging traditional Jewish identities

Norman Kleeblatt, Susan & Elihu Rose curator of fine arts of The Jewish Museum in New York, will discuss challenging traditional Jewish identities at 8 p.m. Thursday, Oct. 31, in the Palmer Lipson Auditorium on the University Park Campus.

Kleeblatt has developed the critically acclaimed exhibition "The Dreyfus Affair: Art, Truth and Jus-

tice" and has co-organized "Painting a Place in America: Jewish Artists in New York, 1900-1945." He is the recipient of the Henry Allen Muse prize and the National Jewish Book Award for his publications.

The Joanne and Paul Tanker Lecture is free to the public. It is sponsored by the Jewish Studies Pro-

Senator to visit University to speak, accept award

State Sen. **Hardy Williams**, who serves the 8th District including Philadelphia, will be on campus Wednesday and Thursday, Sept. 18 and 19, to share his experiences with faculty, staff and students. Sen. Williams also will be honored with the Nittany's Pride award for his leadership and service to the community.

Hardy Williams

Sen. Williams, a Penn State graduate, will receive the Nittany's Pride: The Journey Back award, sponsored by Attorney Edgar Snyder in cooperation with Penn State's AT&T Center for Service Leadership, a division of Student Affairs.

Williams has distinguished himself as a champion of youth, senior citizens and the poor with special interests and leadership in public health issues.

He is chair of the Senate Public Health and Welfare Committee. In addition to his responsibilities as a senator, Williams has paved the way for other African Americans to enter

government, and in 1972 organized the Legislative Black Caucus. He continues to speak out against injustice and attacks on African American families, initiating such programs as the Crisis Intervention Network, Black Family Services Inc., Blacks Networking for Progress Inc. the Delaware Valley Ecumenical Council and the African American Delaware Valley Port Corp.

At Penn State, Williams, who was the first African American player on the basketball team, went on to captain the championship teams of the early 1950s. He graduated in 1952 with a bachelor of science degree in political science and history and received a doctorate of jurisprudence in 1957 from the University of Pennsylvania Law School.

He was elected to the Pennsylvania House of Representatives for the 191st Legislative District and served until 1982 when he was elected to the Pennsylvania Senate. Williams also served on the Penn State Board of Trustees from 1972 to 1975.

gram, Joanne and Paul Tanker, the Palmer Museum of Art and Penn State Hill.

Kleeblatt also will be speaking at 10 a.m. Friday, Nov. 1, in the Department of French, 312 Burrows Building on "The Body of Alfred Dreyfus: A Site for France's Displaced Anxieties of Masculinity, Homosexuality and Power."

More Lectures

Employment topic of brown-bag talk

"The Growth of Temporary Employment: What's in Store for Women," a brown-bag lunch meeting presented by Professional Women at Penn State, will be held beginning at 12:05 p.m. Wednesday, Sept. 18, in room 110 Henderson Building (Living Center) on the University Park Campus. Jackie Krasas Rogers, assistant professor of labor studies and industrial relations, will speak.

Professional Women at Penn State is a grass-roots group coordinated by University women in which participants can develop and maintain a communications network and serve as a resource for other Penn State women.

For more information about the group, visit its Web site at URL: <http://rudolph.la.psu.edu/~pellenb/jrups/welcome.html>

Elders to speak about health care

Dr. Jocelyn Elders, a pediatric endocrinologist who served as the first African American Surgeon General in 1993, will speak about health care and personal responsibility at 8 p.m. on Wednesday, Sept. 18, in Eisenhower Auditorium.

Her talk is part of the Distinguished Speakers Series presented by the Programming Coordination Board, and is co-sponsored by Health Promotions Education, The Center for Women Students, the College of Health and Human Development and Black Caucus.

Dr. Elders is now at the University of Arkansas Medical School.

Kossman Lecturer to give initial talk

Internationally acclaimed architect Antoine Predock will speak at 7:30 p.m. Tuesday, Sept. 17, in 101 Thomas Building on the University Park Campus. The event will mark the beginning of Predock's term as the Kossman Lecturer in the Department of Architecture for the 1996-97 year.

Predock has gained a devout following for his beautiful and poetic response to place.

Religion focus of Oct. 3 lecture

Gary Pavela, director of judicial programs at the University of Maryland, College Park, will speak on "Legal Implications for Religion on Campus: Post-Rosenberger" at 7:30 p.m., Oct. 3, in 101 Kern Building on the University Park Campus.

Clay Calvert, assistant professor of journalism in the School of Communications and a member of the Pennsylvania Center for the First Amendment, is the faculty respondent.

The speech, part of the Values in the Community series celebrating the Eisenhower Chapel's 40th anniversary, is sponsored by the Center for Ethics and Religious Affairs and is free to the public.

Life Sciences Consortium offers seven new graduate study options

Penn State is on track and moving ahead with its innovative approach to enhancing the life sciences through the Life Sciences Consortium (LSC). President Graham B. Spanier told those gathered at an afternoon reception Sept. 9.

The LSC was approved by the University Faculty Senate and the Trustees this spring and, with funding in place, came into official existence on July 1.

After an extensive internal and external peer review process, seven new options for graduate study were selected from among 13 final proposals for inclusion in a new Integrative Biosciences Graduate Degree Program being proposed to the Graduate Council this fall.

The first group of options, which the LSC anticipates will also be offered within existing disciplinary degree programs, include biomolecular transport dynamics, cell and developmental biology, chemical biology, ecological and molecular plant physiology, molecular medicine, neuroscience and nutrition sciences. More new research groups and graduate study options are expected to emerge in the future.

LSC graduate education will emphasize active, group learning approaches, career planning and student internships in organizations outside the University. Plans also call for LSC to co-fund 50 new life science faculty members at the University Park and Hershey campuses.

Spanier called the LSC plan, which integrates life science research and teaching across disciplines and colleges at Penn State, "an aggressive, forward-looking approach that recognizes the important role these areas will play in American life and commerce in the years ahead."

The LSC structure is unlike any other at Penn State. It is both intercollegiate and interdisciplinary but it is not an academic unit and has no faculty lines. Rather, the LSC provides financial and administrative support for cooperation, interdisciplinarity and innovation in research and teaching among the life science units on the University Park and Hershey campuses.

Policy and decision making for the consortium is the joint responsibility of a faculty steering committee and an executive committee. Nina Fedoroff, who chaired the interim committee which piloted LSC's establishment, is

Judith Bond

Nina Fedoroff

C. Robert Matthews

now LSC director and chair of the faculty steering committee. Rodney Erickson, dean of the Graduate School, is chair of the executive committee which includes the deans of the participating colleges, Fedoroff and the IRP director.

Fedoroff, who holds the Willaman Chair of life sciences and is director of the Biotechnology Institute, joined the Penn State faculty in 1995. A specialist in plant molecular biology and genetics, she is the recipient of a National Institutes of Health Merit Award, a member of the National Academy of Sciences, an editor of the Proceedings of the NAS, a trustee of BIOSIS, a director of the Sigma-Aldrich Chemical Co., and chair of the advisory committee to the National Science Foundation biological directorate.

Spanier also announced that Judith Bond, professor and chair of biochemistry and molecular biology in the College of Medicine, and C. Robert Matthews, professor of chemistry and Eberly Family professor in biotechnology, have agreed to serve as co-directors for graduate education for the consortium.

Bond, who joined the Penn State faculty in 1992, was also recently named assistant dean for graduate education and the MD/PhD program at the College of Medicine. A specialist in research on the action of enzymes, called proteinases, she holds an NIH Merit Award, is a council member of the Association of Medical and Graduate Departments of Biochemistry and of the American Society of Biochemistry and Molecular Biology.

Matthews is director of the Center for Biomolecular Structure and Function and co-principal investigator on a National Science Foundation training grant, in addition to his academic appointments. A specialist in the mechanisms of protein folding, he is associate editor of the journal *Proteins*, and a member of the editorial board of the *Journal of Protein Engineering*.

Behrend plastics center funded through 2000

The Plastics Technology Deployment Center at Penn State Erie, The Behrend College, will receive \$2.1 million in federal funds to continue operations through the year 2000.

The center was created in 1994 with a \$2.5 million federal Technology Reinvestment Program grant. The program, designed to bring Cold War military innovations to the civilian marketplace, will end this year; the National Institute of Standards and Technology provided the new funding.

The center, operated in partnership with CAMP Inc. (formerly the Cleveland Advanced Manufacturing Program), offers free and fee-for-service manufacturing, engineering and business support to a target market of

1,800 small and mid-size plastics-related manufacturing firms in 14 counties of northwestern Pennsylvania and 22 counties of northeastern Ohio.

Since its inception, the center has served more than 600 plastics processors, designers and tool and die makers.

Based on data collected from clients, the center estimates its economic impact on the region to be slightly more than \$14 million.

The center is one of 58 National Institute of Standards and Technology Manufacturing Extension Partnerships around the country, but is the only partnership dedicated to a single industry.

Faculty/Staff Alerts

Open house

For the second year in a row, President Graham B. Spanier is planning to host an "open house" and tour of his office faculty staff and students. The Old Main Bell Tower will also be open. The event is set for 4 to 5:30 p.m. Friday, Sept. 27. Light refreshments will be served.

Applications due

Applications for the Institute for the Arts and Humanistic Studies Faculty Research Fellowships for which research or creative work will be accomplished between January and June 1997 are due at Hilseng Cottage by 5 p.m. on Oct. 7. For information or a copy of the Research Fellowship guidelines, call the institute at (814) 865-0495.

United Way gearing up

United Way exists because people care for and want to help others in need. To make the best use of contributor's dollars, United Way holds one campaign each year instead of each agency conducting its own campaign which could result in numerous appeals in your community. A contribution through the University's payroll deduction plan will directly benefit families and friends in your area. The annual fall campaign begins soon.

News in Brief

Catholic fellowship group to meet

The first fall semester meeting of the Penn State Catholic Faculty/Staff Fellowship Group will be held at noon Monday, Sept. 16, in 212 Eisenhower Chapel. Items to be discussed include the formation of a student mentoring program, the planning of meeting topics and agendas for the remainder of the semester. All faculty and staff may attend.

Programs for children

The College of Health and Human Development will offer a free program in basic movement skills and games for children ages 5 through 8, beginning Oct. 8.

The program will be held in Room 126 White Building on the University Park Campus from 3:45 to 4:25 p.m., Tuesdays, through Nov. 12. Registration is scheduled for 3:35 p.m. on Oct. 8 in Room 126, White Building.

Upcoming programs

Fresh Start Smoking Cessation: The American Cancer Society's Fresh Start smoking cessation program teaches participants how to deal with smoking as a chemical addiction, a habit and a psychological dependency. Meets from 12:30-2 p.m. Sept. 23, 25, 30 and Oct. 2, in 410 Rider Building. Cost: None.

Cart Smart Shopping Tour: Learn how to find your way through the grocery store "maze" so that you can be adept at choosing the lower-fat items in each aisle. Meets 4:30-5:45 p.m. Wednesday, Sept. 25, at the North Athletes Bi-Lo (Meet at the snack bar area). Cost is \$5, reimbursable to HMO participants.

To register, contact Jan Hawbaker at (814) 865-3085 or e-mail jh33@oas.psu.edu.

Renaissance Woman to be honored

Suzanne P. Paterno, an active local volunteer for such causes as the Pennsylvania Special Olympics, United Way and the University Libraries, will be honored as the Renaissance Woman of the Year at the 20th annual Renaissance Scholarship Fund dinner. The event will be held Nov. 13 at the Nittany Lion Inn on the University Park Campus, beginning with a 6 p.m. reception and continuing with a 7 p.m. dinner.

The dinner, held each year since 1977, raises funds for Penn State's Renaissance Scholarships which are awarded to academically talented students who have financial need. Each dinner honors a University or community leader and funds are used to endow scholarships in the honoree's name.

Paterno's philosophy, "if you've been given a talent or ability, then you must help as many people as you can as you go through life," has led her to help many Penn State students better their lives through education. Not only does she tutor students in English, she also helped establish in 1990 the Summer Institute for Academic Achievement—a program that offers minorities additional preparation for college-level work and familiarizes them with the University.

As a board member with the Pennsylvania Special Olympics since 1991, she has co-chaired the opening and closing ceremonies of the Summer Games for several years and chaired the outreach, VIP and fund-raising committees.

In 1995, the Penn State Alumni Association honored her with the Lion's Paw Award, which is given annually to individuals who have contributed notable service to the University. Her contributions include helping to establish the College of the Liber-

Suzanne P. Paterno

her husband, Penn State head football coach Joe Paterno, the campaign that raised \$14 million for an expansion to Pattee Library and to support an endowment. The Penn State Board of Trustees voted to name the expansion the Paterno Library in honor of the couple's efforts. In 1994, she was honorary chair of the local United Way campaign and she co-chaired its "Day of Caring" in 1995 and 1996. She is a 1962 graduate of Penn State with a bachelor's degree in arts and letters. The Paternos have five children.

Since the Renaissance Fund's inception in 1969, nearly \$3 million in private contributions has been raised to help make higher education possible for 1,235 students. During the 1995-96 school year, 263 scholarships were awarded.

For more information on the Renaissance dinner, contact Barbara Sarra in the University's Office of Annual Giving at (814) 863-2052.

Monument hits century mark

There weren't any party hats, but there was cake and Pepsi on Sept. 6 to celebrate the 100th birthday of the Obelisk, the oldest monument on the University Park Campus and the symbol most closely associated with the College of Earth and Mineral Sciences.

The Obelisk, located along the mall between Willard and Sackett buildings, was erected in 1896. That was the same year the School of Mines, which later became the College of Earth and Mineral Sciences, came into existence.

In the 1890s, Pennsylvania led the nation in value and quantity of building stone. The Obelisk is a polylith made up of 281 stones gathered from 139 quarries, most in Pennsylvania. The stones are arranged in geological order so that the oldest stones are near the bottom and the youngest near the top. The blocks were intended as samples of structural stone, then a major industry in the Commonwealth. A handbook for the use of the building stone industry and its customers was researched and prepared using experiments on the Obelisk stones.

Thin sections of the various stones were examined by microscope and chemical and strength tests were performed. The Obelisk was also intended to allow students to monitor the effects of weathering on the different stones.

Also in celebration of the centennial of the College of Earth and Mineral Sciences, "When Coal was King" paintings from the Steidle Collection will open on Sept. 10 at the Palmer Museum of Art and run through Dec. 8.

Happy birthday

The Obelisk was erected the same year the School of Mines, now the College of Earth and Mineral Sciences, was founded. Both celebrate their centennial this year.

News from ...

Joint project looks at "Death in America"

The Department of Humanities at The Hershey Medical Center will work closely with Hospice of Lancaster County to create a set of case narratives describing the experiences of dying patients, their families and health-care providers as they interact throughout the patients' illnesses.

The project will be made possible through a competitive research grant to the department—one of nine awarded among approximately 300 applicants—by the Open Society Institute's Project on Death in America.

"Our main objective of the narratives," David Barnard, professor and chair of humanities, said, "will be to tell the story of patients and families receiving care in hospice settings, particularly the feelings and perceptions of givers and receivers of care. We will look at death and the care of dying patients as part of the human experience. This will include talking with doctors, nurses, social workers and volunteers about their feelings as they give care to these very sick people."

The project, done in collaboration with McGill University and the Royal Victoria Hospital, both in Montreal, grew out of Barnard's sabbatical there in 1994-95.

The research will also involve tape-recorded interviews with patients, families and care-givers, and journals kept by care-givers—will continue until about a year after patients die.

A biopsy needle is deftly maneuvered into a hollow cone against a patient's skull. With a gentle push and some resistance, Dr. Thomas M. Krummel feels a soft pop as the needle penetrates the outer skull. Another louder pop tells him he has pierced the inner skull. With a bit more exploration, he eventually "feels" a brain tumor.

"It's truly awesome," Krummel, the John W. Oswald professor and chair of surgery at The Hershey Medical Center, said.

The tumor was actually a CT scan on a computer screen, and Krummel's biopsy needle was mounted in a thimble on a robotic arm. Someday, Krummel believes, this sort of virtual operation may be business as usual. Surgeons, computer scientists and engineers at Hershey, the University Park Campus and in Boston are combining their expertise in hopes of developing virtual surgical training techniques as part of routine medical training.

The key to the project is a two-handed, force-feedback device controlled by a desktop computer system called the PHANTOM, operating on a fast Intel Pentium processor. Specially designed software processes signals from motion sensors on the PHANTOM's mechanical arm and then "tells" the motors how much

Thomas M. Krummel

pressure to exert on the thimbles in three dimensions.

Krummel knows he's aiming high. He likens surgical training on the PHANTOM to aviation training on a flight simulator. The PHANTOM is being developed at Penn State as a surgical training system that provides for surgeons what flight simulators provide for pilots—a way to acquire skills safely, efficiently and inexpensively. But instead of sitting in a simulator staring at an imaginary world, a surgeon will simply don a headset through which he can see a virtual patient. Krummel envisions surgeons eventually rehearsing on "virtual patients" the night before they perform the actual surgery in the operating room.

"Now we do an operation slowly so the students at all levels learn how to do it,"

Krummel said. "But the operating room costs about \$1,000 an hour. An hour of teaching per operation, with 13,500 operations per year, creates educational costs of \$13.5 million per year that no one wishes to reimburse."

Cost, he said, is the driving factor for using the PHANTOM for medical education and training. Insurance companies are increasingly unwilling to pay higher patient-care costs associated with medical education.

Other sound reasons exist for Krummel's enthusiasm over the PHANTOM. He said, "We learn operations by doing them. The first incision we make is on a human being, and unlike learning to ride a bicycle, we're not allowed to fall off, to make mistakes. Yet mistakes afford another authentic learning experience."

The equipment doesn't come cheaply. Though the PHANTOM itself is relatively inexpensive, about \$20,000, "with the computers to drive it, programming time and other costs," Krummel said, "we've probably invested much more. However, the reality is we can't afford not to invest, with the staggering, indirect, educational costs which threaten our clinical competitiveness."

Krummel hopes Penn State surgeons will train on the PHANTOM within two

years and that it will help credentialing surgeons. "Written tests for credentialing test cognitive skill, but to think that that really tests performance is simplistic. How do you determine if someone is capable of performing an operation?"

Krummel is collaborating on the PHANTOM with scientists and inventors J. Kenneth Salisbury and Thomas Massie of M.I.T.'s Artificial Intelligence Laboratory. The two have formed SensAble Devices Inc. in Cambridge, Mass., to develop and market the device.

SensAble Devices sells only the hardware, and the PHANTOM's arm isn't much good without the corresponding software. That's where Boston Dynamics Inc. (B.D.I.) and Penn State's Applied Research Laboratory enter the picture.

B.D.I., headed by former M.I.T. mechanical engineer Marc Raibert, "puts all the pieces together," Kent Eschenberg, a simulation/visualization expert with the Applied Research Lab at University Park, said. "B.D.I. takes the basic robot."

PHANTOM, combines it with interface hardware, develops the software that does the real-time adjustment and combines this with more complex software."

Surgery to aid cerebral palsy patients now available

A surgical procedure to help children with cerebral palsy is now available at The Hershey Medical Center, according to Dr. Dennis Johnson, professor of neurosurgery and pediatrics.

The procedure, known as selective posterior rhizotomy, is intended to reduce spasticity (abnormally tensed muscles), and therefore may improve upper body function and enhance patients' ability to crawl or walk.

"This is a new or experimental procedure," Johnson said. "The surgical procedure cuts certain sensory nerves which are creating too much noise in the system.

Dennis Johnson

However, there is no reduction in the quality of sensation," he said.

Patients 3 to 5 years old

who have not undergone previous procedures are ideal candidates for the surgery.

Laurie Fisk, of East Smithfield, Bradford County, whose 3-year-old daughter Jenny recently underwent the procedure, said, "This offers us hope. If we didn't do anything, Jenny would never walk. But once she has learned to use her muscles instead of her spasticity, she may be able to walk." Fisk said, Jenny's 6-year-old brother, Kevin, is looking forward to being able to chase his sister around the house.

With all patients who undergo the surgery, rehabilitation is an important part of the follow-up process to

help the child re-learn to use muscles for movement, rather than using spasticity, which has been reduced. Children generally remain in inpatient rehabilitation for four to six weeks following the surgery.

The Hershey Medical Center is the only facility between Philadelphia and Pittsburgh providing selective posterior rhizotomy.

Cerebral palsy is a term used to describe a group of disorders affecting body movement and muscle coordination resulting from damage to the brain suffered at or about the time of birth.

About one child in 1,000 is affected by cerebral palsy.

ATHLETICS

A regular column provided by Intercollegiate Athletics

New coaches named

Penn State athletics has added new assistant coaches in women's swimming and women's lacrosse. **Fran McDermid** succeeds **Mary Bolich**, who left to become head coach at the University of Iowa. McDermid was a nine-time All-America and Penn State's first individual champion in any sport (100- and 200-meter freestyle). McDermid had been assistant coach and assistant director of aquatics at Villanova University.

Another Penn State graduate, **Karen (Schellenbach) Teufel**, was selected to assist with women's lacrosse. A member of the U.S. women's lacrosse squad from 1978-82, Teufel played four seasons of lacrosse and three years of field hockey as an undergraduate. She was the varsity girls lacrosse coach at Harborfields High School in Greenlawn, N.Y., for the past three years.

Nittany Lions on TV

There will be television coverage of Penn State's next two football games. Creative Sports will air the Northern Illinois and Temple games with scheduled kickoff times of 12:20 and 12:07 p.m., respectively. The Creative Sports telecasts will air in the State College market on WTAJ (Channel 10, Altoona).

All-American

Joe Roemer, a finance major and member of the Penn State men's gymnastics team, has been honored for the second year in a row as an All-American Scholar-Athlete by the College Gymnastics Association. Forty-eight individual gymnasts earned that distinction by achieving at least a 3.5 grade point average while attaining a minimum NCAA scoring average of 8.5 during the 1996 season.

New look

Joan Manos, left, helps an early-morning customer at Otto's Cafeteria in Kern Building on the University Park Campus. The eatery is celebrating its grand re-opening after summer renovations with expanded hours. Otto's is open Monday through Friday from 7 a.m. to 6 p.m., with the coffee shop open weeknights until 8 p.m.

"Parents and Families Day" set for Sept. 28

Parents and families of Penn State students are invited to attend a full day of tours, open houses and educational programming on Saturday, Sept. 28, at University Park. "Parents and Families Day," an annual event held by the Alumni Association, draws families from all over Pennsylvania and neighboring states for an informative and fun-filled day of special events.

Educational seminars begin at 10 a.m. in the HUB Assembly Room with a session on Penn State's ranking and reputation, and continue with presentations on transition issues at 11 a.m., financial aid at 1 p.m. and a session on "Severe Winter Weather, Tornadoes and Hurricanes: New Climate Trends or Media Hype?" at 2:15 p.m. in 112 Walker Building.

An Information Fair also will be held simultaneously from 10 a.m. to 3 p.m. in the HUB Ballroom, incorporating both campus and town organizations and vendors. Other open houses include the Old Main Bell Tower from noon to 5 p.m., the Breazeale Nuclear Reactor from 11 a.m. to 2:30 p.m. and the Multicultural Resource Center from 3:30 to 5 p.m. in 122 Grange Building.

For those who wish to see the campus, bus and walking tours are scheduled from 11 a.m. to 2 p.m. Bus tours will take approximately 45 minutes, and will make a special stop at The Bryce Jordan Center. In addition, two tours have also been arranged to visit Penn State's agricultural facilities.

These bus tours will depart from the Agricultural Administration Building at 1 and 2 p.m. A schedule of times and campus maps will be available at the HUB desk.

Parents and families are invited to join students in the residence halls for lunch and dinner for \$2.50 and \$4.50 respectively. For those staying through the evening, "Synergy: The Student Talent Show," will be presented in Schwab Auditorium at 8 p.m. Tickets for Synergy can be acquired by calling (800) ARTSTIX. Stargazing in Davey Laboratories is also an option from 8:30 to 10:30 p.m.

For more information, please call (814) 863-9424.

For the Record

■ A photo caption on page 12 of the Sept. 5 *Intercom* contained incorrect information. The photograph showed a Farm Operations worker mowing hay on a University Park Campus field.

■ **Jean Barczak**, staff assistant for the Women's Studies program, was misidentified in a story about the Coordinating Council of Professional Women at Penn State on page 12 of the Sept. 5 *Intercom*. In addition, chair **Anne Stover**, staff assistant in the College of Earth and Mineral Sciences, and associate member **Anne Stokes**, staff assistant in the College of Health and Human Development, were omitted from the story.

University again tops list of colleges receiving SAT scores

By GARY W. CRAMER
Public Information

Penn State once again leads all colleges and universities nationally in receiving Scholastic Assessment Test (SAT) scores from college-bound high school seniors, according to the College Board. Figures for 1995-96 show that a total of 53,238 students that expected to enter college this fall sent their SAT scores to Penn State compared to 51,042 for the next most popular institution, the University of Cali-

fornia at Los Angeles. Other leading university recipients of scores include the University of California at Berkeley (43,963), Boston University (41,147), and the University of Texas at Austin (40,686).

Last year, the College Board regional office in Philadelphia reported Penn State in front after receiving 46,746 scores.

The SAT, taken by 1.15 million students in the last year, is one of two tests widely used as an indicator of a student's preparedness for higher education.

See "SATs" on page 3

Faculty Senate to consider resolution on alcohol abuse

By ALAN JANESCH
Public Information

The University Faculty Senate last week heard a report that painted a disturbing picture of the ways excessive alcohol consumption affects students' lives and academic performance, and agreed to consider a resolution urging Penn State faculty to eliminate practices that appear to condone or enable the abuse of alcohol or other drugs.

On another matter — faculty salaries — the Senate accepted a report that said "unchecked growth" in faculty salary differentials damages faculty collegiality. The Senate urged the University administration and the colleges to adopt several new principles and procedures on faculty raises.

The proposed resolution on alcohol abuse, from the Senate's Committee on Student Life,

See "Senate" on page 2

Trustees updated on action spurred by results of Faculty/Staff Survey

Individuals, committees and units throughout the University are working with the results of the 1996 Faculty/Staff Survey to try to improve the way things are done at Penn State.

Susan Welch, dean of the College of the Liberal Arts and chair of the University Council on Continuous Quality Improvement, provided a report to the Board of Trustees on Sept. 6.

The council is working with deans and other executives to facilitate the exchange of best practices and to coordinate and implement follow-up activities.

Survey results were distributed to departments earlier this year and the University provost asked executives to include follow-up activities in strategic plans due in January 1997. Retreats were held in some areas and there have been discussions among human resource representatives and dean's councils, as well. The Office of Human Resources also is planning an Intercom insert in October on communication and intra-unit relationships.

See "Survey" on page 3

Photo: Greg Grieco

Popular destination

More college-bound students sent their SAT scores to Penn State in the last academic year than to any other college or university. Penn State received scores from more than 53,000 students who expected to enter college this fall.

Faculty Staff Club introduces speakers series

The lunchtime National Issues Forum will be broadcast live on WPSU radio

The Faculty Staff Club will launch a new endeavor in October with the inauguration of a monthly speaker series that will be carried throughout Pennsylvania on WPSU radio.

The lunchtime series at the Nittany Lion Inn, the Penn State National Issues Forum, is sponsored by the Penn State Bookstore.

"This is another opportunity for the Faculty Staff Club to provide a service to the University and local community," said George Bugby, executive secretary of the Faculty Senate and a member of the committee planning the speaker series.

"Our lunchtime series will help keep you in tune with the issues and debates that impact the environment where we live, study and work," he said. "Our committee worked hard during the past six months to design a speaker series we believe will be of interest to a broad mix of faculty, staff and others in this community."

Three speakers have been scheduled for the fall semester, including:

■ **James J. Duderstadt**, president emeritus of the University of Michigan, will speak on Oct. 8.

■ **John J. Curley**, chairman, CEO and president of Gannett Co. Inc., chairman of the News-
per Association of America and founding editor of *USA Today*, will speak on Nov. 22.

per Association of America and founding editor of *USA Today*, will speak on Nov. 22.

■ **Gary Gallagher**, professor of American history and an expert on the preservation of Civil War battle sites, will speak on Dec. 4.

The series will include a buffet lunch starting at 11:30 a.m., a speech approximately 30 minutes long and then about 15 minutes of questions and answers from the audience. The format will be similar to the one used by the National Press Club in Washington, D.C., which can often be heard on WPSU radio.

Tickets for the event are \$10 and reservations can be made by mail or by stopping by the Faculty Staff Club office at 110 HUB. For more information, call (814) 865-7590.

Members of the National Issues Forum Committee include:

Tom Bauer, John A. Brighton, George Bugby, Sandy Edwards, Peter Jurs, Bill Mahon, Eugene Melander, Katie O'Toole, Jim Purdum, Jim Ratcliff and Karen Wagner.

Members of the committee are interested in receiving suggestions for speakers for the spring semester.

Senate

continued from page 1

acknowledges that excessive alcohol consumption "negatively impacts the learning environment. We resolve that faculty should play a role in influencing student behavior by eliminating practices which appear to condone, encourage or enable alcohol or other drug abuse."

The resolution was introduced by the committee at the Senate's Sept. 10 meeting. Under Senate bylaws, the resolution will sit on the table for 30 days and be brought up for a vote at the Senate's Oct. 22 meeting.

The resolution doesn't specifically cite any practices that seem to condone alcohol abuse, but the discussion of the committee's report indicated that such practices include not taking attendance at Friday classes and not making assignments that are due in class on Fridays.

The committee's report says that surveys undertaken in April 1995 and March 1996 by the Office of Student Life show that the results of excessive alcohol consumption include serious arguments, incidents of shoving and hitting and more serious assaults.

The committee report cited Penn State responses to a college alcohol study done by the Harvard School of Public Health in 1993. According to the committee report, 29.5 percent of the 146 students responding to the survey said they had participated in "binge drinking" on three to five occasions. ("Binge drinking" is defined as consuming five or more drinks in a row for men, four or more in a row for women.)

About 16 percent of the respondents reported bingeing twice during the previous two weeks, and 2.7 percent said they had bingeed 10 or more times within the previous two weeks.

The Senate also heard from Sharon Entenberg, Undergraduate Student Government president, who on behalf of several student groups urged the University to initiate University-wide freshman seminars that comprehensively address the related problems of excessive alcohol consumption, campus safety and inappropriate behavior in the community.

"We resolve that faculty should play a role in influencing student behavior by eliminating practices which appear to condone, encourage or enable alcohol or other drug abuse."

Proposed resolution on alcohol abuse from the Senate's Committee on Student Life

Earlier this month, in his State of the University speech (*Intercom*, Sept. 12, p. 1), President **Graham B. Spanier** identified excessive alcohol consumption as part of the most fundamental challenge facing colleges and universities today.

On the issue of faculty salaries, the Senate's special Subcommittee on Faculty Compensation presented its report on differences in faculty compensation among academic units and salary compression within academic units.

The subcommittee found that the University "has paid inadequate attention to the cumulative effect" of salary levels established upon hiring and the percentage-based increases that lead to wide disparities in salary levels. "The unchecked growth of salary differentials, the University equivalent of a 'winner-take-all society,' is detrimental to faculty collegiality and ultimately will be detrimental to the goals and performance of the institution."

The special subcommittee was established in June 1995 to investigate the current status of faculty compensation at Penn State and, if necessary, recommend ways to change University policies. In its report, the special subcommittee was also responding to a charge from the Senate earlier this year to develop a minimum salary plan "patterned after" that of the State System of Higher Education (*Intercom*, Feb. 8) and to develop specific recommendations before the end of 1996.

Recommendations to the administration and/or the colleges include:

— The central administration should continue on an annual basis to collect data on salary distribution at other institutions and make efforts to ensure that Penn State faculty are paid competitive salaries.

— Colleges should examine entry-level salaries as well as increases awarded for promotions, with an eye to its effects on the long-range development of faculty salaries.

— Each college, department and location should review its methods of assessing faculty for purposes of salary adjustments and should make an effort to develop some uniformity in the process.

— The provost's office, starting in 1997, should review the salaries of the faculty at all locations that fall within the lowest one-third of a department's salary structure and set aside a significant percentage of salary increase funds to reduce "unjustifiable disparities" in salaries.

The subcommittee's recommendations to the Senate include:

— The Senate chair should reconvene a salary committee in the year 2000 to study the issue of salary disparities and determine if the Senate should provide further advice to the administration on salary raises.

Two standing committees, on faculty benefits and on planning, shall appoint a joint subcommittee to work with the administration to develop ways of gathering and analyzing data, in order to determine salary adjustment policies.

— The Faculty Benefits Committee should investigate the impact of regional variations in cost of living on faculty at different Penn State locations and shall also conduct a faculty salary gender equity study no later than the 1998-99 academic year.

In other matters:

— **John A. Brighton**, executive vice president and provost, updated the Faculty Senate on University Planning Commission activities. A complete copy of his text and budget slides can be found on the Web at <http://www.ur.psu.edu/PresAdmin/brightonsenate/INDEX.HTM>.

General education objectives under review

By ALAN JANESCH
Public Information

The University Faculty Senate's Special Committee on General Education has spent the summer looking hard at Penn State's general education program — and at comparable programs across the country — and has developed a working document that spells out principles and draft recommendations for changing the Penn State program.

"We're trying to focus the structure of general education on objectives related to proficiencies like writing, quantitative analysis, critical thinking, information literacy and their use in understanding broad knowledge areas," said Robert Pangborn, the committee's chair and associate dean of undergraduate studies in the College of Engineering.

"The key at this point is the objectives, rather than requirements that are translated immediately into courses and credits," Pangborn said. "We want to get away from that kind of definition."

The committee, which began discussion of its working document at a meeting last week, is currently discussing specific ways to define general education in terms of broader objectives. The committee is scheduling several more meetings between now and December (see schedule at right) and inviting the University community to attend its meetings and make comments on the working document.

In its present form, Penn State's general education program requires all undergraduates to take 46 credits in courses that cover a broad spectrum: 15 credits in communication and math skills, four in health sciences, four in physical education, nine in the natural sciences, six in the arts, six in humanities and six in the social and behavioral sciences.

Its aims are to help students understand and appreciate the multifaceted nature of knowledge and to develop their intellectual curiosity, strengthen their ability to think and deepen their sense of aesthetic appreciation. General education, according to Penn State's basic liberal arts program bulletin, is "the breadth of knowledge involving the major intellectual and aesthetic achievements of humanity."

Based on the findings of its investigation this summer, the committee has concluded that there's no clear national consensus on which colleges and universities have the best general education programs. But even though specific structures and features vary widely from institution to institution, the committee has noted that good programs share several important general features.

"Good general education," the committee says in a working document that will soon be made available for review and comment from the University community, "is idiosyncratic, tailored to particular institutions and their needs."

Also, says the committee, good general education: — promotes wholeness, "rather than balkanized

Meeting schedule

The Special Committee on General Education, which met last week to discuss the principles, objectives and recommendations outlined in a lengthy working document, has scheduled two more meetings between now and December.

Both meetings will be held on Tuesdays, from 4 p.m. to 5:30 p.m., in the Nittany Lion Inn. Dates and meeting rooms are Oct. 22, Ballroom D, and Dec. 3, Fireside Lounge. These meetings are open to all members of the University community. The committee also is trying to schedule two more meetings, one around the end of September or beginning of October, and the other around mid-November.

The committee hopes to have a final document prepared in time for the Faculty Senate to discuss in a forensic session in December and schedule a vote on it at its January 1997 meeting.

ing general education into courses, disciplines and departments."

— builds a continuous and dynamic kind of assessment and improvement program into the curricular process itself.

— emphasizes active learning and collaboration; and

— encourages a commitment to inquiry beyond the curriculum.

As he has done since the committee began its work early this year, Pangborn emphasized that the committee will be very open as it reviews the working document and prepares a final report.

The committee plans to distribute its working document widely and seek comment from undergraduate education administrators and faculty in the colleges. Also, committee members will fan out and discuss it with people in their own units or on their own campuses and seek input from students.

The committee believes the current definition and objectives of Penn State's general education program, with some updating and clarification, are still appropriate. It reached consensus over the summer on several principles on reshaping the program, including:

■ Penn State should move toward a competency approach that requires the development of proficiencies and the integration of skills and domain knowledge, not the accumulation of credits. There is a need to emphasize learning — not teaching, not curriculum, not courses, not credits.

■ Assessment should concentrate on process rather than outcomes and assess the opportunities for and quality of student learning.

■ The University must find ways to resolve the competing demands of flexibility and portability (regarding general education for different majors and colleges).

SATS

continued from page 1

The College Board, which administers the SAT process, will send the test results to institutions of each student's choice.

"This ranking is another indicator that Penn State is considered one of the most attractive institutions in higher education," President Graham B. Spanier, said. "Other good signs include the facts that the number of SAT score submissions to us increased by nearly 6,500 in one year, we have the largest dues-paying alumni association in the nation, we just finished another record-breaking private fund-raising year, and we rank second nationally in industry-sponsored research."

According to a state-specific 1996 profile from the College Board's New York headquarters, 30,398 college-bound Pennsylvanians scored, or 43.4 percent of those that sent scores to universities, chose Penn State as a recipient. The next most popular destination in the Commonwealth was Indiana University of Pennsylvania, which received 9,533 scores, while the University of Pittsburgh received 9,059, Temple University received 8,728, and Slippery Rock University received 6,456.

Although not all students who submit their SAT scores will be offered entrance to Penn State, seeing the scores gives admissions officers the opportunity to send further information to promising seniors that are already interested in the University.

■ A Penn State undergraduate education should inspire active learning and collaboration, and encourage a life of learning and discovery.

The committee's reworked mission statement emphasizes that effective general education should enable students to acquire knowledge by gathering critical information themselves (through computer-assisted searching as well as reading and listening), learn to communicate effectively, and collaborate with others in seeking and sharing knowledge as well as learn through independent work.

John Cahir, vice provost and dean of undergraduate education, said he feels extremely positive about the committee's working document and is looking forward to seeing its final report.

"We recognize that general education needs to support and respond to the needs of the individual academic colleges. It needs to protect the variety of courses, high level of student choice and high degree of mobility that are major strengths at Penn State," Cahir said. "At the same time, we want to emphasize the common elements of a Penn State undergraduate education. The Penn State education needs to embrace a substantial level of common skills and knowledge and also needs to allow a high level of 'portability' from major to major."

Survey

continued from page 1

Welch noted that the survey is too multifaceted to produce only a single response, report or policy. The results reflect both the University's strengths as well as opportunities for improvement. Among the major findings she mentioned were the positive feelings about Penn State shared by faculty and staff. Fifty eight percent of faculty who responded and 60 percent of staff said the University is "one of the best" or "an above average" place to work.

All responding groups rated the quality of job performance among the top three values and said that job performance has not been recognized enough by the University. Welch said, "Penn States

believe in merit and probably believe that the small average raises of the past several years have not been enough."

"Our faculty, compared to faculty members around the nation, are much more likely to feel that they are informed about what is going on and much more likely to say that relations between faculty and administrators are good," Welch said. "While this is an encouraging benchmark, we cannot be satisfied that around one-third of our faculty and staff report either poor communication or lack of respect."

Another problem area, "is that some parts of our staff do not understand or appreciate our research

and service missions, especially our research mission."

"While almost all faculty, administrators and staff say they value teaching and almost all faculty and administrators say they value research, only a slight majority of our staff say that they value research and only a slightly larger proportion value public service outside the University," she said.

"To have a significant proportion of our workforce not understanding one and, perhaps, two of our three major missions suggests that we are not communicating their importance very well."

LECTURES

Workshops to help tenure-track faculty

The Office for Minority Faculty Development is offering a series of workshops for tenure-track faculty who want to know more about the role of publishing in their careers, promotion and tenure, advice on advancing from associate to full professor, and how to find external funding for research. The workshops are open to all faculty at all locations.

The Spring Semester series will repeat several of the high-demand topics and will include a session on vita development.

Because the workshops are popular, reservations are required. Please call Mary Leone at (814) 863-1663 at least three days before the session.

Workshops this fall are:
■ Friday, Sept. 27: "Publishing—Mastering the Art," presented by Hector Flores, director of the Science, Technology and Society Program and professor of plant pathology and biotechnology; 2 to 5 p.m. in 114 Kern Building.

■ Saturday, Oct. 5: "Promotion and Tenure for Junior Faculty," presented by **Blannie Bowen**, senior faculty mentor and professor of agricultural and extension education; 9 a.m. to noon in 114 Kern Building.

■ Friday, Oct. 18: "Advancing from Associate to Full Professor," presented by **Grace Hampton**, professor and executive assistant to the provost for the development of the arts; **Murry Nelson**, professor of education and American studies; **C. Channa Reddy**, distinguished professor of veterinary science; and **James Stewart**, professor and vice provost for educational equity; 3 to 5 p.m. in Colonial Room 1 of the Nittany Lion Inn.

■ Saturday, Nov. 16: "External Funding," presented by **Robert Killoren**, director of Sponsored Programs; 9 a.m. to noon in 114 Kern Building.

Symposium to present ideas on new learning environments

A symposium focused on ideas and strategies for creating active, collaborative learning environments will be held Saturday, Oct. 5, from 9 a.m. to 4 p.m., in the Joab Thomas Classroom Building at University Park.

The symposium, free to Penn State faculty and staff, will begin with a keynote session featuring three Penn State faculty who transform learning through collaboration, group activities and innovative use of communication technologies. Concurrent sessions follow that expand on these strategies. Luncheon will feature optional roundtable discussions on faculty support for creating new learning environments. The afternoon will be devoted to workshops on problem-based learning, assessment, instructional design and using the World Wide Web as a learning environment or for course information. Faculty and staff may select which sessions and workshops they wish to attend.

The symposium is sponsored by the Center for Academic Computing, Center for Learning and Academic Technologies, Instructional

Development Program, Office of Undergraduate Education and Schreyer Institute for Innovation in Learning.

Some sessions planned for the daylong symposium include: "Communication Technologies for Course Design," by **David Passmore**; "Innovative Strategies for Collaboration in the Classroom," by **Charles Garofan**; "Designing, Collecting and Analyzing Student Data as Part of the Innovation Process," by **Diane Enerson**; "Strategic Use of the Web for Class Activities," by Center for Academic Computing staff.

To register, send e-mail to seminars@psu.edu.

For copies of the seminar guide or a symposium flier, call (814) 863-4356. Seating will be limited for some of the workshops. Preregistration is requested; however, you may register the day of the symposium at 8:30 a.m. in the lobby.

For more information, see the Web site <http://lets.ca.psu.edu/news/Findex.html> or contact **Karen Peters** at kmp138@psu.edu; or call (814) 863-7763.

Clogg Memorial keynote talk to address empirical study

Leo A. Goodman, the class of 1938 professor of statistics and sociology at the University of California at Berkeley, will deliver the first Clifford C. Clogg Memorial Lecture in Sociology and Statistics on Friday, Sept. 27, from 5:30 to 6:30 p.m. in Room 101 of the Thomas Building.

Among the most cited authors in the *Social Science Citation Index*, Goodman has had a major impact on research methods used in sociology and other areas of the social sciences.

His lecture, titled "The Empirical Study of Latent Types, Latent Variables and Latent Structures: An Introduction for the Untutored and Some Surprising New Results for the Enlightened," is the keynote address at the interdisciplinary Conference on Social Science and Statistics. The conference, which will be held at Penn State from Sept. 26 to 28, honors the

Leo A. Goodman

late Clifford C. Clogg, who was distinguished professor of sociology and professor of statistics at Penn State from 1979 to 1995. The keynote address by Goodman, a long-time mentor, colleague and friend of Clogg, is open to the public.

Goodman received his Ph.D. in mathematical statistics from Princeton University in 1950 and served as a faculty

member in the departments of statistics and sociology at the University of Chicago until 1986, when he joined the faculty of the University of California at Berkeley.

For additional information, call the Department of Statistics at (814) 865-1348. For information about registering for the Conference on Social Science and Statistics, contact the Office of Conferences and Institutes at (814) 863-5100.

Chemistry library head to speak on Oct. 2

Gary Wiggins, head of the Indiana University Chemistry Library, will be the featured speaker for the 1996 Lesh Lecture on Chemical Information. Wiggins will speak on "Current Trends in Chemical Information: Perspectives of an Academic Chemistry Librarian" at 3:30 to 4:30 p.m. Oct. 2, in Ballroom C of the Nittany Lion Inn on the University Park Campus.

The Indiana University Chemistry Library has long enjoyed a reputation as an early adopter of innovative chemical information services and products. The use of computers has accelerated dramatically in the last five years. Wiggins will focus on computer-based tools that have had the most significant impact to date and those that hold the most promise for revolutionary developments in the future.

Wiggins has served the American Chemical Society and its Division of Chemical Information, and chaired the Special Libraries Association Chemistry Division. He is the listowner of the popular CHIMIN-L (the Chemical Information Sources Discussion List).

Wiggins earned a bachelor's degree in chemistry, master's degrees in library science and Slavic languages and literature, and a doctoral degree in library and information science, all from Indiana University.

The Lesh Lecture is a series of lectures on scientific and chemical information made possible through the private support of Penn State alumna Dorothy Lesh and hosted by the University Libraries. A reception will immediately follow the lecture in Ballroom C.

Manufacturers' needs topic of forum

The "Needs of Pennsylvania Manufacturers" will be addressed during a noon presentation on Wednesday, Oct. 9, at the Penn State Downtown Center in Harrisburg.

Jack Gido, director of the Pennsylvania Technical Assistance Program (PENTAP) at University Park, will focus on the major findings of a recent survey of manufacturing firms in the Commonwealth

regarding their technical information, technical assistance and training needs.

The noon to 1:30 p.m. forum at the Downtown Center is free and a question-and-answer period will follow Gido's presentation, which is one of a series on public policy issues.

For information, call the Penn State Downtown Center at (717) 783-0433.

More Lectures

International linkages to be promoted at conference

The Pennsylvania Council for International Education (PACIE) will hold its 27th Annual Conference on Oct. 10-11, at the Nittany Lion Inn. The conference theme is "Promoting International Linkages: Models for the Year 2000," and will feature discussions on a variety of topics related to international education.

The keynote speaker on Thursday will be Jack Van de Water, dean of international education, Oregon State University. His topic will be "New Policies and New Partnerships: Looking to the Future."

Penn State contributions to the

conference include: "The Role of International Education in the Future Welfare of Education," chaired by Helen E. Caffrey, director of Commonwealth relations; "International Education Through Distance Education: A Live Demonstration," chaired by Gary Miller, assistant vice president for Distance Education; and an evening event with Penn State's International Dancers directed by Elizabeth Hanley, assistant professor of exercise and sport science.

For more information about the PACIE conference, call (215) 387-4055 or fax (215) 382-4716.

Talk topic is student aid and advising

"Student Aid: Should It Affect Academic Advising?" is the topic of the brown-bag advising lunch, from noon-1 p.m., Wednesday, Oct. 2, in 305 HUB at University Park. **Ro Nwanki**, student aid adviser, Office of Student Aid, will lead the discussion. All faculty and staff interested in academic advising issues may attend.

This is the first session in the

series of advising lunches initiated this semester. Sponsored by the Division of Undergraduate Studies (DUS), the series provides advisers with an opportunity for professional development and networking. DUS expects to continue this series during fall semester. For more information, contact Laura Brown, 205 Grange Building, at (814) 865-7576, or e-mail lsb1@oas.psu.edu.

Performance symposium planned

The Performance Art, Culture, Pedagogy Symposium, set for Nov. 13-16 at the Penn State Scanticon, will feature more than 40 of the nation's finest performance artists, critics, historians, educators and arts presenters.

According to Charles Graio, associate professor of art education, this is the first symposium of its kind to examine the historical, theoretical and experiential significance of performance art in order to distinguish its pedagogy as an emerging form of arts education. Approximately 300 educators nationwide are expected to participate in the symposium.

The comprehensive four-part program includes a performance series, a speaker series, a workshop series and a panel discussion series.

The performance series will open Wednesday, Nov. 13, and continue through Nov. 16.

The evening performances are open to the public and tickets go on sale Oct. 1. For ticket information call (814) 863-0255 or (800) 278-7849.

For a conference registration form or more information, call (800) PSU-TODAY or visit the Web page at <http://www.cde.psu.edu/csr/PACP.html>.

Development series begins Oct. 10

Penn State Harrisburg, in conjunction with the National University Teleconference Network, is offering a "Teacher's Workshop and Staff Development" series beginning Oct. 10.

Nationally acclaimed speakers will provide practical information and classroom strategies via tele-satellite communications. With the interactive workshop format, participants will have the opportunity to speak directly with the experts. Curriculum materials will be provided for these two-hour workshops, which will be held on Thursdays throughout the year.

The series kicks off Oct. 10 with "The Technology Possibilities," featuring a discussion on the one-computer classroom and Internet teaching in a 21st-century high school.

On Oct. 24, topics include: "Teach-

ers Moving Into Technology," "Why Be Nervous," "Preparing Teachers for Technology Using Distance Education Field-Trips" and "Technology Grant Writing for Teachers."

Other workshop topics include: "School Reform: What It Means for Teachers," "Discipline for At-Risk Kids," and "Multiple Intelligences: New Ways to Teach!"

All workshops will be held from 4 to 6 p.m. at the Educational Activities Building, Room 101, Penn State Harrisburg, 777 West Harrisburg Pike, Middletown, Pa. The individual fee for each workshop is \$25. If four or more participants register from one organization, a reduced total fee of \$85 per workshop will apply.

For more information, call Continuing Education at (717) 948-6505.

Obituaries

Plant pathology professor was 69

Paul E. Nelson, professor of plant pathology in the College of Agricultural Sciences, from Sept. 1, 1965, until his death Aug. 11. He was 69.

Nelson was a 1949 graduate of Fortson Junior College in Fullerton, Calif., with a degree in plant sciences. In 1951, he received his bachelor's degree and in 1955 he received his Ph.D. in plant pathology from the University of California at Berkeley. From 1955 to 1961, he was assistant professor; in 1961 he was named associate professor of plant pathology at Cornell University.

Named a professor at Penn State in 1965, he also served as the interim department head for the Department of Pathology from 1981-1982. He received the Faculty Scholar Medal for Outstanding Achievement in Life and Health Sciences in 1984 and the Alex and Jessie C. Black Award for Excellence in Research in 1992. He belonged to numerous professional organizations.

Professor emeritus of education was 81

John Withall, professor emeritus of education and educational psychology, died on Wednesday, July 31 in Florida. Withall was born on Oct. 12, 1914, in London. He received his bachelor's and master's degrees from Bishop's University in Quebec and his Ph.D. in 1948 from the University of Chicago.

Withall, who was a licensed psychologist, served as a public school teacher in Montreal and as a faculty member at Brooklyn College, the University of Wisconsin before coming to Penn State in 1964. He was head of the Department of Secondary Education from 1965-1969. He retired from the university with emeritus rank in 1980, but continued to teach courses until 1987. He had extensive experience working in international education projects, serving as executive secretary of the United States Educational Foundation in Karachi, Pakistan; overseas representative to the Peace Corps in Abidjan, Ivory Coast; and coordinator of the Educational Advancement Education Study and Adaptation Center at the University of Lagos in Nigeria.

Withall was the author of scores of articles in professional journals as well as chapters in publications such as the *Handbook of Research on Teaching* and the *Encyclopedia of Educational Research*. Among his proudest accomplishments was being awarded the first College of Education Teaching Award in 1977.

Deaths elsewhere

Naomi M. Bortel, assistantivist in the Research and Graduate School, from April 8, 1988, until her death July 31. She was 57.

Jack F. Hennessey, supervisor, Auxiliary Enterprises, at the Penn State

Abington-Ogontz Campus, from July 1, 1976, until his retirement July 1, 1993; died Aug. 2. He was 73.

Darlene N. Ilgen, dining hall supervisor, Housing and Food Services, from Sept. 1, 1964, until her retirement Feb. 16, 1980; died July 26 at the age of 76.

Bruno J. Martini, systems planning specialist in C&IS Management Services, from Nov. 1, 1959, until his retirement Jan. 1, 1992; died July 5 at the age of 60.

Dale Venoy Mauck, 79, a former maintenance worker at the University, died July 19 at the age of 79.

Elmer E. May, environmental health worker at The Hershey Medical Center, from April 6, 1970, until his retirement Oct. 1, 1982; died July 14. He was 75.

Robert J. McGlynn, an electrician at Penn State for 26 years until his retirement in 1991, died July 27. He was 67. McGlynn was a U.S. Air Force veteran of the Korean War, where he served as a colonel and was an airplane electrical mechanic. He founded McGlynn's Appliance Service in Tyrona, Pa., and operated it for 38 years.

Kathleen E. Nearhoff, 83, died July 21. She had been employed at Penn State for many years. She was a member of the University Bible Church in State College and a former member of the Warriors Mark Fire Company Ladies Auxiliary.

Maria E. Noss, linen room worker with Housing and Food Services, from April 1, 1956, until her retirement May 1, 1968; died July 6 at the age of 93.

Donald I. Pettigill, production assistant in the bakery, Housing and Food Services, from Aug. 22, 1938, until his retirement Sept. 1, 1973; died Aug. 16 at the age of 80.

Preston R. Robb, accountant for HUB Food Services, Housing and Food Services, from Sept. 9, 1951, until his retirement June 30, 1981; died Aug. 16. He was 78.

Nancy C. Rose, a former food service worker, died July 22 at the age of 92. She was a Gold Star Mother, a special designation for those whose children died while serving in the military in World War II. She is survived by two daughters, four sons, two sisters, two brothers, 27 grandchildren, 26 great grandchildren and one great-great grandchild.

David W. Russell, professor of education in the College of Education, from Sept. 1, 1949, until his retirement Oct. 1, 1968; died Aug. 9. He was 93.

Mark A. Van Slyke, assistant professor of radiology at The Hershey Medical Center, from Aug. 1, 1993, until his death Aug. 16. He was 39.

Doris E. Whitman, senior clerk, Penn State Harrisburg, from Sept. 1, 1966, to Oct. 1, 1986; died June 17. He was 71.

Quality month

In recognition of October as National Quality Month, several special quality programs are scheduled during October:

■ **The ASQC Quality Forum XII**—Quality 1 on 1: A New Game Plan, a live satellite broadcast, will feature speakers from Hewlett-Packard, SAS Institute, Rail Canada, NASA and 3M, among others. The Forum is scheduled from 1-3:35 p.m. on Thursday, Oct. 3. The University Park download will be at The Penn State Scantron. Cost is \$15 per person. To register, contact Sue DeArmitt, 118 Keller Bldg., at (814) 863-0229, or e-mail smnd@cdc.psu.edu by Sept. 25.

■ **Warren Alpaugh** from IBM and **Bob George** from DuPont will share their experiences and insights in a seminar from 8:30-10 a.m. on Thursday, Oct. 10, in the Mount Nittany Room of the Nittany Lion Inn.

■ A panel will explore specific Penn State examples where CQI is being used to improve academic processes, both in and out of the classroom. Panelists are: **Bill Engelbreit**, associate professor of accounting, Altoona; **Linda Null**, assistant professor of computer science, Harrisburg; **Ed Reutzel**, associate professor of management science, University Park; and **Fred Eisele**, professor and head, Department of Health Policy and Administration, moderator. The panel will be held from 3:30-5 p.m. in 106 Mitchell Building on Thursday, Oct. 17 and also will be available to locations via interactive compressed video (PictureTel).

■ Utilizing Continuous Quality Improvement in Education and Training, featuring **Philip Crosby** and **Bob Cornesky**, is scheduled for Oct. 22 and 23 at The Penn State Scantron. Crosby, founder of the world's largest quality management education company, will have afternoon and evening presentations on Oct. 22 on the philosophy, history and practice of quality management. Cornesky, one of the first educators to introduce quality management ideas into college and university administrations and classrooms, will have presentations all day Oct. 23 on quality in the academic community. More information is available on the Web at <http://www.cdc.psu.edu/CQI/CQI Classroom/> and from the Center for Quality and Planning. Cost is based on the programs for which you register. For registration information, contact Kristin Owens at (814) 863-5140.

News in Brief

Great Insect Fair here again

It's time again to learn about those creepy, crawly creatures of the insect world. You can experience haute insect cuisine at the fourth annual Great Insect Fair on Sept. 21 from 10 a.m. to 4 p.m. in and around the Agricultural Sciences and Industries Building.

The fair, held to showcase the diversity and beauty of insects, will include an Insect Deli and samples of culinary curiosities made from bugs. Another highlight of this year's event is "Dancin' with the Honeybees," a program presented by master beekeeper and educator **Cliff Sunflower**. Using storytelling, poetry, prose, music and dance, Sunflower transforms the audience into a working beehive to illustrate its complexity. "Dancin' with the Honeybees" will be presented at 11 a.m. and 2 p.m. in 101 ASI.

In addition, several activities designed specifically for children are planned and displays of insect collections can also be viewed. Visitors can tour the Frost Entomological Museum, pick a winner at the Cockroach Races or watch the parade of insects at 12:30 and 3:30 p.m.

For more information about the event, contact The Department of Entomology at (814) 865-1895.

"Depressed" people needed

Most people feel depressed at some time or another in their life, but some experience major depression. A study designed to help people with this problem currently is being conducted. You may be experiencing major depression if you:

- Feel depressed most of the day, nearly every day;
- Experience a marked decrease of interest and pleasure in almost all activities;
- Feel fatigue or loss of energy most of the day;
- Feel worthless or excessive guilt; or
- Feel a decreased ability to think or concentrate.

If you believe you are experiencing major depression and would like to be considered for a study being conducted by the Department of Psychology, please call **Charles Hines** at (814) 863-4833.

Subjects (ages 18-55) included in the study will receive 12 to 20 free sessions of individual psychotherapy, either immediately after being assessed for depression or 12 to 20 weeks later. Subjects also will be asked to complete various questionnaires during and after treatment. A brief telephone interview will help with a preliminary determination of the suitability of this treatment for you. If you cannot be included in this treatment, alternate referral suggestions will be made. Strictest confidentiality is maintained.

New Programs at the McCoy Natatorium

Several new aquatic programs are beginning this fall at the McCoy Natatorium and White Building pools on the University Park Campus. They include instruction in springboard diving, competitive swimming, a stroke analysis and refinement clinic for competitive swimmers and aquazone.

Call the McCoy Natatorium for details, including fees and schedules, at 865-1432 or 865-1433, or fax 865-3728.

What's Up?

Penn States everywhere can now keep up-to-date on diversity events at University Park, thanks to the new Diversity Calendar on the World Wide Web. Just click on the "diversity" button on Penn State's home page (<http://www.psu.edu>) or go directly to the page at <http://www.psu.edu/80/staff/diversity/cal.html>.

Marc B. Levey, senior diversity planning analyst, is managing the calendar. He wants to hear from all faculty, staff and students who are planning workshops, exhibits, lectures, meetings and other events open to the community that add to the multicultural life of campus.

The calendar, which lists events in the current month, changes periodically as new events arise. More to be

sure your event is listed, send Levey the time, date, place, name or brief description of the event and the sponsoring organization by e-mail the seventh day of the month before the event is to take place. His e-mail address is mlb1@psu.edu.

If you would like to talk to Levey about the calendar, please call him at (814) 863-2994.

Commencement schedule

The commencement schedule for University Park for the 1996-97 academic year is as follows:

FALL SEMESTER 1996

Sunday, Dec. 15—Undergraduate and associate degree at 1 p.m. in The Bryce Jordan Center; and The Graduate School at 4 p.m., Eisenhower Auditorium.

SPRING SEMESTER 1997

Friday, May 16, 1997—University Scholars at 2 p.m., Eisenhower Auditorium; The Graduate School at 5 p.m., Eisenhower Auditorium; ROTC commissioning at 3 p.m., Schwab Auditorium; College of Education at 8 p.m., Eisenhower; College of the Liberal Arts at 8 p.m. in The Bryce Jordan Center; and

Saturday, May 17, 1997—Eberly College of Science at 9 a.m., Bryce Jordan Center; College of Agricultural Sciences at 9 a.m., Eisenhower Auditorium; College of Health and Human Development at noon, Bryce Jordan Center; College of Arts and Architecture at noon, Eisenhower Auditorium; College of Engineering at 3 p.m., Bryce Jordan Center; College of Communications at 3 p.m., Eisenhower Auditorium; The Smell College of Business Administration at 6:30 p.m. in The Bryce Jordan Center; and the College of Earth and Mineral Sciences at 6:30 p.m., Eisenhower Auditorium.

SUMMER SESSION 1997

Saturday, Aug. 16, 1997—Undergraduate and associate degree at 10:30 a.m., Bryce Jordan Center; and the Graduate School at 2 p.m., Eisenhower Auditorium.

Toastmasters meet

The Happy Valley Toastmasters will meet at noon on the following days in room 310 Shields Building: Oct. 8 and 22; Nov. 12 and 26. For more information, call **David Panko** at 237-2822.

Call for volunteers

W. Larry Kenney at the Noll Physiological Research Center is recruiting male volunteers for a research study investigating how blood flow is distributed in the body during heat stress, and why older individuals are more susceptible to heat-related illness.

Participants will earn money and obtain a free medical screening, exercise test and body composition analysis.

Volunteers should be healthy, non-smokers age 60 to 85 and not currently taking any medications.

For more information, call **Christopher Minson** or **Stacey Wladowski** at (814) 863-2948.

Christian fellowship

The Penn State Christian Faculty/Staff Fellowship holds weekly Lunch Fellowship Meetings every Thursday from noon to 1 p.m. in room 307 HUB. All Christian faculty and staff are welcome to attend. For more information, contact **John Gimbal** at (814) 863-2739 or jgimbal@psu.edu. Or, you can visit their Web site at <http://lhcac.psu.edu/~jmc6/CFSF/cfsfhome.html>.

Lion moving

The 140-year-old stuffed and mounted mountain lion—recently returned to Penn State after a 40-year sojourn at the Carnegie Museum in Pittsburgh—will be introduced to its new temporary residence at 11 a.m. Tuesday, Sept. 24, in the Reserve Reading Room lobby of West Pattee Library.

Now dubbed "The Original Nittany Lion," the specimen will find a permanent, state-of-the-art home at the main entrance of Pattee following completion of the Paterno Library. The lion was recently restored and is said to be the state's only native mountain lion from its original and now-extinct population.

Holy day

Freshman Larry Kreger, a member of the Hillel Foundation of Jewish Campus Life, blows a shofar in front of Eisenhower Chapel on the University Park Campus. The shofar, a ram's horn, is blown to celebrate Rosh Hashana, the Jewish New Year, which was Sept. 14. Services will be held on the University Park Campus for Yom Kippur, the Day of Atonement, at 7:30 p.m. Sept. 22 and at 9:30 a.m. and 4:30 p.m. Sept. 23 in the HUB Ballroom. There are an estimated 3,500 to 3,800 Jewish students at University Park.

Photo: Greg Grieco

Faculty/Staff Alerts

Reorganization

The Office of Business Services has reorganized its operations within the Hostetter Business Services Building on the University Park Campus to better support the needs of the University community. The Printing, Copy Centers, Copyright, Addressing and Mailing departments have collectively been renamed the department of "Document Services."

The main entrance to the building, on the right, now serves as the central point of contact for customers of Addressing and Mailing Services in addition to Printing and Copy Centers. A team of customer service representatives is available to handle orders, field inquiries and provide start-to-finish project coordination. The accounts payable/receivable personnel have also been combined in order to offer itemized, consolidated billing of Addressing, Mailing, Copy Centers and Printing jobs. The prepress and design areas will now have responsibility for all electronic file preparation and file manage-

ment including personalization and addressing list verification. For more information, call Document Services at (814) 865-7544.

Commission on Racial/Ethnic Diversity meeting dates

The following is a list of meeting dates for the Commission on Racial/Ethnic Diversity for 1996-97. All meetings, which begin at 12:30 p.m. and end at 2:30 p.m. in room 404 Old Main, are open to the public:

- Friday, Oct. 18
- Wednesday, Nov. 13
- Friday, Dec. 13
- Thursday, Jan. 23, 1997
- Friday, Feb. 21, 1997
- Thursday, March 20, 1997
- Friday, April 18, 1997
- Thursday, May 22, 1997
- Friday, June 6, 1997

Several projects planned for annual Day of Caring

University employees are encouraged to participate in work projects for United Way agencies and other non-profit organizations throughout Centre County on Thursday, Oct. 3, during the third annual PNC Bank — United Way Day of Caring.

Last year, almost 4,500 local volunteers, including several hundred members of the University community — ranging from administrators to student groups — took a vacation day off work or school to help the agencies.

Volunteers built, repaired, painted and landscaped at more than 100 projects, including creation of an athletic field at the State College YMCA, a nature center in Penns Valley, a roof at Moshannon Valley YMCA and a storage shed at the Second Mile.

At the Infant Evaluation Center in State College, a crew of some 30 Penn Staters from the Division of Development and Alumni Relations and nearly 25 employees of Corning Asahi Video Products Co. of State College erected a playground unit, picnic tables and a chain link fence.

"It was a very worthwhile vacation day," George Moellenbrock, director of corporate and foundation relations, said. "We had a lot of very enthusiastic people involved. Our crew concentrated on the playground unit, while the Corning group did the fencing."

"All in all, it was a great experience and a real morale booster. Everyone seemed to feel good about it."

The number of projects and agencies involved in this year's Day of Caring is expected to increase.

"The community spirit behind this event keeps growing and growing," Gerald F. Russell, Day of Caring co-chairman, said. "We anticipate that

the event will continue to grow and that the size, scope and number of projects will increase."

Projects scheduled this year include:

Painting at Counseling Service, YMCA and the Youth Center in Bellefonte; a variety of painting, construction and repair projects at the Infant Evaluation Service, Strawberry Fields, Women's Resource Center, Temporary Housing, YMCA, Easter Seals, Association of Retarded Persons, Skills, Inc., Youth Center — Stormbreak, Food Bank, Sight Loss Support Group and Wellspring, all in State College; painting at the Philipburg YMCA and weatherproofing buildings at the Hemlock Jr. Scouts in Petersburg.

Also scheduled is work at Walnut Spring Park and Lederer Park in State College and general field maintenance at four Little League baseball fields in State College.

The day's agenda calls for volunteers to meet in the morning at Beaver Stadium for registration, distribution of Day of Caring T-shirts and a pancake breakfast provided by Penn State Intercollegiate Athletics; work throughout the day, with lunch included; meet at the State College Elks Country Club in Boalsburg in late afternoon for an event celebration.

Individuals and groups from the University community who are willing to take a vacation day to participate in the event can contact the Centre County United Way at 238-8283 for volunteer information and a complete listing of projects.

GURU updates

In light of the scheduled elimination of the EMC2 mail system in July 1997 and the increased use of GURU, Systems and Procedures will no longer support its SYS/PRO-NEWS bulletin board under EMC2 effective Oct. 1. Information from the EMC2 bulletin board is available in "current news" in GURU.

GURU also enables users to order paper forms supplied at no charge by Systems and Procedures (and not available via Form on Demand) using a new online form order system. Access to this order system can be found on the General Forms Usage Guide — Forms Table of Contents page in GURU. To go there directly, point your browser to <http://guru.sp.psu.edu/formordr/gurord2.html>.

The ARTS

AT PENN STATE

"Romeo and Juliet"

The Hawthorth Shakespeare Festival version of "Romeo and Juliet" opens the Center for the Performing Arts 1996-97 season at 8 p.m. Saturday, Sept. 21, in Eisenhower Auditorium on the University Park Campus. The Center for the Performing Arts is a program of the College of Arts and Architecture.

While not a word of the original play has been changed, this vibrant version places "Romeo and Juliet" in modern South Africa. The timelessness of Shakespeare's words unfold in a story of intertribal strife, rebellion and young love. The production features leading actors from the Royal Shakespeare Company and the National Theatre of Great Britain.

Tickets are \$23.50 for non-students; \$19.50 for students. For tickets or more information, contact the Arts Ticket Center, open Monday through Friday, 8:30 a.m. to 4:30 p.m., at (814) 863-0255. Outside the local calling area, phone (800) 278-7849.

Playwright coming

Celebrated American playwright John Pielmeier will visit the University Park Campus today through Sunday, Sept. 22, when he will give a performance of his one-man play "Will: An Evening of Wilderness and Spirit."

Pielmeier, who holds a bachelor's degree in acting and playwriting from the Catholic University of America, received an MFA from Penn State in 1978.

Pielmeier is best known for his play "Agnes of God," which premiered in 1979 at the National Playwrights Conference. "Agnes of God" ran on Broadway for 17 months and garnered Tony Award nominations for actresses Geraldine Page and Amanda Plummer. The play was also made into a major motion picture starring Jane Fonda, Annie Bancroft and Meg Tilly.

Other well-known works by Pielmeier include "Sleight of Hand," "The Boys of Winter," "Choices of the Heart" (a television movie based on the playing of American missionaries in El Salvador), and "Courage," a one-man show on the life of J.M. Barrie. On Oct. 14 his latest play, "Voices in the Dark," will open at the Promenade Theater in New York.

Pielmeier's visit to Penn State is part of the Institute for the Arts and Humanistic Studies 30th Anniversary

Fusion art

The work of Shalom Noiman, a fusion of painting and sculpture, is on display at the Hetzel Union Building Browning Gallery on the University Park Campus through Oct. 20.

celebration. In addition to undergraduate and graduate workshops in acting and directing, Pielmeier will be giving his one-man performance at 5 p.m. Sept. 22 at the Playhouse Theatre. There is no admission fee for the play, which is open to the public. Ticket reservations may be made by calling the institute at (814) 865-0495. Any remaining tickets will be distributed at the box office, Playhouse Theatre a half-hour before the performance.

Wunderbrass trio to perform for Bach's Lunch

Wunderbrass, a French horn, trombone and tuba trio, will perform for the Bach's Lunch concert at 12:10 p.m. Thursday, Sept. 26, in the Helen Eakin Eisenhower Chapel on the University Park Campus. The 20-minute concert is sponsored by the College of Arts and Architecture School of Music and the University Lutheran Parish.

The trio consists of Kim Reese,

French horn; Tim McKay, trombone; and Jason Byrnes, tuba. The performers are graduate teaching assistants in the School of Music. The concert is free to the public. Audience members may take their own bag lunches to eat after the concert in the Roy and Agnes Wilkinson Lounge. Coffee and tea will be provided.

Saturday art school

The College of Arts and Architecture School of Visual Arts will offer Saturday morning art classes beginning Saturday, Sept. 28, on the University Park Campus. The program, now in its fifth decade as a central Pennsylvania community service, is open to children ages 5 to 12.

Advance registration in any of the seven new courses is being accepted at (814) 865-6570 from 9 a.m. until 4 p.m. Monday through Friday. Courses are available on a first-come, first-served basis. The only cost involved in the program is a materials fee.

All courses are planned around a central theme: "A Place for Everyone: Art as Commentary." Students in the Saturday Morning Art School have the opportunity to learn how to expand their visual/verbal language.

Beginning sessions open Saturday, Sept. 28, in the Patterson Building Gallery. Courses continue each Saturday through Dec. 7 in the Visual Arts Building, Patterson Building and the Arts Cottage.

Photo exhibit at the HUB

The HUB's research and scholarship areas will display the photography exhibit, "Pennsylvania's Great Treasure: The Capitol Building," by Ed Simmons through Sept. 29.

The exhibit features 14 color images by Simmons of West Chester, Pa. The exhibit will travel throughout Pennsylvania and is brought to Penn State through state Rep. Lynn Herman.

The HUB's research and scholarship areas are located on the first floor of the Hetzel Union Building on the University Park Campus, and are open during all HUB operating hours.

Community Arts Center

The Community Arts Center in Williamsport, part of Penn College, will be the site of the following upcoming performances this season:

- **Singer Tiro Amos** at 7:30 p.m. on Oct. 5; all seats are \$27;
- **"Autumn Fanfare,"** presented by the Williamsport Symphony Orchestra, 7:30 p.m. on Oct. 15; tickets are \$35/\$30/\$24/\$19/\$16/\$12;
- **"Love Letters"** at 7:30 p.m. on Oct. 23; tickets are \$32.50/\$25/\$21.50/\$15.50;
- **"The Sound of Music"** at 3 p.m. on Nov. 3; tickets are \$40.50/\$33/\$25.50/\$20.50;
- **"Mame"** at 7:30 p.m. on Nov. 21; tickets are \$33/\$25.50/\$20.50;
- **Christmas Show LIVE** on Nov. 29 at 8 p.m.;
- **"A Christmas Carol"** at 7:30 p.m. on Nov. 30;
- **"Baroque Holiday,"** presented by the Williamsport Symphony Orchestra, at 7:30 p.m. on Dec. 3; tickets are \$35/\$30/\$24/\$19/\$16/\$12;
- **Winter Solstice Concert** on Dec. 4 at 7:30 p.m.; tickets are \$18.50/\$16.50/\$14.50;
- **The Nutcracker,** presented by the Williamsport Civic Ballet, on Dec. 7 at 7:30 p.m. and 4 p.m. on Dec. 8; tickets are \$25.50/\$20.50/\$15.50/\$10.50;
- **"Here's Love"** at 7:30 p.m. Dec. 11 and 12; and
- **La Bohème** (New York City Opera) on Jan. 15 at 7:30 p.m.; tickets \$35.50/\$25.50/\$18.50.

For more information on the rest of the season or for tickets, call the center at (717) 326-2424 or (800) 432-9382, Monday through Friday, 10 a.m. to 5 p.m.; and Saturday from 11 a.m. to 2 p.m.

Exhibit at Kern

Kern Exhibition Area on the University Park campus will display the exhibit "Happy Feet," from The Pennsylvania Dance Theatre auction through Oct. 13.

"Happy Feet" is shoe art. The shoes, donated by Art and Nancy Fine of Bare Foot in State College and several individuals, were decorated at the HUB Center for Arts & Crafts under the guidance of Isabel Farrell.

The Kern Exhibition Area is on the first floor in Kern Graduate Building. Hours are 8 a.m. to 11 p.m. Monday through Friday; 10 a.m. to 11 p.m. Saturday; and noon to 11 p.m. Sunday.

The exhibit is free to the public.

Country music in Williamsport

Sell-out country star Sammy Kershaw will perform at the Community Arts Center in Williamsport, a part of the Pennsylvania College of Technology, at 7:30 p.m. Thursday, Oct. 24.

Kershaw has had a number of hit singles and albums, including 1991's "Don't Go Near the Water" and its follow-up LP "Haunted Heart." Tickets are \$18.50/\$15.50/\$12.50. For more information, call the arts center at (800) 432-9382.

UNIVERSITY PARK CALENDAR

SPECIAL EVENTS

Thursday, September 19
School of Music, 12:10-12:30 p.m., Eisenhower Chapel, Bach's Lunch Concert.
School of Music, 8 p.m., Recital Hall, Norman Spivey/Robert Hatten.

■ Hillel, 6:30 p.m., Lipcon Auditorium. Film: The Last Seven Months of Anne Frank.

Friday, September 20
Gallery Talk, 2 p.m., Christoffers Lobby, Patrick McGrady on "Some Thoughts on the Steidle Collection."

Geography, 3:30 p.m., 206 Walker, Robert O'Connor on "So What if We Are All Environmentalists? The Political and Behavioral Fallout."

Thursday, September 21
Zoller Gallery, Playhouse Theatre, Palmer Museum of Art, Penn State Scanticon. "Institute for the Arts and Humanistic Studies 30th Anniversary Celebration."

■ Center for the Performing Arts, 8 p.m., Eisenhower Auditorium. Romeo and Juliet.

Sunday, September 22
Zoller Gallery, Playhouse Theatre, Palmer Museum of Art, Penn State Scanticon. "Institute for the Arts and Humanistic Studies 30th Anniversary Celebration."

Monday, September 23
Yom Kippur.

Thursday, September 26
School of Music, 12:10-12:30 p.m., Eisenhower Chapel, Bach's Lunch Concert: Wunderbrass Trio.

Center for the Performing Arts, 8 p.m., Schwab. Sanford Sylvan and David Brethman.

Friday, September 27
■ Gallery Talk, 2 p.m., Christoffers Lobby, Mary F. Linda on "The Gods Must Be Hungry."

SEMINARS

Thursday, September 19
Gravity Center, 11:30 a.m., 339 Davey Lab, John Baker on "Collisions of Boosted Spinning Black Holes in the Close-Slow Approximation."

Centre County Ministerial Association and the Center for Ethics and Religious Affairs, 7:30 p.m., Eisenhower, Anthony Campolo on "Is Jesus a Republican or a Democrat?"

Ceramics, 11 a.m., Steidle, Ahmad Safari on "Designing, Prototyping and Manufacturing of Composite Materials."

Graduate Program in Nutrition, 4 p.m.-5:30 p.m., HUB Assembly Room, Gregory D. Miller on "Calcium and Osteoporosis."

Friday, September 20
Economics, 3:30 p.m., 420 Kern Graduate Building, Kaushik Basu on "The Economics of Child Labor."

Philosophy, 4 p.m., 124 Sparks, John E. Smith on "Hacking's Insight into the Individual and the State."

Graduate Program in Nutrition, 11 a.m.-12:30 p.m., HUB Assembly Room, Scott M. Smith on "Extended Duration Space Flight: Nutritional and Physiological Implications."

Monday, September 23
Physics, 3:30 p.m., 339 Davey, Susan Ferrel-McKinstry on "Size Effects in Teroelectric Actuator Materials."

Gravity Center, 2 p.m., 339 Davey, Donald Malt on "Comments on Entropy of Stringy Black Holes."

Exhibit

Traditional Zulu baskets from South Africa will be on display at the Paul Robeson Cultural Center from Sept. 23 through Oct. 28. These three baskets are from the collection of alumnus Hade Khan. The gallery is open 8 a.m. to 10 p.m. Monday through Friday.

Photo: Greg Greco

Tuesday, September 24
Geosciences, 4 p.m., 112 Walker, Lou Derry, Graduate Program in Nutrition, 4 p.m., 110 Wartick, Dale Rossmo on "Obesity Research on the Fast Track."

Physics, 3:30 p.m., 339 Davey, J. Bartels. ■ Archaeological Institute of America, 8 p.m., 112 Kern, David Anthony on "The Earliest Horseback Riders and Charioteers: Evidence from the Steppes."

Wednesday, September 25
Gerontology, noon-1 p.m., 101 HHD, Toni Miles on "Genetic Influences on Elders' Disability: An Analysis of African-American Twins."

Thursday, September 26
Physics, 3:30 p.m., 101 Osmond, Jay Patel on "The Role of Tunable Optical Resonators in Science and Engineering."

Gravity Center, 11:30 a.m., 339 Davey, Abhay Ashtekar on "Probing Semi-Classical States in Quantum Gravity."

Department of Food Science, 4 p.m., 117 Bordland, Ed Mills on "High temperature packaging to prevent lipid oxidation."

Ceramics, 11 a.m., Steidle, Gerbrand Ceder on "First-Principles Calculations and Computational Experiments in Oxides."

Friday, September 27
Philosophy, 4 p.m., 124 Sparks, Jay Lambert, Derrick Calandrella and Kym MacLaren on "Synthesis and Backwards Reference in Husserl's Logical Investigations."

Geography, 3:30 p.m., 206 Walker, Deryck Holdsworth on "Downtown Offices in the Transition to Corporate Capitalism: Insights from Buffalo, N.Y."

Sunday, September 29
■ Palmer Museum of Art, 9 p.m., Lipcon Auditorium, Vidya Dehejia and Arthur M.

Sackler on "When God Has a Bedroom: South Indian Temples and Festival Bronzes."

EXHIBITS

Palmer Museum
"Selections of Contemporary Art from the 'Pincus Collection,' through Dec. 15.

"The Wood Engravings of Warren Mark," through Jan. 5, 1997.

■ "Cooking for the Gods: The Art of Home Ritual in Bengal," through Dec. 8.

"When Coal Was King: Paintings from the Steidle Collection, College of Earth and Mineral Sciences," through Dec. 8.

"BFA Exhibition," through Oct. 19.

Kern Exhibition Area
"Lewis, Untangling Strings," Robert Vander Voort.

The poetry of Ian Stainton, Sept. 17 through Oct. 13.

"Happy Feet," The Pennsylvania Dance Theatre, through Oct. 13.

"Art on the Move: The paintings of Marjot Kauhanen-Katz," through Oct. 16.

The HUB Formal Gallery
"Geography of the Unconscious," Nancy Moore.

Through Oct. 19.

The HUB Working Gallery
■ The brow of Shalom Norman, through Oct. 20.

The HUB Art Gallery
The watercolors of Dorothy Grebos, through Oct. 13.

Shaker-style boxes by Steve Strouse, through Oct. 13.

The HUB Research and Scholarship Area
"Pennsylvania's Great Treasure: The Capitol Building," Ed Simmons. Through Sept. 29.

■ Reflects an international perspective

BRYCE JORDAN CENTER

Phish coming

The improvisational rock act Phish will appear at The Bryce Jordan Center at 7:30 p.m. Thursday, Oct. 17. Tickets are \$22.50 for reserved seating and are available at The Bryce Jordan Ticket Center, selected Uni-Marts, Penn State campus outlets in Altoona, Erie, Hazleton and Reading, or by calling (814) 865-5555, or toll free at (800) 863-3336.

"Billy Breathes" is the latest project from Phish. The album is due Oct. 15 from Elektra.

Upcoming events

■ Sept. 21: Ozzy Osbourne, with guests DANZIG, Sepultura and Prong, 7 p.m.; tickets \$23 in advance, \$25 day of show (all seats reserved).

■ Sept. 24: WWF (TV Shoot), 7 p.m.; tickets \$18/\$14/\$10.

■ Sept. 28: Carman Ministries, 7 p.m.; free.

■ Oct. 1: David Copperfield, 5:30 and 8:30 p.m.; tickets \$39.50/\$29.50/\$23.50 (all seats reserved).

■ Oct. 4: Royal Lipizzaner Stallions, 8 p.m.; tickets \$14.50 for adults; \$12.50 for children 12 & under and senior citizens. Limited Gold Circle seating is available for \$17.50 (all seats reserved).

■ Oct. 7: Dave Matthews Band with special guest Boxing Gandhi, 7:30 p.m.; tickets \$22.50 (reserved seating).

■ Oct. 12: Penn State Tailgate Party, four hours before kickoff; tickets \$15 for adults; \$10 for children 12 and under.

■ Oct. 13: NBA Preseason, Atlanta Hawks vs. L.A. Clippers, 7 p.m.; tickets \$19.50/\$15.50/\$9.50.

■ Oct. 19: Penn State Tailgate Party, four hours before kickoff; \$10 for children 12 and under.

■ Nov. 2: Penn State Tailgate Party, four hours before kickoff; \$10 for children 12 and under.

■ Nov. 9: WYNNONNA with special guest Ty Herndon, time and tickets to be announced.

■ Nov. 23: Penn State Tailgate Party, four hours before kickoff; tickets \$15 for adults; \$10 for children 12 and under.

For a listing of sporting events to be held at The Bryce Jordan Center, or for more information on any event listed here, call the center at (814) 865-5555 or visit the Web site at <http://www.bjc.psu.edu/>

Lazy days

Sophomore Victoria Hyun took advantage of a break between classes to catch up on her sleep under a tree on the Old Main Lawn on the University Park Campus. It won't be long before the weather forces her indoors for her afternoon naps.

Penn Staters

Sohail Anwar served as an invited professor at IUT Bethune, France. Sohail participated in lecture, lab and tutorial sessions on the topics of programmable logic controllers, microprocessors and electrical machines.

Robert Brooks, associate professor of wildlife ecology, received the 1996 Teaching Award for Merit from the National Association of Colleges and Teachers of Agriculture for "meritorious service to education."

Daniel W. Conway, associate professor of philosophy, chaired a workshop on "Moral Perfectionism" at the 1996 conference of the International Society for the Study of European Ideas, in Utrecht, The Netherlands. Conway also presented two papers titled "Fool's Gold? Moral Perfectionism and the Noble Lie" and "Autobiography as Auto da fe."

Kenneth J. Fisher, associate professor of engineering at Penn State Erie, The Behrend College, has been elected a Fellow of the American Society of Mechanical Engineering.

Mary M. Gergen, associate professor of psychology and women's studies at the Penn State Delaware County Campus, gave an invited lecture, "Discourses of Danger, and the Gendered Economy of Fear," at the Discourse and the Construction of Knowledge Conference, Adelaide, Australia, and also at the International Conference on Sociolinguistics, University of Evora, Portugal.

Amy K. Glasmeier, professor of regional planning and geography and senior scientist in the Graduate School of Public Policy and Administration, has been named by the Appalachian Regional Commission to serve as its John D. Whisman Appalachian Scholar for 1996-97. Glasmeier will conduct original research on a number of economic development issues affecting the 13-state Appalachian region. She will also serve as principal adviser to the commission on a broad range of new and ongoing scholarly research questions.

Drew Hyman and **Mollie Van Loon**, from the

Department of Agricultural Economics and Rural Sociology, presented a paper at the 26th International Conference of the Community Development Society in Melbourne, Australia. Based on research in Pennsylvania, the paper, "Leadership Self-Efficacy, Perceptions of Power Structures and Community Participation: An Interactionist Hypothesis," examined the relationship of psychological, sociological and political variables.

Frederick D. Loomis, director of administration for Continuing and Distance Education, has received the 1996 Margaret and Leo Goodman-Malamuth Award for his dissertation "State Policy and Planning Systems: Responses to the Mandate to Desegregate Higher Education in Virginia and South Carolina."

The annual award is presented by the American Association of University Administrators Foundation.

Virginia Mansfield-Richardson, associate professor of communications, has been elected vice president of the Chinese Communication Association. The Chinese Communication Association is an international consortium of scholars of Chinese language.

Donald M. McKinstry, associate professor of biology at Penn State Erie, The Behrend College, presented a paper titled "Toxicity in Colubrid Snakes of the World: Selected Findings from the Literature" at the 12th Annual Scientific Meeting of the Wilderness Medical Society in Kananaskis, Alberta, Canada.

Jan Scholl, associate professor of agricultural and extension education, received the Distinguished Service Award from the National Extension Association of Family and Consumer Services. The award recognizes excellence in programming at the state level.

Chester L. Wolford, professor of English and business at Penn State Erie, The Behrend College, was awarded a Sasakawa Fellowship to attend the National Faculty Development Institute on "Incorporating Japanese Studies into the Undergraduate Curriculum."

Promotions

Staff

Robert Asch, associate director II in Division of Development and Alumni Relations.
Lisa A. Baker, staff assistant VI in Applied Research Laboratory.

Mary M. Ban, coordinator, CDM, at The Hershey Medical Center.
Steven L. Barber, senior technical specialist in Research and Graduate School.

Diane J. Baronak, staff assistant VII in Research and Graduate School.

Robert A. Becker, project coordinator II in Office of Physical Plant.

Kimberly J. Boyer, CADD operator/project coordinator at The Hershey Medical Center.

Sherry A. Brennan, senior research coordinator in Division of Development and Alumni Relations.

Lynda M. Brockmeyer, staff assistant IV at Penn State Abington Ogontz Campus.

Paula M. Brown, staff assistant VI in College of the Liberal Arts.

Sharon Bywater, staff assistant VI in Division of Development and Alumni Relations.

Jean E. Brooks, staff assistant VIII in College of Health and Human Development.

Bruce A. Cash, coordinator, Network Support, at The Hershey Medical Center.

Andrea D. Christopher, director, student affairs II at the Penn State Mont Alto Campus.

Gregory J. Clemmer, drafter/designer electro-mechanical in Applied Research Laboratory.

Kimberly A. Colpetzer, library assistant II in Research and Graduate School.

Denise C. Connelly, staff assistant VI in College of Agricultural Sciences.

Nancy F. Crabb, manager, publications/public relations, at the Penn State Great Valley Campus.

Linda R. Cranston, coordinator, Outpatient Billing & Registration, at The Hershey Medical Center.

Shirley Davis, alumni & development specialist in University Libraries.

Elizabeth Day, assistant coordinator, research funds, in College of Earth and Mineral Sciences.

Amy M. Dean, patient account assistant at The Hershey Medical Center.

Randall C. Deike, director, Data Analysis Applications Services, in Undergraduate Admissions, Office of the Vice Provost for Enrollment Management and Administration.

Catherine W. Dittman, staff assistant V in College of the Liberal Arts.

Carol T. Dowling, project coordinator II in Office of Physical Plant.

Jo Ann L. Dreibeis, administrative assistant II in College of Education.

Kathryn E. Smith, manager, Support Services, in Office of Physical Plant.

Melinda Stearns, director, client development, in Continuing and Distance Education.

Leann Stenger, financial analyst at The Hershey Medical Center.

Beverly Vagnerini, supervisor, Computer & Information Systems at Penn State Mont Alto Campus.
Lisa Witt, medical records supervisor in Student Affairs.

Technical Service

Barbara Bush, animal care technician, group leader, at The Hershey Medical Center.

Andrew Elzenberger, supervisor, Area Services, in Office of Physical Plant.

William Marks, facility renovator at The Hershey Medical Center.

Frederick Pantelich, facility renovator at The Hershey Medical Center.

Anthony Pizzuto, maintenance mechanic A in Continuing and Distance Education.

Michael Shindle, painter/maintenance welder at Penn State Mont Alto Campus.

Tending the garden

Solveig Lind-Iversen, a graduate student in the Department of Horticulture, spent a cloudy morning weeding in the University's Horticultural Trial Gardens off Park Avenue on the University Park Campus. Students from the department held their annual show Sept. 14-15.

Photo: Andrea Hurley

Benefits of CQI evident in many different areas

Mention Continuous Quality Improvement (CQI) projects, and many people tend to think of shorter lines and less waiting for University services, improved turn-around time and reduced paperwork. Those perceptions are accurate, as far as they go, but they don't go far enough.

CQI also fosters new collaborative relationships, helps bring changes in the classroom and enhances the teaching and learning process, according to a report given to the Board of Trustees on Sept. 6.

"CQI continues to make a difference at Penn State," said Louise Sandmeyer, executive director of the just-created Center for Quality and Planning. "Efforts made by CQI process improvement teams are bringing about a higher level of 'customer satisfaction' among students, faculty, staff and others we serve, tangibly and measurably increasing service delivery and performance, and helping to ensure high academic and administrative quality at Penn State."

Effective Sept. 1, the Center for Quality and Planning was created through the merger of the Center for Continuous Quality Improvement (formerly headed by Sandmeyer) and the University's Office of Planning and Analysis. The intent of the restructuring is to better integrate and intensify the University's efforts in continuous quality improvement and strategic planning.

Overall, Sandmeyer said, the minimum value of the time saved each year through the efficiency improvements of CQI teams is an estimated \$1.2 million. Citing examples from a new brochure, she said that CQI teams have:

- Increased the amount of assistance given to first-year students in choosing courses and scheduling classes. At the same time, a team evaluating Freshman Testing, Counseling and Advising Program processes

"Efforts made by CQI process improvement teams are bringing about a higher level of 'customer satisfaction' among students, faculty, staff and others we serve."

Louise Sandmeyer
executive director
Center for Quality and Planning

- reduced paperwork by 50 percent and saved \$60,000 in staff time.

- Improved the teaching of basic library skills to lower-division students. A University Park basic library skills team and a Penn State Altoona Campus bibliographic instruction team revised the workbook for English 15, a composition course for all freshmen, thus improving instructional effectiveness and student satisfaction.

- Enabled the Commonwealth Campuses to follow up more quickly with area applicants to Penn State. Automated information updates enhance communication with the campuses and saves coding and keyboarding time that is valued at \$49,400 a year.

- Enabled the Office of Sponsored Programs to notify faculty members they have received a grant on the same day the office logs the award. Getting the information so quickly enables faculty to keep their projects going, rather than experiencing two to eight weeks of project delays. Time saved by reducing the number of phone calls between the colleges and the office is valued at \$5,528 each year.

- Decreased from 20.3 days to 15.4 days the average wait for interlibrary loans to come through, while requests increased from 17,022 to 22,054.

Scholarship applications to be accepted until Oct. 18

Applications for the Edward L. and Dessa B. Keller Memorial Scholarship are being accepted until Oct. 18.

The scholarship was established by Edward W. Keller to honor his father and mother. One or more scholarships ranging from \$400 to \$2,000 may be awarded each year. Keller served Penn State as vice president for public affairs and director of Continuing Education.

All Penn State graduate and undergraduate students enrolled full time or part time in either regu-

lar or extended degree courses are eligible for the scholarship. Additional consideration will be given to Continuing and Distance Education staff members enrolled in adult education doctoral programs or those participating in an internship at the Washington, D.C., office of the University Continuing Education Association.

Application forms are available from Sandra Rothrock, 507 Keller Building, University Park, Pa. 16802; phone (814) 863-7752.

BOOK SHELF

CRC Press has published *Body Fluid Balance: Exercise and Sport*, edited by Elsworth R. Buskirk, professor emeritus of applied physiology at Penn State, and Susan M. Fuhl of SUNY at Cortland. The book covers mechanisms for controlling fluid ingestions (thirst), gastrointestinal handling of fluids, fluid replacement considerations and other related topics.

David Esposito's book *The Legacy of Woodrow Wilson: American War Aims in World War I* has been published by Praeger. Esposito also has been informed by the Council for the International Exchange of Scholars that he has been awarded a senior Fulbright Fellowship to study and teach abroad in Indonesia. He will be leave this month to teach American history at the University of Diponegoro in solo on the island of Java.

Bobby Pfau, instructor in the Department of Kinesiology, and Mary Ellen Litzinger, education librarian, are the authors of *Creating Connections*, published by Kendall/Hunt Publishing Co. The book and companion audiocassettes offer a four-step program for managing stress.

The American Psychological Association has published *A Guide to Psychotherapy and Aging: Effective Clinical Interventions in a Life-Stage Context*, edited by Steven H. Zarit, professor of human development and associate director of the Gerontology Center, and Bob G. Knight. The book is a comprehensive overview of clinical interventions with older adults.

Appointments

Mont Alto names center director

Nanette Hatzes has joined the Penn State Mont Alto Campus staff as the director of the Learning Center. Hatzes served at Mount Saint Mary's College in Emmitsburg, Md., as the director of disability services, reading and study skills.

Her duties as Mont Alto's Learning Center director include providing

direct services to students with disabilities on campus, supervising a staff of professional and peer tutors, overseeing the supplemental instruction program and study skills workshops and starting a support group for students with disabilities.

Hatzes is currently in the final phases of defending her Ph.D. dissertation at the University of Connecticut. She received her B.A. from the University of Maryland and a master's of education from Western Maryland College. Before working at Mount Saint Mary's College, Hatzes taught second-level students with learning disabilities for more than 10 years.

A member of the American Psychological Association, the Association for Higher Education and Disability, the Council for Exceptional Children and the Learning Disabilities Association of America, Hatzes plans to continue her various areas of research.

Sociology professor becomes head of department

Barrett A. Lee, professor of sociology, has been named head of the Department of Sociology. He is a specialist in urban sociology, social demography, community and race/ethnicity.

Lee, who came to Penn State in 1990 as an associate professor of sociology and senior research associate, Population Research Institute, was named a senior scientist of the institute in 1993.

He previously was on the faculty at Vanderbilt University and director of its Urban Studies Interdisciplinary Program.

At Penn State, Lee has served since 1994 as a co-director of the "Minority Opportunities Through School Transformation" (MOST) program, administered by the American Sociological Association with funding from The Ford Foundation.

He has been the project director or principal investigator for two National Science Foundation grants and 10 other grants. He is the author or co-author of more than 40 scholarly articles and book chapters. Since 1984 he has served on the editorial board of *Social Science Quarterly*. Lee was on the edi-

Nanette Hatzes

torial board of *American Sociological Review* from 1988-1990 and *Sociological Quarterly* from 1990-1993. He has served on review panels for NSF and the National Institutes of Health.

Lee has been a faculty mentor at Penn State for the Minority Summer Research Opportunity Program of the CJC and for the Population Research Institute. Among his research consultancies are the National Institute of Justice, the U.S. Bureau of the Census, the U.S. Public Health Service and the Seattle Mariners baseball team.

Lee received his B.S. in sociology from the University of California, Riverside; and M.A. and Ph.D. degrees from the University of Washington.

Associate professor takes on duties as director of graduate program

Margaret M. Lyday, associate professor of English and women's studies in the College of the Liberal Arts, has been named director of the Graduate Communication Enhancement Program in the Graduate School.

Margaret M. Lyday

Lyday holds a Ph.D. in English from The Catholic University of America in Washington, D.C. She joined the Penn State Hazleton Campus faculty in 1978, subsequently moving to the Penn State Allentown Campus and then to University Park in 1990. She served as associate dean for the Commonwealth Educational System from 1990 to 1995, and as associate dean for undergraduate studies in the College of the Liberal Arts from 1993 to 1995. She currently serves as the College of the Liberal Arts representative to the Senate Council, as a member of the Senate Faculty Rights and Responsibilities Committee, and on the executive committee of the Commission for Women.

For the last eight years, Lyday has directed the Lehigh Valley Writing Project, a site of the National Writing Project, which works with faculty to develop the writing skills of their students. This year she was awarded a four-year grant from the Dewitt Foundation to develop programs for teachers of bilingual students.

The Graduate Communication Enhancement Program emerged from the University Future planning process in which the editorial functions of the Graduate School's Thesis Office were largely eliminated. A portion of the savings from that move was redirected toward a proactive approach to communications skills improvements among graduate students. In her new half-time responsibilities with the Graduate School, Lyday will work with colleges, department and directly with students to develop and assess various kinds of workshops, courses, computer-based interactive approaches and other forms of intervention aimed at assisting graduate students in sharpening their communications skills early in their graduate programs.

New director of academic affairs comes on board at campus

Jeffrey Perkins has joined the Penn State Mont Alto Campus as director of academic affairs. Perkins

replaces Ronald Keiper who retired on July 31.

Perkins comes to Mont Alto from the Naval Post-Graduate School in Monterey, Calif., where the taught material engineering since 1972. Before that, Perkins taught at Youngstown State University in Ohio. A native of Yardley, Pa., he received his B.S. from Drexel University and his M.S. and Ph.D. from CASE Institute of Technology.

At Mont Alto, Perkins plans to teach physics and chemistry when needed. He also plans to become an active campus community member.

Director of Center for Nursing at Hershey appointed

Linda C. Pugh has been appointed director of the Center for Nursing Research at The Milton S. Hershey Medical Center.

Pugh earned both her B.S.N. and M.S. degrees in maternal child health from the University of Maryland at Baltimore. She also received her Ph.D. in nursing from the University of Maryland.

She came to Penn State from Johns Hopkins University, where she was an assistant professor coordinator of maternal-newborn nursing and coordinator of undergraduate research. Previously, she had academic appointments at York College of Pennsylvania and Williamsport Hospital School of Nursing. She also has previously held a post as a pediatric staff nurse at St. Joseph's Hospital, Towson, Md.

Since 1990, Pugh has been a member of the Nursing Practice Expert Advisory Panel of the United States Pharmacopeia Division of Information and Development. As one of 35 information-related expert advisory panels, the panel is responsible for the ongoing revision and development of USP's continuously revised, evidence-based drug and therapeutics information database, particularly as related to nursing practice.

Pugh is also a consultant on practice issues in maternal child health for the Pennsylvania Nurses Association.

Schuykill names director of student affairs and marketing

Alisa A. Rhoades has been appointed the assistant to the director of student affairs and marketing at the Penn State Schuylkill Campus.

Alisa A. Rhoades

A resident of Mahanoy City, Rhoades attended Penn State and received her bachelor's degree, magna cum laude, from King's College in 1994. She has served as a substitute teacher in the Mahanoy Area School District and a therapeutic support staff member at Schuylkill Mountain Center.

During the past academic year, she was an instructor at the McCann School of Business. In her new position, Rhoades will be responsible for campus student activities, student recruitment and a number of areas designed to enhance the students' out-of-classroom experience.

Partings

OAS Information Center manager ends career where he started it

John A. Winter, manager of the Information Center, Office of Administrative Systems, retired July 15 and celebrated his parting near the same place he began his professional career.

Winter, who spent 27 years with the University, held his retirement party near the Gilpin Room at The Nittany Lion Inn — the place where he and 11 others received their degrees in 1956. Winter received a bachelor's degree of arts and letters and a minor in Russian studies. His minor led to his first job as an intelligence agent with the National Security Agency. Winter also worked for General Electric and HRB-Singer Inc. before coming back to the University in 1969.

He served as a senior systems analyst until 1972, when he became manager of user services for Management Information Systems. Four years later, he became manager of public and auxiliary services. Both jobs were in the office that became OAS. In 1983 he was named manager of the Information Center.

From 1991 until his retirement, he also

served as a research analyst, consultant and facilitator for Continuous Quality Improvement. And from 1993-1995, he served as director of the EXEMPLAR Administrative Support Office.

Creating software that helped University employees do their work more efficiently was the most gratifying part of his job, Winter said. He helped create such systems as the automated mailing system and the season football ticket system.

After making other people's lives easier, Winter said he is ready to relax. Although he will continue to serve as a patroller for the Penn State Outing Club Ski Patrol, Winter said he and his wife, Kathleen, plan to do some traveling, taking their mountain bikes all over the United States.

The Winters, both Altoona natives, have two children — Mark and Jennifer — who graduated from Penn State. While their children live and work out of town, the Winters plan on staying in State College.

Associate professor gains emeritus rank

William H. Parsonage, associate professor of administration of justice and health education, has retired with emeritus rank after 29 years at Penn State.

Professor Parsonage joined the University faculty in 1967 as an assistant professor of law enforcement and corrections in the College of Human Development. He became an associate professor in 1973 and served as the assistant dean for Commonwealth Education and International Programs, College of Human Development, from 1984-87.

He was associate dean for Commonwealth Educational System programs, College of Health and Human Development, from 1987-88. In 1989, he returned to teaching and research, rejoining the Department of Administration of Justice, which had moved to the College of the Liberal Arts.

In his retirement, Parsonage will continue his research and consulting in the area of violence and victimization of justice and related human service workers. He also plans to spend a good bit of his time sailing.

William H. Parsonage

Research assistant returns to campus daily

Although she officially said farewell to the University July 30, Kathleen S. Mourant, research assistant in the Research and Graduate School, hasn't forgotten her co-workers.

Mourant, who began working part time for the University in 1969 and became full time in 1971, said she still finds her way back to the University Park Campus for a few hours a day. Mourant continues to serve as a consultant for the research journal *Cement and Concrete Research*. This gives her an opportunity to not only help out, but to keep in contact with her former co-workers.

Throughout her years at the University, Mourant said it is the relationships she formed with co-workers that stand out the most. Mourant's ties to the University run deep. She received a bachelor's degree in

home economics in 1957 from Penn State and a master's degree in human development in 1969, also from Penn State. Having lived here since she was 4 years old and the fact that her parents were on the faculty, she said, influenced her decision to attend the University.

Mourant's husband, the late Paul Mourant, also served on the faculty. Three of their four children took classes at Penn State: Stephen, spent one year at the University before transferring; Renee and Paula both received associate degrees from the University; and Richard attended college in Williamsport.

Her children have left the area, but Mourant said she has no intentions of leaving.

"It's a good place to live," she said.

Art history professor retires; book due soon

Roland E. Fleischer, professor of art history, retired in July after having taught at Penn State since 1974. Fleischer, a specialist in both 17th-century Dutch painting and colonial American painting, is currently co-editing *Rombrant, Rubens and the Art of Their Times: Recent Perspectives Papers in Art History from The Pennsylvania State University*, Vol. XI. The volume is due to be published in early 1997.

Aside from bringing his dual specialties to Penn State, Fleischer was the guest curator at a 1988 exhibition of the works of Gustavus Hesselius, the first Swedish-born painter in Colonial America. The exhibition, part of the 350th anniversary celebration of New Sweden, was the first of Hesselius in 50 years, and existed in its current form because of Fleischer's work in properly attributing numerous unsigned paintings to the artist. Fleischer's publication, *Gustavus Hesselius: Face Painter to the Middle Colonies*, accompanied the exhibition, that ultimately attracted King Karl Gustav XVI and Queen Silvia of Sweden.

In 1989, Fleischer was appointed a Fellow of the Institute for Arts and Humanistic Studies and in 1990, he received the Faculty Scholar Medal for Arts and Humanities following the publication of three important works which combined his specialties of Northern European Baroque and colonial American painting. Fleischer has published many reviews, articles, exhibition catalogs and books. His monograph, *Ludolf de Joching: Painter of Rotterdam*, was published in Holland and he contributed entries to *The Dictionary of Art* (Macmillan Publishers) and *American National Biography* (Oxford University Press). Most recently, in 1993, Fleischer received an honorary doctorate of fine arts from his undergraduate alma mater, Western Maryland University.

Fleischer received his master's and doctoral degrees from Johns Hopkins University and, during his time at Johns Hopkins, was awarded a Fulbright scholarship to study in Amsterdam. Before coming to Penn State, Fleischer was an instructor at Johns Hopkins, an associate professor at the University of Miami and a professor at George Washington University.

Fleischer's current plans are to remain in the area with his wife, Alice, to fish a great deal and to work on his latest book, *Abraham Hondius: Painter of Holland and England*.

Roland E. Fleischer

Associate professor served Behrend College for 33 years

Roger Sweeting, associate professor of exercise and sports science, retired after 33 years of service at Penn State Erie, The Behrend College.

Sweeting began his Penn State Behrend career in 1963 after earning a master's degree in physical education at the University Park Campus. He received his doctoral degree from the University of Illinois in 1972.

Sweeting was the recipient of the 1984 Penn State-Behrend Council of Fellows Excellence in Teaching Award.

He is a former member of the University's Faculty Senate, the Academic and Physical Planning Committee, and the Academic and Athletic Standards Committee.

Roger Sweeting

■ Rape Aggression Defense System Course teaches women defense skills

The Rape Aggression Defense System is a comprehensive self-defense system for women taught by certified instructors from the law enforcement community. University Police Services is offering two RAD courses on the University Park Campus—one in October and one in November—over a series of days to teach women various skills.

The program includes awareness, prevention, risk reduction and avoidance, as well as options available to women during a confrontation or attack. RAD uses extensive hands-on training to develop self-defense as one of these options, and includes carefully selected, realistically employable defense tactics which are easy to learn and easy to retain.

The first course is set for Oct. 1, 3, 8 and 10 from 6:30 to 9:30 p.m., in the Physical Plant Conference Room; the second course will take place Nov. 10, 17 and 24 from noon to 4 p.m., in 133F Johnson Commons.

The course fee is \$12 per person, which covers the cost of the comprehensive manual issued to all students. This fee also includes a free lifetime practice policy, which encourages women who have completed the course to return to any RAD class and practice free of cost with a certified instructor.

If you have any questions, or wish to register for one of the classes, contact Police Services at the following address: Penn State University Police Services, Crime Prevention Office, 26 Eisenhower Parking Deck, University Park, Pa. 16802; or by phone at 863-1111; or through e-mail: carlson@police.psu.edu.

Program marks 50 years of learning

The Recreation and Park Management Program in the College of Health and Human Development will celebrate its 50th anniversary with an alumni reunion Sept. 20 and 21.

Among the activities that weekend are:

—Bus tours of campus, with undergraduate and graduate students from the program as guides; a bus tour to Stone Valley and Shaver's Creek.

—A golf tournament on the Penn State Blue Course, hosted by program founder **Fred Coombs** and students in the professional golf management option.

—An informal reception at Café Laura and a banquet at the Nittany Lion Inn.

Although Penn State has offered a curriculum in recreation and park management since 1946, a recre-

ation course appeared in the Penn State College Bulletin as early as 1919.

Today the program is called recreation and park management (previous names, in addition to recreation education, include leisure studies and recreation and parks) and is a part of the School of Hotel, Restaurant and Recreation Management. Nearly 500 undergraduate and graduate students are enrolled—a long way from the 11 students in the first year of the major. The program's peak enrollment was more than 700, in the early 1970s. Altogether, more than 3,200 alumni have earned degrees from the program.

More information is available by calling (814) 865-1851.

Unity Days slated to begin in October

The University community is invited to take part in Penn State Unity Days, a series of events that spans two semesters. Unity Days kicks off Wednesday, Oct. 2, with Hands Across Penn State—a human chain formed as faculty, staff and students hold hands at Penn State sites around the Commonwealth. Following Hands Across Penn State will be talks by a number of students, faculty and staff who will address the importance of developing a multicultural environment.

"Building Coalitions Through Education, Awareness and Cultural Sensitivity" is the theme of this year's Unity Days, which will continue on Nov. 5 and 6 with a conference at the HUB on the University Park Campus. The conference will promote an appreciation and understanding of diversity issues related to race/ethnicity, religion, gender, sexual orientation and disability and will offer ways in which the community can work together to promote diversity and safe, comfortable environments for all people. Following the conference, Unity Days continues with a variety of programs and activities sponsored by student organizations.

Penn State Unity Days is sponsored by the Multicultural Resource Center and Project Growth, along with other student groups. For more information about events, call Elisha Nixon at (814) 865-1773.

Schreyer Institute seeks 30 proposals to fund

The Schreyer Institute for Innovation in Learning is looking for new uses of active and collaborative learning in undergraduate classes. Faculty members have until Oct. 15, and Jan. 21, 1997, to submit proposals for innovations to run in the fall 1997 semester. It is recommended that you apply to the early deadline. The second deadline will fill spaces that are still open after the first review. Funding for 30 projects for the semester is anticipated.

Selected proposals are supported with funding for student interns to work with faculty in designing and coordinating new learning experiences. In addition, faculty members can use instructional design consultants, project assessment and team training resources provided by the institute. Project faculty also participate in bi-weekly workshops and conversations that use PictureTel to reach the Commonwealth Campuses.

For application forms and more information, call (814) 865-8681; e-mail INOV8@psu.edu; or visit the institute's Web site at <http://www.inov8.engr.psu.edu/>.

25-year Awards

Gerald W. Anderson

Cheston M. Berlin

David L. Custer

Rosemary Wyzykowski

Terry J. Peavler

Vicki L. Spadaccio

Gerald W. Anderson, project coordinator in the Environmental Resources Research Institute, Office of the Senior Vice President for Research and Graduate Education; Dr. Cheston M. Berlin Jr., professor of pediatrics and pharmacology and chief of the Division of General Pediatrics; David L. Custer, manager, Research Computer Facility; and Rosemary Wyzykowski, medical technologist, Microbiology Laboratory of the Clinical Laboratory, all at The Hershey Medical Center; Terry J. Peavler, associate dean for undergraduate studies and professor of Spanish in the College of the Liberal Arts; and Vicki L. Spadaccio, contracts and proposals specialist for the Office of Sponsored Programs, in the Office of the Senior Vice President for Research and Graduate Education.

Studies show perfectionism can be good for the perfectionist

By PAUL A. BLAUM
Public Information

Past studies have generally viewed perfectionism as an attribute based on the possession of excessively high standards for performance and thus a cause of problems for people. Penn State researchers are examining that proposition.

"Recent studies simply do not support the contention that having lofty personal standards or being highly organized is, per se, a negative psychological trait," Robert B. Slaney, professor of counseling psychology in the College of Education, said. "Indeed, our results indicate quite the contrary. Nor was it found that high standards were related to relationship problems or tendencies to procrastinate, as the literature has suggested."

Slaney and Jeffrey S. Ashby, assistant professor of educational administration and counseling at the University of Northern Iowa, are co-authors of *Perfectionists: Study of a Criticism Group*.

They conducted an interview of 21 women and 16 men who labeled themselves perfectionists or who had been labeled as perfectionist by their advisors or peers.

The group tended to be highly educated and was primarily, but not exclusively, composed of undergraduate students, graduate students and junior and senior university faculty, Slaney said.

"The participants who viewed themselves as perfectionists had a clear tendency to set high standards of achievement and performance as central to their own perfectionism and to the essence of perfectionism," Slaney said.

Many of the perfectionists also included neatness, efficiency and orderliness as key elements of their perfectionism.

"These two characteristics of perfectionism — high standards and orderliness — do not by themselves create serious psychological or social burdens for the perfectionist," Slaney said.

"However, the third characteristic of perfectionism — what we call the discrepancy factor — can cause major difficulties," Slaney said. "People who have high standards often feel they don't meet those high standards. It is this discrepancy between their aspiration and their sense of fulfillment that is related to such problems as persistent worry,

"Recent studies simply do not support the contention that having lofty personal standards or being highly organized is, per se, a negative psychological trait."

Robert B. Slaney
professor of counseling psychology

It is the discrepancy between a perfectionist's high standards and his perception of not meeting those standards that causes problems, not the perfectionism itself, according to Robert B. Slaney, professor of counseling psychology.

Photo: Greg Grieco

depression, anxiety, low self-esteem and procrastination."

The irony is that the discrepancy factor does little to improve achievement and can actually interfere with it.

Almost all participants who were

interviewed saw some measure of distress connected with their perfectionism. Yet, when the research team asked them if they would give up their perfectionism if they had a choice, none agreed to do so, regardless of the distress.

Clinical trial seeks breast cancer patients

A unique approach to treating breast cancer is being evaluated at The Hershey Medical Center as part of a comprehensive international study. The clinical trial is now accepting women with advanced breast cancer who produce excessive amounts of a protein produced known as HER2.

The Hershey study will test a new antibody to counteract the overproduction, or overexpression, of HER2. An excess of HER2 is often an indication of more serious or faster progression of breast cancer. Women who overexpress HER2 — about a fourth of the 180,000 women diagnosed with breast cancer each year — also have a greater risk of disease progression after receiving standard treatments, such as chemotherapy, and a lesser chance for long-term survival.

Dr. Allan Lipton, professor of medicine, chief of oncology and principal investigator of the Hershey study, is optimistic that the antibody may inhibit tumor growth and, therefore, slow the progression of cancer.

"This is a new, front-line approach to the disease, one that specifically targets the HER2 receptor," Lipton said. "Based on previous HER2 trials, I am hopeful that this new study may yield positive results."

The purpose of the current Phase III clinical trial is to demonstrate whether the HER2 antibody is a safe and effective drug. Phase III is the final step required to file a marketing application with the U.S. Food and Drug Administration. Patients enrolled in the study receive chemotherapy and the HER2 antibody or chemotherapy alone. Because the HER2 antibody is designed to mimic a natural human antibody, Lipton and other researchers hope the therapy has few side effects and does not contribute to the toxic side effects of other chemotherapeutic agents.

The Phase III trial will evaluate 450 patients in about 100 North American hospitals. To be considered for the trial, women must be between the ages of 18 and 75, have a recurrence of breast cancer that has metastasized to other parts of the body and produce excessive amounts of HER2, based on a screening test. Lipton predicts patients will be recruited for the study over the next year and a half. To learn more about participating in the trial, contact Lipton or Elise M. Givant, R.N., Hershey Medical Center, at (717) 531-8677 or call (800) 821-8590 for more information.

ATHLETICS

A regular column provided by Intercollegiate Athletics

Former Lady Lion back

Former Lady Lion basketball standout **Katina Mack** has been named to an assistant's position in athletic development. One of Mack's primary duties will be to serve as the coordinator for the "Rene's List" fund-raising initiative which helps finance the televising of Penn State's women's basketball and other events, as well as the "Center Court with Rene Portland" magazine show.

Emmy nominations

"The Penn State Football Story" and "Penn State Hoops," two television presentations focusing on Nittany Lion sports, have earned four Mid-Atlantic Region Emmy Award nominations for 1995-96. Both programs are produced for the athletic department by D'Elia, Wiotkowski Productions in Pittsburgh and seen throughout Pennsylvania and the nation.

Coaching assistants

■ Penn State graduate and former track captain **Dayna Holston** has joined the athletic staff as a coaching assistant in women's track. An All-Big Ten Academic selection, Holston is from Washington, Pa.

■ **Rene Lyst**, a 1993 graduate of Penn State, has been named the women's gymnastics team's new assistant coach.

Lyst had been the assistant women's gymnastics coach at the University of Massachusetts from 1993 until this year.

■ **Jason Baker**, a 1994 graduate of the University of Puget Sound, has been selected as the new assistant softball coach.

This past year, Baker was the assistant softball coach at the University of Oregon.

For the Record

In the academic promotions listing which appeared in the July 18 issue of *Intercom*, Marilyn Daniels, associate professor of speech communications, was incorrectly listed.

In that same listing, the name of **Pierre Kerszberg**, professor of philosophy, was missing.

Carpoolers

Carpooler(s) wanted to drive from Philipsburg to University Park. Work hours are 7:45 a.m. to 4:45 p.m. Call Don at 865-7525 or Ken at 865-2534, or send e-mail to tk22@as.psu.edu

Practice makes perfect

O. Richard Bundy, associate professor of music, observes the Blue Band from his perch atop a director's stand during a rehearsal. Bundy took over as director of the Blue Band when Ned C. Deihl retired earlier this summer.

Population Research Institute awarded grant

The Hewlett Foundation recently awarded the Population Research Institute and graduate program in demography a three-year grant for training and research in international demography. The \$330,000 grant is co-directed by **Gordon F. De Jong**, distinguished professor of sociology and director, graduate program in demography; **Gretchen Cornwell**, assistant professor of rural sociology; and **Daniel T. Lichter**, professor of sociology and director, Population Research Institute.

The award provides stipend and tuition grants for predoctoral third-world students in the graduate program in demography. It also supports collaborative international

demographic research projects of Population Research Institute faculty. The demography program is a dual-title intercollege graduate degree program with six participating departments: sociology, anthropology, economics, agricultural economics, rural sociology and human development and family studies.

This is the fifth award from the Hewlett Foundation which has continuously supported the Population Research Institute and graduate program in demography since 1982. Over these 14 years, Hewlett funds have provided tuition and stipends, dissertation research grants and graduate program development funds for 56 international students.

"Violence will not destroy our resolve to be a community that cherishes the dignity, the safety and the worth of every human being."

— The Rev. Carl Synan at memorial service

After the tragedy, a time to heal

Mourning our loss

Students and others pay tribute to shooting victim Melanie Spalla during a memorial service on the HUB lawn of the University Park Campus Monday, Sept. 23. Hundreds of students, faculty, staff and community members joined campus ministers and the Spalla family for the service.

Memorials, prayers help campus cope in aftermath of shootings

By ANNEMARIE MOUNTZ AND LISA M. ROSELLINI
Public Information

University Park—Just minutes after a sniper opened fire Sept. 17 on the lawn of the Hetzel Union Building, killing one student and wounding another, University employees and students rushed to the scene to not only help the physically injured but to heal the emotional wounds.

The heroics displayed that rainy morning are numerous, according to witnesses: a student, Brendon Malovitz, wrestled a high-powered rifle from alleged gunman Jillian Robbins; another student pulled felled victim Nicholas Mensah to safety; nursing instructors and staff members risked their lives to comfort Mensah and begin treating his abdominal wound; ambulance personnel and University police were on the scene in minutes; and counselors came out in droves to help stem the tide of emotions that would follow.

The attack, which began at 9:34 a.m., lasted little more than a minute but left 21-year-old Melanie Spalla of Altoona dead. In that

■ From the president In the wake of a campus tragedy

The tragedy of September 17 has left a great sadness in the hearts of everyone at Penn State. It was something that many people thought could never happen here, and the thoughts and prayers of the entire University community are with the families of the victims.

This random and senseless shooting is a reminder that no community is immune to violence. For many years, Penn State has been one of the safest universities in the country.

Student volunteerism runs high at University

By LISA M. ROSELLINI
Public Information

New numbers collected on the volunteer activity undertaken by Penn State students shows that in 1995-96, more than 13,620 students volunteered 255,964 hours of their time—in large part, due to the urgings of faculty members.

In dollar amounts, this effort is estimated to be worth more than \$1 million to communities across the state. Add to that the money raised by students participating in the Interfraternity Council/Panhellenic Dance Marathon, and the figure leaps to more than \$2.2 million.

The figures, supplied by the AT&T Center for Service Leadership on the University Park Campus, were compiled by Pennsylvania Campus Compact—a statewide organization created by university and college presidents that annually publishes an inventory of student activities for institutions across the state. Since 1989, the campus compact has sought volunteer activity numbers from member institutions. Currently, 58 institutions in the Commonwealth belong to the organization. The full report of all participating institutions in the state will be available by mid-October.

"Penn State has a lot of commitment from a lot of students," La-Verna J. Fountain, executive director of Pennsylvania Campus Compact, said. "Clearly the service movement has taken off and without question, one of the reasons for this is because of faculty involvement. Faculty are changing the face of service tremendously."

Fountain was referring to courses that now carry a service component. The executive director said the service requirement is generally incorporated to help students apply theory to general practice or to help them grasp a "deeper" concept.

Melissa Frank-Alston, program director of volunteer programs and services at Penn State, said another reason for the increase in student participation is due to society's renewed emphasis on service and the changing values of the students themselves.

"I think students are being exposed to volunteer services at a much younger age, so they are coming in with the idea that service is a natural part of the educational process, part of a valuable education," she said. "Students are coming into the college environment seeking more opportunities. We have definitely seen an increase."

Frank-Alston said although the numbers compiled for Penn State indicate an increase in hours volunteered, jumping by more than 43,000 hours over the past year, the figures are still not an accurate reflection of what goes on through-

See "Volunteers" on page 3

Healing

continued from page 1

short time frame the sniper had managed to shatter the lives of many and the sense of security on the University Park Campus.

Students who had been eyewitnesses to the shootings began to seek refuge in nearby Henderson Building, and staff from the Center for Counseling and Psychological Services (CAPS) were quickly deployed to several locations to help students deal with the trauma.

"For years we have prepared for any and all disasters. I gathered my staff and things fell together," Dennis Heitzmann, a psychologist and director of CAPS, said. "Some students were responding immediately to the shooting, some appear relatively unaffected for now. We anticipate there will be much follow-up in the coming weeks. It's a very emotional time for everyone, and although we are dealing mostly with students we can see that it has touched everyone on campus. This is not something that is emotionally wrenching only for CAPS staff or students."

As soon as word of the tragedy reached the Helen Eakin Eisenhower Chapel, those at the facility went into action. The Rev. Fred Byrne, director of the Penn State Catholic Center, the Rev. Ed Messersmith, director of the campus Episcopal ministry, and the Rev. Carl Syman, director of the United Campus Ministries, rushed to the HUB to meet with colleagues from across the University to work out a plan.

Soon after the meeting, the first student was at the door in 204 HUB, a counseling in-take center. Counseling services were available immediately in the Harshbarger Room at the chapel and a counseling in-take center was set up in 206 Henderson, while counseling staff in 220 Ritner Building waited for the onslaught. Employees were urged to contact Penn State's Employee Assistance Program and evening discussion sessions were set up at various residence halls and at the HUB.

Rev. Byrne walked the halls of the second floor of the HUB, stopping in offices to offer comforting words or to listen to those with windows facing the HUB lawn described the horror that had unfolded before them.

"People were quite traumatized because they saw and heard everything from the second floor," Byrne said. "Melanie has become the average Penn Slater to anyone who has anything to do with Penn State. Even though they may not have known her personally, they feel so terribly violated."

That sentiment, according to Heitzmann, is just one of the many emotions people will deal with in the coming weeks.

Many people are trying to reconcile the fact that this incident occurred in "happy valley" and yet they can still feel safe on campus, Heitzmann said. "That's a wide chasm to leap."

"But based on the University's safety record, this is unquestionably a relatively safe place to be," Heitzmann said.

During one of the many press conferences that followed the shootings, Dave Stormer, assistant vice president for University Safety, said over the past year the University Park Campus has logged a rate for violent crimes of less than 2 percent, while Pennsylvania shows a rate of 13 percent for violent crimes committed.

"People are probably safer here than they are at home," Stormer said.

There is just a sense of suspended belief," Ken Clarke, acting director of Religious Affairs, said. "People often think that this is the kind of incident that could not happen here. Unfortunately we've

Tough job

University student and peer counselor Megan Dolbin speaks with the media before the Wednesday, Sept. 18, student meeting in the HUB Ballroom, where students met with a panel to discuss Tuesday's shooting. Dolbin was one of many counselors on the scene immediately following the shootings.

Photo: Andrea Hurley

come to recognize that in this American society, violence can strike anywhere at any time. This university, this community is part of American society."

In the hours following the incident, President Graham B. Spanier took several steps to reassure parents, students, faculty, staff and the community at large that this random act of violence was an anomaly. In fact, much of the correspondence being sent to the president and other administrators since the shooting commends the university for its quick action, candid responses to media queries and its handling of the incident. Spanier, who was the focus of a live call-in show on WPSX-TV the same day the shootings occurred, has been praised for his leadership in the wake of the tragedy.

For people in the counseling world, those factors go a long way in not only helping others overcome the shock of such an event, but in lifting their own spirits at a time when they may be feeling physically and emotionally drained.

"We need to keep our own emotions in check while dealing with others and one of the best things that could have occurred is our observation that the university community really rallied to the cause," Heitzmann said. "It was really gratifying to hear calls on WPSX and the president acknowledge our services. It was a boost to morale at a time when we needed it."

Some of the other emotions people may be experiencing, according to Heitzmann and Clarke, are shock, sorrow, anger and feelings of vulnerability.

"My own staff deals with these various issues as our life work, but I think the suddenness of this tragedy and the extraordinary circumstances surrounding it have momentarily thrown us," Heitzmann said. "We are taking time to process our own concerns and deal with this issue and others should too. Time will definitely help diminish this great tragedy, but people need to talk about this issue."

Clarke said trained counselors aren't the only ones who can help others deal with this crisis.

Counseling available

Counseling will continue to be available on an as-needed basis at the following locations:

The Employee Assistance Program for staff and faculty, available 24 hours a day by calling (814) 865-3085.

Center for Counseling and Psychological Services, 221 Ritner Bldg., (814) 863-0395

Eisenhower Chapel (814) 865-6548

Individual ministries also are providing counseling services as needed:

Alliance Christian Fellowship, 205 Chapel, (814) 865-1562

Catholic Center, 207 Chapel, (814) 865-4281

Christian Student Fellowship, 205 Chapel, (814) 865-1562

Christians in Action, 201 Chapel, (814) 865-1244

Episcopal Ministry, 210 Chapel, (814) 865-3762

Hillel Penn State, 115 Chapel, (814) 863-3816

International Christian Fellowship, 201 Chapel, (814) 865-1244

Lutheran University Parish, 112 Chapel, (814) 865-0033

New Life Student Fellowship (Baptist Campus Ministry), 207 Chapel, (814) 863-7874

United Campus Ministry (American Baptist, Church of the Brethren, Mennonite, Society of Friends, United Church of Christ, United Methodist, Presbyterian (USA)), 209 Chapel, (814) 865-7627

President Graham B. Spanier is concerned that parents will have access to as much information as they desire concerning the safety of their children. To this end, he is sending a letter of reassurance to the parents of every student enrolled at University Park. In addition, the Alumni Association has scheduled an informational session for parents during Parents Weekend.

"I would encourage faculty and staff to allow students to discuss this tragedy, to give them space to do this in various contexts, whether in terms of office hours or in the classroom."

In at least one class, students got that chance.

Sue Rankin, senior diversity planning analyst in the Office of the Vice Provost for Educational Equity and a lecturer in kinesiology, walked into her kinesiology 481 class on Sept. 18 and asked the students to observe a moment of silence. Afterward, she asked the more than 50 students present if anyone wanted to speak about how they were feeling.

"At first it was a little quiet," Rankin said. "Then one student remarked about how he was angry at and sorry for Jillian Robbins," the suspect in the shooting. "He said he was angry at (the suspect) for taking a life and he was feeling bad for her at the same time."

The discussion took the entire class period, and the range of reactions was broad.

"That's the whole point of initiating the discussion—to give them a forum where they could express themselves," she said.

A few of the students said they were feeling more fearful on campus and taking notice of things they wouldn't have before, such as someone walking too closely behind them or looking weird at a bus stop.

"Their feelings of safety have been violated, so trust is an issue," Rankin said.

Another student said it was reassuring to know that there were students who would help a stranger in trouble.

Many focused on the unanswerable question of why the tragedy happened.

"They realize it was a random act of violence, and there's nothing you can do about it. You can't stop going to class or walking along the path at the HUB lawn," Rankin said. "It's horrific, but you still have to move on."

■ Close to home

Dealing with
random violence

By JODY BARTKO

The Hershey Medical Center

Many people view a college campus as an asylum from real life where the violence, pressure and demands of society are absent.

The random act of violence on Sept. 17 that left one student dead and another injured on the HUB lawn at the University Park Campus has shaken that belief and left a community to pick up the pieces.

Random violence is particularly hard to deal with, said Paul A. Kettl, associate professor of psychiatry at The Hershey Medical Center. Kettl, who has done research on violence, said random violence has no boundaries and in psychiatry is considered a low-frequency behavior. There are usually no warning signs that a person exhibits before he or she performs an act of random violence, he said.

Death is difficult to accept in general and when a random act of violence takes a life, it is even harder to deal with because there is no answer to "why" it happened, Kettl said.

The associate professor also considers survivors to be victims. He said people like to think they or someone else could have done something to prevent or alter the situation. Kettl said that people would rather feel guilty than out of control. The "if only..." syndrome seems to make people feel better, but only masks the healing process.

Kettl said some people suffer post-traumatic stress disorder after a random act of violence. Post-traumatic stress disorder, most often associated with soldiers in combat or victims of war, is a condition which develops after an individual has experienced a psychologically traumatic event. Symptoms include difficulty falling asleep, irritability or outbursts of anger, difficulty concentrating, hypervigilance or an exaggerated startle response. These symptoms may persist long after the traumatic event has occurred.

Kettl recommends that anyone exhibiting any of these symptoms talk with others who were affected by the incident.

"Dealing with what happened as a community is more effective than dealing with it on your own," he said.

Kettl also recommended using services offered by counseling centers and professionals.

"Tragedies change lives. We can never assume that things will be the same. However, we can overcome things and move on with our lives," he said.

■ Scholarship established

In remarks during the Sept. 23 memorial service for Melanie Spalla, President Graham B. Spanier said he had received numerous suggestions of ways the University might remember Melanie, and announced the formation of a scholarship to honor her.

"I cannot explain why this happened, but I know we must honor Melanie by remembering her and by gathering strength in our lives from the joy for life she displayed in hers," Spanier said.

The scholarship will be designated for an undergraduate student at the University Park campus. Contributions may be sent to the Office of University Development, 116 Old Main, University Park, PA 16802.

Answering media question

Dave Stormer, vice president for University Safety, responds to a question from one of the dozens of reporters at a media conference Sept. 17.

Photo: Greg Grieco

Together
continued from page 1

Indeed, the greater State College area ranks among those communities with the very lowest crime rates in the nation. Every effort that is humanly possible is being taken to guarantee that Penn State remains a safe and secure place for learning. The safety of our students has been, and continues to be, a top priority.

Although there is probably nothing that anyone could have done to prevent this senseless act, I think we should all be proud of the way this university came together in response to the tragedy. University police were on the scene almost immediately, taking the suspect into custody. Their handling of the matter has been flawless. Members of our nursing staff rushed to the scene to help the victims. Less than 90 minutes after the shooting, three counseling centers were up and running to help students deal with the trauma of the event. Student Affairs staff and campus clergy mobilized to assist the families of the victims and fellow students. Extra phones were quickly brought to the HUB to make it easier for students to call home to assure their parents they were safe.

Information was quickly posted to our World Wide Web site, accessed by thousands of people within hours of the tragedy. University operators handled more than double their usual load of calls, reassuring worried parents.

Three press conferences were held through the day to keep the media and community informed. That night on WPSX-TV, a televised special edition of my monthly radio show, simulcast on several radio stations, allowed us to take calls and answer questions from people throughout the region.

Across the campus, faculty, staff and students worked together to help the victims and reassure the community with a level of professionalism and poise that was truly remarkable.

Despite this senseless and random act, Penn State remains a safe place for faculty and staff to work, and for students to learn and grow. We will do all that we can to ensure that this never changes. Our commitment is to maintain Penn State's reputation for academic excellence, while also ensuring a campus environment marked by humanity, civility and safety.

My thanks go to all within the Penn State family who worked so hard to deal with this tragedy. It is an important reminder to us all of the incredible caliber of people who make up this university.

Volunteers

continued from page 1

out the entire Penn State system. Because student organizations self-report their numbers, some did not submit information. The figures for this year include University Park activities and the volunteer efforts of only six of Penn State's remaining 22 campuses: Altoona, Beaver, Fayette, Mount Alto, New Kensington and Wilkes-Barre.

The information catalogued by Pennsylvania Campus Compact tells the organization how close it is to reaching its goal of 100 percent participation in volunteer activities by college students. So far, the compact has achieved an involvement rate of 35 percent, according to Fountain.

Since 1989, Pennsylvania higher education institutions have donated

"I think students are being exposed to volunteer services at a much younger age, so they are coming in with the idea that service is a natural part of the educational process, part of a valuable education."

Melissa Frank-Alston
program director,
volunteer programs and services

nearly 10 million hours of service to surrounding communities at an estimated value of \$42 million, based on an average of \$4.25 an hour for the services provided.

"Pennsylvania continues, as it has for many years, to set the pace for what needs to be happening," Fountain said.

Pennsylvania Campus Compact is one of the founding state compacts in the nation. There are currently 20 existing compacts involved in the National Campus Compact, with two more states expected to join in the coming year. The National Campus Compact was formed 10 years ago.

The compacts provide a way for anyone interested in the service movement to know what is happening here and across the nation," Fountain said. "It also lets presidents of institutions know where they fit in comparison to other schools. But our goal is not to make comparisons because every area's needs are different."

Anyone looking for volunteer opportunities can contact LIONS SHARE, a clearinghouse set up by the Office of Volunteer Programs and Services through the AT&T Center for Service Leadership, at (814) 863-4624. LIONS SHARE helps place students with volunteer opportunities at any one of the 172 agencies listed in the Centre register.

LECTURES

"Election '96 Debate" heads Altoona series

The 1996 Student Affairs Distinguished Speakers Series for the Altoona Campus will kick off at 7:30 p.m. Tuesday, Oct. 3, with an "Election '96 Debate" between **Edwin Meese III**, former U.S. attorney general, and U.S. Sen. **George McGovern**, in the Community Arts Center on campus.

From his days as a district attorney in California to his three-and-a-half year term as U.S. attorney general, Meese left his mark on the American public. As a public official in California, he advanced to chief assistant to then-Governor Ronald Reagan. From the onset of the Reagan Administration, it was Meese who was considered the president's top domestic affairs adviser. He is now a distinguished Fellow at the Heritage Foundation and the Hoover Institution and is the author of a nationally-syndicated column, as well as author of the best-selling book *With Reagan*.

For the last quarter-century, no person has ranked higher in liberal causes nor been so identified with Democratic party principles than Sen. McGovern. A two-term member of the House of Representatives and a U.S. senator for 18 years, McGovern was the 1972 Democratic presidential nominee, opposing Richard Nixon. In 1982, he founded Americans for Common Sense, providing an alternative political voice on behalf of minorities, the poor and other marginalized Americans.

Each event in the Distinguished Speakers Series is free to the public, however, tickets are needed and may be picked up at the Penn State Bookstore on campus. The bookstore is open Mondays from 8 a.m. to 7:30 p.m.; Tuesdays through Fridays from 8 a.m. to 5 p.m.; and Saturdays from 11 a.m. to 2 p.m.

Other events in the series are:
■ **Gross National Product**, Washington, D.C.'s resident satirical group, will present "Mock the Vote"; 8 p.m. Saturday, Oct. 26.

■ **U.S. Air Force Capt. Scott O'Grady**, who was shot down over Bosnia while helping enforce the NATO no-fly zone, will present "Return With Honor" at 7:30 p.m. Thursday, Nov. 21.

■ **Volanda King**, the eldest daughter of Dr. Martin Luther King Jr. and Coretta Scott King, will discuss "Is Martin Luther King's Dream Alive in 1997?" at 3:30 p.m. Sunday, Jan. 19.

■ **Greg Louganis**, Olympic gold medalist and HIV positive, will discuss his autobiography *Breaking the Surface* at 7:30 p.m. Tuesday, Feb. 25.

South Asian art lectures continue

The second lecture of the South Asian art lecture series will be held at the Palmer Museum of Art at 3 p.m. Sunday, Sept. 29. The lecture series is held in conjunction with the exhibition "Cooking for the Gods: The Art of Home Ritual in Bengal," which is on view at the museum through Dec. 8. At 2 p.m., Indian sweets and special spiced tea will be served free to the public in the museum lobby.

Vidya Dehejia, curator of South and Southeast Asian art at the Arthur M. Sackler Gallery in Washington, D.C., will present a lecture titled "When God Has a Bedroom: South Indian Temples and Festival Bronzes." Her talk will be illustrated with slides.

Edwin Meese III

George McGovern

Center's fall agenda focuses on women's issues and concerns

The Center for Women Students on the University Park Campus has scheduled the following events for the fall semester:

■ **Film/discussion on "One Hit Leads to Another,"** which explores why women stay in abusive relationships; noon to 1 p.m. Wednesday, Oct. 9, in 120 Boucke Building.

■ **"Women's Health Issues in the 90s,"** brown-bag lunch presentation at noon Wednesday, Oct. 23, in 120 Boucke.

■ **"Let's Talk—Sexual Assault at Penn State"** presented by Penn State Survive, peer sexual assault counselors, at 7 p.m. Tuesday, Oct. 29, in the HUB Assembly Room.

■ **"Should Feminists Respect the Ideal of Home?"** presented by **Iris Young**, professor of public and international affairs, University of Pittsburgh, at 7:30 p.m. Friday, Nov. 1, in 101 Kern.

■ **"Everyday Sexism and Racism at Penn State,"** brown-bag lunch program with presentation and discussion of results of an on-campus study of the racism and sexism experienced by Penn State students and the ways in which individuals cope with and respond to incidents of "everyday" prejudice; noon to 1 p.m. Wednesday, Nov. 6, in 120 Boucke.

■ **Olympia Dukakis**, actress and advocate for women's rights, will speak at 8 p.m. Tuesday, Nov. 19, in Schwab Auditorium.

The Center for Women Students facilitates women's advocacy and related efforts. For more information on the center or any of these events, call (814) 863-2027 or visit the center's Web site at <http://jovuu.cac.psu.edu/~psd2>

Second Cancer Symposium to feature research and discoveries

The second annual Cancer Symposium sponsored by the Penn State University Cancer Center will be held on Thursday, Oct. 17, in the hospital auditorium at The Hershey Medical Center.

The symposium, "Cancer Prevention, Cancer Risk: Basic Principles and Clinical Applications," will feature presentations by some of the nation's leading cancer researchers and clinicians. The speakers will address current drug trials; hereditary cancer syndromes; methods of detection, prevention and counseling for people at risk; and the benefits and limitations of genetic testing. The symposium is targeted to oncologists, general practitioners, internists, surgeons, nurses, residents, basic scientists and other health care professionals.

The symposium begins with registration at 8 a.m., with the program starting at 8:25 a.m. The program will conclude at approximately 5 p.m. with a reception following until 7 p.m. The fee of \$50 includes instruction, handout materials, refreshments, lunch and the reception. For information on registration, call Continuing Education at (717) 531-6483. Registration is required by Oct. 3.

"This symposium will shed light on the explosive discoveries in molecular biology and articulate the manner in which these advances will assist in the prevention of many cancers," Dr. **Rodrigue Mortel**, associate dean and direc-

tor of the Penn State University Cancer Center, said.

Some of the speakers and the titles of their lectures are:

■ **Dr. Curtis C. Harris**, Laboratory of Human Carcinogenesis, National Cancer Institute, National Institutes of Health, "p53 Modulation of DNA Repair and Apoptosis;"

■ **Dr. Samuel A. Wells Jr.**, Bixby professor and chairman of surgery, Washington University School of Medicine, "The Role of Surgery in Cancer Prevention;"

■ **Anthony E. Pegg**, Evan Pugh professor of cellular and molecular physiology and professor of pharmacology, College of Medicine at The Hershey Medical Center, "Omithine Decarboxylase as a Target for Cancer Prevention;"

■ **Dr. Carlo Croce**, director of the Kimmel Cancer Center, professor and chair of microbiology and immunology, Thomas Jefferson University, Jefferson Medical College, "Oncogenes: From Laboratory to Bedside;"

■ **Edward Bresnick**, vice chancellor for research, professor of pharmacology, University of Massachusetts Medical Center, "Genetic Testing to Determine Cancer Risk: Where Do We Start?;" and

■ **Dr. Stephen Lemon**, Department of Preventive Medicine, Creighton University, "Cancer Prevention in Hereditary Breast and Colorectal Cancer Syndromes."

Free symposium for faculty and staff

"Creating New Learning Environments," a free, one-day full symposium planned for the University Park Campus, is a forum where faculty and staff can share ideas and strategies for communication, collaboration and technologies to improve learning.

Scheduled for Saturday, Oct. 5 from 9 a.m. to 4 p.m. in the Thomas Building, the symposium will offer morning presentations by Penn State faculty, lunchtime roundtable discussions and afternoon workshops focus-

ing on problem-based learning, assessment and designing and creating Web pages.

Although the symposium is free to Penn State faculty and staff, anyone from other schools interested in attending may do so for a \$75 fee.

For more information, look under "special announcements" on the Web at URL <http://ets.cac.psu.edu/news/FEmdex.html>, or contact **Karen Peters** at kmp138@psu.edu or by phone at (814) 863-7763.

More lectures

Controversial photographer to discuss his work

Photographer Andres Serrano will present a lecture about his work at 7:30 p.m. Tuesday, Oct. 1, in Schwab Auditorium on the University Park Campus. The lecture is being held in conjunction with the exhibition "Abstraction to Figuration: Selections of Contemporary Art from the Pincus Collection," which is currently on view at the Palmer Museum of Art. This exhibition features four of Serrano's photographs.

Brooklyn-native Andres Serrano's maturity as an artist emerged in the early 1980s with photographs that dealt with unresolved feelings about his Catholic upbringing.

In 1989, Serrano gained national prominence when his photograph, *Piss Christ* (1987), included in an exhibition that had been funded by the National Endowment for the Arts, came to the attention of Senators Alfonse D'Amato and Jesse Helms, who considered it blatant blasphemy. The photograph quickly became an emblem of decadence and amorality for those hoping to cut or eliminate federal funding of the arts.

Serrano's lecture is free to the public. The exhibition, "Abstraction to Figuration: Selections of Contemporary Art from the Pincus Collection," will remain on view at the Palmer Museum through Dec. 15.

Progress made since 1995 women's conference is topic of Oct. 3 lecture in Harrisburg

"The UN Women's Conference One Year Later" will be the topic of a Thursday, Oct. 3 discussion from 11 a.m. to 1 p.m. at the Penn State Harrisburg Eastgate Center. The session will focus on the progress made since the UN Fourth World Conference on Women was held in September 1995, and will feature portions of a national teleconference highlighting what communities across the nation have done.

Irene Baird, director of the Women's Enrichment Center, and Patricia Johnson, associate professor of humanities and literature at Penn State Harrisburg, will serve as facilitators for the session.

This workshop is free to the public, but registration is necessary to ensure adequate seating. To register, call the Eastgate Center at (717) 772-3590. This program is co-sponsored by Penn State Harrisburg Women's Studies Program, the Women's Enrichment Center and the Eastgate Center.

SUNY professor to give talk on genes

Robert R. Sokal from the State University of New York at Stony Brook is the 1996 Paul T. Baker Lecturer in Human Biology and will speak on "Genes, Language and History" at 4 p.m. Monday, Oct. 7, in 112 Kern on the University Park Campus.

Sokal, who was born in Vienna, received his B.S. degree in biology from St. John's University in Shanghai and his Ph.D. degree in zoology from The University of Chicago. He started his career in the Department of Entomology at the University of Kansas, where he studied systematics and geographic variation, numerical taxonomy and the genetics and ecology of *Drosophila*, *Tribolium* and houseflies. In 1968 he moved to the Department of Ecology and Evolution at the State University of New York at Stony Brook where he is currently distinguished professor emeritus.

The Paul T. Baker Lectureship in Human Biology and Anthropology was established in 1987 by former students of Professor Paul T. Baker and by the Department of Anthropology. The lectureship honors Baker for his distinguished service to graduate education and research, and for his efforts to promote a multidisciplinary approach in the study of the biology and behavior of humankind.

Women's Health Care Conference set for Oct. 16

A Women's Health Care Conference sponsored by The Milton S. Hershey Medical Center Department of Nursing will be held on Wednesday, Oct. 16, at The Hershey Lodge and Convention Center.

The conference is designed to update nurses in all settings about health care topics affecting women today.

The fee .95 per person includes the cost of instruction, hand-out materials, refreshments and lunch. Registrations must be received by Oct. 2. For registration information or information on topics to be covered, call the Penn State Continuing Education office at (717) 531-6483.

Former president of Michigan to talk about higher education's future

James J. Duderstadt, president emeritus of the University of Michigan, will discuss "The Future of American Higher Education" as

the first lunchtime speaker in the new Penn State National Issues Forum, established by the Faculty Staff Club.

Duderstadt will deliver his address in the Alumni Ballroom of the Nittany Lion Inn on the University Park Campus on Oct. 8. The address will later air on WPSU radio.

Duderstadt will share his perspective on the future of higher education, in particular the future of flagship research universities, during a period of dwindling state and federal support. He served as president of the University of Michigan from 1988 until 1996. He is founder and director of the Millennium Institute, a research center exploring the implications of information technology for the future of higher education.

During his career Duderstadt received numerous national awards for his research, teaching and service activities. These include the National Medal of Technology for ex-

James J. Duderstadt

plary service to the nation; the E.O. Lawrence Award for excellence in nuclear research; the Arthur Holly Compton Prize for outstanding teaching; and selection as the National Engineer of the Year by the National Society of Engineering.

Duderstadt has served on numerous public and private boards and also served

recently as chairman of the board of directors of the Big Ten Athletic Conference.

The National Issues Forum will include a buffet lunch starting at 11:30 a.m., a speech approximately 30 minutes long, and then about 15 minutes of questions and answers from the audience. The format will be similar to the one used by the National Press Club in Washington, D.C., which can often be heard on WPSU radio.

Tickets for the event are \$10 and reservations can be made by mail or by stopping by the Faculty Staff Club office at 110 HUB. For more information, call (814) 865-7590.

Oct. 16 forum to examine public education

Noontime forums on three issues at the heart of Pennsylvania's public education are coming to the Penn State Downtown Center in Harrisburg.

Sponsored by the Pennsylvania State Data Center at Penn State Harrisburg, the noon lectures kick off Oct. 16 with a look at "Inequities in School Districts."

The presentation by Arnold Hillman, adviser for the Pennsylvania Department for Rural and Small Schools, will focus on state funding issues and how the Commonwealth can achieve an equitable system.

On Oct. 23, the Downtown Center will host a noon discussion on "Early Care and Education: Giving Every Pennsylvania Child a Head Start." As part of the presentation,

Jan Benso, executive director of Pennsylvania Partnerships for Children, will focus on a number of points including: how to give children a head start on education; and the effect of state and federal welfare reform laws on early childhood education.

The final installment in the series on Nov. 26 will focus on the problem of school violence. Henry Sontheimer, senior evaluation analyst with the State Commission on Crime and Delinquency, and Brian Bumpanger of the Center for Safe Schools will review current information and strategies.

All presentations at the Downtown Center are free to the public. Pre-registration to ensure adequate seating is encouraged. Call (717) 946-6464.

Legal implications for campus religion is focus of Oct. 3 Values in the Community talk

Gary Pavela, director of judicial programs at the University of Maryland, College Park and editor of the national quarterly *Synopsis: Law and Policy in Higher Education*, and its sister publication *Synopsis Weekly Report*, will lead a public discussion on "Legal Implications for Religion on Campus: Post-Rosenberger" at 7:30 p.m. Thursday Oct. 3, in 101 Kern Building on the University Park Campus.

This seminar is the second in a series of Values in the Community series sponsored by Student Affairs and the Center for Ethics and Religious Affairs and Centers for Community Education, and is open to the public.

The 1995 Supreme Court decision that campus religious organizations have the same right to be funded through normal student organization funding as any other student group came as a result of a suit filed against the University of Virginia. The case

involved the University's decision not to grant university funding for publication of a Christian magazine.

Pavela has an M. A. in intellectual history from Wesleyan University, a law degree from the University of Illinois and has been a Fellow at the University of Wisconsin Center for Behavioral Science and Law. A recognized expert on academic ethics, he is also past president of the National Center for Academic Integrity and has been a consultant on legal issues and student conduct policies at many leading universities.

Clay Clavert, assistant professor of communications at the Pennsylvania Center for the First Amendment in the College of Communications, will join in the discussion.

For more information, contact Ken Clarke at (814) 865-6484.

The ARTS

AT PENN STATE

Historic photography

Male Trio, circa 1900, an overpainted tintype from the Henisch Collection of the History of Photography is on display in the Rare Books Room, W342 Pattee Library on the University Park Campus, through Oct. 14.

Plays planned

The School of Theatre Arts Workshop in Diverse Cultures will present four more plays in studio performances this fall: "The Blacks" by Jean Genet, directed by Charles Dumas, assistant professor of theatre arts, on Thursday, Oct. 10, "Giving Up The Ghost" by Cherrie Moraga, directed by Josh Aubin on Thursday, Oct. 31; "Martin Luther King: A Modern Japanese Noh Play" by Kenneth Yasuda, directed by Richard Nichols, professor of theatre arts, on Thursday, Nov. 14; and a Jewish-American play selected and directed by Cary Libkin, associate professor of theatre arts, on Thursday, Dec. 5. All plays begin at 4:45 p.m. and will be in the Pavilion Theatre on the University Park Campus (except "Giving Up The Ghost," which will be presented in a venue to be announced later).

"The Blacks" by Genet was written to be performed by an all-black

company with some of the actors portraying white people wearing white masks.

Moraga will be in residence at Penn State in late October. During her stay, the workshop will showcase a studio production of her play about three women. Nichols just returned from a sabbatical in Japan and China, where he deepened his understanding of traditional and modern Asian theater. He will share some of his experience with the class and audience. Libkin's project will highlight some of the rich tradition of Jewish-American theater.

After each play there will be a short question-and-answer session. For more information, call (814) 863-9413. The plays are free to the public.

Ambassadors present cello/piano recital

School of Music faculty cellist Kim Cook and pianist Carl Blake will present a recital at 8 p.m. Thursday, Oct. 3, in the College of Arts and Architecture Music Building Recital Hall. They will collaborate to perform the "sonatas" by Cesar Franck and Samuel Barber. They also will perform "Soliloquy" by American composer George Rochberg; "Tango" by Argentinian composer Astor Piazzola; and arrangements of Negro spirituals.

The performance is free to the public.

Hi-Lo's to perform for Bach's Lunch

The Hi-Lo's from the Penn State Glee Club will perform for the Bach's Lunch concert at 12:10 p.m. Thursday, Oct. 3, in the Helen Eakin Eisenhower Chapel on the University Park Campus. The free, 20-minute concert is

sponsored by the College of Arts and Architecture School of Music and the University Lutheran Parish.

The Hi-Lo's, a group of 14 voices, is directed by Bruce Trinkle, associate professor of music. The group will perform "Politics and Music" for the Bach's Lunch program. Their program will include selections from Gershwin's political musicals "Strike Up the Band" and "Of Thee I Sing," "Politics and Poker" from "Fiorello," and the premiere of a new set of Scottish folk songs arranged by Trinkle.

Audience members may bring their own bag lunches to eat after the concert in the Roy and Agnes Wilkinson Lounge. Coffee and tea will be provided.

Odyssey on WPSU

On the next episode of Odyssey Through Literature, Mark Fearnow of the Department of Theatre Arts speaks about the life and work of playwright Claire Boothe Luce.

After hearing an excerpt from Luce's play "The Women," host Leonard Rubinstein notes that many of Luce's critics described her as "a merciless denigrator of her own sex." Fearnow responds that Luce insisted the play was misinterpreted and denied that it was against women as a whole.

Fearnow also discusses how Luce lost her talent for cruel wit because of three major events that occurred in her later life. She became involved in politics, lost her daughter in a car accident and converted to Catholicism. Fearnow explains that even Luce believed that her creative talents were killed by these changes in her life.

Odyssey Through Literature is produced as a continuing education service of the Department of Comparative Literature. It airs Sundays at 6:30 on WPSU 91.5 FM.

Historic photography collection on display

The Rare Books Room and the Historical Collections and Labor Archives of the University Libraries have on display a survey of the painted photograph, from its 19th century origins through World War I, with selections from the Heinz K. and Bridget A. Henisch Collection of the History of Photography.

As photography grew more popular following its invention in 1839, its admirers did not understand how a medium that rendered shapes and textures in exquisite detail could fail to render them in realistic color. Photographers, eager to please their public, began "painting" their photographs with substances ranging from watercolors and oil to chalk and crayon. Images were enlarged, enhanced and framed to simulate the traditional painted portrait.

The Henisch Collection, which is housed in and administered by the Historical Collections and Labor Archives of Pattee Library, includes a rich variety of original 19th and 20th century sources, in a multitude of techniques. In the exhibit are many

BRYCE JORDAN CENTER

Upcoming events

Upcoming events at The Bryce Jordan Center on the University Park Campus include:

■ Oct. 4: Royal Lipizzaner Stationers, 8 p.m.; tickets \$14.50 for adults; \$12.50 for children 12 & under and senior citizens. Limited Gold Circle seating is available for \$17.50 (all seats reserved).

■ Oct. 7: Dave Matthews Band with Boxing Gandhi, 7:30 p.m.; tickets \$22.50 (reserved seating).

■ Oct. 12: Penn State Tailgate Party, four hours before kickoff; tickets \$15 for adults; \$10 for children 12 and under.

■ Oct. 13: NBA Preseason, Atlanta Hawks vs. L.A. Clippers, 7 p.m.; tickets \$19.50/\$15.50/\$9.50.

■ Oct. 19: Penn State Tailgate Party, four hours before kickoff; \$10 for children 12 and under.

■ Nov. 2: Penn State Tailgate Party, four hours before kickoff; \$10 for children 12 and under.

■ Nov. 9: WYNNONA with special guest Ty Herndon, time and tickets to be announced.

■ Nov. 23: Penn State Tailgate Party, four hours before kickoff; tickets \$15 for adults; \$10 for children 12 and under.

For a listing of sporting events to be held at The Bryce Jordan Center, or for more information on any event listed here, call the center at (814) 865-5555 or visit the Web site at <http://www.bjc.psu.edu>.

portraits, including overpainted death portraits, most commonly those of children, as well as overpainted landscape and travel scenes that display the origins of later picture postcards.

The exhibit will run through Oct. 14 in the Rare Books Room, W342 Pattee Library, open Monday through Friday from 8 a.m. to 5 p.m.

International artwork at Worthington Scranton

A collection of international artwork, on loan from Boyd's Mills Press, is on display in the Penn State Worthington Scranton Campus Study Learning Center through Oct. 15. The original artwork was created for the books *Sleep Rhymes Around the World* and *Street Rhymes Around the World* assembled by award-winning author Jane Yolen.

UNIVERSITY PARK CALENDAR

SPECIAL EVENTS

Thursday, September 26

School of Music, 12:10-12:30 p.m., Eisenhower Chapel.
Bach's Lunch Concert: Wunderbrass trio.
Center for the Performing Arts, 8 p.m., Schwab. "Sanford Sylvan and David Breiman."

Friday, September 27

■ Gallery Talk, 2 p.m., Christoffers Lobby. Mary F. Linda on "The Gods Must Be Hungry."

Tuesday, October 1

"Separation and Purification Strategies for Biotechnology Products" workshop, 8:30 a.m., Frear Laboratory, Through Oct. 4.

School of Music, 8 p.m., Recital Hall. Richard Kennedy, tenor and Elizabeth Ethers Asmus, harp.

Thursday, October 3

School of Music, 12:10 p.m.-12:30 p.m., Eisenhower Chapel.
The Hi-Lo's from the Penn State Glee Club.
School of Music, 8 p.m., Recital Hall. Kim Cook, cello.

Friday, October 4

School of Music, 8 p.m., Recital Hall. Penn State Philharmonia.

■ Center for the Performing Arts, 8 p.m., Eisenhower. The Tibetan Song and Dance Ensemble."

Saturday, October 5

Center for the Performing Arts, 8 p.m., Eisenhower. Roy Hargrave Quintet.

Sunday, October 6

Center for the Performing Arts, 3 p.m., Eisenhower. Flying Karamazov Brothers.

SEMINARS

Thursday, September 26

Physics, 3:30 p.m., 101 Ormond. Jay Patel on "The Role of Tunable Optical Resonators in Science and Engineering."
Gravity Center, 11:30 a.m., 339 Davey. Abhay Ashtekar on "Probing Semi-Classical States in Quantum Gravity."
Department of Food Science, 4 p.m., 117 Borland. Ed Mills on "High temperature packaging to prevent lipid oxidation."
Ceramics, 11 a.m., Steidle. Gerbrand Ceder on "First-Principles Calculations and Computational Experiments in Oxides."

Friday, September 27

Philosophy, 4 p.m., 124 Sparks. Jay Lambert, Joseph Kockelmans, David Ciavatta, Derrick Calandrella and Kym MacLaren on "Synthesis and Backwards Reference in Husserl's Logical Investigations."
Geography, 3:30 p.m., 206 Walker. Deryck Holdsworth on "Downtown Offices in the Transition to Corporate Capitalism: Insights from Buffalo, N.Y."

Sunday, September 29

■ Palmer Museum of Art, 3 p.m., Lipcon Auditorium. Vidya Dehejia and Arthur M. Sackler on "When God Has a Bedroom: South Indian Temples and Festival Bronzes."

Monday, September 30

Comparative Literature, 12:15-1:20 p.m., 101 Kern. Adrian

Unusual design

"Santa Barbara Wedge" by Beverly Pepper is one of the featured pieces in the Sculpture Garden outside Pattee Library on the University Park Campus.

Photo: Greg Grieco

Wanner on "The Poetics of a Problematic Genre, or, What on Earth is a Prose Poem?"

Gravity Center, 2 p.m., 339 Davey Lab. Roger Penrose on "Positivity of Mass in General Relativity."

■ Religious Studies, 11:15 a.m.-12:15 p.m., 22 Dieck. Roger T. Ames on "Chinese Philosophy and the Art of Warfare."

Physics, 3:30 p.m., 339 Davey Lab. Gene Wayne on "Is the Nonlinear Schrödinger Equation a Good Model for Nonlinear Condensed Matter Physics?"

Tuesday, October 1

Geosciences, 4 p.m., Walker 112. Michael Ryan on "Doubtfully Hydrothermal Convection Systems."

Palmer Museum of Art, 7:30 p.m., Schwab. Andres Serrano on "Abstraction to Figuración: Selections of Contemporary Art from the Pincus Collection."

Wednesday, October 2

Division of Undergraduate Studies, noon, 305 HUB. Ron Naranski on "Student Aid: Should It Affect Academic Advising?"

Thursday, October 3

Ceramics, 11 a.m., 301 Steidle P. Phule on "Mesoscale Dispersions of Ceramic and Metallic Particulates for Active Damping Applications."

Physics, 3:30, 101 Ormond. Max Lagally on "Nanoscience: A New Universe (But is it Physics?)"

Gravity Center, 11:30 a.m., 265 Willard. Madhavan Varadarajan on "Quantizing Diatomic Black Holes."

Friday, October 4

Geography, 3:30 p.m., 206 Walker. Cecil Goodwin on "ITS (Intelligent Transportation Systems): Boon or Boondoggle?"

Philosophy, 4 p.m., 124 Sparks. Eihanan Yakira on "Spinoza and the Philosophy of the Subject: The Mind's Body."

Sunday, October 6

■ Palmer Museum of Art, 3 p.m., Lipcon Auditorium. Pika Ghosh on "Cooking for the Gods: Women and Household Rituals in Bengal."

EXHIBITS

Palmer Museum

"Selections of Contemporary Art from the Pincus Collection," through Dec. 15.

"The Wood Engravings of Warren Mack," through Jan. 5, 1997.

■ "Cooking for the Gods: The Art of Home Ritual in Bengal," through Dec. 8.

"When Coal Was King: Paintings from the Steidle Collection, College of Earth and Mineral Sciences," through Dec. 8.

"BFA Exhibition," through Oct. 19.

Kern Exhibition Arena

"Lewis, Untangling Strands," Robert Vander Voort. Through Oct. 15.

The pottery of Ian Stainton, through Oct. 13.
"Happy Feet," The Pennsylvania Dance Theatre. Through Oct. 13.

Ritenour Health Center

"Art on the Move: The paintings of Marjut Kaananen-Katz," through Oct. 16.

The HUB Formal Gallery

"Geography of the Unconscious," Nancy Moore. Through Oct. 19.

The HUB Browsing Gallery

■ The work of Shalom Noiman, through Oct. 20.

The HUB Art Gallery

The watercolors of Dorothy Grebos, through Oct. 13.
Shaker-style boxes by Steve Strouse, through Oct. 13.

The HUB Research and Scholarship Area

"Pennsylvania's Great Treasure: The Capitol Building," Ed Simmons. Through Sept. 29.

■ Reflects an international perspective

SEPTEMBER 26 - OCTOBER 6

Keystone 21 partnership earns \$1.5 million research grant

Keystone 21, a partnership between Cheyney University, the Rodale Institute and Penn State's College of Agricultural Sciences and Commonwealth Educational System, has received a \$1.5 million grant from the W.K. Kellogg Foundation to continue participating in the Food Systems Education Initiative, a national effort to design educational strategies that will prepare food system professionals for the 21st century.

The Keystone 21 project is divided into two phases. The first, an 18-

month "visioning" process, was completed in 1995. Hundreds of Pennsylvanians participated in a series of meetings during which they were asked to develop a vision of the food system in the year 2020 and discuss the kinds of changes higher education should make to help food system professionals realize this future.

The program now begins a five-year implementation phase. Over the next several months, researchers will work with focus groups to discuss a variety of issues. By mid-1997,

Keystone 21 will issue a request for proposals that aim to revolutionize food system education. Researchers will be looking for creative educational initiatives that emphasize innovative collaboration among the partners.

One of the goals of the project is to impact the future generation of food system professionals to produce enough quality food, making it accessible to all. It is also hoped that by educating the next generation, our natural resources can be kept intact.

The W.K. Kellogg Foundation was established in 1930 to "help people help themselves through the practical application of knowledge and resources to improve their quality of life and that of future generations." To achieve the greatest impact, the foundation targets its grants toward specific local points or areas. These include food systems and rural development; youth, education and higher education; and philanthropy and volunteerism.

"Hoops for Hope" to raise funds, awareness

Former and current members of the Lady Lion and Nittany Lion basketball teams will play the Pittsburgh Steelwheelers, a wheelchair basketball team from the HealthSouth Harnaville Rehab Center, Wednesday, Oct. 9, in a game to benefit the Centre County United Way.

"Hoops for Hope," sponsored by employees in Undergraduate Education at the University, is scheduled for 7 p.m. in Recreation Building on the University Park Campus.

Co-team leaders for Undergraduate Education's 1996 United Way Campaign are **Janet Bowman**, Academic Assistance Programs, and **Donna Meyer**, University Scholars Program Office.

"Our goal is not only to support our local United Way but also to raise an awareness of the athletic ability of the physically challenged," Meyer said. "Although athletic ability, an attitude of enthusiasm and competitiveness, and a winning spirit can be found in all team players, the determination and sense of achievement shared by the Pittsburgh Steelwheelers, and, perhaps, by all wheelchair athletes, is a spirit of its own."

The Pittsburgh Steelwheelers began as a six-member wheelchair basketball team in 1977 and grew into a diverse organization of more than 75 active men and women who participate in a variety of sports as well as community activities. Today, the Steelwheelers, like hundreds of wheelchair sports organizations across the country, strive to compete in the National Games and ultimately represent the United States on an international level.

Penn State athletes slated to play in "Hoops for Hope" include former Lady Lions **Kim Calhoun**,

Tina Nicholson, **Bethany Collins-Irwin** and **Patti Longenecker**, former Nittany Lions player **Nate Althouse**, and current Nittany Lions **Bryan Machamer** and **Dana Fritz**. **Don Ferrell**, academic athletic counselor, who has worked with wheelchair athletes in the past, will serve as coach. **Karol Brooks**, former international wheelchair athlete, will serve as assistant coach.

The fund-raising event will include appearances by the Nittany Lion mascot and the Penn State Pep Band. A number of door prizes, including autographed basketballs from the Penn State basketball teams, will be awarded.

Tickets are available for a donation of \$5 and can be obtained from any employee in Undergraduate Education or at any of the following Uni-Mart locations: 106 W. College Ave., Pleasant Gap; 200 E. College Ave., State College, and Carson's Corner, Port Matilda.

For more information, contact **Janet Bowman**, (814) 865-5379, or **Donna Meyer**, (814) 863-2635.

Faculty/Staff Alerts

Presidential open house

Here's your chance to talk informally to the president and provost and tour their offices in 201 Old Main.

For the second year in a row, The Office of the President, including the offices of President **Graham B. Spanier** and Executive Vice President and Provost **John Brighton** will be open to faculty, staff, students and friends from 4 to 5:30 p.m. on Friday, Sept. 27.

Light refreshments will be served. In honor of the day, the Old Main tower also will be open from 4 to 5:30 p.m.

International achievement award

Applications and nominations are currently being accepted for three W. LaMar Kopp International Achievement Awards to be bestowed by the Office of International Programs. The awards annually recognize three members of the University community who have contributed significantly to the advancement of Penn State's international mission. Each award carries with it a certificate of recognition and a \$1,000 stipend.

To request application/nomination forms, contact **Pam Gudeman** at (814) 865-0414 or by e-mail at pkg2@psu.edu. Applications and nominations, plus all supporting materials, must be received in 222 Boucke Building on the University Park Campus by Friday, Dec. 6.

HRDC courses

The following courses are being offered by the Human Resource Development Center. For a description of the courses, log in to the HRDC Web site at <http://www.ohr.psu.edu/hrdc/HOME.htm>. To register for free courses, please call (814) 865-8216. Registration for fee-based courses requires a completed registration form located on page 67 of the HRDC course catalog.

- **Improving Your Personal Effectiveness:** Meets for two sessions on Tuesdays, Oct. 8 and 15 from 8:30 a.m. - noon, in 319 Rider Building. Cost is \$55.

- **Making Sense of Information:** Meets Oct. 7 from 1 to 5 p.m., in 319 Rider Building. Cost is \$35.

- **Supervising Technical Service Employees:** Meets Oct. 9 from 1 to 4:30 p.m., in 319 Rider Building. Cost is \$35.

- **Becoming an Adult Learner in Higher Education:** Meets Oct. 9 from 8:30 by 11:45 a.m., in 319 Rider Building.

- **Designing Winning Research Proposals I:** Meets for two sessions on Wednesdays, Oct. 9 and 16 from 9 a.m. to noon, in 125 Reber Building. Cost is \$75.

Library seminars

The University Libraries is offering the following series of seminars during October to help library users learn more about the growing number of databases accessible through the Library Information Access System (LIAS) and on CD-ROM. LIAS searching techniques that enable users to maximize their searching power also will be presented.

In an effort to accommodate as many participants as possible, some sessions are offered more than once. To register or learn more about the seminars, send an e-mail to signup@psulias.psu.edu. If you have any additional questions, contact **Doris Herr** at (814) 863-0325. Seating is limited so register early. Information on the seminars also can be found by typing **HELP WORKSHOP** when using LIAS or on the Libraries' Web site at <http://www.libraries.psu.edu>.

- **Penn State Libraries Catalog in LIAS** Oct. 3, 7 and 30: 10 a.m. to noon; Oct. 4, 12, 23 and Oct. 24: 3 to 5 p.m.; Oct. 1 and 11: 11 a.m. to 1 p.m., Oct. 15: 4 to 6 p.m. All sessions take place in Tower Room 402, Central Pattee Library

- **Beilstein CrossFire - Organic Chemistry** Oct. 1: 9 to 11 a.m., Reference Lecture Room, East Pattee Library

- **Career Information Resources** Oct. 24: 5 to 7 p.m., Tower Room 402, Central Pattee Library

- **Census Data on the Internet** Oct. 24: 8:30 to 10 a.m., Tower Room 402, Central Pattee Library

- **Chemical Abstracts** Oct. 14: 9 to 11 a.m., Reference Lecture Room, East Pattee Library

- **Citation Indexes** Oct. 8: 9 to 11 a.m., Reference Lecture Room, East Pattee Library

- **Earth Sciences databases** Oct. 8: 11 a.m. to 1 p.m., Tower Room 402, Central Pattee Library

- **Education databases** Oct. 2: 1 to 3 p.m., Tower Room 402, Central Pattee Library

- **Identifying Existing Instructional Software** Oct. 17: 10 a.m. to noon, Tower Room 402, Central Pattee Library

- **Literary and Historical Manuscripts** Oct. 10: 10 a.m. to noon, Tower Room 402, Central Pattee Library

- **Literature databases** Oct. 14: 10 a.m. to noon, Tower Room 402, Central Pattee Library

- **Molecular Biology** Oct. 31: 3 to 5 p.m., Tower Room 402, Central Pattee Library

- **NEXIS databases** (Note: LEXIS/NEXIS is available only for Penn State faculty, staff and students engaged in course-related research. Participants must present a valid Penn State ID at the workshop.) Oct. 10: 3 to 5 p.m., Tower Room 402, Central Pattee Library

Regional telecast

Penn State's first Big Ten football game of the season, at Wisconsin on Saturday, Sept. 28, has been selected by ABC to be televised regionally at 3:30 p.m.

The telecast will be the sixth announced TV appearance of the season for the Nittany Lions, who have appeared on TV each of their first four games.

Harvest time

Pumpkins and other sure signs of fall were on display at the recent Horticulture Show on the University Park Campus. Now that fall is officially here, it won't be too much longer before these and other pumpkins get their first coating of frost.

Photo: Andrea Hurlley

Integrated media center undergoes name change

The Faculty Integrated Media Center on the University Park Campus is now named the Faculty Multimedia Center (FMC) and has expanded its services.

The FMC is a place for Penn State faculty and staff to receive help integrating technology into the learning process. For example, if a faculty member has some videotape, 35mm slides, or pictures for use in a Web page or classroom presentation, the FMC can help transfer these materials into computer formats.

Faculty who want to integrate technology into the learning process can make an appointment to discuss their needs with FMC consultants. They also can come to the FMC and use the equipment to digitize their own materials, or arrange to drop off their materials for FMC staff to digitize, all free of charge.

The center, located in 214N Computer Building, has been continually growing since it officially opened in September 1993. Beginning this semester, the FMC will have expanded hours, more consultants and additional hardware and software.

The FMC is part of the Penn State New Media Centers (InterPaws) and is provided as a service of the Center for Academic Computing. Facilities are available by appointment Monday, Wednesday and Thursday from 9 a.m. to 5 p.m. Consultation questions and requests for appointments can be e-mailed to fmc@psu.edu or arranged by calling (814) 863-7051.

For more information, visit the center's Web site at <http://stingray.cac.psu.edu/fmc>.

Industrial Research Office to lead tenant development at Research Park Phase 2

Penn State's Industrial Research Office, under the leadership of Arthur A. Heim, has been designated to lead the tenant development effort in Phase 2 of the University's Research Park.

Heim has been head of IRO, which promotes industry-university partnerships, since 1990. Previously, he was director of new business and training for Penn State's Ben Franklin Technology Center.

K. Jack Yost, associate vice president for research and technology transfer, said, "The consolidation of responsibility for park development within IRO, a unit of Penn State's

Research and Technology Transfer Organization, will strengthen the marketing of Phase 2 of the park and help us to better serve industry."

Phase 1, now fully occupied, includes the Technology Center Building, which houses 11 companies in a small business incubator under the same roof with the University's Research and Technology Transfer Organization; The Penn State Scanticon; and the Materials Research Institute Building.

Phase 2 will begin with a multi-tenant building as soon as pre-leasing is completed.

News in Brief

Career Exploration Day

Organizers of the semi-annual Career Exploration Day are looking for departments and units at University Park to participate in this fall's program that introduces ninth-grade students to various occupations.

Two Career Exploration Days, scheduled for Nov. 7 and 21, will be held for students from the Bald Eagle Area, Bellefonte, Penns Valley and State College Area school districts. The program, a collaborative effort of the four school districts, the Centre County Vocational-Technical School and the Chamber of Business and Industry of Centre County, will begin at 9 a.m. as students are transported to the host work site by the schools. The students remain at the work site until 2 p.m.

For more information about the program or to sign up to host one or more students, contact Eric Loop, continuing education representative, 118 Keller Building, University Park, at (814) 863-0299; by fax at (814) 863-7042; or by e-mail at ewl1@cde.psu.edu.

United Way Golf Tournament

Applications are still being accepted for the first Penn State United Way Golf Tournament to be held Friday, Oct. 4, at the Blue Course on the University Park Campus.

The tournament will begin with lunch at noon. The 18-hole round of golf will begin at 1 p.m.

Entrance fee for the four-person scramble event is \$40 per person and includes greens fees, cart, tee prizes, on-course refreshments, catered lunch and team prizes.

Applications are available from your United Way representative, the Penn State Golf Course Pro Shop or by contacting Paul Peworchik at (814) 863-1511; e-mail: pjp@psu.edu, or Ken Miller, Penn State Golf at (814) 863-0754.

New programs at the McCoy Natatorium

Several new aquatic programs are beginning this fall at the McCoy Natatorium and White Building pools on the University Park Campus:

■ **Springboard diving:** Expert instruction and close supervision is offered to novices through advanced springboard divers. Basic tumbling and posture skills are taught in addition to actual dives is directed by former NCAA All-American diver Kimberly DeCloux Brown.

■ **Competitive swimming:** Competitive swimmers of all ages may partake in instruction and training offered by the McCoy Natatorium staff, many of whom are former Penn State swimmers. More than eight different ability groups have been formed with weekly practices. They meet anywhere from two to six times per week.

■ **Stroke analysis and refinement clinic for competitive swimmers:** This is a fine-tuning, in-water clinic designed to improve the competitive strokes, starts and turns of aspiring competitive swimmers. The clinic is taught by former University of Michigan swimmer Amy Bohnert.

■ **Aquacizer:** Faculty, staff and students are encouraged to participate in these weekly wet workouts that don't require you to swim or put your face or hair underwater.

Call the McCoy Natatorium for details, including fees and schedules, at (814) 865-1432 or (814) 865-1433, or fax (814) 865-3728.

Staff

Sandra K. Dymond, staff assistant VI at The Hershey Medical Center.

William C. Edwards, director, regional programs, in Division of Development and Alumni Relations.

Patricia A. Ellenberger, administrative specialist in College of the Liberal Arts.

Le Eta J. Ersting, assistant to the dean for public relations in College of Health and Human Development.

James R. Fail, project coordinator II in Office of Physical Plant.

Angel P. Florentin, applications systems analyst at The Hershey Medical Center.

Larry C. Frazier, supervisor, renovations II, in Office of Physical Plant.

Leslie D. Frye, senior applications programmer/analyst in Research and Graduate School.

Cheryl A. Gallagher, assistant director, student aid, in Vice Provost for Enrollment Management and Administration, Office of Student Aid.

Andres Gaydos, senior technician/research, at The Hershey Medical Center.

Linda L. Gearhart, information systems support consultant in Computer and Information Systems, Administrative Systems.

Susan K. Gordon, senior research technologist in College of Agricultural Sciences.

Douglas W. Gray, administrative manager, Biostatistics & Epidemiology at The Hershey Medical Center.

Catherine S. Grigor, assistant director in Continuing and Distance Education.

Ronald A. Gurskey, project coordinator II in Office of Physical Plant.

Douglas F. Gwynn, manager, Housing Services I, in Housing and Food Services.

Elizabeth A. Haas, staff assistant IV in Office of Physical Plant.

Dennis Haines, CADD operator/project coordinator at The Hershey Medical Center.

Terrance W. Hansel, project coordinator II in Office of Physical Plant.

Jacqueline A. Harrison, pediatric oncology program aide at The Hershey Medical Center.

Pamela A. Hearn, staff assistant V in Office of Physical Plant.

Georganna M. Hillard, staff assistant VI in Office of Physical Plant.

Kathleen Hillegas, staff assistant VII in Student Affairs.

Harold R. Hockman, network coordinator in Office of Human Resources.

Linda Hosterman, staff assistant VI in Applied Research Laboratory.

Ruth A. Howe, staff assistant VI at The Hershey Medical Center.

John P. Ikenberry, development officer in Division of Development and Alumni Relations.

Virginia A. Ishler, program assistant in College of Agricultural Sciences.

Michele Jais, director, Enrollment Management, at the Penn State Hazleton Campus.

Lana L. Karl, billing, information specialist at The Hershey Medical Center.

Baked or fried?

Most fairs include some sort of refreshment, and the fourth annual Great Insect Fair held Sept. 21 on the University Park Campus was no exception. Fairgoers like Tony Minichiello, 12, of State College, were able to sample a variety of insects. Minichiello, a son of Sandy Minichiello, interview coordinator for the MBA program, ate meal worms cooked with mushrooms, garlic and basil on a belt with his parents. The fair, sponsored by the Department of Entomology, was held to showcase the diversity and beauty of insects.

Donna J. Kemper, staff assistant V in Computer and Information Systems, Center for Academic Computing.

Russell Knapp, fire protection engineer at The Hershey Medical Center.

Hilary E. Kutchan, staff assistant V in Continuing and Distance Education.

Christopher L. Lacey, nursing manager at The Hershey Medical Center.

Janice F. Landis, staff assistant VII at The Hershey Medical Center.

Spencer Lewis, development officer in Division of Development and Alumni Relations.

Dayna R. Lowe, staff assistant V in The Eberly College of Science.

Technical Service

Brenda Aikey, janitorial worker in Office of Physical Plant.

Brenda L. Barnhart, lab technician B at The Hershey Medical Center.

Earl Bensinger, group leader, Central Processing, at The Hershey Medical Center.

Rhonda M. Brungart, janitorial worker in Office of Physical Plant.

Gloria K. Catich, athletic equipment and facilities worker in Intercollegiate Athletics.

Barry Coder, athletic equipment and facilities worker in Intercollegiate Athletics.

Patricia M. Harris, group leader/mail clerk driver, at Penn State Erie, The Behrend College.

Susan K. Hart, snack bar/janitorial worker A at the Penn State Altoona Campus.

Susan C. Kerstetter, athletic equipment and facilities worker in Intercollegiate Athletics.

Regina M. Lucas, janitorial worker in Office of Physical Plant.

Joseph E. Martini, biological technician B in College of Agricultural Sciences.

Shaaron Michaels, receiving clerk at The Hershey Medical Center.

Dennis Porter, maintenance worker, general B, in Intercollegiate Athletics.

Sherrie L. Putt, patient service aide at The Hershey Medical Center.

Dennis Schneider, stock delivery clerk in Business Services.

Flynn M. Smith, truck driver, janitorial, in Office of Physical Plant.

Danny D. Thompson, area facilities/maintenance mechanic in Office of Physical Plant.

Ray D. Trigger, lead roofer/carpenter in Office of Physical Plant.

Six Fulbright Scholars at University Park

Six international Fulbright scholars will be or are now at University Park to teach, consult and conduct research with colleagues under the sponsorship of the J. William Fulbright Foreign Scholarship Board and the United States Information Agency.

"We are very pleased when international scholars choose Penn State as the university where they carry out research in the United States," said Mary Gage, University Fulbright program adviser. "They come not only as scholars, but as representatives of their countries and cultures, and they enrich Penn State in many ways by their presence here."

The Visiting Scholars Program represents a significant part of the federal government's commitment to international educational exchange. On returning to their home institutions, Fulbright scholars will share their experiences at Penn State through seminars, meetings and publications.

The six scholars, who they are working with and their areas of study are:

■ **Olexander Hrysenko**, Institute of Cultural Policy, Ukrainian Center of Cultural Studies, Kiev, Ukraine. He can be reached in care of **Michael Naydan**, director, Center for Russian and East European Studies, 211 Sparks Building. He will be in residence January 1997 through August 1997, and his research project is a study of U.S. public cultural policy and private patronage of the arts.

■ **Martin Ibarra**, National Autonomous University of Nicaragua in Leon, Nicaragua; **J. M. Lambert**, computer science & engineering, 10 Pond Laboratory; August to July 1997. Research: programming language.

■ **Ismaïla T. Mohammed**, Department of Sociology, Bayero University Kano, Nigeria; **Gretchen Cornwell**, Population Research Institute, 613 Oswald Tower; August to July 1997. Research: male attitudes toward fertility control and family planning in Nigeria.

■ **Stephen Alfred Osei**, Department of Animal Science, University of Science and Technology, Kumasi, Ghana; **Daniel Hagen**, chair, Department of Dairy and Animal Science, 324 Henning Building; September through January 1997. Research: animal science.

■ **Bogdan Stefanescu**, University of Bucharest, Romania; **Michael Naydan**, department head, Slavic and East European languages, 211 Sparks Building, August through July 1997. Research: the rhetoric of post-totalitarian discourse.

■ **Ayşe Ulku**, Department of Chemical Engineering, Izmir Institute of Technology, Izmir, Turkey; **J. L. Duda**, head, Department of Chemical Engineering, 160 Fenske Laboratory, September through December. Research: water vapor absorption on zeolites.

Kitchen microwave inspires prototype space propulsion system

By BARBARA HALE
Public Information

Using parts from a 1,000-watt kitchen microwave oven, an engineer has built a prototype propulsion system that he thinks shows promise as a cheaper, safer thruster for positioning and maneuvering satellites in space.

"Existing chemical positioning and maneuvering systems for communications satellites account, with their fuel, for a very large fraction of the total launch mass," Michael M. Micci, associate professor of aerospace engineering, said. "Though less commonly acknowledged, these existing systems are also responsible for the majority of satellite failures."

The microwave-powered thruster has the potential to reduce the amount of propellant needed by up to 50 percent. The fuel savings can be used to install more payload on the satellite or can be taken in launch cost savings.

"In addition, since many commercial communication satellites in orbit today were still operational when they ran out of maneuvering fuel, the increased capacity could extend satellite life by a number of years," he said.

Micci says the idea for a microwave thruster has been around for more than a decade. However, his is the only prototype currently undergoing active ground testing. His ambition is to see the system tested in space.

The thruster concept is

Michael M. Micci, associate professor of aerospace engineering, has developed a microwave-powered thruster that may result in fuel savings on satellites.

Photo: Greg Grieco

based on the fact that microwaves can be used to create and maintain a free-floating plasma or superheated, electrically-charged gas within a cavity, Micci said. If a cold "fuel" gas is passed through or around the plasma in the cavity, the cold gas will become heated and create thrust when allowed to flow out through a nozzle and heat energy is converted to kinetic energy, the energy of movement.

Since the plasma creates temperatures higher than those possible by chemical combustion, the plasma creates more thrust from the same amount of cold "fuel" gas than chemical combustion, Micci said.

In addition to being

more fuel-efficient than chemical systems, the microwave-powered thruster is inherently safer as well, he said. The thruster operates only when the magnetron, or microwave source, is generating microwaves. If the magnetron is turned off, so is the plasma that heats the fuel.

In Micci's prototype the electrical hardware and magnetron came from a conventional 1,000-watt kitchen microwave oven. The system has been operated using hydrogen, nitrogen and ammonia fuel gases. To date, the research has shown that the device can be successfully operated with a number of propellants and can easily cre-

ate and maintain plasmas from them.

The engineer said the thruster can potentially be operated with water as fuel. Water is heavier than ammonia but lighter than nitrogen. Micci has achieved his best performance with hydrogen, the lightest gas. However, hydrogen is difficult to store in space. Ammonia was closest in performance to hydrogen. Nitrogen's performance came in third.

Micci and his commercial partner, Research Support Instruments Inc., have applied for patents on the prototype device. He has also detailed the device and research results in a paper, "Current Status of the Microwave Arcjet Thruster."

Answering machines can change behavior

On the 25th anniversary of the telephone answering machine, a study proves what many suspected: that answering machines often take the "answering" out of telephone interactions.

Conducted by assistant professor of social psychology Peter Crabb, the study suggests that answering machines have changed the century-old rule that says "When a telephone rings, you answer it."

Crabb believes the findings go beyond proving the obvious, and in fact suggest that everyday technologies — from computers to automobiles — can affect behavior once governed by social norms.

"It appears that many of the consumer technologies we bring into our lives can change the rules we use to interact with one another," Crabb, who teaches at the Abington-Ogontz Campus, said. "In the case of answering machines, they have legitimized refusing to interact with others, which isn't always a bad thing when one considers the increased number of sales and other nuisance calls we face today."

"But we also find ourselves regularly screening and then deciding not to answer calls from friends, family and acquaintances," he said. "This is one example of the increasing frequency with which people are choosing to insulate themselves from other people, actually preferring to interact with machines rather than with one another." He cited voice mail, Caller ID and automated test machines as additional examples of this trend.

In the early days of telephones, not answering a ringing phone was unthinkable. Most adults can recall a time when they stirred from a sound sleep or jumped out of the shower, dripping wet and covered with soap, to answer the phone. That behavior has gradually decreased since the introduction of the answering machine in 1971. Today, most households have an answering machine, and screening calls is commonplace. "Today, just 'not feeling like it' qualifies as a legitimate reason not to answer the phone," Crabb said.

"Terrible twos" due more to parenting than to child's temperament

The "terrible twos" have a lot more to do with how parents manage their children's emerging quest for individuality and autonomy than with the inborn temperament of the child, say child development researchers.

Jay Belsky, distinguished professor of human development and family studies, Sharon Woodworth, postdoctoral fellow, and Keith Crnic, professor of psychology, draw that conclusion from their study of 69 central Pennsylvania families rearing first-born sons.

The study, which is continuing as the children approach school age, suggests that how parents manage the period of budding individuality dur-

ing years two and three makes a difference in how easy or difficult these children turn out to be later on.

Mothers, fathers and children in the study were observed interacting in their homes during two separate visits when the boys were 15, 21, 27 and 33 months old. The researchers looked for specific infant, parent and family characteristics or attributes to try to determine why some families had trouble during the second and third year of a child's life while others do not.

They found that children's own temperaments were not reliable predictors of troubled interactions. For example, babies who were negative

and cried more often at one year of age did not more frequently turn into "terrible twos."

More than 20 hours of daycare in the first year of life, however, were found to increase the probability that a vulnerable family would have trouble managing its toddler. Daycare was not found to be troubling in families that had few vulnerabilities in terms of infant, parent and family attributes.

Belsky notes, "I really think that the 'terrible twos' is a case of a few bad apples giving the barrel a bad name. Most two- and three-year-olds are not 'terrible' in the popular sense of the term."

MOC

Microcomputer
Order Center

Open house

The fourth annual Microcomputer Order Center open house will be held from 9 a.m. to 5:30 p.m. on Friday, Sept. 27, and 9 a.m. to 5 p.m. Saturday, Sept. 28, in 12 Willard Building on the University Park Campus. All Penn State faculty, staff, students and their families may stop by to talk with vendors and consultants, enjoy complimentary refreshments and register to win prizes.

IBM purchase policy:

Due to a change in IBM policy, the MOC can no longer order products directly from IBM. The MOC is in the process of acquiring a distributor for IBM products and will post the online price list and product information as soon as a company has been chosen.

The MOC does have a limited number of IBM products in stock. Please note the current purchasing policy for IBM products:

- Departmental and personal orders for in-stock IBM items can still be placed through the MOC. Call (814) 865-2100 for pricing and availability.

- Departmental orders for non-stock IBM products must be placed through the purchasing department. Please contact Jeff Karli (800) 677-6573 Ext. 47 at Inacom Information Systems for configuration and availability.

Site License Reminders:

The MOC has obtained site licensing for a number of software packages. Check the site license price list on the MOC Web page at <http://moc.cac.psu.edu>

If you are interested in a site license for a product that is not on the list, contact Sue Gavazzi at (814) 863-9523 or e-mail pmk@psu.edu.

A fresh new look

As part of the year-round maintenance schedule, painters Jake Peachey (on the ladder) and George Flood of Renovation Services with the Office of Physical Plant apply a new coat of paint to a lamp post outside of McElwain Residence Hall on the University Park Campus.

Smeal College programs among top 10

Penn State's Smeal College of Business Administration was nationally ranked among the top 10 public schools in *U.S. News and World Report's* latest survey of undergraduate business programs.

An analysis of the *U.S. News* results, in an issue dated Sept. 16, showed Smeal in the ninth spot among the public business schools tied with fellow Big Ten institutions Purdue University and the University of Minnesota. All three received a score of 3.4 (of 4.0) based on a reputational survey of deans of schools accredited by the American Assembly of Collegiate Schools of Business (AACSB).

Penn State also was the top-ranked public school in the Northeastern U.S., and the only public school among four Northeastern public and private institutions in the *U.S. News* top 10. Among all public and private schools nationwide in the survey, The Smeal College came in tied for 13th place with Purdue, Minnesota and the University of Southern California. Topping the list of peer public business schools was the University of Michigan, followed by the University of California-Berkeley; a five-way tie among Indiana University, the University of Illinois, the University of North Carolina, the University of Texas-Austin and the University of Virginia; and Wisconsin.

Nine of the 11 Big Ten business schools were in the nation's top 20, according to the *U.S. News* survey. In its listing of all public and private schools, the magazine reported that Michigan was tied with the University of Pennsylvania for No. 1; followed by Berkeley and the Massachusetts Institute of Technology tied for third.

For the Record

In the Sept. 5 issue of *Intercom*, the title of Peter Risser's sculpture — which was donated to The Hershey Medical Center — was incorrect. The proper title of his 18-foot tall work is "The Toy, The Tool, The Child, The Man."

Hershey garners \$7.7 million contract to continue work on artificial heart

Penn State's electromechanical artificial heart is closer to beating inside a human chest — thanks to a \$7.7 million federal contract awarded this month.

This phase-two award is the largest federal award ever received by The Milton S. Hershey Medical Center, bringing the total contract to \$13.9 million over seven years of research and development.

Penn State's artificial heart is

expected to save thousands of lives when it becomes available. Last year 770 patients across the country died while waiting for a heart transplant. Patients requiring a heart replacement—as many as 50,000 per year—could be implanted with the artificial heart, according to principal investigator **Gerson Rosenberg**.

The air-driven Penn State Heart is one of only two artificial hearts approved by the FDA for use in

humans as a temporary bridge to a heart transplant.

"The Penn State device is the culmination of a number of years of cooperative research performed by physicians, engineers and veterinarians—both at University Park and here at Hershey Medical Center," Dr. William S. Pierce, professor of cardiovascular surgery and director of surgical research at Hershey, said.

"This contract allows a very expe-

See "Heart" on page 3

University gains \$17 million from endowed funds

Penn State's pooled endowment fund yielded \$17 million in support to the University's endowed academic programs during the fiscal year ending June 30, 1996, and \$63 million over the past five years.

"At a time when many other sources of revenue are declining or stagnant, endowments are becoming an increasingly important source of support for student and faculty programs," said Raymond D. Nargi, associate treasurer.

Over the last five years, the real rate of return has averaged 8.2 percent, compared with a rate of spending for academic program support of about 5 percent.

"The key to maintaining the economic viability of the endowment fund is to achieve an investment return that, after adjustment for inflation, equals or exceeds our rate of spending for academic program support," he said.

Over the last five years, the real rate of return has averaged 8.2 percent, compared with a rate of spending for program support of about 5 percent. As a result of this positive margin and new endowed gifts, the total market value of the University's pooled endowment fund grew by more than \$188 million over the past five years, rising from \$193.9 million in 1991 to \$382.1 million as of June 30, 1996.

Penn State's endowment fund is a pooled investment of gifts.

One potato, two potato, three potato, four ...

Arranging potatoes for sale, Tom Merritt, professor emeritus of animal science, took part in a recent Farmer's Market in downtown State College. The outdoor market, held every Friday throughout the growing season, will come to a close in early November. This photo was taken by photojournalism student Ellen Maxwell as part of an assignment from a photography class taught by Jock Lauterer, assistant professor of journalism. The assignment directed students to take pictures depicting weather scenes.

Teams successful

The Graduate Admissions Records Management Team celebrated the 50 percent reduction in filing space achieved by scanning and indexing all of the records in the Graduate School. The new system increased customer satisfaction by reducing the number of errors, decreasing the search time and allowing multiple users to access records simultaneously. The team is sponsored by **Kodney Erickson**, the leader is **Charles Galtgoc** and the facilitator is **Barbara Sherlock**. Team members include **Audrey Davidson**, **Diana Feltenberger**, **Leslie Frye**, **Brenda Hockenberry**, **Don Hogg**, **Shawn Kuhlman**, **Michelle Matis**, **Pat McClure**, **Cindy Nicosis**, **Annabelle Persia**, **Daisy Romig**, **Heather Shuttica**, **Althea Spotts**, **Jodi Stover** and **Laurie Wheeler**.

Waste control

The Chemical Management Team recently developed a process to reduce waste disposal costs that will save the University \$25,000 per year. Improvements in purchasing and storage are expected to yield an annual savings of \$250,000. Product availability will be improved from the previous 15- to 90-day wait to same-day delivery. The team sponsor is **Bill McKinnon**. Team leaders are **Jim Lettiere** and **Jim Dunlop**, and the facilitator is **Steve Kreiser**; team members are **Joe Bodkin**, **Maurine Claver**, **Mike Kearney**, **Jim Frazier**, **Nancy Killeen**, **Barbara Lyke** and **Dave Sarge**.

Protocol established

The Medical Excuse Team in University Health Services established a protocol for students' medical excuses. A pre-printed form was introduced that did not violate confidentiality. This UHS team was sponsored by **Margaret Spear**, led by **Larry Dansky**, and facilitated by **Doris Gnanowsky**. Team members were **Cindy Condrone**, **Donna Decker**, **Hattie Faison**, **Jane Galas**, **Greg Gilbert**, **John Hoffman** and **Michael Johnson**.

FYI

The 1997 Malcolm Baldrige National Quality Award examiner applications are due Nov. 1. Applications may be obtained from the Center for Quality and Planning, (814) 867-8721.

October is national Lesbian, Gay and Bisexual History Month

For the first time, Penn State is joining in the national celebration of Lesbian, Gay and Bisexual History Month this month, which was started by a St. Louis high school history teacher who was appalled at the failure of his 800-page textbook to mention any gay, lesbian or bisexual history whatsoever.

Inspired by existing celebrations such as African American History Month in February and Women's History Month in March, organizers sought to create a time when special attention could be focused on the contributions of lesbian, gay and bisexual people to world history.

October was chosen as the month in which to celebrate this history in order to build on existing traditions like National Coming Out Day on Oct. 11, and to honor the October anniversary of the 1979 and 1987 marches on Washington, D.C., organized by gay, lesbian and bisexual activists.

The university's Commission on Lesbian, Gay and Bisexual Equity and other groups have planned the following events on the University Park Campus, which are open to the public.

■ **Thursday, Oct. 10:** Career panel discussion with the Alumni Association's Lambda Alumni Interest Group and staff from the Career Development and Placement Service at 7:30 p.m. in 413 Boucke Bldg.

■ **Friday, Oct. 11:** National Coming Out Day, sponsored by the Lesbian, Gay and Bisexual Student Alliance (LGBSA) and the Coalition of Lesbian, Gay and Bisexual Graduate Students, will be celebrated with a rally on the steps of Schwab Auditorium at noon.

■ **Saturday, Oct. 12:** Lambda Alumni will be having a Rainbow Tailgate party at Beaver Stadium.

■ **Saturday, Oct. 12:** Homecoming Dance sponsored by LGBSA and Lambda Alumni at 8 p.m. at the Ahterton Hotel in State College.

■ **Monday, Oct. 14:** Opening of the Lesbian, Gay and Bisexual History Month exhibit, "Lesbian and Gay Issues at Penn State, 1971-1996: 25 Years of Progress," in the lobby of Pattee Library.

■ **Tuesday, Oct. 15:** Reception for the Pattee exhibit from 4:30 to 6:30 p.m. President **Graham B. Spanier** will speak at 5 p.m. The exhibit continues through Nov. 29.

■ **Thursday, Oct. 17:** The Rev. Irene

LGB equity commission appoints 12 new members

Twelve new members have been appointed to the Commission on Lesbian, Gay and Bisexual Equity. New members are: **John Albin**, assistant director, Residence Life; **Barbara Bullock**, assistant professor of French; **Susan Cromwell**, education, training and development specialist, College of Agricultural Sciences; **Mark Fearnow**, enhancement programs; **Jeffrey Hayes**, associate professor of education; **Dennis Kalup**, resident assistant and undergraduate student in political science; **Dale Masel**, instructor and graduate student in industrial engineering; **Diane Resides**, counselor in the Center for Adult Learner Services; **Carolyn Sachs**, associate professor of rural sociology and women's studies; **Samuel Toba**, graduate student in chemistry; and **Roger Zellner**, associate professor of art. This year's chairman is **Morris Weinstein**, research programmer in the Center for Academic Computing and the chair-elect is **Samuel McCorkle**, associate professor of art.

The commission comprises four standing committees: Commonwealth Educational System and

other locations, chaired by **Joseph Marchesani**, assistant professor at the McKeesport Campus; curricular integration, chaired by **Nancy Evans**, associate professor of education, education, chaired by **Robert Seeds**, head of the math library; and student concerns, chaired by **Jeffrey Hayes**, assistant professor in counseling psychology. The commission has an ad-hoc committee on domestic partner benefits, chaired by **Marilyn Eastridge**, assistant professor of exercise and sport science. In addition, the commission works on other initiatives including the Lesbian, Gay, Bisexual Support Network, chaired by **Kelly Carter**, coordinator in residence life, and the Lecture Series on Lesbian, Gay and Bisexual Lives, co-chaired by **Mark Fearnow**, assistant professor of theatre arts, and **Roger Zellner**, associate professor of art.

For more information or to volunteer for a committee, contact **Susan Ravert**, senior diversity planning analyst, 313 Grange Building, at (814) 863-8218 or srx2@psu.edu or visit the commission's Web page at <http://www.psu.edu/staff/diversity/lgbt.html>.

Monroe will present a talk on "Standin' in the Need of Prayer: Homophobia in the Black Church" at 4 p.m. in the Lipson Auditorium of the Palmer Museum of Art, with a reception immediately following.

■ **Friday, Oct. 19:** A religion and homosexuality panel discussion with the Rev. Irene Monroe and invited local clergy, sponsored by the Coalition of Lesbian, Gay and Bisexual Graduate Students at 5:45 p.m. in the Paul Robeson Cultural Center.

■ **Monday, Oct. 28:** **Cherrie Moraga**, lesbian poet, essayist and playwright, will be a featured speaker for both the Lesbian, Gay and Bisexual History Month and Hispanic History Month at 7 p.m. in Kern.

For more information, contact **Sue Rankin**, 313 Grange Building, University Park, Pa. 16802, at (814) 863-8415 or by e-mail at srx2@psu.edu.

Exhibit planned

An exhibit titled "Lesbian and Gay Issues at Penn State, 1971-1996: 25 Years of Progress" is one of a number of events on the University Park Campus that celebrates national Coming Out Day and Bisexual History Month in October.

Sponsored by the University's Commission on Lesbian, Gay and Bisexual Equity, the exhibit opens Monday, Oct. 14, and runs through Friday, Nov. 29, in the lobby of Pattee Library.

The exhibit tells the story of how events during the last 25 years influenced the University; changing it from a homophobic climate into one that today is more accepting of gay, lesbian and bisexual faculty, staff and students.

An opening reception will be held Tuesday, Oct. 15 from 4:30 to 6:30 p.m. in the Penn State Room, 107 Central Pattee, adjacent to the exhibit. President **Graham B. Spanier**, will be the featured speaker. The reception is open to the public. For more information contact **Robert Seeds**, (814) 865-3714.

Panel to discuss being "out" in workplace

A career panel to discuss gay and lesbian workplace issues with students will be held at 7:30 p.m. Thursday, Oct. 10, in 413 Boucke Building on the University Park Campus.

Alumni from around the country and in several professions will talk about the climate for lesbian, gay, bisexual and transgender employees, along with information on employee resource groups and sexual orientation inclusion in non-discrimination policies. **Jane Moyer**, co-chair of Penn State's Lambda Alumni Interest Group, will lead this discussion.

Two corporate executives from Fortune 500 companies, a financial planner, a marketing executive and a corporate attorney will talk about being "out" at work and at Penn State, and answer questions from the audience.

Ellen Houser, a counselor in Career Development and Placement Services, will serve as a facilitator for the discussion and will outline career services available through the University. The event is hosted by Lambda Alumni Interest Group in cooperation with the Penn State Career Development and Placement Office.

■ Distinguished Professors Two in ag sciences honored with title

Terry Etherton, an international authority on growth hormones and agricultural biotechnology, has been named distinguished professor of animal nutrition. **Harvey Manbeck**, professor and interim head of the agricultural and biological engineering department, has been named distinguished professor of agricultural and biological engineering.

The title of distinguished professor was established by the Office of the President to recognize a select group of professors with exceptional accomplishments in teaching, research and service.

Etherton has developed an internationally recognized research program in animal growth. He teaches graduate courses in nutrition and animal growth as well as an undergraduate course in animal growth and development.

Etherton was a National Institutes of Health postdoctoral Fellow in the Department of Medicine at Stanford University from 1978 to 1979, when he joined Penn State's dairy and animal science department. In 1986-87, he took a sabbatical leave to work at Children's Hospital at the University of California, San Francisco.

Etherton has been the recipient of several national research awards. In 1991, he was awarded the University Faculty Scholar Medal in Life and Health Sciences. In 1993, he received the Alex and Jessie C. Black Award for Excellence in Research for the College of Agricultural Sciences.

He is a member of numerous national professional societies, including the American Association for the Advancement of Science and the Endocrine Society.

Etherton also chaired the National Research Council subcommittee on the effect of metabolism modifiers on nutrient requirements of food-producing animals.

Manbeck's undergraduate and graduate teaching has been recognized with the Penn State Engineering Society's Premier Teaching Award in 1990 and Penn State's George Atherton Excellence in Teaching Award in 1991. Manbeck serves as faculty adviser to about 25 undergraduate students and seven graduate students per year, and also has served as adviser to several student organizations.

A leader in wood engineering research and design, his work has contributed significantly to the advancement of design of post-frame buildings and hardwood timber bridges and to the development of structural and wood production systems. He leads the structural system effort in Penn State's Housing Research Center and served as the center's interim director in 1995.

A recognized authority on poultry housing, Manbeck currently is editing a national extension publication on poultry housing and equipment. He also helped establish Penn State's Particulate Materials Center and contributes to a cooperative Penn State research effort to define the mechanical behavior of powders, granules and other particulates.

He is a member of several professional organizations including the American Society of Agricultural Engineers (ASAE), the American Society of Civil Engineers and Gamma Sigma Delta, the national honorary agriculture fraternity, and has received national and international research awards. He was named a Fellow of ASAE in 1992.

For the past three years he has served as chairman of the Faculty Senate's Committee on Research.

Terry Etherton

Harvey Manbeck

"Hoops for Hope"

Don Ferrell (center), academic athletic counselor, loses a jump ball for former Lady Lions Patti Longenecker, left, and Tina Nicholson as they practice for a wheelchair basketball game against the Pittsburgh Steelwheelers at 7 p.m. Wednesday, Oct. 9, in Recreation Building on the University Park Campus. Tickets for the "Hoops for Hope," sponsored by Undergraduate Education to benefit the Centre County United Way, are available for a donation of \$5 from any employee in Undergraduate Education. For more information, contact Janet Bowman at (814) 865-5379, or Donna Meyer at (814) 863-2635.

Heart

continued from page 1

rienced team that has been in place since 1970 to do all the preclinical studies to bring the electromechanical artificial heart to the point where we can apply to the Food and Drug Administration in the year 2000 for permission to test the device in humans," Pierce said.

According to Pierce, the device is expected to be widely available by the year 2005.

Clearly, the need for hearts is far greater than the availability of donor organs. Last year 44 patients died at eastern Pennsylvania hospitals while waiting for a donor heart, according to Kevin Sparkman of the Delaware Valley Transplant Program. As of July of this year, 3,648 patients were on the national waiting list for hearts, 175 of them in the eastern half of Pennsylvania.

Of the 50,000 requiring a heart transplant, only some 3,000 to 4,000 qualify as candidates for transplant, according to Rosenberg.

The Penn State group began developing artificial hearts and related devices in 1970 and is considered a world leader in the field. Calves are the current test subjects for the device, which will be a completely implantable total electric artificial heart. The device is designed for five-year reliability and is expected to allow a human patient to lead a relatively normal life. Five calves have now lived more than 100 days with the device; one lived for 160 days.

According to Pierce, the device was developed at the medical center and turned over to an industrial partner, the 3M Health Care company, for manufacture and assembly.

"This contract allows a very experienced team that has been in place since 1970 to do all the preclinical studies to bring the electromechanical artificial heart to the point where we can apply to the Food and Drug Administration in the year 2000 for permission to test the device in humans."

William S. Pierce, professor of cardiothoracic surgery and director of surgical research

Through a similar contract, the Texas Heart Institute, which has been collaborating with the industrial partner Abiomed for several years, will receive funds to continue development of the electrohydraulic artificial heart. Both teams will test hermetically sealed systems in *in-vitro* test chambers over a two-year period to demonstrate long term reliability of the device, according to the funding agent, the National Heart, Lung and Blood Institute (NHLBI), an agency of the National Institutes of Health.

This second phase of support by the NHLBI is based on progress made in the first phase, 1993-96, during which the University received \$6.2 million.

LECTURES

Conference for Canadian Studies today through Oct. 5

The 12th biennial meeting of the Mid-Atlantic and New England Conference for Canadian Studies is being held at the Nittany Lion Inn today through Oct. 5. This year's meeting commemorates the 15th anniversary of the founding of MANECCS at Penn State.

The conference offers a number of paper sessions and panels on a wide range of issues including Canadian/American politics, cultural issues, literature studies, Canadian health care, Quebec nationalism and others. A key speaker will be David Kilgour, deputy speaker of the Canadian House of Commons. Registration for the conference begins today from 5 to 6 p.m. in the Rotunda Lobby of the Nittany Lion Inn.

Slide lecture at Palmer Museum Oct. 8

Ron Meyers, retired professor of ceramic art at the University of Georgia in Athens, will visit the University Park Campus Oct. 7-8 and present a free slide lecture on Tuesday, Oct. 8, at 1:30 p.m. in the Palmer Lipton Auditorium of the Palmer Museum.

Meyers, who originally aspired to be a cartoonist, earned his MFA at Rochester Institute of Technology. During his stay, on campus, which is hosted by the College of Arts and Architecture School of Visual Arts, Meyers also will give video demonstrations to art students in the ceramics area.

Brown-bag lunch examines early Russia

The Center for Russian and East European Studies presents a brown-bag luncheon seminar featuring Adrian Wanner, assistant professor in the Department of Slavic and East European Languages, at noon Wednesday, Oct. 9, in 124 Sparks Building.

Wanner's topic is "Terrorism and Decadence: Charles Baudelaire's Early Reception in Russia. The seminar is open to the public.

Other upcoming seminars include George Enteen on "Impressions of Russia: An Update," Oct. 23; Irene Hurd on "Doing Business in Russia: A Woman's Perspective," Nov. 7; and Bogdan Stefanescu on "The Irony Behind Romania's Identity: Metaphors of Insecurity in a Besieged Culture," Nov. 20.

For more information, visit the Center for Russian and East European Studies on the Web at <http://rudiophi.la.psu.edu/slavic/ueelcome.htm>.

Two seminars feature horticulture professor

L. Curtis Hannah, a professor in the Department of Horticultural Sciences and the program in plant molecular and cellular biology at the University of Florida, will be the speaker at two seminars on the University Park Campus.

The first seminar, to be held at 12:20-1:10 p.m. on Wednesday, Oct. 9, in room 111 Tyson Building, is titled "A Single Gene Mutation that Increases Seed Weight." In this seminar, Hannah will describe the development and characterization of a modified regulatory enzyme in the pathway of starch biosynthesis. Presence of this modified enzyme results in dramatic increases in seed weight.

Hannah's second seminar at 7:30 p.m. that same day will be in 101 Agricultural Sciences and Industry Building and is more suited for the general public. The second seminar is titled "Your Garden-Variety Mutations in Your Garden-Variety Organism, or Marvelous Maize Mutants."

Hannah received his B.S. in biochemistry and his M.S. in genetics from Purdue University, and his Ph.D. in genetics from the University of Wisconsin. He joined the University of Florida faculty in 1974 and was promoted to professor in 1983. Hannah is internationally known for his pioneering molecular genetic research on enzymes of the starch biosynthetic pathway.

Gender equity topic of daylong conference

"Gender Equity: Inclusive Perspectives," a Nov. 9 conference at The Penn State Scenic, aims to help participants become more aware of gender-biased behavior and communication traps, teach them how to nurture girl-adult learning partnerships and show them how to become positive role models for girls and boys. Sessions will focus on the needs, interests and women face in the classroom, in athletics, with self-esteem and with cross-cultural issues. The gender-equity model overview sessions will provide the tools and techniques needed to address these problems.

Sabrina Chapman, director of the Penn State Center for Women Studies, will give the keynote address, "Empowering Ourselves and Others."

Registration for this event is \$35 before Oct. 18 and \$50 after that date. The fee covers instruction, course notes, program materials, refreshment breaks and lunch. Registration begins at 8 a.m. The conference will be held from 9 a.m. to 4:30 p.m. To register, call (800) 778-8632 or visit the Web site at <http://www.cde.psu.edu/C&G/GenderEquity/>. For more information about the program, call Chris Schultz, conference planner, at (814) 863-5130.

Black Male Student Summit set for Oct. 5

Penn State will hold the second annual Black Male Student Summit, "Empowerment Through Activism," on Saturday, Oct. 5, in the HUB Fishbowl on the University Park Campus.

"This is a student-run student-initiated summit to encourage black men on campus of all ages to talk about issues of being black in higher education today," Leon Caldwell, who initiated the summit last year and continues to coordinate it, said. He is a graduate assistant in the Center for Counseling and Psychological Services in the Multicultural Resource Center on campus.

Caldwell expects about 75 men to participate, including a number from other University campuses who have expressed an interest.

Registration begins at 10 a.m. in the HUB — \$5 for undergraduates, \$10 for graduate students and \$25 for faculty, staff and members of the community. The program begins at 10:30

a.m. with a welcome address, "Da Stakes Are High," by Caldwell.

The day includes small discussion groups, a soul-food lunch with a keynote speaker and three discussion groups on activism. One group will focus on self and spiritual activism, another on community and social activism and the third on political and economic activism.

At 6 p.m., there will be an open general forum. Both men and women are invited to attend.

The summit is sponsored by Omega Psi Phi Fraternity in collaboration with the 96 Summit Planning Committee, Multicultural Resource Center, Department of African American Studies, Office of Educational Equity, Kappa Alpha Psi, Alpha Phi Alpha and Phi Beta Sigma.

For more information, please call Caldwell or Marcus Whitehurst at (814) 865-1773.

Distance Education forum features first speaker Oct. 7

The first discussion in a forum series on "Transactional Issues in Distance Education," is set for Oct. 7 on the University Park Campus. The series will give faculty an opportunity to discuss research issues related to distance education.

From 1 to 3 p.m. in Studio D of the Mitchell Building, guest speakers will present and discuss with participants research on issues related to learning and learners, instruction, course design and policy and administration. The forums are based on research articles that have appeared in the American Center for the Study of Distance Education publications. Registrars for the discussion forums will receive

a copy of each article before the session so they can be prepared for in-depth discussion of the topics.

The Oct. 7 forum will feature D. Randy Garrison, dean of the faculty of extension, and Terry Anderson, director of academic technology for learning, at the University of Alberta, Canada.

The forum is free but you must register to receive the discussion article before the event. A registration form can be completed at <http://www.cde.psu.edu/DE/FacDev/signup.html>. For more information, contact Nancy Hallberg at (814) 865-5403, extension 705, or through e-mail at ndw1@psu.edu.

Workshop offers information on homebrewing beer

Homebrew enthusiasts and beer lovers investigating the hobby may want to attend the "Homebrewing Workshop" at The Penn State Scenic on Nov. 3.

If you're inexperienced, don't spend a dime on new equipment or ingredients until you learn from the experts exactly what you need and how to avoid common mistakes and throwaway batches. Experienced brewers can learn advanced brewing techniques and swing recipes.

The "Homebrewing Workshop" will feature a vendor exhibition, a panel of experts to answer your brewing questions and sessions on:

- Getting started — equipment and ingredients
- Brewing and bottling safety
- How to mash

- Creating your own recipes
- Making mead
- How to judge brews
- Entering brewing contests

For more information about program content, please contact Dan Goepfert, senior program planner, by phone: (814) 865-7679; or e-mail: dags@cde.psu.edu. For information about registration or access, please contact Chris Dufour, conference planner, by phone: (814) 863-5110, or e-mail: conferinfo@cde.psu.edu. More information also is available on the Web at <http://www.cde.psu.edu/C&G/Homebrewing/>.

The deadline to register for the conference is Oct. 11.

To register with your credit card, call (800) 778-8632.

More Lectures

Two-day conference showcases CQI ideas in action

"Utilizing Continuous Quality Improvement in Education and Training," a two-day conference designed for faculty members, graduate students, university administrators and industry leaders who want to discuss the benefits of CQI and how it can be applied in education and training, will be offered on Oct. 22-23.

A continuing and distance education service of the College of Education, the workshops will feature **Philip B. Crosby**, internationally recognized for his quality management ideas, and nationally renowned educator **Robert A. Cornesky** at The Penn State Scanton on the University Park Campus.

Cornesky was the first to introduce Total Quality Management (TQM) ideas into college and university administrations and classrooms. Since 1964, Cornesky has served in institutions of higher education. He was the dean of the School of Science, Management and Technologies at Edinboro University of Pennsylvania and was the dean of the School of Allied Health at Texas Tech University Health Sciences Center. In 1991, he founded Cornesky & Associates Inc., a consulting and publishing firm. Cornesky has written eight best-selling books.

Crosby brings a wealth of knowledge gained in a lengthy career that has earned him international recognition for his quality management ideas. In 1979, he founded Philip Crosby Associates, which has become the world's largest quality management education company. His clients include General Motors, Chrysler, Xerox and hundreds of other corporations in the U.S., Europe and the Far East. An active public speaker, Crosby has written 13 best-selling books, including *Quality Is Still Free* and *Reflections on Quality*.

In addition to the two-day conference, a public lecture titled "Quality-Past, Present and Future," will be presented at 7 p.m. Tuesday, Oct. 22 at The Scanton at a cost of \$15 per person. Philip Crosby will examine quality as it relates to the past, present and future, as well as those initiatives individuals and organizations can take to improve quality.

For more information, visit the World Wide Web site at: <http://www.cde.psu.edu/C&I/CQIClassroom/> or e-mail: ConferenceInfo@cde.psu.edu.

Get out of the stone age!

In an effort to explore new directions in engineering education, the College of Engineering is sponsoring the "Innovations in Engineering Education Conference" on Oct. 28-29 at The Penn State Scanton at University Park.

An OPEN SPACE event, which enables the participants to pursue their passions given the time, talent and resources and encourages interaction and cooperation among participants, is being held as part of the college's centennial celebration, in cooperation with the Leonhard Center, Schreyer Institute and Continuing and Distance Education.

"Everyone will come away with new ideas and

discover new resources for the improvement of engineering education," according to Dan Goepf, the person responsible for convening OPEN SPACE. The event is not just for engineers, but will serve as a forum for networking with like-minded colleagues across disciplines.

Jack Matson, director of the Leonhard Center said, "If you're looking for an opportunity to think radical and propose the impossible, this will be the place to be this October."

For more information about the conference, call (800) 778-8632 or visit the Web site at <http://www.cde.psu.edu/C&I/Innovate/>.

Sessions examine health care law

"A Question of Skill: The Impact of Inadequate Training and Supervision on the Health and Well-being of Patients Across the Country" and "Trends in Health Care Law: Implications for Educators and Providers" are two sessions scheduled for the Strategies for the Successful Education of Health Care Providers conference, Nov. 6 and 7 at The Penn State Scanton on the University Park Campus. The conference, a continuing and distance education service of the School of Nursing, College of Health and Human Development and the Center for Vocational Education, College of Education, will look at these and other current issues of concern to all health care professionals.

For information call (800) 778-8632 or visit the World Wide Web site at <http://www.cde.psu.edu/C&I/StratistgForSuccess/>.

Event features performance art

The Performance Art, Culture, Pedagogy Symposium, set for Nov. 13-16 at The Penn State Scanton, will feature more than 40 of the nation's finest performance artists, critics historians, educators and arts presenters.

According to Charles Grolan, associate professor of art education, this is the first symposium of its kind to examine the historical, theoretical and experiential significance of performance art in order to distinguish its pedagogy as an emerging form of arts education.

Evening performances are open to the public and tickets are on sale now. For ticket information call (814) 863-0255 or (800) 778-7849.

For a registration form or more information, call (800) 778-8632 or visit their Web site at <http://www.cde.psu.edu/C&I/PAC.html>.

Session addresses family problems

Penn State Fayette's Department of Human Development and Family Studies will present a two-day conference designed to address and develop effective, collaborative strategies for solving the family problems facing the local area. Topics to be covered include elder caregiving and caregiver stress, day care for children, help for children in trouble, family violence, critical incident stress management and career pathways.

"The Changing Family" will be held on Thursday, Nov. 21, and Friday, Nov. 22. For more information, call (412) 430-4216.

News in Brief

HRDC programs

The following programs are being offered by the Human Resource Development Center:

Oct. 4:

- Healthy Thinking: 9:45-10:45 a.m., 221 Chamber Building

- Managing Personal Change in a Changing Environment: 8:30 a.m.-9:30 a.m., 520 Rider Building

- A Fresh Approach to Stress Management: noon to 1 p.m., 101 Carnegie Building

- Oct. 10:

- Be Well: noon to 1 p.m. in 110 Henderson Building (The Living Center). Cost: none

To register for the above programs, contact Jan Hawbaker at (814) 865-3085 or jqh30@psu.edu.

Professional Women at meet

Professional Women at Penn State will hold its first open agenda public meeting this year on Wednesday, Oct. 16. There will be brief presentations on job sharing and other alternatives by Anne Stokes, staff assistant, College of Health and Human Development; and vacation donation policy by Donna Nicely, coordinator of research and administrative ser-

vices, College of Education. The brown-bag lunch meeting will begin at 12:05 p.m. in room 110 Henderson Human Development (Living Center). To receive a copy of the minutes of this public meeting, please contact Jo Anne Mengle, 302 Walker Building, or e-mail jxm5@psu.edu.

Professional Women at Penn State is a grassroots group coordinated by University women in which participants can develop and maintain a communications network and serve as a resource for other Penn State. Attendance by both males and females in all job and student classifications at the University is welcome. For more information, log-in to the Web site at <http://radolph.la.psu.edu/~pellenhp/pwps/welcome.html>.

Volunteers needed

The Pennsylvania Transportation Institute at University Park is recruiting volunteers to participate in two research projects.

One of the projects is a lateral acceleration study designed to analyze how comfortable individuals feel while driving around curves in the roadway. Subjects between the ages of 35 and 45 are needed

for daytime testing. Participants will earn \$20 for one hour of their time. For more information on the lateral acceleration study, contact Bryan Hanover by phone at (814) 863-1044 or via e-mail at bsh118@psu.edu.

The other project is a commercial sign study designed to determine how well drivers can see various types of commercial signs. Volunteers between the ages of 30 and 45 and over age 65 are needed for daytime and nighttime testing. Participants will earn \$15 for one hour of their time. For more information on the commercial sign study, contact Beverly Kuhn by phone at (814) 863-8679 or via e-mail at batt116@psu.edu. Strictest confidentiality will be maintained in both studies.

National Issues Forum

Tickets for the Faculty/Staff Club National Issues Forum on Tuesday, Oct. 8, are going quickly. If you plan to attend the luncheon at the Nittany Lion Inn and hear James J. Ouderstadt, president emeritus of the University of Michigan, stop by the Faculty Staff Club office in 110 HUB today. Tickets are \$10 each. For more information, call the club at (814) 865-7590.

The ARTS

AT PENN STATE

Odyssey on WPSU

On the next episode of *Odyssey Through Literature*, **Elizabeth Maxwell**, independent scholar and widow of international publisher Robert Maxwell, speaks about the world denied by the denial of the Holocaust.

Odyssey Through Literature is produced as a continuing education service by the Department of Comparative Literature. It airs Sundays at 6:30 p.m. on WPSU, 91.5 FM.

Tibetan ensemble at University Park

The National Song and Dance Ensemble of Tibet will perform at 8 p.m. Friday, Oct. 4, in Eisenhower Auditorium on the University Park Campus. The event is sponsored by the College of Arts and Architecture's Center for the Performing Arts.

Established by famous Tibetan musician and conductor E Zhu Duo Ji, the ensemble performs an enchanting mix of Tibetan music, dance and theatre. The company, on its first national tour, will perform such traditional folk dances as the Drummer's Dance and the Yak Horn Fiddle Dance.

An aesthetically spectacular event, the show features elaborate and colorful masks, costumes and instruments, all fashioned by skilled Tibetan artisans. Tickets are \$25.50, \$21.50 and \$17.50 for non-students, and \$21.50, \$17.50 and \$14.50 for students.

For tickets or more information, contact the Arts Ticket Center, open Monday through Friday, 8:30 a.m. to 4:30 p.m., at (814) 863-0255. Outside the local calling area, phone (800) 278-7849.

Philharmonic Orchestra season opens Oct. 4

The Penn State University Philharmonic Orchestra, under the direction of Maestro Pu-Qi Jiang, associate professor of music, will present the first concert of its season at 8 p.m. Friday, Oct. 4, in the School of Music Recital Hall on the University Park Campus.

Jiang, who joined the faculty in 1993, recently returned from a tour of China. He was invited by the Beijing

and Shanghai conservatories as a guest lecturer and conductor. The orchestra, which this year consists of more than 70 graduate and undergraduate student performers, has performed in various cities throughout Pennsylvania, as well as Vienna, Stuttgart, Munich and Prague.

Tickets are \$2 and are available at the door.

Roy Hargrove Quintet to perform

The Roy Hargrove Quintet will perform at 8 p.m. Saturday, Oct. 5, in Eisenhower Auditorium on the University Park Campus. The concert is sponsored by the College of Arts and Architecture's Center for the Performing Arts.

Discovered by Wynton Marsalis during a seminar at a Texas high school, the 26-year-old Hargrove has earned tremendous critical and popular acclaim for his brand of bebop and swing. He was recently named "trumpeter of the year" by *Down Beat's* 60th annual reader's poll.

Hargrove will offer an Artistic Viewpoints discussion one hour before the performance in the Eisenhower Conference Room. Tickets are \$18.50 for non-students and \$14.50 for students. For tickets or more information, contact the Arts Ticket Center, open Monday through Friday, 8:30 a.m. to 4:30 p.m., at (814) 863-0255. Outside the local calling area, phone (800) 278-7849.

Piano recital on Oct. 9

Mariylene Dosse will present a free piano recital at 8 p.m. Wednesday, Oct. 9, in the College of Arts and Architecture School of Music Recital Hall on the University Park Campus.

The first half will be dedicated to French music and the second half will be a selection of short dances and two Klavierstücke D 946 by Schubert and the "Dances of Marosszek" by Kodaly.

Dosse, a professor of music and a Fellow of the Institute for the Arts and Humanistic Studies, has published more than 20 recordings for Vex and Pantheon labels. She has performed in Europe, Africa, South America, Mexico and the United States.

That's entertainment

The Flying Karamazov Brothers take to the Eisenhower Auditorium stage on the University Park Campus at 3 p.m. Sunday, Oct. 6. For ticket information, call the Arts Ticket Center between 8:30 a.m. and 4:30 p.m. Monday through Friday at (814) 863-0255.

Essence of Joy at next Bach's Lunch

Essence of Joy will perform for the free Bach's Lunch concert at 12:10 p.m. Thursday, Oct. 10, in the Helen Eakin Eisenhower Chapel on the University Park Campus. The 20-minute concert is part of the Bach's Lunch series sponsored by the College of Arts and Architecture School of Music and the University Lutheran Parish.

Essence of Joy consists of 36 singers and is directed by **Anthony Leach**, assistant professor of music. The group, formed by Leach in 1991, performs a sacred and secular repertoire which emphasizes traditional and contemporary gospel music from the African-American culture.

The group will present its fall concert on the University Park Campus on Nov. 24.

Audience members are invited to bring their own bag lunches to eat after the concert in the Roy and Agnes Wilkinson Lounge. Coffee and tea will be provided.

"The Sound of Music" on stage Oct. 10-11

"The Sound of Music" will be performed at 8 p.m. Thursday and Friday, Oct. 10 and 11, in Eisenhower Auditorium on the University Park Campus. The musical is sponsored by the College of Arts and Architecture's Center for the Performing Arts.

"The Sound of Music," the Rodgers and Hammerstein classic that became one of the most popular movies of all time, remains a family classic with such favorites as "Climb Ev'ry Mountain," "My Favorite Things," "Edelweiss" and "Do Re Mi."

The winner of seven Tony awards, the musical tells the touching story of Maria, a free-spirited young woman sent by her Mother Superior into the home of Capt. von Trapp, a widower, and his seven vivacious children. Tickets are \$32.50, \$27.50 and \$23.50 for non-students; and \$27.50, \$23.50 and \$20.50 for students. For tickets or more information, contact the Arts Ticket Center.

UNIVERSITY PARK CALENDAR

SPECIAL EVENTS

Friday, October 4

School of Music, 8 p.m., Recital Hall. Penn State Philharmonic.

■ Center for the Performing Arts, 8 p.m., Eisenhower. "The Tibetan Song and Dance Ensemble."

Saturday, October 5

Center for the Performing Arts, 8 p.m., Eisenhower. Roy Hargrove Quintet.

Sunday, October 6

Center for the Performing Arts, 3 p.m., Eisenhower. Flying Karamazov Brothers.

Tuesday, October 8

School of Music, 8 p.m., Recital Hall. Centre Dimensions University Jazz Ensemble; Dan Yoder, director. For tickets call (814) 865-0431.

Wednesday, October 9

School of Music, 8 p.m., Recital Hall. Marylene Dosse, piano. For tickets, call (814) 865-0431.

Thursday, October 10

School of Music, 12:10-12:30 p.m., Eisenhower Chapel. Bach's Lunch Concert, "Essence of Joy."

■ Center for the Performing Arts, 8 p.m., Eisenhower Auditorium. "The Sound of Music." For tickets, call (814) 863-0255.

Friday, October 11

Palmer Museum of Art, 2 p.m., Christoffers Lobby. Jennifer Sireb presents Gallery Talk, Highlights of the Palmer Museum. For information, call (814) 865-7672.

■ Center for the Performing Arts, 8 p.m., Eisenhower Auditorium. "The Sound of Music." For tickets, call (814) 863-0255.

Appointments

New chief of plastic surgery joins The Hershey Medical Center

Dr. William P. Graham III has been appointed chief of the Division of Plastic and Reconstructive Surgery in the Department of Surgery at The Hershey Medical Center. With the appointment, Graham will reassume the position he held from 1971-85.

Graham has been in private practice with Aesthetic & Reconstructive Surgery of Central Pennsylvania, PC, since 1985, and he will continue to be associated with that practice.

Graham received his B.S. degree from Princeton University, Princeton, N.J., and his M.D. degree from the University of Pennsylvania School of Medicine, Philadelphia. He received his plastic surgical training at the University of Pennsylvania and completed his general surgery residency at the U.S. Veterans Hospital, Denver, Colo., and the University of California Hospital in San Francisco. He also served a rotating internship at the University of Colorado.

Before joining the medical center in 1971, Graham had been an assistant professor of plastic surgery at the University of Pennsylvania.

Graham has held many distinguished national posts in plastic surgery. He is past chairman of the American Board of Plastic Surgery, past president of the American Society of Aesthetic Plastic Surgeons and past president of the Northeastern Society of Plastic Surgeons, an organization which he also helped to found. Most recently, he was recognized as "Clinician of the Year" by America's oldest plastic surgical organization, The American Association of Plastic Surgeons.

He is board certified in general surgery as well as plastic surgery, and holds certificates of added qualification in hand surgery from both of these boards. He has authored or co-authored more than 200 scientific papers and is the co-editor of a text on hand surgery — *The Hand: Surgical and Nonsurgical Treatment*.

Arts and Architecture welcomes director of communications

David W. Johnson has been appointed the new director of communications/public relations for the College of Arts and Architecture. Johnson, former

David W. Johnson

While at Phillips Exeter Academy, New Hampshire and the Northfield Mount Hermon School in Massachusetts, Johnson supervised design, editorial and public information services, working closely with the admissions and development offices and publicizing cultural events. At Exeter, he edited an award-winning quarterly magazine, *The Exeter Bulletin*. Prior to the prep school world, he was editor/publicity coordinator and assistant director of communications at the Harvard University Development Office and a daily journalist. While at Harvard, he produced the university's 350th anniversary video, "The Way It Was."

As a free-lance writer, Johnson has contributed to *Yankee*, the *Boston Globe*, *Houston Chronicle*, *San Diego Union-Tribune* and the *Springfield* (Mass.) *Republican*, among others. He is a frequent writer on folk music. He's been a guest critic for the Boston Globe Jazz Festival and has advised the Massachusetts College of Art, the New York Experimental Glass Workshop and others on public relations and fund raising. He also wrote a chapter in the 1994 book *When Crisis Strikes on Campus*, published by the Council for the Advancement and Support of Education (CASE). An active member of CASE, Johnson is listed in *Who's Who in Public Relations*. He holds a bachelor of arts in English literature from Harvard College and a master of science in public relations from Boston University.

Development Communications adds writer/editor to staff

Nicola "Nick" McCarthy has joined the staff of Development Communications and Special Projects as a writer/editor.

McCarthy is a former copy editor and staff writer for the *Penn State*, the University's primary alumni magazine. In her new role, she will concentrate on preparing major gift proposals for the Division of Development and Alumni Relations.

A native of Cardiff, Wales, McCarthy came to Penn State in 1990 as a graduate assistant/teacher of rhetoric and composition. She joined the *Penn State* staff in 1993 and also has worked as a proofreader for the Penn State Press and as managing editor of *Hospitality*, a publication of the Waiter's Association, based in State College.

She holds a bachelor's degree in English and American literature from the University of Warwick, Coventry, England. While in England, she also taught English as a second language for Germans and worked as a staff assistant for British Telecom Applied Computer Technology and for the Howard Organization, a recruitment agency for technical and scientific fields.

McCarthy also has studied linguistics at the University of Flensburg, Germany, and is currently studying for a master's degree in English at Penn State.

Agricultural Sciences appoints director of development

Daniel A. Macaluso has been named director of development for the College of Agricultural Sciences.

Macaluso came to the college in 1994, serving as associate director of development and managing major gift prospects. In March of this year, he assumed the position of interim director, overseeing a fund-raising program that received more than \$3.6 million in gifts in 1995-96.

In earlier positions at the University, Macaluso served as director of development for the former School of Communications, development officer for the Eberly College of Science and regional coordinator for the Office of Annual Giving. Before joining Penn State, he was district circulation manager for the *Cent Daily Times* and a financial consultant with Professional Planning Consultants.

Macaluso earned a bachelor of science degree in marketing from Penn State in 1987 and is currently involved in a master's studies program in higher education. He is a board member of the Faith Alliance Church of State College and works as the venue coordinator for gymnastics events with the Pennsylvania Special Olympics Summer Games.

Interim head named new CEO of Allentown Campus

Eugene R. Slaski, acting campus executive officer and academic officer at the Penn State Allentown Campus since July 1995, has been named campus executive officer of the campus.

Under the Penn State redesign plan approved by the Board of Trustees in July, the Allentown and Berks campuses will be merged into the two-campus Berks-Allentown College.

The plan, known as "Penn State's Campuses: A Plan for the Future," outlines a framework that will help Penn State's 17 undergraduate campuses and other locations help Penn State's plan, developed through a comprehensive, yearlong process of planning and consulting that invited proposals from the campuses as well as members of the communities near the campuses, will take effect on July 1, 1997.

Slaski has been an associate professor of history at the campus since 1979. He was an assistant professor of history at the campus between 1972-79 and an instructor of history between 1970-72. Previously he taught at Florida State University, in the Allentown Campus's continuing education program and at Liberty High School, Bethlehem.

He has written *Poorly Marked and Worse Labeled: Being a History of the Port Wadens of Philadelphia, 1766-1907* and *Thomas Willing: Moderation During the American Revolution*, and edited "I Feel Like I'm Fixin' to Die: The Letters and Remembrances of Vietnam Marine Sgt. Andrew Lewandowski," a collection of letters and audiotapes in the oral history collection at the Marine Corps Historical Center in Washington, D.C. He is currently writing *I Feel Like I'm Fixin' to Die: A Study of One Vietnam Marine's Experiences with Vietnam and Post-Traumatic Stress Disorder*, based on the materials in the Marine Corps collection.

An expert in Pennsylvania history and the Revolutionary War, Slaski was also academic project director for "Penn's Dream," a WPX-TV video presentation on the tricentennial of the Pennsylvania colony.

Slaski is currently a member of the Allentown Campus Advising Team and Allentown Campus Faculty Senate, and a former member of the University Faculty Senate. In 1972-73, he chaired the campus's Academic Affairs Committee. He has chaired many task forces and committees, including the Campus Senate Task Force on Academic Diversity, 1990-91, the Campus Strategic Planning Committee on Academic Programs, 1989-90, and the Campus Strategic Planning Steering Committee, 1989-1991.

He holds a Ph.D. degree in history from Florida State University, a master's degree in history from Lehigh University and a B.S. degree with honors in secondary education (a double major in social studies and English) from East Stroudsburg State College.

Searches for other campus executive officers are currently under way at the Hazleton, Wilkes-Barre and Mont Alto campuses.

Eugene R. Slaski

Career day set for Oct. 17 for underrepresented groups

Recruiters from business, industry, government and non-profit agencies will be scouting for minority interns, co-ops and full-time employees at Penn State's 14th annual Multicultural Career Awareness Day on Thursday, Oct. 17, in the HUB on the University Park Campus.

Designed for students of color and students with disabilities, the Career Day is open to students at all academic levels and in all academic disciplines who are looking for information on career opportunities, advice on resumes and job applications as well as actual interviews with potential employers.

"We work with all the academic colleges to hold career fairs throughout the year on specific types of employment such as engineering, business and agriculture for all students, but this career day is especially nice because it has such strong advising and career development components to it. It also attracts students from all the colleges," Jack Rayman, director of Career Development and Placement Services, said. "We also encourage faculty and advisers to

attend so they can better understand the current employment market for their students and help students meet employer needs."

The day begins with a student-employer luncheon at Johnston Commons at 11:30 a.m. when students are matched with employer participants, according to career interests. Students can register in advance for the lunch at the career development office in 408 Boucke Building or by contacting the minority coordinator in their college.

The actual fair is scheduled for 3:30 to 8 p.m. in the HUB Ballroom and Fishbowl. Students are encouraged to arrive prepared to discuss their interests with employers and distribute up-to-date resumes. A number of company and agency recruiters schedule actual job interviews with students the following day, Friday, Oct. 18, in the Interview Center in McAllister Building.

"Last year, we had about 80 employers, and all indications so far are that we will have a good employer turnout again this year," Rayman said.

Ceramics company president is honored as an Alumni Fellow

Kim Young Ju, president of Haeng Nam Sa Co. Inc., Korea's largest ceramics manufacturer, has been named a Penn State Alumni Fellow, the highest honor awarded by the Penn State Alumni Association.

Kim, a 1974 MBA alumnus of The Smeal College, was honored with the alumni award in a ceremony in Seoul. Fifty-five-years-old, Kim leads a firm that had sales of \$36 million in 1993 and capital assets of \$5.9 million. Haeng Nam Sa was founded by Kim's grandfather in 1942 and control of it was passed to him by his father. The company manufactures and exports bone china, porcelain and stoneware, importing most of its raw materials. In 1985, Haeng Nam Sa exported ceramic ware factories and technology to Venezuela, becoming the first Korean ceramics firm to export plant facilities. The company continues to export such materials as refractory fire brick, furnace and oven parts, and stone cutting and grinding machines, among other items.

Kim is president of the Korean Chapter of the Penn State Alumni Association. Before entering The Smeal MBA program, he earned a B.E. degree from Hanyang University.

Kim Young Ju

Donors attend recent dedication of Behrend Engineering Complex

Penn State Erie, The Behrend College, dedicated its 55,000-square-foot Engineering Complex, honoring the area industrialists who made the building a reality. The complex, housing a variety of state-of-the-art labs and more than \$10 million in computer hardware and software, has already established itself on the national level and serves as a model partnership between industry and education.

One highlight of the complex is the Plastics Technology Deployment Center. In operation for three years, this partnership between Penn State Behrend, the Cleveland Advanced Manufacturing Program and the federal government has already had a \$14 million impact on western Pennsylvania and eastern Ohio. It is estimated the center has created or saved \$6.4 million worth of jobs by creating new sales markets and manufacturing efficiencies.

The Engineering Complex consists of four buildings connected by a large atrium hall; a new tree-lined plaza graces the western entrance to the facility. The areas are named: the James O. Benson Building, the R.J. Fasenmyer Building, the Loranger Plaza, the Joseph J. Prischack Building, Paul

Building dedicated

William Witkowski, left, president and CEO of Port Erie Plastics, is interviewed by Erie television anchor Scott Bremner following the dedication of the Engineering Complex at Penn State Erie, The Behrend College. The two met in the plastics laboratory of the R.J. Fasenmyer Building, the largest academic plastics processing lab in the nation.

and Margaret Roche Hall and The Witkowski Building.

Additional honorees who helped to make the complex a reality include Phil Tredway, founder and president of Erie Molded Plastics Inc.; Shawn Rooney, president of Niagara Plastics; Multi-Tool and Multi-Plastics, two Saegertown companies represented by Charles Johnston; and Johnson Controls, represented by Thomas Bly, general plants manager. Unable to attend were Jeffrey Yates, chairman and ceo of Yates Co., and Willi Maier, president of Omni Plastics.

Promotions

Staff

Pennie A. MacLean, manager, Financial & Administrative Services, in Commonwealth Educational System.

Diane L. Maggs, staff assistant VI in the Eberly College of Science.

Richard Mann, fire protection engineer at The Hershey Medical Center.

William A. Marsh, systems analyst in College of Engineering.

Larry Mayes, supervisor, area services, in Office of Physical Plant.

Patricia J. McFadden, program aide at the Penn State Great Valley Campus.

Phyllis A. McGarvey, staff assistant VIII in Applied Research Laboratory.

Mary L. McHose, operations assistant at The Hershey Medical Center.

Gerald T. McLaughlin, director of development in Division of Development and University Relations.

Kris M. McNeel, staff assistant V in Research and Graduate School.

Masayo M. Metz, applications systems analyst at The Hershey Medical Center.

Linda Miller, staff assistant VI in College of Earth and Mineral Sciences.

Willie A. Minggia, information systems assistant II in Computer and Information Systems, Center for Academic Computing.

Karen V. Mozley-Bryan, coordinator, communications facility and equipment, in College of Communications.

Awards

University honors two with Chambers award

Ralph R. Hosterman Jr., director for student loans and scholarships, and Clifton R. Sando, financial officer at Penn State Erie, The Behrend College, have received the 1996 Charles R. Chambers Memorial Award.

The award, established in 1979 by the family and friends of the late director of accounting at the University from 1967 to 1977, honors employees of the Corporate Controller's Office who "exhibit a conscientious and dedicated attitude toward their professional responsibilities above that normally expected or required."

Ralph R. Hosterman Jr.

Clifton R. Sando

officer at the Penn State Shenango Campus; in August 1984 he was promoted to his current position.

Hosterman began his employment with the University in 1974 in Housing and Food Services and held various positions in that department. In 1980, he transferred to the Student Loans and Scholarships Office and held various positions in that office; in October 1991, he was promoted to his current position.

Sando began his employment with the University in 1970 as a financial officer at the Penn State Shenango Campus; in August 1984 he was promoted to his current position.

Ag video receives award

A video produced by the College of Agricultural Sciences and the County Commissioners Association of Pennsylvania has received a merit award in the 1996 Awards of Excellence Program sponsored by the National Association of County Information Officers.

The video, "24 Hours in County Government," features local officials and county activities from Blair, Cumberland, Dauphin, Franklin, Lancaster, Lehigh, Lycoming, Mercer, Northampton, Somerset, Westmoreland and other counties.

It was produced by Steve Williams, senior producer-director in Agricultural Information Services, in cooperation with the County Commissioners Association of Pennsylvania and with assistance from Diane V. Brown, associate dean and affiliate assistant professor of agricultural and extension education, and Tim Kelsey, assistant professor of agricultural economics. John Dickison, senior producer-director, was the editor and videographer for the project.

The video covers a wide range of issues and activities that county governments handle daily, including emergency services, child and senior care, welfare, justice and law enforcement, record-keeping and health services.

Food service facilities cited

Eight food service facilities from the United States and Great Britain have been honored in the 1996 Food Service Equipment & Supplies Specialist/Restaurants & Institutions Facilities Design Awards competition. The program, now in its 50th year, honors excellence in designs for new or renovated projects.

Penn State was included in this year's honored facilities for the design of its High Acres Cafe on the Penn State Hazleton Campus. The facility was designed by Clever-Frable LaVallee, White Plains, N.Y. Judges examined floor plans, photographs and written presentations for 30 entries.

Health and Human Development names two as outstanding alumni

The Alumni Society of the College of Health and Human Development honored two outstanding alumni, Gregory D. Miller and Scott M. Smith.

Miller is the recipient of the 1996 Alumni Recognition Award which honors graduates of the college for professional excellence and/or exemplary volunteer community involvement in the health and human development professions. Miller received his master's degree in 1982 and his doctorate in 1986, both in nutrition.

He is vice president of nutrition research/technical services at the National Dairy Council and plays a

key role in policy and research agendas of government and professional groups.

Smith received the college's Emerging Professional Award, which recognizes professional excellence and community involvement of a college alumnus who has graduated in the past six years. Smith is a project scientist and research nutritionist at the NASA Johnson Space Center in Houston.

Smith has been instrumental in defining the nutritional requirements for extended-duration space flight, which will be used for the International Space Station.

Nominations sought for three teaching fellow awards

Nominations are being sought for the 1997 Atherton, Eisenhower and Alumni Teaching Fellow Awards. All of these awards will be presented at the Awards Convocation in March 1997.

The George W. Atherton Award for Excellence in Teaching recognizes excellence in teaching performance in the undergraduate program of the University. Up to four awards will be presented. Faculty members at all locations are eligible.

To be eligible for nomination for the Atherton Award, a faculty member must have been a full-time member of the University faculty for a minimum of three years; have undergraduate teaching as a major portion of her or his assigned

duties; and have the rank of assistant professor, associate professor or professor.

The Milton S. Eisenhower Award for Distinguished Teaching will be presented to up to two individuals. To be eligible for nomination for the Eisenhower Award, a faculty member must be tenured; have been employed as a full-time University faculty member for at least five years; and have undergraduate teaching as a major portion of her or his assignment. Members of a research staff, administrators (including department heads), and those who are predominantly teachers of graduate students are not eligible for this award.

The Alumni Teaching Fellow

Award has been established jointly by the Alumni Association, the Undergraduate Student Government and the Graduate Student Association. This award honors outstanding teaching while providing encouragement and incentive for teaching excellence at Penn State. One award will be presented at the Awards Convocation.

Recipients of the Alumni Teaching Fellow Award are expected to share their talents and expertise with others throughout the University system. Yearlong responsibilities may include activities such as participating in workshops and symposia, giving lectures or presentations on teaching techniques for new faculty and graduate assistants, taking part in discussions or

seminars with students in the University Scholars Program and teaching honors courses. To be eligible for nomination for this award, a faculty member must be full-time, with a minimum of three years teaching experience. Evaluations will be based on demonstrated excellence and lasting impact in the following areas: scholarly teaching, academic advising and overall career guidance, and enthusiasm and commitment.

Deadline for nominations for the awards is Oct. 25. For more information and nomination forms, contact the Office of Undergraduate Education, 417 Old Main, University Park or call (814) 863-1864.

Do the golden years begin with spouse's retirement?

By PAUL A. BLAUM
Public Information

Does the husband's retirement signal the onset of the couple's golden years? Not necessarily.

"The husband's retirement can have both negative and positive effects on a marriage," Scott M. Myers, doctoral student in sociology and demography, and Alan Booth, professor of sociology and human development, said. "It seems clear, however, that when retirement leads to any sign of a reversal of bread winning roles, marital quality declines."

Men who retire from jobs then fail to help still employed wives with house or yard work may be compromising the well-being of their marriage. Because a substantial and increasing number of women are in the labor force and are younger than their spouses, their husbands often retire before they do.

"Retired husbands who balk at housekeeping and maintenance place a strain on their marriage," Myers and Booth said. "This strain is exacerbated when the wife still works and her retired husband feels threatened by her professional standing."

Alan Booth, professor of sociology and human development, left, and Scott M. Myers, doctoral student in sociology and demography, review their findings.

Photo: Greg Greco

Myers and Booth are co-authors of the paper, "Men's Retirement and Marital Quality." They obtained their data from a 12-year longitudinal study of a national sample of 2,033 married persons interviewed four

times between 1980 and 1992. Only married individuals aged 55 and under in 1980 were included in the sample.

"The wife's job status is directly related to the effect of retirement on

marital quality," Myers and Booth said. "Each additional hour worked or income earned by the wife lowers the positive aspects of marital quality (i.e. happiness and interaction) and raises the negative aspects of marital quality (i.e. problems, disagreements and instability)."

"Of course, the husband's retirement can improve the quality of a marriage," Myers and Booth said. "If he has an unpleasant, low-status job that absorbs many hours a week or interferes with family life, he may be delighted to retire with the result that his marriage is happier than before."

On the other hand, husbands with a rewarding and prestigious job may find the loss of status upon retirement so stressful that marital quality suffers.

"Overall, high-quality marriages improve after the husband's retirement," Myers and Booth said. "Our evidence suggests that retirement benefits stable and happy marriages, whereas retirement harms marriages judged to be unhappy, conflict-ridden or unstable."

"Finally, it is important to note," Myers and Booth said, "that these results hold regardless of the couple's financial status."

Going global may mean change in culture

By NANCY CRABB
Penn State Great Valley

Executives seeking a management style to boost productivity may need to make changes far more sweeping than Total Quality Management or other "business strategies du jour," according to a researcher.

In their quest to heighten employee motivation, loyalty and the bottom line, U.S. corporate executives should learn from peers in Japan, Korea and other cultures where team — rather than individual — goals are the norm, John J. Sosik, assistant professor of management science and information systems at Penn State Great Valley, said.

Sosik is co-author of *Bridging Leadership and Culture: A Theoretical Consideration of Transformational Leadership and Collectivistic Cultures* with Bernard M. Bass, distinguished professor emeritus and director of the Center for Leadership Studies at the State University of New York at Binghamton; and Dong I. Jung, a doctoral candidate also at SUNY Binghamton.

In recent years, management gurus have increasingly touted the merits of "transformational" leadership — a management style research has shown to promote the highest levels of both employee and overall organizational performance.

In brief, transformational leaders spur greater-than-expected performance of subordinates by:

(a) raising employee awareness of an organization's vision and the importance of accomplishing goals;

(b) helping employees transcend their self-interest for the overall success of the organization;

(c) stimulating employees to view old problems in new ways; and

(d) providing individual consideration and attention to employees.

But management theorists have generally overlooked the fact that transformational leadership may be most effective and common in "collectivistic" cultures such as Japan, whose members have been taught from childhood to focus their energies on the goals and needs of the group rather than on themselves.

To truly realize the benefits of transformational leadership, management experts should put aside parochial biases toward North American management theory and organizational psychology, Sosik said.

"It's obvious that there's a lot that's working very well in the East. We need to take more of a long-term view of management strategies, putting in the time and effort with the understanding that the result will be worth it."

"We certainly aren't saying American companies are doomed because most of their employees didn't come from collectivistic cultures like Japan," he said. "But some context is necessary here: U.S. executives can't simply attend a one-day seminar and decide, 'Wow, this transformational leadership stuff is great. I think I'll implement it next week.' They need to recognize that a certain culture needs to exist for this to work, and it may take some time and thought before they can make the changes necessary to create that culture."

Can conservative interest groups cancel out organized labor vote?

For the national elections, the AFL-CIO is spending \$35 million to oust congressional Republicans and reelect Clinton-Gore.

But delivering the union vote is often easier said than done. Many union members are social conservatives and may be influenced by the Christian Coalition and National Rifle Association.

A survey of more than 1,200 Pennsylvania union members conducted by Paul Clark, professor in the Department of Labor Studies and Industrial Relations, and Marick Masters, professor in the University of Pittsburgh Katz Graduate School of Business, shows that unions may counter the potential influence of these socially conservative groups by focusing on a workers' economic agenda.

Some of the key highlights of their comprehensive survey of Pennsylvania union members' political activities and beliefs include:

■ Only 22.1 percent of the union members support the political goals of the Christian Coalition.

■ While 33.9 percent of the union members' support the political goals of the NRA, 34 percent are not supportive at all.

■ About 51.7 percent of the union members would generally or always vote for candidates endorsed by their union. Only 9.7 percent would do so for candidates endorsed by the Christian Coalition (if the organization endorsed candidates) and 18.9 percent would vote for candidates endorsed by the NRA.

■ About 26.1 percent are less supportive of the Christian Coalition than they were a year ago and 25.6 percent are less supportive of the NRA.

■ Almost 80 percent of the union members would vote for a union-endorsed candidate even if the NRA endorsed the opposing candidate, and 82.7 percent would vote for a union-endorsed candidate even if the Christian Coalition endorsed the opposing candidate.

ATHLETICS

A regular column provided by Intercollegiate Athletics

New soccer assistant

Tim Rosenfeld is the new men's soccer assistant coach. He replaces **Ted Gillen**, who left Penn State to pursue a professional soccer career with the New York/New Jersey MetroStars of Major League Soccer.

Rosenfeld hails from Thunder Bay, Ontario, Canada, and attended the University of Toronto. Last year, he coached the Under-14 Ontario Provincial team and was the goalkeeper coach for the Under-17 Canadian National Team.

Tarman honored

Jim Tarman, former Penn State athletics director, has been inducted into Gettysburg College's Hall of Athletic Honor.

Tarman, who retired as athletic director following the 1993 football season, is a 1952 graduate of Gettysburg where he was elected to Phi Beta Kappa and graduated with honors in history and social studies. Tarman is the first inductee in a special category that recognizes "Gettysburg graduates who have distinguished themselves in the field of athletics following graduation." Tarman spent 36 years on the Penn State staff.

On the air

The Nittany Lions' Oct. 5 meeting with Ohio State in Columbus will be carried at 3:30 p.m. by ABC Television, the 25th consecutive Penn State game to air on TV.

On board

Pat Donghia, director of sports information and promotion at Lock Haven University for six years, has been named assistant sports information director at Penn State. Donghia, an Allegheny College graduate, also worked as assistant at Edinboro University, while earning his M.A. in communications studies.

Twist and shout

Inside the milking barns off of Park Avenue on the University Park Camps, Roy Butler (left) and Albert Rossman (right) tighten a few connections before completing some routine maintenance. The two men are Dairy and Animal Science employees.

Obituaries

William E. Dreibelbis, former employee of the Department of Agronomy in the College of Agricultural Sciences, died Sept. 23 at the age of 94.

Dreibelbis, who retired from Penn State in 1978, was a member of the Washington Grange 157 in Pine Hall, the Pennsylvania State Grange and the National Grange.

Maria E. Noss, linen room worker with Housing and Food Services, from April 1, 1958, until her retirement May 1, 1968; died July 6 at the age of 93.

Donald I. Pettingill, production assist-

ant in the bakery, Housing and Food Services, from Aug. 22, 1938, until his retirement Sept. 1, 1973; died Aug. 16 at the age of 80.

Preston R. Robb, accountant for HUB Food Services in Housing and Food Services, from Sept. 9, 1955, until his retirement June 30, 1981; died Aug. 16. He was 78.

Nancy C. Rose, a former food service worker, died July 22 at the age of 92. She was a Gold Star Mother, a special designation for those whose children died while serving in the military in World War II. She is survived by two

daughters, four sons, two sisters, two brothers, 27 grandchildren, 26 great grandchildren and one great-great grandchild.

David W. Russell, professor of education in the College of Education, from Sept. 1, 1949, until his retirement Oct. 1, 1968; died Aug. 9. He was 93.

Mark A. Van Slyke, assistant professor of radiology at The Hershey Medical Center, from Aug. 1, 1993, until his death Aug. 16. He was 39.

Doris E. Whitman, senior clerk, Penn State Harrisburg, from Sept. 1, 1966, to Oct. 1, 1986; died June 17. She was 71.

Carpooler

Carpoolers wanted from Beech Creek or Howard area to University Park. Hours are 8 a.m. to 5 p.m. Please call **Amanda** at (814) 863-6747 or (717) 962-2411 (evenings); or e-mail ajf9@psu.edu.

For the record

The correct date for the Summer Session 1997 commencement at University Park is Saturday, Aug. 9, 1997. The undergraduate ceremony is set for 10:30 a.m. in The Bryce Jordan Center. The Graduate School commencement is at 2 p.m. in Eisenhower Auditorium.

University, township agree on tax settlement

Penn State and College Township have agreed to an impact fee on some non-athletic events as a way to resolve an effort by the township to impose an amusement tax ordinance on the University. The agreement was approved by the College Township Council at its regularly scheduled meeting Thursday, Oct. 3.

The University will work cooperatively with College Township to implement an impact fee on some non-athletic events held at The Bryce Jordan Center and Beaver Stadium as

a means for the township to collect revenue.

The 20-year agreement will go into effect retroactively to Sept. 1, and officials on both sides say it brings closure to the issue of implementing a tax on certain events at the Jordan Center and Beaver Stadium. Collection of the impact fee will not start until Jan. 1, 1997. Until then, the township will receive the funds it would normally expect to receive as part of an earlier agreement it signed with the University along with the other area municipalities, the county and the State Col-

lege Area School District. College Township withdrew from that agreement on July 1.

College Township will leave the amusement tax ordinance on the books, but will not pursue it relative to Penn State.

The terms of the agreement include:

- For concerts, family entertainment and special events conducted at the Jordan Center and Beaver Stadium for which tickets are sold, Penn State will collect and pay an impact fee to College Township.

- Tickets priced at less than \$10 will have no impact fee.

- Tickets costing \$10 to \$19.99 will have a 50-cent impact fee.

- Every additional \$10 increment will add another 50 cents to the impact fee.

- The University will make payments to the township quarterly.

- The impact fee will exclude college football and basketball games and other sporting events, such as possible PIAA competitions.

See "Settlement" on page 3

HUB to stay open 24 hours a day

Penn State students now have a place to study all night long and enjoy additional alcohol-free social programs on the weekends at the Hetzel Union Building, thanks to an initiative led by Undergraduate Student Government.

USG and the University's Offices of Student Affairs and Housing and Food Services have developed a plan that provides weekday 24-hour staffing, limited food services and late-night weekend activities, staffing and food services.

"We are excited about working in partnership with the University in this new initiative," said USG Vice President Ed Kitzpela. "After many months of discussions, we are pleased to announce these options for students for places to study or to socialize in an alcohol-free environment."

The ground floor of the HUB, which is the main student center at the University Park Campus, remains open 24 hours for students to study or to hold meetings. The 24-hour schedule will be held Sundays through Thursdays during the fall and spring semesters.

See "HUB" on page 3

Day of Caring

Vincent Scalomagna, assistant manager of the ice rink at the University Park Campus, left, works with Joel Blunk of the State College Presbyterian Church and Becky Markel of Geisinger Medical Center to make improvements at Lederer Park in State College. The project was one of several planned for the United Way Day of Caring on Oct. 3. For more on the United Way, please see story on page 3.

■ Cancer Awareness Week

Full schedule of activities planned at Hershey

The Hershey Medical Center is marking Cancer Awareness Week with several activities.

■ **Oct. 12-20:** The center will sponsor the Pennsylvania Breast Cancer Coalition's traveling photo exhibit, "67 Women — 67 Counties: Facing Breast Cancer in Pennsylvania." The display, in the main lobby of the medical center, is interactive, allowing the community to attach photos, notes or other remembrances of friends or loved ones affected by breast cancer.

The exhibit features women from throughout the state who are living productive lives after triumphing in their fight against breast cancer; those who are currently coping with treatments for the disease; and a few who have lost the fight but whose lives give courage and inspiration to others.

Support for the exhibit was provided by the Pennsylvania Department of Health, Bureau of Preventive Health Programs and the Cancer Control Program.

believes cancer patients can take emotional and psychological actions to participate with the medical team in their fight for recovery. She will address psychological theories and cancer survival, issues during diagnosis, treatment, remission/recurrence and psychological responses, as well as the "patient active" concept.

■ **Oct. 14:** From 6:30 to 8 p.m. the center is sponsoring a lecture by **Constance M. Carino**, founder and executive director of The Wellness Community in Philadelphia. Carino's talk, "Survivorship for Cancer Patients," is free to the public.

More than 8 million people in the United States have survived cancer. Carino

■ **Oct. 15:** From 7 to 9 p.m. the center will hold

a "Cancer Call-in Night." The public may call (800) 531-1535 to receive help with cancer-related questions. Physicians, nurse coordinators and other members of the care team from the cancer center will be available to answer questions related to oncology treatments, nutritional concerns, medical side effects and where to find additional information.

■ **Oct. 16:** From 7 to 8 p.m., the center will hold a discussion led by Dr. **Rodrigue Mortel**, associate dean and director of the cancer center, who will speak on "Cancers: Can We Control Them?" The talk will be held in the University Communications Center, 140 Sipe Ave., Hershey, and will include discussion with interactive exchange. The discussion is free to the public, but registration is required to ensure adequate seating. To reserve seats, call the Cancer Careline at (800) 531-1535.

Cancer awareness week is held during the month of October, which is National Breast Cancer Awareness Month.

News in Brief

Courses

The following courses are being offered through the Office of Human Resources. To register for free courses, please call (814) 865-8216 or contact **Jan Hawbaker** at (814) 865-3085 or by e-mail at jgh308@psu.edu. Registration for fee-based courses requires a completed registration form located on page 67 of the HRDC course catalog. For full descriptions of the courses, please see the course catalog.

■ Writing Skills

Meets for eight sessions on Thursdays, Oct. 17 to Dec. 12, from 9:30 a.m. to noon in 520 Rider Building. Cost is \$95.

■ **The Secret of Success: Dynamics of Office Protocol**
Oct. 17 from 8:30 to 11:30 a.m. in 319 Rider Building. Cost is \$35.

■ **Developing and Leading an Organizational Commitment to Diversity**
Oct. 18 from 9 a.m. to 4 p.m. in 319 Rider Building. Cost: none.

■ Connections

Meets for two sessions on Tuesday and Thursday, Oct. 22 and 24, from 8:30 to 11:30 a.m. in 319 Rider Building. Cost is \$70.

■ Designing Winning Research Proposals II

Oct. 23 from 9 a.m. to noon in 125 Reber Building. Cost is \$50.

■ Culinary Hearts Kitchen

Meets Thursdays, Oct. 17 to Nov. 21, from 4 to 6 p.m. in Room 7 Henderson Building. Cost is \$40, reimbursable to HMO participants.

■ HIV/AIDS Network Update

Meets from 12:30 to 2 p.m. Monday, Oct. 21, in 16 Ritenour Building. Cost: None. Participants may attend a meeting of the HIV/STD Consortium which precedes the session from 11 a.m. to 12:30 p.m.

■ Employee Assistance Program (EAP) Courses

Meets from 8:30 to 9:15 a.m. Tuesday, Oct. 22, in 118 Ag Sciences and Industries Building. Cost: None.

■ EAP: The Supervisor's Role

Meets from 8:30-10:30 a.m. Tuesday, Oct. 22, in 118 Ag Sciences and Industries Building. Cost: None.

Medieval Harvest Picnic

The Center for Medieval Studies will hold a Medieval Harvest Picnic at the Centre Furnace Mansion at 4:40 p.m. Sunday, Oct. 13. Chef **James Foss** of the Atherton Hotel will prepare his own harvest bread plus a number of authentic medieval dishes.

Before the meal, author **Bridget Henisch** will give an illustrated talk about how the people of medieval Europe prepared their harvests for the winter.

The afternoon's activities are open to the public. Tickets are \$15 each and may be reserved by calling the center at (814) 863-7484.

Radon services available

The Low Level Radiation Monitoring Laboratory (LLRML) of the Nuclear Engineering department at University Park is making its radon monitoring services available to faculty, staff and the community. Much of Centre County is located in a relatively high radon area.

If you have been thinking about having your home tested for radon, now is the proper time to do it. EPA specifies that initial short-term radon measurements be conducted under closed house conditions, with all windows and outside doors closed and all exhaust vents unused for 12 hours prior to the test and throughout the three-day testing period. During this time, normal entrance and exit is allowed as long as the doors are not left open for more than a few minutes.

Another service offered by the LLRML is determination of dissolved radon in ground water drinking sources.

For more information, call (814) 863-2647 or **William A. Jester**, professor of nuclear engineering, at (814) 865-2011.

The total cost of each radon kit (along with instructions on how to apply it and a written test report after the analysis was performed) is \$25.

The radon in water tests are conducted in duplicate to confirm that the samples were conducted in a reproducible manner. The cost of this kit is \$65.

Faculty Senate to meet Oct. 22

The University Faculty Senate will meet at 1:30 p.m. on Oct. 22 in 112 Kern Graduate Building.

Items to be addressed include:

■ Curriculum report of Oct. 10

■ Resolution from the Senate Committee on Student Life (legislative)

■ Commonwealth Educational System intramural, recreational and club sports (informational)

■ Joint Committee on Insurance and Benefits annual report for 1995-96 (informational)

■ A presentation of library expansion plans and their implications for the faculty (informational)

■ University Planning Council status report (informational)

■ Update on general education review (informational)

■ Mid-semester evaluation process 1992-95 (informational)

Members of the University community may attend. Any member of the University community not a member of the Senate may request to speak on any item of business already before the Senate. Such a request must be made to the chair, through the executive secretary of the Senate, at least four calendar days before the meeting at which the individual wishes to speak.

HUB

continued from page 1

In conjunction, The Cellar, a HUB eatery, will stay open until 11 p.m., and another eatery, Dough-to-Go, will operate from 11 p.m. through the following morning during the same weekdays.

On Oct. 19, USG, in coordination with various other organizations, is planning to kick off the Friday and Saturday weekend activities on the first floor of the HUB, as well as the extended ground floor hours for student use.

Kilpela says that USG will sponsor or co-sponsor with other student organizations a wide range of events such as acoustical music, jazz, folk singers, open mike, movies and comedians.

The programming will be made possible by working with the Interfraternity/Panhellenic Councils, Association of Residence Hall Students, Student Organization Budget Committee, Asylum and University Council Committee.

"The idea is to schedule activities throughout the first floor of the HUB and keep the ground floor open until 2 p.m. The building will close at 3 a.m. on Fridays and Saturdays," said USG President Sharon Entenberg. "A number of student groups already have scheduled events in the HUB Ballroom, and we hope to work with them to expand their programming until 2 a.m."

In addition, The Cellar will remain open on Fridays and Saturdays until 3 a.m., providing its regular menu. The additional staff will be funded by the University's Student Affairs and Housing and Food Services offices.

President **Graham B. Spanier** said, "I am delighted that our student leaders have succeeded in developing a plan to provide expanded student programming in the HUB. This is a positive step in Penn State's efforts to give students healthy, but fun alternatives to attending events where alcohol is the focus."

Open all night

The Hetzel Union Building on the University Park Campus is now open 24 hours a day Sunday through Thursday during fall and spring semesters for students to study or hold meetings. Limited food services will be available around the clock as well.

Photo: Greg Grieco

Settlement

continued from page 1

■ Other events such as University academic convocations, religious gatherings, banquets and similar food-related events will also be excluded from the impact fee.

"We're pleased that negotiations have led to an agreement that does not introduce an amusement tax to the community," said **Gary Schultz**, senior vice president for finance and business/treasurer. "I appreciate the fact that township officials met us half way and we hope that the resulting agreement will better benefit the community, the University and the visitors to the community who attend events at Penn State."

"This was the most rewarding negotiation I've ever participated in," said **Lee Shields**, representing College Township. "Both sides identified their goals early in the process and worked diligently to achieve them. The University was responsive and forthright. There was progress at each meeting which resulted in an agreement that addresses the needs and concerns of both parties and strengthens the town-gown relationship."

In signing the agreement, the township pledges not to pursue the amusement tax with Penn State. Township officials also

agree not to oppose the University's efforts to obtain agreement with other parties in modifying the existing settlement agreement.

Penn State officials met in recent weeks with officials from the other area municipalities that have been part of an in-lieu-of-tax agreement for several years and have indicated the University's desire to abide by that agreement.

The other entities involved include Centre County, State College Area School District, State College Borough, and Patton, Harris and Ferguson townships.

Penn State would like to have the original agreement with the other municipalities slightly modified, in particular to lengthen the period covered so that it coincides with the new College Township agreement, set to expire on Dec. 31, 2016.

In 1992, Penn State executed an agreement with surrounding municipalities to pay \$600,000 a year in lieu of property taxes. In addition, the University provides \$200,000 worth of services to the county, and pays approximately \$100,000 a year, in lieu of real estate taxes, for family housing on campus. Fees in lieu of real estate taxes are also paid for non-University-for-profit entities that rent space or land from the University.

Students are involved in annual Day of Caring

Greater awareness and more involvement are the goals of the student coordinators of the United Way Campaign at University Park.

"We wanted to get more students involved in the Day of Caring on Oct. 3," said **Jeff Nesbitt**, who is serving as campaign coordinator with **Andrew Conradt**.

"At the same time, we want to educate as many people as possible about what United Way is and how the agencies work. We have provided information and spoken to many of the Greek organizations about the Day of Caring and United Way," he said.

"We realize that not many people can volunteer, and a goal of our committee is to increase an awareness among students of the problems in Centre County and how United Way agencies are addressing them."

As student campaign coordinators, Nesbitt and Conradt serve on the Centre County United Way Board. In that capacity, Nesbitt attended a Big Ten United Way conference this past spring to learn about other student initiatives at Big Ten universities.

"After I came back from the conference, we formed a small committee and decided to focus on two events — the Day of Caring and the Blue and White basketball game."

"We spoke with more than 15 of the larger clubs about getting involved in the Day of Caring. We had students signed up from Lion Ambassadors, Golden Key National Honor Society and Lion's Share. It was somewhat difficult since students had classes that day."

The annual Blue and White basketball game, a pre-season scrimmage, is scheduled for Friday, Nov. 1, at The Bryce Jordan Center.

"We will have some 80 to 100 volunteers at the game to take tickets and help with the organization of the event," Nesbitt said. "We have invited all the United Way agencies in the community as well as anyone involved in this year's United Way campaign to attend. We will award prizes at the game for a half-time competition."

Nesbitt also has contributed to this year's campaign by creating a United Way Web page, which is stored on the University Relations Web server.

The United Way Web page address is <http://www.ur.psu.edu/uw>

LECTURES

Tuesday lectures to focus on "The Loss of Proportionality"

Ivan Illich, professor of science, technology and society and internationally acclaimed author and social philosopher, is in residence this fall on the University Park Campus, and is giving a series of public lectures each Tuesday evening through Oct. 22 at 6:30 p.m. in 112 Walker Building.

The Tuesday series is dedicated to "The Loss of Proportionality." In his lectures, Illich focuses on properly understanding the past by acknowledging that the assumptions we make about reality today are different from those of ancient societies. He examines the language and values of people of the past in order to understand the directions in which today's society is evolving.

Ivan Illich

Each week, Illich looks at historical breaks that indicate the loss of proportionality by looking at changes in the way we perceive, understand or use central aspects of our lives such as gender, economics, architecture and music.

Sometimes labeled an anarchist, Illich has published more than 11 books that cover a broad range of topics such as the disestablishment of compulsory education in

Deschooling Society, 1971; the evils of medical intervention, *Medical Nemesis: The Exploitation of Health*, 1976; and female/male complementarity in *Gender*, 1982.

Illich's lectures are sponsored by the Science, Technology and Society Program. For more information, contact the STS office at (814) 865-9951.

Homophobia in the black church topic of Oct. 17 talk

The Rev. Irene Monroe will give a talk at University Park, "Standin' in the Need of Prayer: Homophobia in the Black Church," at 4 p.m. Thursday, Oct. 17, in the Lipcon Auditorium of the Palmer Museum of Art. A reception will follow.

As a black, lesbian Baptist minister, the Rev. Monroe has become a national spokesperson against homophobia and racism. Raised in an all-black urban enclave in the 1960s and 1970s, the Rev. Monroe witnessed the uneasy relations among the black church and the civil rights and Black Power movements.

As a lesbian, she also witnessed and experienced the rejection of lesbian, gay and bisexual persons from these movements, and, as an African American woman, she was equally shut out of the Gay Rights establishment.

Her experiences ultimately led her to Union Theological Seminary in New York, where she earned a master of divinity degree to a variety of ministries, and then to Harvard Divinity School, where she is now writing her doctoral dissertation.

The Rev. Monroe has published widely in the areas of feminist theology and liberation, and has spoken around the country on the subjects of feminists and theologies, sexuality and spirituality as well as racism within the feminist and gay liberation communities.

Her talk is sponsored by Penn State's Commission on Lesbian, Gay and Bisexual Equity, the Center for Women Students and the Paul Robeson Cultural Center.

For more information, contact Mark Fearnow at (814) 863-1456 or by e-mail at maf8@psu.edu.

Graduate students to present seminar

The Department of Agricultural and Biological Engineering will present a seminar at 12:20 p.m. Monday, Oct. 14, in 239 Agricultural Engineering Building. Graduate student Joseph Millen will speak on "Reducing Sediment

Discharge from Sedimentation Basins with Barriers on a Skimmer" and graduate student Heather Warren will discuss "Design Outcome Differences in LRFD and ASD Hardwood Glued-Laminated Bridges."

President of trustees to give keynote address

Jesse Arnelle, president of the Board of Trustees, will give the keynote address at the fourth annual conference of the Penn State African American Alumni Interest Group. Other highlights include workshops and presentations, interactions with students, and music, dance and step performances.

Jesse Arnelle

The conference will be held Oct. 25-27 at the Nittany Lion Inn on the University Park Campus. Arnelle will give his address Oct. 26.

The conference, called "Preparing for the New Millennium — Politically and Economically," includes workshops on African Americans and the U.S. judicial system; legislative initiatives affecting the African American community; entrepreneurship, career development and counseling; a look back at the "Million Man March" on Washington, D.C., in October 1995; and the importance of "cultural light-houses" on college campuses.

Also taking part in the conference will be Jerry Dunn, Penn State's head basketball coach, and the Hon. Cynthia Baldwin, member of the Board of Trustees and a judge in the Allegheny County Court of Common Pleas.

Arnelle, the conference's keynote speaker, is a 1955 Penn State graduate who has served on the Board of

Trustees since 1969. He is a senior partner with Arnelle, Hastie, McGee, Willis and Greene, a 35-lawyer corporate firm based in San Francisco. In August 1993, it was named one of the top 12 African American law firms in America by *Black Enterprise* magazine.

The firm also has attracted the attention of *The New York Times*,

The Los Angeles Times and *The New Yorker* magazine, all of which have profiled Arnelle and his firm in recent years. As a Penn State undergraduate, he majored in political science, was elected all-University student body president and was invited into Lion's Paw. A member of the Nittany Lions football and basketball teams from 1951-1955, he was co-captain of the basketball team and was named All-American while receiving honorable mention in football.

Also on the program are opportunities to network with students, hear music by "Urban Fusion," a jazz group, and "Ecclesiastes," a contemporary gospel ensemble, and see a high-energy "step show" by Penn State fraternity and sorority members.

The registration deadline is Oct. 11. For information on registration, contact Lisa Lyles, conference planner, at (814) 863-1738.

Speaker offers postmodern view on what causes poverty

Lakshman Yapa, associate professor of geography, will speak on "What Causes Poverty: A Postmodern View" at the Sigma Xi October luncheon lecture at noon Thursday, Oct. 17, in 110 S. Henderson Building, the Living Center.

Yapa's lecture for the Scientific Research Society will explore the thought-provoking postmodern view on the causes of scarcity and deprivation in diverse societies from the United States to third-world countries. He believes that finding solutions for poverty using economic development has become the cause of modern poverty by focusing on raising income instead of using available resources and carefully examining the needs of the poor. The lecture is free to the public. Parking is available in the HUB parking garage.

Josephine Rhea Lecture set for Oct. 17

Albert N. Mancini, professor of Italian at The Ohio State University and editor of the journal *Italica*, will offer the 1996 Josephine Rhea Lecture in Italian Studies. The presentation, set for 7:30 p.m. Thursday, Oct. 17, is titled "Ariosto's *Orlando Furioso* and the Crisis of 16th Century Italy."

A renowned scholar of the epic,

Mancini is the author most recently of *I capitoli letterari di Francesco Bolognietti. Tempi e modi della letteratura epica fra l'Ariosto e il Tasso*.

The lecture will be held in 111 Chambers Building on the University Park Campus. Sponsored by the Department of Spanish, Italian and Portuguese, the lecture is free to the public.

More Lectures

Former New York mayor to speak Oct. 21

Ed Koch, former mayor of New York City, will speak on "What it Takes to be Elected in America Today" on Monday, Oct. 21, at 8 p.m. in Schwab Auditorium on the University Park Campus. Koch's lecture, part of the Distinguished Speakers Series, is co-sponsored by the Undergraduate Student Government. The lecture is free to the public, but tickets are required.

Ed Koch

Koch, mayor of New York for three terms (1978-89), is now a partner in the New York law firm of Robinson Silverman Pearce Aronson & Berman. He has his own radio talk show on WABC (77 AM) and a weekly column for the *New York Post*.

As mayor, he was credited with bringing New York from the brink of collapse, turning budget deficits into surpluses, creating new jobs and taking the city's unemployment rate to its lowest level in 20 years. Before serving as mayor, Koch served for two years as a member of the New York city council and nine years as a member of the U.S. Congress. Koch is currently an adjunct professor at New York University.

Tickets will be available in Room 225 of the Hetzel Union Building. The lecture series is presented by the Programming Coordination Board.

Telecommunications workshops planned

The Office of Telecommunications is offering three free workshops this fall to help University personnel manage their communications needs. "Telephone Excellence," "Voice Mail" and "Videoconferencing" sessions will aid Penn State employees in communicating with others.

"Telephone Excellence," a hands-on workshop designed to help people use the telephone and its features more effectively, will include these sessions: Centrex, MBS, Single Line and Rotary Dial Set Workshop from 9:30 to 11 a.m. Tuesday, Oct. 22; Merlin Basic Workshops from 9:30 to 11:30 a.m. Wednesday, Oct. 23, or Thursday, Oct. 31; and Merlin Advance Workshops from 1:30 to 3:30 p.m. Wednesday, Oct. 23, or Thursday, Oct. 31.

"Voice Mail" sessions follow: From 1:30 to 3 p.m. Tuesday, Oct. 22, and from 9:30 to 11 a.m. Monday, Oct. 28.

"Videoconferencing" intends participants with the PictureTel videoconferencing equipment which allows an interactive meeting to be held at two or more locations, is set for 1:30 to 3 p.m. Thursday, Oct. 24, or Tuesday, Oct. 29.

For more information or to register, call (814) 863-1354 or e-mail rose@otc.psu.edu, or visit the Web site at <http://www.otc.psu.edu/voice/tworkshop.html>.

Talk covers medieval Spanish literature

James F. Burke, professor of medieval Spanish literature at the University of Toronto, will present a talk under the auspices of the Department of Spanish, Italian and Portuguese. His lecture, "The Gaze in *Celestina*," will be at 8 p.m. Thursday, Oct. 24, in 111 Chambers Building. It is free to the public.

Burke is the author of *History and Vision: The Figural Structure of the Libro del Cavallero Zifar and Structures from the Trivium in the Cantar de Mio Cid*.

Research symposium

The Propulsion Engineering Research Center will host the Eighth Annual Symposium on Space Propulsion at the Nittany Lion Inn on the University Park Campus on Oct. 30 and 31. The Oct. 30 session runs from 8:30 a.m. to 5 p.m. The Oct. 31 session will be from 8 a.m. to noon.

Presentations in the areas of supercritical flows, atomization, spray combustion, advanced combustion diagnostics, nozzle flowfields, combustion stability, CFD applications, gas/gas injection, turbomachinery, combined cycle engines, hybrid rockets and advanced propulsion concepts are scheduled. For more information, contact John Raiser at (814) 863-6274, or e-mail jrcrper@engr.psu.edu.

Celebrating Unity

Hands Across Penn State

Unity Days, a series of events that spans two semesters, began Oct. 2 with Hands Across Penn State — a human chain formed as faculty, staff and students held hands at Penn State sites across the Commonwealth. At University Park, graduate students Lillie Wiley, left, and Kappy Arnoldsen were two of the estimated 200 people who formed a chain along the mall between Schwab Auditorium and Willard Building. Following the formation of the chain, students, faculty and staff spoke on the importance of developing a multi-cultural environment. The next Unity Days event will be a conference Nov. 5-6 at the Hetzel Union Building. The theme for this year's Unity Days is "Building Coalitions Through Education, Awareness and Cultural Sensitivity."

Commission for Women identifies issues to address in its 15th year

The Commission for Women began its 15th year of addressing the concerns of women faculty, staff and students in August by identifying several key issues on which it will focus during the 1996-97 academic year, including: developing strategies to increase the number of women in positions of leadership; establishing a stronger voice for staff within the University community; developing enhanced opportunities for professional development; examining ways to improve salary equity; and examining the successes and weaknesses of the Administrative Fellows Program. Also on the commission's calendar are the Annual Spring Banquet, scheduled for March 17, 1997, and the second Take Our Daughters to Work Day, tentatively scheduled for April 25, 1997.

Much of the commission's work occurs within its committees. Committees are made up of appointed commission members and volunteers. The committees are chaired by members of the commission's executive committee. The 1996-97 executive committee includes Nancy Herron, director of academic affairs, Penn State Dubois, chair of the commission; Mary Ann Chavey, staff assistant, Center for Sports Medicine, chair of the professional development committee; Tineke Cunniff, career counselor, Career Development and Placement Services, chair of the issues and policies committee; Mary K. Howell, professor of microbiology and immunology, Hershey Medical Center, chair of the liaison committee; Margaret Lyday, associate professor of English, chair of the committee on women's athletics; Deborah Meder, assistant controller, chair of the outreach committee; Ossie Parker, janitorial worker, chair of the

banquet committee; and Ellen Walker, academic adviser, The Smear College of Business Administration, chair of the nominations committee.

Several newly appointed members of the commission began their three-year terms on Aug. 1. New commission members are Robin Anderson, senior office information specialist; Eunice Askov, director, Institute for the Study of Adult Literacy; Helen Caffrey, director, Office of Commonwealth Relations; Wendy Closshey, undergraduate student, biology; Linda Enseli, DUS programs coordinator, Penn State Dubois; Mary Jane Irwin, professor, computer science and engineering; Lynda Goldstein, assistant professor of English, Penn State Wilkes-Barre; Josephine Herrera, director, diversity enhancement programs, College of Earth and Mineral Sciences; Corren Lewis, campus bus driver, Business Services; Sandra Podgurski, staff assistant, University Safety; Pranita Raghavan, undergraduate student, journalism; Linda Spangler, administrative assistant, Department of Economics; Noriko Toyokawa, graduate student, health education. New ex-officio members of the commission are Sharon Entenberg, president, Undergraduate Student Government, and Stephanie Shields, director, Women's Studies Program.

Commission for Women meetings are open to the University community. Fall semester meetings are scheduled from 1 to 3 p.m. today, 1:30 to 3:30 p.m. Nov. 14; and 1 to 3 p.m. Dec. 12. All meetings will be held in 404 Old Main. For more information or to obtain a volunteer application, call the commission office at (814) 865-1683.

The ARTS

AT PENN STATE

In concert

The U.S. Navy Tuba-Euphonium Quartet will perform a free concert at 2:30 p.m. Friday, Oct. 11, in the School of Music Recital Hall on the University Park Campus.

Tuba-Euphonium quartet

The U.S. Navy Tuba-Euphonium Quartet from Washington, D.C., will present a concert at 2:30 p.m. Friday, Oct. 11, in the School of Music Recital Hall on the University Park Campus. With a blend of original and transcribed works, this versatile quartet will play music by Mozart, Ramse, Dempsey, Mehlman and others. A master class for music students will follow the performance.

The concert is free to the public.

Glee Club concert

The Penn State Glee Club will present the 27th Annual Homecoming Concert, "Notes and Votes," at 7:30 p.m. on Saturday, Oct. 12, in Schwab Auditorium on the University Park Campus. Ticket holders will be able to cast ballots for their favorite presidential candidates in the First Glee Club Quadrennial Straw Vote.

The Homecoming Concert, Penn State's oldest choral tradition, will feature the 80-voice men's chorus performing "God Save Great Washington: A Medley of American Presidential Campaign Songs" and other works. Featured performers will include the Hi-Lo's, the Varsity Barbershop Quartet and special guests, Discantus from the Oriana Singers. Alumni will be invited to join in singing Penn State football songs at the conclusion of the program. Bruce Trinkle, associate professor of music, directs the Glee Club.

Tickets are \$6 for adults and \$2 for students and are available at the Eisenhower Arts Ticket Center, (814) 863-0255, open Monday through Friday 8:30 a.m. to 4:30 p.m.

Exhibit at Berks Campus

Members of Zone One Artists' Cooperative, based in Philadelphia, will present an exhibit titled "Works On Paper and Off Paper" in the Penn State Berks Campus Freyberger Gallery from Sunday, Oct. 13, through Thursday, Nov. 14. There will be a free public reception from 1 to 3 p.m. on Sunday, Oct. 13.

Zone One Artists' Cooperative consists of 26 members. Its purpose is to provide member artists with regular exhibition opportunities to help them develop their art in the context of a dialogue with critics, the public and other artists in an environment that is free of commercial pressure or censorship.

"Piano Entente"

Pianist Steven Herbert Smith will present "Piano Entente," a festival of solo recitals of recent piano music, Sunday and Monday, Oct. 13 and 14, in the School of Music Recital Hall on the University Park Campus. The Sunday performances will be at 3 and 8 p.m.; the Monday performance will be at 8 p.m.

Smith, professor of piano and a frequent local performer, has become a noted interpreter of contemporary

piano music in recitals and radio broadcasts in France, Germany, Spain and Hong Kong as well as in the United States. "Piano Entente" will present Smith's recently expanded repertoire of new music.

All three performances are free to the public.

Bach's Lunch

The Penn State Concert Choir, directed by D. Douglas Miller, professor of music, will perform for the Bach's Lunch concert at 12:10 p.m. Thursday, Oct. 17, in the Helen Eskin Eisenhower Chapel on the University Park Campus.

The 20-minute concert is part of the Bach's Lunch series sponsored by the College of Arts and Architecture School of Music and the University Lutheran Parish.

The Concert Choir consists of 54 singers; two-thirds are majors in the School of Music. The Bach's Lunch program will be selected from the choir's fall repertoire.

Dennis Malfatti, a graduate conducting major, is assistant conductor.

The concert is free to the public. Audience members may bring bag lunches to eat after the concert in the Roy and Agnes Wilkinson Lounge. Coffee and tea will be provided.

"A Cry of Players"

The University Resident Theatre Company kicks off its 1996-97 season with William Gibson's "A Cry of Players," directed by Robert E. Leonard, professor of theatre arts. The play opens Oct. 18 at the Playhouse Theatre on the University Park Campus.

Written in 1948 and first produced on Broadway 20 years later, "A Cry of Players" blends fiction and fact to ponder the trials of a young ne'er-do-well poet named Will Shakespeare on the eve of his call to immortality.

Leonard is head of the M.F.A. directing program in the School of Theatre Arts.

"A Cry of Players" runs Oct. 18 through Oct. 26. Performances will begin at 8 p.m. There will be a matinee performance at 2 p.m. on Oct. 26. Two student previews will be shown Oct. 16 and 17. For ticket information call the Arts Ticket Center at (814) 863-0255, Monday through Friday, 8:30 a.m. to 4:30 p.m.

Steelon focus of exhibit

There are very few communities in central Pennsylvania with as much cultural and ethnic diversity as Steelton.

One man embraced this multi-ethnic industrial town near Harrisburg by documenting everything from daily activities to special events. John Yetter dedicated his life to compiling the most extensive photographic record of the history and culture of Steelton, Pa.

His collection, consisting of more than 2,000 photographs, more than 50 hours of oral history recordings and

BRYCE JORDAN CENTER

Gymnastics tour

The 1996 World Gold Gymnastics Tour, featuring Olympians Kerri Strug, Nadia Comaneci, Bart Conner and Jai Lynch, will perform at The Bryce Jordan Center at 7:30 p.m. on Friday, Nov. 15.

Tickets are on sale at The Bryce Jordan Ticket Center, selected Unimarts, Penn State campus outlets in Altoona, Erie, Hazleton and Reading, or by calling (814) 865-5555, or toll-free at (800) 863-3336. Tickets are priced at \$35, \$25 and \$17.50 for adults; children (12 and under) and senior citizens (60 and over) receive a \$3 discount. Group seating is also available for this event. Call (814) 863-1812 for more information.

Upcoming events

■ Oct. 12: Penn State Tailgate Party, four hours before kickoff; tickets \$15 for adults; \$10 for children 12 and under.

■ Oct. 13: NBA Preseason, Atlanta Hawks vs. L.A. Clippers, 7 p.m.; tickets \$19.50/\$15.50/\$9.50.

■ Oct. 19: Penn State Tailgate Party, four hours before kickoff; tickets \$15 for adults; \$10 for children 12 and under.

■ Oct. 29: F.W. deKlerk, former South African President, 8 p.m. Admission is free.

■ Nov. 2: Penn State Tailgate Party, four hours before kickoff; tickets \$15 for adults; \$10 for children 12 and under.

■ Nov. 9: WYNNONA with special guest Ty Herndon, time and tickets to be announced.

■ Nov. 23: Penn State Tailgate Party, four hours before kickoff; tickets \$15 for adults; \$10 for children 12 and under.

For a listing of sporting events to be held at The Bryce Jordan Center, or for more information on any event listed here, call the center at (814) 865-5555 or visit the Web site at <http://www.bjc.psu.edu/>.

more than 100 maps, blueprints, pamphlets and news clippings about Steelton, is now open to the public at Penn State Harrisburg's Center for Pennsylvania Culture Studies. The collection was donated to Penn State Harrisburg in 1994 when Yetter died.

The collection is open to the public approximately 10 hours each week or by appointment. For additional information, contact the center at (717) 948-6094 or the American Studies Office at (717) 948-6021.

UNIVERSITY PARK CALENDAR

SPECIAL EVENTS

Thursday, October 10

School of Music, 8 p.m., Recital Hall. Jason Byrnes with a recital on the tuba.

Friday, October 11

School of Music, 2:30 p.m., Recital Hall. U.S. Navy Tuba-Euphonium Quartet.

Sunday, October 13

■ School of Music, 3 and 8 p.m., Recital Hall. Piano Entente: a solo festival by Steven Smith, pianist.

Monday, October 14

■ School of Music, 8 p.m., Recital Hall. Piano Entente: a solo festival by Steven Smith, pianist.

Wednesday, October 16

School of Music, 8 p.m., Recital Hall. Penn State Symphonic Wind Ensemble, Dennis Glocke, conductor.

Thursday, October 17

School of Music, 12:10-12:30 p.m., Eisenhower Chapel. Bach's Lunch concert by The Penn State Concert Choir.

Palmer Museum of Art, 2 p.m., Christoffers Lobby. Patrick McGrady, "Some Thoughts on the Steidle Collection."

■ Palmer Museum of Art, 6:30 p.m., Palmer Lipson Auditorium. Film: "Solte," sponsored by Hillel.

School of Music, 8 p.m., Eisenhower Auditorium. Symphonic Band, Dennis Glocke, conductor. For tickets, call 863-0255.

Friday, October 18

Palmer Museum of Art, 2 p.m., Christoffers Lobby. Glenn Williamson, curator, on "Contemporary Art From the Pincus Collection." For tickets, call 863-0255.

University Resident Theatre Company, 8 p.m., Playhouse Theatre. "A Cry of Players," through Oct. 26. For tickets, call 863-0255.

School of Music, 8 p.m., Recital Hall. Melissa Hart, mezzo-soprano.

Sunday, October 20

Palmer Museum of Art, 1 p.m., Christoffers Lobby. Sarah Andrews, Gallery Talk on "Portraiture in American Art."

School of Music, 8 p.m., Recital Hall. Susan Boardman, soprano.

SEMINARS

Monday, October 14

Comparative Literature, 12:15-1:20 p.m., 101 Kern. Kristin Naupert.

Agricultural and Biological Engineering, 12:20 p.m., 239 Ag. Engineering, Joseph Millen on "Reducing Sediment Discharge from Sedimentation Basins with Barriers on a Skimmer" and Heather Warren on "Design Outcome Differences in LRFD and ASD Hardwood Glued-Laminated Bridges."

Gravity Center, 2 p.m., 339 Davey Lab. Louis Crane on "Hopl Categories and Combinatorial Topology."

Physics, 3:30 p.m., 339 Davey Lab. Roya Maboudian on "Manipulating Surface Forces in Silicon Micromachining."

Computer Science and Engineering, 4 p.m., 302 Pond Lab. Sitaram Lanka on "Heterogeneous Transduction Processing."

■ History, 4 p.m., Eisenhower Chapel, Memorial Union. Larry Berman on "How John F. Kennedy Avoided the Vietnam Quagmire: Deconstructionist Paradise: Conspiracy Theories, Counterfactuals and Historical Inquiry."

Nutrition, 4 p.m., 110 Wartik Lab. Denise M. Ney on "Insulin-Like Growth Factor 1: Responses During Total Parenteral Nutrition."

LIVE ON STAGE! RODGERS & HAMMERSTEIN'S

NEW! THE SOUND OF MUSIC. BY RODGERS & HAMMERSTEIN. CAST BY THE TRAPP FAMILY. STAGED BY MARIA AUGUSTA TRAPP.

On stage

The Sound of Music will be performed at 8 tonight and Friday, Oct. 11, in Eisenhower Auditorium on the University Park Campus. For ticket information, call 814 863-0255.

Philosophy, 4 p.m., 124 Sparks. Cynthia Willett, author, along with panelists Emily Groszholz, Renee Schroff and William Lewis and moderator Ashley Pryor on "Maternal Ethics and Other False Moralities."

Biology, 4 p.m., 8 Mueller Lab. Kathryn G. Miller on "Actin Cytoskeletal Functions During Development and Morphogenesis: Insights Obtained Through Studies of Several Actin-Binding Proteins."

Geosciences, 4 p.m., 112 Walker. Simon Day.

Wednesday, October 16

Women's Studies, 12:10-1:30 p.m., 12 Sparks. Margaret Lyday on "Taking to the Streets: Writing in the Pre-College Classroom."

Gerontology Center, 12:1-1 p.m., 101 H&H East. Subject and speaker to be announced.

Center for Linguistics, 12:15-1:15, 205 Burrows. Lynne Hewitt on "Text Linguistics and the Study of Autism."

Engineering Mechanics, 1:25-2:30 p.m., 129 Waring. Richard Chapery on "Characterization of Nonlinear Time-Dependent Polymers and Polymeric Composites for Durability Analysis."

Thursday, October 17

Ceramics, 11 a.m., 301 Steidle. Richey M. Davis on "Adsorption of Water-Soluble Polymers on Selected Metal Oxides: Development of Steric Stabilizers."

Gravity Center, 11:30 a.m., 339 Davey Lab. Speaker and title to be announced.

Geography, noon, 110 S. Henderson. Lekshman Yapa on "What Causes Poverty: A Postmodern View."

American Studies, 3 p.m., 102 Weaver. Alan Price on "American Philanthropy: From Noblesse Oblige to Corporate Model."

Physics, 3:30 p.m., 101 Osmond Lab. Richard Webb on "Condensed Matter Physics: A Playground for the Quantum Mechanic."

Commission on Lesbian, Gay and Bisexual Equity; the Center for Women Students and the Paul Robeson Cultural Center, 4 p.m., Lipson Auditorium, Palmer Museum. Irene Monroe on "Standin' in the Need of Prayer: Homophobia in the Black Church."

Food Science, 4 p.m., 117 Borland Lab. Pal Lawlor on "Kinetic and Polymorphic Advantages of Polar Lipids During Cocoa Butter Solidification."

■ Spanish, Italian and Portuguese, 7:30 p.m., 111 Chambers. Albert N. Mancini on "Aristotle's Orlando Furioso and the Crisis of 16th Century Italy."

Friday, October 18

Physics, 2:30 p.m., S5 Osmond Lab. Edward R. Grant on "Shape of the Benzene Cation."

■ Geography, 3:30 p.m., 206 Walker. Maryann Frazier on "The African Queen Comes to America: The Impact of Imported Honeybees."

Engineering Mechanics, 3:35-5:30 p.m., 214 Hammond. John Scully on "Corrosion."

Philosophy, 4 p.m., 124 Sparks. Barbara Duden and Ivan Illich on "Philosophy of History."

Monday, October 21

■ Comparative Literature, 12:15-1:20 p.m., 101 Kern. Rosalia Cornejo on "The Lesbian Gays in a Short Story by Spanish Writer Ana Maria Moix."

■ Archaeological Institute, 8 p.m., 101 Kern. Clayton Fant on "The Dialogue of Fresco and Stone in Pompeian Wall Painting."

Undergraduate Student Government, 8 p.m., Schwab Auditorium. Ed Koch on "What it Takes to be Elected in America Today."

EXHIBITS

The HUB Art Gallery

The watercolors of Dorothy Grebos, through Oct. 13.

Shaker-style boxes by Steve Strouse, through Oct. 13.

The HUB Browsing Gallery

■ The work of Shalom Noiman, through Oct. 20.

The HUB Formal Gallery

"Geography of the Unconscious," Nancy Moore, through Oct. 19.

Kern Exhibition Area

"Lewis, Untangling Strings," Robert Vander Voort, through Oct. 15.

The pottery of Ian Stanion, through Oct. 13.

"Happy Feet!," The Pennsylvania Dance Theatre, through Oct. 13.

Palmer Museum

■ "Cooking for the Gods: The Art of Home Ritual in Bengal," through Dec. 8.

"When Coal Was King: Paintings from the Steidle Collection, College of Earth and Mineral Sciences," through Dec. 8.

"Abstraction to Figurative: Selections of Contemporary Art from the Pincus Collection," through Dec. 15.

"The Wood Engravings of Warren Mack," through Jan. 5.

Ritouner Jewish Center

"Art on the Move: The paintings of Marjut Kaupar-Katz," through Oct. 16.

Zoller Gallery

"BFA Exhibition," through Oct. 19.

■ Reflects an international perspective

Appointments

Doctor named program director at Hershey Medical Center

Dr. Lawrence I. Sinoway, professor of medicine, was recently named program director of the General Clinical Research Center at The Hershey Medical Center. The GCRCC was established by the National Institutes of Health to create and sustain specialized institutional resources in which clinical investigators can observe and study human physiology as well as study and treat disease with innovative approaches.

Sinoway's responsibilities will include serving as focal point for all clinical research throughout The Hershey Medical Center, including the formation of a Clinical Trials Office, oversight for the Institutional Review Board and the development of clinical epidemiology.

Sinoway came to Hershey in 1984 as assistant professor of medicine in the Division of Cardiology, and as director of the Cardiology Critical Care Unit and of the Cardiology Critical Consult Service. He was named professor in 1993 and in that same year became associate program director of the General Clinical Research Center. In 1994, he became assistant chief of the Division of Cardiology as well as staff cardiologist at the Lebanon VA Hospital.

He completed his internship and residency in internal medicine at the Bronx Municipal Hospital Center and Hospital of the Albert Einstein College of Medicine, Bronx, New York, serving as chief medical resident in internal medicine in 1981-1982. He completed a fellowship in cardiology at the same institutions in 1984. His undergraduate studies were at Johns Hopkins University. He received his M.D. degree from the College of Medicine and Dentistry of New Jersey.

Executive director joins Institute for Study of Business Markets

Ralph A. Oliva, former vice president of worldwide market communications and design for Texas Instruments, has been named the new executive director of The Smeal College's Institute for the Study of Business Markets (ISBM). ISBM has become known internationally as the academic leader in business-to-business marketing research.

Oliva succeeds Irwin Gross, co-founder of ISBM. Gross retired from the University Aug. 31 after 13 years of service. Now a professor emeritus of marketing, he will remain active with the institute and teach in the Penn State executive programs.

Oliva is a 23-year veteran with Texas Instruments, beginning in 1973 as a member of the technical staff in the TI Learning Center. In his most recent position with the firm, he was responsible for the worldwide management of the TI brand, oversight of all of the company's market communications and lead development of design, message and communications strategy.

He headed the team which established the Texas Instruments World Wide Web site, championed an integrated identity program to help chart TI's future, managed internal communications supporting the company's total quality man-

agement efforts and created a new approach to professional development: the TI Virtual University.

Oliva also developed positioning strategies for Texas Instruments, award-winning integrated communications campaigns, TI's first integrated branding strategy and a new satellite approach to market development.

He is the author of 15 books, an expert on the application of technology to education and a consultant and adviser to businesses and educational institutions. He holds master's and doctoral degrees in solid state physics from Rensselaer Polytechnic Institute, and a bachelor's degree in physics from Fordham University.

Health and Human Development adds development assistant

Kimberly Neely of Boalsburg has been named assistant director of development for the College of Health and Human Development. She will be responsible for organizing and implementing fund-raising programs and related activities for the college. She will report to Maggie Crispell, the college's director of development.

A Carlisle native, Neely spent the past three-and-one-half years as vice president for program services and as development specialist for the Easter Seal Society Serving Central Pennsylvania, with offices in Altoona and State College. As vice president for program services, she planned and coordinated pediatric rehabilitation, early childhood education and social support services for Easter Seals. In addition, she was responsible for grant writing, several fund-raising campaigns, outreach and public information for the organization. Neely also has worked for the Keystone Peer Review Organization, a subsidiary of the Pennsylvania Medical Society, as the communications coordinator.

She has a bachelor's degree in English from the University of Delaware and a master's degree in communications from Shippensburg University.

Lawyer joins staff as director of gift planning

Patricia L. Roenigk has been named director of gift planning for Penn State.

For the University's Division of Development and Alumni Relations, she will administer planned gift programs and assist current and prospective givers by providing information on planned gift options, interpreting tax laws and preparing documentation. She will also assist in establishing endowed funds for long-term support of specific University programs, scholarships and other needs.

Roenigk most recently was a partner with the State College law firm of McQuaid, Blasko, Schwartz, Fleming & Faulkner Inc. Her duties included charitable gift planning and overseeing the formation and representation of professional and business corporations and partnerships.

She also has served as a lecturer for Temple University's School of Medicine and Penn State's Department of Continuing Education, Office of University Development and The Milton S. Eisenhower Medical Center.

She earned her bachelor's degree in pre-law from Penn State in 1980 and a J.D. from Temple University School of Law in 1984. She was admitted to practice before the Supreme Court of Pennsylvania and is a member of the American Bar Association Division of Taxation and the Pennsylvania and Centre County Bar Associations.

Dig this

Edward Klotzko, professor of agronomy, center, took his Soils 416 class on a short field trip recently. The class, studying soil genesis and classification, examined a soil profile in the field beside the lower gardens off Park Avenue on the University Park campus.

Photo: Greg Grieco

BookShelf

A new epic by Charles Hackenberry, assistant professor of English at the Penn State Altoona Campus, has just been published by Harper Collins in paperback. *I Rode with Jesse James* has been nominated for Spur Awards in two categories and for a Perry Award.

M. Lee Upcraft, assistant vice president emeritus for student affairs and affiliate professor emeritus of higher education, and John H. Schuh, associate vice president for student affairs at Wichita State University, are co-authors of *Assessment in Student Affairs: A Guide for Practitioners*, Jossey-Bass Publishers, San Francisco.

The book, meant as a guide for practitioners at all levels, provides a single volume resource on using assessment to develop and improve all facets of student affairs. It includes detailed guidance for student affairs staff on how to assess student needs, student satisfaction, campus environments, campus cultures and student outcomes. It also explains how senior staff can employ assessment finding in strategic planning, policy development and day-to-day decision making.

Partings

Professor emeritus earned
all degrees at Penn State

Gordon E. Robinson, professor emeritus of nuclear engineering, has retired after 36 years of teaching and research at Penn State. He may be one of the few faculty here that received his bachelor's, master's and doctoral degrees all at Penn State, in fuel technology, nuclear engineering and mechanical engineering, respectively.

Gordon E. Robinson

Robinson served as

a navigator in the U.S. Navy from 1952 to 1955, after which he worked as an engineer for Babcock and Wilcox for six years. He returned to Penn State in 1960 as a graduate student and a research assistant in nuclear engineering, serving as a reactor operations supervisor from 1960 to 1965, and assistant reactor director from 1963 to 1965.

Robinson taught 13 courses during his career at Penn State, six of which he developed himself, in such areas as nuclear plant systems, thermal and hydraulic core design, safety analysis, heat transfer and thermodynamics. He is responsible for having initiated

reactor safety research in the Department of Nuclear Engineering, and his research interests included boiling heat transfer, liquid metal reactor design and problems related to reactor operation.

He was a charter member of the Department of Energy's Accreditation Board as well as the National Nuclear Accrediting

Board for the Institute of Nuclear Power Operations. He also has written several reactor operations exams for the Nuclear Regulatory Commission and was a consultant to the Operation Licensing Branch of the Commission for more than 20 years.

From 1984 to 1995, Robinson served as the graduate program admissions officer for the College of Engineering's Department of Nuclear Engineering. From 1973 to 1975 and 1990 to 1995, he chaired the Reactor Safeguards Committee.

Robinson will continue to live in State College with his wife, Kay, and their children, Allison and Mike.

Classics professor gains
emeritus status at retirement

Archibald Allen was named professor emeritus of classics upon his retirement from the University on June 30. His association with Penn State spanned 31 years and included departmental administration along with teaching and research.

A native of Ireland, Allen received his B.A. degree (1965) in classics and his Ph.D. degree (1970) in Greek from the Queen's University of Belfast. He joined the Penn State faculty in 1965 as a teacher of Greek and Latin and of classics-in-translation at all levels.

He was awarded the Class of 1993 Award for outstanding Contributions in the Humanities in 1990. As a research scholar, he has published more than 50 papers in European and North American classical journals on

textual problems in Greek and Latin poetry, and is the author of a critical edition of the fragments of the early Greek elegiac poet Mimnermus (Franz Steiner, Stuttgart, 1993). Allen served as head of the Department of Classics from 1976 until 1992.

Allen now lives in New York City where he continues his research and teaching. He has been appointed adjunct professor of classics in the Department of Classics at Brooklyn College of the City University of New York.

His wife, LaRhue, founder and former artistic director of the Pennsylvania Dance Theatre in State College, is executive director of the Trisha Brown Dance Co., based in Manhattan.

Other employees depart service

Nancy L. Erdley, staff assistant V in the College of Arts and Architecture, from March 11, 1982, to Aug. 31.

Lawrence S. Fies, manager of the Ice Pavilion, Intercollegiate Athletics, from July 1, 1980, to Sept. 16.

Janet M. Oswell, staff assistant VI at the Penn State Worthington Scranton Campus, from April 1, 1975, to Sept. 12.

Olympics expert retires;
will continue to lecture, run

John Lucas, professor of exercise and sport science in the College of Health and Human Development, retired in June.

Lucas, who came to Penn State as track coach in 1962 after earning a bachelor's degree in physical education from Boston University, a master's in sport science from UCLA and a Ph.D. in physical education/sport history from the University of Maryland, has served as the Official Olympic Lecturer since 1993. He narrowly missed qualifying for the 1952 U.S. Olympic track team and attended his first Olympic Games for the Turkish team and doctoral student at work on his dissertation. He

resigned his coaching position at Penn State in 1969 to devote more time to teaching and research.

Lucas, who hasn't missed a Summer Games since 1960, has written numerous books and 100 articles on the Games. This year, he was honored with the gold medal of the Olympic Order from the International Olympic Committee for his work. Lucas also holds a master's degree in American history from Penn State.

In retirement, Lucas maintains a busy schedule as Olympic lecturer and runner. He continues to log miles along the winding roads of Happy Valley. He hopes to pass the 90,000-mile lifetime mark in January.

Professor retires after 28
years of University service

Makunda Das, professor of electrical engineering and associate director of the Center for Electronic Materials and Processing, retired after 28 years with Penn State. Das will be remembered among his colleagues in the department and throughout his field for his outstanding research in the areas of field-effect and bipolar transistors, millimeter-wave III-V devices and optoelectronic receiver integration.

Das came to Penn State in 1968 after three years as a principal scientist and group leader at the Hirst Research Center in Middlesex, England. In 1978, he was selected to be a National Science Foundation exchange scientist in India. Das served as an IPA visiting professor at the Wright Patterson Air Force Base Laboratory in Ohio from 1983 to 1984. In the fall of 1987, he went to Gothenburg, Sweden, to serve as a visiting professor to the Chalmers University of Technology's Department of Radio and Space Science.

Das received both his B.S. in physics (1953) and his M.S. in electronics (1955) from Dhaka University in Dhaka, Bangladesh. In 1960, he received his B.S. and Ph.D. in electrical engineering from the University of London's Imperial College.

Das chaired the College of Engineering's Electronics Area Committee from 1975 until he retired. He is a senior member of the Institute for Electrical and Electronic Engineering and was a consultant to the GE Electronics Laboratory in Syracuse, from 1984 to 1993.

He has authored more than 100 refereed publications and contributed to several book chapters. In 1986, he was awarded the Penn State Engineering Society's Outstanding Research Award. Although he is retired, Das is currently conducting research at the Tata Institute in India.

Hazleton professor retires
after 30 years of teaching

After 30 years of outstanding teaching, advising and sharing information, advice and counsel, and maintaining an active research schedule, Anthony V. Galanti, professor of engineering at the Penn State Hazleton Campus, has retired.

A chemical engineer, Galanti's service to the students was marked by his dedication to making college a meaningful and relevant experience. Galanti had spent some years in the private sector as an industrial engineer and throughout his teaching career, he sought to relate theoretical knowledge to practical application.

He has co-authored a number of books and a series of vocational-technical modules on industrial safety, material handling, preventive maintenance and other industrial processes. Results of this own research in chemical engineering and polymer research were published in a number of major technical journals.

Galanti was born and reared in Berwick, Pa., and served that community in a number of educational activities. He served the Penn State Hazleton Campus in countless ways — on the Faculty Senate, and as a member of campus planning and advising committees.

Excellence fund to reward best in teaching, research, service

A \$20,000 Dean's Excellence Fund to reward the best in teaching, research and service has been established in the College of Communications. Highlights of this fund, made possible by a grant from an anonymous friend of the college, include:

- A Teaching Award of \$1,000 to acknowledge innovation/excellence/dedication in teaching for tenured and tenure-track faculty.

- A Research Award of \$1,000 to acknowledge productivity/publication/quality of research for tenured and tenure-track faculty.

- A Service Award of \$1,000 to acknowledge service as it enriches the academic life of students and the well-being of the community.

- A \$2,000 teaching development grant available to a faculty member each summer for the development of new courses, new curricula, learning enhancement and other practices related to the improvement of learning and teaching.

- A faculty research and travel grant fund of \$5,000, awarded on the basis of merit to tenured and tenure-track faculty, above and beyond the usual funds available through the college. Preference will be given to faculty who identify matching funds from an external source.

- A \$500 Staff Service Award to recognize excellence in service by a full-time staff member in the college.

- A \$2,000 Graduate Student Conference Fund to defray travel costs for graduate students invited to present refereed papers at conferences.

- A \$2,000 Undergraduate Students Activity Fund available in the form of small grants to support the college's student chapters of national organizations, student groups and service learning.

- A \$5,500 general fund, to be used at the dean's discretion to support faculty or student activities and programs.

For more information, please contact **Christine Templeton**, director of alumni and public relations, College of Communications, at (814) 865-8801.

Increased recycling efforts save more than \$35,000, aid environment

Thanks to the recycling efforts of Penn State students, faculty and staff, the amount of recyclable waste collected at the University Park Campus — aluminum cans, glass, newspapers and so on — increased from 5,286 tons in 1994 to an all-time high of 5,316 tons in 1995.

That's good news for at least two reasons:

- The increased amount of recyclable material represents a corresponding amount that won't be taking up space in a landfill somewhere; and

- The numbers translate to a savings of more than \$35,000 in the 1995 "tipping fees" Penn State had to pay for waste handling and disposal.

The savings were realized because Centre County charges a tipping fee of \$75 a ton to handle nonrecyclable garbage, but only \$5 or \$10 a ton — depending how it's sorted — to handle recyclable materials.

Al Matyasovsky, who oversees Penn State's waste management and recycling efforts, said that the University's waste management team is grateful for the strong public support of the program.

Between 1994 and 1995, the total amount of waste collected on campus — nonrecyclable refuse as well as recyclable materials — decreased 96 percent, from 11,744 tons to 11,287 tons.

GROWTH IN RECYCLING EFFORT

Over the past three years — between 1992 and 1995 — the recycling statistics are even more impressive. In 1992, only 1,019 tons of recyclable material were collected on campus. But the number zoomed to 2,415 tons in 1993, to 5,286 tons in 1994 and to 5,316 tons in 1995.

Through another University program — the ongoing recycling program at Beaver Stadium and The

Bryce Jordan Center — money generated from the sale of recycled material goes to the Centre County United Way.

During home football games, 20 recycling stations are located throughout the Beaver Stadium parking lot for glass and plastic bottles and steel and aluminum cans. Last year, United Way received more than \$11,000 from the sale of 34 tons of recyclable material.

Alumni Fellow

Harrisburg honors Ingersoll-Rand executive

Ingersoll-Rand executive **R. Barry Uber** is Penn State Harrisburg's 1996 Alumni Fellow. A 1969 graduate of Penn State Harrisburg with a bachelor's degree in business administration, Uber will receive the honor during a daylong visit to the campus on Oct. 29.

Currently president of Ingersoll-Rand's Construction and Mining Group at the firm's world headquarters in Woodcliff, N.J., Uber first worked for the firm as a sales trainee and co-op student while pursuing his undergraduate degree at Penn State Harrisburg.

Following graduation, his career with Ingersoll-Rand moved rapidly forward. In addition to becoming the second-youngest vice president in the corporation's history, Uber crafted the firm's first joint venture with Russia, led several acquisitions and traveled extensively throughout the world, including 25 trips to Japan.

Uber's professional career is paralleled by his commitment to his community. He is a member of the board of directors of the National Mining Association and a member of the board of trustees for Catholic Community Services of the Archdiocese of Newark.

He has served on boards of directors for the Keystone

R. Barry Uber

Chapter of the Boy Scouts of America, Wilkes University and Cumberland County Historical Society and co-chaired the Somerset County, N.J., United Way campaign.

His current Penn State activities include his commitment to the Dean's Advisory Committee for Manufacturing Quality Group and leadership as a corporate champion for the Penn State recruiting team.

Uber will share his experiences with faculty, staff, students and the community during his visit. Classroom presentations will lead into a 7 p.m. Alumni Fellow Award Ceremony and then Uber's lecture

in the Olmsted Auditorium.

The event is free to the public. For information, call (717) 948-6272.

The Alumni Fellow Award is the most prestigious honor given by the Penn State Alumni Association. The University's Board of Trustees has designated the title as permanent and lifelong. The Alumni Fellows program, which began in 1973, is designed to invite prominent and outstanding alumni to return to the University to offer their expertise in informal contacts with the students, faculty and administrators.

Good feedback key to resolving workplace problems

By PAUL BLAUM
Public Information

Lack of feedback, not poor training, is the chief bane of the American workplace.

"Many workplace problems have nothing to do with poor training," William J. Rothwell, associate professor of education, said. "When a worker violates a dress code or consistently misses work, that's a problem for management, not the human resources director."

"Often, if there is a training problem, it is with managers who are not trained to deal with workers who know their jobs but are still underperforming," Rothwell said.

Rothwell is the author of "Beyond Training And Development: State-Of-The-Art Strategies for Enhancing Human Performance," published by the American Management Association.

The researcher surveyed 350 randomly selected members of the American Society for Training and Development, presenting each with a list of 20 possible causes of human performance problems. Participants were asked to rate how frequently they encountered those causes and how significant those causes have proved to be.

"The most commonly cited cause of worker performance problems was lack of ability, tools or motivation but lack of feedback on consequences," Rothwell said. "The second most significant cause of performance problems was lack of timely feedback on perfor-

William J. Rothwell's research has documented the importance of managers giving clear, unambiguous feedback to employees.

Photo: Greg Grieco

mance; the third, lack of assigned responsibility."

On the other hand, the three most effective solutions identified by survey respondents were providing workers with clear, unambiguous feedback about how well they are doing; giving workers the information they need to function competently; and improving timely information during performance.

"Many managers never get proper training themselves as managers," Rothwell said. "A misguided premise exists that, because

someone does their job well, that person can do well as a supervisor. But that often is not the case. Supervising or managing involves a whole different set of skills other than knowing the job."

Many managers and supervisors dislike confronting workers and fail to give workers the necessary feedback that keeps a problem from getting worse.

Instead of discussing the problem directly with employees, managers pass that duty on the trainer or human resources person, not realizing that the trainer is

not a workplace traffic cop, Rothwell said.

For instance, if workers are not conforming to the company dress code, the problem might be a lack of communication that can be handled at the outset by providing each new employee with a brochure explaining company procedures and expectations.

On the other hand, workers may know the dress code but not comply with it because they don't want to or because dressing in a taboo fashion draws favorable attention from co-workers.

"There is no point in instituting a company training program aimed at improving bad work habits if those habits are not actually related to job skills," Rothwell, a faculty member in the College of Education, said.

Managers who think in those terms are throwing the wrong solution at the problem. The solution is for the manager, not the trainer, to give individual feedback to the small minority of workers guilty of violating company policy. Instigmating the whole labor force would be wasteful and perhaps even counterproductive.

Most organizations could improve dramatically in the area of training, Rothwell said.

"But managers have to know the difference between which worker performance problems are fixable by training and which are not," Rothwell said. "Training only fixes problems that come from lack of knowledge."

Wet, mild September may dim fall foliage

The overly cloudy, wet and mild weather experienced during September may delay leaf change in Pennsylvania and dim the brightness of the colors, according to a Penn State forestry expert.

"I have serious concerns about the quality and brightness of the fall foliage this year," Marc Abrams, associate professor of forest ecology and physiology, said. "The color change may not only be later than usual, but not as bright."

Everything depends on the weather, but if the weather remains wetter and warmer than usual, then the leaf turn will be affected.

According to Abrams, a dry and cool, but above-freezing, September makes for a bright leaf change in the middle of October.

"If the weather turns sunny, cooler and drier over the next two to three weeks, we could still have a bright fall," Abrams said.

Despite that possibility, the College of Agricultural Sciences faculty member is not optimistic about this year's autumn color. He noted that last year, because of the severe drought and the mild fall temperatures across Pennsylvania, leaves of many trees turned from green to brown.

"If the weather continues as it has been, the reds will be less red, the oranges less fiery and the yellows less bright," Abrams said.

"The milder than usual weather will prolong the growing season and the color change will be later than usual, as well."

In general, the peak of leaf change in Pennsylvania is in mid-October, shifting a few days or a week depending on location.

Study outlines proper use of asthma drug

The major study of mild asthma reported in the *New England Journal of Medicine* ends a five-year debate about appropriate use of medication for treating mild asthma.

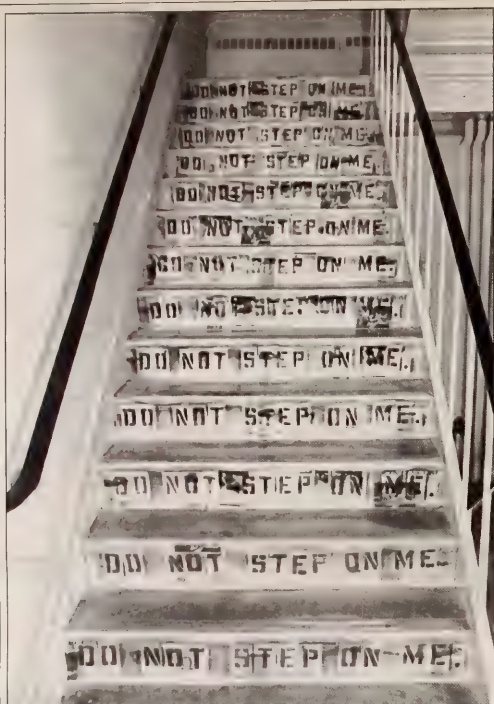

The results show that the commonly prescribed inhaled drug, albuterol,

should be used only on an as-needed basis for patients with mild asthma. Regularly scheduled use of albuterol is not risky, but neither is it necessary, according to co-investigator Dr. Clifford W. Zwillich, professor and chief of pulmonary and critical care at The Hershey Medical Center.

Puffing on the inhalant only during an attack of coughing or wheezing is sufficient for mild asthmatics, according to Zwillich. Data collection

and statistical analysis for the multicenter study was designed and managed by Vernon M. Chinchilli of the Center for Biostatistics and Epidemiology.

Many of the more than 7 million Americans with mild asthma take albuterol as a regular medication. The inhalant is a beta-agonist that relaxes smooth muscles of the airways. It is sold under the brand names of Ventolin and Proventil.

Unique recycling technique

A stairway in the Visual Arts Building on the University Park Campus is transformed into site art. Students in Associate Professor Sally McCorkle's installation art class were given locations and had one and a half weeks to create their work. This stairway was designed by student Kelly DeKraane using past issues of *Intercom* to cover the steps before stenciling the lettering.

University, others join in electronic data exchange pact

Penn State Harrisburg, Millersville University and Harrisburg Area Community College have forged an electronic data exchange pact — one of the first for the Commonwealth.

In a technological departure from tradition, the three area institutions have signed a "trading partner agreement" which provides for the electronic interchange of information and permits them to exchange student transcripts electronically rather than as a mailed, printed document.

"This means that we're going to work together and will accept the electronic transmission as an official document," said Thomas Streveler, director of enrollment services at Penn State Harrisburg. "This will save a lot of time because sometimes it takes two to three weeks to send a transcript. With this it's immediate in a sense."

The system will be a valuable tool for the dual admission program between Penn State Harrisburg and HACC. More than 30 percent of Penn State Harrisburg's incoming junior class this semester transferred from HACC.

The three colleges have been working on implementing this system since last October.

The computerized transmission of records is common practice at institutions such as banks, insurance companies and hospitals. However, "educational institutions have been slow to do this," Streveler said. "I think we were waiting for the technology to evolve."

Currently only two institutions in Pennsylvania are involved in the electronic exchange of records, according to Streveler. The Community College of Philadelphia does a one-way transmission to Temple University.

"Some states have mandated electronic exchange," Streveler said. "The public universities in Florida all have it and some universities in California and Oregon do also."

The cost to set up the electronic data exchange system is minimal because the University Park Campus purchased the necessary hardware and software some time ago.

Penn State will also save money by using a server in Texas for electronic exchange. "The University of Texas established a computer for this and they are offering free use of the computer to send records," Streveler said.

"There are about 80 institutions using it. I think they're trying to establish themselves as one of the major, central locations."

Students do not have to worry about security issues with this system. "We have an encryption device in that transmission, so that if a hacker tapped in the message would be scrambled," Streveler said.

"We've come a long way," Streveler said. "We might be transmitting transcripts by next semester. That's our goal."

Gift valued at \$20.9 million given to Penn College

An A-6E Intruder aircraft has been awarded to Pennsylvania College of Technology by the federal government. Valued at nearly \$20.9 million, the Navy aircraft and its accompanying training aids is the single largest gift received in the college's history.

The A-6E will be used for instruction in Penn College's aviation and avionics technologies programs, housed at the college's Kathryn Wentzel Lumley Aviation Center at the Williamsport-Lycoming County Airport in Montoursville.

Formerly used by the U.S. Navy, the aircraft was donated to the college

University will honor those still "Living the Dream"

As part of the University's annual celebration of Martin Luther King Jr. Day, the Forum on Black Affairs will hold a dinner to honor those who are "Living the Dream" as envisioned by King. The dinner is scheduled for Friday, Jan. 17, at The Penn State Scenic Presidents Hall. Guests will begin seating at 6:30 p.m. with dinner served promptly at 7 p.m.

The community is invited to reflect on and celebrate seven of King's principles and submit the names of individuals, organizations and programs that they feel exemplify these principles.

Respondents should select one principle; describe the contribution of

Higher education facing more change Michigan's former president discusses pressing issues at forum

By ANNEMARIE MOUNTZ
Public Information

The university, one of civilization's most enduring institutions, has changed considerably over time. The needs of today's society and a tightening of governmental purse strings have forced public research universities such as Penn State to change once again.

Where we are headed is not yet clear, but a clue may be found in where we have been, according to James J. Duderstadt, president emeritus of the University of Michigan.

"In a sense, rather than move ahead into a new paradigm, what we may be doing is finding ourselves moving back to an earlier paradigm, that of the land-grant university very much tied to society, serving that society and

meeting its here-and-now needs. That may be the message that society is giving us," Duderstadt said at the inaugural Penn State National Issues Forum, held on the University Park Campus Oct. 8 and simulcast on WPSU radio.

"There's a tidal wave of criticism that affects higher education, in part because of our importance to society but in part too because the traditional allies we've had — the press, public officials, people in the business world — are now some of our most strident critics," Duderstadt said.

He said that while those allies are deeply concerned about higher education, they are frequently not well informed and tend to call for remedies that are not in the best interests of the universities or society as a whole.

One such public call is for the elimination of tenure.

See "Change" on page 3

Inside

The ways we work

To find out what action various units across the University are taking in response to the 1996 Faculty/Staff Survey, which revealed several things about the way we think about work, please see the special section on pages 7-10.

TV stereotype doesn't fit

Alumni Association honors Alumni Fellows

Physician is president of National Kidney Foundation

Theodore Steinman, a physician at Beth Israel Hospital and Brigham and Women's Hospital in Boston and a clinical professor of medicine at Harvard Medical School, has been named a recipient of the Penn State Alumni Association's 1996 Alumni Fellow Award.

Steinman received a bachelor of science degree from Penn State in 1960 and a medical doctorate in 1964 from the Georgetown University School of Medicine. He completed his senior residency in medicine at Beth Israel Hospital in Boston, Mass., where he is director of the dialysis unit, medical coordinator of the kidney transplantation service and co-director of the metabolic stone unit.

Steinman has research interests in many areas relating to kidney functioning in adults. He holds various committee positions that advance research in these and other areas and has received many awards.

Steinman is the founder and organizer of the Boston Inter-hospital Renal Rounds. He serves as a research review consultant with the Department of Veterans Affairs and as chairman of the agency's Data Monitoring Board. He also is president of the National Kidney Foundation (Region I), past president of the Renal Physicians Association, vice-chairman of the Polycystic Kidney Research Foundation, member of the Life Options Rehabilitation Advisory Council and member of the oversight committee of the Joint ASN-NKF-RPA Project on Dialysis Outcome Quality Initiative. In addition, he serves on various editorial boards of scientific journals.

Theodore Steinman

The Alumni Fellow Award, presented by the Penn State Alumni Association, is administered in cooperation with the academic units. The Board of Trustees has designated the title of Alumni Fellow as permanent and lifelong.

Two cited for achievement by the College of Communications

The College of Communications will welcome its 1996 Alumni Fellows for a week of classes and events from Oct. 21-25. **Robert K. Zimmerman** and **William A. Jaffe**, both of State College, will be honored by the Penn State Alumni Association on Thursday, Oct. 24, at a special ceremony at the Nittany Lion Inn.

Zimmerman, who recently retired as president and major stockholder of TeleMedia Broadcasting, began his career after graduation as a radio-television announcer in Johnstown, Pa., in 1958. After four years in Johnstown, he moved to Washington, D.C., where over the next 10 years he worked as an announcer, a broadcast time salesman, a sales manager and a general manager. In 1972, Zimmerman returned to central Pennsylvania to purchase radio stations WRSC-AM and WQWK-FM. These purchases were the start of a chain that reached as many as 13 stations at one time. Zimmerman also started a television commercial production division, a cable advertising sales department and a cable video text division.

Past president of the Pennsylvania Association of Broadcasters, Zimmerman served 16 years on the association's board of directors, and in 1991, he received the PAB's Lifetime Achievement Award. Currently, he is the president of Centre Stage, a member of the State College Kiwanis Club and a member of the Mt. Nittany Conservancy.

Jaffe, in addition to being a 1960 Penn

Robert K. Zimmerman

William A. Jaffe

State graduate, holds an M.S. in management from the University of Illinois. He is the principal of The Jaffe Group, a recently established human resources consulting firm. Jaffe has more than 27 years of human resource consulting experience, having served as a compensation and human resource practice leader for Alexander & Alexander Consulting Group's Mid-Atlantic Region and as a consultant for 21 years with Towers Perrin.

Jaffe has worked with both the private and public sector, for-profit and not-for-profit, and large and small organizations in a number of industries. Included among the clients he has served are the American Nurses Association, British Biotechnology, National Rural Telecommunications, Sovereign Bank, the Travel Industry Association and VA United Methodist Homes. From 1991 to 1995, Jaffe was an adjunct associate professor of management science for George Washington University's School of Business and Public Management.

Penn Staters

Namenjeet Ahluwalia, assistant professor of nutrition, and **James Strauss**, instructor of anatomy and physiology, have been selected to participate as Project Kaleidoscope's (PKAL) Faculty for the 21st Century — Class of 1996. Project Kaleidoscope works to build networks of individuals and institutions across the country with a common commitment to transform undergraduate science, mathematics, engineering and technology education. Those named to the faculty for the 21st century network are faculty who, at an early career stage, are emerging as leaders within their local community and are recognized as having the potential for national leadership into the next century.

Richard Devon, associate professor of engineering, **Sohail Nawar**, assistant professor of engineering at the Penn State Altoona Campus, **Mary Ann Lyman-Hager**, coordinator of instructional computing, and **Ron Land**, associate professor of engineering at the Penn State New Kensington Campus, served as invited professors of the Institut Universitaire Technologie in Bethune, France.

Martha T. Halsey, professor emerita of Spanish, presented an invited paper at the "International Semi-

nar on Theater, Society and Politics in 20th-Century Spain," organized by the Federico García Lorca Foundation in Madrid. She spoke on "Historical Theater and the Dialectical Vision: Some Plays of the Post-Civil War Era."

She also presented an invited lecture at the University of Oviedo, Spain, on the same subject. Halsey was recently elected an honorary associate of the Hispanic Society of America, with headquarters in New York City.

Sridhar Komarneni, professor of clay mineralogy in the Department of Agronomy and Materials Research Laboratory, gave two invited talks at the University of Bonn, Germany, on "Microwave-hydrothermal Processing of Ceramic and Metal Powders" and "Synthesis and Characterization of Porous Silica and Aluminosilicate Gels." He also gave an invited talk on "Porous Molted Ceramics" at the German Aerospace Research Establishment in Koln, Germany.

Budugur Lakshminarayana, Evan Pugh professor of aerospace engineering and director of the Center for Gas Turbine and Power, received the 1996 American Society of Mechanical Engineers

(ASME) Fluids Engineering Award "for major contributions in the area of fluid machinery engineering."

"Spike Heels," a play directed by **Cary Libkin**, associate professor of theatre arts in the School of Theatre Arts, was voted best comedy this year in the Austin Critics' Awards.

Philip Mosley, associate professor of English, communications and comparative literature at the Penn State Worthington Scranton Campus, presented a paper on "Hainaut Surrealism and the Construction of Wallon Identity" at the International Society for the Study of European Ideas conference in Utrecht, Holland.

Jogender Singh, senior research associate with the Applied Research Laboratory and an associate professor of engineering science and mechanics, has been named a Fellow of the Institute of Metals, London. Singh was selected in recognition of his distinguished contribution in the field of laser materials processing.

Singh has actively worked in the area of laser processing and materials for more than 10 years.

Change

continued from page 1

Duderstadt said that while tenure may no longer be desirable in all areas, there is still a strong need for it in the core academic disciplines.

"I think that the freedom of inquiry, the academic freedom — which is the real intent of tenure — will continue to be valuable," he said. "However, many of our professional schools would just as soon be relieved of the apparatus that goes along with tenure, particularly those that require the use of practitioners," he said. "I think we'll see (an end to tenure) first in our medical schools. I think we'll also see it in the visual and performing arts."

Roe Hiebert, director of public affairs for the National Association of State Universities and Land Grant Colleges, agrees.

"Dr. Duderstadt assessed the problem very accurately because questions are coming up more and more about the validity of tenure. Universities are beginning to look at tenure in new and different ways that they didn't see 20 years ago," Hiebert said.

Teaching methods also are being re-examined. Duderstadt envisions faculty of the 21st century as learning consultants or coaches.

"Today we're faced with the great challenge of educating the digital age, the plug-and-play generation," Duderstadt said. "This generation is unaccustomed, and unwilling, to learn sequentially — to read the manual. They like to plunge in and learn through participation and experimentation. Our challenge is to reinvent our model to adapt to them."

Hiebert sees demographics as inspiring change. "There is not a traditional student population anymore," she said. "Student ages range from 18 to 80. Students can be full time or part time, live close to their campus or hundreds of miles away. It's beginning to shake the traditional public university environment and make us look carefully about how we should educate lifelong learners."

The University of Michigan has begun the journey into this brave, new world by opening a multi-media center. The center, a merger of the schools of art, music, architecture and engineering, through information technology, includes 1,200 computer work stations and virtual reality labs, and is open 24 hours a day, seven days a week.

"It's the university for the 21st century, a place

His perspective

James J. Duderstadt, president emeritus of the University of Michigan, gives the inaugural talk of the newly launched Penn State National Issues Forum to a full house on Oct. 8 at the Nittany Lion Inn. Duderstadt discussed the future of American higher education.

Photo: Greg Grieco

where students come together and through interaction are trying to create what's never existed," Duderstadt said.

The challenge to keep up with change is a difficult one, given recent declines in government funding.

"There has been a shift from the support of institutions like this from public tax support to tuition and user fees," Duderstadt said. "This has undermined a commitment made by this nation for almost a century that those who benefit and those who pay for higher education should be part of the same collective 'we,' that is our broader society."

David Merkwitz, director of public affairs for the American Council on Education, sees an increase in user fees as a means of offsetting the lack of government financial support.

"Today we're faced with the great challenge of educating the digital age, the plug-and-play generation unaccustomed, and unwilling, to learn sequentially — to read the manual. Our challenge is to reinvent our model to adapt to them."

an individual, organization or program; and explain why they feel it ties in with the principle.

Recommendations should be sent to **Grace Hampton** at 216 Wigner Building, University Park, Pa. 16802 by Monday, Dec. 9.

The Forum on Black Affairs will review the entries and recognize some of the individuals at the dinner.

Following is a brief summary of the seven principles taken from

King's writings. They reflect the driving forces behind his actions:

1. **Persistence.** Human progress comes from the persistent work of people.
2. **Selflessness.** Doing for others is the essence of creative altruism.
3. **Love.** Hatred darkens life. Love illuminates it.
4. **Risk.** There is no freedom without sacrifice and risk.
5. **Conviction.** An education without morals is of little value.
6. **Collaboration.** In a multiracial society, no group can make it alone.
7. **Faith.** Faith in God leads to human happiness.

Penn College

continued from page 1

by the Federal Surplus Property Program and allocated by the Pennsylvania Department of General Services, Bureau of Supplies and Surplus Operations.

According to Colin W. Williamson, dean for Penn College's School of Natural Resources Management/Transportation Technology, this particular A-6E was last used by the Navy for systems tests and evaluations and stationed at Patuxent River Naval Air Station in Maryland. The aircraft is capable of flying at approximately 550 knots (600 miles per hour), and up to 45,000 feet. The U.S. Navy's A-6 program has been in operation since 1963. Plans are to retire the A-6E by the end of 1997.

At the college, the A-6E will provide the aviation maintenance program with a unique platform of systems common to large transport aircraft. In addition, Penn College has been given A-6E systems training aids and fully functional simulators. Those include a weapons release system, digital computer system, cockpit simulator and hydraulic simulator.

LECTURES

Free distance ed seminar offered for faculty and staff

The Department of Continuing and Distance Education will sponsor a free daylong seminar, "Breaking the Barriers: Distance Delivery Models and Methods," on Wednesday, Oct. 23, at The Penn State Scanton.

"Breaking the Barriers" will provide a close-up look at some of the innovative delivery models and methods being used to extend Penn State's academic resources to the world.

Timothy D. Wells, associate professor of information technology, Rochester Institute of Technology, is the keynote speaker. His presentation, "The Virtual Professor," will address his distance education model for conducting graduate-level courses using first-class conferencing software and the World Wide Web.

Concurrent session presents

include: **Brian Weiner**, associate professor of physics; **Bill Rose**, instructional designer, Department of Distance Education; **John Ousey**, associate professor of environmental science, Penn State Delaware County Campus; **Beth Egan**, instructor in dietetics; **Fran Osseo-Asare**, instructional publications designer; **John Coyle**, professor of business logistics; **Bridget Behe**, associate professor of horticulture, Auburn University; **Anita Colyer**, program coordinator, Department of Distance Education; **Alan Stuart**, associate professor of acoustics; and **Ann Taylor**, instructional designer, Department of Distance Education.

This event is free to Penn State faculty and staff, but space is limited and preregistration is required. To register, call (800) 778-8632.

Executives, scholars to ponder management initiatives

Business executives and scholars will gather at the University Park Campus Oct. 21-22 to begin the quest for greater relevance in management research. Fifty select participants from leading business schools and corporations are expected to attend to explore the question, "Beyond TQM: What's Next for Business and Academia?" The session, to be held at The Penn State Scanton, is co-sponsored by The Smeal College of Business Administration, the college's Institute for the Study of Organizational Effectiveness, and the IBM Total Quality Grant.

The small-group format, including both executives and academicians, will provide an unusual opportunity for high-level interaction, according to conference organizers.

MIT's Thomas L. Magnanti, the George Eastman professor of management science and professor of electrical engineering and computer science, will deliver a keynote address on "The Role of Business Research for the Future." **Stephen B. Schwartz**, retired senior vice president at IBM Corp., will speak on "What's Next? The Foundation." **Joseph Fine**, president of Strategic Horizons, will discuss "Beyond TQM: Mass Customization Beyond the Service Economy;" and **David Feight**, vice president and director of business development, Armstrong World Industries, and **Daniel Chisholm**, plant manager, Delphi Saginaw-Delphi Automotive Systems, will address "Creating the Future: The Impact for Business and Academia."

Authors to read from their works

Poet **Paul Zimmer**, editor at the University of Iowa Press, will read his poems at 7:30 p.m. Thursday, Oct. 24, in 112 Walker Building on the University Park Campus. Zimmer's new book, *Crossing to Sunlight*, was published by the University of Georgia Press.

Nonfiction writer and naturalist **David Quammen**, author of the best-selling *Song of the Dodo*, will read from his work at 7:30 p.m. Wednesday, Nov. 13, in 112 Walker Building. Novelist and short story writer **Rita Ciresi** will read from her new novel, *Blue Ital-*

ian, published this fall by The Ecco Press. The reading will take place at 7:30 p.m. Monday, Nov. 18, in the HUB Gallery Lounge. Ciresi is a 1986 graduate of the Penn State MFA program. She won the Flannery O'Connor Prize for her collection of stories, *Mother Rock*.

The series is sponsored by the Department of English, the Institute for the Arts and Humanistic Studies, the Research and Graduate Studies Office of the College of the Liberal Arts and the Mary Rolling Fund.

Scanton conference to look at gender equity

Adults who devote time to teaching and leading girls can learn new ways to nurture the girl-adult partnership by attending "Gender Equity: Inclusive Perspectives," to be held Nov. 9 at The Penn State Scanton.

Research indicates that girls and women are treated differently than boys and men. They are called on less frequently and are praised for their appearance, rather than for the quality of their work. Even an all-girl environment or the presence of a female role model does not always ensure gender equity.

At the Gender Equity conference, participants can become more aware of gender-biased behavior and communication traps. The keynote address, "Empowering Ourselves and Others," will be given by **Sabrina Chapman**, director, Penn State Center for Women Studies.

Conference participants will be able to choose from among several sessions

on topics such as gender issues in the classroom, the media, self-esteem and cross-cultural interactions. These sessions will be followed by gender equity model training overview sessions, which will offer practical techniques and a call-to-action wrap-up activity. This conference is a continuing and distance education service of the College of Education in cooperation with the Hemlock Girl Scout Council and the State College branch of the American Association of University Women (AAUW).

For more information about program content, please contact **Chris Schultz**, conference planner, by phone: (814) 863-5130; or e-mail: ConferenceInfo@cde.psu.edu. The deadline to register for the conference is Oct. 18. For registration information, call (800) 778-8632 or visit the Web site at: <http://www.cde.psu.edu/C&I/GenderEquity/>

Lecture series to focus on coal

The seventh annual Peter H. Given Lectureship in Coal Science will be given by **Donald F. McMillen**, senior staff scientist at SRI International Inc. He will visit the Department of Materials Science and Engineering on the University Park Campus on Nov. 4-8.

During his visit McMillen will present a series of three lectures, which include:

- "Comparing H-Transfer in Coal Liquefaction, Heavy-Oil Upgrading and Polymer Degradation as a Basis for Improving Coal Processing Operations" at 10 a.m. on Nov. 5;
- "Field Ionization Mass Spectrometry of Coals and Coal Pyrolysis and Liquefaction Products" at 1 p.m. on Nov. 6; and
- "Retrograde Reactions of Oxygen Functions in Coal Structures" at 10 a.m. on Nov. 7.

All lectures will take place in Room

C-213 in the Coal Utilization Laboratory on Bigler Road. The public is invited. Morning seminars will be preceded by refreshments at 9:45 a.m.

McMillen has spent his career with SRI International, where he has worked to improve the understanding of coal liquefaction and pyrolysis as well as heavy oil upgrading. He also has worked on the mechanisms of thermal-induced and stress-induced decomposition of explosives and propellants. For his contributions to the chemistry of fossil fuels he was honored with the H.H. Storch Award of the American Chemical Society.

This lecture series honors the memory of **Peter H. Given**, a Penn State faculty member from 1961 to 1985, whose research into the geochemistry, molecular structure and organic reactions of coal gained international recognition.

Thomas Hardy is subject of Oct. 24 talk

Michael Millgate, professor of English at the University of Toronto and the biographer of Thomas Hardy, will speak on the topic of "Thomas Hardy's Max Gate Library: An Exercise in Reconstruction" at 8 p.m. Thursday, Oct. 24, in 101 Kern Building on the University Park Campus. The lecture is sponsored by the Dorothy Foehr Hueb Club for Special Collections in the University Libraries.

Millgate is the author of more than a dozen works on Thomas Hardy and William Faulkner. Most recently, he edited *The Letters of Emma and Florence Hardy* (Hardy's two wives) for the Oxford University Press. Among many volumes on Hardy, he has also

co-edited *The Collected Letters in five volumes* (Oxford, 1978-1988) and written a critical biography, *Thomas Hardy, His Career as a Novelist* (Random House, 1971).

The lecture will in part honor the gift of a photographic essay on the settings of the seven major Hardy novels by the late Leslie Greenhill, director emerita of instructional services at Penn State and a distinguished photographer. Greenhill had been a long-time correspondent and friend of Millgate. The 75 photographs that make up the album are now part of the photo archives of the Rare Books Room, Pattee Library.

More Lectures

Pompeian art topic of Oct. 21 talk

The ancient Roman city of Pompeii is famous for its sad fate when Mount Vesuvius erupted in the second century, and for the elegance of the wall paintings and architecture which have been uncovered by archaeologists.

J. Clayton Fant, who teaches classics and history at the University of Akron, Ohio, will discuss "The Dialogue of Fresco and Stone in Pompeian Wall Painting" at 8 p.m. Monday, Oct. 21, in 101 Kern Building on the University Park Campus. Fant received his Ph.D. from the University of Michigan. He has participated in excavations at Ostia and Pompeii in Italy as well as at numerous sites in Turkey and has published many articles on ancient Roman marble.

The talk, which is free to the public, is sponsored by the Central Pennsylvania Society of the Archaeological Institute of America along with Penn State's Institute for the Arts and Humanistic Studies, the College of the Liberal Arts and the Department of Art History.

Brown-bag seminar Oct. 23

The Center For Russian and East European Languages presents a brown-bag luncheon seminar at noon Wednesday, Oct. 23, in 124 Sparks Building on the University Park Campus. George Enteen, professor emeritus of history, will speak on "Impressions of Russia: An Update." The seminar is free to the public.

Upcoming seminars include:

Nov. 7: Irene Hurd, "Doing Business in Russia: A Woman's Perspective"
Nov. 20: Bogdan Stefanescu, "The Irony Behind Romania's Identity: Metaphors of Insecurity in a Besieged Culture."

Bell curve examined Oct. 23

After becoming a *New York Times* bestseller, *The Bell Curve* drew a great deal of international attention. A Penn State Harrisburg Eastgate Center presentation at noon, Wednesday, Oct. 23, will examine the publication and its implications.

The featured presenters, Joe Kincheloe and Shirley Steinberg, editors of *Morality Lines - The Bell Curve Examined*, will reveal allegedly inaccurate and skewed data of the book, "uncovering an angry racist and classist message." The presenters will discuss the implications of the message and what accounts for its positive reception.

The presentation is free to the public, but registration is necessary to ensure adequate seating. For information or registration, call (717) 722-3590. The Penn State Harrisburg Eastgate Center is located at 1010 N. Seventh St. in Harrisburg.

Artist to discuss his work Oct. 29

California artist Roland Reiss, director of the Claremont Graduate School Art Program, will visit Penn State Oct. 26-29 as a guest of the School of Visual Arts.

Reiss will present a public lecture on his work at 3 p.m. Tuesday, Oct. 29, in the Palmer Lipson Auditorium of the Palmer Museum of Art. He will meet with groups of faculty and students for critiques, and will discuss 20th-century art and culture on the evening of Monday, Oct. 28, with students.

Reiss has exhibited his work at hundreds of venues across the United States and internationally. He is the recipient of four National Endowment for the Arts grants and more than 40 prizes and awards.

Reiss' appeal will be to sculptors, installation artists and painters, as well as to architects and theatre set designers, particularly because of his "morality plays" (works from the '80s and '90s).

For more information call Micaela Amato, area head painting and drawing in the School of Visual Arts, at (814) 865-0444.

Data Center to hold noon lectures

For the first time, the Capitol Office of the State Data Center is hosting two noon lectures at the Penn State Lancaster Center.

On Oct. 31, Robert Garraty, senior project associate in the Penn State Harrisburg Institute of State and Regional Affairs and the former director of the Pennsylvania Millie Council, will address "Network Models of Labor-Management Cooperation."

In his presentation, Garraty will review past and present efforts to bring some of the innovative programs unions have initiated to assist their companies in the competitive marketplace.

The second Lancaster Center presentation on Nov. 21 will feature Robert Bresler, Penn State Harrisburg professor of public policy, examining the current debate on affirmative action and its probable impact on policy.

Both presentations are free to the public. For reservations or information, contact the State Data Center at Penn State Harrisburg, (717) 948-6464.

Obituaries

Professor emeritus, 81 has retired in 1977

Leslie P. Greenhill, professor emeritus of education and director emeritus of Instructional Services, died Sept. 11 at Centre Community Hospital. He was 81.

Greenhill, who served the University in various capacities since 1948, retired from Penn State in 1977. From 1948 to 1954, Greenhill was a visiting Fellow, research coordinator and assistant director of the Instructional Film Research Program. He went on to serve as associate director of the program (1955-58), which was renamed the Division of Instructional Services. Named director in 1963, Greenhill oversaw examination services, instructional television services, motion picture, graphics and still photography services, and instructional research and course development services. Just two years later, Greenhill was appointed assistant to the president for academic affairs.

In 1967, he went on to serve as assistant vice president for resident instruction and director, and, in 1970, was named assistant vice president for academic services while still retaining the title of director of Instructional Services (1970-77).

Greenhill had served as a consultant to a wide range of organizations including the National Council of Churches, the U.S. Office of Education on New Media Programs and the National Academy of Engineering's Commission on Engineering Education. During his lifetime, he wrote 125 publications dealing with applications of sound motion pictures and television and other instructional methods and media to higher education. Greenhill also held office in numerous professional organizations and societies.

Memorial contributions may be made to the Leslie P. Greenhill Photography Award Fund, Penn State College of Arts and Architecture, 114 Arts Building, University Park, Pa. 16802.

Former Ordinance Research Laboratory employee, dies

Jerome "Jack" Kapitano, a retired employee from the former Ordinance Research Laboratory, (now the Applied Research Lab on the University Park Campus), died Aug. 28 at his residence in State College. Kapitano was a member of Phi Mu Alpha Sinfonia, a professional music fraternity, and Phi Delta Kappa, an educational honorary society. He was a past president of The University Club, from which he retired in January 1996 as a board member emeritus. In addition to his work for the University, Kapitano also was employed at the Naval Torpedo Station in Newport, R.I., and HRB-Singer Inc. of State College. He was director of vocational training at the State Correctional Institution at Rockview.

Memorial contributions may be made to a scholarship which will benefit students in engineering, education and music: The Jerome J. Kapitano Memorial Scholarship, The Pennsylvania State University, 7 Old Main, University Park, Pa. 16802.

Other deaths

Stuart H. Chamberlain, assistant professor of mechanical engineering in the College of Engineering, from Oct. 15, 1945, until his retirement July 1, 1972; died Sept. 18 at the age of 90.

William E. Dreibeis, former employee of the Department of Agronomy in the College of Agricultural Sciences, died Sept. 23 at the age of 94.

Dreibeis, who retired from Penn State in 1978, was a member of the Washington Grade 157 in Pine Hall, the Pennsylvania State Grade and the National Grade.

William F. Fatula, assistant director in the Physical and Engineering Plant, Office of Physical Plant, from March 5, 1962, until his retirement March 1, 1988; died Aug. 26 at the age of 72.

Alice Bailly Keener, a secretary at Penn State for 20 years before retiring in 1981, died Sept. 22. She was 79.

Charity R. Kelley, 84, of State College died Sept. 15. Before retiring in 1974, Kelley served as a registration manager in the Department of Adult Education for 15 years. She is survived by a son, a stepdaughter, 13 grandchildren and 13 great-grandchildren.

John Lawther, who led the Penn State men's basketball team to its first NCAA Tournament berth, died recently at his home in Southern Pines, N.C. He was 97.

Lawther was head coach of the Nittany Lions from 1937-49, compiling a career record of 150-93 over 13 seasons. Following his coaching days, Lawther remained on the faculty as associate dean of physical education before retiring in 1965. A native of Selenia, Ohio, Lawther had his most successful season in 1941-42 when he led the Lions into the NCAA Tournament with a 17-2 record that included a string of 12 consecutive victories to close the season.

William K. Osman Jr., payroll supervisor in Accounting Operations, from Nov. 1, 1940, until his retirement March 1, 1965; died Sept. 4 at the age of 84.

Hermance Reese, assistant professor of physical education for women from July 1, 1947, until her retirement July 1, 1966; died Sept. 4. She was 96.

Mary Ann Richards, a retired employee of Penn State, died Sept. 16 at the age of 85.

John J. Schoch, janitorial worker in the Office of Physical Plant, from May 17, 1982, until his retirement Jan. 8, 1994; died Sept. 22. He was 62.

Thelma J. Winand, administrative assistant II in the College of Health and Human Development, from Sept. 1, 1978, until her retirement Dec. 31, 1994; died Sept. 1. She was 68.

Kathleen P. Zaph, senior medical technologist in Student Services, from July 1, 1981, until her retirement April 1, 1992; died Sept. 18. She was 70.

CQI

CONTINUOUS
QUALITY
IMPROVEMENT

Improving academic processes

Today, eight Penn State campuses will connect to University Park via interactive compressed video (PicTel) to take part in a panel discussion about improving academic processes through CQI. Faculty and staff from Altoona, Behrend, Delaware County, Harrisburg, Hazleton, McKeesport, Wilkes-Barre and Worthington Scranton will present their questions to panelists who will explore specific Penn State examples of where CQI is being used to improve classroom processes. Panelists include faculty members Bill Engelbret, Linda Null and Fred Eisele.

A call for papers

Public Productivity & Management Review, a refereed journal co-sponsored by the American Society for Public Administration and the National Center for Public Productivity, Rutgers University, invites manuscripts pertaining to the use of performance models in academe.

Examples of these models include: continuous quality improvement, managing for results, performance-based management and strategic planning and budgeting. Such models envision the linkage of organizational mission to measurable goals and the evaluation of performance by explicit means of assessment.

If you would like to receive a copy of the call for papers, please call the center at (814) 863-8721.

Facilitator fundamentals

The *Facilitator's Guide to Participatory Decision-Making* by Sam Kaner, a new publication that focuses on the dynamics of group decision-making, tools for building sustainable agreements and the role of the facilitator, may be borrowed from the Center for Quality and Planning, 303 Old Main.

For more information about Continuous Quality Improvement, please contact Louise Sandmeyer, executive director of the Center for Quality and Planning, at les1@psu.edu.

Setting the table

Jamie Olweiler, left, and Kevin McGehee, seniors in hotel restaurant industry management, measure for correct placement of silverware at Cafe Laura on the University Park Campus. Their HRIM 430 advanced restaurant management class was preparing the cafe for "A Touch of Italy Night." The students offer fine dining at Cafe Laura every Wednesday and Thursday. Reservations can be made by calling (814) 863-8990. The class also offers lunch at the restaurant from 11:30 a.m. to 1:30 p.m. Monday through Friday.

Photo: Kristie Guldner

University Park kicks off United Way campaign

The University Park United Way Campaign will officially get under way on Friday, Oct. 25.

Some 300 Penn State volunteers, as well as members of the Centre County United Way Board of Directors, are expected to attend the campaign kickoff, scheduled for 4 p.m. at the Nittany Lion Inn on the University Park Campus.

The goal for this year's campaign and the leadership gifts received will be announced. Speakers will include President Graham B. Spanier and Tim Curley, athletic director and chairman

of this year's University Park campaign.

"One of the perceptions we found in our visits to academic deans and other administrators is that United Way services are aimed principally at the immediate State College area," Curley said.

"Actually, 64 percent of the services provided by the agencies last year were outside State College. The United Way affects a wide area of Centre County. We have many employees who live outside of State College who have been served by United Way agencies."

Curley said another major goal of this year's campaign is to increase the Penn State employee participation rate.

Last year, we had about a 32 percent participation rate. We are working hard on achieving a 40 percent participation rate among all employees."

Also at the kickoff, the video produced for the Centre County United Way will be debuted. The video was written and produced by Chuck Ungar, senior producer-director at WPSX-TV.

Harrisburg board of advisers adds eight

Four Penn State Harrisburg graduates are among the eight community leaders who have joined the Capital College's Board of Advisers.

Elected to the Board are: Hasu Shah, Frederick G. Merkel, Henry Line, Daniel L. Kovlak, James Knubel, Louis Farina, Ronald J. Drnevich and Carol Forker Gibbons. Shah, president and CEO of Hersha Enterprises Ltd. in New Cumberland, holds a master's degree in public administration from Penn State Harrisburg and a bachelor's degree in chemical engineering from Tennessee Technological University. He owns and operates several personal care homes, apartments, offices and hotels. Merkel, president of HealthAmer-

ica of Central Pa. Inc., also holds a master's in public administration from Penn State Harrisburg.

Line, vice president for Global Product Standards at AMP Inc. in Harrisburg, earned three master's degrees, including a master's in administration from Penn State Harrisburg.

Knubel, managing partner with KPMG Peat Marwick LLP in Harrisburg, graduated magna cum laude with a bachelor's science degree from University of New Haven and later earned a master's in finance from University of Bridgeport.

Knubel, vice president and director at TMI, CPU Nuclear Corp. in Middletown, earned a master's in

business management from Fairleigh Dickinson University.

Farina, a judge in the Lancaster County Court of Common Pleas, graduated from Penn State and the Dickinson School of Law with honors.

Drnevich, president of Gannett Fleming Inc. in Harrisburg, graduated from University of Notre Dame with a bachelor's degree in civil engineering.

Gibbons, a 1979 graduate of Penn State Harrisburg with a bachelor's degree in humanities, is the former director of community relations at the Museum of Scientific Discovery in Harrisburg. She serves the YWCA of Greater Harrisburg as co-chair of its capital campaign.

Faculty/Staff Survey

A follow-up

Penn State moves to address the issues

Throughout the University community, Penn State administrators, faculty and staff have begun to address the issues raised in last winter's survey. The survey drew responses from about 47 percent of the University's full-time faculty and staff at all locations, except The Hershey Medical Center, which did not participate in the survey.

Among the issues highlighted by the responses was the need for mutual respect and better communication and teamwork. This insert, prepared by the Office of Human Resources, describes a few of the improvement initiatives currently being developed in these areas.

"In most areas of the University, the survey results are being used to identify opportunities for improvements. These improvement initiatives are being integrated into the strategic plans being drafted in each area. As the planning process unfolds, faculty and staff need to have the opportunity to react to relevant parts of the plan for their area to ensure that follow-up actions meaningfully address the issues identified in the survey."

BILLIE S. WILLITS, assistant vice president for human resources

A report from Susan Welch, CQI council chair ...

The Continuous Quality Improvement Council is determined that the results of the Faculty/Staff Survey will yield some concrete actions." Council Chair Susan Welch told Penn State's trustees at their September meeting.

"The CQI Council planning team wanted a survey," she explains, "that would produce meaningful information to identify opportunities for improvements in work processes."

One of the findings that Welch communicated to the trustees was that "a minority of our faculty and staff report inadequate communication or lack of respect in their own units ... between faculty and staff, between administrators and faculty, and between administrators and staff." She continued, "I can report that on this dimension we have some comparative data from a national survey of university faculty reported in September 1995 in the *Chroni-*

cle of Higher Education. Two items were used both there and in our own study. These data show that our faculty, compared to faculty around the nation, are much more likely to feel that they are informed about what is going on (60 percent of our faculty think so compared to only slightly over 40 percent nationwide) and are much more likely to say that relations between faculty and administrators are good."

"While this is an encouraging benchmark, again we cannot be satisfied that about one-third of our faculty and staff report either poor communication or lack of respect within their units."

Citing another illustration of the need to improve communication, Welch said, "Even though, for the most part, faculty, staff and administrators value the same things, there is a significant discrepancy between what our faculty and staff value and what

they think administrators value. Almost all of our faculty and staff say, for example, that they value the quality of individual job performance; 100 percent of administrators say they value it, too. Yet only about 70 percent of faculty and staff think deans and directors value the quality of job performance, and only 50 percent think that top administrators do."

Looking at the data for her own college, Welch found that while the level of job satisfaction for staff exempt personnel was above the University average, many in the staff non-exempt category were less satisfied about respect, communication and teamwork.

"We're studying differences in the treatment of these two groups," she said, "and will hold open forums as part of our effort to reinforce the underlying concept that all of us in liberal arts need to work together."

Eberly College staff to hold autumn retreat

After studying responses to the values survey and their relevance to his own faculty and staff, Eberly College of Science Dean **Gregory L. Geoffroy** has decided on a two-pronged approach to address the issues that were raised.

"We are holding a fall retreat which will bring together all the members of the Dean's Office complex to discuss the major findings of the survey," he said. "Then we will set up breakout groups with the charge of developing strategies to improve areas of deficiencies."

Geoffroy's other approach involves encouraging department heads to address problems of respect, communication and teamwork in their units. Toward this end, he has initiated discussions during regularly scheduled executive committee meetings and has also met separately with each department head.

"Any action plans we develop from this process will be incorporated into our strategic planning," he noted.

Geoffroy believes that effective, regular communication between department heads and their faculty and staff is essential.

"It's no secret," he said, "that staff often feel like second-class citizens. So many parts of the University's operations revolve around the faculty, because they are at the heart of the teaching and research missions. But the staff support that mission, and sometimes faculty do not treat them as full partners."

"For a college or the University to work at maximum efficiency, faculty and staff should work together as a team. I don't see these problems as unique to Penn State, but that's no reason why we shouldn't be trying to solve them here."

Action taken to improve at Penn State Erie, The Behrend College

As the leadership of Penn State-Erie dug into the survey results for their campus, it was the area of communication that caught their attention. "As both an academic college and a full-service campus, we had always thought we did a pretty good job of communicating with the 400 members of our staff. Now, however, we know we can do even better," said **John M. Lilley**, provost and dean.

"For example, I've always made a point of getting out and speaking to the various elements that make up our Behrend College community, but I didn't really do this systematically. That's been changed. We'll hold regular meetings where all of our faculty and support staff will have an opportunity to ask questions and discuss issues with me."

Behrend administrators were also concerned to discover how many members of the support staff did not understand the College's three-fold mission of teaching, research and service.

"That identification is automatic for faculty and administrators," Lilley points out, "but it's our job to help everyone see themselves as an integral part of this mission."

"It's a support staff who, in their dealings with students, set much of the tone of the campus," Lilley said. "They provide a context for what we're doing. If they are not respected and made to feel that their contribution is important, we won't be able to benefit from their wisdom to the extent that we should."

"Changing people's attitudes is a challenge, but it's one about which I'm vitally concerned. All of us need to believe that what we do matters. If we don't, we will never be happy in our jobs."

"When we do the survey again, as we plan to do, I'm hopeful that we will find a definite change for the better in people's attitudes toward each other. It won't be easy to bring about this kind of change in a time of fiscal constraints, but when you're asking people to do more with less, they have to feel valued and respected and part of the team."

LOUISE E. SANDMEYER, executive director,
Center for Quality and Planning

Departments use own approaches

Eberly College department heads have chosen different approaches to bring about improvements in respect, communication and teamwork within their units.

Because most of the respondents in astronomy and astrophysics were staff members, department head **Peter L. Mezaros** set up a half-day retreat, including a lunch, for laboratory technicians and department staff. Basic problems of communication became evident as complaints surfaced that supervisors were not making their expectations clear or allowing sufficient feedback," Mezaros said.

As a follow-up, he compiled a list of suggestions for supervisors, who then met with their staff to develop solutions.

"I think the atmosphere in the department is noticeably brighter now," he reports.

Howard Grotch, head of the Department of Physics, held a retreat in his home for his entire department staff, including office, instructional support and electronics staff, the technical staff supervisor and members of the department's faculty advisory committee.

"The purpose was to discuss the survey and to let them know that we were being asked to submit a strategic plan that could possibly involve them," he said. "I asked for their views on planning and let them know that their opinions were valued."

"The meeting was very beneficial," staff assistant **Sally Roberts** said. "When we explained, for example, that keeping the office open over the noon hour meant that those of us who were on break could no longer eat at our desks without interruptions, we were assigned a 1:30 p.m. for our exclusive use."

Private interviews with everyone on his faculty and staff are being conducted by **George E. Andrews**, mathematics department head and Evan Pugh professor of mathematics. Andrews believes that as a department head he should be a funnel for communication.

"Miscommunication leads to unfortunate behavior," he points out. "A staff assistant may face a frustrated faculty member, who, in reality, is basically frustrated with the system, and that translates into a lack of respect. I am trying to draw the attention of the faculty to the fact that staff can't overcome the way the system works."

... and from Scott Kretchmar, Faculty Senate chair

The academic atmosphere at Penn State is one of the major themes under consideration this year by the University Faculty Senate, according to Senate Chair **R. Scott Kretchmar**, professor of exercise and sport science.

As part of this study, the Faculty Affairs Committee will review the survey results with an eye to preparing recommendations for Senate action.

"An important issue for faculty attention,"

Kretchmar said, "is the critical role that many of the academic support staff play in promoting the satisfaction of our clients — the students."

"Most students have their first important contacts with the staff of the University during the admission and registration process. The quality of

that contact plays a large role in the satisfaction they experience as they enter the University community."

Kretchmar points out that faculty lack of awareness of the efforts of support staff is probably due to lack of knowledge. In a move to correct this, the Senate's officers recently sent an open letter to faculty underlining the significance of out-of-classroom experiences in student academic success.

"These experiences," Kretchmar notes, "involve everything from using library services to establishing an atmosphere in the residence halls that is conducive to work."

Turning to the subject of teamwork, Kretchmar comments that many faculty have been socialized by

their academic disciplines to reject the concept of teamwork.

"Universities," he continues, "have traditionally had many islands of activities, centered on discipline species and sub-species and sub-sub species, but newer models are beginning to require that faculty and staff leave their enclaves and make contact with one another to help students make necessary interdisciplinary connections."

"I am very concerned that we are seeing an erosion of the academic passion among students not just at Penn State but across the academic spectrum. This is a problem that no one element of the University can solve alone. There has to be teamwork with faculty and staff working in a coordinated effort."

Survey validates improved communication as a top priority for those in Business Services

Survey findings revealed that for three items — communication between administration and staff, respect between administration and staff, and respect between faculty and staff — satisfaction among respondents in University Park support areas was substantially lower than among those in academic areas or at other Penn State locations.

"The survey validated for me the issues requiring priority consideration," says

Betty J. Roberts, assistant vice president for Business Services. "When I came to Penn State I took my own survey to identify factors inhibiting quality in our organization, and I found that lack of communication was a major issue."

"We will have a retreat this fall which will include discussions of the University survey findings and will seek ways to incorporate into our strategic planning the opportunities for change it presents."

Business Services already has teams of staff and technical service personnel working on ways to improve internal communication.

"As a very diverse organization," Roberts explains, "we must assure that our units understand each other's missions. One way to do this is by putting together small teams to work on specific assignments. For example, a group in Fleet Operations is looking at ways to improve communication between members of the staff as well as between management and staff."

"Business Services is making available opportunities for education and communication," according to **Ann Harpster**, a Copy Center operator. "However, although changes are coming rapidly, many technical service employees find it especially discouraging when their ideas are not received with the same enthusiasm as management expects when its own ideas are put forward."

One of Roberts' important ongoing activities is a monthly "Brown Bag It with Betty" lunch for her entire organization. She may use the occasion to explain a University-wide organizational change that impacts on Business Services' operations, or she may invite a representative from central administra-

Faculty and staff perceptions of communication between administration and staff vary substantially across positions.

tion to speak informally to the group. Visitors have included President **Graham B. Spanier**, Senior Vice President for Finance and Business/Treasurer **Gary Schultz** and Coach **Joe Paterno**.

Business Services employees were asked for input on topics of special interest to them, and their suggestions sparked the establishment of a series of health seminars, also held during the lunch hour.

April Martell, a staff assistant in Finance and Administrative Services, has been at Penn State for nine years.

"I've noticed a positive response to the current emphasis on improving communication, respect and teamwork," she said. "People are beginning to feel that they are valued."

"Right now I'm part of a team that includes both staff and technical service people. We're working together to create an evaluation tool that will be useful in assisting professional development for tech service personnel."

"I do feel strongly," Roberts said, "that when you ask people to serve on a team and do a job over and above their normal workload, they deserve thanks for doing it."

"In Business Services, we present each team member with an award in the form of a certificate of appreciation that can be framed, and staff members who have received them seem to like this approach."

Harrisburg also takes some quick action

"In everything I do and say I try to emphasize that we are here as a team for our students and that we owe them quality service," **John G. Bruhn**, provost/dean at Penn State Harrisburg, said.

"As provost," he said, "I make an annual visit to each of our academic units for an open agenda dialogue. I don't believe in holding meetings in my office — except in cases where personal issues are involved."

Guided by this philosophy, Bruhn was already moving to implement changes at his campus to improve communication, teamwork and respect, and he feels that the values survey has confirmed that decision.

"To me, the central issue is to reduce the problem of 'class-ism' that the survey highlighted throughout the University," he said. "This is an issue mainly between faculty and staff. Penn State-Harrisburg has a student government and a faculty senate, but there has been no organized way for staff to have input."

Among the programs instituted by Bruhn are a quarterly forum open to all members of the staff, and bi-monthly sandwich lunches for small groups of faculty and staff.

"Discussing things together helps people cut across artificial class lines," he said.

Ed Dankamich, head of physical plant at Penn State Harrisburg, agreed.

"The custodial staff is often perceived as low on the totem pole," he said, "and we need to make them feel part of the team. I hold three annual meetings to foster inter-group communication, and by attending the provost's quarterly forums, I give members of the faculty and staff a chance to communicate directly with me about any problems they've experienced with physical plant."

Penn State Harrisburg also offers faculty, students and staff a chance to participate in a "Good Idea Contest." A committee reviews the ideas submitted and a reward is presented quarterly to a contest winner.

"We give a high priority here at Harrisburg to customer service and excellence in our treatment of prospective and current students," Bruhn said. "But all of us must also realize that the ways in which we treat each other are just as important."

Putting it in perspective:

Two members of the faculty offer an overview of the processes

David V. Day, associate professor of psychology, focuses on industrial/organizational psychology, studying such workplace issues as leadership and work attitudes.

While noting that fundamental changes in the culture and climate of an organization can't be made overnight, Day points out that the first step toward change is to acknowledge a need for it.

"In that sense," he said, "the survey has served its purpose. The University community has acknowledged that there are issues of communication and leadership that need to be discussed, and an exchange of ideas on ways to improve them has begun."

One approach to the difficult task of changing the culture of an institution is the Continuous Quality Improvement (CQI) process, according to Day.

"CQI," he continues, "is an attempt to address issues relative to teamwork, respect and communication. But CQI hasn't been in place that long at Penn State, and it's unrealistic to expect that dramatic changes and remedies could occur so quickly. What we might expect, however, is that if there is continued support for CQI and it is more fully integrated into Penn State's culture, in time we should begin to notice improvements."

"Implementation of CQI principles," Day said, "was begun through the efforts of upper level Penn State administrators, and only now is it beginning to move down through the organization. Maybe it hasn't fully permeated the organizational structure to the degree the administration wants it to, but ultimately it will help address the issues raised by the survey."

Day warns, however, that because fundamental change is such a long-term process, it's important that those who implement it remember three things:

- 1) Expect resistance. Don't take resistance personally. Try to work with it.
- 2) Prepare people for change. It can't be done by edict.

INCREASE REWARDS

Faculty and staff in support areas at University Park indicated substantial interest in increasing rewards for respecting all employees

"The CQI movement is an effort to prepare people for change, to say, 'We want you to be a part of it.' I'm particularly encouraged by the fact that Penn State's administration has been so willing to share the survey results and highlight the issues," he said. "The problems aren't that surprising, but, typically, organizations prefer to bury their problems. I think this approach at Penn State reflects the beginning of a more open culture."

Judith A. Kolb teaches applied organizational communication and does research on leadership and teamwork. An assistant professor of speech communication, she worked for many years as a corporate consultant and trainer.

The issues that have come to the fore at Penn State as a result of the Faculty/Staff Survey are com-

mon to most large organizations, according to Kolb, and addressing them successfully involves the development of what she terms a "collaborative climate."

"This is a slow process," she cautions, "and often the first feedback from efforts at change will be less positive than expected. It takes time to produce an open climate with a free flow of communication, trust and respect."

Kolb points to General Electric's efforts in building a collaborative climate as a fairly typical example of what is involved.

GE started out by putting together small groups of employees and giving them a chance to voice their concerns. At the beginning, management found that the topics they wanted to address weren't necessarily those of interest to their employees. Some of the latter group's concerns — for example, the system for assigning parking spaces — seemed trivial to management, but that was where they started. After a time, the interests of the two groups came together, partly as trust developed and staff felt free to share their ideas.

"People need to feel not only that someone is listening to them but also that something is going to happen," Kolb emphasizes. "If they make a suggestion that can't be implemented, they should be given reasons why."

Employees need not always agree, however, with each other or with management, according to Kolb.

"Quaker Oats is an example of a company that actually encourages disagreement," she said. "They've found that creative tension develops when people disagree about ideas and that if opinions are honestly shared, the best ideas emerge. Conflict can be healthy as long as it is about ideas and not about personalities."

Establishing a more collaborative climate can take as long as five to seven years, in Kolb's experience.

"The early steps are very important," she notes. "People have initial meetings and are very enthusiastic. If they share ideas and nothing happens, they begin to feel their trust has been violated and it's hard to win them back. Organizations should start out with realistic, achievable goals, so people can see some results."

"To my mind, the important thing about Penn State's survey was the asking of questions about reward systems. That's a key to the culture of an organization. What is evaluated, what is measured indicates what really matters to the administration."

BREAKOUT OF RESPONDENTS

Technical service and non-exempt staff feel the University should place greater emphasis on respect for all employees. Other groups indicated somewhat less interest in increasing rewards for this value.

McKeesport receives \$413,560

The Penn State McKeesport Campus has received a gift of \$413,560 from **Robert W. Ostermayer Jr.** and his wife, **Elizabeth**, of Wellington, Fla. Robert Ostermayer, a Penn State alum, is an emeritus member of the McKeesport Campus Advisory Board, on which he served from 1975 to 1989.

The Ostermayers did not designate a specific purpose for their gift. This is the second gift to the McKeesport Campus from the Ostermayers. In 1990 they made a bequest of \$481,875, designated for academic program support.

Robert Ostermayer is retired president of the Hercules Jefferson Plant, manufacturer of hydrocarbon resins in West Elizabeth, Pa. The facility was formerly the Pennsylvania Industrial Chemical Corp. (PICCO), which merged with Hercules Inc. of Delaware in 1973. Mr. Ostermayer had served as president of PICCO.

Ostermayer earned a bachelor of science degree in commercial chemistry in 1942. Elizabeth Ostermayer received her R.N. from McKeesport Hospital in 1945. The Ostermayers have two daughters and a son.

Former quarterback ends on position

Former All-America quarterback **Kerry Collins**, now with the NFL Carolina Panthers, contributed \$250,000 to the athletic department to permanently endow the quarterback position.

The gift will completely fund the **Kerry Collins Endowed Scholarship for Quarterbacks**. On an annual basis, a player at the quarterback position will receive the Collins scholarship.

"My years at Penn State were meaningful to me, not only for the impact on my future as an athlete

but also on preparation for a productive life when my football career is over," Collins said. "Penn State always will be very much a part of anything I do and this gift is a demonstration of my respect for the University and its athletic program."

Athletic director **Tim Curley** said the contribution is the first in a new program which permits donors to fully endow a position on the football team, or any other athletic squad, with a \$250,000 gift.

WISE sponsors conference for teen-age girls

The seventh annual **Your Horizons in Science** mathematics and engineering conference will be held on Oct. 26. The conference is for seventh-, eighth- and ninth-grade girls in central Pennsylvania and will be held on the University Park Campus.

The conference, sponsored by **Women in Science and Engineering**, aims to increase interest in

science and mathematics, present information about opportunities in math and science-related careers and provides female role models who are working in technical careers. These goals are approached through both hands-on workshops and panel discussions.

For more information, call (814) 365-3342.

Faculty/Staff Alerts

Holiday schedule

University offices and operations, except for essential services and operations, will close at the normal end-of-business times on Friday, Dec. 20, and will resume at normal starting times on Thursday, Jan. 2.

The official University holidays are Monday, Dec. 23, through Friday, Dec. 27; Monday, Dec. 30; and Wednesday Jan. 1.

Tuesday, Dec. 31 is not a University holiday. Therefore, employees who are off that day will charge vacation or personal holiday. If Tuesday is a normally scheduled workday, any individual who chooses to work will be permitted to do so. In such instance, temperature conditions in the work area may be less than ideal.

This special holiday schedule will not increase the number of holidays granted. It will, however, provide a more desirable and efficient application of the time.

In keeping with this schedule, the Payroll Office will release monthly paychecks on Friday, Dec. 20, but checks will be dated Dec. 31 and will not be negotiable before then. Automatic deposits will not be made early. Biweekly paychecks will be distributed as usual on Friday, Dec. 20, the normally scheduled pay date.

This schedule and payroll information is not applicable to The Hershey Medical Center.

Questions regarding the above holiday information should be directed to the appropriate college or department human resources representative, or director of business services at a facility away from University Park.

CAC Web space now available

The Center for Academic Computing (CAC) has World Wide Web server space available for all Penn State colleges, departments, officially recognized student organizations, faculty, staff and students. An access account is required in order to apply for a CAC Web account.

Individuals can apply by completing an application form at URL: <http://www.psu.edu/webspaces/>

Student groups or organizations can apply for Web space through Interface, the student computer club, at URL: <http://interface.cac.psu.edu/interface/>

Colleges, departments, or other official units should request a paper application form from the Computer Accounts Office, 230 Computer Building, University Park, (814) 865-4772, accounts@psu.edu. A Web-based application form will be available soon at URL: <http://www.psu.edu/webspaces/>

Additional details are available on the Web at URL: <http://www.psu.edu/publish/>

25-year Awards

Sandy Breckenmaker

Frederic M. Leeds

J. Michael McVay

James F. Smith

Betty Meholic

Marion Miles

Hiroshi Ohmoto

Daniel W. Pfaff

Observing 25 years of service at the University are, from left, Sandy Breckenmaker, patient care technician at The Hershey Medical Center; Frederic M. Leeds, director of academic affairs and assistant professor of French at the Penn State Shenango Campus; J. Michael McVay, assistant professor of mathematics, and James F. Smith, professor of English, both at the Penn State Abington-Ogontz Campus; Betty Meholic, nutrition education adviser in Lackawanna County; Marion Miles, nutrition education adviser in Clearfield County; Hiroshi Ohmoto, professor of geochemistry in the College of Earth and Mineral Sciences; and Daniel W. Pfaff, professor of journalism in the College of Communications.

News in Brief

Course offered

Enlightening Lunch — Nursing Home Negotiations

Shopping for a nursing home for a loved one can be a difficult and emotional task. In this brown-bag discussion, explore ways to navigate through the maze of options, levels of care, waiting lists, legal issues and prices of nursing home care. Meets from noon to 1 p.m. Thursday, Oct. 24, in 110 Henderson Bldg. (The Living Center). To register, contact **Jan Hawbaker** at (814) 865-3085 or jqh3@oas.psu.edu.

The ARTS

AT PENN STATE

On display

The exhibition "Cusco: Past and Present of an Ancient Civilization. A Photographic Journey," based on the work of Uruguayan photographer Jose M. Quejeda, will be in the HUB Research Exhibition Area on the University Park Campus Nov. 4 through 18.

Paintings on exhibit in Harrisburg through Nov. 1

Get a taste of Nova Scotia with the work of Elizabeththorn College art professor Lou Schellenberg, the second in a series of artists to exhibit in the Gallery Lounge at Penn State Harrisburg. Her figurative and representational works on canvas and paper are on display through Nov. 1.

Schellenberg earned a master of fine arts degree from the University of Albany in 1990 and a diploma from the School of the Museum of Fine Arts in Boston in 1981.

Her work has been exhibited in galleries throughout the East Coast including: the Boston Center for The Arts, Art Institute of Boston, University Art Museum SUNY, N.Y., and University Gallery, University of Delaware.

Mallet Ensemble to perform for Bach's Lunch

The Penn State Mallet Ensemble, under the direction of Dan C. Armstrong, professor of percussion, will perform its annual fall concert for the

Bach's Lunch concert series on Thursday, Oct. 24, at 12:10 p.m. in the Helen Eakin Eisenhower Chapel on the University Park Campus.

The 20-minute free concert is part of the Bach's Lunch series sponsored by the College of Arts and Architecture School of Music and the University Lutheran Parish.

For the Bach's Lunch concert, the Mallet Ensemble will perform standard classical works transcribed for keyboard percussion instruments including marimba, xylophone, vibraphone and glockenspiel.

Two students will perform individual works. Teri Stephens, a junior in music education, will play a jazz-inspired piece by Harry Bruehr for xylophone and piano, and Michael Hooper, a senior in music performance, will perform "Time for Marimba" by Minoru Miki.

Audience members may bring their own bag lunches to eat after the concert in the Roy and Agnes Wilkinson Lounge. Coffee and tea will be provided.

Latin American Association exhibition

The Penn State Latin American Association presents the exhibition "Cusco: Past and Present of an Ancient Civilization. A Photographic Journey" based on the work of the Uruguayan photographer Jose M. Quejeda. The exhibition, based on the photographer's trip to the former capital of the Inca Empire, displays more than 20 images that depict the different cultural components (ancient traditions, religion and modern lifestyles) that shape the present life of Cusco inhabitants. The exhibition opens on Nov. 4 at the HUB Research Exhibition Area on the University Park Campus and will be displayed until Nov. 18.

Odyssey Through Literature on WPSU

On the next episode of Odyssey Through Literature, English Professor Bruce Weigl reads from and discusses

his 1996 collection of poetry, *Sweet Lorain*, and its origins both in youth and in war.

Weigl explains that he thinks of himself as "essentially formed by a boyhood in a town of workers and immigrants and by a young manhood in the jagged, muddled and bloody war of Vietnam." Weigl's poetry deals with his experiences in both his hometown, Lorain, Ohio, and Vietnam.

Odyssey Through Literature is produced by the Department of Comparative Literature. It airs Sundays at 6:30 p.m. on WFSU, 91.5 FM.

Community Arts Center has full schedule

The following performances are planned as part of the remaining 1996-97 season for the Community Arts Center in Williamsport, part of the Pennsylvania College of Technology:

■ Marie Osmond Holiday Special at 7:30 p.m. Saturday, Dec. 14; tickets are \$40.50/\$32.50/\$25.50/\$22.50

■ "La Bohème," presented by the New York City Opera, Jan. 15 at 7:30 p.m.; tickets are \$35.50/\$25.50/\$18;

■ "Winter Overture," presented by the Williamsport Symphony Orchestra, Jan. 25 at 8 p.m.; tickets are \$35/\$30/\$24/\$19/\$16/\$12;

■ "Kiss of the Spider Woman" on Jan. 28 at 7:30 p.m.; tickets are \$33/\$25.50/\$20.50;

■ "Royal Winnipeg Ballet," presented by Lycoming College, Jan. 31 at 8 p.m.;

■ "Singin' In The Rain" on Feb. 11 at 7:30 p.m.; tickets are \$33/\$25.50/\$20.50;

■ "Tommy" at 7:30 p.m. Wednesday, March 12; tickets are \$33/\$25.50/\$20.50; and

■ "Sesame Street LIVE" at 7 p.m. Friday, April 4; 10:30 a.m., 2 and 5 p.m., Saturday, April 5; ticket prices range from \$9.75 to \$12.75. Tickets do not go on sale until Nov. 29.

Promotions

Staff

Shirley A. Nye, supervisor, Outpatient Scheduling/Registration, at The Hershey Medical Center.

Ronald J. Ondo, project coordinator in Office of Physical Plant.

Jean Palladino, staff assistant VI at the Penn State Delaware County Campus.

Eugene H. Plummer, supervisor, renovators, at The Hershey Medical Center.

Cynthia E. Pollick, director, Imagination Station, in Office of Human Resources.

Karen R. Pothering, staff assistant VII at the Penn State Schuylkill Campus.

Michelle L. Pritz, information systems support associate in Computer and Information Systems, Administrative Systems.

Lisa M. Richtscheit, building services coordinator in Office of Communications.

Mimi C. Ridenour, network specialist/writer-editor in Computer and Information Systems, Academic Computing.

Lori Robinson, staff assistant V at the Penn State Altoona Campus.

Kathleen D. Satele, business/clinical center coordinator at The Hershey Medical Center.

Tina Saylor, staff assistant VI at The Hershey Medical Center.

Thomas W. Schaffer, financial officer IV in Corporate Controller's Office.

Kimberly S. Schindler, staff assistant IV in Housing and Food Services.

Thomas R. Sharer, supervisor, Renovations II, in Office of Physical Plant.

Betty J. Shaw, computer center specialist I in Undergraduate Education, University Learning Resource Centers.

Margaret Skerchock, office information specialist in Housing and Food Services.

Dennis E. Smith, supervisor, Renovations II, in Office of Physical Plant.

Louise Smith, staff assistant VI at Penn State Harrisburg.

Lisa Stamm, staff assistant V in College of Arts and Architecture.

Douglas W. Stanfield, coordinator, information technology, in Office of University Relations.

Paulyna Stecko, assistant supervisor, soil and forage, in College of Agricultural Sciences.

Susan M. Stone, staff assistant VI at The Hershey Medical Center.

Beth Swartz, staff assistant VI at Penn State Harrisburg.

Michael D. Tepsic, supervisor, Renovations II, in Office of Physical Plant.

Kathleen T. Terry, assistant nursing manager at The Hershey Medical Center.

Cassandra M. Thompson, health promotion specialist II in Office of Human Resources.

Marilyn E. Vojtasek, staff assistant VI at the Penn State Berks Campus.

Andrew T. Walls, senior office information specialist in Continuing and Distance Education.

Susan J. Weaver, staff assistant VI at The Hershey Medical Center.

Terry L. Weiler, supervisor, Renovations II, in Office of Physical Plant.

Wendy J. Whitesell, director, Child Care Programs, in Office of Human Resources.

Tina M. Wible, patient account assistant at The Hershey Medical Center.

Carol B. Wilson, senior research technician at The Hershey Medical Center.

Christine L. Yoder, attending nurse at The Hershey Medical Center.

Lawrence E. Zemanek, information systems support consultant in Computer and Information Systems, Administrative Systems.

UNIVERSITY PARK CALENDAR

SPECIAL EVENTS

Friday, October 18

Palmer Museum of Art, 2 p.m., Christoffers Lobby. Glenn Williamson, curator, on "Contemporary Art From the Pincus Collection." For tickets, call (814) 863-0255.

University Resident Theatre Company, 8 p.m., Playhouse Theatre. "A Cry of Players," through Oct. 26. For tickets, call 863-0255.

School of Music, 8 p.m., Recital Hall. Melissa Hart, mezzo-soprano.

Saturday, October 19

Fall foliage hayrides, 4 p.m., Stone Valley Recreation Area. To preregister, call 863-0762.

Fall foliage hikes, 4 p.m., Stone Valley Recreation Area. To preregister, call 863-0762.

Sunday, October 20

Palmer Museum of Art, 1 p.m., Christoffers Lobby. Sarah Andrews, Gallery Talk on "Portraiture in American Art."

School of Music, 8 p.m., Recital Hall. Susan Boardman, soprano.

Thursday, October 24

School of Music, 12:10 p.m.-12:30 p.m., Eisenhower Chapel. Bach's Lunch concert by The Penn State Mallet Ensemble. Center for the Performing Arts, 8 p.m., Eisenhower Auditorium. "New York Voices." For tickets, call 863-0255.

School of Music, 8 p.m., Recital Hall. "The Pennsylvania Quilter"

Thursday, October 25

Palmer Museum of Art, Christoffers Lobby, 2 p.m. Mary F. Linda, Gallery Talk on "The Gods Must Be Hungry."

Center for the Performing Arts, 8 p.m., Eisenhower Auditorium. "London Chamber Orchestra." For tickets, call 863-0255.

Sunday, October 27

School of Music, 3 p.m., Recital Hall. D. Douglas Miller, conductor, presents "Penn State Concert Choir/Chamber Singers."

SEMINARS

Friday, October 18

Physics, 2:30 p.m., SS Osmond Lab. Edward R. Grant on "Shape of the Benzene Cation."

Geography, 3:30 p.m., 206 Walker. Maryann Frazier on "The African Queen Comes to America: The Impact of Imported Honeybees."

Engineering Mechanics, 3:35-5:30 p.m., 214 Hammond. John Scully on "Corrosion."

Philosophy, 4 p.m., 124 Sparks. Barbara Duden and Ivan Illich on "Philosophy of History."

Monday, October 21

Economics, 10:30 a.m., 420 Kern Graduate Building. Steve Koch on "Conflict on Tobacco Road."

Comparative Literature, 12:15-1:20 p.m., 101 Kern. Rosalia Cornejo on "The Lesbian Gays in a Short Story by Spanish Writer Ana Maria Moix."

Agricultural and Biological Engineering, 12:20 p.m., 239 Agricultural Engineering Building. Joel Peterson on "Application of the Soil and Water Assessment Tool (SWAT) on a Pennsylvania Watershed" and Susan Wood on "Temperature Effects on Nitrate Removal in Artificial Wet-

Lecture

Michael Millgate, professor of English at the University of Toronto and biographer of Thomas Hardy, will speak on "Thomas Hardy's Max Gate Library: An Exercise in Reconstruction" at 8 p.m. Oct. 24 in 101 Kern Building on the University Park Campus. His lecture will honor the gift of a photographic essay on the settings of the seven major Hardy novels. The gift includes this and other photos by Leslie Greenhill. For more information, please see the story on page 4.

lands." Gravity Center, 2 p.m., 339 Davey Lab. Carlo Rovelli on "Space Time Form of Loop Quantum Gravity."

Physics, 3:30 p.m., 339 Davey Lab. Jay Maynard on "Resonant Ultrasound Spectroscopy."

Accounting, 3:30-5 p.m., 333 Beam BAB. Zoe-Vonna Palmrose on "Audit Litigation Research: Do the Merits Matter? An Assessment and Direction for Future Research."

Archaeological Institute, 8 p.m., 101 Kern. J. Clayton Fant on "Dialogue of Fresco and Stone in Pompeian Wall Painting." Undergraduate Student Government, 8 p.m., Schwab Auditorium. Ed Koch on "What It Takes to be Elected in America Today."

Tuesday, October 22

Geosciences, 4 p.m., 112 Walker. Robert Deconto.

Nutrition, 4 p.m., 110 Wartik Lab. Craig Baumannrucker on "IGF-System in Mammary Gland Biology."

Biology, Hamish G. Spencer on "Did Eugenia Rest on an Elementary Mistake?"

Wednesday, October 23

Biology, noon, 109 Walker. Hector Flores on "Newt and the Rhino: Reflections on Biological and Scientific Literacy."

Center for Russian and East European

Languages, noon, 124 Sparks. George Enten on "Impressions of Russia: An Update."

Center for Women Studies, 12-1 p.m., 120 Boucke Building. Jill Buchanan, nurse practitioner; Robert Henbach, chief gynecologist; JoAnna Meyer, clinical manager and nurse practitioner; and Carol Myers, nurse practitioner, on "Women's Health Issues in the 90s."

Gerontology, 12-1 p.m., 101 Health and Human Development. East, Margaret Perkinson on "Family Roles in Nursing Homes."

Physics, 1:30 p.m., 339 Davey Lab. Hans J. Hug on "Quantitative Magnetic Force Microscopy on Ferromagnetic and Superconducting Materials."

Engineering Mechanics, 3:35 p.m., 214 Hammond. Albert deRochmond on "Medical Device Accident Investigation: Case Studies."

Thursday, October 24

Ceramics, 11 a.m., 301 Steidle T.B.A. Gravity Center, 11:30 a.m., 339 Davey Lab. Steven Weinstein on "Conceptual Problems in Quantum Gravity."

12-1 p.m., 110 Henderson. Brown-bag discussion on "Nursing Home Negotiations."

To register, call 865-3085. Physics, 3:30 p.m., 101 Osmond Lab.

Humphrey Maris on "Low Temperature Physics and the Detection of Elementary Particles."

Food Science, 4 p.m., 117 Borland Lab. Tawfik Sharaki on "Perspectives on R&D from the Industry Standpoint."

Economics, 4 p.m., 420 Kern. Tian Zeng on "An Examination of Alternative Characterizations of Mean Reversion in Equilibrium Asset Prices and Returns."

7:30 p.m., 112 Walker. Poem reading by Paul Zimmer.

8 p.m., 101 Kern. Michael Millgate on "Thomas Hardy's Max Gate Library: An Exercise in Reconstruction."

Friday, October 25

Physics, 3:30 p.m., 339 Davey Lab. Tom Taylor on "Supersting Dualities in Five and Four Dimensions."

Engineering Mechanics, 3:35 p.m., 204 Sackett. John Scully on "The Transition from Melastable to Stable Fitting: Experiments and Modeling."

Geography, 4 p.m., 206 Walker. Peter Gleick on "Fresh Water in the 21st Century: Problems and Promise."

Monday, October 28

Comparative Literature, 12:15-1:20, 101 Kern. Lisa Reed on "On a Peculiar French Pronoun."

CONFERENCES

Monday, October 21

"Beyond TOM: What's Next for Business and Academia?" at The Penn State Scanticon, through Oct. 22

Wednesday, October 23

"Breaking the Barriers: Distance Delivery Models and Methods" at The Penn State Scanticon sponsored by Department of Continuing and Distance Education. To register, call (800) 778-8632.

Saturday, October 26

"Your Horizons in Science, Mathematics and Engineering" for seventh-, eighth- and ninth-grade girls is sponsored by Women in Science and Engineering. For information, call 365-3342.

Monday, October 28

"Innovations in Engineering Education" at The Penn State Scanticon is sponsored by the College of Engineering, through Oct. 29. For information, call (800) PSU-TODAY.

EXHIBITS

The HUB Working Gallery

Shalom Noiman, through Oct. 20

The HUB Formal Gallery

"Geography of the Unconscious," Nancy Moor, through Oct. 19.

Palmer Museum

"Cooking for the Gods: The Art of Home Ritual in Bengal," through Dec. 8.

"When Cal Was King: Paintings from the Steidle Collection, College of Earth and Mineral Sciences," through Dec. 8.

"Abstraction to Figuration: Selections of Contemporary Art from the Pincus Collection," through Dec. 15.

"The Wood Engravings of Warren Mack," through Jan. 5.

Zoller Gallery

"BFA Exhibition," through Oct. 19.

Reflects an international perspective

Awards

Health and Human Development honors five

The College of Health and Human Development recently presented five faculty members with awards recognizing outstanding research contributions and commitment to advising and teaching.

A. Catharine Ross, professor of nutrition and Dorothy Eicher Huie Chair of Nutrition, received the 1996 Egan C. and Helen C. Pattishall Outstanding Research Achievement Award. **Barbara J. Rolls**, professor of nutrition and Helen Guthrie Chair of Nutrition, received the Pauline Schmitt Russell Distinguished Research Career Award. Both recipients will present a special research lecture in the spring. **Susan J. Loeb**, an instructor in nursing, received this year's Evelyn R. Saubel Faculty Award. **Gordon W. Blood**, professor of communication disorders and head of the Department of Communication Disorders, received the Dorothy Jones Barnes Teaching Award.

Doris "Tiz" M. Griffith, instructor in kinesiology and athletic director at the Penn State Delaware County Campus, was honored with the Commonwealth Educational System Faculty Achievement Award.

The Pattishall Award, given to Ross, honors a faculty member for outstanding research contributions occurring or culminating within the past several years. The award was endowed by **Evan Pattishall**, dean emeritus of the former College of Human Development, and his wife, **Helen Pattishall**, a 1985 graduate in individual and family studies.

Ross is recognized for her investigations dealing with vitamin A (retinoid) and health. In the mid-1980s, Ross began to examine the relationship between vitamin A status and resistance to infection.

Ross joined the faculty two years ago from The Medical College of Pennsylvania. She serves on the Departmental Promotion and Tenure Committee, the Graduate Program in Nutrition Steering Committee and the University Interim Steering Committee on BioSciences.

The Russell Award, presented to Rolls, recognizes a senior faculty member who has made outstanding research contributions across a major portion of his or her career. The award is supported with an endowment from **Leo P. Russell**, 1941 graduate in industrial engineering, in honor of his late wife **Pauline Schmitt Russell**, a 1948 home economics graduate.

Rolls was honored for her extensive contributions to human nutrition, especially related to food and water consumption. These contributions have

produced major advancements in our knowledge of the physiological and psychological controls of eating behavior.

Rolls came to the faculty in 1992 from The Johns Hopkins University School of Medicine. She has written one book, *Thirst*, and has published more than 100 refereed papers and book chapters. She serves on the National Diabetes and Digestive and Kidney Disease Advisory Council and the National Institutes of Health. This year, she will serve as the president of the North American Association for the Study of Obesity.

The Saubel Award, given to Loeb, recognizes faculty members for their service to students, accessibility as an adviser and caring professional style. It was established in honor of **Evelyn Saubel**, a 1935 home economics graduate and longtime assistant to the dean in the former colleges of Home Economics and Human Development.

Loeb is active in the Lion Liaison mentoring program for adult students and Sigma Theta Tau honor society, and regularly adopts unsassigned advisors who seek her out.

The Barnes Teaching award, bestowed on Blood, honors outstanding faculty members for both excellence in teaching and contributions to the art of teaching. The award is supported by an endowment from **Dorothy Jones Barnes**, a 1944 Home economics graduate, and her husband, **William T. Barnes**.

Blood was recognized for his efforts to improve the curriculum and practicum experiences offered so that students received what he calls "the best education in research and clinical information in the country."

Blood has a history of excellence in teaching. He received the 1982 Lilly Endowment Excellence in Teaching Fellowship to examine student stressors in the classroom.

The CES Faculty Achievement Award honors

A. Catharine Ross

Barbara J. Rolls

Susan J. Loeb

Gordon W. Blood

Doris "Tiz" M. Griffith

those who make unique contributions to both the college and the campus community. The award recognizes excellence in teaching, advising and service.

Since joining the faculty in 1981, Griffith has provided exemplary teaching and coaching for students and the community. She is noted as "single-handedly" building the campus's extensive intramural program and counseling students with academic and career decisions. In addition, she volunteers her time as tennis director of the county's senior citizen games.

Griffith is a former member of the U.S. Field Hockey Team and has been honored with elections into the Temple University and Pennsylvania Sports Halls of Fame. Twice she has been named Commonwealth Campus Athletic Conference Tennis Coach of the Year (1990, 1995).

American logistics society cites Smeal department chair

John C. Spychalski, chair of The Smeal College of Business Administration Department of Business Logistics, has been recognized as the "Outstanding Transportation/Logistics Executive in North America," by the American Society of Transportation and Logistics in Orlando, Fla. The award, based on seven criteria, recognized Spychalski for his contributions and innovations in the field of business logistics and transportation. In honoring him, the society cited Spychalski for his professional knowledge and career achievements, as well as his impact as a role model for ethical and professional conduct.

Spychalski has been chair of the logistics department since 1982. Under his leadership, the program has grown from fewer than 100 students to more than 500 at both the undergraduate and graduate levels. The department is recognized as one of the top transportation

and logistics departments in the nation.

In addition to his duties within the college, Spychalski has been a leader for numerous community and professional organizations. He is the author of numerous journal articles, proceedings papers and reviews on transportation policy and management issues. Spychalski holds a B.S. degree from St. Joseph's College, and M.B.A. and D.B.A. degrees from Indiana University.

John C. Spychalski

Fayette Campus acknowledges pursuit of excellence by four

Four Penn State Fayette Campus employees were recently honored for their pursuit of excellence in their respective positions on campus.

Gerardine Dorobish, acting head librarian, received the Public Service Excellence Award; **Josua Marvit**, biology instructor who moved to the Fayette Campus from the Penn State McKeesport Campus in 1991, was honored with the Teaching Excellence Award; **Evelyn B. Pluhar**, professor of philosophy, received the Scholarly Excellence Award; and **Barbara B. Solesky**, library assistant, was given the Support Service Excellence Award.

Research

Most single dad's don't fit TV stereotype

By PAUL A. BLAUM
Public Information

Contrary to television images from the 1960s and 1970s, the profile of the average single dad is not that of the divorced or widowed man raising his children alone.

"Only a quarter of the children are being brought up by single fathers who fit this stereotype," Daniel J. Eggebeen, associate professor of human development and family studies, said. "In reality, most children being raised by single dads live in households that contain an adult other than their father."

"With single-father families, the most common form of household arrangement is for children to live with their father's cohabiting partner," Eggebeen said. "This involves more than a third of all children in families being raised by the father alone. Of these children, about half are offspring of divorced fathers and half are offspring of fathers who never married."

Eggebeen is co-author of the paper, "Children in Single Father Families in Demographic Perspectives," presented at the annual meeting of the Population Association of America. His co-authors are Anastasia R. Snyder, graduate student with the Department of Human Development and Family Studies, and Wendy D. Manning, assistant professor of sociology at Bowling Green University in Ohio.

Of all children being raised by single fathers, about half are offspring of divorced fathers, and half are offspring of fathers who never married, according to Daniel J. Eggebeen, associate professor of human development and family studies.

Photo: Greg Grieco

"The proportion of children living in father-only families is currently 4 percent of children overall," Eggebeen said. "Nevertheless, that percentage is growing rapidly due to

demographic changes in the American family. By 1993, single-father families made up 15.5 percent of all single-parent families with children."

However, families

reared by the father alone — while one of the fastest growing family types — are increasingly less likely to be headed by a professionally stable man over 40 years old who is divorced or widowed. Single-father families resulting from widowhood have practically disappeared, while families headed by never-married fathers under 30 are gaining in number.

Among children being raised in single-father homes, those living with fathers who were married at one time are the best off economically and tend to have the best educated fathers.

"In contrast, children in multi-generational households or households containing more than one adult tend to have fathers with low incomes, comparatively little education and an erratic employment history," Eggebeen said.

Having single fathers with poor economic prospects is clearly a disadvantage for children raised by those fathers. To some degree, however, the ill effects of this are offset by the presence of other adults, which tends to raise overall household income and reduce the poverty rate for these families.

Support for this research was provided by Penn State's Population Research Institute.

The researchers used 1960-90 Public Use Microdata samples from the U.S. Census of Population.

Hobby-Eberly twin may be constructed in South Africa

A delegation from the Hobby-Eberly Telescope Project met with astronomers, engineers and officials in South Africa to discuss the possibility of collaboration on construction of a large astronomical telescope. The telescope would be patterned after the Hobby-Eberly Telescope (HET) currently nearing completion at McDonald Observatory in the Davis Mountains of remote west Texas.

The scope features the largest primary mirror in the world, 11 meters in diameter, and is made up of 91 hexagonal mirror segments, each 1 meter in size. In contrast to most telescopes, which track astronomical objects by moving the entire apparatus, the HET tracks moving only the instrument package above the primary mirror to follow the moving, reflected and focused image. This reduces the amount of telescope mass to be moved under precise control by more than 10 times.

While the HET cannot observe the entire sky, it can see more than 70 percent of it, track for up to three hours, and feed the captured light to instruments via an optical fiber, permitting very large and sensitive instruments to be housed in a room beneath the telescope. The HET is being constructed for about 15 percent of the cost of telescopes of similar size currently in operation or under construction at sites in Hawaii and Chile.

The telescope could be constructed in five years, using the majority of plans and designs already developed for the HET. Under consideration would be the South African Astronomical Observatory site, near Sutherland. Sharing of software, electronic designs and scientific instruments could provide substantial cost savings in operation as well as construction.

Abortion increases risk of breast cancer according to 23 studies

Having an induced abortion increases a woman's risk of developing breast cancer later in life by nearly one-third, according to a controversial review and statistical analysis of 23 studies of women with breast cancer, which appears in the October *Journal of Epidemiology and Community Health*, published by the British Medical Association.

The evidence is overwhelming," Vernon Chinnilli, co-author and associate director of the Center for Biostatistics and Epidemiology at The Hershey Medical Center. Eighteen out of 23 studies indicate increased risk in women who have had an induced abortion, he said. The meta-analysis

covers 23 separate studies with data on 25,967 women with breast cancer and 34,977 control patients without cancer.

"Our study documents a clear and significant link in worldwide published epidemiological research dating back to the first study in Japan in 1957," principal investigator Joel Brind, professor of endocrinology at Baruch College in New York City, said. "Yet most women are still in the dark: only three states require that women considering abortion be warned about breast cancer." The three states are Louisiana, Mississippi and Montana.

Brind has researched connections between sex hormones and human

disease for nearly 25 years. He said that pregnancies ending in early miscarriage — often called spontaneous abortions — do not expose women to high levels of estrogen. "Excess exposure to estrogen is involved in most known breast cancer risk factors," Brind said. "But in most pregnancies that end in miscarriage, estrogen levels never get off the ground, so breast cancer risk is not increased."

Abortion increases risk for young, childless women in two ways, according to Joan Summy-Long, professor of pharmacology at Hershey. "They lose the protection of a full-term pregnancy in addition to gaining the 30 percent risk increase from the abortion," she said.

"In normal pregnancies that do go to term, hormones secreted near the end of pregnancy modify the growth and vulnerability of breast cells, resulting in lower risk for women who have children," she said. Summy-Long is a neuroendocrinologist who studies hormonal regulation of milk secretion.

Indeed abortion already accounts for about 5,000 cases of breast cancer in the U.S. every year, according to the four authors of the study. The number of cases is expected to rise to more than 25,000 per year by the mid-21st century, as the initial growth of women expected to legal induced abortion in the 1970s continues to age.

Rene's list

Rene's List, the fund-raising effort that has helped to underwrite Penn State Lady Lion basketball on television, returns in 1996-97. **Katina Mack**, the former Lady Lion standout who recently joined the Nittany Lion Club staff, is spearheading the Rene's List III initiative, which will fund the televising of six games on WPSX and other over-the-air and cable stations this season. The scheduled TV games are: Nov. 26 vs. Seton Hall, 7:30 p.m.; Dec. 7 vs. George Washington, 2 p.m.; Jan. 17 vs. Illinois, 7:30 p.m.; Jan. 26 vs. Ohio State, 2 p.m.; Feb. 7 vs. Michigan, 7:30 p.m. and Feb. 23 vs. Wisconsin, 2 p.m. For information on joining Rene's List, call Mack at (412) 865-9462 or (800) 648-8269.

Going strong

Again this fall, the Penn State Alumni chapter is among the National Football League's largest. That's hardly surprising for a program that has sent more than 200 players to the professional ranks in the last 30 years. A new NFL survey revealed there were 32 former Nittany Lions on opening day rosters, ranking Penn State in a tie for No. 5 among all colleges and universities. Notre Dame (43) topped the list of active pro players followed by Ohio State (35), Miami (34), Tennessee (33) and Penn State Southern California and Florida State (32).

Top performers

One of the highlights of the local running season will be Sunday, Oct. 20, when the men's and women's cross country teams host the Penn State Open/National Invitational at the Penn State golf course.

For the Record

■ In the Sept. 26 issue of *Intercom*, the caption for the photograph of the sculpture, "Santa Barbara Wedge" should have said it could be found in the Donald W. Hamer Sculpture Garden outside the Palmer Museum of Art.

■ The Web address for the "Strategies for Successful Education of Health Care Providers" seminar listed on page 5 of the Oct. 3 *Intercom* should have read <http://www.cde.psu.edu/CeU/StrategiesForSuccess/>.

■ The name of The Smeal College of Business Administration's 1996 Alumni Fellow listed on page 9 of the Oct. 3 issue was misspelled. His name should have read Kim Yong Ju.

■ Nancy Herron, director of academic affairs for Penn State McKeesport Campus was misidentified in a story on the Commission for Women on page 5 of the Oct. 10 *Intercom*.

In memory

Bob Jozefick and Bill McNichol from the Office of Physical Plant prepare to install a memorial plaque outside of Beaver Stadium in honor of Norman H. Bedell, assistant vice president of OPP, who died last year. Memorial contributions made to the Campus Beautification Program in Bedell's name are helping the University to complete the original landscaping plan for around the marker wall, which was a gift from the Class of 1992. Lighting will be added to the site, in addition to the shrubs and trees. A formal dedication is planned for late spring when the dogwood trees are in bloom.

Photo: Greg Grieco

University to operate Bucks County facility

Penn State's efforts to create jobs and help re-use the former Naval Air Warfare Center (NAWC) in Warminster, Pa., will enter a new phase on Friday, Oct. 18. That's the day when the University receives the keys to NAWC's Inertial Navigation Facility (INFAC) from the Federal Lands Reuse Authority (FLRA) of Bucks County in a ceremony at 2 p.m. The FLRA will pass the keys along after receiving them from the Navy at the same event. The Navy formally decommissioned the NAWC on Sept. 30.

Penn State will operate the INFAC, with funding from the Navy, as a Navigation Research and Development Center under the direction of Herbert Seligman. The INFAC will continue to serve the Navy's needs but will also be available for the first time for non-Department of Defense use. INFAC is expected to become an economic development resource that serves as a magnet for new

industry and jobs. About 20 of INFAC's employees have been retained to operate the laboratory. Additional jobs could be created over the next five years as INFAC is available to non-DoD, federal agencies, regional agencies and industry sponsorship.

"The Navigation Center, which is the only laboratory of its type, is non-portable and, therefore, could not be moved with the rest of the Navy activity," Seligman said. "The facility is tied to the Warminster bedrock, which is the best in the country based on a national survey, and provides the most seismically stable and quiet environment for high tech navigation research. With the test piers directly bonded to bedrock, sensor calibration and testing can be achieved at accuracies and precisions unattainable anywhere else in the world."

"End the Violence"

Student groups ask community support to help stop violence

Penn State's student counselors and students from the sexual assault counseling group SURVIVE launched a campaign Oct. 16 asking for the end of all types of violence on the University's campuses.

Representatives from the two groups unfurled a 150-foot banner, which will be displayed in the main lounge of the Hetzel Union Building on the University Park Campus through Friday. Sponsors are asking students, faculty and staff, administrators and the general public to add their names to the banner and sign cards pledging to help eliminate violence. They also are distributing navy blue and white buttons, stating, "End the Violence: In remembrance of Melanie Spalla and all other victims of violence in our community."

"We decided we needed to do this because we are tired of violence in our community. We, as a community, can stop this but not unless we feel as if we can. This campaign is designed to empower all members of our community to work

Enrollment figures reflect robust interest

Penn State's reputation for providing a top quality education to students resulted in another record-breaking enrollment year for the University.

The University's total enrollment for Fall 1996 is 77,518 — an increase of 721 students over the Fall 1995 total enrollment of 76,597 at 23 locations.

University Park enrollment increased by 217 students this fall, to a level of 39,782 students.

"The positive response of these students and their families demonstrates an appreciation of the value of a Penn State education," said President Graham B. Spanier. "U.S. News and World Report" this fall ranked Penn State as the ninth "most efficient" national university. In these times of concern over the affordability of a college education, this is an important indicator for families."

Penn State's enrollment reached its long-term target, which reflects efforts

to contain long-term enrollment growth. The University received 45,708 applications this year, an increase of 516 over the previous year, but admitted 591 fewer first-time freshmen than the year before. The overall enrollment increase can be attributed to strong retention rates and a high rate of students accepting offers of admission.

A record total of minority students are enrolled this year. Minority enrollment rose to 7,376 students, or slightly more than 9.5 percent of the total enrollment. This figure reflects an increase of 453 students, or 6.5 percent, over 1995 figures. Individual increases are reported in African American, Asian American, Hispanic American and Native American enrollments.

Planning council schedules series of open meetings

Members of the University Planning Council have started holding a series of several dozen open meetings this fall throughout University Park and the Penn State system.

The meetings, which began last week at Penn State Erie, The Behrend College, and with the Council of Academic Deans, are intended to provide a brief overview of the challenges and opportunities facing Penn State during the next five years. Members of the planning council are using the meetings to solicit input from University students, faculty and staff about how to continue to ensure the institution makes gains in quality, despite financial constraints that might otherwise impede that effort.

Strategic planning is being used as a process to achieve greater academic quality for Penn State.

"President Spanier appointed the University Planning Council a year ago to help guide the University five-year strategic planning process," said John A. Brighton, executive vice-president and provost, and chair of the council.

"Planning for the future must be based on improving the institution," Brighton said. "We need to change to be more efficient and responsive."

"Social trends, institutional changes, technological advances and intellectual developments are making

Hispanic Heritage Month offers many events

Penn State is celebrating Hispanic Heritage Month and Puerto Rican Awareness Week with events scheduled into December, beginning with a public lecture by noted author and playwright **Cherrie Moraga** at 7 p.m. Monday, Oct. 27, in 112 Kern Building on the University Park Campus.

Moraga is co-editor of *This Bridge Called My Back*, and author of *Loving in the War Years*, which is a collection of essays and poetry. She is also author of several plays, including "Giving Up the Ghost," which will be performed at 5 p.m. Thursday, Oct. 31, in the Pavilion Theater.

Other events in the celebration over the next six weeks include films, plays, lectures, discussion groups, a food festival, a children's day, a college fair and a closing dinner at the Nittany Lion Inn on Friday, Dec. 6.

In addition to Moraga's talk on Oct. 27 and play on Oct. 31, other Hispanic Heritage events coming up in the next two weeks are:

- The Spanish Club Video Forum film, "Il Postino," at 7 p.m. Tuesday, Oct. 28, in the Lipcon Auditorium of the Palmer Museum of Art.

- Latin Jazz Radio Series at 1 p.m. Saturday, Oct. 26, and Saturday, Nov. 2, on WPSU radio.

- A lecture on "Hispanics in the Military," by Lt. Gen. Marquis, Col. Phillips and Cadet Rodas at 7 p.m.

Illustration by Israel and Lucy Lopez

- Monday, Nov. 4, in the Paul Robeson Cultural Center.

- The Spanish Club Video Forum film "La Familia," at 7 p.m. Tuesday, Nov. 5, in the Lipcon Auditorium of the Palmer Museum of Art.

- The play "La Carreta" (The Oxcart) at 8 p.m. Wednesday, Nov. 6, in the Paul Robeson Cultural Center.

- The Spanish Club Video Forum

film "Latin Boys Go to Hell" at 7 p.m. Thursday, Nov. 7, in the Lipcon Auditorium of the Palmer Museum of Art.

- A slide show by **Javier Escudero**, "Land of 1,000 Colors," at 7 p.m. Friday, Nov. 8, in the Lipcon Auditorium.

These celebrations are sponsored by the Latino Caucus, the Puerto Rican Student Association, the Equal

Opportunity Planning Committee and the Office of the Vice Provost for Educational Equity, in cooperation with a number of colleges, institutes, departments and student clubs from across the University.

For more information, contact **Maria Schmidt** in the Multicultural Resource Center at (814) 865-1773.

Enrollment

continued from page 1

throughout the Penn State system is up by 132 students for an overall 4.8 percent increase.

"In this environment of growing competitiveness, Penn State continues to steadily improve the racial and ethnic diversity of our entering students," Spanier noted. "We will continue to seek progress because all of our students benefit from learning and living in a diverse population such as the one they will live in when they graduate."

At University Park, there are 33,162 undergraduate and 6,620 graduate students enrolled this fall. The Commonwealth Campuses report a total of 24,198 students, up by 641 or 2.7 percent.

"We are pleased that Penn State is considered one of the most attractive institutions in higher education," Spanier said. "For example, more high school seniors sent their SAT scores to Penn State this year (53,238) than to any other college in the country."

Penn State also remains popular among alumni, industry and donors. Penn State has the largest alumni

association in the nation; it ranks second in the nation in industry-sponsored research and is one of the largest research universities in the United States. Donations to Penn State in the fiscal year just ended reached an all-time high for the University.

"We have accomplished so much and caught the interest of so many while only receiving 17 percent of our budget from the state," Spanier said. On a per student basis, Penn State receives less state support than any other state-owned or state-related college in Pennsylvania.

"Penn State is consistently ranked by outside organizations as one of the most efficiently operated universities in the nation and as an institution that provides an Ivy League education at state school prices.

"And unlike other colleges in Pennsylvania, we have an outreach office located in every county of the state—we are integrally involved in creating and saving jobs throughout the Commonwealth as part of our unique land-grant university status," Spanier said.

Peace

continued from page 1

together and stop all types of violence in our community," said Kathryn Woods, Student Counselors program coordinator and member of SURVIVE. This campaign will serve as a way for students and community members to voice their support of a violence-free community.

"All types of violence are included in the campaign — sexual assault, gay bashing, racial and ethnic violence and intimidation, relationship violence, alcohol-related violence, assault and random violence," said Megan Dolbin, Student Counselors program

coordinator and member of SURVIVE.

One of the functions of the campaign is to make faculty, staff, students and community members more aware of the many types of violence that occur in the University community. By including all faculty, staff and students in the campaign, the entire Penn State community will have the opportunity to become involved and show its support.

Meetings

continued from page 1

a new world for higher education. We must lead change rather than be driven by it," he said.

These changes come at a time when the public is increasingly skeptical about higher education and rising tuition costs. The public continues to be critical about the issue of faculty workload and tenure and is demanding more accountability, while at the same time reluctant to provide more funds, according to Brighton.

The University Planning Council is reviewing every aspect of Penn State and its budget and will make recommendations that will help the institution continue to support quality programs, increase support of programs with great potential and redirect resources from functions that may be less critical.

...current fiscal projections indicate that the University may be facing a gap of \$12 million per year By the fifth year, that could mean a \$60 million shortfall in funds.

"The relatively flat funding from the Commonwealth in recent years coupled with projected inflation and increases in costs to operate Penn State indicate a gap between income and planned expenses for the next five years," Brighton said. "We intend to use strategic planning to reposition the University for the challenging period ahead."

"That repositioning is occurring at a time of relative strength for the University," he said. "Penn State experienced an increase in enrollment this year and we again received more SAT scores from high school seniors than any other college in the nation."

Brighton also noted that Penn State is one of the leading research institutions in the nation and has vast alumni support.

"Penn State is moving forward on all fronts. However, support from the state for our University has traditionally been low. It is lower than any of the state-owned and state-related universities in Pennsylvania and it is lower than any other school in the Big Ten," Brighton said.

Taking into account inflation, appropriate salary and benefit increases and other projected costs, cur-

Background info

If you want more background on the University Planning Council, you can find details of the past year's work and a list of members at the UPC Web site, located on the University Relations Web page at <http://www.ur.psu.edu> under the Office of the President link.

rent fiscal projections indicate that the University may be facing a gap of \$12 million per year in available funds versus planned expenditures in each of the next five years. By the fifth year, that could mean a \$60 million shortfall in funds.

"It is important that we develop a plan that will focus on our drive for quality and support those aspects of the University that will continue to build Penn State's national reputation and serve our students and the citizens of the Commonwealth," he said. "At the same time, we must remain good stewards of the fiscal resources available to us."

During its research over the past year, the planning council has identified some qualities of the University that it feels will define Penn State 10 years in the future. They include:

Penn State in 2006

- Lead other universities in the integration of teaching, research and service.
- Strive for academic quality as our highest priority; be the "first choice" university of top students, faculty and staff.
- Function as one university; encourage seamless transitions between campuses and between degree programs.
- Change the balance of graduate to undergraduate students.
- Develop world-class teachers and learners.
- Encourage active and collaborative learning.
- Strengthen interdisciplinary collaboration.
- Increase efficiency of the university; streamline processes.
- Encourage collaboration with business, industry, state government, primary and secondary schools.
- Strengthen outreach and cooperative extension.
- Create a welcoming and accepting campus environment for all; develop behaviors of civility and respect in the University community.
- Increase participation of under-represented groups.
- Internationalize the curriculum; increase number of international students and undergraduate students who study abroad.
- Strengthen the philanthropic tradition.

LECTURES

Talk to address teen pregnancy prevention

Every 26 seconds an adolescent girl becomes pregnant in the United States and every 56 seconds another adolescent girl gives birth, according to figures from the U.S. Department of Health.

A two-day conference on Nov. 12-13 titled "Teen Pregnancy: An Issue for Everyone," will be offered at The Penn State Lection for community leaders, women's center employees, crisis pregnancy counselors, parents, teachers, coaches, school officials, nurses, physicians and social service employees.

The conference is intended to recognize the causes and effects of teen pregnancy; cite changes required to reduce the incidence of teen pregnancy; and discuss the responsibilities of teen pregnancy. It will explore the messages society gives to teens and compare the meaning of sexual involvement and pregnancy on teens living in rural and urban areas and of different ages and ethnic backgrounds. Speakers will address what cultural influences should be considered when developing and delivering programs and providing support.

Laurie S. Zabin will be the keynote speaker for the conference. Zabin began her work in family planning in the 1950s as a volunteer. Today she is nationally recognized for her research methodology,

her knowledge of programs for adolescents, her drive for understanding the causes and effects of teen pregnancy and her passion to make change happen. Zabin is a professor of population studies at Johns Hopkins University.

Featured presenters include: **Donna Butts**, executive director of The National Organization of Adolescent Pregnancy Prevention Program in Washington, D.C.; **Patrick J. Sheeran**, acting director of the Office of Adolescent Pregnancy Programs, a division of the U.S. Department of Health and Human Services; and others.

There also will be a panel presentation by researchers.

The \$125 fee (\$75 student fee) covers all instruction, course notes, program materials, refreshment breaks and lunches for two days. To receive a brochure, call (800) PSU-TODAY, e-mail ConferenceInfo10@cds.psu.edu or visit the Web site at <http://www.cds.psu.edu/cr/teenpregnancy/>.

The conference is a continuing and distance education service of the College of Health and Human Development, Department of Biobehavioral Health and Human Development and Department of Family Studies, and is co-sponsored by the Pennsylvania Coalition to Prevent Teen Pregnancy and funded in part by Pharmacia and Upjohn.

Tax reform, tax simplicity differences to be addressed

Tax reform is a popular goal to advocate, but an equally difficult goal to achieve. Proposals advanced during the 1996 presidential campaign include the flat tax, tax credits for college tuition and tax relief for families with children.

The Nov. 12 installment of the Current Issues in Business lecture series at the Penn State Harrisburg, Eastgate Center will address the contradictions between tax reform and tax simplicity, provide a review of obstacles to 1996 campaign proposals and assess the probability of the proposed reforms being adopted.

The forum's presenter, **Jean Harris**, is associate professor of accounting in the Penn State Harrisburg School of Business Administration. Harris is a licensed CPA in Pennsylvania and a certified government financial manager. Approaching tax policy from a cross-disciplinary background, she has done research in accounting, taxation, public policy and economics.

The series, sponsored by the Penn State Harrisburg School of Business Administration, is free to the public. For information or to make a reservation, call (717) 772-3590.

Former president of South Africa to speak

F. W. de Klerk, former president of South Africa, will speak about the end of apartheid in that country at 8 p.m. Tuesday, Oct. 29, in The Bryce Jordan Center on the University Park Campus. De Klerk was a co-recipient of the 1993 Nobel Peace Prize, with current South African President Nelson Mandela, for the leading role he played in the democratization of South Africa.

De Klerk will hold a news conference on Tuesday, Oct. 29, at 6:50 p.m. in the Jordan Center ticket office. Admission to the lecture is free, but tickets will be required. They will be available in Room 225 of the Hetzel Union Building.

As South Africa's first "television president," de Klerk developed a friendlier, more open and accessible relationship with the media than any of his predecessors. He was widely praised for his efforts to keep South Africa on the negotiations path during its transition into a nonracial democracy.

In an interview with *Time* magazine after being named *Time's* Man of the Year in 1993 (along with Mandela, Yitzhak Rabin and Yasser Arafat), de Klerk said he hoped history would recognize that he, "together with all those who supported me, have shown courage, integrity, honesty at the moment of truth in our history. That we took the right turn."

After many years of public service, de Klerk was unanimously elected

president of South Africa in 1989, after former President P. W. Botha resigned because of poor health.

In February 1990, de Klerk made several announcements that would fundamentally change South Africa and accelerate the elimination of apartheid. He announced that Mandela would be released from prison and that many organizations would be "unbanned," including the African National Congress and the South African Communist Party. He also introduced a set of initiatives that led directly to South Africa's first-ever universal-franchise election in April 1994.

De Klerk now serves as one of two executive deputy presidents in Mandela's Government of National Unity. He was named to the position after Mandela was elected president, because of the number of votes won by the National Party, which he still heads.

He earned bachelor of arts and bachelor of law degrees from the Potchefstroom University for Higher Christian Education, where he was active in student affairs.

De Klerk's lecture, part of the Distinguished Speakers Series, is sponsored by the Programming Coordination Board and co-sponsored by the Take a Stand Coalition, the Undergraduate Student Government, the Association of Residence Hall Students and the African Students Associations.

Evolutionary genetics to be topic of Chemerda Lectures

Laurence D. Hurst, the Horace Le Marquand and Dudley Bigg Research Fellow of the Royal Society of London, will give the 1996 John M. Chemerda Lectures in Science from Oct. 28 to 31 at University Park.

He is well known for spearheading work in the area of conflicts that occur within genomes and for the relevance such conflicts might have for the evolution of genetic systems. He has published on many of the major topics in evolutionary genetics.

Hurst will give a series of lectures on the theme of "The Evolutionary Genetics of Darwinian Genomics," including: "The Evolutionary Genetics of Darwinian Genomics" on Monday, Oct. 28, at 7:30 p.m. in 104 Thomas Building; "The Evolution of Sex and Some of What That Entails" on Tuesday, Oct. 29, at 7:30 p.m. in 101 Thomas Building; "Toward a Darwinian Genomics I" on Wednesday, Oct. 30, at 3 p.m. in 104 Thomas Building; and "Toward a Darwinian Genomics II" on Thursday, Oct. 31, at

4 p.m. in 201 Thomas Building.

In addition to his position with the Royal Society of London, Hurst is a member of the Department of Genetics at the University of Cambridge, a senior research fellow at Churchill College in Cambridge and a professional fellow of the Institute for Advanced Study in Budapest. In January 1997, he will become the professor of evolutionary genetics at The Centre for Mathematical Biology in the Department of Biology and Biochemistry at the University of Bath in England.

After earning his bachelor's degree in zoology at Cambridge University in 1987, Hurst spent one year at Harvard University with Steven J. Gould under the auspices of the Henry Fellowship. Hurst then earned his doctoral degree at the University of Oxford Department of Zoology. After spending two years at The Queen's College in Oxford as a Browne Research Fellow, he moved to his current position.

More Lectures

Evening of poetry planned at Fayette Campus Oct. 30

Samuel Hazo, a distinguished international and Pennsylvania poet, will present an evening of his poetry at 7 p.m. Wednesday, Oct. 30, in the J. Lewis Williams Building Auditorium on the Penn State Fayette Campus. The presentation is free to the public, but reservations are required.

Hazo is the author of more than 30 books and was selected as the first "Poet of Pennsylvania" in 1993. He is a professor in the English department at Duquesne University, where he also is director and founder of the International Poetry Forum.

His most recent book is *The Holy Surprise of Right Now: Selected and New Poems*. Reservations may be made by contacting Fatty Zebrasky at (412) 430-4125.

Canada's health care system is topic of Nov. 1 lecture

J. Bruce Davis, director of Health Insurance, Health Canada, will speak on Canada's health care system from 3:30 to 5 p.m. Friday, Nov. 1, in 101 East Henderson Building on the University Park Campus.

Davis is responsible for administering the Canada Health Act (1984). His division monitors the compliance of these insurance plans to the criteria and conditions of the Canada Health Act, prepares replies to correspondence of the federal Minister of Health on health insurance and responds to inquiries on health insurance and the health care system. Davis received his Ph.D. in business administration in 1974 from Penn State.

His visit and presentation are sponsored by the Department of Health Policy and Administration and the MHA/MBA program.

Religion in the Global World: topic of Nov. 6 presentation

Conrad Cherry of Indiana University-Purdue University at Indianapolis will speak on "The Role of Religion in the Global World" at 7:30 p.m. Wednesday, Nov. 6, in 101 Kern Building on the University Park Campus. Faculty respondent will be **Anne Carver Rose**, associate professor of history and religious studies. This Values in the Community lecture is sponsored by The Center For Ethics and Religious Affairs.

Biology professor to give Nov. 6 talk for STS series

Christopher F. Uhl, professor of biology, will speak on "Sustainability at Penn State" at noon Nov. 6, in 109 Walker Building on the University Park Campus as part of the Science Technology and Society Fall Colloquium Series.

The next speaker will be **Jonathan Plaut**, visiting professor of environment and public policy and presidential appointee to the NHTA Environmental Commission. Plaut will discuss "Industrial Environmental Advocacy and Ethical Decision Making" on Nov. 13. Following that lecture on Nov. 20 will be **Herbert Cole**, professor of agricultural sciences. Cole's talk is titled "Sustainable Agriculture in Pennsylvania: The Sanrue Initiative."

For more information, contact the STS program office at (814) 865-9951.

Peace and quiet

This area of lawn between the north end of Henderson Building and McAllister Building on the University Park Campus will be the site of a Peace Garden—a gift from the Class of 1997.

Photo: Greg Grieco

Peace Garden is 1997 class gift

Penn State's Class of 1997 has voted to create a garden that will celebrate a peaceful and civil University community as its class gift.

In voting held last week, a majority of the ballots cast favored the "Peace Garden" over two other possible class gifts. The garden will be constructed on the lawn between the north end of Henderson Building and nearby McAllister Building, just to the west of the Hetzel Union Building lawn on the University Park Campus.

The garden's design will be chosen through an open competition among Penn State faculty, staff and students who have skills in landscape architecture. Plans could include stone walkways, floral designs, fountains, benches and lighting.

"Selecting this gift shows that seniors want to help beautify central campus and put an otherwise overlooked space to good use," said **Chris Weideman**, chair of the senior class gift committee. "Creating the Peace Garden will help preserve open space and give students, faculty and staff an out-of-the-way spot for study and conversation without all the pedestrian traffic of the malls."

Nearly \$11,000 for construction of the garden has already been raised through members of the senior class pledging the balance of their \$50 general deposit. The general deposit is held during a student's undergraduate years to cover unforeseen expenses, fees and emergency costs.

"Although most of a class gift's funds typically come from the general deposits, the gift committee is also planning other fund-raising activities designed to support the Peace Garden project," said Weideman. "Some of the things we have in mind are T-shirt sales and special events that will be announced in the near future."

The other gift options presented to the seniors involved a scholarship endowment and interactive information technology to help students prepare to study overseas in the Education Abroad Program, and a fund to construct fountains, or outdoor sculpted reliefs, depicting people of different cultures as an adornment for the new Paul Robeson Cultural Center.

Ideas for the class gift were accepted from late August until Sept. 20. Approximately 35 people submitted ideas, which resulted in 26 distinct proposals being brought before the gift selection committee, consisting of 16 seniors and members of the

Past gifts

Here is a small sampling of past class gifts, including all gifts given this decade.

- 1861 Portrait of Evan Pugh, first president. This was the first class gift.
- 1903 Gateway at Atherton Street-Pollock Road entrance to campus.
- 1904 Clock for Old Main Tower.
- 1913 Old Main stone terrace and steps.
- 1915 Stone retaining wall on front campus (College Avenue from Allen Street to Pugh Street).
- 1916 Memorial gateway at main entrance (College Avenue and Allen Street).
- 1925 Memorial gateway at Pugh Street.
- 1937 Westminster chimes carillon unit for Old Main tower.
- 1940 Nittany Lion shrine.
- 1958 Student AM radio station.
- 1960 Entrance gate to Beaver Stadium.
- 1971 Renaissance Fund.
- 1978 Antique bronze ball for football stadium.
- 1988 Computerized interview training center for Career Development and Placement Services.
- 1989 Outdoor study lounge adjacent to Pattee Library.
- 1990 Creamery courtyard.
- 1991 Cafe-style seating area on the west side of the Creamery.
- 1992 Official Penn State Landmark sign.
- 1993 Renovate and expand urgent health-care facilities at Ritneron Health Center.
- 1994 Extended-hours room at Pattee Library.
- 1995 Foundry Park.
- 1996 Elms endowment.

faculty, staff and administration. The committee narrowed the options to the final three gift ideas on the ballot.

Senior class gifts have been a Penn State tradition since 1861, and include such landmarks as the Old Main clock tower and the Nittany Lion Shrine. Last year's class has raised nearly \$115,000 for an endowment to help preserve the University Park Campus elm trees.

■ Plan for the Commonwealth update

Brighton outlines principles for CES change

As Penn State plans for eventual implementation of the plan to redesign its campuses, a number of important questions have been raised about the structure of the University in the coming years.

In a recent meeting with the Steering Committee for the Transition — Commonwealth Educational System, John A. Brighton, executive vice president and provost, outlined the overarching guiding principles for the changes in the structure and processes of CES.

There are five major components to the principles for change, including:

Overall University structure

Penn State is one university with several colleges. We have one governing board, one president, one faculty and one central administration. All college deans report to one University provost. Academic programs and courses are approved by one Faculty Senate. Degrees offered by all colleges are Penn State degrees.

Penn State must retain its character as one university while providing reasonable flexibility where differences and special needs and opportunities warrant.

Curriculum and courses

Every effort should be made for curricular consistency among the campuses.

The first two years of the baccalaureate programs should be compatible to allow easy flow among campuses during this period. Upper division courses also should be consistent, with some allowances for course differences in special areas where local needs and opportunities call for distinction. The principles apply to Penn State Erie, The Behrend College, and Penn State Harrisburg as well.

All new courses and changes in courses and programs will go through the Faculty Senate for review for consistency, compatibility and appropriateness. A common University course numbering system will be followed. Cooperative efforts should be put in place for consultation, revision and review as needed. Central leadership will be provided by John Cahir and Rodney Erickson.

For more information

Groups and individuals who have additional questions are encouraged to contact the following:

Curriculum and programs

John Cahir, vice provost and dean for Undergraduate Education
 (814) 863-1864

Rodney Erickson, dean of the Graduate School
 (814) 865-2516

Student recruitment and admissions

John Romano, vice provost and dean for Enrollment Management and Administration
 (814) 863-4774

Faculty Issues

Robert Secor, vice provost for Academic Affairs and Personnel
 (814) 863-7494

Faculty appointments

Faculty appointments will be made in each college including the new colleges (Abington, Altoona, Berks/Lehigh Valley and the Commonwealth College) with the responsibility for personnel residing with the college dean.

Appointments made after July 1, 1997, will be made to the college where the faculty resides. Faculty appointed before July 1, 1997, will have a choice as to the locus of their tenure and promotion. Those faculty at the current CES campuses who choose to keep their tenure home in a University Park college also will be considered full-fledged members of the campus at which they are located.

All faculty, regardless of college home, will be considered a part of the University faculty in their discipline (e.g. English faculty at Penn State). Each campus should expect faculty at that location to

work together for University-wide and student needs and interests. Central leadership will be provided by Robert Secor.

Recruitment and admissions of students

Student recruiting and admissions will continue to be overseen through the Office of the Vice Provost and Dean for Enrollment Management and Administration. This also will be a shared responsibility and a collaborative effort among all campuses and colleges. Central leadership will be provided by John Romano.

Budget

In the transition from the current CES structure to the new college structure, certain guiding principles must be established with respect to the budget.

First, the budgets for the four new colleges will be established from within the current overall budget for the CES. (Great Valley, which has been separated from CES and now has administrative reporting lines to the Graduate School, will have its budget modified separately.) Additional money will not be allocated to support the new college structure in the 1997-98 budget, except that which may come due to enrollment increases.

It is expected that the four new colleges, as well as Penn State Erie and Penn State Harrisburg, will be on a budget model that is related principally to enrollments. It is also expected that colleges and departments at University Park will continue to have certain responsibilities to support the campuses or be prepared to return existing support dollars to central administration for reallocation to the new colleges. Central leadership on this issue will be provided by Gary Schultz, P. Richard Althouse and Stephen Curley.

"This information is provided as general overall guidance for the transition," Brighton said. "There are obviously several issues that remain to be worked out as we go through the transition."

Nominations sought for alumni service award

The Penn State Alumni Association is seeking nominations for the 1997 Philip Mitchell Alumni Service Award, which is given each year to an alumnus, alumna or friend of the University who has contributed generously to the enhancement, growth, development and improvement of Penn State.

The award consists of certificate, a plaque prominently displayed in the Alumni Lounge with the name of each year's recipient and a cash gift to the University for a purpose designated by the recipient.

No current Board of Trustees members or distinguished alumni of the University are eligible. Nominations may be sent to **Rayna Wendell**, The Recognition Program, Penn State Alumni Association, 105 Old Main, University Park, Pa. 16802. The deadline for nominations is Nov. 30.

For more information or a copy of the nomination form, contact Wendell at (814) 865-6517.

Company president chosen as Alumni Fellow for Penn State Erie

Robert D. Metzgar, president and owner of Warren-based North Penn Pipe & Supply Inc. and an alumnus of Penn State Erie, The Behrend College, was honored as the college's 1996 Alumni Fellow.

Metzgar attended Penn State-Behrend in 1956 and '57. He completed his studies at University Park, graduating with a business degree in 1960. After beginning his career with West Penn Power Co. in Latrobe, Pa., he returned to his hometown of Warren, Pa., in 1966 as supervisor for scheduling for GTE Sylvania. He was plant manager when he left GTE in 1977 to purchase North Penn Pipe & Supply Inc.

Metzgar's civic organization memberships have included the Warren County Chamber of Commerce, the Warren County Industrial Development Authority and the Boy Scouts of Ameri-

ca. He serves on the PNC Bank Advisory Board and is treasurer of the Pennsylvania Oil and Gas Association. He is charter president of the Tri City Chapter of the American Production and Inventory Control Society.

Metzgar was named to the Penn State-Behrend Council of Fellows in the spring of 1994. In May of 1995, Gov. Tom Ridge appointed him to the Penn State Board of Trustees. He also is a life member of the Penn State Alumni Association, the Nittany Lion Club and the President's Club.

The Alumni Fellow Award, presented by the Penn State Alumni Association, is administered in cooperation with the academic units. The Board of Trustees has designated the title of Alumni Fellow as permanent and lifelong.

News in Brief

Under the stars

The Penn State Astronomy Club will hold an Astronomy Open House from 8 to 11 p.m. Friday, Oct. 25, on the roof of Davey Lab. (In the event of cloudy skies, observations will be attempted on Saturday evening.)

Featured objects for the evening will include the full moon and the planets Jupiter and Saturn. Other celestial objects may also be shown, depending on sky conditions.

A planetarium show will be held in 541 Davey Lab. The open house is free, and everyone is welcome to join the club for a relaxing evening under the stars.

"A Walk Through the Park"

As part of the campaign to raise awareness of breast cancer during the month of October, Circle K is sponsoring "A Walk Through the Park" on Saturday, Oct. 26. Registration for the event begins at 12:30 p.m. in Spring Creek Park, Pavilion 1. The walk, which is a three-mile trek, begins at 1 p.m. Registration is \$10 for non-students and \$5 for students. Anyone under the age of 16 may walk for free. Proceeds from the event benefit the Centre County Breast Cancer Coalition. For more information about the event, call the American Cancer Society at 238-8908.

Luncheon/auction set

A luncheon/auction to benefit Centre County United Way will be held from 11 a.m. to 2 p.m. Thursday, Oct. 31, in the Paul Robeson Center. The event, sponsored by Student Affairs, will feature specialties of the house from members of the Student Affairs and Penn State Catering staffs.

Items to be auctioned, including a 1984 Buick Skylark, are on display on the first floor of the Hetzel Union Building through Oct. 31. Other items include: *Gratias! Moments in Football History*, signed by John Cappelletti and Joe Paterno; brunch for two at the Nittany Lion Inn; brunch for two at The Penn State Scanticon; Penn State football and basketball memorabilia; dinner for two at Spats Cafe; a catered dinner party for six in your home; a housecleaning certificate; and more.

Silent bids may be made at the HUB deck. Final bidding will take place at 12:30 p.m. during the Oct. 31 luncheon in the Paul Robeson Center. You must be present to win. Cash and checks will be accepted.

Tickets for this event are available from your United Way representative for \$5.

Health promotion

Relax and Enjoy Series

During this four-week series, learn to manage everyday stress through the use of meditation, relaxation therapy and gentle stretching. Meets Tuesdays, Nov. 5 through 26, from 12-1 p.m. in H10 Henderson Building (The

Living Center). Cost is \$10, reimbursable to HMO participants. To register, contact Jan Hawbaker at 865-3085 or jgh3@psu.edu.

Stone Valley activities

Enjoy a hayride through the scenic woodlands of the Stone Valley Recreation Area. This program, which runs from April through November, offers a variety of facility, food and activity options to meet group needs. For arrangements, contact the park office at 863-0762.

Nausea study seeks volunteers

If you experienced nausea/vomiting during or after chemotherapy in the past and must have additional chemotherapy treatment, you might be interested in volunteering for a study by the Department of Psychology/Psychobiology.

Researchers have discovered that it is possible to reduce the symptoms of car sickness (motion sickness). Since there are some similar mechanisms that cause the nausea of motion sickness and chemotherapy, researchers would like to investigate if the procedure might help people with other kinds of nausea.

Participating in this study will not interfere with your medical treatment in any way. This study has been approved by Penn State's Use of Human Subjects Committee and will be directed by Robert M. Stern in the Department of Psychology.

If you would like more information or to schedule an appointment, please call Stern at one of the following numbers: 865-1712, or evenings and weekends: 238-7063.

Children needed for study

Pain in the upper abdomen, nausea, lack of appetite, loose stools and constipation in children: these complaints are often reasons for referral to pediatricians. Nearly 10 percent of school-children suffer from recurrent abdominal pain. Literature reports a peak of incidence at five years in both sexes and a further peak at puberty in girls.

To obtain additional information about it, the Department of Psychology is looking for children (ages 3-9) with and without gastrointestinal problems or a specific diagnosis to participate in a study. The study does not hurt and there is no risk to the health of the child. He or she will receive a toy for taking part.

The research is being conducted under the supervision of Robert M. Stern, professor of psychology, and has been approved by the Penn State Use of Human Subjects Committee.

Parental permission for participation is required. For further details, please contact Claudia G. Lederer, Department of Psychology, 535 Moore Building at 865-1725 or 238-4659.

Enjoying the weather

The weather was still nice enough for the benches near the HUB lawn on the University Park Campus to be visited, and that's just what Allen Scott, left, a student in Agricultural Sciences, and Kathy Couch did recently. Scott was studying between classes. Couch caught up on some reading while waiting for her husband, Steven, a sociology faculty member at the Penn State Schuylkill Campus, who was attending meetings at the University Park Campus.

Intercom online readership survey

In an effort to gauge how many readers are viewing *Intercom* through its Web site and as part of an ongoing process to evaluate the content, design and readership of the *Intercom*, the Department of Public Information is conducting an online survey in which readers are asked to answer a short series of questions. Individuals who have read the *Intercom* online in the past, can go directly to the survey at URL

<http://www.ur.psu.edu/intercom/survey/intercom.html>. The information you provide will be kept confidential and will be helpful in guiding the *Intercom* staff in its work.

See 'em on TV

Pennsylvania candidates for state assembly, state Senate and U.S. Congress have been offered free air time on WPSX-TV to discuss campaign issues and ideas so that voters can make an informed choice when they go to the polls next month. State candidates will receive 10 minutes each; U.S. Congressional candidates will receive 15 minutes each. WPSX-TV will devote two full afternoons Oct. 25 and 26 to air "Your Candidates: In Their Own Words," beginning at noon each day. WPSU-FM will broadcast the audio portion of the candidates' appearances at 7-8 p.m. Tuesday

through Friday, Oct. 29 - Nov. 1, and Monday, Nov. 4.

Time was offered to 51 candidates in 27 races in central and northern Pennsylvania; 36 individuals representing 22 races have accepted the invitation. For a broadcast schedule of when a particular candidate will appear, contact WPSX at (814) 865-3333. WPSU-FM will air the 12 races within the WPSU broadcast area.

Right-to-Know sessions planned

The Department of Environmental Health and Safety is offering the following "right-to-know" training sessions on Thursdays during the coming months for new employees. Participants should report to Room 6, Eisenhower Parking Deck on the University Park Campus.

A small taste of life

Photography has come a long way since the world's oldest existing photo was taken in 1827 by Nicéphore Niépce, but its appeal has never wavered. Capturing a moment in time and allowing it to be relived is a large part of photography's allure.

In a recent assignment, budding photojournalists in the classes of **Jock Lauter**, associate professor of journalism, and **Steve Manuel**, instructor in communications, attempted to capture a typical day in the life of those who live and work on the University Park Campus. The seven photographs found on these two pages are the result of that experience, in which students took a closer look at a small slice of the world around them and some of the people in that world.

Clockwise, from top left:

Men at work: Ed Kaiser of the Office of Physical Plant works on the trim on Eisenhower Chapel. Photo by Kanova L. Johnson.

Hitting the notes: June Miller, associate professor of music, instructs Holly Anderson, a junior majoring in music education, how to play the electric organ. Photo by Heidi Yedinak.

Rock the Vote: Stacey Grove, a junior majoring in political science, hands out voter registration forms in front of Willard Building. Grove is a member of Rock the Vote, a national organization formed to register young voters. Photo by R. Scott Rappold.

Catching up: President Graham B. Spanier does some paperwork between appointments that fill his calendar. On this day, he spent his morning at Penn State Shenango Campus and was to meet a colleague at University Park in the afternoon. Photo by Michelle K. Bauer.

"United is the Way," the theme for the United Way Campaign at University Park, truly represents the spirit of the United Way effort at all of our Penn State locations throughout the Commonwealth. By working together, we can best support those who need help and also enhance the quality of life in our communities.

Enthusiasm for the United Way—both in terms of financial support and assistance provided by volunteers at the social service agencies—has grown tremendously. Still, I'm saddened that some don't see the importance in supporting this critical endeavor.

As citizens, we all have a responsibility and a moral obligation to help our friends, neighbors and co-workers who may be in need. At Penn State, the United Way is recognized as the organization best able to provide this assistance, and it is the only charitable organization for which payroll deductions are authorized.

I hope that you will join with me and your co-workers in supporting this united effort to make our communities even better for all of us.

United is the Way

Dave and Rebecca Ryan

Ryan family enriched by United Way

Dave Ryan's life revolves around his family. And, with the death of his wife four years ago, the United Way has played an increasingly important role in the lives of his children. "We have no family locally," Ryan, who is coordinator of the Public Education on Low-Level Radiation Program in the Department of Nuclear Engineering, said. "When my wife died, friends were very supportive. Donna Queeney, who I met professionally through an internship with Continuing and Distance Education, and her husband, Rick, have been most helpful.

"But the care and support we have gotten from the United Way has made an important, rewarding difference in the Ryan family.

"Without this help, my kids' lives would not be as full as they are now. And, I doubt that I would be as good an employee of the University. In fact, I can't imagine what life would be like without this support."

Dave's first involvement with a United Way agency came 18 years ago when his daughter, Rebecca, was born with Down Syndrome. When a baby is born with mental retardation, The ARC (Association for Retarded Citizens) offers support. As Rebecca got older, he became involved with The ARC Board of Directors and served for two years as board president.

Since his wife's death, The ARC's professional staff has played an increasingly substantial role in Rebecca's life.

"My job at the University often requires me to be on the road making presentations," he said. "The ARC guarantees professional care for my daughter when I am away. The ongoing training that The ARC provides prepares the caregivers to deal with any problems, and this gives me confidence and peace of mind.

continued

United Way

Continued from page 1

"There is a lot more involved than custodial care. The goal is to enhance the quality of Rebecca's life. The ARC staff develops a very comprehensive program plan that is individualized for Rebecca.

"For instance, she has difficulty understanding the concept of calendars, which would give her a better sense of time. The ARC's staff has helped to develop and reinforce the concept so that she has a sense of when things are going to happen."

Involvement with The ARC has enabled the Ryans to take advantage of some other community resources for Rebecca. Dave has been able to work out Centre Ride transportation so that she can go to Schlow Library. And Alpha Fire Company volunteers help out with fire training, coming dressed in uniform so that Rebecca is aware the fireman is not someone she should be afraid of.

Easter Seals is another United Way agency that has played an important part in Rebecca's life. In 1992, Easter Seals accepted her into summer camp and she has gone to camp every summer since then. Through that experience, she has gotten involved with the High Five Club, an organization sponsored by Household Finance that meets monthly during the school year and involves members in activities such as bowling and hay rides under supervision of Easter Seals volunteers.

Youth Services Bureau also has provided support for Dave's two other children through the Big Brother-Big Sister program. Joshua had a big brother for a year, and Timothy has had a big brother, Andy Swan, since January, 1993. Andy is a Penn State student and a member of the lacrosse team. According to Dave, Timothy adores him.

Concern and care for Rebecca by the United Way agencies has allowed Dave to give some needed time to his sons and help with their problems.

"After my wife's death, we stopped all activities such as Scouts and sports. But now we're beginning to get back on track: Timothy is an active Cub Scout, and Joshua runs cross country and track.

"By not having to worry about Rebecca's safety because of caregivers provided by The ARC, we have been able to take advantage of various other community services for all the children.

"People tell me that my children are well behaved, are loved and feel secure. There is no doubt that, without the benefit of the United Way agencies, life would not be as good for the Ryan family."

MESSAGE FROM THE CAMPAIGN CHAIR

As someone who has grown up and been a part of this community all my life, I've been able to experience the good fortune of utilizing some of the services of the United Way agencies. I've seen first hand the impact these agencies have had on improving the quality of life in Centre County.

Also, through my involvement, I've seen that the United Way has been able to do it in an efficient, organized and intelligent manner. The United Way is the best way to deliver a multitude of services to benefit greater Central Pennsylvania.

My involvement has given me a greater appreciation of the various challenges and opportunities that face all of us here in Centre County. I've seen agencies come to the help and rescue of people in great need of times when life looks dismal, and I've seen them improve the quality of life in non-emergency situations. It's something you don't always think about unless you personally see what the agencies do.

As chair of this year's campaign, my primary focus is to build on the momentum of the Penn State Campaign over the last number of years. I want to work as hard as possible to increase the portion of the Penn

State community that contributes to the overall effort. We have come a long way, but there is so much more that can be done.

The theme for this year's campaign, *United is the Way*, came from my staff assistant, Sandy Rogus, who, following a brainstorming session in which we were trying to develop a theme, went home and came up with the idea in her sleep. It emphasizes our effort to unite the Central Pennsylvania region and the Centre County and Penn State campaigns.

One of the things that has impressed me the most is the depth and quality of the volunteer groups involved in the United Way—those who are involved in raising funds and those who volunteer in the agencies.

The future of the United Way Campaign and its agencies is very bright with the quality of leadership and individuals involved. Each year we are able to recruit people who understand what the United Way can do for Centre County.

With your help, the best days for United Way are ahead.

Timothy M. Curley
Athletic Director

United is the Way

Volunteers play an integral role in the University Park Campaign

Volunteers play an integral role in the University Park United Way Campaign. Without their dedication and seemingly unlimited energy, there is little chance of the campaign being successful.

They can be found in all areas of the campus and they seem able

Way agency and community projects during the annual Day of Caring, student volunteers are planning fund raising through the annual Blue and White basketball game on Friday, Nov. 1, in the Bryce Jordan Center.

Another new—and very successful—event this year was “Hoops for Hope,” a wheelchair basketball

Hoops for Hope Key participants in the “Hoops for Hope” which supported the University Park United Way Campaign are, from left, John Sikora, coach of the Pittsburgh Steelwheelers; Donna Meyer and Janet Bowman, co-leaders for Undergraduate Education’s 1996 United Way Campaign, and Karol Brooks, former international wheelchair athlete. Photo: Greg Grieco

to devise new—and highly productive—means of raising funds.

Their efforts ranged from a pancake breakfast sponsored by Intercollegiate Athletics and Penn State Catering at the Oct. 3 Day of Caring to the recycling effort at Beaver Stadium and the first United Way Golf Tournament sponsored by Computer and Information Systems.

Other fund-raisers included hoagie sales by Continuing and Distance Education and The Smeal College of Business Administration; a kickoff luncheon by the Division of Development and Alumni Relations, and the University Library’s fourth annual book sale. Upcoming events include a lunch/auction on Oct. 31 by employees in Student Affairs, and a tailgate and silent auction with College of Agricultural Sciences alumni at the Nov. 23 Michigan State game.

In addition to working on United

game featuring the Pittsburgh Steelwheelers and former Lady Lion and Nittany Lion basketball players. The Oct. 9 event, supported by employees in Undergraduate Education, raised approximately \$2,000.

Co-team leaders for Undergraduate Education’s 1996 United Way Campaign are Janet Bowman, Academic Assistance Programs, and Donna Meyer, University Scholars Program.

Meyer, who became a part of Undergraduate Education’s United Way Campaign last year, received an award for selling the most hoagies and then was asked to serve as co-chair for an event this year.

“We wanted to do something new and different,” she said, “and my husband suggested a wheelchair basketball game. We didn’t know how to start, but we talked to the right people; got important information and suggestions, and it just took off.

“It was a lot of work. But, when you have a good team of volunteers, there are no limits to what can be accomplished.

“Planning ‘Hoops for Hope’ was very rewarding in that it gave me an opportunity to work not only with other colleagues from different units within Undergraduate Education but also to work for the first time with wheelchair athletes.

“Everyone is gifted with special talents that we sometime don’t recognize, but I think it’s important that everyone note that persons with disabilities are persons with abilities. John Sikora’s (Pittsburgh Steelwheelers coach) athletic ability is an example of how a person can overcome life’s hurdles with a positive attitude and a little determination.”

Bowman, Undergraduate Education’s other team leader, got involved with the United Way when she first started working at the University 18 years ago.

“It was time for the annual campaign and I was asked to be a Steering Committee representative for the unit in which I was working,” she recalled. “I said yes and I’ve been doing it ever since.”

This year’s other first-time event, the United Way Golf Tournament, was directed by John Dixon, Office of Administrative Systems. Organizing committee members were Paul Peworchik, Computer and Information Systems; Ken Miller, Athletics; Ellen Auker, Office of Telecommunications; Sylvia Carson, Library Computing Services, and Bonnie Struble, Center for Academic Computing.

Dixon, who has been involved in the United Way since he began working at the University 17 years ago, has a personal reason for supporting the United Way.

“My dad died when I was 15,” he said, “and I got a lot of help from various agencies supported by the United Way. I’ve been there and know what the United Way means to people. Volunteering is my way of giving something back.”

Here's how you can help:

If everyone who works in Centre County contributed just one hour's pay per month, the benefits would be felt throughout our community.

\$2 PER WEEK

Provides three nights of shelter for an individual in crisis.

\$3 PER WEEK

Provides 18 hours of assistance on the Rays/Albany Child Welfare.

\$5 PER WEEK

Provides 72 days of job development training and support for a person with mental retardation.

\$8 PER WEEK

Provides a Big Brother or Sister for one year for a child at risk.

\$10 PER WEEK

Provides four days of food, shelter and clothing for a family of four who have lost everything in a fire.

\$20 PER WEEK

Provides one week of summer camp for 24 disabled children.

AGENCY SERVICES IN 1995

United Way agencies helped one in three people in Centre County:

- 3,808 physically challenged individuals were able to achieve their highest levels of independence.
- 1,693 victims of family violence and rape received care and support.
- 2,490 people were provided with emergency food supplies.
- 1,214 children and teenagers at risk benefited from counseling and learning programs.
- 4,040 men and women obtained legal and mediation advice.

Campaign leadership gift donors are honored

Campaign Leadership Taking part in the annual event that honors members of the University community who make leadership gifts to the United Way are, from left, Jack Infield and Charlene Friedman, co-chairs of the 1996 Centre County United Way Campaign, and Tim Curley, chair of the University Park Campaign.
Photo: Greg Grieso

best way to help those truly in need and to maintain and enhance the quality of life in our community.

"I challenge you in truly providing leadership to continue your level of giving, but also to let other people know that you believe in the United Way. We need to draw more people into the upper level giving category and we also need to create a pattern of giving for those who are not contributing anything now.

"Help provide that additional leadership by spreading the word for us about the importance of the United Way and the role it plays in improving the quality of life in our community."

Tim Curley, chair of this year's campaign, noted that leadership gifts played a major role in last year's campaign which exceeded its goal.

"Of all the statistics about the United Way, the one that stands out and speaks volumes to our involvement is that one out of three people in Centre County last year utilized services of a United Way agency," he said.

"Through your continued leadership gift support, I believe we can improve services and offer a united effort to improve our community."

Several hundred members of the University community who contribute \$300 or more annually to the University Park United Way Campaign were honored recently at a breakfast at the Penn State Scenicton.

"I challenge you to go one step further," Penn State President Graham Spanier told those attending the breakfast.

"I hope that, as persuaded as you are about the value of the United Way and as generous as you've been, you feel as frustrated as I do that others don't see the same importance in supporting this key endeavor which provides the

United is the Way

Here's How You've Helped

Suzie Brawa entered one of Temporary Housing Inc.'s transitional programs to get her financial house in order. She had been working full-time and attending Penn State as a returning adult student. Suzie had lived through the death of her mother and the tragic loss of her sister. She needed time and the opportunity to recover emotionally and financially.

By this fall, the bills will have been paid off and an emotionally recovered Suzie will have accomplished one other major goal—by the end of October, Suzie will move into her own home.

After a Child Assault Prevention Program that teaches children that they have the right to be safe, strong, and free, a third-grader approached me and disclosed the abuse occurring in her house. She said that she had never talked about it with anyone before and was feeling really scared and unsafe at home. I was able to talk to the child about safety planning, such as going to a neighbor's house or calling the police if it were an emergency.

I told her that it was not her fault that she was being hurt and that nobody deserved to be treated that way. First, her knew how courageous it was of her to tell me about this. I informed her that I would be making a child abuse report to Children and Youth Services and that they would try and help her family.

I told her that she wasn't alone and that this was happening to other children. As I said this, she looked up at me with disbelief and said, "You mean this isn't just my family?" I said, "No, this happens to a lot of families." Then she reached out and wrapped her arms around me as tightly as she could and said, "Thank you so much for helping me," as the tears streamed down her face.

—as told by a former children's advocate of the Centre County Women's Resource Center

The ARTS

at PENN STATE

On stage

"Philadelphia, Here I Come" will be on stage at 8 p.m. Friday, Nov. 1, in Eisenhower Auditorium on the University Park Campus. For tickets, call the Arts Ticket Center at (814) 865-0255 or (800) 278-7849.

Pennsylvania Quintet

The Pennsylvania Quintet, Penn State's resident wind faculty chamber ensemble, will present a free concert at 8 p.m. Thursday, Oct. 24, in the College of Arts and Architecture School of Music Recital Hall on the University Park Campus. The quintet will perform three new compositions from its "New Music Recording Project," as well as works by Andriessen, Bach and Bizet.

The Pennsylvania Quintet has performed at major venues on both sides of the Atlantic, including the National Gallery of Art, Washington, D.C., and the Schleswig-Holstein Musik Festival in Germany. The members of the Pennsylvania Quintet are Eleanor Duncan Armstrong, flute; Tim Hurtz, oboe; Smith Toulson, clarinet; Lisa O. Bontrager, horn; and Daryl Durran, bassoon.

Greek Sing

Greek Sing, sponsored by the Penn State Panhellenic Council, will be held at 3 p.m. Saturday, Oct. 26, in Eisenhower Auditorium on the University Park Campus. Tickets are \$5.50 in advance and \$7 at the door. All proceeds benefit the Gayle Beyers Scholarship Fund. For information call (814) 865-0510.

Concert set for Oct. 27

The 54 members of the Penn State Concert Choir, conducted by D. Douglas Miller, professor of music, will present their major fall on-campus performance at 3 p.m. Sunday, Oct. 27, in the College of Arts and Architecture School of Music Recital Hall on the University Park Campus.

A special feature of Sunday's concert will be the performance of one piece sung by both the Concert Choir and a number of alumni of Penn State choirs conducted in the 1950s and 1960s by retired professor James Beach. The piece will be conducted by Beach.

Tickets for Sunday's concert are \$2.50 for students and \$4.50 for non-students, available in Room 233 of the Music Building during regular business hours and at the door before the concert.

Behrend film series

The Division of Humanities and Social Sciences at Penn State Erie, The Behrend College, continues its fall 1996 International Film Series at 7:30 p.m. Monday, Oct. 28, with "Ay, Carmela!"

On Monday, Nov. 4, "Yo, la Pasa de Todas (I, the Worst of All)" will show; and "Valentina" will be presented Monday, Nov. 11.

The films selected have all received critical acclaim, and "Ay,

Carmela!" won 13 Goya Prizes, the equivalent of the Spanish Oscar.

All films will be shown in the Reed Lecture Hall, Reed Union Building. For more information contact the Division of Humanities and Social Sciences at (814) 898-6108.

"Annie Get Your Gun"

"Annie Get Your Gun," celebrating its 50th anniversary this year, will be performed at 8 p.m. Tuesday, Oct. 29, in Eisenhower Auditorium on the University Park Campus.

The musical, with music and lyrics by Irving Berlin, thrills audiences with the adventures of trick shooters Annie Oakley and Frank Butler. The production stars Glenn Yarborough and Rita McKenzie.

Tickets are \$32.50, \$27.50 and \$23.50 for non-students and \$27.50, \$23.50 and \$20.50 for students. For more information, contact the Arts Ticket Center, open Monday through Friday, 8:30 a.m. to 4:30 p.m., at (814) 865-0255. Outside the local calling area, phone (800) 278-7849.

Bach's Lunch

The Penn State Clarinet Choir, directed by Smith Toulson, professor of music, will perform at the Bach's Lunch concert at 12:10 p.m. Thursday, Oct. 31, in the Helen Eakin Eisenhower Chapel on the University Park Campus. The free 20-minute concert is part of the Bach's Lunch series sponsored by the College of Arts and Architecture School of Music and the University Lutheran Parish.

The Clarinet Choir consists of 12 clarinetists; all but one are clarinet majors in the School of Music. Audience members may bring their own bag lunches to eat after the concert in the Roy and Agnes Wilkinson Lounge. Coffee and tea will be provided.

Art on the Move

Art on the Move at the North Halls Cultural Lounge on the University Park Campus features "The Return of Jehu" and other oil paintings by Michael Christy until Nov. 1.

Christy, a senior completing his BFA in painting, also has exhibited at Patterson and Zoller galleries, and in downtown State College at the Daily Grid.

"Philadelphia, Here I Come"

The Lyric Theatre of Belfast will perform "Philadelphia, Here I Come" at 8 p.m. Friday, Nov. 1, in Eisenhower Auditorium on the University Park Campus. The play is sponsored by the College of Arts and Architecture's Center for the Performing Arts. It tells the story of a young man on the point of emigrating to the United States from Ireland, and the poignant need he feels to break through the barrier of silence that divides him from his father.

The Lyric Theatre of Belfast has nurtured the talents of the city's playwrights through 25 years of civil unrest. This is the theatre's first production of "Philadelphia, Here I Come" since 1976. Tickets are \$23.50 for non-students and \$19.50 for students. For more information, contact the Arts Ticket Center.

BRYCE JORDAN CENTER

Smashing Pumpkins

Chicago's alternative rock band Smashing Pumpkins, with special guest Garbage, will appear at The Bryce Jordan Center at 7:30 p.m. Friday, Nov. 8. Tickets are available at the Jordan Center Ticket Center, selected Uni-Mart's, Penn State campus outlets in Altoona, Erie, Hazleton and Reading, or by calling (814) 865-5555, or toll-free at (800) 863-3336. Tickets are \$26 for reserved seating.

With a fresh new outlook, Smashing Pumpkins will be promoting a new double CD "Mellon Collie and the Infinite Sadness." The group recently won seven MTV Video Music Awards for its videos, "Tonight, Tonight" and "1979."

Upcoming events

■ **Nov. 2:** Penn State Tailgate Party, four hours before kickoff; tickets \$15 for adults; \$10 for children 12 and under.

■ **Nov. 9:** WYNNONNA with special guest Ty Herndon, 8 p.m.; tickets are \$21, general public, and \$19 for students.

■ **Nov. 15:** World Gold Gymnasium Tour; tickets \$25, \$25 and \$17.50 for adults; children (12 and under) and senior citizens (60 and over) receive a \$3 discount.

■ **Nov. 23:** Penn State Tailgate Party, four hours before kickoff; tickets \$15 for adults; \$10 for children 12 and under.

For a listing of sporting events to be held at The Bryce Jordan Center, or for more information on any event listed here, call the center at (814) 865-5555 or visit the Web site at <http://www.bjc.psu.edu/>.

Kern Exhibit

The Kern Exhibition Area on the University Park Campus will display coin art and jewelry by Claire Allison Rutiser through Nov. 17.

A materials science graduate student, Rutiser combines art and engineering, aesthetics and technology, to mint coins and design her jewelry.

Seven years ago the artist saw a demonstration of medieval coin minting and was fascinated by the elegance and beauty of the process. Rutiser's apprenticeship taught her the great traditions of ancient Celtic and Roman craftsmen.

Rutiser makes her newly minted coins into earrings and necklaces.

The exhibit is free to the public.

Arts

continued from page 1

Art Alley exhibit

Art Alley in the Hetzel Union Building on the University Park Campus features drawings by **Christine Meyers** through Nov. 17. The exhibit includes both portraits and still-life color pencil drawings.

A native of Johnstown, Pa., Meyers has been commissioned to draw portraits of the Pittsburgh Penguins. An award winning artist, she creates sensitive, colorful representations.

Exhibit features Old Main

An exhibit titled "Old Main Through The Years" looks at the many phases of Old Main's history and is now on display in the lobby of Pattee Library on the University Park Campus. Created by the University Archives/Penn State Room, the exhibit features archival photograph reproductions and some relics, including some of the earliest photos dating from 1859 and 1862 through recent photos.

The exhibit will be on display through January. It will move to Old Main in conjunction with the Lion Ambassadors Founder's Day activities in February 1997.

Odyssey Through Literature

On the next episode of *Odyssey Through Literature*, English Professor **Robin Schulze** discusses the friendship between Marianne Moore and Wallace Stevens, two poets caught by "the changing slovenliness of nature." The two poets met early in their careers by reading each other's poetry in magazines. They began a correspondence, through which each learned from the poetry of the other, Schulze said.

Odyssey Through Literature is produced as a continuing education service of the Department of Comparative Literature. It airs Sundays at 6:30 P.M. on WPSU, 91.5 FM.

Exhibits continue

Several exhibitions are continuing at the Palmer Museum of Art on the University Park Campus.

■ **Abstraction to Figuration: Selections of Contemporary Art from the Pincus Collection** brings together 26 works of modern to contemporary art from the collection of **Gerry and David Pincus**. The exhibition includes selections from Jackson Pollock, Andy Warhol, Andres Serrano, Mark Rothko, William de Kooning, Robert Mapplethorpe and other contemporary artists. It continues through Dec. 15.

■ **Cooking for the Gods: The Art of Home Ritual in Bengal** focuses on Hindu ritual activity that expresses the private relationship between the worshiper and the gods in the eastern region of India known as Bengal. The exhibition runs through Dec. 8.

■ **When Coal Was King: Paintings from the Steidle Collection, College of Earth and Mineral Sciences** is an exhibition of 57 paintings, which are part of a collection devoted to Pennsylvania's mineral industries established by **Edward Steidle** during his tenure as dean of the College of Earth and Mineral Sciences, from 1928-1953. It is on view until Dec. 8.

UNIVERSITY PARK CALENDAR

SPECIAL EVENTS

Friday, October 25

■ Palmer Museum of Art, Christoffers Lobby, 2 p.m. Mary F. Linds, Gallery Talk on "The Gods Must Be Hungry."

■ Center for the Performing Arts, 8 p.m., Eisenhower Auditorium. "London Chamber Orchestra." For tickets, call (814) 863-0255. Graduate Student Association, 6:30 and 8:30 p.m., 112 Kern. Film, "Othello," through Oct. 26.

Graduate Student Association, 7 and 9 p.m., 101 Chambers. Film, "Maybe... Maybe Not," through Oct. 26.

Saturday, October 26

University Resident Theatre Company, 2 p.m. and 8 p.m., Playhouse Theatre. "A Cry of Players." For tickets, call (814) 863-0255.

Penn State Panhellenic Council, 3 p.m., Eisenhower Auditorium. Greek Sing. For tickets, call (814) 865-0510.

Awards

Innovative rural nursing partnership is awarded

The Rural Nursing Center Project, a partnership between the School of Nursing in the College of Health and Human Development and the Home Nursing Agency, based in Altoona, Pa., has been selected to receive a 1996 Sigma Theta Tau International Archeon Award.

The Rural Nursing Center Project is one of about 30 model programs nationwide selected for this award which recognizes not-for-profit organizations which are collaborative and innovative, and which contribute to new directions of health care.

The Rural Nursing Project has established two rural nursing clinics in central Pennsylvania — one in Mount Union, Huntingdon County, and another in Port Matilda, Centre County. Services provided include community health surveys, health screenings, health education, physical exams, immunizations, support groups, referrals, acute care and chronic care. The project was established to

address poor access to health care in the region. Rural central Pennsylvania has been designated as both a health professional shortage area and a medically underserved area. The nursing centers are jointly operated and administered by Home Nursing Agency and Penn State.

One innovative aspect of the joint venture uses telecommunications to facilitate professional education and to improve delivery of health care services in rural central Pennsylvania. By audio and video teleconference, electronic mail, facsimile and other computer network systems, communities have increased access to health care information and services.

The collaboration between the School of Nursing and the Home Nursing Agency is supported by a two-year grant of \$325,000 from the Independence Foundation of Philadelphia.

Health and Human Development bestows achievement award

The College of Health and Human Development recently honored Joy L. Lose for her service to the college.

Lose is the recipient of the 1996 Carol Clark Ford Staff Achievement Award, which recognizes outstanding achievement by a staff member who "makes it easier for others to accomplish their objectives effectively and efficiently." The award was endowed by Donald H. Ford, dean emeritus of the former College of Human Development, in honor of his wife, Carol Clark Ford.

Lose has spent all of her 19-year Penn State career in the college. She is currently the assistant to the department head for communication disorders. In addition to providing support for the department head, she monitors department budgets and assists with grants. She also supervises graduate, undergraduate and clinical staff assistants, work study students and wage payroll employees.

Joy L. Lose

Statistical Association names department head as new Fellow

James L. Rosenberger, professor and head of the Department of Statistics, was named a Fellow of the American Statistical Association, a singular honor within the association that recognizes an individual's outstanding professional contribution and leadership in statistical science. Rosenberger was selected for his leadership of a major statistics department, for excellence and innovation in his consulting activities and for his dissemination of knowledge in statistics and statistical computing.

A member of the Penn State faculty in the Department of Statistics since 1976, Rosen-

James L. Rosenberger

berger is head of the department and founding director of the Statistical Consulting Center, which was established in 1982 to provide statistical assistance to researchers in other disciplines and to provide realistic training experiences involving research collaborations for graduate students in statistics.

Rosenberger has served as statistical consultant to many Penn State researchers and to agencies and companies such as Minitab Inc.; Nittany Engineers and Management Consultants Inc.; and the Strategic Highway Research Program. He is the author or co-author of more than 64 publications in the field of statistical science.

Four honored from Cooperative Extension

Two members of the Penn State Cooperative Extension staff are among 84 agents in the United States to receive Distinguished Service Awards from the National Association of County Agricultural Agents, while two staff members received Achievement Awards.

Those honored with Distinguished Service Awards were: William Kleiner, Adams, Franklin and York counties extension agent, and Carol Schurman, Indiana County extension agent; Alan Strock, Lancaster and Chester counties extension agent, and Jeffrey Fowler, Venango County extension agent,

William Kleiner

both received Achievement Awards. The four were cited for "outstanding educational contributions and accomplishments."

Kleiner has been a member of the extension staff for almost 15 years. He was instrumental in the development of a consumer education program on fruit production in southcentral Pennsylvania, which included his video "The All American Apple." He also developed an extensive program on the proper and safe use of agricultural chemicals to protect the

Carol Schurman

environment and the applicator.

Schurman has been a member of the extension staff for 18 years and has developed innovative 4-H programs, helping increase enrollment 104 percent. She introduced 4-H embryology to schools, has formed coalitions with other youth groups, and initiated day camps in agricultural science and environmental awareness.

Strock, a staff member for eight years, provides farm management leadership in

Alan Strock

Chester, Lancaster and southern Berks counties. He led and organized three of the four top-rated Dairy MAP programs in 1995.

Fowler has been a member of the extension staff for a little more than seven years. In that time, he has been instrumental in the development of the Northwest Pennsylvania 4-H Livestock and has helped increase knowledge of basic livestock production.

Jeffrey Fowler

University Libraries seeks applicants for dean

A search committee has been appointed to identify candidates for the position of dean of the University Libraries. The dean is the chief administrative and academic officer of the University Libraries, and reports directly to the executive vice president and provost. The dean is a member of the Council of Academic Deans and is the official representative and advocate for the Libraries, fostering cooperative participation in academic programs, CIC partnership arrangements, consortia, government and grant-sponsored programs and industry relationships.

The University Libraries includes a central library and five subject libraries at University Park and a library at each of 20 Penn State campuses throughout the Commonwealth. Collections include more than 3.75 million volumes, as well as extensive holdings of maps, microforms, government publications, archives, computer databases and audio-visual materials. There are approximately 390 staff, including 87 librarians with full faculty status. The dean has primary responsibility for budgets, strategic planning, personnel resources, leadership of the Libraries' faculty, library automation, fund raising and the development of collections, services and programs.

Candidates should have high-level management experience in a research library, based on in-depth experience in librarianship and including significant experience with integrated library systems and net-

lectual and service missions of its libraries. The successful candidate should have the vision to lead the University Libraries into the 21st century, a record of innovation and demonstrated record of success in fund-raising. It is expected that the dean will have a commitment to and sustained achievement in scholarship and research in librarianship or another discipline, commensurate with a tenured appointment in the University Libraries or one of the University's academic units; and national standing in the profession. A master of library science degree or its equivalent from an accredited program is required; an additional advanced degree is desired.

Nominations, applications and inquiries should be submitted to Susan Welch, chair of the Search

Committee for the Dean of the University Libraries, The Pennsylvania State University, 201 Old Main, Box PSI, University Park, Pa. 16802. Applications and nominations will be reviewed beginning Dec. 15, and will be accepted until the position is filled. If you would like more information on the University Libraries, please refer to the Web pages at <http://www.libraries.psu.edu>.

In addition to Welch, other search committee members include: Deborah F. Atwater, head of the Department of African and African American Studies and associate professor of speech communications; Michael E. Berman, distinguished professor of music; William D. Ensore, undergraduate student; Bonnie J. MacEwan, coordinator of collection development and associate librarian; Deena J. Morganti, associate librarian, Penn State Berks Campus; Linda R. Musser, head of Earth and Mineral Sciences Library and associate librarian; Kaushik Parthasarathy, undergraduate student; Jorge R. Schement, associate dean for graduate studies and research, College of Communications; Harold B. Shill III, head of Heindel Library, Penn State Harrisburg; and Deborah J. Stout, librarian, University Archives/Penn State.

Associate librarians, Penn State Delaware County Campus; and Carol A. Wright, associate librarian, General Reference.

Promotions

Staff

Christian K. Appleman, restricted earnings coach in Intercollegiate Athletics.

Cathy Barefoot, staff assistant V in Continuing and Distance Education.

Rebecca L. Barton, staff assistant VI in Office of Human Resources.

Carolyn Boswell, admissions counselor III at Penn State Delaware County Campus.

Julie M. Brenneman, proposal and grant aide in Research and Graduate Studies.

Chris J. Brown, systems analyst in Computer and Information Systems-Telecommunications.

Mary Anne L. Cahir, associate director II in Division of Development and Alumni Relations.

Vincent R. Carter, staff assistant to financial officer III in Corporate Controller's Office.

Francine M. Cauffman, staff assistant VII in College of Engineering.

Kathleen Cerullo-Frick, business analyst II at The Hershey Medical Center.

Karen M. Detwiler, staff assistant VI in Continuing and Distance Education.

Edward R. Drapcho, staff assistant VI in the Office of Physical Plant.

Craig E. Farrell, manager, network and information systems at the Penn State Altoona Campus.

Marlene R. Gilliland, staff assistant VII at Penn State Mont Alto Campus.

Daniel O. Gordon, advanced engineering aide in Applied Research Laboratory.

Rebecca K. Grager, staff assistant VII at The Hershey Medical Center.

Melissa L. Grimm, admissions officer at Penn State Erie, The Behrend College.

Kathleen M. Gummo, staff assistant VI in College of Earth and Mineral Sciences.

Elizabeth A. Haas, staff assistant V in the Office of Physical Plant.

Scott Harrison, senior extension associate in College of Agricultural Sciences.

Rosemarie Hibbler, staff assistant VI in the College of the Liberal Arts.

Deborah D. Holdren, research technologist in College of Agricultural Sciences.

William T. Hughes, D.U.S. programs coordinator at the Penn State Mont Alto Campus.

Angela D. Janey, financial officer III in Corporate Controller's Office.

Janice K. Kennedy, staff assistant VI in Research and Graduate School.

Lydia A. Kepler, assistant extension agent in College of Agricultural Sciences.

Jolene C. Kost, staff assistant VI in the Office of Physical Plant.

Carolyn A. Kresen, staff assistant IV in University Safety.

Ashoo Kumar, library assistant III in University Libraries.

Clyde F. Le Fevre, manager, production/information services in Computer and Information Systems.

Mindy B. Lutcho, staff assistant VI in Office of Physical Plant.

Amy C. Lutz, staff assistant V at The Hershey Medical Center.

Phyllis A. Martin, staff assistant V at Penn State Abington-Gonzaga Campus.

Robert D. McCaig, director, enrollment management at Penn State Abington-Gonzaga Campus.

Sandra S. McCain, computer support assistant in Continuing and Distance Education.

Kris M. McNeil, staff assistant V in Research and Graduate School.

Margaret B. McNulty, systems coordinator at Penn State Altoona Campus.

Michelle M. Moore, coordinator, oncology program at The Hershey Medical Center.

Gail L. Newcomer, library assistant at The Hershey Medical Center.

Peggy Ketting Oliver, staff assistant IV in College of Agricultural Sciences.

Christine M. Onder, staff assistant VI in the Office of Physical Plant.

Mary J. Peters, computer center specialist I in office of the vice president and dean, graduate education.

Academic Studies Programs/University Learning Resources Center.

Karen L. Schultz, director, Client and Administrative Services in Computer and Information Systems-Telecommunications.

Jerry W. Shirey, network coordinator at Penn State New Kensington Campus.

Sonya J. Shomo, staff assistant VII in Research and Graduate School.

Kathleen M. Simon, administrative assistant at The Hershey Medical Center.

Amey J. Simpson, staff assistant V in Eberly College of Science.

Gwendolyn A. Smith, admissions counselor II at Penn State Abington-Gonzaga Campus.

Heather M. Smith, staff assistant VI at Penn State Abington-Gonzaga Campus.

James T. Campbell, dining hall worker A in Housing and Food Services.

Kathy D. Grubb, grill cook, HUB, Housing and Food Services.

Jo Anne R. Guhier, food preparer A in Housing and Food Services.

Robert F. Korman, store room worker in Housing and Food Services.

Kellie J. La Vanish, snack bar worker B in Housing and Food Services.

Mary B. Myers, snack bar worker B in Housing and Food Services.

Paul J. Nicolini, dining hall worker A in Housing and Food Services.

Sandy B. Notto, maintenance worker, utility, Penn State Dubois Campus.

Phyllis J. Omdorff, food preparer B in Housing and Food Services.

David R. Plummer, general helper-repairer, Housing and Food Services.

Daniel K. Schleiden, food preparer B in Housing and Food Services.

Jeffrey L. Seymour, boiler operator in Office of Physical Plant.

John R. Smith, maintenance worker-utility, Office of Physical Plant.

William W. Stoner, groundskeeper-landscape A in Office of Physical Plant.

Diane M. Wood, residence hall utility worker in Office of Physical Plant.

Robert P. Zelensky, food preparer A in Housing and Food Services.

Private Giving

Agreement between IBM and Penn State yields \$4 million in computer discounts and grants

Penn State and IBM have reached an agreement under which IBM will provide discounts, grants and computer hardware valued at \$4 million. The agreement reinforces a relationship that has lasted more than 40 years.

The University will receive approximately 30 RS/6000s, which are Unix-based workstations; six SP/2 nodes, which provide additional processing power for the University's scalable parallel computer system; and RAMAC II disk storage. The RAMAC II is the leading-edge disk storage for large computing operations such as those of the University and will aid Penn State in consolidating its computer enterprise and in improving its efficiency.

"Penn State is honored to have a continuing relationship with IBM that has yielded such positive results for both parties," said President **Graham B. Spanier**. "The research the University has conducted in the past has led to unique experiences for our students and faculty and has contributed to IBM's technological advances."

L.C. "Buzz" Waterhouse, a 1973 graduate of Penn State and general manager, marketing and business development for IBM, was instrumental in securing the agreement.

With matching dollars from the University, IBM is providing equipment that will support research in the College of Engineering, the Center for Academic Computing, the Eberly College of Science, The Smear College of Business Administration and the Commonwealth Educational System.

A project in the Department of Chemical Engineering will use the IBM RS/6000s to conduct high performance computational studies in such areas as the motion of fluids; turbulence and its effect on the transport of red blood cells near artificial heart valves; the diffusion of large molecules in glassy polymeric solids, which has applications in the development of food storage bags, contact lenses and plastic gas tanks for automobiles; and in the development of a computational framework to support the development of software tools.

"The heavy computational requirements of these projects will test the performance of the IBM hardware and software and will enable Penn State to provide feedback to IBM," said **Anne-Lee Verville**, general manager for Worldwide Education Industry IBM. "The final product of this project will be the development of computer codes that will be used in chemical industries that run on IBM platforms. Most importantly, however, will be the educational experience provided to a large number of graduate and undergraduate chemical engineering students."

A team in the Department of Computer Science and Engineering is working on developing an alternative to individual high-priced machines — a cluster of workstations connected to a network that will provide a high level of computer power at a much lower cost. They will develop analytical tools and simulation models for the network. IBM will be able to use this information in designing their future RS/6000 machines.

While students will benefit from their participation in the research projects, the University will also benefit from the upgraded disk technology. The RAMAC II disk storage will save the University more than 4,000 square feet of floor space and \$350,000 in the annual cost of running the older disk storage system.

According to **J. Gary Augustson**, executive director of computing and information systems, "Because of the extensive cost of replacing old disk technology, the University has been running our central computing systems with very old technology. This agreement has enabled us to replace all of the old disk equipment in both the Center for Academic Computing (CAC) and the Office of Administrative Systems (OAS). The new RAMAC II disk storage is significantly less expensive to operate and significantly smaller than the older technology."

"The RAMAC II disk storage will enable the University to run both the OAS and CAC more efficiently and cost-effectively."

IBM made the gift through its Worldwide Education Industry and a combination of funds from the Shared University Research (SUR) grant program, special promotions, discounts, and matching dollars from Penn State. IBM initiated the SUR grant program four years ago to promote a cooperative research environment between IBM and selected research institutions.

Penn State Behrend receives \$1 million gift from alumnus

Penn State Erie, The Behrend College, has received a \$1 million gift from the Jim and Gerda Benson Family Foundation, an endowment fund established within the Erie Community Foundation.

James O. Benson, a founder and chairman of the manufacturing conglomerate PHB Inc., is an adviser to the endowment. It is the second time the young college has received a million-dollar gift from an alumnus.

"I have been very fortunate," said Benson, who received a degree from Penn State-Behrend in drafting and design technology in 1957. "I think it's important to give back to the community in order to allow others to fulfill their dreams."

Benson made his gift in the hopes of enhancing the College's commitment to working with area manufacturers.

The college will name the fourth and final building in its \$6 million Engineering Complex the **James O. Benson Building** in his honor. Benson joins four other industrialists from the region who have made serious commitments to the complex: **Richard J. Fassmeyer**, chairman and CEO of RJF International Corp.; **Joseph J. Frischak**, president of the PlasteK Group; and **William C. Witkowski**, president of Port Erie Plastics. The atrium connecting the four buildings is named in honor of **Paul and Margaret Roche**. Roche was the founder of Erie Plastics.

Upon graduation, Benson accepted a

temporary position with the Parker White Metal Co. "The 'temporary' position lasted about 37 years," he said.

At the same time, Benson started his own machining company operating in the basement of his home. In 1967, it was incorporated as Reddog Industries. In 1984, Reddog Industries acquired Parker White Metal through a buyout, incorporating under the name of PHB Inc.

PHB Inc. has more than 1,000 employees at three facilities in Erie County, recording annual sales in excess of \$80 million.

During his career, Benson was deeply committed to service activities in the Erie community. He served on the board of directors of both the United Way of Erie County and the Manufacturers' Association of Northwestern Pennsylvania, and held membership in the Elk Valley Rotary.

Benson, founder and first president of the Behrend Alumni Club, received the Penn State Alumni Fellow Award in 1995.

He and his wife, **Gerda**, live in Jupiter Island, Fla., where he was recently named chairman of the board and CEO of Fuelbust International. The company manufactures and markets an environmentally safe fire-fighting material.

Penn State-Behrend officially dedicated the **James O. Benson Building** and the Engineering Complex in a ceremony on Sept. 20.

Getting ready

Danny Thompson and other Office of Physical Plant workers are busy this time of year repairing thermostats so they function properly when the weather turns frosty. Thompson recently worked on the thermostat in 203 Schwab Auditorium on the University Park campus.

Research

Ancient DNA holds key to determining sex of skeletal remains

By ANDREA ELYSE MESSER
Public Information

Unisex haircuts and clothing can sometimes make gender identification difficult, but once the clothes come off, identification is easy. Forensics specialists and archaeologists have not had such an easy time when uncovering human skeletal remains, especially those of young children, but researchers may have a DNA solution to the problem.

"Until recently, the size and shape of bones were the only means of establishing the sex of skeletons from archaeological or forensic contexts," Anne C. Stone, graduate student in anthropology, said. "The ability to recover DNA from bone opens the way for determining sex in cases of juvenile remains or where only bone fragments are recovered."

Some methods of determining gender from DNA studies of the X and Y chromosomes — the so called sex chromosomes — have been developed, but are inappropriate for use in archaeological situations where the genetic material is old and only short segments of DNA can be replicated using current laboratory methods. Some existing methods use gene sequences that are only on the Y or male chromosome. The presence of that sequence indicates that the subject was male, but the absence does not prove that the subject was female.

The researchers, including Stone, George R. Milner, professor of anthropology, Mark Stoneking, associate professor of anthropology, and Svante Paabo of the University of Munich, worked with the amelogenin gene.

"The interesting thing about this small part of the amelogenin gene is that, while it occurs on both the X and Y chromosome, there are fixed differences between the male and female version," Stone said.

Stone looked at DNA samples from 20 adult skeletons. These individuals could be definitively sexed using their cranial and pelvic bone features. She also looked at modern DNA samples taken from blood.

While anthropologists and

George R. Milner, professor of anthropology, and Anne C. Stone, a graduate student in anthropology, piece together a model of a human skull. Their research with Mark Stoneking, associate professor of anthropology, and Svante Paabo of the University of Munich centered on the amelogenin gene.

Photo: Greg Grieco

forensics experts have been determining sex by examining known skeletal differences between men and women for years, this technique will not work for juveniles. The differences that occur between men and women only become apparent after puberty. Experts sometimes also have difficulty definitively deciding on the sex of a skeleton if it falls in the area where the male and female ranges overlap or if only fragments are recovered.

Stone extracted DNA from the modern blood and the ancient bones and, using a process called polymerase chain reaction, isolated the amelogenin segments of the DNA. These isolated segments were then replicated again to increase the amount of DNA available.

The amplified DNA was then tested to determine which form of the amelogenin gene each contained.

"The blind typing of the modern DNA produced 19 correct sex identifications and one that came up female when the sample was labeled male," Stone said. "A second DNA-based sex typing

method was used on the one incorrect sample and it too produced a female result. It appears that this sample was mislabeled in the field and the new method correctly identifies this person's sex."

For the ancient samples, one individual was DNA typed as female when the skeletal examination indicated he was male. This individual's DNA was extremely difficult to extract and the amount was probably insufficient to produce a reliable result. The other individuals were all correctly identified.

There are other DNA tests that can determine sex in living populations when large quantities of DNA can be obtained. However, this method appears to be more sensitive than other DNA methods to very low quantities of DNA, Stone said.

Extracting DNA from ancient or badly preserved bones can be difficult. A method that uses only a minute amount of DNA but reliably produces correct sex types can help in archaeological research and in identification of victims in forensic settings.

Nausea is not the same for everyone

A woman calls her doctor and reports feeling nauseous; she has the morning sickness of pregnancy. A second woman calls her doctor with nausea accompanied by eye pain; she has a migraine headache.

Does the nausea feel the same to both women?

New research suggests that it probably doesn't.

Nausea can be caused by a host of conditions and situations — pregnancy — motion sickness, chemotherapy and migraines, to name a few. The data show that the experience varies widely from one individual to the next.

Nausea has now been scientifically investigated and defined by researchers in a multi-year study of 1,695 Penn State students.

The research shows that nausea means different things to different people, thus an accurate description is central to the diagnosis and treatment of the disease or condition. Researchers have discovered 17 descriptors that define — in a specific and statistically significant way — the feelings that come under the umbrella of nausea.

Depending on the individual, nausea may mean stomach sickness to one person, but another may use it to describe dizziness or lightheadedness.

Lead author of the study Eric Muth, a graduate student in experimental psychology, is conducting his doctoral research at The Hershey Medical Center. He studies gastrointestinal psychophysiology, or how the brain and gut interact.

Extensive testing and statistical studies resulted in a list of 17 descriptors to define nausea. Each of these was rated on a scale of 0 to 9. Based on these ratings, the descriptors were clustered into three groups: somatic or body distress; gastrointestinal distress and emotional distress.

Subjects reported somatic distress as feeling fatigued, weak, hot, sweaty, light-headed, shakiness. Gastrointestinal distress was reported as feeling sick, stomach awareness or discomfort, a feeling as if he or she might vomit, ill, queasy. Emotional distress was reported as feeling nervous, scared or afraid, worried, upset, panic, hopeless.

The authors point out that "The ability to quantify nausea and its dimensions using the nausea profile will allow researchers and clinicians to differentiate what was previously assumed to be a homogeneous state or condition and to focus on appropriate treatments."

Muth collaborated in this study with Dr. Kenneth Koch, professor of gastroenterology in the College of Medicine, and Robert Stern, professor of psychology. Koch and Stern are leaders in the study of nausea and motion sickness.

BookShelf

James A. Bardi is author of *Hotel Front-Office Management*, Second Edition.

Bardi, certified hotel administrator and instructor in hotel restaurant and institutional management at the Penn State Berks Campus, had his manuscript published by Van Nostrand Reinhold, N.Y.

This comprehensive guide covers all aspects of the front office. Each chapter begins with an "opening dilemma" requiring the reader to get involved and take an active role in the industry he or she will soon enter. Case studies, hospitality profiles and a section called "Front Line Realities" illustrate how developing skills will lead to success in the industry.

Francis T. S. Yu, Evan Pugh professor of electrical engineering, is the co-editor of *Optical Storage and Retrieval: Memory, Neural Networks and Fractals*. Volume 54 in the Optical Engineering Series published by Marcel Dekker Inc. This 344-page book was released in June and co-edited by Suganda Jutamulia, general manager of research and development at Kowa Company Ltd., in San Jose, Calif., and associate professor of biomedical engineering at the University of North Carolina, Petaluma.

In order to improve technology in the information age, scientists and engineers like Yu and Jutamulia are attempting to replicate, as closely as possible, human memory. *Optical Storage and Retrieval* provides an overview of the developments made in recent years in optical memory, neural networks and fractals based on the perspectives of engineers and technicians in the field of optical information processing. The book was written by international experts representing the United States, Japan and Russia, and is geared toward optical, electronic and computer engineers; physicists; chemists; materials scientists; and graduate students.

In his introduction to the latest volume in the SPIE Milestone Series, titled *Selected Papers on Linear Optical Composite Materials*, Akhlesh Lakhtakia, associate professor of engineering science and mechanics and editor of the book, uses what he refers to as "alimentary metaphors"—phrases that use food to illustrate the increasing complexity of the materials discussed in the 60 articles that comprise the 720-page volume. The book was published by the International Society for Optical Engineering.

The new volume takes readers through three sections: a general introduction to particulate composite materials and the theories that surround them (dating back as far as 1806); a section on laminated composites; and a final section on cutting-edge research on thin films.

The SPIE Milestone Series was introduced in 1985 to present a limited number of papers written on an important topic warranting a great deal of research and attention.

Carpoolers

■ Carpooler wanted from Continental Courts, Bellefonte, to University Park, starting late November; mainly winter months. Work hours are 8 a.m. to 5 p.m. Call Dave at 863-63116 or 466-2227; or e-mail dwl6@psu.edu or dwlehning@aol.com.

■ Carpooler wanted from Phillipsburg to University Park Monday through Friday. Leave Cold Stream Dam parking area 6:45 a.m. and depart campus at 5 p.m. Call Mary at 865-3632.

For the Record

David J. Eggebeen was misidentified in a story on page 15 of the Oct. 17 *Intercom* due to a reporting error.

Working with the AIDS Quilt in Washington, D.C.

Volunteers include many from our community

Judy Albin, assistant director of East Halls on the University Park Campus, (above) helped unfold a section of the AIDS Quilt Oct. 19-20 in Washington, D.C. Residents of State College, the surrounding community and members of the University faculty, staff and student populations went to Washington in two buses for the event. These locals were some of the more than 10,000 volunteers working on the quilt display.

The quilt, seen in the early morning hours, left, stretches from the Capitol Building to the Washington Monument. Without its walkway, it covers 15 acres and is the size of 14 football fields. At its unfolding, the quilt contained 36,199 panels, weighed 42 tons and represented 11 percent of all AIDS deaths in the United States. More than 2,500 panels were added over the weekend. Organizers have said that because of its size, the quilt will probably not be displayed in its entirety again.

Eight of the quilt's panels will be on display at the Penn State McKeesport Campus from Dec. 5-7. For information about that event, contact the campus health office at (412) 675-9490.

Alumnus named chair of upcoming capital campaign

Penn State alumnus **Edward R. Hintz** has been named chair of the University's forthcoming capital campaign. Hintz is founder and president of the New York investment firm of Hintz, Holman and Hecksher, and an experienced fund-raiser for Penn State. The campaign will aim to raise private funds for scholarships, graduate fellowships, faculty endowments and a variety of academic programs.

"The first step in a successful fund-raising campaign is to recruit capable volunteer leadership, and in Ed Hintz we have the very best," said President **Graham B. Spanier**. "Ed has more than 20 years of experience as a Penn State volunteer and has earned the respect and admiration of our alumni. He also is highly esteemed on Wall Street and can bring to bed an impressive amount of financial expertise on our behalf."

"He is totally committed to advancing our university on every front. I am extremely pleased that he has accepted this critical leadership role."

Hintz previously served as a vice chair of The Campaign for Penn State, a six-year effort that concluded in 1990 after having secured more than \$352 million in gifts for academic programs. He oversaw the campaign's regional major gifts drive.

The new campaign's goal will be announced later, according to Spanier.

Hershey marks 25th anniversary of pediatric unit

From its first days in operation when only two staff members and three physicians were on board to its most recent achievement this year of performing a heart transplant on a child, The Milton S. Eversley Medical Center's pediatric services unit has grown and expanded to meet the needs of central Pennsylvania families. In a celebration this month, the medical center marked an important milestone: For the last quarter of a century, it has been providing care for children in need.

By **LISA M. ROSELLINI**
Public Information

When Dr. **John H. Dossett**, professor of pediatrics, looks back on his 25-year career as a specialist in pediatric infectious diseases at The Hershey Medical Center, he marvels over the advances made in medicine since Hershey's pediatric unit opened in 1971. But Dossett also observes that in that same time period, while gains in some areas were being made, many new diseases dramatically changed the face of medicine.

"We've seen the development of vaccines for illnesses that at one time meant certain death," Dossett recalls. "We started out 25 years ago taking care of

Couple gives \$2.5 million to endow program

Penn State alumnus **William E. Leonard** and his wife, **Wyllis**, have designated \$2.5 million to endow the **William and Wyllis Leonard Honors Program** in the College of Engineering. The program consists of merit-based scholarships designed to attract and retain outstanding undergraduate engineering students.

University benefactors for more

than 20 years, the Leonhards' most recent gift is the sixth major endowment they have established.

In 1992, they endowed the Leonard Chair for the Enhancement of Engineering Education with a \$10 million gift, the largest gift ever received by the College of Engineering. They also created the Jeanne Leonard Endowment in Education in honor of

their daughter, the Richard W. Leonard Chair in Aerospace Engineering in honor of their son, the William E. Leonard Professorship in Engineering and the William E. Leonard Chair in Engineering.

Students selected as Leonard Scholars will receive a \$2,500 cash award per semester for up to eight semesters, personal attention through

a special mentoring program from faculty and industrial mentors and the opportunity to develop leadership skills by participating in the Engineering Leadership Development Minor and activities of the Leonard Center.

The program is to begin in the fall of 1997 with a pilot group of students,

Awards

Two receive Eberly distinguished service award

Nancy E. Killeen and Gary L. Mullen are the recipients of the 1996 Eberly College of Science Alumni Society Distinguished Service Award, the alumni society's highest honor.

Established in 1979, the Distinguished Service Award is presented annually to individuals who have made exceptional service and leadership contributions to the college and/or its alumni society.

Killeen, manager of staff services in the Department of Chemistry, began her Penn State career in the Department of Data Processing in 1962. She has held a variety of positions and in 1982 joined the Department of Chemistry as an administrative aide. In her current position, she is responsible for supervising a majority of the departmental staff, overseeing all departmental finances, and managing the department's finances.

She was honored on behalf of the University in 1996 with a certificate for her "extra contributions to research and scholarly productivity." Killeen has served on several University committees and teams and is now a member of the planning committee of the Eberly College of Science and a University-wide continuous quality improvement

Nancy E. Killeen

Gary L. Mullen

team. She also is a Penn State student majoring in parks and recreation management and a member of the Alpha Sigma Lambda honorary society for returning adult students.

Mullen, associate chair of the Department of Mathematics, was honored for his more than 20 years of outstanding service to the Eberly College of Science. As the college's first assistant or associate dean to have held a position at a Penn State

campus, he contributed a thorough understanding of the challenges facing Commonwealth Campus faculty and was effective in encouraging them to undertake research projects.

After receiving his Ph.D. from Penn State in 1974, Mullen became an instructor at University Park. He was promoted to assistant professor of mathematics at the Penn State Shenango Valley Campus in 1975 where, after being promoted to associate professor in 1979, he remained until 1982. He was named assistant dean of the College of Science for Commonwealth Campuses and Continuing Education in the spring of 1982, professor and acting associate dean for research in 1989, and later that year associate dean for research, continuing education and commonwealth education. He became associate chair in the Department of Mathematics in 1995.

He has published more than 80 research papers related to finite fields and their many practical applications in information science and is regarded as an international expert in these areas. Mullen is founding editor-in-chief of *Finite Fields and Their Applications*, associate editor of *Designs, Codes and Cryptography*, and assistant editor of *Fibonacci Quarterly*.

Chemistry senior lecturer honored for teaching excellence

Robert David Minard, senior lecturer in chemistry and director of the Mass Spectrometry Facility and Organic Chemistry Instructional Laboratories, is the recipient of the 1996 C. I. Noll Award for Excellence in Teaching. Sponsored by the Eberly College of Science Student Council and Alumni Society, the award is the college's highest honor for undergraduate teaching. The recipient is chosen by a committee of students and faculty from nominees suggested by students, faculty and alumni.

Minard has made major contributions to the improvement of the organic chemistry laboratory instructional program, developing new courses ranging throughout the chemistry curriculum and restructuring existing courses. Among his major achievements are the establishment of an undergraduate Chemistry Resource Center Instruction Room, changes in course structures to allow the hundreds of students taking organic chemistry each semester to have access to modern instrumentation,

increased accessibility to modern computer resources and implementation of collaborative learning experiences. In 1993, he guided the \$2 million renovation and modernization of the organic laboratories.

An expert in molecular analysis by mass spectrometry, his research involves a diverse range of analytical problems.

He earned his bachelor's degree in chemistry at St. Olaf College in 1963 and his doctoral degree from

Robert David Minard

the University of Wisconsin in 1968. He joined Penn State in 1973 as a lecturer in chemistry and director of the Mass Spectrometry Facility. In 1988 was appointed director of the Organic Chemistry Instructional Laboratories and in 1996 was appointed senior lecturer in chemistry.

Minard is the author or co-author of more than 76 research publications, plus the laboratory guides and instructor's manuals for the Penn State organic laboratory courses. Among the accolades he has received are the Provost's Award in 1996, the Alumni Society Distinguished Service Award in 1994, the Schreyer Institute for Innovation in Learning Teaching Fellowship in 1994 and the duPont Teaching Award in 1994.

Minard is a faculty fellow of the Schreyer Institute and is involved with the Center for Bioremediation and Detoxification.

Associate professor at DuBois earns grant for picture book writing

Richard Kopley, associate professor of English at the Penn State DuBois Campus and assistant head of English for the Commonwealth Educational System, recently received a Barbara Karlin Grant for picture book writing from the Society of Children's Book Writers and Illustrators.

The unpublished book, *The Remarkable David Wordsworth*, is set in a second grade classroom and concerns a boy who invents new compound words, causing new creatures and things to appear. It is targeted to an audience of 5- to 10-year-old children. Kopley is currently working on a sequel, *David Wordsworth Goes Too Far*.

Five Cooperative Extension agents are honored

Five extension agents in the College of Agricultural Sciences received awards from the National Extension Association of Family and Consumer Services. Beth Van Horn, Centre County extension director, received the Distinguished Service Award, which recognizes excellence in programming at

the state level. Nancy Covert, extension agent in Jefferson County, and Andrea Bressler, senior extension agent in Clearfield County, received the Florence Hall Award, which recognizes outstanding accomplishments of NEAFCS members. Natalie Ferry, extension agent in Union County, and

Michelle Rodgers, assistant to the Southeast Regional Director, received the Continuing Excellence Award.

Rodgers also received the Grace Frisinger Award, which gives extension home economists funds to study family living education in other states or countries.

Assistant professor earns Young Investigator Award

Shizhuo Yin, assistant professor of electrical engineering, has been selected to receive the Army Research Office's Young Investigator Award. The award supports research by exceptional

scientists who have held a doctorate for fewer than five years and provides the recipients with a three-year financial award to support research in fields critical to the Army that

will also benefit civilian manufacturing industries. Yin will continue to conduct research on a novel multiple aperture system for surface roughness measurements.

Campaign

continued from page 1

"We will certainly attempt to secure a far greater total than we did during our first campaign and involve more Penn State students as well," Spanier said.

"We will set our goal after we have completed the advance gifts phase. At that time, we will launch the campaign formally, announce a goal and invite all of our alumni and friends to participate."

Hintz's fundraising experience also includes leading the campaign to raise \$20 million in private funds—ultimately raising nearly \$23 million—to help build the 16,500-seat Bryce Jordan Center. He and his wife, Helen, were members of the leadership committee recruited by head football coach Joe Paterno and his wife, Sue, that raised \$14 million in gifts for the Paterno Library addition at the University Park Campus.

Earlier this year, Hintz concluded a three-year term as chair of the National Development Council, Penn State's top fund-raising advisory body. During those three years, the University received about \$245 million in private support. The council will be succeeded by an executive committee charged with providing the campaign's volunteer leadership.

Hintz said the campaign has the potential to affect future generations of students and faculty in a profound way, and is a tremendous challenge for both him and the University.

"My first task is to work with the president and our professional development staff to identify members for the new executive committee. This committee will form the core of the campaign's volunteer leadership," Hintz said. The new chairman will announce the members of the committee as they are recruited throughout the next six to nine months.

A Reading native, Hintz graduated from Penn State in 1959 with a bachelor's degree in finance. He began a career as an investment manager and analyst and worked for several top firms in the securities field before founding his own firm in 1975. *The Wall Street Journal* recently described Hintz, Holman and Hecksher as having achieved the second best investment record of all firms managing portfolios of \$100 million or more over the last five years.

The Hintzes' philanthropic support to the University has reflected their broad range of interests. They have endowed scholarships in the College of Health and Human Development and the School of Music. They have supported both undergraduate and graduate education, made substantial gifts to the Penn State Berks Campus, the University Libraries and The Bryce Jordan Center.

Ed Hintz was elected to the University's Board of Trustees in 1994, and also serves on The Smear College of Business Administration's Board of Visitors. The Smear College named him an Honorary Fellow in 1982. In 1992, Penn State named him a Distinguished Alumnus, the highest honor it bestows on its graduates.

Edward R. Hintz

Gift

continued from page 1

and the Leonard Honors Program endowment will be fully operational and supporting 25 students annually by the year 2006.

William Leonard graduated from Penn State in 1936 and earned a master's degree from M.I.T., both in electrical engineering. He completed a 28-year military career that began in the U.S. Army Corps of Engineers and ultimately led him to the position of chief of staff, Headquarters System Command, at Andrews Air Force Base in Maryland. At his first retirement in 1964, he held the Air Force rank of brigadier general, then began a civilian career with the Parsons Corp. in Pasadena, Calif.

In 1990 he retired for the second time as chair and chief executive officer from Parsons, a leading international engineering firm.

In 1982 Leonard was elected to the National Academy of Engineering and was named a Penn State Distinguished Alumnus. In 1988 he was hon-

Hershey

continued from page 1

children with leukemia expecting none would live and now 70 percent will be cured. But on the other hand, we're seen the extreme. We've gone from no HIV to a large number of children being treated for AIDS."

Dossett, who still practices at the medical center, has stayed at Hershey for over two decades because of the "exceptional cadre of clinical and research specialists" that founding dean Nicholas M. Nelson brought together. Nowhere else in the region could parents find the specialists that Hershey could provide.

What started 25 years ago on unsure footing due to a budget freeze at the University that imposed staffing limitations, has grown into a 120-bed Children's Services facility — now known as the Penn State University Children's Hospital — and a nationally renowned pediatric cancer research center.

When it first opened in 1971, financial constraints allowed only 26 of 66 beds to be used. But the need for pediatric care in central Pennsylvania was great. Hershey's unique location in the rural part of the state and near a large, established Amish community made its contributions even more significant. Dossett recalls that, while the rest of the nation believed childhood polio was eradicated, he was treating the last known case in the United States.

"There was and is not another center in this part of the state that can offer the research and clinical services for children that this center does," he said.

As the demand for services grew, the pediatric unit put all of its beds into service and made plans to expand. By 1973, the Neonatal Intensive Care Unit (NICU) was opened, operating as a regional referral center for premature infants in a 14-county region. In July 1976, the region's need for neonatal intensive care prompted an \$87,000 expansion project that increased the NICU's bed capacity from 17 to 26. With an average of 18 patients daily, the unit had been pushed beyond its capacity for more than a year.

Today, nearly 80 full-time faculty physicians are involved in patient care at the Penn State University Children's Hospital. The hospital, which provides comprehensive services for infants, children and adolescents through the age of 18, has inpatient facilities that include: 34 acute care beds; a 12-bed pediatric intensive care unit; a 30-bed neonatal intensive care unit; a 14-bed pediatric intermediate care unit; a 16-bed child psychiatry unit; and 16 beds in the University Hospital Rehabilitation Center.

ored as a Penn State Alumni Fellow. He was a member of the National Development Council, the University's highest level fund-raising advisory board, and is a founding member of the Leonard Center advisory board.

Wyllis Leonard has made her family and community her career. This has involved raising their three children, spending thousands of hours volunteering in scouts, PTAs and at the Huntington Memorial Hospital in Pasadena, and keeping their "mental hospital" of 37 moves they've made in the 57 years she and her husband have been married.

Since their retirement in 1990, the Leonhards have been enjoying traveling, focusing on their philanthropy, visiting their children and also becoming reconnected with Penn State. In 1993 they returned to State College to live permanently.

Two of the Leonhards' three children are Penn State alumni.

"The hospital has just gone through a tremendous period of growth," Dr. Ronald L. Poland, chairman of the Department of Pediatrics, said. "This past year we did our first heart transplantation in a child. Liver and bone marrow transplants are on the drawing board. We will be involved in gene therapy when that becomes available and we are always striving to stay on the leading edge."

Poland, who is also physician-in-chief for the University Children's Hospital, said in the last six years alone, the hospital has added pediatric specialists in a variety of areas from cardiology to urology. The center is also reaching a wider geographic area than ever before. In 1995, doctors at the pediatric facility saw close to 50,000 children on an outpatient basis, while about 3,700 children were admitted for treatment. These numbers do not include the children who sought rehabilitation or psychiatric services.

Plans for the future, according to Poland, involve expanding into communities that have been identified as needing care. Already, the University Children's Hospital has opened subspecialty clinics in Allentown, the Centre Region, the Scranton/Wilkes-Barre area and York.

"Outside of the major cities in Pennsylvania, we have the only subspecialties in many areas like oncology and urology," Poland said.

"A big thrust for the coming year will be for us to meet people on their home ground, to make it more convenient for them to get to us. It's been shown that people who are experts in the care of children get better results when treating children than those who are general physicians."

But the Penn State University Children's Hospital is not about care. It's also about prevention. Many ongoing research programs at Hershey involve finding the causes of debilitating childhood ailments, like Dr. Robert C. Vannucci's five-year study funded by the National Institutes of Health. Vannucci is working on discovering the mechanisms that lead to brain damage in newborns. Last year, researchers at the University Children's Hospital garnered about \$3 million in research and service grants.

In addition to the care and research aspects of the University Children's Hospital, the facility also serves as the central teaching base for comprehensive general pediatric residents.

"We have made great strides in so many areas," Poland said. "We are on the ground floor to test improvements that will help children live happier, healthier lives. We're learning to do things better."

"A big thrust for the coming year will be for us to meet people on their home ground, to make it more convenient for them to get to us."

Dr. Ronald L. Poland,
chairman, Department of Pediatrics

LECTURES

Retired major general to talk about Hispanics in military

Major Gen. Leo Marquez, U.S. Air Force, retired, will be the featured speaker in a panel discussion of "Hispanics in the Military," at 7 p.m. Monday, Nov. 4, in the Paul Robeson Cultural Center on the University Park Campus.

Col. Robert D. Phillips, professor of aerospace studies at Penn State, and Cadet Oswaldo Rodas, a student in aerospace program, will join him in the discussion, part of Hispanic Heritage Month.

Among his many assignments, Gen. Marquez served at Bitburg Air Base, Germany, and McChord Air Force Base in Washington before being assigned to the 3rd Tactical Fighter Wing, Bien Hoa Air Base in Vietnam. He was then selected for exchange duty with the Canadian Forces in Ottawa, and served in management positions at various Air Force

bases before being named lieutenant general and then major general, as deputy chief of staff for logistics and engineering, U.S. Air Force, in Washington, D.C.

Marquez has received numerous awards, including the Legion of Merit with one oak leaf cluster, a Bronze Star Medal, and Air Force Commendation Medal with one oak leaf cluster. He also received the Air Force Association's Executive Management Award in 1977 and, in 1978, was named a distinguished alumnus from New Mexico State University where he had received his bachelor's degree in zoology.

Marquez received an MBA from The George Washington University, completed Air Command and Staff College at Maxwell Air Force Base and attended an advanced management program at Carnegie Mellon University.

Workshop discusses options for high school graduates

Kenneth Gray, professor of education and co-author of *Other Ways to Win: Creating Alternatives for High School Graduates*, will be the keynote speaker at "Choosing the Right Future," a day-long workshop for parents, teachers and counselors to be held Saturday, Nov. 9, at the Penn State-Scranton.

In his book, Gray said that a majority of high school students are academically ill-equipped to handle the rigors of a four-year baccalaureate program. He exposes what he refers to as the "one way to win" mentality that a four-year degree is the only way to ensure a bright future, and provides sensible, cost-effective alternatives.

Terry Borg, Continuing and Distance Education program planner and former director of student services at the University of Wisconsin, will join Gray at this daylong exploration of

postsecondary education choices. Borg will provide an overview of a variety of choices for graduating high school seniors; examine ways to be a critical consumer of postsecondary education and training; and take participants on the application and admissions process, and information on types of education and training sites.

Geoffrey J. Harford, director of admissions services and evaluation; Ro Nwraniski, student aid adviser; and Paul Simenson, assistant director of financial aid, will provide practical advice on the application and admissions process, and information on applying for placement activities and applying for funding.

For more information about program content, call Borg at (814) 865-7679. To register, call Lori Benson at (814) 865-0229. To receive a free brochure, call (800) PSU-TODAY.

Exactly how do we use all of our time?

John Robinson, a national expert on Americans' use of time, will give a talk, "Why Americans Are Working Fewer Hours But Think They're Working More," at 9 a.m. Tuesday, Nov. 5, in 112 Buckhout Lab on the University Park Campus. The talk is sponsored by the recreation and park management/leisure studies program.

Robinson, who is a member of the Department of Sociology at the University of Maryland, is director of the Americans' use of time project. For more than 30 years, he has directed time diary studies with national samples of the American public to monitor changes in time use and the patterns of daily life. Robinson also is associate editor of *American Demographics* magazine.

Marker Lectures' focus to be genetics Nov. 5-7

Joan Steitz, a professor in the Department of Molecular Biophysics and Biochemistry at Yale University, will give the 1996/97 Marker Lectures in Genetic Engineering from Nov. 5 to 7 on the University Park Campus.

The three-lecture series is sponsored by the Eberly College of Science and is open to the public.

The lecture schedule includes: "Lupus, Snurps and Genetic Nonsense" at 8:30 p.m. Tuesday, Nov. 5, in 101 Thomas Building; "The Cell Nucleolus: Yet Another RNA Machine?" at 6 p.m. Wednesday, Nov. 6, in 102 Thomas Building; and "A Novel Spliceosome Excises Rare AT-AC Introns" at 11:15 a.m. Thursday, Nov. 7, in 204 Thomas Building.

A member of the Yale faculty since 1970 and currently the Henry Ford II professor of molecular biophysics and biochemistry, Steitz has made outstanding contributions to the field of molecular genetics.

Significant findings emerged from Steitz's work as early as 1967, when her Harvard Ph.D. thesis led

Joan Steitz

to important early insights about how the protein and nucleic-acid components of viruses come together.

In 1970 she accepted a position as assistant professor of molecular biophysics and biochemistry at Yale and became full professor in 1978. She established a laboratory at Yale dedicated to the study of RNA.

In 1979, Steitz and colleagues through in the understanding of how RNA is spliced. Currently she leads the Molecular Genetics Program in the Boyer Center for Molecular Medicine and is an investigator of the Howard Hughes Medical Institute.

Steitz's achievements have led to a host of honors, including the Pasano Foundation Young Scientist Award in 1975, the National Medal of Science in 1986, and the Radcliffe Graduate Society's Medal for Distinguished Achievements in 1987.

The Marker Lectures were established in 1967 through a gift from the late Russell Earl Marker, professor emeritus of chemistry.

Changing steel industry and opportunities to be discussed

"The Changing Steel Industry: Opportunity Knocking," will be the subject of a seminar presented by Richard M. Wardrop Jr., president and chief operating officer of AK Steel Corp., Middletown, Ohio, at 4 p.m. Monday, Nov. 4, in room 301 Steidle Building on the University Park Campus.

Today, AK Steel is recognized for extraordinary efficiency, product quality and customer service as well as industry-leading profitability. In 1992, when Wardrop arrived as vice president of manufacturing, the company was on the verge of financial failure. Since the first quarter of 1994, the company has set the pace for U.S.-rated steel making in operating income per ton. AK Steel's plants produce coated and cold-rolled steel

products for applications in the automobile, appliance, construction and manufacturing industries, with annual sales of \$2.3 billion in 1994.

In April 1994, Wardrop was named president and in May 1995 he also became CEO. Wardrop is a 1968 graduate of Penn State in metallurgical engineering. Wardrop received the David and Lucile Packard Award for distinguished achievement in metallurgy from the Penn State chapter of ASM International in 1995 and was named a Centennial Fellow of the College of Earth and Mineral Sciences.

The seminar is part of the Metals Science and Engineering 590 Seminar Series coordinated by Tarasankar DebRoy, professor of metallurgy.

Forum topic is "Latinos in the Media"

Three area journalists and a leader in the Hispanic community will be featured in an open forum on "Latinos in the Media" on Nov. 14 at noon at the Penn State Harrisburg Eastgate Center.

The presentation will feature Lillian Escobar-Haskins, chair of the Public Policy Committee of the Board of Directors of the National Puerto

Rican Coalition; Richard Kearns, political journalist with *El Hispano*; John Kirkpatrick, editor of the *Harrisburg Patriot/News*; and Efrin Roche, editor of *Community Focus*.

The open forum is free to the public. To register, call the Penn State Harrisburg Eastgate Center at (717) 772-3590. The Eastgate Center is located at 1010 N. Seventh St. in Harrisburg.

More Lectures

Feminist Scholars talk Nov. 1

Iris Young, professor of public and international affairs at the University of Pittsburgh, will be the second speaker in the Women's Studies Feminist Scholars Series. Her talk will be held at 7:30 p.m. Friday, Nov. 1, in 101 Kern Building on the University Park Campus. The title of her talk will be "Should Feminists Respect the Ideal of Home?" All faculty and students may attend.

Lecture to examine media coverage of the elections

Jeff Cohen, founder and executive director of Fairness & Accuracy in Reporting (FAIR), a New York-based media watch organization, will present a lecture titled "Media Coverage of the Election" at 7 p.m. Monday, Nov. 4, in the Study Learning Center at the Penn State Worthington Scranton Campus. The lecture is free.

Cohen's weekly syndicated column for Creators Syndicate and Alternet appears in more than a dozen daily newspapers. His commentaries have also appeared in *USA Today*, the *Los Angeles Times*, the *Boston Globe* and the *International Herald Tribune*. He has contributed to many books and is the co-author of *Adventures in Medialand: Behind the News, Behind the Pundits*.

For more information about the lecture, call (717) 960-4311.

Nov. 7 lecture to analyze elections

The Penn State Downtown Center in Harrisburg will sponsor "Election '96: The Spinductors Speak" from noon to 1:30 p.m. Thursday, Nov. 7.

A panel of Pennsylvania pundits will put their spin on the election and discuss the implications for 1998 and beyond. Panelists include Republican state Rep. David Argall; Mark Singel, chairman, Penn State Democratic Committee; and Robert Bresler, professor of public policy at Penn State Harrisburg. Michael Young, director of the Survey Research Center at Penn State Harrisburg, will moderate the discussion.

A question-and-answer period will follow the discussion. Light refreshments will be served. Reservations must be made by Nov. 1. For more information or to register, call (717) 783-0433.

Series spotlights quantum gravity

The most promising young researchers in the field of quantum gravity will give a series of free public lectures on Friday, Nov. 8, and Saturday, Nov. 9, during the 4th Annual Penn State Conference on Gravitational Physics.

The lectures, sponsored by the Penn State Center for Gravitational Physics and Geometry, include these lectures on Friday, Nov. 8: "Progress Toward LIGO: A Suspended Power Recycling Interferometer Prototype" by Gabriela Gonzalez of the Massachusetts Institute of Technology at 9 a.m.; "Beating Supercomputer: Perturbation Approach for Close Black Hole Collisions" by Hans-Peter Nollert of Penn State at 9:50 a.m.; and "Kinematics and Dynamics of Null Foliation" by Simonetta Frittelli of the University of Pittsburgh at 11:10 a.m. More lectures follow on Saturday.

For additional information, contact Karen Brewster at (814) 863-9605 or e-mail karen@phys.psu.edu.

Presentation on land-use Nov. 12

Kelleann Foster, associate professor of landscape architecture at Penn State, will give a multimedia presentation on land-use issues and urban/regional planning and development on Tuesday, Nov. 12, as part of the Penn State Berks Campus' "Breakfast with Penn State Series."

The talk, to be held in the Perkins Student Center Theatre, is titled "Is Berks County in Danger: The Police Report" and will begin at 8 a.m.; continental breakfast will be served at 7:30 a.m.

Foster holds a master's degree in landscape architecture from the University of Massachusetts. Before beginning full-time teaching and research in 1989, Foster worked at McCloskey and Faber, P.C. near Philadelphia, where her work included all aspects of planning and design. She also taught part time at Temple University in the Department of Landscape Architecture and Horticulture. Her research interests include community design and planning and her most recent work focuses on using computer technologies and image manipulation to communicate alternative community design scenarios.

To reserve a seat for this free talk, please call (610) 320-4899.

Talk gives prognosis for decade

Another lecture in the "Prognosis for the Decade: The Future of Health and Disease in Pennsylvania" series offered by The Hershey Medical Center is set for 8 to 9:30 a.m. Tuesday, Nov. 12, at the Penn State Downtown Center in Harrisburg.

"The Elderly: In Sickness and in Health" will be presented by Dr. David Barnard, professor and chair, Department of Humanities, Hershey Medical Center. The ongoing series is designed to inform members of the state Legislature, state government agencies and those involved in health care policy about projections on health and disease throughout Pennsylvania in the near future.

All sessions are free to the public, but registration is required. To register, call the Penn State Downtown Center at (717) 783-0433. A continental breakfast will be provided.

Future of Christianity at Berks

"One Nation Under... American Christianity in the 21st Century" will be held at 4:30 p.m. Tuesday, Nov. 12, in the Perkins Student Center Theatre on the Penn State Berks Campus.

Brenda Brasher, assistant professor of religion and philosophy at Mount Union College in Ohio, will discuss how America has enjoyed religious peace and diversity for centuries, helped by the advent of denominationalism — an innovative organizational strategy that provided intra-group identity and toleration.

The lecture will present a profile of a simmering late 20th-century American Christianity, describing correlations between the factors that threaten its unity and socio-cultural changes that are under way in the United States.

Brasher earned her bachelor of arts degree from Indiana University, her master's degree from Christian Theological Seminary and her doctorate from the University of Southern California. She also studied at the United Theological College in Bangalore, India.

Seminar gives insight on climbing scientific ladder

"Capitalizing on One's Abilities: Moving Up the Scientific Ladder" will be the subject of a seminar by Catherine Jay Didion, executive director, Association for Women in Science, at 2 p.m. Thursday, Nov. 7, in room 305 of the Hetzel Union Building on the University Park Campus.

Didion has been executive director of the more than 6,000-member AWIS since 1990.

She has written about women and science for a range of publications and writes a bimonthly column, "Women in Science," for the *Journal of College Science Teaching*. She is currently the chair of the environment and science task forces for the Coalition for Women's Appointments and has worked closely with the Clinton administration to facilitate the appointment of women scientists to high-level federal positions.

AWIS, with 74 local chapters across the country, undertakes undergraduate and graduate mentoring programs supported by the Alfred P. Sloan Foundation and the National Science Foundation. The organization also has published a number of books on mentoring, including *A Hand Up: Women Mentoring Women in Science and Mentoring Means Future Scientists*.

The seminar is sponsored by the Women in the Sciences and Engineering Institute, the Science, Technology and Society Program and the Equal Opportunity Planning Committee.

Biology professor to give several lectures Nov. 6-7 at University Park

Marlene Zuk, professor of biology at the University of California, Riverside, will give several lectures on the University Park Campus in November. On Nov. 6 at 4:30 p.m. in 118 Willard Building, Zuk will discuss "Sex Differences and Evolution: Notes of a Darwinian Feminist," at 3:30 p.m. Thursday, Nov. 7, in 106 Boucke, she will talk about "Singing Under Pressure: Acoustically-Orienting Parasitoids and their Cricket Hosts," and at 7 p.m. that same day, she will discuss "Women in Academic Science" in 12 Sparks Building.

Zuk, who received her B.A. at the University of California, Santa Barbara and her Ph.D. from the University of Michigan, conducts research on animal behavior, particularly mate choice and the evolution of sex differences; and the effects of parasites on host ecology and behavior. More recently, her long-standing commitment to feminism has dovetailed with her academic interests, particularly the relationship between feminism and science.

Her visit is sponsored by the Penn State Chapter of Sigma Xi, the Scientific Research Society, the Ecology Seminar, STS, Women in Science and Engineering (WISE) and the Women's Studies Program. For more information about the lectures, call Pat Gong at (814) 863-9963.

Catherine Jay Didion

News in Brief

Lunchtime round-table discussion

Thomas Berner, professor of journalism and American studies in the College of Communications, will discuss "Early Chinese Rubbings: Precursor to Written Communications" and lead a lunchtime round-table discussion hosted by the Penn State Chapter of the National Association of Science Writers, at noon Wednesday, Oct. 30, in room 114 Kern Building. While in China, Berner became interested in these carvings that are rubbed and are a proto-printing method.

NASW lunchtime programs are open to anyone interested in science communication. For more information, contact A'ndrea Messer at aem1@psuvm.psu.edu.

Free blood pressure screenings

Faculty/Staff Health Promotion will be offering free blood pressure screenings at the Benefits Open House on Wed., Nov. 6, from 8 a.m. to 4 p.m. in 101 Kern Building.

Health promotion programs

To register for the following programs, contact Jan Hawbaker at (814) 865-3085 or jqh3@psu.edu:

HIV/AIDS: Spread Facts, Not Fear Workshop

This workshop is aimed at preparing faculty and staff to become members of the University's "You Can Ask Me About AIDS" Network. Established by the Penn State HIV/STD Consortium, the network consists of people who voluntarily serve as points of contact for faculty, staff and students who have questions and concerns about HIV and AIDS. The workshop will enable participants to become more comfortable sharing factual information about HIV/AIDS and identify campus and community resources for needs related to HIV/AIDS. Upon completion of the workshop, participants may decide if they wish to become members of the network. Workshop meets Tuesday, Nov. 12, from 1-4 p.m. in 16 Ritenour Building. Cost: none.

Osteoporosis

During this brown-bag discussion, learn how this debilitating condition can be prevented, or its effects minimized. Diagnostic procedures, availability of pharmacological or physical therapies, and ways to cope with a diagnosis of osteoporosis also will be discussed. Meets Thursday, Nov. 7, from noon-1 p.m. in 110 Henderson Building (The Living Center). Cost: free.

Cardiovascular risk appraisal

The next open session of the Know Your Numbers Program is Friday, Nov. 15, in 101 Kern Building. Program includes screenings for blood pressure, body mass index and total and HDL cholesterol, as well as an explanation of results. Cost is \$15, reimbursable to HMO participants. To schedule an appointment, contact Jan Hawbaker at (814) 865-3085 or JQH3@psu.edu.

Volunteers still needed for transportation study

The Pennsylvania Transportation Institute is still recruiting volunteers to participate in a lateral acceleration research project. The study is designed to analyze how comfortable individuals feel while driving around curves in the roadway. Subjects between the ages of 35 and 45 are needed for day-time testing. Participants will earn \$20 for a one-hour testing session. For more information, contact Bryan Hanover at (814) 863-1044 or via e-mail at bsh118@psu.edu.

University takes over former Naval laboratory

When L. Raymond Hetche, director of the Applied Research Laboratory, signed a lease Oct. 18, above, the former Inertial Navigation Facility, shown at right, officially became the University's Navigation Research and Development Center.

The center, located in Warminster, Pa., is bonded to bedrock to allow sensor calibration at accuracies unattainable anywhere else in the world.

The center will continue to serve the Navy's needs but also will be available for the first time for non-Department of Defense use, including ARL research on undersea technology.

Faculty/Staff Alerts

LIAS seminars

The University Libraries is offering the following series of seminars for November. To register or learn more about the seminars, send an e-mail to signuip@psu.las.psu.edu.

If you have any additional questions, contact Doris Herr at (814) 863-0325. Information on the seminars can also be found by typing HELP:WORKSHOP when using LIAS or on the Libraries' Web site at <http://www.libraries.psu.edu>. All sessions take place in Tower Room 402, Central Pattee Library.

Penn State Libraries Catalog in LIAS

This seminar offers an overview of the TAC in LIAS and hands-on practice in applying LIAS searching techniques. Nov. 13 from 3-5 p.m.; or Nov. 4 from 1-3 p.m.

Congress and the Legislative Process on the Internet

This seminar provides a general introduction to electronic resources related to the lawmaking activities of Congress. Included are resources for tracking bills

and laws, and the legislative process. Nov. 14 from 8:30 - 10 a.m.

Electronic Text in the Humanities

Participants will receive an overview of textual humanities databases available on the Internet and on CD-ROM and an introduction to the Electronic Text Center in Pattee Library. Nov. 12 from 10 a.m. - noon.

Engineering

This seminar features practice in accessing and searching databases and resources available for research in engineering. Nov. 7 from 3-5 p.m.

Literature Resources on the Internet

Nov. 20 from 10 a.m. - noon.

Music - electronic resources

Nov. 8 from 10 a.m. - noon.

Women's Studies

This seminar features hands-on practice in accessing and searching databases available for research in women's studies. Nov. 7 from 5-7 p.m.

Appointments

Tennis Center welcomes head professional to staff

Kelly Baker, certified as a U.S. Professional Tennis Association Pro since January 1988, has been named head professional at the Penn State Tennis Center.

Previously, he was the head pro at the Blair Racquet Club in Altoona.

A former nationally ranked college player and All Western Athletic Conference standout at the University of Texas at El Paso, Baker has worked with more than 30 nationally ranked juniors in El Paso and Eugene, Ore.

Division of Transportation Services welcomes new director

Teresa A. Davis has been named director of transportation services for Penn State. In the newly created Division of Transportation Services, Davis will direct the operations of both the parking department and Fleet Operations within Business Services.

Davis comes to Penn State from the U.S. Military Academy at West Point, N.Y. As the deputy director of plans and operations for the director of security, she planned and managed parking, traffic movement and police support for daily and special events. In addition, she was responsible for the security of VIP movement to include presidential visits and the safety/security of three million tourists annually.

She obtained her bachelor of science degree from the University of the State of New York while serving in the U.S. Army's Military Police Corps. In 1995, she completed a master's degree in public administration from the John Jay College of Criminal Justice, New York. She is a member of Pi Alpha Alpha, the National Honor Society for Public Affairs and Administration.

Great Valley restructuring includes addition of three academic leaders

In a restructuring designed to strengthen local academic leadership at Penn State Great Valley, three key academic administrative leaders have been appointed. They are:

David J. Fritzsche, academic division head, named management and professor of management and organization; William D. Milheim, associate professor of education, named Academic Division head, education; and David W. Russell, associate professor of electrical engineering, named Academic Division head, engineering.

Fritzsche received his Ph.D. from Indiana University and a master's in industrial administration from the University of Illinois. He has held faculty positions at the Rochester Institute of Technology, Illinois State University, the University of Portland and as chairman of the managerial science department at the University of Nevada at Reno. He has published widely on marketing and business ethics.

Milheim received his Ph.D. in curriculum and instruction and master's in community health edu-

cation from Kent State University. He joined Penn State Great Valley as assistant professor of instructional systems in 1991 after serving on the faculty of Bloomsburg University.

In 1994, he received the College of Education's Outstanding Faculty Award, as well as Penn State Great Valley's Award for Teaching Excellence in 1996. Milheim has published widely on instructional design and education and

William D. Milheim

technology issues.

Russell received his Ph.D. in computer architecture for intelligent control systems from the Council for National Academic Awards (Liverpool Polytechnic, Manchester University and United Kingdom Atomic Energy Authority), United Kingdom. He joined Penn State Great Valley in 1985 after holding faculty positions at several universities in the U.S. and the U.K., including Liverpool Polytechnic, Howard University and Villanova University. He has published widely on artificial intelligence in leading scholarly journals, as well as pioneered several new programs at Great Valley, including a master's program in information science and a collaborative Ph.D. program in software engineering with The University of Wales.

Penn State Great Valley CEO Lawrence S. Cole, in collaboration with the division heads, will serve as the primary administrative leadership for Penn State Great Valley.

ARL associate director to serve at NASA's Ames Research Center

Robert J. Hansen, chief scientist and associate director at the Applied Research Laboratory, is serving for a year as associate director of NASA's Ames Research Center. In this capacity, he is director of NASA's Center of Excellence in Information Technology and of Ames' Information Technology Directorate.

NASA's Center of Excellence in Information Technology is being implemented as a "virtual corporation" involving Ames and the other NASA field centers. Particular emphasis is being given to building partnerships between the NASA research and operations communities, the information technology corporate sector concentrated in Silicon Valley and academic institutions around the country. The goal is to develop solutions to NASA's present and future information technology needs.

Hansen assumed his new post in Mountain View, Calif., under the terms of the Intergovernmental Personnel Act (IPA). The IPA provides for the assignment of university faculty members to the federal government to facilitate federal, state and

local cooperation and to strengthen the management capabilities of government operations. He is scheduled to return to his post at Penn State on Aug. 31, 1997.

Hansen joined ARL in 1992 and has been responsible for the development of an R&D business base outside the laboratory's historic undersea technology arena. Before coming to Penn State, he was deputy director of the Applied Research and Technology Directorate of the Office of Naval Research and second in command of a \$210 million multidisciplinary research program administered by a staff of 60 program managers and support personnel at three sites in the United States.

A magna cum laude graduate of Stanford University, Hansen earned master's and doctoral degrees at the Massachusetts Institute of Technology.

Mont Alto appoints financial aid counselor

Christina Rock recently joined the Penn State Mont Alto Campus staff as a financial aid counselor. Her

duties include handling all financial aid for new and existing students, counseling and resolving financial aid issues and administering campus scholarships and grants. Rock hopes to also offer budgeting and finance workshops for students.

Previously she was employed as branch manager for Citizens National Bank of Southern Pennsylvania, Chambersburg. Before that, she worked as a financial counselor for Consumer Credit Counseling Service of Greater Washington Inc., Hagerstown, Md. She holds a bachelor of science degree in business management from York College.

Christina Rock

University development names executive director

Elaine Dunn Stuhr has been named executive director of University development, a position she has held on an interim basis since June. Her responsibilities include leading a team of fund-raising professionals and supervising all advancement activities for the academic colleges at the University Park Campus, continuing and distance education, the University Libraries and athletics.

Stuhr, who has held several major fund-raising campaigns in her career, joined Penn State as the director of development for the University Libraries in 1995. Before that, she served as assistant dean for development and alumni relations in the School of Law at the University of Oregon, and as the assistant vice president for public affairs and development and executive director of the University of Oregon Foundation.

She also served as director of development for Whitman College from 1981 to 1987, where she led a campaign that raised more than \$50 million and reached its goal two years ahead of schedule.

Stuhr earned her bachelor's degree in psychology from Vanderbilt University and did graduate work in the Graduate School of Management at Georgia State University.

The

ARTS

AT PENN STATE

Violinist presents recital

Violinist **Jeffrey Thayer**, a visiting artist at Penn State, will present a recital at 8 p.m. Saturday, Nov. 2, in the School of Music Recital Hall on the University Park Campus. Thayer will be accompanied by pianist **Karen Tanaka** in a program of virtuosic literature.

Jeffrey Thayer

He currently studies with Zvi Zeitlin at the Eastman School of Music. Thayer's past teachers included **James Lyon**, associate professor of violin, and **Raymond Page**, retired professor of viola. Thayer is a recipient of the Stirling Award at Eastman and has twice been the winner of the concerto competition at the Music Academy of the West in Santa Barbara, Calif. He has performed as a soloist with the Nittany Valley Symphony and will be a featured artist with the Williamsport Symphony in January 1997.

The recital is free to the public. For more information call (814) 863-4411.

Women's Choral to sing

The Penn State University Women's Choral, under the direction of **Robert W. Drafal**, instructor of music, will present its annual fall concert at 1 p.m. Sunday, Nov. 3, in the School of Music Recital Hall on the University Park Campus.

The program will feature the premiere of a set of Scottish love songs arranged by **Bruce Trinkle**, associate professor of music.

Tickets are \$5 for adults and \$2 for students and will be available at the door before the concert. For more information, contact the School of Music office at (814) 865-0431.

University Choir concert

The Penn State University Choir will present its annual fall concert, "There Is Sweet Music Here," at 4 p.m. Sunday, Nov. 3, in the School of Music Recital Hall on the University Park Campus.

This unique program features instrumental accompaniment for every programmed work from Phi Mu Alpha Sinfonia fraternity, will accompany Jubilate Deo composed by **Paul Felter**. **David Moore**, soprano oboist, will accompany excerpts from **Stephen Chatman's** "There Is Sweet Music Here." **June Miller**, professor

On display

This and other photographic works of **Mindy Hans** will be on display at the Kern Exhibition Area on the University Park Campus through Nov. 17.

of organ, and student percussionists will assist in the performance of **Mack Wilberg's** "Tres Cans Laudendi." Flautist **Renee Guarnieri** will accompany two works, "Wayfaring Stranger" and "Don't Be Weary Traveler," and **Gregg Goldner**, percussion, will assist in the presentation of the spirituals "Ride the Chariot" and "Freedom Come." **Sine Nomine**, a chamber vocal ensemble from The University Choir, also will perform.

Tony Leach, assistant professor of music and music education, is the conductor of the University Choir. Tickets are \$2 for students and \$4 for non-students and may be purchased at the door.

Flute Ensemble at Bach's Lunch

The Penn State Flute Ensemble, directed by **Eleanor Duncan Armstrong**, associate professor of music, will present a program of chamber music for flutes at 12:10 p.m. Thursday, Nov. 7, in the Helen Eakin Eisenhower Chapel on the University Park Campus.

The 20-minute, free concert is part of the Bach's Lunch series sponsored by the College of Arts and Architecture School of Music and the University Lutheran Parish.

The Flute Ensemble consists of 13 members who will perform works

from a baroque, classical and contemporary repertoire. Members of the group will play a wide range of instruments in the flute family: C-flute, alto, piccolo and bass.

Audience members may take their own bag lunches to eat after the concert in the Roy and Agnes Wilkinson Lounge. Coffee and tea will be provided.

Special exhibit in Kern

The Kern Exhibition Area on the University Park Campus features the photography exhibit of **Mindy Hans** through Nov. 17.

Hans is a senior completing her bachelor's degree in photography. She describes the exhibit as a series of photographs representing her losses and hopes.

Kern Exhibition Area is on the first floor in the Kern Graduate Building. Hours are 8 a.m. to 11 p.m., Monday through Friday; 10 a.m. to 11 p.m., Saturday; and noon to 11 p.m., Sunday.

Art Alley exhibit

The HUB's Art Alley on the University Park Campus features the ceramics, "Persian Pottery" and stained glass exhibit of **Shahnaz Lofli**

through Nov. 17.

Currently living in State College, Lofli creates ceramics that reflect a strong connection to nature. Lofli has exhibited at the Central Pennsylvania Festival of the Arts in 1991, 1995 and 1996.

Folk and classical music

The Penn State Worthington Scranton Campus Cultural Events Series will feature a concert by **Simple Gifts**, a folk ensemble, at 7:30 p.m. Tuesday, Nov. 19, in the Jewish Community Center. For more information, call (717) 963-4311.

Spinner's Web exhibit

The Spinner's Web, a guild of spinners and weavers from across Northeastern Pennsylvania, will exhibit their work through Dec. 1 in the Penn State Worthington Scranton Campus Study Learning Center, Quiet Lounge. The guild will hold a special, free demonstration/reception from 1 to 4 p.m. Sunday, Nov. 3.

Odyssey Literature

On the next episode of **Odyssey Through Literature**, fiction writer **Charlotte Holmes** reads and discusses her latest work, *Gifts and Other Sto-*

BRUCE JORDAN CENTER

Wynonna to perform at Jordan Center Nov. 9

Wynonna, formerly of the performing duo **The Judds** with her mother **Naomi**, will perform a mix of country, pop and soul at The Bryce Jordan Center on the University Park Campus at 8 p.m. Nov. 9, with special guest **Ty Herndon**.

Possibly singing songs from her second album, *Tell Me Why*, Wynonna may also include tunes from her 1992 solo debut album, *Wynonna*, which included the No. 1 single "She Is His Only Need."

Herndon's first single, "What Mattered Most," brought him national recognition, as did his second album, *Living in a Moment*. Herndon, an Alabama native, was named the Texas Entertainer of the Year in 1993.

Tickets are \$21 for the general public, \$19 for students with a valid Penn State ID card, and are available at the Jordan Center Ticket Center, selected Uni-Marts, Penn State campus outlets in Altoona, Erie, Hazleton and Reading, or by calling (814) 865-5555 or toll-free at (800) 863-3336.

Upcoming events

■ **Nov. 2:** Penn State Tailgait Party, four hours before kickoff vs. Northwestern; tickets \$15 for adults; \$10 for children 12 and under.

■ **Nov. 8:** Smashing Pumpkins, 7:30 p.m.; tickets \$26.

■ **Nov. 15:** World Gold Gymnastics Tour, 7:30 p.m.; tickets \$35, \$25 and \$17.50 for adults; children (12 and under) and senior citizens (60 and over) receive a \$3 discount.

■ **Nov. 23:** Penn State Tailgait Party, four hours before kickoff vs. Michigan State; tickets \$15 for adults; \$10 for children 12 and under.

For a listing of sporting events to be held at The Bryce Jordan Center, or for more information on any event listed here, call the center at (814) 865-5555 or visit the Web site at <http://www.bjc.psu.edu>.

ries, with host **Leonard Rubinstein**.

Odyssey Through Literature is produced as a continuing education service of the Department of Comparative Literature. It airs Sundays at 6:30 p.m. on WPSU, 91.5 FM, and 106.7 FM in Altoona.

UNIVERSITY PARK CALENDAR

SPECIAL EVENTS

Friday, November 1

Palmer Museum of Art, 2 p.m., Christoffers Lobby, Patrick McGrady, curator of education, "Some Thoughts on the Steidle Collection."

Graduate Student Association, 6:30 and 8:30 p.m. Film, "Stealing Beauty," through Nov. 2.

Graduate Student Association, 6:30 and 8:30 p.m. Film, "Maybe ... Maybe Not," through Nov. 2.

Center for the Performing Arts, 8 p.m., Eisenhower Auditorium. Brian Friel's "Philadelphia, Here I Come!"

Saturday, November 2

Palmer Museum of Art, 11:30 a.m., Christoffers Lobby. Gallery Talk presents Jennifer Streib on "Highlights of the Palmer Museum."

School of Music, 8 p.m., Recital Hall. Guest Artist Recital presents Jeffrey Thayer, violinist.

Sunday, November 3

School of Music, 1 p.m., Recital Hall. Women's Choral, Robert Drafil, director.

School of Music, 4 p.m., Recital Hall. "Penn State University Choir," Anthony Leach, conductor.

Tuesday, November 5

School of Music, 8 p.m., Recital Hall. Penn State Trombone Choir/University Brass, Mark L. Lusk, director.

Thursday, November 7

School of Music, 12:10-12:30 p.m., Eisenhower Chapel. Bach's Lunch Concert presents "The Penn State Flute Ensemble."

Friday, November 8

Gallery Talk, 3 p.m., Palmer Museum of Art, Christoffers Lobby. Catherine Clemen on "Ancient to Renaissance Art of the Palmer Museum."

School of Music, 8 p.m., Recital Hall. "Opera Intermesso," Susan Boardman, director. For tickets, call (814) 865-0431.

Graduate Student Association, 6:30 and 8:30 p.m., 112 Kern Hall, "Cold Comfort Farm," through Nov. 9.

Graduate Student Association, 7 and 9 p.m., 101 Chambers. Film, "Unforgettable Summer," through Nov. 9.

Saturday, November 9

Center for the Performing Arts, 8 p.m., Eisenhower Auditorium. "Lewittzky Dance Company." For tickets, call (814) 865-0255.

Sunday, November 10

School of Music, 2 p.m., Recital Hall. "Penn State Oriana Singers," Lynn Ellen Drafil, conductor. For tickets, call (814) 865-0431.

Center for the Performing Arts, 2 and 4 p.m., Eisenhower Auditorium. "Cathy and Mary," For tickets, call (814) 865-0255.

School of Music, 4 p.m., Recital Hall. "Opera Intermesso," Susan Boardman, director. For tickets, call (814) 865-0431.

School of Music, 8 p.m., Recital Hall. "The Penn State Flute Ensemble," Eleanor Duncan Armstrong, director.

SEMINARS

Friday, November 1

Jewish Studies, 10 a.m., 306 Burrows. Normal L. Kiehl on "The Body of Alfred Dreyfus: A Site for France's Displaced Anxieties of Masculinity, Homosexuality and Power."

At the Palmer

"Beehive Coke Oven Plant," an oil on canvas, is one of the paintings from the Steidle Collection on display at the Palmer Museum of Art on the University Park Campus. The exhibition, "When Coal Was King," will be at the museum through Dec. 8.

Health Policy and Administration, 3:30 to 5 p.m., 101 East Henderson. J. Bruce Davis on Canada's health care system.

Geography, 4 p.m., 206 Walker. Lynn Staeheli on "Community, Place and Citizenship: Local Politics in a Transitional Era." Center for Women Students, 7:30 p.m., 101 Kern. Iris Young on "Should Feminists Resist the Idea of Home?"

Monday, November 4

Comparative Literature, 12:15 p.m., 101 Kern. Sydney Abou-Hosn on "Why Doesn't She Speak? The Feminine Rejection of Narration From Poets to Gliman."

Agricultural and Biological Engineering, 12:20 p.m., 239 Agricultural Engineering. Shawn Duffy on "Evaluation of the Computer-Controlled Shear Cell (CCSC) Dynamic Yield Locus Tester," and Greta Martin on "The Effect of Compost Materials and Methods on House Fly Propagation."

Physics, 3:30 p.m., 339 Davey Lab. Tom Lubensky on "Hedgehogs, Topological Dipoles and Chains in Nematic Emulsions."

Tuesday, November 5

Recreation and Park Management/Leisure Studies, 9 a.m., 112 Bushnell Lab. John Robinson on "Why Americans Are Working Fewer Hours But Think They're Working More."

Materials Science and Engineering, 10 a.m., Coal Utilization Lab, Room C-213. Donald F. McMillen on "Comparing H-Transfer in Coal Liquefaction, Heavy-Oil Upgrading and Polymer Degradation as Basis for Improving CoProcessing Options."

Physics, 3:30 p.m., 339 Davey Lab. Ismail Zahed on "Elementary Particles and Fields."

Economics, 4 p.m., 420 Kern. Pankaj Ghemawat on "Strategy."

Geosciences, 4 p.m., 112 Walker. Lonnie Thompson on "Ice Core Records from Tropical Mountain Glaciers."

Nutrition, 4 p.m., 110 Warlick Lab. Rebecca Corwin on "Excessive Food Consumption in the Rat: Some Environmental Contributions and Physiological Consequences."

Wednesday, November 6

Center for Women Students, noon to 1 p.m., 120 Bouckee. CWS Resource Room. Laurie L. Cohen and Luan Hyers on "Everyday Sexism and Racism at Penn State." Gerontology Center, noon to 1 p.m., 101 Health and Human Development East. Hayden Bosworth on "Terminal Change: Cognitive Function and Sociodemographic Factors in the Seattle Longitudinal Study."

Materials Science and Engineering, 1 p.m., Coal Utilization Lab, Room C-213. Donald F. McMillen on "Field Ionization Mass Spectrometry of Coals and Coal Pyrolysis and Liquefaction Products."

Engineering Mechanics, 3:35 p.m., 214 Hammond. Osama Awadelkarm on "Microelectromechanical Systems."

Center for Ethics and Religious Affairs, 7:30 p.m., 101 Kern. Conrad Cherry on "The Role of Religion in the Global University."

Thursday, November 7

Materials Science and Engineering, 10 a.m., Coal Utilization Lab, Room C-213. Donald F. McMillen on "Retrograde Reactions of Oxygen Functions in Coal Structures." Ceramics, 11 a.m., 301 Steidle. Yet-Ming Chiang on "The High Temperature Colloid Chemistry of Liquid Phase Sintered Materials."

Center for Russian and East European Languages, noon, 124 Sparks. Irene Hurd on "Doing Business in Russia: A Woman's Perspective."

Women in the Sciences and Engineering Institute, 2 p.m., 305 Hetzel Union Building. Catherine Jay Diving on "Capitalizing on One's Abilities: Moving Up the Scientific Ladder."

Physics, 3:30 p.m., 101 Osmond Lab. Juan Maldacena on "Black Holes in String Theory."

Ecology, 3:45, 106 Bouckee. Marlene Zuk on "Singing under pressure: acoustically-orienting parasitoids and their cricket hosts."

Computer Science and Engineering, 4 p.m., 302 Pond Lab. Mic Bowman on "Managing Complexity in Wide-Area File Systems."

Food Science, 4 p.m., 117 Borland Lab. Lynn Brown on "Sabbatical at University of Minnesota-Reflections."

Friday, November 8

Accounting, 3:30 to 5 p.m., 333 Beam. Jagannathan on "Litigation Risk and Auditor Resignations."

Economics, 3:30 p.m., 420 Kern. Horst Ralf on "Optimal Export Policy in the Presence of Informational Barriers to Entry and Imperfect Competition."

Geography, 4 p.m., 206 Walker. Dennis Thomson on "Selling (?) Science to Skeptics."

Spanish Club, 7 p.m., Palmer Museum of Art, Lipson Auditorium. Javier Escudero presents a slide show on Peru.

Monday, November 11

Comparative Literature, 12:15 p.m., 101 Kern. Chiyo Kawaikami on "Tokyo: Hybrid Narrative Space in the Works of Izumi Kyoka (1873-1939)."

CONFERENCES

November, November 4

Pasteurizer Operator's Workshop, Nittany Lion Inn, through Nov. 6.

NCA Chocolate Handling Workshop, Nittany Lion Inn, through Nov. 6.

Tuesday, November 5

Mammalian Cell Culture Methods, 8:30 a.m., Frear Lab, through Nov. 8. To register, call (800) PSU-TODAY.

Saturday, November 9

Gender Equity conference, The Penn State Scenic Center. Keynote address, "Empowering Ourselves and Others," Sabrina Chapman.

EXHIBITS

THE HUB ART ALLEY

Drawings by Christine Meyer, through Nov. 17.

Ceramics and stained glass by Shahnaz Lofit, through Nov. 17.

Kern Exhibition Area

Coin art and jewelry by Claire Allison Ruliser, through Nov. 17.

Photography by Minday Hars, through Nov. 17.

North Halls Cultural Lounge

"The Return of Jehu" by Michael Christy, through Nov. 1.

Palmer Museum

"Cooking for the Gods: The Art of Home Ritual in Bengal," through Dec. 8.

"When Coal Was King: Paintings from the Steidle Collection, College of Earth and Mineral Sciences," through Dec. 8.

"Abstraction to Figuration: Selections of Contemporary Art from the Pincus Collection," through Dec. 15.

"The Wood Engravings of Warren Mack," through Jan. 5.

Reflects an international perspective.

CQI

**CONTINUOUS
QUALITY
IMPROVEMENT**

Deans sponsor two CQI teams

New CQI teams in the Graduate School and in the College of Health and Human Development will soon receive their charges from their respective deans. In the Graduate School, a team will study the processes involved in decentralizing admissions and developing an electronic graduate student application form. Rod Erickson is the team sponsor. Cindy Nicotia is the leader and Barbara Sherlock will facilitate the team. Team members are Jean Courter, Leslie Frye, Becky Halpeny, Beth Haupt, Don Hogg, Shawn Kuhlman and Jodi Stover.

The flow of work through the dean's office in the College of Health and Human Development is the process being studied by a team under the leadership of Jerome Itinger. Barbara Shannon is the team sponsor and Barbara Sherlock is the facilitator; team members are David Dimmick, Kathryn Kensinger, Marianne Kuhns, Cindy Sackett and June Stine.

Retention workshop

For the past two years, the Central Enrollment Management Group CQI Team on Undergraduate Retention, led by John Cahir and facilitated by Jack Gido, has surveyed non-returning students to determine their reasons for leaving Penn State. The reasons cited most often were: financial problems; availability of major; quality of advising; distance from home; and courses not available. As a result of the team's findings, all campuses have appointed retention coordinators. In addition, the Second Annual Eastern Region Retention Workshop will be held on Nov. 4 at the Schuylkill Campus.

Quality Expo '97

If you are interested in becoming a member of the Quality Expo '97 Planning Team, please contact Carol Everett, c1e2@psu.edu. The fifth annual expo will be on April 17, 1997.

For additional information about continuous quality improvement, please contact Louise Sandmeyer, executive director of the Center for Quality and Planning, (814) 863-8721 or les1@psu.edu.

Seminars offer tools, strategies for use in new learning environments

Many Penn State units offer seminars, symposia and discussion groups focusing on tools and strategies for teaching, learning, computing, collaboration, communication and research. Here is an overview of what is available. Faculty and staff also may want to check with their own college or department, or at their own campus, about local support services.

Many seminars are free of charge. Registration usually is required because of limited seating.

Center for Academic Computing

The Center for Academic Computing (CAC) offers seminars and symposia on software, World Wide Web, electronic publishing, visualization, high-performance computing and teaching with technology. To access a seminar listing or register for CAC seminars, start at the Penn State home page, <http://www.psu.edu/>, go to computing, then classes and seminars, then academic computing seminars.

For copies of the fall CAC seminar guide, send e-mail to seminars@psu.edu or call (814) 863-4356. To request customized teaching and learning with technology seminars for your academic department, call Carol Dwyer at (814) 863-7765 or e-mail cad6@psu.edu.

Center for Learning and Academic Technologies

The Center for Learning and Academic Technologies (C-LAT) of the Commonwealth Educational System provides support for transforming the teaching/learning environment throughout the CES into one characterized by learner-centered, active and collaborative instruction.

For information on current initiatives contact C-LAT by e-mail at clat@psu.edu, by phone at (814) 863-5512, or visit the C-LAT Web page at <http://www.clat.psu.edu>.

Center for the Study of Higher Education

The Center for the Study of Higher Education examines issues that affect the policies and practices of post-secondary institutions and their implications for leadership, planning and general administration. The center's current studies include faculty roles and rewards, the effects of institutional curriculum and the effects of coursework patterns on student learning.

For more information or to make an appointment to discuss your project, call Jim Ratcliff, director, at (814) 865-6347, e-mail jlr7@psu.edu or fax (814) 865-3638.

Computer Learning Center

The staff of the Computer Learning Center conducts seminars on introductory computer skills and some software packages. Individual consultation is offered to help beginners learn to use Macintosh and IBM computers. The Computer Learning Center, in cooperation with the Office of Disability Services, provides equipment for individuals with visual, motor or learning impairments.

For further information on seminars and services, contact the Computer Learning Center at (814) 863-9627.

Department of Distance Education

The Department of Distance Education, Continuing and Distance Education, offers seminars, brown-bag meetings and conferences on the design and develop-

ment of distance learning environments. For more information see the department's 1996-97 programming at <http://www.cde.psu.edu/DE/FacDev/Faculty.html> or contact Nancy Hallberg at (814) 865-5403 or ndw1@psu.edu.

A daylong workshop titled "Videoconferencing and Beyond: Creating a Virtual Classroom" is available via PictureTel upon request. For more information, contact Ann Taylor at (814) 863-8294 or atb3@cde.psu.edu.

IDP Center for Excellence in Learning and Teaching

The IDP Center for Excellence in Learning and Teaching (formerly the Instructional Development Program) of the Office of Undergraduate Education supports instructional improvement by providing programs, services and information. Services include a 10-week course in college teaching, new instructor orientation, mid-semester feedback activities and a series on diversity.

Additional information and online resources are available at <http://www.psu.edu/80/academic/ue/> IDP Homepage page. To be added to the center's mailing list, call (814) 863-2599, e-mail uidp@psu.edu, or write to 401 Grange Building, University Park.

Schreyer Institute for Innovation in Learning

The Schreyer Institute for Innovation in Learning promotes partnerships among students and faculty to design and conduct active, collaborative, problem-focused learning experiences which foster inquiry, initiative and teamwork. The Schreyer Institute co-sponsors the "V.O.I.C.E. Box" (Varieties of Innovative Changes in Education), lunchtime discussions devoted to pedagogical issues such as team projects in large classes and authentic assessment of student learning.

For more information, contact the institute by phone at (814) 865-8681 or e-mail at inov8@psu.edu. See its Web page at <http://www.inov8.engr.psu.edu/>.

University Libraries

The University Libraries offers seminars on searching techniques and databases accessible through the Library Information Access System (LIAS), on CD-ROM and on the Internet. (See Faculty/Staff Alerts on page 6.) The Libraries also offers discipline-specific seminars on World Wide Web searching and local and remote databases.

To register or learn more about the seminars, send e-mail to signup@psulias.psu.edu. If you have any additional questions, contact Doris Herx at (814) 863-0325. Information on the seminars can also be found by typing HELP WORKSHOP when using LIAS.

Wagner Computer Training Center

The Wagner Computer Training Center offers topics such as basic computer use, word processing, page layout, graphics, spreadsheets, databases and multimedia. These courses are joint offerings with the Human Resource Development Center and the Center for Academic Computing.

For a course schedule call (814) 865-8216 or send e-mail to wgs1@psu.edu. For additional information about the content of these programs or to request individualized training programs, call (814) 863-7491 or send e-mail to Wagner-lab@psu.edu.

Funds will help preserve historical agricultural development information

The University has received a grant of \$117,214 as one of nine land-grant libraries across the U.S. that has joined with the U.S. Agricultural Information Network to identify and preserve historical literature about agricultural development and rural life from 1820-1945. Part of the "National Preservation Program for Agriculture Literature," the project is funded under a subcontract from Cornell University, supported by a grant from the National Endowment for the Humanities.

Historical Pennsylvania literature will be identified and then ranked by a panel of scholars to ensure that at least the top ranked 22.5 percent of publications will be preserved through microfilming efforts. The Penn State panel includes **Jerome K. Pasto**, professor emeritus of agricultural economics and rural sociology, College of Agricultural Sciences; **Sally McMurry**, associate head of the Department of History; and **Vladimir Micuda**, retired associate librarian and chief of the sciences and technology department.

The results of this two-year project will be made available to researchers and scholars across the country through the Online Computer Library Center database beginning in January 1997.

H&HD chooses president of Nike as Alumni Fellow

Thomas E. Clarke, president and chief operating officer of Nike Inc., has been named an Alumni Fellow, the highest honor awarded by the Penn State Alumni Association.

Clarke received his doctorate in biomechanics from the College of Health and Human Development in 1980. While at Penn State, Clarke analyzed the way pressure is distributed throughout the foot while walking.

After graduating, Clarke began his Nike career as a researcher in the Nike Sports and Research Laboratory, Exeter, N.H. In 1983, he was promoted to director of product development, and in 1984 relocated to Nike's headquarters in Beaverton, Ore., to assume the directorship of Nike's Sports Research and Development Center.

During the next four years, he rapidly

Thomas E. Clarke

advanced through the footwear research and marketing division, and was named corporate vice president of marketing in 1989. In 1993, Clarke moved on to become the company's general manager and in 1994, he assumed his duties as Nike's president.

Nike is ranked as the world's No. 1 sports and fitness company, with sales surpassing \$4 billion. Under Clarke's guidance, Nike has launched award-winning advertising campaigns such as the 1988 "Just Do It!"

campaign. In addition, he has helped to define new categories of sport, including cross-training and outdoor cross-training.

Clarke, a New York state native and marathon runner, received his bachelor's degree from the University of Albany. In 1977, he graduated with a master's degree in biomechanics from the University of Florida.

NIH awards \$2 million to study effects of middle ear infections

The College of Health and Human Development has been awarded a \$2 million grant from the National Institutes of Health to test hypotheses about the effects of middle-ear infections on young children's behavior and language development.

The five-year study, directed by **Lynn Vernon-Feagans**, professor of human development and associate dean for research in the college, explores in more depth the results from a previous longitudinal grant begun in 1988. Collaborators on the new study are **Thomas Frank**, professor of communication disorders, and **Elizabeth Manlove**, associate professor of human development and family studies.

Middle-ear infection, or otitis media, is the most frequently diagnosed disease in preschoolers. Otitis media usually develops from a buildup of fluid in the middle ear space behind the eardrum. Although the acute form of the disease is treatable, the fluid can remain in the ear for months, often resulting in mild to moderate temporary hearing loss. Research has suggested that chronic otitis media can affect speech, language and social behavior in young children.

The study will follow 200 local children

from infancy to 3 years of age in daycare settings. Researchers will travel to each daycare site in a 27-foot mobile van specially outfitted with a sound-treated child hearing suite containing state-of-the-art equipment for hearing testing. In addition to hearing and language testing, children will be examined weekly by a pediatric nurse for general signs of illness and ear infection symptoms. They also will be observed periodically for changes in social and communicative behavior at home and at daycare. Parents will be asked about their child's language development and behavior changes over time.

The researchers hope to determine the influence of risk and protective factors on whether otitis media and the accompanying hearing loss has negative developmental outcomes for the children. Environmental influences in the home and in daycare will be measured to understand whether these settings protect children from the negative effects of otitis media or intensify the problem.

Implications from this study will help both parents and daycare centers do a better job of preventing the developmental problems associated with chronic otitis media.

Grant to aid study on learning productivity

The Center for the Study of Higher Education at Penn State was recently awarded a three-year grant by the U.S. Department of Education, Office of Educational Research and Improvement, to conduct a study on enhancing faculty contributions to learning productivity. The \$720,694 award is co-directed by **James Fairweather**, professor and senior scientist, and **Carol Colbeck**, assistant professor and research associate.

The pair's study will identify policies and practices at the departmental and institutional levels that may lead to changes in the contexts of faculty work and increases in undergraduate learning. This grant was one of six awarded by the National Institute on Postsecondary Education, Libraries and Lifelong Learning. Fairweather and Colbeck's study received the second largest award of the six given.

Nursing associate degree program accredited

The School of Nursing in the College of Health and Human Development has received full initial accreditation of its associate degree program in nursing by the National League for Nursing. The associate degree program was approved by the Pennsylvania State Board of Nursing in 1993 as one of the preliminary requirements toward accreditation.

The School of Nursing now offers three state-approved and accredited

nursing programs at the associate, baccalaureate and master degree levels. Faculty and students are located at nine different locations, making it one of the largest units at Penn State. More than 70 full-time faculty serve nearly 1,000 students at various program sites.

"While not required, schools of nursing which receive accreditation demonstrate that they have met specified criteria for the maintenance and enhancement of educational quality," Sarah Guelandner, director of the School

of Nursing, said. "Accreditation also indicates to the public and others in the nursing education community that a program has established appropriate educational objectives and provides a supportive environment for students and the fulfillment of these objectives."

The National League for Nursing currently accredits 1,655 programs in nursing education, including practical/vocational, diploma, and associate, baccalaureate and master's degrees. These programs enroll 286,000 stu-

dents in colleges, universities, community colleges, hospitals and clinics, and freestanding institutions devoted to nursing education.

Penn State's associate degree program in nursing is currently offered only through the University's Commonwealth Educational System at the Altoona, Fayette, Mont Alto and Worthington Scranton campuses. Each location has its own nursing facility, although the program content is identical at each site.

As usual, retirees play major role for the United Way

Penn State retirees continue to play a valuable role in the University Park United Way Campaign.

"Retiree participation has become very, very important," Tim Curley, campaign chair, said. "Under the leadership of Leon Kneebone, retiree involvement in our United Way campaign has grown significantly over the last several years."

"Their goal this year is \$58,000, which is a key portion of our overall campus-wide goal of \$450,000. Contributions of Penn State retirees will be a major factor in the success of our campaign."

Kneebone, professor emeritus of botany and plant pathology, has a record of 42 consecutive years of service to the United Way. He has served the Centre County United Way in a wide variety of capacities, including president of the board of directors. In recognition of his contributions, the agency's volunteer award has been named the "Leon Kneebone Award for Extraordinary Volunteerism."

He has been chair of the Penn State Retirees Division since retirees were invited to be a part of the University Park campaign five years ago.

"Prior to that time, retiree contributions were included in the special gifts division that applied to a broad community category," he said. "The decision to include retirees in the University Park campaign has been, in my mind, mutually advantageous."

"We in the United Way are very happy since I estimate retirees will be contributing approximately \$60,000 this year. And, from the University's standpoint, it is one more way that retirees can be a part of the University family."

According to Karen Rugh, coordinator of the United Way campaign at University Park, Penn State is the only Big Ten university that specifically targets retirees for United Way campaigns.

"Our retirees' contribution is a significant portion of the campaign goal and is made, I believe, primarily out of loyalty to Penn State," she said. "Including retirees in our campaign also has provided an excellent means of keeping good United Way supporters in the system."

Paul Rigby, associate dean emeritus in The Smeal College of Business Administration is assisting Kneebone this year as co-chair of the Retirees Division and will become chair next year.

In full bloom

Tony Onies, a greenhouse technician at Mueller Lab on the University Park Campus, waters a *cycas revoluta* in the greenhouse he cares for. The plant, commonly known as a sago palm, is 150 years old and was acquired from a conservatory in the Boston area more than 50 years ago. This is the first time the plant has flowered.

University, Michigan State square off for annual blood donor challenge

The University is once again involved in the Penn State-Michigan State Blood Donor Challenge. The third annual event, which will take place Nov. 11 to 22, is a way to help the American Red Cross build blood supplies for the final six weeks of the year, a traditionally difficult time to keep blood in stock because of the holidays.

The challenge is a contest between Penn State and Michigan State to see which school will have the most blood donated in the two-week period preceding the football game between the two schools. The series stands at 1-1, with Penn State winning last year's contest. This year's winning school will be announced at the football game Nov. 23 at University Park. Coach Joe Paterno serves as honorary chairman of the Penn State effort.

Penn State's goal is to generate 1,800 to 2,000 pints of blood — roughly a three-day supply — for the Johnstown Region of the American Red Cross, which includes State College.

For more information or to make an appointment to donate, call (814) 237-2713.

Blood Donor Challenge dates and locations:

Nov. 11	Waring	1-7 p.m.
Nov. 12	Fisher (East)	1-7 p.m.
Nov. 13	Atherton	1-7 p.m.
Nov. 13	Warnock	1-7 p.m.
Nov. 14	Pollock	1-7 p.m.
Nov. 15	Simmons	1-7 p.m.
Nov. 17	Fisher (East)	11 a.m. to 4 p.m.
Nov. 18	Kern	10 a.m. to 4 p.m.
Nov. 19	HUB Ballroom	10 a.m. to 4 p.m.
Nov. 20	HUB Ballroom	10 a.m. to 4 p.m.
Nov. 21	HUB Ballroom	10 a.m. to 4 p.m.
Nov. 22	HUB Ballroom	10 a.m. to 4 p.m.

Senate debates alcohol resolution

By ALAN JANESCH
Public Information

The University Faculty Senate last week sent back to committee a proposed resolution that acknowledged the negative impact excessive alcohol consumption has on the learning environment and urged Penn State faculty to eliminate practices that appear to condone or enable the abuse of alcohol or other drugs.

During substantial debate on the resolution, Senate members agreed that the Senate needs to take a stand on the issue of excessive alcohol use. But some members described the proposed resolution as "vague," "anemic" and "imprecise," and characterized it as "mush" and "pretentious prattle."

One Senate member, Robert Heinsch, a professor of mechanical engineering, said the University should be "courageous" and stand enforcing existing rules that authorize probation, suspension and other penalties for violating University rules on alcohol possession and consumption.

The resolution was originally introduced by the Senate's Committee on Student Life at the Senate's Sept. 10 meeting (Intercom, Sept. 19). Under Senate bylaws, it had to sit on the table for at least 30 days before it could be brought up for a vote. The resolution offered at the Oct. 22 meeting read:

"The faculty of The Pennsylvania State University acknowledge that excessive drinking of alcohol has a negative impact on the learning environment. We resolve that faculty should play a positive role in influencing student behavior by eliminating practices which appear to condone, encourage, or enable alcohol or other drug abuse. At the same time, we resolve to encourage students to take responsibility for their own behavior."

Before voting to send the resolution back to committee, the Senate considered and rejected an amendment that would have replaced the second sentence of the proposed resolution. The amendment read, "We resolve that faculty should hold students responsible for the consequences of alcohol and drug use and that the University should provide services for overcoming the abuse of alcohol and other drugs."

The amendment was rejected by a 78-50 vote. Following that, the Senate voted to charge the committee with rewriting the resolution to address more specifically the positive role faculty can play, appropriate boundaries for acceptable and unacceptable behavior, and the consequences of alcohol and drug abuse.

In other business, the Senate:

- Heard a presentation from former Senate Chair Peter Jurs on the series of open meetings the University Planning Council is holding to gather input on ways to achieve greater academic quality in spite of financial constraints (Intercom, Oct. 24).

- Heard or received informational reports on intramural and club sports in the Commonwealth Educational System, insurance and benefits, Pattee Library expansion plans, the work of the Senate's Special Committee on General Education (Intercom, Sept. 19), and the mid-semester evaluation process.

- Began the meeting with a moment of silence for **Melanie Spalla**, a Penn State student killed in the Sept. 17 shooting on the HUB lawn.

The Senate will hold its next meeting Dec. 3, at 1:30 p.m., in Room 112 Kern Building on the University Park Campus.

Applicants sought for Great Valley CEO

A search committee has been appointed to identify candidates for the position of center executive officer and associate dean of the Graduate School at the Great Valley Graduate Center. **Michael Reischman**, associate dean for graduate studies and research in the College of Engineering at the University Park, will chair the committee.

The CEO/associate dean reports to the dean of the Graduate School and is responsible for providing academic and administrative leadership for the Great Valley Graduate Center, which currently enrolls about 3500 students in professional master's degree programs in the fields of education, engineering, information systems and management. The center currently has 30 full-time faculty, 40 part-time faculty and an administrative/technical staff of about 75, with an annual operating budget of nearly \$10 million. The center has served the greater Philadelphia and Tri-State region for more than 30 years and has established a reputation for excel-

lence in its professional graduate degree programs. It is located in the rapidly growing corridor of science and technology businesses in northwestern Philadelphia near Malvern, Pa.

Candidates for this position should have academic credentials appropriate for a tenure professorship at university with a record of substantial accomplishment in teaching, research and service; proven administrative and leadership abilities; experience in fiscal management; an understanding of the unique mission of graduate professional education; a commitment to diversity; and the ability to interact effectively with a variety of individuals representing area professional and community organizations and businesses, as well as alumni.

Nominations and applications, accompanied by a resume or equivalent information, and the names, addresses and phone numbers of four referees should be submitted to **Michael Reischman**, Chair of the Search Committee,

Great Valley CEO/Associate Dean, The Pennsylvania State University, 114 Kern Graduate Building, University Park, Pa. 16802. Applications and nominations will be reviewed beginning Dec. 15, and will be accepted until the position is filled.

Members of the search committee are (from Great Valley): **Janice Dreachlin**, associate professor of health care administration; **Carla Holway**, acting director of graduate program administration; **Alison Jones**, director of continuing education; **James McCool**, associate professor of industrial engineering; **William Milheim**, academic division head and associate professor of education; **Eric Stein**, associate professor of management information systems; and (from University Park) **Robert Nicely**, associate dean for outreach and faculty development in the College of Education; and **Glenn Pitman**, associate dean for professional master's program in The Smear College of Business Administration.

Competition under way for two Graduate School awards

The annual competition for both the Graduate Faculty Teaching and Graduate Assistant Teaching Awards is under way. These awards are given annually by the Graduate School to recognize outstanding teaching service by graduate faculty and graduate faculty, respectively.

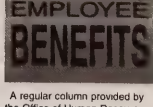

The Graduate Faculty Teaching award recipient is honored with a \$500 prize, accompanied by a plaque. Nominations for this award can be made by both students and faculty and should be forwarded to the professor-in-charge of the respective program. Each graduate program is allowed to forward one nomination for considera-

tion. To be eligible for this award, the faculty member must have been a tenured member of the graduate faculty for at least seven years and should have demonstrated excellence in the supervision of graduate students with theses. Faculty members who have been recognized for teaching excellence by other University competitions such as Evan Pugh or distinguished professorships are not eligible.

Ten teaching assistants are honored with the Graduate Assistant Teaching Award, which includes a \$500 stipend and a plaque. This program is co-sponsored by the Graduate School and the Division of Under-

graduate Studies. To be eligible for nomination, the graduate student must have served as a graduate assistant for at least two semesters within the last two years. Degree candidates carrying the title of instructor are not eligible. Faculty, staff and students may nominate two graduate assistants per program for this award.

Departmental submission of nominations for both awards should be submitted to the Office of Graduate Fellowships and Awards by Dec. 2. Questions regarding either award should be addressed to that office, 313 Kern Building, University Park, Pa. 16802, (814) 865-2514.

A regular column provided by the Office of Human Resources

Enrollment time is here

The enrollment period for 1997 benefits coverage, which extends from Nov. 1 to 27, will give faculty and staff the opportunity to switch from one medical plan to another and to make other benefits elections. Enrollment packets containing benefits information were sent by campus mail this last week to all full-time faculty and staff and included a personalized benefits statement indicating the University benefits programs in which the employee is currently enrolled.

A flexible benefits election form for 1997 also was included. Faculty and staff members who wish to enroll in Flexible Benefits Option I (contribution conversion), Option II (health care expense reimbursement) or Option III (dependent care reimbursement) may do so. Those already enrolled who wish to continue participation in Flexible Benefits Option II or Option III must complete the flexible benefits election form for 1997. This isn't necessary for those already participating in Flexible Benefits Option I who wish to continue that benefit. Forms for plan changes or flexible benefits options must be returned to the Employee Benefits Division no later than Nov. 27.

For more information, contact the Employee Benefits Division at (814) 865-1473. If a faculty or staff member wishes to change name, address or dependent information, separate forms are needed and available on request. Forms for these specific changes may be returned at any time.

Benefits open houses

In conjunction with the annual benefits switch enrollment period, informational benefits open houses will be held from 8 a.m. to 4:30 p.m. Nov. 6 and 22, in 101 Kern Building on the University Park Campus. Representatives from the Employee Benefits Division will be available to answer questions. Representatives will be available from HealthAmerica—HealthAmerica HMO, Healthpass PPO, Plan Medical Plans; Express Scripts pharmacy plan; National Vision Administrators; RiteCare Pharmacy; Equitable, VALIC, Vanguard, TIAA-CREF and Fidelity; SERS and TIAA-CREF retirement plans; Child Care Services; and Faculty/Staff Health Promotion Division.

Faculty and staff at other locations, including The Hershey Medical Center, will have an opportunity to attend benefits sessions at their locations. The times and dates for these sessions will be announced.

Penn Staters

Ronald F. Abler, professor emeritus of geography, has been awarded the 1996 Victoria Medal of the Royal Geographical Society and the Institute of British Geographers for his contributions to human geography and the enhancement of links between British and American geography. Abler is currently the executive director of the Association of American Geographers.

The Victoria Medal was named for Queen Victoria and established in 1902. Over the years it has been awarded to some of the world's best known and distinguished geographers.

Micaela Amato, associate professor of art and women's studies and area head of painting and drawing in the College of Arts and Architecture School of Visual Arts, moderated the plenary session of the 1996 Feminist Art and Art History Conference at Barnard College, Columbia University, New York City. The topic of the session is the title of her paper, "The Politics of Clarity and Accessibility."

Russell R. Barton, associate professor of industrial engineering, presented a paper at the CIRP International Conference on Production Research in Como, Italy. Authors of the presentation "Feedback of Manufacturing Experience for DFM Design Rules" are Professor Irving Ham, Barton and Youngsup Joo of Daewoo Corp.

Four College of Engineering faculty members representing the Center for Gas Turbine and Power participated in the American Society of Mechanical Engineers' Turbo Expo '96 held in Birmingham, England.

Cengiz Camci, associate professor of aerospace engineering, served as vice chairperson of a session and presented two papers. **Budugur Lakshminarayana**, Evan Pugh professor of aerospace engineering and director of the center, presented four papers. **Alok Sinha**, associate professor of mechanical engineering, chaired a session; and **Savas Yavuzkurt**, associate professor of mechanical engineering, presented two papers.

Roselyn Costantino, assistant professor of Spanish at the Penn State Altoona Campus, gave an invited lecture at the National Autonomous University of Mexico on "Theatre and Performance Art in Mexico: The Changing Times."

Refik Culpin and **Ching-Chung Kuo** of the School of Business Administration at Penn State Harrisburg, presented a paper on "Predicting Multinational Corporate Performance: An Empirical Inquiry," at the 16th Annual International Symposium on Forecasting held in Istanbul, Turkey.

Stefanie Field, assistant professor of sociology at Penn State Harrisburg, earned the George Herbert Ryden Prize for the outstanding doctoral dissertation in the social sciences from the University of Delaware. Her dissertation was titled "Shadow Lives, Everyday Lives - A Study of New York City's Undocumented Irish Immigrants."

Andris Freivalds, professor of industrial engineering, participated in the Third International Symposium on Ergonomic Guidelines & Problem-Solving and also attended the International Society of Occupational Ergonomics and Safety Conference in Zurich, Switzerland. He presented a paper titled "Ergonomic Design of Small Spring-Loaded Press."

John Gamble, professor of political science and international law at Penn State Erie, The Behrend College, has been appointed a delegate representing the American Society of International Law to the American Council of Learned Societies (ACLS). The ACLS is a 79-year-old confederation of almost 100 scholarly organizations.

Larry Gamm, associate professor of health policy and administration and director of the Health Administration Program, was elected to the board of the Association of University Programs in Health Administration. Gamm gave an invited presentation at the annual meeting of the association titled "The Pursuit of Community and Health in Leadership for Community Health Partnerships."

Henry A. Giroux, Waterbury Chair professor of secondary education, gave the keynote speech, "The Role of Academic Intellectuals in Revitalizing the Discourse of Democracy and Social Justice in the 20th Century," at the International Forum on Values and Ideology held in Zacatecas, Mexico. Giroux also gave the keynote address at the 15th International Human Science Conference in Halifax, Nova Scotia. His speech was titled "Race and Violence in the Films of Quentin Tarrantino: Implications for a Cultural Politics."

R. Reginald Hardy Jr., professor of mining engineering and director of the Pennsylvania Mining and Minerals Research Institute, presented two papers at the Fourth Conference on Mechanical Behavior of Salt at Ecole Polytechnique, Montreal. The papers were titled "Acoustic Emission in Salt During Elastic and Plastic Deformation" and "Strength and Acoustic Emission in Salt Under Tensile Loading."

While in Montreal, Hardy also attended the Second North American Rock Mechanics Symposium where he served as co-chairman of a session and presented "Laboratory Study on Acoustic Emission and Particle Size Distribution During Linear Cutting of Coal."

William A. Henk, head of the Division of Behavioral Sciences and Education at Penn State Harrisburg, has been appointed to the publications committee of the International Reading Association, the world's largest literacy organization. The Publications Committee assists in the development and evaluation of the association's extensive publication program including four international literacy journals, a major book publishing program and a new online journal.

Kwang-Jae Kim, assistant professor of industrial engineering, presented a paper at the 1996 Asia Pacific Decisions Sciences Institute Conference in Hong Kong, titled "Quality Function Deployment for Optimizing Product Designs: Concepts, Methods and Models."

Manfred Kroger, professor of food science, was named a Fellow of the Institute of Food Technologists and was cited as "a master teacher at Penn State, a researcher with lifelong devotion to fermented milk products and an outstanding science communicator for the Institute of Food Technologists."

Budugur Lakshminarayana, Evan Pugh professor of aerospace engineering and director of the Center for Gas Turbine and Power, received the 1996 American Society of Mechanical Engineers Fluids Engineering Award "for major contributions in the area of fluid machinery engineering."

Mimal Urquidí-Macdonald, associate professor in the Department of Engineering Science and Mechanics, has been nominated by the U.S. State Department to advise on activity transport in water cooled reactors to the International Atomic Energy Agency in Vienna, Austria. Urquidí-Macdonald's areas of expertise include the modeling of corrosion problems that treat the integrity and life of nuclear reactors.

Also recently, she was elected to her second term as a technical adviser to the Department of Transportation, in Washington, D.C., on the issues related to corrosion of underground gas pipelines.

H. Louis Moore, professor of agricultural economics, was presented with PennAg Industries Association's first "Distinguished Service Award." PennAg Industries, a 118-year-old association representing feed, food, fertilizer, seed and other firms, provides service to the agricultural market in Pennsylvania and surrounding states.

Randall E. Newnham, assistant professor of political science at the Penn State Berks Campus, presented a paper titled "How to Win Friends and Influence People: A Comparison of German and Japanese Economic Linkage Policies," at the joint meeting of the International Studies Association and the Japanese Association of International Relations in Makuhari, Japan.

Frank Swetz, professor of mathematics and education, attended Historia Educacao Matematica, a conference on mathematics education held in Braga, Portugal. The meeting was also the venue of the Second European Summer University, a movement to bring together teachers from many countries to develop their knowledge of history and epistemology in mathematics education. Swetz gave two presentations: "Mathematica Pedagogy: A Historical Perspective" and "Problem Solving from the History of Mathematics."

Abdullah Yavas, assistant professor of business administration, presented two papers and was chair of a session during the recent European Economic Association Conference in Istanbul, Turkey. A faculty member of The Smeal College of Business Administration's Department of Insurance and Real Estate, Yavas delivered papers focusing on "A Comparison of Real Estate Marketing Systems: Theory and Evidence" and "Buyer Brokerage: Incentive and Efficiency Implications." The session he led was titled "Various Topics in Industrial Organization Theory."

Shizhuo Yin, assistant professor of electrical engineering, has been selected to receive the Army Research Office's Young Investigator Award. The award supports research by exceptional scientists who have held a doctorate for more than five years and provides the recipients with a three-year financial award to support research in fields critical to the Army that also will benefit civilian manufacturing industries. Yin will continue to conduct research on a novel multiple aperture system for surface roughness measurements.

Ugur Yucelt, associate professor of marketing at Penn State Harrisburg, was a visiting professor at the Middle East Technical University in Ankara, Turkey, under programs offered by the United Nations. He also presented a paper titled "Transfer of Technology to Newly Industrializing Nations" at the International Conference on Technology Management: University/Industry/Government Collaborations in Istanbul.

Legends can take on a life of their own

By GARY W. CRAMER
Public Information

The amazing persistence of contemporary legends like "The Devil-Worshippers at the Prom" and "The Vanishing Hitchhiker" is partly due to people sometimes acting out portions of the tales, a Penn State folklore researcher said.

Also adding to the staying power of some stories—and their ability to crop up across the world in different forms—is the trend for well-meaning, but over-reactive authority figures to insist the stories are true based on flimsy evidence.

"Halloween season is a fertile time for contemporary legends," Bill Ellis, associate professor of English and American studies at the Penn State Hazleton Campus, said. "When real-life actions are guided by a pre-existing legend, as has been in some cases, folklorists call it 'ostension.'"

"An example would be prankster teens creating a 'satanic altar' somewhere in a town being plagued by rumors that Satanists intend to disrupt prom night."

Another form of ostension occurs when honestly concerned people interpret vague or inconclusive happenings as supportive of some contemporary legend's actual existence, Ellis said. In this manner, puzzling graffiti, dead animals or strangers in town may seem to "prove" Satanists are active locally.

Bill Ellis relaxes on the Cursed Stone Couch of Weatherby, the most popular destination of Hazleton-area legend trippers. According to legend, an evil fate awaits all who sit on it under a full moon.

Ellis is widely published on rumor-panics so common that they have their own names, among them, "The Lights Out Gang Initiation," "The Mickey Mouse LSD" and "Welcome to the World of AIDS."

"Legends can help people relieve themselves of contemporary fears, but they may also serve as patterns for mischief makers to provoke the same fears," Ellis said. "Adolescents may feel they can get a rise out of adults by mimicking tampered Halloween candy, 'sacrificing' animals, or spray-painting inverted pentagrams and '666' in public places."

Such activity is not confined to the high-school age

group, however. College campuses are almost routinely hit by rumors of impending mass murder in dorm complexes, sometimes helped by pranksters faking evidence that some homicidal maniac is lurking about the area. At such times, contemporary legends like "The Roommate's Death" may also spread as an expression of coeds' fears.

According to Ellis, even the practice of people taking "legend trips" to sites with supposed supernatural connections — a haunted house or suicide bridge, for example — and concocting faux rituals there can convince gullible witnesses that shadowy underground cults are afoot.

"For the most part," Ellis said, "as disconcerting as these actions may seem, it's just a way of saying, 'See? The legend is true after all! What's more, it seems likely that different forms of ostension work in synergy.'"

"That is to say, the more naturally occurring incidents are explained in terms of Satanism, for example, the more certain people will be tempted to experiment with ostension. This includes either acting out narratives as hoaxes, or, more dangerously, taking Satanism seriously and becoming, however temporarily, part of the legend itself."

Research

Research
to use
funds
from
crime
bill

Jennifer Mastroski, assistant professor of administration of justice with the Institute for Continuing Justice Education and Research, has been awarded an 18-month grant by the Pennsylvania Commission on Crime and Delinquency to evaluate three model domestic violence pilot projects in Pennsylvania. The \$102,000 evaluation grant and model projects are being funded through the Violence Against Women Act, passed as part of the 1994 federal crime bill.

The pilot programs in Lancaster, Luzerne and Philadelphia counties will address areas such as: training law enforcement officers and prosecutors to more effectively identify and respond to violence against women; developing units specifically targeting violent crimes against women; developing more effective police and prosecution policies and protocols, specifically devoted to cases of violence against women; and strengthening victim services programs, including services to minority populations.

During the study, Mastroski will focus on three major research questions:

1. Has violence against women been reduced?
2. Have services to women victims been improved?
3. Have law enforcement and prosecutorial practices been changed, and if so, what are the results?

Highly saturated oils make the best lubricants because of their good stability, Duda said. However, highly saturated oils don't have the fluidity needed in cars, boats and machines.

Asadauskas, a native of Lithuania, is an intern at the U.S. Department of Agriculture (USDA) oil chemical research laboratory in Peoria, Ill.

Perez, who retired from the U.S. Department of Energy about two years ago, is a volunteer faculty member at Penn State. The Penn State Tribology Group, which studies the lubrication of moving surfaces, is the only chemistry-focused tribology group in the U.S.

Cooking and salad oils could keep your car or boat running smoothly

By BARBARA HALE
Public Information

They're not just for french fries anymore. Tests have shown that many vegetable-derived cooking and salad oils, such as corn, sunflower and canola, can be made to perform as well or better than the commercial standard for car, boat and machine lubricants.

Svajus Asadauskas, a doctoral candidate working under the direction of J. Larry Duda, chairman of the Department of Chemical Engineering, and Joseph Perez, adjunct professor of chemical engineering, reported that, when blended with a

proprietary additive developed at Penn State, some vegetable oil formulations perform as well or better than the commercial standard, 10W-30 SG, in the usual tests for the ability to resist burning and forming deposits at high temperatures. They also performed as well or better than the standards in tests for slipperiness and for evaporation loss.

While the tests examined important but relatively narrow characteristics, Duda notes that one of the group's commercial partners, Renewable Lubricants of Ohio, has also demonstrated vegetable oil's potential by using similar corn oil formulations successfully in company vehi-

cles for the last three years. The company's success challenges the widespread perception that vegetable oils oxidize too rapidly to be used in engines.

Duda said there has been continuing interest in vegetable oil-based lubricants for many years because they are more environmentally friendly. They can be produced and disposed of with less impact on the environment and are cheaper to manufacture than current synthetic lubricants.

Duda adds, "Vegetable oils offer Third World countries with a good farm base a real alternative to importing oil for lubricants."

MOC

Brrrrrrrr... University gearing up for winter

By CHRISTY RAMBEAU
Public Information

WPSU-FM, Penn State's National Public Radio station, is the place to go when winter storms threaten and you're wondering if the University is open or closed.

"Beginning this month, WPSU will be the center for all information about weather-related class

cancellations and office closings," David Stormer, assistant vice president for safety and environmental services, said. "As soon as the president makes a decision to cancel, delay or close, that information will go to station Manager Dave Dzikowski, who will interrupt regularly scheduled programming about every 10 minutes with the latest report."

In fact, if the decision to delay

or close is made before WPSU begins its regular broadcasting at 6 a.m., Dzikowski and his staff will open the station and begin broadcasting immediately. The station also will give periodic reports when snow and ice cause school closings to reduce the confusion about whether or not the University expects you in class or at work.

See "Winter" on page 2

Retirement facility gets green light

By ALAN JANESCH
Public Information

A University-related retirement community project with the working title of "The Village at Penn State" got a reaffirmed "go-ahead" signal Nov. 1 from the Board of Trustees.

In a resolution recommended to the board by its Committee on Finance and Physical Plant, the board reaffirmed its Sept. 6 authorization for Penn State to enter into an agreement with a project team consisting of Cooperative Retirement Services of America Inc. (CRSA), of Memphis, Tenn., and Pinnacle Development Inc., of State College.

Under the agreement, the project team will conduct a marketing and financial feasibility study of a retirement village and continuous care facility intended to serve

pass those particular responsibilities.

The idea for the column, which emerged during discussions with President **Graham B. Spanier**, is actually an outgrowth of the president's long-range plan to more fully expand the lines of communication and promote an ongoing exchange of ideas. In his inaugural state of the University address, Spanier said he wanted to communicate "openly and often" with employees. The "Glad You Asked" column should provide employees with an opportunity to express their concerns about a wide range of issues.

"I see this as another avenue for faculty and staff to share their views and to have their questions directed to the proper source for a quick response," Spanier said. "I have found that many times people don't know who to turn to for an answer and this particular outlet should help streamline the process. It is usually the case that if one person has been wondering about something, others also have been thinking about the same issues. So it could be very helpful in terms of eliminating misunderstandings about University policies, programs or procedures."

Spanier also said that during this time of budgetary constraints and change, questions from readers could lead to solutions to problems and cost-saving ideas.

To submit a question, simply send it via e-mail to: ask@psu.edu in care of "Glad You Asked." Anyone submitting a question should provide their name and phone number so that *Intercom* can verify the source of the question. For publication purposes, *Intercom* will use the initials of the individual sending the question and their campus location or department, depending on the nature of the question. Requests for anonymity will be honored.

Obituaries

Stephen M. Raleigh, a professor emeritus of agronomy who retired in 1969, died Oct. 18. He was 92. Raleigh graduated from Kansas State University with a bachelor of science degree in agronomy, and from the University of Minnesota with a doctorate in philosophy in agronomy and plant genetics. He had been a coach for Penn State's grain judging team for more than 20 years.

Annette Wynia Rank, on the staff of counseling services, died Oct. 15 at her residence. She was 60. Rank was a 1958 graduate of Ursinus College with a bachelor of science degree in psychology, and received her master's degree in psychology from Penn State in 1961. She was a founder of the Women's Resource Center of Centre County and was the founding director of the Gestalt Therapy Professional Network of Philadelphia and served on its steering committee.

Stay tuned

The man at the mic

Dave Dzikowski, WPSU-FM station manager, is the man to trust for information on delays or closings this winter. WPSU, the center for all information about weather-related class cancellations and office closings, will interrupt regularly scheduled programming about every 10 minutes with the latest information.

Photo: Greg Grieco

Winter

continued from page 1

"WPSU-FM, which operates three transmitters—90.1, 91.5, and 106.7—was selected as the central point for weather news because we now reach listeners throughout central and northern Pennsylvania, easily covering the normal commuting radius to University Park," said **Mark Erstling**, general manager of Penn State Public Broadcasting, WPSX-TV and WPSU-FM. "We also will be able to report on closings for the Altoona and DuBois campuses should the need arise."

Serving a potential audience of approximately 350,000, the 90.1 signal is broadcast from Kane, and reaches all or portions of McKean, Cameron, Warren, Forest, Clarion, Jefferson and Elk counties. The 91.5 signal, based in State College, serves all or portions of Centre, Clinton, Lycoming and Clearfield counties, and the 106.7 signal is a translator station that serves the Altoona/Hollidaysburg area in Blair County.

WPSU is also carried on TCI cable channel 7, and other cable companies may carry it as well. In addition, the University will continue to cooperate with local and regional media to keep their reports on storm closures up-to-date.

But, if you are hoping to have several snow days off, don't count on it.

"Basically, the University never closes," Stormer said. "Even in last season's storms when classes and offices were delayed and the year before when classes were actually canceled, essential services and operations continued as usual. For example, animals were fed, research projects continued, students in residence halls got breakfast and the many systems that support our physical plant continued to operate. The Nittany Lion Inn is always open."

Sometimes area schools are closed to protect small children from hazardous conditions or because snow and ice make it impossible for school buses to complete

their routes in rural areas. But snow days are rarely enough of a problem to close or delay University classes and offices. If drifting snow creates problems, a short delay allows commuters to navigate the roadways in daylight.

"However, when trees and power lines are down, we lose traffic signals, street lighting, home heating and communication capabilities and may need to cancel some scheduled activities. The loss of electrical power is more significant than the snow. Our highway crews are very effective," he continued.

If a storm threatens, meteorologists **Fred Gadomski** and **Paul Knight** at the Penn State Weather Station consult national and regional information and advise senior administrators and others of the potential for trouble, especially during critical commuting hours. President **Graham B. Spanier** then makes the decision, and in his absence, Provost **John Brighton**.

But reasons for the decision are not always obvious to the rest of us. Some fast-moving fronts have come through during the middle of the day when it was safest for employees and students to wait out the storm rather than be dismissed early and be caught on the highways.

During delays or closings, employees in essential services and operations are expected to report for work in most circumstances, and should contact their supervisor with any questions about their status.

You might also look at "Handling 'Weather Day' Absences" on the Web at www.ohr.psu.edu/pages/policies.htm under Human Resource Guidelines, HRC-10. It spells out how time off and time worked are handled when there is an official closure.

You can also e-mail **Dzikowski** at wpsu@psu.edu with your suggestions, questions and best wishes for a mild and calm winter. And, remember, when you are looking out at three feet of snow at 3 a.m., Dzikowski and his crew have shoveled their way in to the station to give you the latest report that just might let you go back to bed.

Partings

History professor retires after 32 years of service to University

George Michael Enteen, professor of history, retired in June after 32 years of service in the Department of History.

Educated at Emory, Columbia and The George Washington universities, Enteen joined the faculty in 1964. He specialized in Russian history, especially the events of the Soviet period. His research concentrated on the work of Soviet historians, especially their relationship with political leaders, in particular the articulation and enforcement of intellectual controls by communist party authorities. He is responsible for the introduction of semiotic approaches to this subject matter. Both his own study of M.N. Pokrovskii, (The Soviet Scholar-Bureaucrat) and a collaborative work (Soviet Historians and the Study of Russian Imperialism) were published by Penn State Press.

Enteen has published numerous articles about Soviet historiography and politics, some of which were translated for discussion in the Institute of History of the Soviet Academy of Sciences, and some of which have appeared, since the collapse of the Soviet Union, in the leading Russian journal of historical studies.

George Michael Enteen

Enteen served on the advisory board of Soviet Studies in History and as historiography editor for the journal Russian History. Three times a Fulbright research fellow, he also received grants from the Swedish Academy and from the International Research and Exchange Board.

At Penn State he taught graduate and undergraduate courses in Russian, Soviet and

European history. Enteen introduced a widely taught course on the history of communism; he was instrumental in organizing the Slavic Language and Area Center, later the Center for Russian and East-European Studies. He initiated the Slavic Area Colloquium. He is continuing his research on Stalinist historiography.

Longtime staff assistant for HRRM ends service

Rhoda Williams, staff assistant in the School of Hotel, Restaurant and Recreation Management, has retired after more than 25 years of service.

During that time, Williams worked for five different program heads. She supervised three secretaries and processed budgets, faculty promotion and tenure materials, and course offerings.

In 1991 Williams was awarded the Carol Clark Ford Staff Achievement Award from the College of Health and Human Development for her many contributions to the efficient operation of the school. The nominating faculty wrote, "She embodies a sort of college ideal: good cheer, steady competence and self-assurance."

Rhoda Williams

Head of undergraduate kinesiology program ends 27-year career

George T. (Tom) Tait, associate professor of exercise and sport science, has retired after 27 years of service.

Tait began his career as a high school physical education teacher in Middletown, Md. He also taught at the University of Bridgeport, Bridgeport, Conn. Tait then moved to University Park to finish his Ph.D. in physical education. After graduation in 1969, Tait became a faculty member.

During his first four years, Tait served as an assistant track and field coach. At the end of his track coaching experience, he was approached by the fledgling men's volleyball club and asked to help build the program. Tait remembers telling the club that if they wanted a baby-sitter, they should look to help elsewhere. But if they wanted to work hard to improve, then he would certainly help them.

George "Tom" Tait

At the same time, a number of women approached Tait and asked for his assistance in starting a women's volleyball club. Tait received backing and increased funding for the program, and thus began coaching the women's club as well as the men's.

Both programs quickly moved from club to varsity status. From 1976-80, Tait coached both the women's and men's teams as they competed in the United States Volleyball Association. In 1980 he decided to focus on the men's squad, and continued to coach until early 1989.

At that time, he left his coaching duties to focus on teaching and conducting research. Until his retirement, he headed the undergraduate program in kinesiology.

Tait and his wife, Ann, now live in Brevard, N.C. He teaches at Brevard College and is developing a new four-year degree in exercise and sport science. He also is assisting in the development of a new women's volleyball program.

Although he misses the State College and Boalsburg areas, he says he is looking forward to less snow and the warmer temperatures offered by North Carolina winters.

25-year Awards

Peggy L. Fosnot

Fred B. Martin

Carl L. Green

Delores M. Wiant

Observing 25 years of service at the University are, from left, Peggy L. Fosnot, staff assistant VI, Department of Family and Community Medicine; Dr. David M. Leaman, professor of medicine in the Department of Medicine; Romayne E. Weight, administrative assistant, Radiology; and Fred B. Martin, anesthesia equipment specialist, all at The Hershey Medical Center; Carl L. Green, elevator technician in the Office of Physical Plant; and Delores M. Wiant, library assistant at Penn State Great Valley.

From the Trustees Docket

Board reaffirms nondiscrimination policies

By VICKI FONG
Public Information

The Board of Trustees reaffirmed its long-term commitment to its policies of nondiscrimination in education and employment, affirmative action and continual progress in building and sustaining a diverse University community.

"Penn State values access to higher education for all those qualified to seek its benefit," said Donald Cook, a trustee and chair of a special study group that reviewed the University's efforts to support diversity. "A national debate is under way on the role and place of diversity and affirmative action today. Therefore, over the past year, we have taken a look at Penn State's policies and practices in the area of diversity and affirmative action for under-represented minorities and women.

"The board has built a strong record of support for diversity over a quarter century, adding to it and broadening it along the way. Our policies and practices are legal, balanced and effective," Cook said. "Progress, obviously, has been made. More, obviously, needs to be done. Reaching higher levels of achievement will require persistence and continuing commitment on our part."

The trustees approved the resolution after hearing the report, which focused on six general areas: the legal requirements with respect to affirmative action programs for racial minorities; Penn State's policy and vision statements in the area of diversity; the programs and financial investment the University has in place to support diversity; its admissions policies and procedures; the University's financial aid policies and procedures in light of recent court decisions; and positions and practices at other institutions.

Cook outlined the history of Penn State's policies established by the board in 1971 when the trustees adopted an affirmative action policy statement. Twice more in the 1970s, the board created a special advisory trustee committee to look at such issues and expanded the University policy to include handicap, age, sex or status as a disabled

"Affirmative action operates on the principle that if enough women and minorities are considered, they will have an equal chance to be selected for the job. It does not mean preferential treatment, but simply fairness, opportunity and inclusion."

Trustee Donald Cook

Vietnam-era veteran. During the 1980s, the board endorsed a comprehensive document, which included a commitment to the recruitment, retention and graduation of a diverse student population, and later approved a resolution opposing racism and bigotry and reaffirmed its strong commitment not only to increase minority participation in all aspects of University life, but also to eliminate acts of intolerance toward individuals or groups.

In 1991, the board approved additional revisions to Penn State's nondiscrimination policy to include age, ancestry, color, disability or handicap, national origin, race, religious creed, sex, sexual orientation or veteran status.

The University's programmatic efforts to support diversity may be summarized in three general categories: student recruitment and retention; faculty and staff programs; and administrative support.

In admissions, the University does not consider race or ethnic origin as a factor in deciding who is offered admissions and who is not. All students, regardless of race, color or creed as admitted on the basis of their high school grades and their scores on the Scholastic Aptitude Test (SATs). Both factors determine a predicted grade point average, and students admitted to a Penn State degree program must have a predicted grade point average of 2.0 on a 4-point scale.

An exception occurs in the Educational Opportunity Program/Comprehensive Studies Program,

which serves all students including veterans and adults, and is only for Pennsylvania residents who are academically and financially disadvantaged, regardless of race.

"Many factors are taken into account to place students in programs, classes and the Penn State campus which best supports the students' needs and interests as well as those of the University," Cook said. "For example, in granting students their preference for the University Park campus, the needs of the Blue Band are considered. We need the appropriate number of students who can play the horns, percussion and so on. We also want to ensure that the student body is culturally and racially diverse."

As one illustration, the fall 1996 minority enrollment figures, excluding the Pennsylvania College of Technology, which was not included in Cook's report, are reported at a new record total with 7,184 students or slightly more than 9.5 percent of the total enrollment. Individual increases are reported in African American, Asian American, Hispanic and Native American enrollments.

In employment, full-time minority employees in all categories have doubled in number overall between 1983 and 1996, rising from 507 to 1,044. That includes an increase in full-time African American employees from 254 in 1983 to 455 in 1996.

"At Penn State affirmative means aggressive recruitment efforts to increase the number of minority and female applicants for positions," Cook said. "Affirmative action operates on the principle that if enough women and minorities are considered, they will have an equal chance to be selected for the job. It does not mean preferential treatment, but simply fairness, opportunity and inclusion. Contrary to popular rhetoric, affirmative action at Penn State includes setting representational goals. It has not and does not establish hiring quotas. Its purpose is to prevent discrimination."

In addition, the drive to build a diverse university community at Penn State has been institutionalized in the strategic planning program and is among the four strategic goals.

Hershey Medical Center to open Women's Health Center

The Hershey Medical Center will open a Women's Health Center next year, and with existing partnerships with other hospitals, plans to extend those services throughout central Pennsylvania.

In an informational report to the board, Dr. Joanna Cain, chair of the Department of Obstetrics and Gynecology at Hershey, reported that according to research findings cited by the Office on Women's Health of the U.S. Public Health Services and others, modern medicine still has failed to adequately address women's health needs. These findings are a major impetus in the decision to create the Penn State Women's Health Center as part of a network of care sites around the central Pennsylvania region.

The Penn State Women's Health Center will be located in an innovative, newly constructed facility set to

open in September 1997. The building will house all the primary and preventive care services women need, including ambulatory care, a community health education resource library and a senior center.

Among the services to be provided at the center are family centered obstetrics; obstetrical genetic counseling and high-risk pregnancy care; breast care; nutrition and weight management; family planning; adolescent health and healthy life styles and stress management.

Cain reported that the vision of

the center is to "empower women of all ages and backgrounds to maintain and improve their health; treat medical problems specific to each individual; advance knowledge about women's health; provide a place to translate new information to benefit women and provide a place where the medical center's interdisciplinary strengths can flourish to better integrate women's health care."

As part of the Alliance4 Health, the medical center also collaborates across a regional health care network with three other hospitals and their hospital-provider organiza-

tions, allowing for an integrated delivery system. Additional work with the Area Health Education Consortium and the KEYNET project of Pennsylvania, both of which work with rural physicians, will extend the impact of the Women's Health Care Center to women in rural settings.

These partnerships, and others, will help preserve patient choice, increase access and enable the medical center to reach to women of all ages from all walks of life in a geographically diverse region, according to Cain.

Under Cain's direction, a multi-specialty team of professionals from the nursing, medical, social work, public health, community psychology and humanities disciplines at Penn State and throughout the Alliance4 Health will serve clients' needs.

From the Trustees Docket

Fourteen honored for roles in shooting incident

Fourteen members of the University community have been recognized for their acts of heroism and exemplary service during the September sniper attack on the HUB lawn on the University Park Campus.

Each of the honorees received certificates of merit during the Nov. 1 session of the Board of Trustees meeting. They were then guests of the board for a luncheon immediately following the meeting.

In addition to a board certificate, **Brendon Malovrh** also received the Barash Award for Human Service, which goes each year to a member of the Penn State community who has contributed most to the welfare of fellow humans. Malovrh, an undergraduate student in aerospace engineering and a University Scholar, is the student who disarmed the suspected assailant. The award includes a check for \$1,000, which comes from an endowment established by the friends and family of **Seymour L. "Sy" Barash**.

In the Sept. 17 shooting, one student was killed, **Melanie Spalla**, an undergraduate from Altoona, and one was wounded, **Nicholas Mensah**, an undergraduate from Philadelphia.

"There are hundreds of unsung heroes who—in the process of doing their jobs or simply being the people that they are—helped us work through a very difficult time," said President **Graham B. Spanier**. "But the people who are with us today experienced the tragedy in very direct and very personal ways. We want to thank them here, publicly, for acting bravely and unselfishly. We are very proud of them and admiring of the example they have set for all of us."

In addition to Malovrh, those being honored were:

- **Rebecca Beatty**, an instructor of nursing and coordinator of Continuing and Distance Education in the School of Nursing, who coordinated the triage after the shooting.

- **Jason Breitweiser**, an undergraduate student in the Division of Undergraduate Studies, who helped treat and checked the vital signs of Mensah and then tried to help Spalla.

Congratulations

Brendon Malovrh, second from left, was one of 14 honored for their roles in the September shooting on the University Park Campus. Malovrh was congratulated by Edward P. Junker III, vice chairman of the Board of Trustees, left, Jesse Arnette, chairman of the board, and President Graham B. Spanier as he received the Barash Award for Human Service. The undergraduate aerospace engineering student, a University Scholar, disarmed the suspect.

Photo: Greg Grieco

- **Daniel Browne**, an undergraduate student in finance and international business, who gave aid to Mensah and then called 911 from a nearby building.

- **Elizabeth Corwin**, assistant professor of nursing and coordinator of the Family Nurse Practitioner Program at the University, who assisted the victims.

- **Sharon Falkenstein**, instructor of nursing in the School of Nursing, who was on the south walkway by the HUB, saw Mensah fall to the ground and ran to his assistance.

- **Holly Garlitz**, an undergraduate student in elementary and

kindergarten education, who pulled Mensah to safety behind a tree while shots were still being fired.

- **Cory Kline**, an undergraduate student in human development and family studies and ROTC cadet, who helped care for Mensah immediately after the shooting.

- **Janette Moore**, a staff assistant in the School of Nursing, who aided the victims.

- **Janice Penrod**, a graduate student and graduate assistant in the School of Nursing, who assisted the victims. She is out of the country now and will receive her certificate when she returns.

- **Celena Ruth**, an undergraduate student in wildlife and fishery science, who was the first to alert police. She then ran to the lawn to assist the victims.

- **Marilyn Stevens**, an instructor of nursing in the School of Nursing, who assisted the victims;

- **Sally Wangness**, an assistant professor of nursing and associate director of the Commonwealth Educational System for the School of Nursing, who coordinated aid to the victims.

- **Kerry Whitelock**, a graduate student in nutrition, who administered first aid to Mensah.

Board of Trustees receives report on 1995-96 audited financial statements

A report Nov. 1 on the University's 1995-96 audited financial statements shows that total assets of June 30, were \$2.87 billion, after depreciation, according to **Kenneth S. Babe**, corporate controller.

The report also showed:

- Revenue received by the University in 1995-96 was \$1.79 billion;

- Expenditures for instruction were \$449 million in 1995-96;

In addition to the University's internal audit

reports, an independent audit is performed each year by Deloitte and Touche. Babe also reported that no formal findings were made relating to the University in the state auditor general's report on the state appropriation for the year ending June 30, 1995.

From the Trustees Docket

Leases will help build regional nature center

By ALAN JANESCH
Public Information

The Board of Trustees approved two \$11-a-year property leases that will allow the creation of a regional nature center in a wetlands area known as the Millbrook Marsh and expanded historical exhibits at the Centre Furnace Mansion near the University Park Campus.

For the nature center, Penn State will lease a 63.2-acre property near the interchange of the Mount Nittany Expressway (Route 322) and East College Avenue, east of Puddington Road, to the Centre Region Recreation Authority (CRRRA). For the expanded historical exhibits, Penn State will lease a 4.8-acre parcel at Porter Road and East College Avenue to the Centre County Historical Society, which operates the Centre Furnace Mansion.

Both leases could run as long as 50 years — the terms of the agreements are for 35 years, with three successive five-year renewal options.

"The agreements make it possible to give the Penn State community and surrounding communities an easily accessible nature education center whose story will focus on water, the Millbrook Marsh and the Spring

Historic link

A regional nature center will be created at the Centre Furnace Mansion near the University Park Campus.

Photo: Greg Grieco

Creek watershed, and also expand and enhance a well-known historical site closely associated with the birth of Penn State," said Robert Finley, assistant to the senior associate vice president for finance and business.

"The nature center and the mansion will be two key points of interest along a corridor park system that will follow our area's waterways, possibly

becoming linked with a network of biking and hiking paths."

CRRRA and the Centre Region Council of Governments, along with representatives of the ClearWater Conservancy and the State College Area School District, have been working closely with Penn State's Shaver's Creek Environmental Center to develop complementary programs and explore staffing possibilities and exhibit ideas. Planned activities include operating CRRRA parks programs at the nature center, setting up permanent displays that highlight the relationship between the Spring Creek watershed and the Chesapeake Bay, and building boardwalks that give people a closer but unobtrusive look at the conditions in Slab Cabin Run and Thompson Run. Biking and hiking paths would link the site to other parts of the proposed corridor park.

The area is the site of the first charcoal-furnace iron-making in Centre County. The historical society hopes to build a new facility to house its historic collections and an educational center, leaving the mansion free to function solely as a historic house. The mansion now houses some historical and educational exhibits, but a new facility would make larger exhibits possible.

The mansion and the furnace itself represent a historic link to the beginnings of Penn State. In 1855, when the state agricultural society was looking for a site for an agricultural school, the owners of the Centre Furnace iron-making operation offered land and other support for the agricultural school that eventually became Penn State.

The 63.2-acre parcel that will be leased to CRRRA is composed of a 12.4-acre parcel known as "Farm 12," which includes a residence, a main barn, a horse barn and several outbuildings, and a 50.8-acre parcel previously owned by but recently given to the University by Clover Highlands Associates, State College. The larger parcel makes up most of Millbrook Marsh.

The buildings on the smaller parcel are aging and the property is not contiguous to any other Penn State property.

The 4.8-acre parcel that will be leased to the historical society consists of a one-acre parcel now used by the society for parking under a license agreement and an additional 3.8-acre parcel west of Porter Road that includes the Centre Furnace Stack. Anticipated improvements include enhancements to the historical display of the stack and other improvements to the entranceway.

Retirement

continued from page 1

not only the needs of its residents but also the educational and research needs of Penn State students and faculty.

A properly designed and operated retirement community at Penn State can provide valuable services to its residents, enhance the already close relationship between Penn State and its alumni, and promote increased educational opportunities for Penn State students and faculty, said President Graham B. Spanier.

In general, retirement communities of the kind envisioned by Penn State provide several levels of services for retirees: independent living, for those who can care for themselves; assisted care, for retirees who need some help with personal needs, but are largely self-sufficient; and skilled care, which usually provides high-level care in a nursing-home environment.

During the meeting, the board heard presentations from Martin Satava, executive vice president of development at CRSA, and Robert Poole of Pinnacle Development, who is also president and CEO of S&A Custom Built Homes, State College. They told the board that CRSA/Pinnacle has extensive experience in developing and operating retirement communities and planned unit communities.

William H. McKinnon, senior associate vice president for finance and business at the University, said the review team believes that the CRSA/Pinnacle group "brings extensive experience to the project, has a thorough knowledge of the local market, and is well qualified to develop and operate 'The Village at Penn State.'"

The next steps for the Penn State review team are

Potential Benefits of the "Village at Penn State"

- Increased educational opportunities for students and faculty.
- A volunteer retiree service corps could bring expertise to the University and the community.
- The Hershey Medical Center would be involved in providing medical care to residents of the retirement community.
- No University funds would be used to develop the project, and Penn State would not own or operate the facility. But the facility would generate some revenue for Penn State.
- The retirement village would have access to

University programs, services and facilities. For instance, the community could:

- use the services of and provide research opportunities for the College of Health and Human Development; and
- provide internships and work opportunities to Penn State students.
- Closer relationships would develop between the University and alumni residing at the retirement community, including increased opportunities for philanthropic support of Penn State and its programs.

to work out an agreement with CRSA/Pinnacle that will:

- specify a site for the Village;
- outline University participation on the boards that would run it;
- provide for joint review of project development plans and approvals at key points in the development process;
- allow the use of the University name; and
- define how the Penn State Alumni Association will provide marketing assistance for the project.

As it is currently envisioned, the Village at Penn State would consist of two distinct kinds of facilities: a planned unit development (PUD) for younger retirees and a continuing care retirement community (CCRC) for those who want to ensure the availability of long-term care.

Penn State would not use any University funds to develop the project, and would not own or operate the facility. But both parts of the retirement village would have access to University programs, ser-

vices and facilities that would benefit the Village and its residents as well as the University and its students. As a whole, the Village would involve:

- The Hershey Medical Center, in providing medical care;
- the College of Health and Human Development, in doing research and providing services; and
- the Alumni Association, in promoting and marketing the Village, especially to Penn State alumni, faculty and staff.

In addition, a retirement community associated with Penn State would be able to provide internships and work opportunities to Penn State students in health planning and administration, recreation and leisure activities, hotel and restaurant management, human development and family studies, nursing, nutrition, kinesiology, gerontology and other related disciplines. It could also be tied into Penn State classes, athletics and cultural events.

In recent stories in several national, regional and area newspapers, the State College area was described as a community highly attractive to retirees.

United Way goal is \$450,000 for University Park

With enthusiasm and a dedicated commitment to succeed, leaders of the 1996 United Way Campaign have announced a fund-raising goal of \$450,000 for the University Park Campus. The goal represents about one-third of the county-wide goal of \$1.35 million.

The new goal was announced at a kickoff reception hosted by the Nittany Lion Inn and attended by United Way team leaders and members and United Way staff members and agency executives.

"The United Way Campaign at

University Park has made tremendous strides in the last several years," Tim Curley, director of athletics and 1996 campaign chair, told the group. "Because of the great things accomplished last year, we are ready to move to another level.

"Achieving our goal will take a lot of planning and effort and a lot of people and time. Because of your involvement, we are positioned to kick off the campaign at a high level."

Penn State President Graham B. Spanier urged the team leaders and members "to take the extra mile by encouraging your fellow employees to

give and also to set their sights as high as they can in terms of giving."

Calling the United Way "an immensely important activity for all of us," he said supporting the United Way will improve the quality of life for all of Centre County.

"We all have a stake in making this a better place to live. The more we improve the quality of life here, the better it will be for Penn State.

"The University has a very special responsibility because it is the major employer in the region. We have the ability to make the campaign work or contribute to its failure. I'm very enthusiastic about what is possible in

terms of reaching and even exceeding our goal."

Norma Keller, of the Centre County Youth Service Bureau, described some of the services provided by the bureau, just one of 30 United Way agencies in Centre County.

"I have seen the dramatic impact the United Way has had on children in Centre County," she said. "However, member agencies are being asked to provide more and more services while facing drastic cutbacks in federal and state funding. More than ever, this is the year we need the United Way."

Penn Staters

Dinesh Agrawal, associate professor of materials science and senior research associate in the College Materials Research Laboratory, gave an invited talk on "NZP: A New Family of Low-Temperature Expansion Ceramics, Rad-Waste Forms and Supercritical Conductors" at the Institute of Research and Innovation, Tokyo and at Hitachi Ltd., Ibaraki, Japan.

Linda Burton, professor of human development and sociology in the College of Health and Human Development, presented a plenary lecture called "Integrating the Study of Context and Multigenerational Family Processes: Clinical Implications" at the American Family Therapy Academy's 1996 annual meeting.

She also received the America Family Therapy Academy's 1996 Award for Innovative Contributions to Family Research. The award recognized Burton's work in studying three generations of African American families in urban settings, with a special focus on teen-age mothers, their mothers and their grandmothers.

James Finley, assistant professor of forest resources, has been named to the board of advisers for the International Symposium on Society and Resource Management.

Robert Killoren, director of the Office of Sponsored Programs, was awarded the 1996 Excellence Award by the Society of Research Administrators. The award is made each year to an individual who represents the best attributes of research administration and has contributed greatly to the society. The award recognizes Killoren's work in electronic research administration, his knowledge and performance of research administration, his development of new research administration tools and his mature philosophy of research administration.

Ruth Leventhal, professor at The Milton S. Eisenhower Medical Center and former provost and dean of Penn State Harrisburg, was recently presented with a "lifetime achievement" award by the Family and Children Services Board of Directors. The award recognizes Leventhal's work over the past 10 years on the CR2000 Plan for Education, which she chairs. The program is one of the many facets of the Council for Public Education, a business/education partnership to improve education in the Capital Area.

Gary L. Messing, director of the Particulate Materials Center and professor of ceramic science and engineering, presented an invited paper on "Pow-

der Synthesis and Production in the 21st Century" at the Keramische Prozeßtechnik in Berlin, Germany. He also presented at the Korea-Japan-U.S. workshop on "Microstructure Development in Materials" in Taejeon, Korea. His talk was on "Seeding for the Templating of Unique Ceramic Microstructures." In addition, Messing chaired a session in Taejeon on abnormal grain growth and simulation of microstructural evolution.

Gerald Moser, professor emeritus of Portuguese, gave an invited paper at the 26th annual meeting of the Canadian Association of African Studies at McGill University in Montreal. The title of his talk was "Birth of Literature: A Comparison Between the Luso-African Literatures and Medieval Western European Literatures." Moser also gave an invited presentation on "The Theme of Childhood in the Works of Classic Luso-African Authors" at the International Federation for Modern Languages and Literatures in Regensburg, Germany.

Robert E. Newham, associate director of the Intercollege Materials Research Laboratory and Alcoa professor of solid state science, was an invited speaker at the International Symposium on Applications of Ferroelectric Thin Films in Shizuoka, Japan. His talk was on "Size Effects in Ferroic Oxides."

Jonathan Phillips, professor of chemical engineering, was the keynote lecturer on the subject of the use of calorimetry to study catalysts at the 11th International Conference on Thermal Analysis and Calorimetry. Earlier this summer, Phillips was an invited lecturer and panel member at a special NSF-sponsored conference on Calorimetry in Catalysis held in Mayaguez, Puerto Rico.

William R. Schmalstieg, Edwin Erle Sparks professor of Slavic languages, gave an invited lecture on the Old Prussian language at a conference titled "Colloquium Pruthenicum Secundum" in Cracow, Poland.

University Archivist Lee Stout has been named a Fellow of the Society of American Archivists, the highest individual honor bestowed by the society. Established in 1957 and conferred annually, this distinction is awarded to a limited number of individuals for their outstanding contribution to the archival profession.

The Society of American Archivists, founded in 1936, is North America's oldest and largest professional archival association.

Faculty/Staff Alerts

Tax reinstated

A new federal law reinstated the tax exemption of the undergraduate tuition discount benefit received by Penn State employees and their families. But for all University employees and their spouses using the benefit for graduate-level courses, this benefit became taxable effective July 1, according to the law which was passed in August.

Effective with the fall 1996 semester, the benefit for graduate-level tuition discount will be reported as income on the employee's W-2 form and will be subject to withholding tax. It is estimated to affect approximately 600 people.

In order to reduce the impact of this withholding as much as possible, the amount of the benefit will be reported in thirds. This amount will then be added into either the October, November and December monthly payrolls, or the Oct. 25, Nov. 8 and Nov. 22 biweekly payrolls.

However, the tax exemption pertaining to the undergraduate benefit expires June 30, 1997, according to the new law, and will be subject to review at that time.

Thanksgiving holiday

Because of the Thanksgiving holiday, the *Intercom* deadline for the Dec. 5 issue will be noon Tuesday, Nov. 26, instead of Wednesday. Copy to be included in *Intercom* can be e-mailed to lm8@psu.edu or axm219@psu.edu.

Courses offered

The following courses are being offered by the Human Resource Development Center. To register for free courses, please call (814) 865-8216. For a course description, please consult the HRDC course catalog or log-in to the Web site at <http://www.ohr.psu.edu/> and click on the button for HRDC. Registration for fee-based courses requires a completed registration form on page 67 of the HRDC course catalog.

Coaching for Exceptional Performance

Meets from 8:15-11:45 Friday, Nov. 22, in 319 Rider Building. Cost: \$35.

Redefining Your Roles in an Electronic Office

This new workshop will help you to understand the vocabulary of information technology and gain a better understanding of how information technology is changing the workplace. Meets from 1:15-4:30 p.m. Monday, Dec. 2, in 319 Rider Building. Cost: \$35.

Avoiding Burnout: Balancing Your Life at Home and Your Career

Meets from 8:30-11:30 Tuesday, Dec. 3, in 118 Agricultural Science and Industries Building. Cost: \$35.

Continuous Achievement: How to Increase Effectiveness at Work

Meets for two sessions 8:30-11:45 a.m. Tuesday and Thursday, Dec. 3 and 5, in 319 Rider Building. Cost: \$55.

The ARTS

AT PENN STATE

Photography exhibit

Ed Leos, a longtime photographer and retired professor of journalism, will have his photographs on display in the Hetzel Union Building Formal Gallery on the University Park Campus through Dec. 7.

Photo: Greg Grieco

"Opera Intermezzo"

The Pennsylvania State University Opera Theatre will present three performances of *Opera Intermezzo*, a program of staged scenes from some of the great operas. Performance times are 8 p.m. Friday and Saturday, Nov. 8 and 9, and a Sunday matinee at 4 p.m. Nov. 10. The performances will be held in the School of Music Recital Hall on the University Park Campus.

The performers in *Opera Intermezzo* are students who are studying voice in the School of Music. Susan Boardman, associate professor of music, is the director of the Penn State Opera Theatre. Admission is \$4 at the door.

Dance performance

The Lewitzky Dance Company, on its last tour, will perform at 8 p.m. Saturday, Nov. 9, in Eisenhower Auditorium on the University Park Campus. The event is sponsored by the Center for the Performing Arts.

Bella Lewitzky is the company's choreographer and master teacher. Her company is the only one of the top six modern dance companies based outside of New York.

Tickets are \$22.50 for non-students and \$18.50 for students. For tickets or more information, contact the Arts Ticket Center at (814) 863-0255. Outside the local calling area, phone (800) 278-7849.

Children's concerts

Cathy Fink and Marcy Marxer will perform two concerts for children at 2 and 4 p.m. Sunday, Nov. 10, in Eisenhower Auditorium on the University Park Campus. The performances are sponsored by the Center for the Performing Arts.

Singing and yodeling in fine harmony, the two will perform songs from their award-winning children's albums "Air Guitar," "Help Yourself!" and "When The Rain Comes Down." They accompany themselves on hammered dulcimer, steel drums, five-string banjo, electric and acoustic guitar, spoons and a variety of other instruments.

Tickets are \$7 for general admission and students, and \$4.50 for children 12 and younger.

For tickets or more information, contact the Arts Ticket Center at (814) 863-0255. Outside the local calling area, phone (800) 278-7849.

Oriana Singers to give autumn concert

The Oriana Singers, under the direction of Lynn Dralfal, assistant professor of music education, will present their autumn concert "Cantate" at 7 p.m. Sunday, Nov. 10, in the School of Music Recital Hall on the University Park Campus. The 70-voice treble

choir will be accompanied by pianist Sarah Spraitzer and organist Shannon Love. "Discantus," a small, self-conducted ensemble of members of the Oriana Singers also will perform. Tickets are \$4 and \$2 available at the door.

Violin and piano recital

Violinist Rolando Freitag and pianist Kathy Cinal will present a free recital at 8 p.m. Monday, Nov. 11, in the School of Music Recital Hall on the University Park Campus.

Performance art in Zoller Gallery

"Ardent Agendas: An Evening of Performance Art" by the Penn State Performance Art Collective and Neptune" will occur at 7 p.m. Tuesday, Nov. 12, in the Zoller Gallery in the Visual Arts Building on the University Park Campus.

The Penn State Performance Art Collective consists of current and former students of Art 497C, a performance art class taught by Charles Gariani, associate professor of art education. The members perform autobiographical works dealing with contemporary cultural issues affecting art and the body such as race, gender, ethnicity and sexual orientation.

The rock band Neptune will also perform, presenting a mix of music, performance and art. The band's instruments are constructed from industrial salvage. Using alternative tunings and the peculiar sounds of their instruments, the band will perform a set of original post-industrial rock to cap off the evening.

The Zoller event is free to the public and serves as a kick-off event to the Performance Art, Culture, Pedagogy Symposium to be held Nov. 13-16.

Poet to appear at Behrend

Renowned American poet Suzanne Gardinier will read her poetry at Penn State Erie, The Behrend College, at 7 p.m. Tuesday, Nov. 12. Her presentation, which is open to the public, will take place in the Reed Union Building Lecture Hall.

Gardinier is the author of *The New World*, a book-length poem, and *A World That Will Hold All People: Essays on Poetry and Politics*.

Flute ensemble concert

The 13-member Penn State Flute Ensemble, directed by Eleanor Duncan, associate professor of flute, will present a free program of chamber music for flutes at 8 p.m. Wednesday, Nov. 13, in the School of Music Recital Hall on the University Park Campus.

Employing a wide range of instruments in the flute family, the flute ensemble will perform works drawn from a baroque, classical and contemporary repertoire.

Jeanne Provance, a graduate teaching assistant in flute, will conduct selections for the full flute choir. Greg Woodbridge, graduate teaching assistant in conducting, will also direct.

Bach's Lunch

The Singing Lions, a traveling show choir directed by Peter Kiefer, will perform a Bach's Lunch concert at 12:10 p.m. Thursday, Nov. 14, in the Helen Eakin Eisenhower Chapel on the University Park Campus.

The 20-minute free concert is part of the Bach's Lunch series sponsored by the School of Music and the University Lutheran Parish.

The Singing Lions consists of 10 singers, an instrumental trio and a six-member technical crew. The group will present a program of Broadway and jazz music, along with a bit of nostalgia. The "West Side Story" medley will be the highlight.

Audience members may take their own bag lunches to eat after the concert in the Roy and Agnes Wilkinson Lounge. Coffee and tea will be provided.

Stories to be performed

On Saturday, Nov. 15, and Sunday, Nov. 16, student performers will honor three stories which won the 1996 Kate Lehman Award in readers theatre performances. Performances begin at 8 p.m. in Kern Auditorium on the University Park Campus. Admission is free.

The three stories will be "Painting Tilt Down" by Brendan McGuire, "Rainy Day Women" by Patrick North and "Swans" by Tess Thompson. Each won the Kate Lehman Award for student fiction in open competition last spring. The pieces will be directed by students Crissa Lynn, Ray Kelly and Brian Mehalich, respectively.

Doll exhibit

The original dolls of Janet Robinson are featured in an exhibit at Kern Building on the University Park Campus through Nov. 17.

The exhibit of paper twist dolls includes angels, Victorian dolls, Amish dolls and dolls of diverse ethnic backgrounds.

Kern Exhibition Area is on the first floor in Kern Graduate Building.

Photo exhibit

The Hetzel Union Building Formal Gallery on the University Park Campus features the photography of Ed Leos through Dec. 7.

The exhibit, a retrospective, features Leos's early work from the 1940s to the present day.

A reception, sponsored by a grant from the Historical Collections and Labor Archives, will be held from 4 to 6 p.m. Tuesday, Nov. 12, in the Formal Art Gallery.

Leos, retired Penn State professor of journalism, began his photography career in New York City in fashion and commercial work. A photographer, teacher and researcher, he was named "The Teacher/Photographer of the Year" in 1976 by the PJ Division of the Association for Education in Journalism.

UNIVERSITY PARK CALENDAR

SPECIAL EVENTS

Friday, November 8

- Gallery Talk, 3 p.m., Palmer Museum of Art, Christoffers Lobby. Catherine Ciferri on "Ancient to Renaissance Art of the Palmer Museum."

- School of Music, 8 p.m., Recital Hall. "Opera Intermezzo," Susan Boardman, director, through Nov. 9. For tickets, call (814) 865-0431.

- Graduate Student Association, 8:30 and 8:30 p.m., 112 Kern. Film, "Gold Comfort Farm," through Nov. 9.

- Graduate Student Association, 7 and 9 p.m., 101 Chambers. Film, "Unforgettable Summer," through Nov. 9.

- The Bryce Jordan Center, 7:30 p.m. "Smashing Pumpkins." For tickets, call (814) 865-5555.

Saturday, November 9

- Center for the Performing Arts, 8 p.m., Eisenhower Auditorium. "Lewitzky Dance Company." For tickets, call (814) 863-0255.

- The Bryce Jordan Center, 8 p.m., "Wynonna." For tickets, call (814) 865-5555.

Sunday, November 10

- School of Music, 2 p.m., Recital Hall. "Penn State Oriana Singers." Lynn Ellen Drafla, conductor. For tickets, call (814) 865-0431.

- Center for the Performing Arts, 2 and 4 p.m., Eisenhower Auditorium. "Cathy and Marcy." For tickets, call (814) 863-0255.

- School of Music, 4 p.m., Recital Hall. "Opera Intermezzo," Susan Boardman, director. For tickets, call (814) 865-0431.

- School of Music, 8 p.m., Recital Hall. "The Penn State Flute Ensemble." Eleanor Duncan Armstrong, director.

Tuesday, November 12

- Spanish Club, 7 p.m., Lipson Auditorium. Film, "The Family."

- School of Visual Arts and Performance Art, 7 p.m., Zoller Gallery. "Penn State Performance Collective."

Wednesday, November 13

- School of Music, 3 p.m., Recital Hall. "Penn State Mallet Ensemble Concert." Dan C. Armstrong, conductor.

Thursday, November 14

- School of Music, 12:10-12:30 p.m., Eisenhower Chapel. Bach's Lunch Concert features "The Singing Lions."

- Palmer Museum of Art, 2 p.m. Gallery Talk, Mary F. Linda on "The Gods Must Be Hungry."

Friday, November 15

- Palmer Museum of Art, 2 p.m., Christoffers Lobby. Gallery Talk, Sarah Andrews on "Portraiture in American Art."

- Graduate Student Association, 7 and 9 p.m., 101 Chambers. Film, "Nellie et Monsieur Armand," through Nov. 16.

- The Bryce Jordan Center, 7:30 p.m. "World Gold Gymnastics Tour." For tickets, call (814) 865-5555.

Saturday, November 16

- School of Music, 8 p.m., Recital Hall. Piano recital by Steve Grazzini.

- Center for the Performing Arts, 8 p.m., Eisenhower Auditorium. "Czech Philharmonic Orchestra." For tickets, call (814) 863-0255.

Sunday, November 17

- School of Music, 3 p.m., Eisenhower Auditorium. "Combined School of Music Choirs and Philharmonic Orchestra." For tickets, call (814) 863-0255.

- Max Kade German-American Research Institute, 3:30-5:30 p.m. at 304 Burrows Building. Open House with Saur Bible and Mary's Mirror on display, continuous showing of videos on history and heritage of German immigration; 4-4:30 slide presentation by Director of Institute on JFK's book "A Nation of Immigrants: The Germans." Refreshments.

SEMINARS

Friday, November 8

- Accounting, 3:30 to 5 p.m., 333 Beam. Jagan Krishnan on "Litigation Risk and Auditor Resignations."

- Economics, 3:30 p.m. 420 Kern. Most Raff on "Optimal Export Policy in the Presence of Informational Barriers to Entry and Imperfect Competition."

- Geography, 4 p.m., 206 Walker. Dennis Thomson on "Selling (7) Science to Skeptics."

- Spanish Club, 7 p.m., Palmer Museum of Art, Lipson Auditorium. Javier Escudero presents a slide show on Peru.

One in a series

F.W. deKlerk, former president of South Africa, spoke on the University Park Campus on Oct. 29. His visit was part of the Distinguished Speakers Series. The next speaker in the series will be Academy Award-and Golden Globe-winning actress Olympia Dukakis, who will discuss women's issues at 8 p.m. Nov. 18 in Schwab Auditorium on the University Park Campus. For details, please see the story on page 11.

Photo: Greg Grieco

Monday, November 11

- Comparative Literature, 12:15 p.m., 101 Kern. Chiyo Kawaami on "Tokyo: Hybrid Narrative Space in the Works of Izumi Kyoka (1873-1939)."

- Agricultural and Biological Engineering, 12:20 p.m., 239 Agricultural Engineering. Paul Heilmann and Jeff Renner on "Computer Resources, Challenges and Opportunities."

- Australia-New Zealand Studies Center, 1:30 p.m., 112 Weaver. John McCarthy on "Moving from Washington to Jakarta-From Warm Spot to Hot Spot?"

- Gravity Center, 2 p.m., 339 Davey Lab. Juan Maldacena on a subject to be announced.

- Physics, 3:30 p.m., 339 Davey Lab. Colin Broholm on "Field Induced Incommensurate Spin Correlation in a One-dimensional S=1/2 Antiferromagnet."

- Residence Life, 7 p.m., Schwab Auditorium. Jacob Holt on "American Pictures."

- Physics, 8 p.m., 112 Kern. William Phillips on "Time, Einstein and the Coldest Stuff in the Universe."

Tuesday, November 12

- Physics, 3:30 p.m., 117 Osmond Lab. William Phillips on "Optical Lattices: Atomic Physics Meets Solid State."

- Geosciences, 4 p.m., 112 Walker. Andrew Nyblunde on "The African Superswell."

- Nutrition, 4 p.m., 110 Wartik Lab. James Rosenberger on "Meta-Analysis: Combining Statistical Evidence from Multiple Studies."

- Biology, 4 p.m., 8 Mueller Lab. Vivian Budnik on "Genetic Analysis of Synaptic Development and Ion Channel Clustering in Drosophila: Role of Discs-Large."

- Palmer Museum, 6 p.m., Lipson Auditorium. Mary Louise Krumme on "Cézanne's Cardplayers: A Game of Life."

Wednesday, November 13

- Gerontology Center, 12-1 p.m., 101 Health and Human Development East. Kathleen Woodward on a subject to be announced.

- Center for Linguistics, 12:15-1:15 p.m., 205 Burrows. Lara Lomicka on "Conversation as Cooperation in the Foreign Language Classroom."

- Physics, 2:30 p.m., 201 Thomas Building. William Phillips on "Do We Understand Laser Cooling?"

- Engineering Mechanics, 3:35 p.m., 214 Hammond. Brad Lerch on "SiC/Ti Composites."

- Department of English, the Institute for the Arts and Humanities Studies, the Research and Graduate Studies Office of the College of the Liberal Arts and the Mary Rollins Fund, 7:30 p.m., 112 Walker. David Quammen will read from his work, Song of the Dodo.

Thursday, November 14

- Ceramics, 11 a.m., 301 Steidle. Paul Ducheyne on "The Mechanisms of Bone Bonding of Bioactive Ceramics."

- Ecology, 3:45, 106 Bocke. Steve Beckerman on "Patience and its consequences in a South American Indian tribe."

- Computer Science and Engineering, 4 p.m., 302 Pond Lab. Pavel Pevzner on "Spliced Alignment: A New Approach to Gene Recognition."

- Econometrics, 4 p.m., 420 Kern. Jinyong Han, "On the Role of Propensity Score in the Efficient Semiparametric Estimation of the Average Treatment Effects."

- Archaeological Institute of America, 8 p.m., 101 Kern. E. Marianne Stern on "Hellenistic Luxury Glass."

- Landscape Architecture, 8 p.m., 101 Thomas Building. Donald Worster will speak on a subject to be announced.

Friday, November 15

- Undergraduate Studies, 12-1 p.m., 305 Hetzel Union Building. Robert Pangborn on "Advising for 'The Penn State Education: A New View of General Education.'"

- Geography, 4 p.m., 206 Walker. David Rain on "The Eaters of the Dry Season: A Geographical Portrait."

- Philosophy, 4 p.m., 124 Sparks. Rebecca Comay, author; Karen Ir, Peter Grot and Maria Taler, panelists and Greg Recco, moderator discuss the work of Walter Benjamin.

CONFERENCES

Friday, November 8

- "New Voices in Relativity and Quantum Gravity," through Nov. 10. Conference will be held at the Days Inn on Nov. 8 and 9 and at 101 Osmond on Nov. 10.

Saturday, November 9

- Gender Equity Conference, The Penn State Scanticon. Keynote address, "Empowering Ourselves and Others," Sabrina Chapman.

Tuesday, November 12

- Penn State Golf Turf Conference, The Nittany Lion Inn, through Nov. 14. To register, call (814) 863-1017 or (814) 863-3475.

- Teen Pregnancy Prevention Conference, The Penn State Scanticon, through Nov. 13. Keynote address by Laurie Zabin.

EXHIBITS

The HUB Art Alley

- Drawings by Christine Meyer, through Nov. 17.

- Ceramics and stained glass by Shahnaz Lofli, through Nov. 17.

The HUB Formal Gallery

- Photography by Ed Leos, through Dec. 7.

Kern Exhibition Area

- Doll exhibit by Janet Robinson, through Nov. 17.

- Coin art and jewelry by Claire Allison Ruliser, through Nov. 17.

- Photography by Mindy Hans, through Nov. 17.

Palmer Museum

- "Cooking for the Gods: The Art of Home Ritual in Bengal," through Dec. 8.

- "When Cal Was King: Paintings from the Steidle Collection, College of Earth and Mineral Sciences," through Dec. 8.

- "Abstraction to Figuration: Selections of Contemporary Art from the Pincus Collection," through Dec. 15.

- "The Wood Engravings of Warren Mack," through Jan. 5.

- Reflects an international perspective.

LECTURES

USA Today founder to give luncheon lecture

The newly created Penn State National Issues Forum will be given by John J. Curley, founding editor of *USA Today*, on Friday, Nov. 22, at the Nittany Lion Inn on the University Park Campus. A buffet lunch will begin at 11:30 a.m., followed by the 30-minute talk and a question-and-answer period.

Curley, also chairman, CEO and president of Gannett Co. Inc. and chairman of the Newspaper Association of America, will discuss "The Role of the Press in the New Media Explosion." Gannett, one of the largest news and information companies in the United States, has operations in 44 states, the District of Columbia, Guam, the Virgin Islands, Great Britain, Hong Kong and Switzerland. The company publishes 92 daily newspapers which have a combined daily paid circulation of about 6.6 million. This includes *USA Today*, which is also available internationally in more than 90 countries throughout Asia, Europe, North Africa and the Middle East.

Curley was the first editor of *USA Today*, which began publishing in 1982. He has been with Gannett since

1969, and has worked as an editor and publisher for various papers in the Gannett chain and also headed Gannett News Service for six years. During that time GNS won the Pulitzer Prize for Public Service.

In April 1983 Curley was named president of the newspaper division, and in March 1984, he became president and chief operating officer of the company. In 1986, he was made CEO and in April 1989, was named chairman, continuing as president and CEO. Curley has been a member of the board of directors for Gannett since 1983.

He received his bachelor's degree in political science from Dickinson College in 1960 and his master's degree in journalism in 1963 from Columbia University in New York. He is a trustee of Dickinson College and chairman of the Board of Visitors of Penn State's College of Communication.

The talk, sponsored by the Faculty Staff Club, will be aired at a later time on WPSU radio. Tickets for the event are \$10 and reservations can be made by mail or by stopping by the Faculty Staff Club office at 110 HUB. For more information, call (814) 865-7590.

Kickoff Bracken Lecture highlights sublime nature

Donald E. Worster, Hall Distinguished Professor of American history at the University of Kansas, will be the first speaker in this year's John R. Bracken Lecture Series. The lecture, "Nature Sublime, Nature Subdued: John Wesley Powell and the Colorado River," is scheduled for 8 p.m. Thursday, Nov. 14, in 101 Thomas Building on the University Park Campus.

Born in Needles, Calif., Worster spent the first two decades of his life in the West. He received his bachelor of arts and master of arts degrees from the University of Kansas and a Ph.D. in American studies from Yale University. He is nationally recognized for his expertise in environmental history. He taught at Brandeis University, the University of Hawaii and the University of Maine before accepting

Donald E. Worster

his current position at Kansas.

Worster is the author of numerous publications, including *Nature's Economy: History of Ecological Ideas* and *The Dust Bowl: The Southern Plains in the 1930s*, for which he was awarded the Bancroft Prize in American history in 1980. Worster also has been twice nominated for the Pulitzer Prize. In addition to those honors, he has received fellowships from the Guggenheim Foundation, the American Council of Learned Societies, the Mellon Foundation, the National Endowment for the Humanities and the Australian National University.

The Bracken Lecture Series is sponsored by the Department of Landscape Architecture in the College of Arts and Architecture and the Department of History in the College of the Liberal Arts.

The lecture is free to the public.

Explore "Cool Physics" at Nov. 11-13 lectures

William D. Phillips, Fellow at the National Institute of Standards and Technology in Gaithersburg, Md., will present the Russell Marker Lectures in the Physical Sciences on Nov. 11, 12 and 13 on the University Park Campus.

The three-lecture series, titled "Cool Physics," is sponsored by the Department of Physics and the Eberly College of Science, and is free to the public.

The schedule includes a lecture intended for a general audience: "Time, Einstein and the Coldest Stuff in the Universe," at 8 p.m. Monday, Nov. 11, in 112 Kern Building; a more specialized colloquium, titled "Optical Lattices: Atomic Physics Meets Solid State," at 3:30 p.m. Tuesday, Nov. 12, in 117 Osmond Laboratory; and a specialized lecture titled "Do We Understand Laser Cooling?" at 2:30 p.m. Wednesday, Nov. 13, in 201 Thomas Building.

Phillips heads a pioneering group in the study of laser cooling and trapping of atoms. This manipulation of the motion of atoms and other microscopic objects has wide impact on such fields as laser-induced chemistry,

William D. Phillips

precision measurement and biomedical applications.

Phillips was born in Wilkes-Barre and received his bachelor's degree in physics from Juniata College. He received his doctorate from the Massachusetts Institute of Technology in 1976 and pursued postdoctoral studies there as a Chaim-Weizmann Fellow. He joined the National Institute of Standards and Technology

in 1978 and was named a Fellow in 1995. In 1992 he was appointed adjunct professor of physics at the University of Maryland.

His honors include gold and silver medals from the Department of Commerce, fellowship in the American Academy of Arts and Sciences and the Michelson Medal from the Franklin Institute. He also is a distinguished traveling lecturer for the American Physical Society.

The Marker Lectures were established in 1984 through a gift from Russell Earl Marker, professor emeritus of chemistry, whose pioneering synthetic methods revolutionized the steroid hormone industry and opened the door to the current era of hormone therapies, including the birth control pill.

Workshop to examine "Psychology of Discipline"

Robert T. Tauber, professor of education at Penn State Erie, The Behrend College, will offer a one-day workshop based on his course Psychology of Discipline on Dec. 10 at the Penn State Scanticon. Tauber will discuss the standards upon which teachers can base their own discipline style. The workshop will emphasize developing your own discipline style as a synthesis of six main models of discipline. The Psychology of Discipline workshop will be useful to teachers, education students or others involved

in the classroom. Qualified individuals may earn one in-service credit through the CIU by engaging in independent study after the workshop.

Tauber has more than 30 years of teaching experience at both public schools and universities. He has been both a principal and a superintendent, and is the author of six books on classroom management. A reduced fee is available for full-time students. For the fee schedule and more information call Carol Hodes at (814) 865-7679 or Robert Tauber at (814) 898-6208.

Learn about Greek glassware Nov. 14

It doesn't require a lungful of hot air to produce beautiful glassware. Before the Romans invented the technology of glassblowing, the Greeks shaped hot glass on a potter's wheel into elaborate vases, cups, bowls and boxes, which reached their peak of sophistication during the Hellenistic Period, from 323 to 31 B.C.E. Classical archaeologist E. Marianne Stern will discuss "Hellenistic Luxury Glass" at 8 p.m. Thursday, Nov. 14, in 101 Kern

Building on the University Park Campus.

Stern, a native of the Netherlands, received her Ph.D. from the University of Amsterdam. Although her current focus is archaeology, she began as a classicist, specializing in Greek philology. Her study of ancient glass is more an academic: she has been a glassblower herself for 10 years.

The lecture, which is free to the public, is sponsored by the Archaeological Institute of America.

More Lectures

Program offers glimpse of little-seen America

"American Pictures," a multimedia program by Jacob Holdt, will be presented at Schwab Auditorium on the University Park Campus at 7 p.m. Monday, Nov. 11.

Portrayed in music, words and more than 3,000 photographs, "American Pictures" is Holdt's in-depth analysis of the America that he witnessed ... an America that most people have never known. Holdt hitchhiked 118,000 miles through America and lived in more than 400 homes, from the poorest sharecroppers, drug pushers and prostitutes, to some of the wealthiest families, including the Rockefellers.

Starting out with only \$40 in his pocket, Holdt sold blood twice a week in order to buy film for his camera.

For more information, contact Karen in the Office of Residence Life at (814) 863-1710.

Cézanne expert to present lecture Nov. 12

Mary Louise Krumrine, associate professor of art history, will present a lecture, "Cézanne's Cardplayers: A Game of Life," at 6 p.m. Tuesday, Nov. 12, in the Palmer Lipson Auditorium of the Palmer Museum on the University Park Campus.

An internationally recognized authority on Cézanne, Krumrine during 1996 was called on to review the Cézanne exhibition for Britain's *Burlington Magazine* while the exhibition was at the Grand Palais in Paris. This past spring she participated in the BBC production of "Three Colours of Cézanne," filmed in conjunction with the exhibition, and presented papers on the subject at the Colloque Cézanne Musée d'Orsay, Paris, and The Art and Influence of Paul Cézanne: An International Symposium at the Philadelphia Museum of Art.

The event is free to the public. Following the lecture, there will be a reception honoring Krumrine's retirement.

Wired executive to visit Penn State Behrend on Nov. 13

John Battelle, executive managing editor and one of three founding editors of *Wired* magazine, will speak at Penn State Erie, The Behrend College, at 7:30 p.m. Wednesday, Nov. 13, in the Reed Union Building Commons. His presentation, "Wired for the '90s," continues the 1996-97 Speaker Series.

A National Magazine Award-winning publication, *Wired* covers the people, companies and ideas that form the digital revolution.

Battelle, 30, joined *Wired* from *The Los Angeles Times*, where he worked after completing the master's program in journalism with an emphasis in media at the University of California at Berkeley. While in graduate school Battelle founded *The Pacific*, a magazine devoted to covering Pacific Rim issues, and before that he was a senior writer and contributing editor at *MacWEEK*, an industry trade journal.

Talk gives new view of general education

"Advising for 'The Penn State Education': A New View of General Education" is the topic of a brown-bag advising lunch, to be held from noon-1 p.m. Friday, Nov. 15, in 305 HUB at University Park. Robert Pangborn, associate dean, College of Engineering, and chair of the model subcommittee on general education, will lead the discussion. All faculty/staff interested in academic advising issues are welcome to attend.

Sponsored by the Division of Undergraduate Studies, the brown-bag lunch series provides advisers with an opportunity for professional development and networking. For more information, contact Laura Brown, 205 Grange Building, at (814) 865-7576, or LRB1@oas.psu.edu.

Social organization in East Africa probed Nov. 19

Francesca Declich from the London School of Economics and the University of Naples, Italy, will present a talk on matrilineality in East African societies from noon to 1:30 p.m. Nov. 19. Declich has lived both in Southern Somalia before the Civil War, and more recently in the Zigula region of Tanzania. Some of the Zigula she studied had lived in Somalia and had been descendants of slaves brought to Southern Somalia in the 19th century.

This talk, sponsored by the African and African-American Studies Department, will examine the importance of matrilineal social organization in modern East African societies. It is part of the Gender in Africa Speaker's Series.

Lecture ponders encounters with alien intelligence

"Human Encounters with Alien Intelligence," an illustrated lecture by Michael Lindemann, founder of the Visitors Investigation Project to conduct and publish UFO research, will be held at 7 p.m. Thursday, Nov. 21, in the Multipurpose Building at the Penn State Worthington Scranton Campus.

The lecture is free to the public.

Actress Olympia Dukakis to speak on women's issues

Olympia Dukakis, Academy Award and Golden Globe-winning actress in such films as "Moonstruck" and "Steel Magnolias," will speak about women's issues on Tuesday, Nov. 19, at 8 p.m. in Schwab Auditorium on the University Park Campus.

A 30-year veteran of stage and screen, Dukakis is a leading advocate for women's rights and an activist on other social and environmental issues. She is the creator of "Voices of Earth," a theatre project featuring four actresses who explore the relationship between women and "Mother Earth" from a historical perspective. She is a founding member of the National Museum of Women in the Arts, Washington, D.C., and a member of NOW, Women in Film, Broadway Cares, Amnesty International and New Jersey Choice.

Dukakis describes herself as

actress, director, producer, teacher, activist. She founded and served as artistic director of New Jersey's Whole Theater for 19 years, and sits on the boards of several influential arts organizations. She attained national recognition in 1988 for her work in the film "Moonstruck," winning the Academy Award for best supporting actress as well as the Golden Globe award, the New York Film Critics Award and the Los Angeles Film Critics Award.

Admission to the lecture is free, but tickets will be required. They will be available in Room 225 of the Hetzel Union Building (HUB). Dukakis's lecture, part of the Distinguished Speakers Series, is sponsored by the Programming Coordination Board and co-sponsored by the Panhellenic Council's Women's Awareness Week and The Center for Women Students.

Australian ambassador to speak Nov. 11

Ambassador John McCarthy, Australian ambassador to the United States, will speak on "Moving from Washington to Jakarta—From Warm Spot to Hot Spot?" at 1:30 p.m. Monday, Nov. 11, in 102 Weaver Building on the University Park Campus.

McCarthy is among Australia's most senior and experienced diplomats. Educated at Cambridge University, he practiced law in London and New York before his diplomatic career. That career has included earlier post-

John McCarthy

ings to Washington, D.C., ambassadorships to Vietnam, Mexico and Thailand, and service as deputy secretary of the Australian Department of Foreign Affairs and Trade. McCarthy will soon be reposted to Jakarta as ambassador to Indonesia, one of Australia's most important and sensitive relationships.

The seminar, sponsored by the Australia-New Zealand Studies

Center, is free to the public. For additional information, contact Patricia Corbett at (814) 863-1603 or by e-mail at pac9@psu.edu.

Learn to deal with disruptive students

For teachers and other professionals, dealing with students who display disruptive behaviors can be their worst nightmare. The conference "From Disrupter to Achiever—Helping All Students With Behavior and Motivation Problems Choose Success (including ADHD)," examines the failures of past approaches and proposes a new, unique and innovative approach to managing students with disruptive behaviors.

Teachers, guidance counselors, principals, administrators, school psychologists, nurses, mental health professionals, social workers and juvenile

justice officers need these vital new skills not only to help them understand and more effectively manage disruptive student behavior but also to encourage more appropriate behavior in the future.

"From Disrupter to Achiever" is being offered at both the Penn State Great Valley Campus (Nov. 22 and 23) and The Penn State Scenic (Dec. 6 and 7).

For more information about the content of the conference, please call James Levin at (814) 863-3889. For registration information, phone (800) PSU-TODAY.

Final STS talk focus to be agriculture

Herbert Cole, professor of agricultural sciences, will give the last presentation in the Science Technology and Society Fall Colloquium Series at noon Wednesday, Nov. 20, in 109 Walker Building on the University Park campus.

Cole will discuss "Sustainable Agriculture in Pennsylvania: The Sanruce Initiative." Faculty, staff, students and the community are invited to attend. For more information, contact the STS program office at (814) 865-9951.

News in Brief

Volunteers needed

Researchers in the Noll Physiological Research Center are looking for male research volunteers for a study examining the effects of regular exercise training on cardiovascular responses during exercise in the heat. Volunteers ages 18-30 or 65-75, non-smoking, are needed. One hour of supervised exercise training, cholesterol checks and body composition analysis will be provided. Anyone interested should call Carla at 865-1236.

Sessions offered

The following health-related sessions are being offered through the Office of Human Resources:

Conscious Eating

Learn how to turn lunch time into a powerful opportunity to break the stress cycle of your day and return to work refreshed and rejuvenated. Meets from noon to 1:30 p.m. Thursday, Nov. 14, in 110 Henderson Building (The Living Center). Cost: none.

Weight Watchers AT WORK

A new series meets from noon to 1 p.m. Wednesdays, Nov. 20-Dec. 18, in the Paul Robeson Cultural Center auditorium. Cost: \$115 (lifetime members, \$105). Members of the HealthAmerica HMO may be reimbursed for the cost of this program. New members are welcome at any time during a series.

Employee Assistance Program (EAP) Courses Understanding Your EAP

Meets from 1:30 to 2:15 p.m. Wednesdays, Nov. 20, in 50 White Building. Cost: none.

EAP: The Supervisor's Role

Meets from 1:30 to 3:30 p.m. Wednesday, Nov. 20, in 50 White Building. Cost: none.

To register for any health promotion program, contact Jan Hawbaker at 865-3085 or jqh3@psu.edu.

Free blood pressure screenings

Faculty/Staff Health Promotions will be offering free blood pressure screenings at the Benefits Open House from 1-3 p.m. Wednesday, Nov. 13, in the HUB Fishbowl.

Stone Valley activities

Plenty of winter activities are planned at the Stone Valley Recreation Area beginning in December.

■ **Ice skating:** The Rental Building will open for the winter season for ice skate equipment rentals as soon as weather conditions permit in December or January. (when the ice thickness reaches six inches). Rentals are available daily from 9 a.m. to 4 p.m.

■ **Ice fishing:** All Pennsylvania Fish and Boat Commission regulations apply to fishing on Lake Perez. Travel on the ice is not recommended until the ice is six inches thick.

■ **Cross country ski lessons:** One-hour group lessons are conducted each Saturday and Sunday beginning at 10 a.m. and 1 p.m. These are taught at the beginner level and organized groups can arrange for a group lesson by appointment.

■ **Skating parties:** Night skating parties can be arranged by appointment for organized groups.

■ **Cabin rentals:** Enjoy a wintry getaway at one of Stone Valley's 11 cozy rental cabins, available on a year-round basis.

For more information about any of the programs, contact the park office at (814) 863-0762.

Committee seeks nominations for honorary degree awards

President Graham B. Spanier has appointed a Committee on Honorary Degrees and asked it to develop a list of eminent scholars, performers, artists and practitioners in academic fields or individuals who have made particularly distinguished contributions to society in areas such as public service, business or government for the purpose of awarding a Penn State honorary degree.

The committee is seeking a list of nominees for the award. The guidelines, as approved by the Board of Trustees, list the following criteria for eligibility:

■ **Sustained achievement** and distinction of national or international significance in an activity consonant with the mission of the University.

■ **Alumni of the University** are eligible.

■ **People serving as administrators, faculty or staff** are not eligible, nor are those who currently serve as members of the Board of Trustees, as officials of the Commonwealth and its subordinate

units or members of the state Legislature during their terms of office; spouses or immediate family members of these groups also are not eligible.

■ **Individuals whose achievements and distinction** have not been similarly recognized by a number of other institutions is encouraged.

Rodney A. Erickson, dean of the Graduate School, is chairman of the committee. Committee members include:

— **Greg Bednarski**, undergraduate student;

— **John A. Dutton**, dean, College of Earth and Mineral Sciences;

— **Gordon P. Carmire**, Evan Pugh professor of astronomy and astrophysics;

— **Desha M. Girod**, undergraduate student;

— **Grace Hampton**, executive assistant to the provost for the development of the arts;

— **Carol Herrmann**, senior vice president for administration, ex officio;

— **Lynn S. Liben**, professor of psychology;

— **John M. Lilley**, provost and dean, Penn State Erie, The Behrend College;

— **Charles L. Merkle**, professor of mechanical engineering;

— **Jay Parkes**, graduate student;

— **Barbara M. Shannon**, dean, College of Health and Human Development;

— **Catherine Shultz Rein**, Alumni Association representative;

— **Elizabeth Susman**, professor of biobehavioral health, human development and nursing; and

— **Elliot S. Vesell**, Evan Pugh professor and chair of pharmacology.

All nominations are welcome and should include the name, a short biography of the individual and a statement explaining why the nominee is worthy of recognition. Send nominations to **Sharon Becker**, 201 Old Main, University Park, Pa. 16802 by Friday, Nov. 22.

Holiday decorating workshop to be at Scanticon Nov. 17

The Penn State Scanticon at University Park will host the Second Annual Holiday Decorating Workshop from 1-4 p.m. on Sunday, Nov. 17.

Tickets are \$15 in advance or \$17 at the door and include a "classic tea" reception. All proceeds benefit the Toys for Tots Foundation. Last year, the event raised \$2,800.

The theme is "A White House Christmas in Happy Valley," and will be led by nationally recognized florists **Dan Firth** and **Ken Kreamer**. Guests will learn different approaches to decorating various sites in their home.

Firth was a florist for the Reagan administration and was part of the floral design team for the Bush inauguration. He also was responsible for a Tournament of Roses Parade float in 1994.

Kreamer is a certified master designer through FTD and has won several state floral competitions. Both men are donating their time for this event to help the Toys for Tots Foundation.

Watt's up?

Steve Besacker, one of five electricians assigned to construction of new classrooms in Rec Hall on the University Park Campus, is wiring this room so that exercise and sports science majors can electronically test the effectiveness of athletic protective equipment. This photo was taken by student Adam Balkin for a photojournalism class.

Deadline near for King Day honor recommendations

The deadline is quickly approaching for recommendations of individuals, organizations and programs to be honored at the Martin Luther King Jr. Day dinner on Jan. 17 for "Living the Dream" as envisioned by King.

The Forum on Black Affairs will honor those who are local examples of one of King's seven principles — persistence, selflessness, love, risk, conviction, collaboration and faith — and of how King's dream is being realized today.

"We wanted to make Dr. King's dream accessible to the University and community by giving people the opportunity to look at the dream from their perspective," committee member Gary Abdullah said. "While it's easy to remember Dr. King's message in abstract terms, it's crucial to find examples of how his legacy is being carried out today."

The committee wants to emphasize that the principles King stood for, such as the interrelatedness of all communities, self-sacrifice and justice, are as relevant today as they were in his time.

"When we look at some of the global and societal issues facing us, Dr. King's words offer us guidance for how we could have a positive impact in today's world," said Grace Hampton, committee chair.

Send written recommendations of no more than two pages to Hampton at 216 Wagner Building, University Park, Pa. 16802. Recommendations should include one principle; a description of the contribution of the individual, organization or program; and an explanation of why the nominee reflects the principle. All recommendations must be received by Monday, Dec. 9.

In addition to Hampton and Abdullah, members of the Martin Luther King Jr. dinner planning committee are: Charles Dumas, Department of Theatre Arts; Tony Leach, Department of Music; Melisande McCrae, Department of Public Information; Tom Poole, educational equity; and Ashley Milburn, community representative.

University Planning Council plans several open sessions

The University Planning Council is holding several open meetings to discuss strategic planning issues. Some meetings have already taken place. Upcoming meetings include:

College Sessions

■ Agricultural Sciences

Nov. 25, 10:30-11:30 a.m.
324 Agricultural Science and Industries Building

■ Arts and Architecture, University Libraries

Nov. 11, 4-5 p.m.
Palmer Lipcon Auditorium

■ Communications

Nov. 22, 3-4 p.m.
Carnegie Cinema

■ Eberly College of Science

Nov. 13, 2:30-3:30 p.m.
104 Thomas Building

■ Education

Nov. 13, 2:30-3:30 p.m.
109 Chambers Building

■ Engineering

Nov. 13, 10-11 a.m.
Stavely Conference Room, 256 Hammond Building

■ Liberal Arts

Nov. 14, 9-11 a.m.
Place to be announced

■ Smeal College

Nov. 5, 1:30-2:30 p.m.
807A Business Admin Bldg.

General Sessions

■ Findlay Dining Commons
(Shields Bldg.)

Nov. 14, 1-2 p.m.

Findlay Commons
(Monterey Room)

■ Kern

Nov. 7, 2-3 p.m.
112 Kern Building

■ Willard Building

Nov. 18, 8:30 a.m.
Willard Building

■ Office of Physical Plant

Nov. 22, 9-10 a.m.
105 Physical Plant Conference Room

■ University Club

Learning from masters

Jeff Moss, producer and director of "Annie Get Your Gun," center, gives some pointers to students Jesse Benz, left, and Joe Thompson. Moss and Dennis Van Parys music director for the show, conducted a master's class for a music, theatre and studio class taught by Edward R. Linderman, assistant professor of theatre arts, on the University Park Campus.

Photo: Greg Grieco

Bookshelf

Gideon S. Golany, distinguished professor of urban design in the College of Arts and Architecture, Department of Architecture, has recently published his 26th book, *Geo-Space Urban Design*, the book he co-authored with Toshio Ojima, a professor of architecture at Waseda University, Tokyo, is a culmination of research done over the last 12 years on subterranean and slope dwellings in indigenous populations.

The term "geo-space" refers to spaces within, though not necessarily below, the ground. Geo-space can refer to subterranean dwellings, but it includes spaces incorporated into slopes, hills or any area which allows living space within the earth while preserving and enhancing uninterrupted access to sunlight.

What *Geo-Space Urban Design* offers is a proposed solution for many contemporary urban problems. Golany contends that geo-space and subterranean structures are a logical, feasible and affordable solution for urban overcrowding, land preservation, resource efficiency and environmental protection.

His book examines the practical aspects of implementing geo-space communities, addressing everything from perceptions and psychological bias toward geo-space living to site selection and a comparative study of geo-space land management versus more traditional land use solutions for crowded areas. A portion of the book is dedicated to a study of geo-space use in modern Japan, where transportation, storage and shopping centers are all below ground.

Appointments

Graduate School names associate dean, senior mentor

Blannie E. Bowen has been named associate dean of the Graduate School and senior faculty mentor in the Center for Minority Graduate Opportunities and Faculty Development. Bowen is C. Lee Rumberger and Family professor of agriculture in the Department of Agricultural and Extension Education, and had previously served as interim senior faculty mentor in the Graduate School from August 1993 to May 1994, and from July 1995 to September 1996.

Bowen joined the College of Agricultural Sciences faculty in 1988, having previously held faculty positions at The Ohio State University and Mississippi State University. From 1990 to 1992, he was interim head of the Department of Agricultural and Extension Education.

Blannie E. Bowen

Bowen holds a Ph.D. from The Ohio State University. His teaching and research interests have focused in the area of communications in agricultural education. Since joining the Penn State faculty, he has served on the University Promotion and Tenure Review Committee, the advisory board of the Center for Minority Graduate Opportunities and Faculty Development, the University Faculty Senate, the Palmer Faculty Mentoring Award Selection Committee, and the search committee for the dean of the College of Agricultural Sciences. He has been the recipient of numerous research, teaching and service awards from several universities and professional organizations.

As associate dean, Bowen will have responsibilities for graduate programs administration. In his role as senior faculty mentor, he will provide programs and activities to assist junior minority faculty in securing tenure and advancing through the academic ranks. Bowen also will continue an active program of teaching and research in the Department of Agricultural and Extension Education.

Graduate Enrollment Services promotes longtime employee

Cynthia E. Nicosia has been named director of the Office of Graduate Enrollment Services in the

Graduate School. She was formerly assistant to the director of Graduate Admissions and Programs. Nicosia received a B.S. degree in therapeutic recreation from Penn State in 1975. She joined the Penn State staff in 1975 and the Graduate School in 1978, and has served in several different roles in the graduate admissions and programs areas.

The Office of Graduate Enrollment Services combines the former functions of the Office of Admissions, the Office of Graduate Programs, the Thesis Office and a part of the Office of Data and Analysis into a single administrative unit. The purpose of the reorganization is to promote greater administrative efficiency while enhancing services to graduate applicants, matriculated students and departments and colleges in one central unit located in 114-115 Kern Graduate Building.

Cynthia E. Nicosia

Promotions

Staff

Toni A. Aikens, financial aid and veterans assistant at Penn State Beaver Campus.

Antoinette A. Bayles, administrative specialist in Student Affairs.

Shirley A. Berkheimer, respiratory therapist at The Hershey Medical Center.

Jayne L. Bowman, staff assistant VI at Hershey Medical Center.

Deloris A. Brobeck, staff assistant VI in the Office of the Vice Provost and Dean for Undergraduate Education.

Denise R. Brooks, development assistant, in Division of Development and Alumni Relations.

Lisa S. Brown, staff assistant V at The Hershey Medical Center.

Thompson A. Buchan, senior micro-computer systems consultant in Commonwealth Educational System.

Joyce A. Buerk, staff assistant VI at The Hershey Medical Center.

Vicki K. Carter, instructional designer in Commonwealth Educational System.

Linda A. Collins, research support technologist III in Eberly College of Science.

Jamie A. Corman, staff assistant V in Eberly College of Science.

Gloria J. Dimick, senior research technician in College of Agricultural Sciences.

Edward C. Dumond, computer and technology specialist in College of the Liberal Arts.

Bruce T. Einfall, associate research engineer in Applied Research Laboratory.

Le Etta J. Estling, coordinator, college relations in College of Health and Human Development.

Lyne L. Fazio, staff assistant V at Penn State Worthington Scranton Campus.

Judy E. Flynn, staff assistant VI in Eberly College of Science.

Kevin M. Friedel, respiratory therapist at The Hershey Medical Center.

Bernard J. Furr, orthotist at The Hershey Medical Center.

Linda J. Greenawalt, staff assistant VI in College of Earth and Mineral Sciences.

Lorraine S. Haines, senior applications programmer/analyst in Office of University Registrar.

Anna M. Harshman, administrative assistant in Research and Graduate School.

Ann M. Haupt, engineering/administrative aide in Office of Physical Plant.

Edward M. Hayes, lead applications programmer/analyst in Computer and Information Systems-Administrative Systems.

Julie A. Hershbine, accounting assistant in Student Affairs.

Claudia J. Holtzman, business analyst II at The Hershey Medical Center.

Deanna L. Hunt, staff assistant V in Division of Development and Alumni Relations.

Heide Huyck, technician-research at The Hershey Medical Center.

Marguerite Infantino, coordinator, residency programmer at The Hershey Medical Center.

Linda L. Jones, staff assistant VIII in Applied Research Laboratory.

Pamela R. Kauffman, assistant to the director for business operations in Applied Research Laboratory.

Mark T. Keller, associate research engineer in Applied Research Laboratory.

Stephanie L. Kroust, staff assistant V in Research and Graduate School.

Lorna L. Lausch, staff assistant V at The Hershey Medical Center.

Kay M. Livelsberger, coordinator, medical education and alumni affairs at The Hershey Medical Center.

Daniel A. Macaluso, director of development in Division of Development and Alumni Relations.

Kathie C. Merrill, staff assistant V in Commonwealth Educational System.

Deborah A. Metzler, information systems support consultant in Computer and Information Systems-Center for Academic Computing.

Jeane M. Meyer, staff assistant VII at The Hershey Medical Center.

Thomas G. Miller, research support assistant at The Hershey Medical Center.

Holly J. Muir, administrative assistant III in College of Engineering.

Marilee R. Mulvey, supervisor, Computer and Information Systems at Penn State Worthington Scranton Campus.

John E. Park, assistant director in Continuing and Distance Education.

Christine M. Patanow, research support assistant at The Hershey Medical Center.

Eileen Pennisi, training and support specialist in College of Education.

James E. Raabe, assistant research engineer in Applied Research Laboratory.

Cynthia D. Raynak, instructional designer in Commonwealth Educational System.

Cynthia A. Reed, senior technician at The Hershey Medical Center.

Jeffery C. Renner, computer support specialist in College of Agricultural Sciences.

Paul J. Richards, project associate in College of Agricultural Sciences.

Paula Royer, staff assistant VII in Computer and Information Systems-Administrative Systems.

Kathy L. Seitzinger, staff assistant VI at The Hershey Medical Center.

Lisa M. Sennett, research support technologist II in College of Health and Human Development.

Jenkin P. Shaw, mechanical/electrical engineer in Office of Physical Plant.

Carol M. Sivley, clinical nurse specialist at The Hershey Medical Center.

Kim M. Smith, staff assistant V at The Hershey Medical Center.

Russell A. Sodergren, information systems support consultant in Computer and Information Systems-Administrative Systems.

Heather G. Treaster, staff assistant VII in College of Agricultural Sciences.

Margaret M. Tromm, library supervisor II at Penn State Altoona Campus.

Diane L. Vitaneve, staff assistant V at Penn State Hazleton Campus.

Sheryl L. Vuich, director, enrollment management at Penn State Beaver Campus.

Susan L. Walker, administrative assistant III in University Libraries.

Jacqueline Walters, counselor at Penn State Hazleton Campus.

Elizabeth M. Watkins, alumni and development specialist at Penn State Hazleton Campus.

Andrew T. Wallis, senior officer, information specialist, Commonwealth Educational System.

Taking the lead in researching the honey bee crisis

By CHUCK GILL

College of Agricultural Sciences

Honey bees are dying by the millions in the United States. And if you think that doesn't affect you, think about what your diet would be like without apples, cherries, plums, pears, berries, melons, pumpkins and other fresh fruits and vegetables — not to mention honey.

Honey bees play a part in the production of an estimated one-third of the typical American diet. Nationwide, about \$10 billion worth of crops are pollinated by honey bees, helping to provide a living for commercial beekeepers, who often rent their hives to fruit and vegetable growers in need of crop pollination.

In the last 10 years, two kinds of parasitic mites have teamed up with harsh winter weather to decimate both domestic and wild bee populations, wiping out some beekeeping operations and creating a critical shortage of honey bees for pollination. From 1981 to 1995, Pennsylvania's commercial honey bee population fell from 85,000 colonies to just 27,000 colonies. Solutions for this growing crisis have been elusive.

As a result, the College of Agricultural Sciences is taking the lead to launch a multi-state research and cooperative extension program aimed at fighting parasitic mites and educating beekeepers on the latest management practices.

"Last winter, beekeepers in the northeastern United States experienced a devastating die-off of honey bees," Scott Camazine, assistant professor of entomology who will lead the regional effort, said. "Colony losses ranged from 40 percent in Delaware to 53 percent in Pennsylvania to 80 percent in Maine," Camazine said. "Tracheal and varroa mites are believed to be the major contributing factor in these colony deaths. But viruses and other pathogens — possibly introduced by mites — also may be involved."

Tracheal mites are microscopic creatures that infest bees' breathing tubes. These parasites first were found in the United States around 1983. Varroa mites, which appeared in this country in 1987, are external parasites sometimes visible to the naked eye.

Because so little is known about this mite-disease combination, called "parasitic mite syndrome," beekeepers are at a loss to protect their colonies, especially since chemical controls for the mites are limited.

The regional mite management effort will involve land-grant univer-

Scott Camazine, assistant professor of entomology, is leading the regional effort to find a way to rescue honey bees from killer parasites. At right, a drone bee is infested with both immature (white) and adult (shiny dark) *Varroa jacobsoni*, or varroa mites.

Photo: Greg Grieco

sities, state departments of agriculture, beekeeper organizations and others in Pennsylvania, New Jersey, Delaware and Maryland. A working group of three people from each state, as well as a representative from the USDA/Agricultural Research Service, will identify short- and long-term research needs and potential funding sources. Penn State will administer the program and provide training and information on honey bee management to cooperative extension educators from the four states.

"We need research to solve the mystery of exactly why these mite-infested bees are dying," Camazine said. "Do the mites directly damage worker bees? Do they spread viral infection or weaken the bees' immune system, allowing other diseases to kill the colony? Do mite-infested bees have lower cold tolerance? This knowledge could help us to develop new control strategies or to identify desirable traits to select for in breeding programs. Other studies should be conducted to evaluate whether specific lines of honey bee stock are resistant to mites."

Photo: Scott Camazine

Some research already is under way. The Pennsylvania Department of Agriculture recently awarded nearly \$70,000 to Penn State for a project to determine how mites and mite-related diseases affect the health and productivity of honey bee queens.

For more information, visit the bee research Web site. Start at the entomology home page at <http://www.ento.psu.edu/> then click on PSUbees.

Lab results, real world out of sync

The way that soil minerals break down and how they react with groundwater are important bits of information for anyone studying groundwater pollution and soil contamination, but sometimes the information gathered in the lab doesn't quite match what happens in the real world, according to Penn State geologists.

"It's fairly well known that weathering experiments in the lab don't match natural weathering mechanisms," Melissa A. Nugent, graduate student in geosciences, said. "Laboratory rates are often several orders of magnitude faster than those observed in natural environments."

Nugent, Susan L. Brantley, associate professor of geosciences, and Yang Chen, a recent Penn State graduate, looked at samples of the mineral albite feldspar from Quebec that had been buried in central Pennsylvania soil and removed after six months, one year and two years to try to understand the mechanism of weathering.

When minerals weather in nature, molecules in the rock dissolve in groundwater, react to form coatings, form other minerals or simply wear away. In the laboratory, researchers are usually only looking at one process at a time, which may explain the discrepancies with the natural world.

"Our investigation of the surface of the feldspar after it was in the ground shows an initial slight decrease in aluminum on the surface and then an increase in the concentration of aluminum on the surface," Nugent said.

The geologists also are monitoring conditions in the field where the feldspar samples are buried, recording acidity, water volume and ion concentrations to try to understand the mechanisms under way in the soil.

"If we know the saturation state and other kinetic variables for both the laboratory and field experiments, then we should be able to compare the results of both and better understand what is happening in the soil," Nugent said.

Also working on this project are Carlo Pantano, professor of ceramic science, and Daniele Chermak, department of earth and environmental science at Rensselaer Polytechnic Institute.

ATHLETICS

A regular column provided by Intercollegiate Athletics

High honors

One of the highest academic and athletic honors a collegiate football player can earn has been bestowed upon Penn State quarterback Wally Richardson. The fifth-year senior from Sumter, S.C., was chosen as one of 16 National Football Foundation and College Hall of Fame Scholar-Athletes. More than 200 nominees were submitted for the award, which includes an \$18,000 grant for postgraduate study. Richardson will be honored at the Foundation's 39th Annual Awards Dinner on Dec. 10. He is the 13th Nittany Lion to be so honored and the third in as many years.

Ticket madness

Season ticket totals in both men's and women's basketball reached an all-time high for the campaigns that recently got under way this month. Penn State ticket Director Bud Meredith reports that the men's sale was 10,300 while the Lady Lions had 3,600 season ticket orders. For information on single game tickets for Penn State basketball, fans can call (814) 865-5555 or (800) 863-3336.

Tournament play

Coach Barry Gorman's Nittany Lion soccer team will host the Big Ten Tournament at Jeffrey Field the weekend of Nov. 15-17.

Carpoolers

Carpooler wanted from Phillipsburg/Houtzdale area to University Park Campus Monday through Friday. Work hours are from 7 a.m. to 4 p.m. E-mail Stacy at s2s6@psu.edu if interested.

Intercom online

You can see portions of this issue on the World Wide Web.

To access the current issue, go to the University Relations home page at <http://www.ur.psu.edu/> and click on the Intercom button. While you're there, why not take part in Intercom's online readership survey. Click on the text that says "Intercom Readership Survey" and answer a few short questions. Your answers will be helpful in guiding the Intercom staff in its work.

In the swim of things

The McCoy Natatorium on the University Park Campus has much to offer, even during the winter months. Above, Sue Shuey, poolside, leads a group of participants in a session of "AquaSize." At left, dive Coach Kim Brown works with her beginner "Learn to Dive" students to get their diving form just right. These classes are only two of the many offered throughout the year that are open to anyone residing within a 50-mile radius of the University. For more information on either class or on other classes offered at the Natatorium, call (814) 865-1432

Getting ready

Melisande McCrae, left, and Charlene H. Harrison, director of adult learner services, are gearing up for the popular *Time Out* Penn State interview series. McCrae is producer of the segments, and also will be host for many of them.

Photo: Greg Grieco

University takes a "Time Out"

Popular halftime interview show starts second season

By ANNEMARIE MOUNTZ
Public Information

For the second year in a row, Penn State is going live outdoors during televised home Nittany Lions and Lady Lions basketball games with its popular *Time Out Penn State* series.

Each year, broadcasters provide the University with free air time during televised games to introduce viewers to the institution and talk about what Penn State has to offer. Instead of filling all of the time with a pre-recorded mes-

sage as many institutions do, the University is taking the opportunity to reach out to hundreds of thousands of potential viewers with live — and lively — conversation.

"It's great to be able to capitalize on the popularity of Penn State basketball to showcase other aspects of the University. The staff at WPSX-TV has been instrumental in helping us do that," Melisande McCrae, manager of electronic communications in the Office of Public Information and producer of *Time Out Penn*

See "Time Out" on page 3

Penn State honored for environmental programs

Two environmentally friendly programs at Penn State — the development of PennMulch and recycling at Beaver Stadium — received 1996 Governor's Awards for Environmental Excellence.

Offered by the Pennsylvania Department of Environmental Protection's Office of Pollution Prevention and Compliance Assistance, the awards were presented in four categories: education and outreach; pollution prevention; recycling and market development; and technology innovation.

Penn State and PennTurf Products Inc. received their award for a nonprofit and non-manufacturing small business in the technology innovation category for the development of PennMulch, a material used for mulching turfgrass seedbeds.

PennMulch, a weed-free, easy-to-store and use material, is manufactured from recycled newspaper that is shredded, combined with a starter fertilizer and green dye and then pelleted. The mulch pellets expand when wet, allowing a small quantity to cover a large area — a six-pound bag covers up to

See "Honored" on page 3

Planning Council seeks employee suggestions

The University Planning Council, the group charged with reviewing Penn State's core functions and practices, is seeking suggestions and comments from the University community in order to better direct the University's future.

In addition to the host of meetings being held across the University (see Nov. 7 *Intercom*, page 13), UPC members would also like faculty, staff and students to feel free to e-mail suggestions to them at Response@psu.edu or to forward written comments to the Center for Quality and Planning in 303 Old Main. All suggestions will be forwarded to the UPC.

UPC members are particularly interested in suggestions or comments dealing with:

■ Actions Penn State should take to improve the quality of programs.

■ Important program areas to emphasize as we approach the year 2000.

■ Areas where efficiency and effectiveness can be improved.

■ Areas that should be ranked as priorities.

The meeting scheduled for 8:30 a.m. Nov. 18 will be held in 203 Willard Building.

Inside

Early deadline

Because of the Thanksgiving holiday, there will be no *Intercom* on Nov. 28. In addition, story deadline for the Dec. 5 *Intercom* will be noon Tuesday, Nov. 26. Please mark your calendars.

Research

Study results indicate that birds and mammals may have lived alongside dinosaurs. For details, please see the story on page 11.

Hershey adds marrow transplantation program

The Milton S. Hershey Medical Center has launched its new bone marrow transplantation program, offering an alternative to patients who currently must travel to Pittsburgh, Philadelphia or Baltimore for the procedure.

Bone marrow is the tissue that manufactures various components of the blood and the immune system, like red blood cells, white blood cells and platelets. Bone marrow transplantation involves taking healthy bone marrow from a donor and transplanting it into a patient who is suffering from a blood disease such as leukemia, aplastic anemia or a number of other immune system disorders. The patient usually receives intensive chemotherapy and/or radiation therapy to destroy all cancerous cells.

As part of the Hershey program, a bone marrow transplantation lab was opened at the medical center, where bone marrow and blood cell col-

are seeking special cells in the bone marrow that are capable of reproducing themselves and generating other cells that evolve into white blood cells, red blood cells and platelets. Blood is extracted in a simple surgical procedure under general or spinal anesthesia. Two percent to 5 percent of the donor's liquid marrow is extracted from the back of the

lection or "harvesting" for transplantation takes place. The medical center also has created a new sterile unit on a regular hospital floor where recipients are hospitalized for the transplantation procedure.

The process of harvesting bone marrow is a relatively simple one, according to Hershey experts. Physicians are seeking special cells in the bone marrow that are capable of reproducing themselves and generating other cells that evolve into white blood cells, red blood cells and platelets. Blood is extracted in a simple surgical procedure under general or spinal anesthesia. Two percent to 5 percent of the donor's liquid marrow is extracted from the back of the

pelvis through a special needle and syringe. After the marrow collection procedure, the donor may experience slight discomfort for a week or so in the lower back. The marrow replenishes itself within a few weeks.

An estimated 40,000 adults and children are stricken with leukemia, lymphoma, Hodgkin's Disease and other blood-related cancers each year. In some cases, marrow transplantation is the only hope for survival. Bone marrow transplantation subjects the body to enormous strain and is only an option for people who, apart from their disease, are in good general health.

The new 14-bed unit, which includes four special isolation rooms, has been established on the seventh floor of University Hospital. The bone marrow transplantation program is directed by Dr. Witold Rybka, chief of hematology and oncology.

University has experiment aboard next shuttle launch

By BARBARA HALE
 Public Information

Penn State researchers, in cooperation with their commercial partner Abbott Laboratories, have designed an experiment to explore whether Bt, a commercially available, environmentally friendly, biopesticide, can be improved by growing it in microgravity.

The experiment will be flown aboard the STS-80 mission on the Space Shuttle Columbia, which is scheduled to launch Friday, Nov. 15.

Zane Smilowitz, professor of entomology, and William McCarthy, associate professor of entomology, are co-principal investigators.

Abbott Laboratories, based in North Chicago, Ill., is the world leader in manufacturing and production of Bt-based control agents. Its agricultural products group is one part of a worldwide health care company employing 52,000 people. Bt products are manufactured and used globally to control pests such as beetles, caterpillars, moths, mosquitoes and blackflies. Bt, in commercial use for more than 25 years, is lethal to pests but non-toxic to beneficial insects, people and the environment.

Researchers hope the space experiment will provide leads or insights that will allow them to use available molecular biology tools to develop new safe and effective biological control agents that are either more potent or that expand the present insect target groups.

McCarthy of Penn State explains that Bt's pesticide activity is the result of one or more proteins packaged in a crystal produced by the microbe. Different strains of Bt produce different crystals composed of one or more proteins which are active against various pests. Crystal production is directed by one or more genes.

Two strains of Bt will be aboard Columbia — Btt, active against beetles, and Btk, active against caterpillars. Experiments with the microbes

will focus on whether growth in microgravity causes a change in the size, shape and/or toxicity of the crystals. The researchers suspect that space flight could affect Bt in this way because exposing other microbes to microgravity has changed their metabolism and growth. In addition, growing protein crystals from solution in space often produces larger and better formed crystals.

"The crystals Bt produces on Earth are usually somewhat deformed. In microgravity, we think that they should approach their ideal shape," Smilowitz said.

So Bt has only one gene directing protein crystal production, the experiment with that microbe may enable the researchers to trace changes in the size, shape or composition of the crystal to specific changes on the gene. Btk, on the other hand, has multiple genes directing protein crystal production. When different combinations of the genes are turned on, the protein composition of the crystals may change, leading — in some cases — to a change in crystal shape. A control experiment on the ground will enable the researchers to compare results and identify microgravity effects.

Follow-up studies when the shuttle returns to Earth will be conducted at Penn State and Abbott's Research Center. Penn State's Electron Microscopy Laboratory, under the direction of Rosemary Walsh, will be involved along with Smilowitz's and McCarthy's laboratories.

Bryan Severny, an M.S. candidate in entomology, is assisting the Penn State team. Robert Cibulsky, Dennis Edwards and Robert Smith are Abbott's representatives in the research project.

The Bt experiments will be conducted aboard the shuttle in NASA's Bioprocessing Modules (BPM) by Astronauts Story Musgrave and Kent Rominger.

Hands-on training

Dr. Susan Monk, assistant professor of kinesiology at Penn State Berks Campus, center, uses a cadaver to teach anatomy to occupational therapy students Audrey Mast, left, Jeffrey Weikel, Audrey Skowronski and Andrea DeLong.

Cadaver gives students a unique learning experience

One man's gift to science is providing a valuable learning experience for hundreds of occupational therapy and biology students at Penn State Berks Campus.

The embalmed body of a 71-year-old cancer victim is being dissected by four occupational therapy students under the direction of Susan Monk, assistant professor of kinesiology. Monk worked for two years to obtain the cadaver from The Hershey Medical Center. "I kept saying to myself, 'If only my students could do this,'" Monk said. "I thought what a learning experience it would be. Otherwise they're just trying to memorize terms."

She chose four students to con-

duct the dissection: Andrea DeLong, Audrey Mast, Audrey Skowronski and Jeffrey Weikel.

The students, who devote several hours a week to the dissection, will not receive credit for their work.

"It's just an invaluable practical learning experience," DeLong said. "Textbook pictures don't do justice," Weikel added. "With the cadaver, you can actually see everything and how it works."

The cadaver's head is wrapped to preserve the individual's dignity. "The student interest in this has been overwhelming," Monk said. "I've had students come up to me and thank me for doing this."

Articulation agreement is signed

Elizabethtown College business students will now find the transition into two Penn State Harrisburg graduate programs considerably easier thanks to an articulation agreement signed Nov. 4 between the two institutions.

The agreement will permit qualified business students at Elizabethtown to apply for admission into the

master of business administration (MBA) and master of science in information systems (MSIS) programs at Penn State Harrisburg as early as the end of their junior year.

Students admitted into either master's program must complete bachelor's degree study at Elizabethtown before matriculating at Penn State Harrisburg.

Honored

Continued from page 1

100 square feet. Mulching speeds both plant germination and growth and reduces the potential for soil erosion and weed invasion.

Invented by agronomy instructor George Hamilton, it is patented by Penn State and licensed by PennTurf Products of State College, which developed the full-scale manufacturing process and the North American distribution network, including 35 distributors in 30 states and Canada.

According to the award citation, "PennMulch is being widely accepted as a convenient, efficient and cost-effective way of mulching turfgrass seedbeds. The biodegradable PennMulch pellets can be spread easily by hand or spreader, eliminating the need for expensive equipment such as hydroseeds or straw blowers. In 1995, the first full year of production, more than two million pounds of PennMulch were sold, and sales are steadily increasing. The vast majority of PennMulch has been sold to the professional turfgrass market."

The turfgrass industry, including athletic fields, golf courses and home lawns, is a \$1.4 billion business in Pennsylvania alone.

The Beaver Stadium recycling program, which received an award for a public agency in the recycling and market development category, is a joint project of Penn State and the Centre County Solid Waste Authority.

"The Penn State Beaver Stadium Recycling Effort is unique among universities in the country. Although Pennsylvania has a statewide recycling goal of 25 percent by 1998, Penn State is already recycling at a 41 percent rate. The average tonnage recycled during a football season has risen from two to 34 tons. As a result, Penn State has avoided more than \$2,400 in garbage tipping fees, reduced man hours by 15 percent for post-game clean up, saved approximately \$6,283 and earned \$11,019, which was donated to the United Way of Centre County," according to the award citation.

The recycling program was developed by the Department of Intercollegiate Athletics, the Office of Physical Plant and the Waste Authority with help from the Juniata Valley Boy Scout Council, the Hemlock Girl Scout Council and the partnership of a local scrap dealer, the Steel Recycling Institute and the Glass Packaging Institute.

For descriptions of other winners, visit the Department of Environmental Protection Web site at <http://www.dep.state.pa.us> and choose Pollution Prevention & Compliance Assistance.

For more information on the recycling program, contact Al Matyasovsky, who oversees Penn State's recycling efforts, at (814) 863-4719, or Joanne Shafer, Centre County recycling coordinator, at (814) 238-7005. For information on PennMulch, contact George Hamilton at (814) 865-3007, or Marty Bradley, PennTurf Products, at (814) 234-0391.

FAST FACTS

DECADE AT A GLANCE

Minority Enrollment
1986-1996

Source: Office of Budget and Resource Analysis/
Office of University Registrar (October 1996)

A quick look at the graph above shows the growing numbers of underrepresented students attending Penn State and the steady progress achieved over the last 10 years. In a recent report to the Board of Trustees from Trustee Donald Cook, everything from Penn State's head counts and programs, to legal issues and retention rates were examined. For the full text of Cook's talk and statistics, log-in to the University Relations home page at <http://www.ur.psu.edu> and click on the button labeled "Office of the President."

Time Out

Continued from page 1

State, said. McCrae is also host for many of the segments.

The show's second season began Nov. 13 with the first of 14 scheduled interviews.

Each three- to eight-minute *Time Out Penn State* will feature University faculty, staff, students or administrators discussing a variety of topics including an inside look at training for a space shuttle mission; how Penn State students are getting a jump on the job market; and tips on spotting behavior problems in young children.

Most of the interviews will air regionally, hitting the major television markets in Pennsylvania including Philadelphia and Pittsburgh. The remaining segments will be shown in all of the Big Ten markets. Kim Yarnell Bierly, television network coordinator in the Office of Public Information, is assistant producer.

"This has been a tremendously suc-

cessful vehicle for showing Pennsylvanians the good things that Penn State is doing," Stephen J. McCarthy, executive director of University Relations, said. "This University does more to enrich the Commonwealth than any other entity in the state, and we need to make more people aware of these contributions. *Time Out Penn State* provides us with a great opportunity to do that."

The idea for the show came last year from President Graham B. Spanier, who was the first guest to go live on the spot. He initially suggested the idea of a live program because he liked the interaction and immediacy that live programming provides.

The next *Time Out Penn State* will air during halftime of the Nov. 26 Lady Lions basketball game vs. Seton Hall. Remaining shows are scheduled for halftime of men's and women's home basketball games on Dec. 7, 22 and 27; Jan. 4, 15 and 17; Feb. 1, 7, 15, 19 and 23; and March 1.

Larry A. Heaton, lead maintenance mechanic, utilities piping in Office of Physical Plant.

Alan E. Heimbach, deli worker in Housing and Food Services.

David Kresovich, maintenance worker-insulating in Office of Physical Plant.

Sara L. Leschinsky, deli worker in Housing and Food Services.

Richard McClimans, general helper-repairer in Housing and Food Services.

Larry E. Nye, linen handler at The Hershey Medical Center.

Darrell E. Peterson, photographic technician A at The Hershey Medical Center.

Dean Shirk, maintenance worker-utility-group leader in Housing and Food Services.

Michael E. Swavely, area facilities maintenance worker in Office of Physical Plant.

Michele M. Wallace, senior instrumentation processing aide at The Hershey Medical Center.

Jeff C. Watson, food preparer B in Housing and Food Services.

LECTURES

Relevance of science addressed in Erie talk

Pamela S. Botts, assistant professor of biology at Penn State Erie, The Behrend College, will address the relevance of science to everyday life in her presentation "Convincing the Non-Scientist that Science is Relevant and Accessible, or You Don't Have to be a Rocket Scientist to Understand Science."

Her lecture, which opens the Penn State-Behrend Provost's Speaker Series, will take place at noon Wednesday, Nov. 20, in the Reed Union Building Commons.

"My presentation will demonstrate how science relates personally, professionally and politically to each of our lives," Botts said. "I believe we must find a way to put science back into society and make it work for us. There isn't any part of our lives that isn't affected by science."

Botts is the winner of the 1996 Penn State-Behrend Council of Fellows Excellence in Teaching Award. In addition to classroom and laboratory

teaching, Botts maintains a number of research interests including wetland plant ecology; distribution of organisms in streams and wetlands; and a recent collaborative interest, evolutionary ecology. She also takes part in a long-term collaborative project involving landscape ecology and population biology in wetlands on the Penn State-Behrend Campus.

Botts is a graduate of Trenton State College and received her doctorate in biology from the University of South Florida. Her research has been funded by the National Science Foundation, the National Biological Survey and the Pennsylvania Academy of Sciences. She has presented numerous papers and seminars and has been published in both books and peer-reviewed journals.

Her presentation is free to the public. For more information call the Penn State-Behrend switchboard at (814) 898-6000.

University president to talk for Hispanic celebration

Dr. Norman I. Maldonado, president of the University of Puerto Rico, will speak on the University Park Campus at 8 p.m. Thursday, Nov. 21, in 112 Kern Building. His lecture is sponsored by the Multicultural Resource Center and other units, and is part of this month's Hispanic Heritage Celebration.

Appointed president in 1994, Maldonado has revitalized the 11-campus system by appointing new chancellors and deans, applying total quality management to re-engineer procurement and administrative affairs, and is currently completing a strategic plan for the university. Over the last few years, the university has improved its financial management, raised \$320 million in bonds for capital improvements, and has increased its enrollment by more than 8,000 students.

A native of Puerto Rico, Maldonado received his M.D. from the University of Puerto Rico School of Medicine and is a specialist in hematology and oncology. After service in the U.S. Army in Germany, he was director of hematology at the Uni-

versity of Puerto Rico from 1966 to 1973, and medical director of the San Juan Municipal Hospital from 1973 to 1976.

He served as deputy secretary of the Department of Health of Puerto Rico from 1977 to 1978, when he was appointed chancellor of the Medical Sciences Campus of the University of Puerto Rico. There he was responsible for expanding the academic curriculum, the accreditation of all programs and established an intramural clinical practice for medical faculty. In 1985, he returned to teaching and was coordinator of the Internal Medicine Residency Program for the university.

After retiring in 1991, he went into private practice in hematology and oncology, and in 1993 was appointed director of the Office of Research and Planning of the Senate of Puerto Rico and as adviser for health care reform. He was instrumental in forwarding the legislation that began health care reform and was liaison to the federal government during President Clinton's health reform initiative.

Marker series probes immune system, genes

Peter G. Schultz, Howard Hughes Medical Institute investigator at the University of California at Berkeley, will present the 1996 Marker Lectures in the Chemical Sciences from Nov. 18 to 20, at University Park. The three-lecture series, titled "Chemistry, The Central Science," is sponsored by the Eberly College of Science and is open to the public.

The lectures include: "Lessons from the Immune System: From Catalysis to Materials" at 8 p.m. Monday, Nov. 18, in 104 Keller Conference Center; "Probing Protein Structure and Function with an Expanded Genetic Code" at 4 p.m. Tuesday, Nov. 19, in S-5 Osmond Laboratory; and "Catalytic Antibodies" at 12:15 p.m. Wednesday, Nov. 20, in S-5 Osmond Laboratory.

Schultz has been instrumental in developing several new and vibrant areas of chemical research. His group was among the first to use antibodies as chemical reagents to effect novel transformations. In addition, he has developed a new approach to the preparation of proteins containing non-natural amino acids as probes of protein structure and function.

Peter G. Schultz

Schultz received his doctoral degree in 1984 from the California Institute of Technology, after which he did post-doctoral research at the Massachusetts Institute of Technology. He joined the faculty at the University of California at Berkeley in 1985 as an assistant professor and in 1985

was appointed principal investigator to the Lawrence Berkeley Laboratory. Schultz is a founding scientist and chairman of the Scientific Advisory Board of the Affymax Research Institute in Palo Alto, Calif. He also serves on the advisory board for CV Therapeutics in Mountain View, Calif., and is founder of Symyx Technologies in Palo Alto.

He has been honored with numerous awards, including in 1994 the Wolf Prize in Chemistry; in 1995 the California Scientist of the Year Award; and in 1996 the *Discover Magazine* Award for Technological Innovation. He was elected to the American Academy of Arts and Sciences in 1990 and to the National Academy of Sciences in 1993.

Free workshops geared to women in science, social science, engineering

The third annual "WISE Voices" free workshops for women in science, social science and engineering will be held at University Park on Sunday, Nov. 17. A brunch at 10 a.m. at the Nittany Lion Inn will begin the day's activities. The Pennsylvania Space Grant Consortium, a NASA-funded education program, and the WISE Institute are jointly sponsoring the event.

This year's workshops will focus on female graduate students in science and engineering, according to **Karen Wynn**, assistant space grant director and convener of the workshops.

"From the best research on the topic as well as anecdotal evidence, this group of women on campus are most likely to be shut out of crucial information that can make or break

an academic career," Wynn said. "Isolation in fields where there are few other women is a contributing factor."

"Success Strategies for Women Graduate Students in Science and Engineering" is again the theme, and workshops will cover topics such as "Crossing Cultures in Science and Engineering," "Voices from Women in Industry," "Negotiating an Offer" and family issues. Workshops will take place from 11 a.m. to 2 p.m. in Keller Building, followed by a dessert and coffee networking session.

The day's events are free, but pre-registration is required. To register contact Wynn at (814) 863-3608; by e-mail at kw8@psu.edu; or fax to (814) 863-8286 with name, address, e-mail, department and title.

Sigma Xi lecture planned for Nov. 18

Laksham Yapa, associate professor of geography, will continue a discussion on "What Causes Poverty: A Postmodern View" at 12:15 p.m. Monday, Nov. 18, in 110 North Henderson, The Living Center, at University Park.

Yapa will discuss the causes of scarcity and deprivation in diverse

societies worldwide and will address the question, "Has using economic development become the cause of modern poverty?" The discussion is sponsored by Sigma Xi, Penn State Chapter.

For more information contact Sigma Xi, contact **Fat Gong** at (814) 863-9963.

More Lectures

Nov. 18 presentation marks Hispanic Heritage Month

As part of Puerto Rican Awareness Week and Hispanic Heritage Month at Penn State, the Puerto Rican Association will co-sponsor a slide presentation and public lecture by Puerto Rican installation artist **Pepon Osorio** at 7 p.m. Monday, Nov. 18, in the Palmer Museum of Art on the University Park Campus.

Osorio is the only artist selected to serve as artist-in-residence for a full year by the Museo del Barrio in New York City, the primary exhibition space for Latino artists in the United States. He is known for transforming everyday objects from the lives of Puerto Ricans into works of art, and for his ability to fill public spaces with artistic meaning.

For example, in an upcoming installation in New York City, Osorio will decorate taxi cabs as vehicles for his artistic expression. In an earlier project, he and students at Rhode Island School of Design, expressed ideas about domestic violence through shoes transformed into art and arranged strategically throughout campus.

At Penn State, Osorio will conduct a similar four-day workshop with students in visual arts and ENG 404, "Mapping Identity, Difference and Place." The students have been exploring ways in which Latinos are represented and have represented themselves in the media, theatre and the visual arts.

Learn practical investment strategies Nov. 22

J. Randall Woolridge, an international financial consultant and professor of finance, will present a seminar on "Investment Strategies." The program is scheduled for 1 to 5 p.m. Friday, Nov. 22, at The Penn State Scanticon. Tuition for the program is \$50.

Woolridge, the Goldman, Sachs & Co. and Frank P. Smeal Fellow, has been quoted in several financial publications, including *Business Week*. His research focuses on issues facing an investor: spin-off investing, the impact of changes in interest and exchange rates, IPOs and value versus growth stocks.

Woolridge has published more than 25 articles in journals and has appeared on CNN's "Money Line" and CNBC's "Business Today." He is a consultant for AT&T, Lehman Brothers, Price Waterhouse and NYNEX.

To register for this seminar, call (800) 778-8632.

Talk looks at "Facing Tragedy on the Campus"

Professional Women at Penn State presents "Facing Tragedy on the Campus"

by **Sarah H. Guelldner**, director, School of Nursing, on Wednesday, Nov. 20. The brown-bag lunch meeting will begin at 12:05 p.m. in room 4 Henderson Human Development East (nursing building).

Professional Women at Penn State is a grass-roots group coordinated by University women in which participants can develop and maintain a communications network and serve as a resource for other Penn Staters.

This group welcomes attendance by both men and women in all job and student classifications at the University.

Copyright issues examined at free symposium

A special one-day symposium on copyright issues is planned for Nov. 26 at The Penn State Scanticon at University Park to address issues of intellectual property, copyright and electronic information. The event is co-sponsored by the Office of the Provost, the University Libraries and the Faculty Senate Committee on Libraries.

The symposium, expected to provide a University-wide discussion among faculty, administrators, Penn State publishers and information managers concerned with gaining access to electronic information required to meet the teaching and research needs of Penn State, will focus on changes in the copyright law. In a recently published report, the U.S. Department of Commerce proposes amendments to copyright law that will greatly affect the "fair use" access for teaching and research purposes that is now currently protected under copyright law. In addition, symposium organizers say there is increasing pressure from publishers to amend copyright statutes in a way that would likely reduce access by faculty and students to electronic information.

Some of the topics to be covered by a panel of experts during this one-day event include: "Fair Use in an Electronic Age," "Who Owns What? The Role of the Scholarly Author," and Access to Scholarship: Free or Fee? The symposium begins at 9 a.m. There is no fee for this event, however, registration is necessary.

For more information, contact **Jack Sulzer** at (814) 865-3819 or by e-mail at jhs@psu.edu.

Renovation in progress

Robert Carson, left, and Kevin Shippey work on an addition to the Penn State Federal Credit Union building on the University Park Campus. Renovations keep the building closed until noon. After noon, the workers leave and the credit union opens for business.

Photo: Greg Greco

Award

GSA wins two national awards

The Graduate Student Association (GSA) was honored at the 1996 awards dinner of the National Association of Graduate-Professional Students for three outstanding projects: Julie Ann Bubolz, GSA president, received the award on behalf of the association. Penn State received two of 12 program awards presented.

The GSA's *Guide to Graduate Life* and *Tax Guide for Graduate Students* were recognized together in the publications category. The 65-page *Guide to Graduate Life* was selected for its thorough coverage of issues of importance to graduate students.

The *Tax Guide for Graduate Students*

is a unique publication — no other graduate student association publishes a similar document.

The association received a second award for its voter registration program. Twice this fall, during graduate student registration and orientation, the group worked to register graduate students to vote.

NAGPS is the only national student organization solely representing the interests of the nation's 2.5 million graduate/professional students. A complete list of award winners, along with information about NAGPS and its services to graduate students, is available on the Web at <http://www.nagps.org/NAGPS/>

The ARTS

AT PENN STATE

"Security Zone"

Robert Yarber, associate professor of art, painted this oil on canvas work specifically for the School of Visual Arts Faculty Exhibition, "Security Zone" and works by other faculty will be on exhibit from Nov. 19 to Dec. 13 in the Zollner Gallery on the University Park Campus.

Flute and piano recital

Flutist **Jaime Pomponio** and piano accompanist **Kris Sanchack** will present a recital at 4:30 p.m. Saturday, Nov. 16, in the School of Music Recital Hall on the University Park Campus. Pomponio is a student of **Eleanor Duncan Armstrong**, associate professor of music, and is pursuing a bachelor of arts degree in performance. The concert is free to the public.

Choral works performed

At 3 p.m. Sunday, Nov. 17, 500 musicians from the College of Arts and Architecture School of Music will join to perform Carl Orff's *Carmina Burana* and Francis Poulenc's *Gloria* in Eisenhower Auditorium on the University Park Campus.

The Penn State Philharmonic will join with the Concert Choir, University Choir, Glee Club, Oriana Singers, Women's Chorus and the Park Forest Elementary School Chorus to perform the works.

Tickets are \$9 for adults; \$4 for students and are available at the Arts Ticket Center by calling (814) 863-0255 or (800) 278-7849.

Big band jazz concert

Penn State's Centre Dimensions will present a concert of big band jazz Monday, Nov. 18, in the School of Music Recital Hall on the University Park Campus.

The program will include works

arranged by School of Music faculty members **Robert Selander** and **Dan Yoder**. Featured vocalist with the group will be **Meredith Malone**. Admission is \$3 at the door.

Faculty art exhibition

The annual School of Visual Arts faculty exhibition will open on Tuesday, Nov. 19, in the Zollner Gallery in the Visual Arts Building on the University Park Campus. A reception to formally kick-off the event will be held at 7 p.m. The opening reception will feature music by the Lyon Family Chamber Players.

The exhibition will display recent works by School of Visual Arts faculty from the University Park and Commonwealth campuses, as well as works from retired faculty members.

The exhibit, which is free to the public, continues through Dec. 13.

Symphonic Wind Ensemble concert

The Penn State University Symphonic Wind Ensemble will present a free concert at 8 p.m. Wednesday, Nov. 20, in the School of Music Recital Hall on the University Park Campus. This student ensemble is conducted by **Dennis Glocke**, associate professor of music.

Patrick Jones, a doctoral student in music education and conductor of the George Mason University Symphonic Band, will conduct the *Diverimento for Brass and Percussion*.

Chamber Singers to play Bach's Lunch

The Penn State Chamber Singers, conducted by **D. Douglas Miller**, professor of music, will perform at the Bach's Lunch concert at 12:10 p.m. on Thursday, Nov. 21, in the Helen Eakin Eisenhower Chapel on the University Park Campus. The 20-minute free concert is part of the Bach's Lunch series sponsored by the School of Music and the University Lutheran Parish.

The Chamber Singers are an ensemble of 15 singers selected from the 54-voice concert choir directed by Miller.

Audience members may take a bag lunch to eat after the concert in the Roy and Agnes Wilkinson Lounge. Coffee and tea will be provided.

Holiday ornaments exhibition and sale

The Sixth Annual Holiday Ornaments Exhibition and Sale will be held at the Palmer Museum of Art on the University Park Campus from 10 a.m. to 4:30 p.m. Saturday, Nov. 23, and from noon to 4 p.m. Sunday, Nov. 24.

Distinctive ornaments, crafted by artists from around the country, will be on display and available for sale. This year's commemorative ornament, made of hand-cut pewter, is by **G. Adeline Laughlin** of Manchester, Conn.

The exhibition sponsored by the Friends of the Palmer Museum, is free to the public. All proceeds go to the Friends of the Palmer Museum.

Research exhibition

The College of Arts and Architecture's Faculty Research and Creative Accomplishment Exhibition is on display through Nov. 30 in the Kern Building Commons on the University Park Campus.

The exhibition represents selected examples of the challenges arts and architecture faculty encounter in their research and creative work, and explains how research, experimentation and creative thought lead to answers and solutions.

Faculty members included in this year's exhibition are: **Patrick Trimble**, instructor in integrative arts; **Robert E. Leonard**, professor of theatre arts; **Daniel Robinson**, assistant professor of theatre arts; and **B. Lord**, assistant professor of art history.

Under the direction of **Edward Williams**, associate dean, the exhibition was produced by The College of Arts and Architecture's new Communications/Public Relations Office.

Odyssey Through Literature

On the next episode of *Odyssey Through Literature* **George Boornstein** of the University of Michigan speaks with host **Leonard Rubinstein** about his discovery and publication of 38 early poems of the Irish poet **W. B. Yeats**.

Odyssey Through Literature is produced by the Department of Comparative Literature. It airs on Sundays at 6:30 p.m. on WPSU-91.5 FM.

BRYCE JORDAN CENTER

Stone Temple Pilots

Southern California's hard-edged rock band Stone Temple Pilots, with special guest **Local H**, will appear at The Bryce Jordan Center at 7:30 p.m. Wednesday, Dec. 4. Tickets are \$25 for reserved seating.

Stone Temple Pilots received a 1995 Video Music Award for Best Hard Rock Video and both of the group's full-length releases, *Purple and Core*, have gone triple-platinum. The group also was voted Best New Band of 1994 by the Readers of *Rolling Stone*.

Kenny Rogers

The legendary Kenny Rogers will celebrate the Christmas season at The Bryce Jordan Center at 7:30 p.m. Tuesday, Dec. 3. Tickets for "The Gift, A Christmas Concert" starring Kenny Rogers, are \$26.50 for reserved seating. The "Christmas Carol Foundation," a non-profit agency that helps needy families over the holidays, will receive \$1 from each ticket sold.

As one of music's biggest crossover successes, Rogers has received three Grammys, 11 People's Choice Awards and eight Academy of Country Music Awards. His career started with the First Edition and the New Christy Minstrels and he later became a star with hits of "Reuben James" and "Ruby, Don't Take Your Love to Town." He went solo in 1976.

Farewell performance

The original rock musical "Jesus Christ Superstar," with original motion picture star **Ted Neeley**, will appear at The Bryce Jordan Center at 7:30 p.m. Sunday, Dec. 1. Tickets are \$29.50, \$24.50 and \$19.50 for reserved seating.

Based upon the last seven days in the life of Jesus of Nazareth, "Jesus Christ Superstar" was created as a rock opera in the U.S. and Britain.

Upcoming events

■ **Nov. 15:** World Gold Gymnastics Tour; 7:30 p.m.; tickets \$35, \$25 and \$17.50 for adults; children (12 and under) and senior citizens (60 and over) receive a \$3 discount.

■ **Nov. 23:** Penn State Tailgate Party; four hours before kickoff; tickets \$15 for adults; \$10 for children 12 and under.

For a listing of sporting events to be held at The Bryce Jordan Center, or for more information on any event, call the center at (814) 865-5555 or visit the Web site at <http://www.bjc.psu.edu/>.

UNIVERSITY PARK CALENDAR

SPECIAL EVENTS

Friday, November 15

Palmer Museum of Art, 2 p.m., Christoffers Lobby. Gallery Talk, Sarah Andrews on "Portraiture in American Art." School of Music, 4:30 p.m., Recital Hall. Flute and piano recital by Jamie Pomponio and Kris Sanchack.

■ Graduate Student Association, 7 and 9 p.m., 101 Chambers. Film, "Nellie et Monsieur Arnaud," through Nov. 16.

Saturday, November 16

School of Music, 8 p.m., Recital Hall. Piano recital by Steve Grazzini.

■ Center for the Performing Arts, 8 p.m., Eisenhower Auditorium. "Czech Philharmonic Orchestra." For tickets, call (814) 863-0255.

Sunday, November 17

School of Music, 3 p.m., Eisenhower Auditorium. Combined School of Music Choirs and Philharmonic Orchestra. For tickets, call (814) 863-0255.

■ Max Kade German-American Research Institute, 3:50 p.m. at 304 Burrows Building. Open House with Sara Biele and Martyrs' Mirror on display, continuous showing of videos on history and heritage of German immigration; 4-4:30 slide presentation by Director of Institute on JFK's book "A Nation of Immigrants: The Germans." Refreshments.

Monday, November 18

School of Music, 8 p.m., Recital Hall. "Centre Dimensions University Jazz Ensemble." Dan Yoder, director. For tickets, call (814) 863-0431.

Wednesday, November 20

School of Music, 8 p.m., Recital Hall. "Penn State Symphonic Wind Ensemble." Dennis Glocke, conductor.

Thursday, November 21

School of Music, 12:10-12:30 p.m., Eisenhower Chapel. Bach's Lunch Concert presents "The Penn State Chamber Singers."

■ Palmer Museum of Art, 6:30 p.m., Lipson Auditorium. Hille presents the film "Atalia" scheduled for the Performing Arts, 8 p.m., Schwab Auditorium. "Amernet String with St. Lawrence String Quartet." For tickets, call (814) 863-0255.

Friday, November 22

Palmer Museum of Art, 3 p.m., Christoffers Lobby. Gallery Talk, Catherine Cleri on "Ancient to Renaissance Art at the Palmer Museum."

Graduate Student Association, 6:30 and 8:30 p.m., 112 Kern. Film, "Girl Six," through Nov. 23.

■ Graduate Student Association, 7 and 9 p.m., 101 Chambers. Film, "L'America," through Nov. 23.

School of Music, 8 p.m., Eisenhower Auditorium. "Bandoma" with O. Richard Bundy and Dennis Glocke, conductors. For tickets, call (814) 863-0255.

Saturday, November 23

Friends of the Palmer Museum, 10 a.m. to 4:30 p.m., Palmer Museum. Ornament exhibition and sale, through Nov. 24.

Sunday, November 24

School of Music, 2 p.m., Recital Hall. "Singing Lions." Peter Kleier, director. For tickets, call (814) 865-0431.

School of Music, 8 p.m., Recital Hall. "Essence of Joy." Anthony Leach, conductor. For tickets, call (814) 865-0431.

Coming soon

Fans staled in line at the Bryce Jordan Center on the University Park Campus Saturday morning, Nov. 10, for the opportunity to buy tickets to see Wayne State Pilots. The group will be in concert at The Jordan Center on Dec. 4.

Photo: Andrea Hurley

SEMINARS

Friday, November 15

Pennsylvania Space Grant Consortium and WISE Institute, 10 a.m., Nittany Lion Inn. Karen Wynn on "Success Strategies for Women Graduate Students in Science and Engineering."

Undergraduate Studies, 12-1 p.m., 305 Hetzel Union Building. Robert Pangborn on "Advising for 'The Penn State Education': A New View of General Education." Geography, 4 p.m., 226 Walker. David Rain on "The Eaters of the Dry Season: A Geographical Portrait."

Philosophy, 4 p.m., 124 Sparks. Rebecca Comay, author; Karen Iyer, Peter Goff and Maria Talero, panelists, and Greg Recco, moderator, discuss the work of Walter Benjamin.

Monday, November 18

Economics, 10:30 a.m., 420 Kern. Robert C. Marshall on "Pattern Bargaining." Sigma Xi, 12:15 p.m., 110 North Henderson.

Lakshya Vaid on "What Causes Poverty: A Postmodern View."

Agricultural and Biological Engineering, 12:20 p.m., 239 Agricultural Engineering. Dennis Bullington on "Report on ASAE's Workshop on 'Developing Senior-Level Biological Engineering Courses' and Matt Newton on "Calibrating Three Sediment Delivery Functions for Different Physiographic Regions in Pennsylvania."

Gravity Center, 2 p.m., 339 Davey Lab. Pablo Laguna on "Density of Kinks after a Quench: When Symmetry Breaks. How Big are the Pieces?"

■ Italian, 3:30 p.m., 102 Weaver. Santa Casciani on "Ruzante: A Dissenting Voice in the Italian Renaissance."

■ Puerto Rican Association, 7 p.m., Palmer Museum of Art. Peopon Osorio will lecture a side presentation and lecture.

Center for Women Students and Parahelene Council, 7-8:30 p.m., HUB Ballroom. "Mock Acquaintance Rape Trial," through Nov. 22.

English, Institute for the Arts and Humanistic Studies, Research and Graduate Studies Office of the College of the Liberal Arts and the Mary Rolling Fund, 7:30 p.m., Hetzel Union Building Gallery Lounge. Rita Cretz with a reading from her book, *Blue Italian*.

Tuesday, November 19

■ African and African American Studies, noon-1:30 p.m. Francesca Dellich on "Matrilineality in East African Societies."

Physics, 3:30 p.m., 339 Davey Lab. Tom Phillips on "Measuring the Gravitational Acceleration of Antimatter with an Antihydrogen Interferometer."

Geosciences, 4 p.m., 112 Walker. Norman Smith on a subject to be announced.

Nutrition, 4 p.m., 110 Warik Lab. Marc Levin on "Insights into the Molecular Basis of Small Intestinal Adaptation and its Modulation by Retinoids."

Biology, 4 p.m., 8 Mueller Lab. Jill Denmark on "Regulation of Gene Expression by Ethylene During Tomato Fruit Ripening."

8 p.m., Schwab Auditorium. Olympia Dukakis will speak about women's issues.

Wednesday, November 20

Agriculture, noon, 109 Walker. Herbert Cole on "Sustainable Agriculture in Pennsylvania: The Sanrue Initiative."

■ Center for Russian and East European Languages, noon, 124 Sparks. Bogdan Stefanescu on "The Irony Behind Romania's Identity: Metaphors of Insecurity in a Besieged Culture."

Professional Women, 12:05 p.m., 4 Henderson Human Development East. Sara H. Guldner on "Facing Tragedy on the Campus."

Engineering Mechanics, 3:35-5:30 p.m., 214 Hammond. Francesco Costanzo on "Homogenization."

Thursday, November 21

Ceramics, 11 a.m., 301 Steidle. Jan Fouzel on "Unsolved Problems in Domain Structures."

American Studies, 3 p.m., 102 Weaver. Kake Uchi on "Writing the 'Em-space' of American Modernism: Female Popular Modernity and Cultural Dialogue in the 1920s."

Physics, 3:30 p.m., 101 Osmond Lab. James Cronin on "The Highest Energy Cosmic Rays."

Ecology, 3:45 p.m., 106 Boucke. Don Cipoloni on "Enhanced Resistance to Pests Induced by Mechanical Stimulation in Plants: Ecological Consequences of a Generalized Stress Response."

Food Science, 4 p.m., 117 Borland Lab. Hassan Gourama on "Emerging Issues in Food Microbiology."

Institute for Policy Research and Evaluation, Center for Health Policy Research, Department of Health Policy and Administration, 4:50-5:30 p.m., 102 East Henderson. Richard White on "Data and Decisions in Health Care: Is Outcomes Research Useful?"

■ Multicultural Resource Center, 8 p.m., 112 Kern. Dr. Norman I. Maldonado to speak on subject to be announced.

Friday, November 22

Faculty Staff Club, 11:30 a.m., The Nittany Lion Inn. John J. Curley on "The Role of the Press in the New Media Explosion." For tickets, call (814) 865-7500.

■ Economics, 3:30 p.m., 420 Kern. Giovanni Maggi on "The Value of Trade Agreements in the Presence of Political Pressures."

Geography, 4 p.m., 206 Walker. Gordon DeJong on "Motives for Migration: New Perspectives."

Monday, November 25

■ Comparative Literature, 12:15, 101 Kern. Philip Jenkins on "Fascist Writings Among Italians in Pennsylvania."

CONFERENCES

Wednesday, November 20

Pennsylvania School Boards Association Technology Conference, The Penn State Scenic, through Nov. 22.

EXHIBITS

The HUB Art Alley

Drawings by Christine Meyers, through Nov. 17.

Ceramics and stained glass by Shahnaz Lotfi, through Nov. 17.

The Hub Browning Gallery

Paintings by George Diaz, watercolors by Sofia Austin, paintings by Ramon Borges, paintings by Miriam Urguidi and photography by Willy Zayas. All exhibits will be open through Dec. 8.

The HUB Formal Gallery

Photography by Ed Leos, through Dec. 7.

Kern Exhibition Area

Doll exhibit by Janet Robinson, through Nov. 17.

Coin art and jewelry by Claire Allison Rutser, through Nov. 17.

Photography by Minday Hans, through Nov. 17.

Palmer Museum

■ "Cooking for the Gods: The Art of Home Ritual in Bengal," through Dec. 8.

"When Coal Was King: Paintings from the Steidle Collection, College of Earth and Mineral Sciences," through Dec. 8.

"Abstraction to Figuration: Selections of Contemporary Art from the Pincus Collection," through Dec. 15.

"The Wood Engravings of Warren Mack," through Jan. 5.

Zoller Gallery

"School of Visual Arts Faculty Exhibition," through Dec. 13.

■ Reflects an international perspective.

"A Christmas Carol"

Tony Lentz will continue a 17-year Penn State tradition with his reading of Charles Dickens' "A Christmas Carol" on two dates this December on the University Park Campus. The first two-hour performance will be at 8 p.m. Thursday, Dec. 5, in the Nittany Lion Inn's Alumni/Fireside Lounge. The second will be at 8 p.m. Saturday, Dec. 14, in 101 Kern Building. Refreshments will be available at both presentations.

"Gershwin on Ice"

"Gershwin on Ice," the first ice show ever to be performed on the Eisenhower Auditorium stage, will feature Olympic silver medalist **Linda Fratianne** and world champion **Karen Cadavy** in its 8 p.m. Saturday, Jan. 24, performance on the University Park Campus. **Peggy Fleming**, originally scheduled in the performance, will not appear in the show due to schedule conflicts.

In addition to Fratianna and Cadavy, 12 other skaters are scheduled to perform, including other medalists and world champions. The performance is sponsored by the Center for the Performing Arts.

For tickets or more information, contact the Arts Ticket Center at (814) 863-0255. Outside the local calling area, phone (800) 278-7849.

Faculty/Staff Alerts

Ask the president

Are intercollegiate sports part of the educational mission of American colleges and universities or is their main purpose commercial entertainment? Do its players see college as a way to a degree or a pathway to the pros? Does a winning team benefit the entire University or just the athletic department? Just what is the role of intercollegiate sports in the life of a university?

President **Graham B. Spanier** will address this issue and take questions from callers on the next edition of "To The Best Of My Knowledge," at 7 tonight, on radio station **WPSU-FM**, 90.1, 91.5 and 106.7. Listeners can call in to (800) 543-8242 during the one-hour program, hosted by **Patty Satalia**.

Holiday hours

The Penn State Information and Directory Assistance Office will be closed for the Thanksgiving holiday. It will resume normal hours of 7:30 a.m. to 11 p.m. Friday, Nov. 29. If you have any questions, please call (814) 865-6881.

Tax reminder

All non-resident aliens claiming exemption from federal tax, based on a tax treaty, need to complete IRS Form 8233 each tax year. A copy of the I-20 or IAP-66 (whichever is applicable), plus a copy of the Revenue Procedure 87-9 (for lecturers, researchers or teachers) or Revenue Procedure 87-8 (for students, trainees or grad assistants) both need to be attached to the IRS Form 8233.

The forms can be obtained from either the Payroll Office, 307 Rider Building, or the Office of International Students, 222 Boucke Building. Forms are also directly available from the IRS's Web page at http://www.irs.ustreas.gov/olainforms_nubs/index.html

These forms must be completed and received by the Payroll Office, 307 Rider Building, by Dec 2. Failure to do so may cause you to be taxed incorrectly during the 1997 tax year.

For more information, contact the Payroll Office at payroll@psu.edu or (814) 865-7621.

For the children

Catherine Guzman, 4, and her mother, Christina Maldonado, keep a safe distance from some large feathered friends visiting the Paul Robeson Cultural Center on the University Park Campus Sunday, Nov. 10. The birds were one of many attractions guaranteed to entertain children and adults alike at the Hispanic/Latino Festival for Children. Participants could also meet a snake, have their faces painted and visit a table dedicated to arts and crafts. The event was part of this month's Hispanic Heritage Celebration.

HRDC courses

The following courses are being offered by the Human Resource Development Center. To register for free courses, please call (814) 865-8216. To see a description of the courses, log-in to the Web site at <http://www.ohr.psu.edu/> and click on the button for HRDC. Registration for fee-based courses requires a completed registration form on page 67 of the HRDC course catalog.

Managing Your Career: Making Your Decisions Count

Meets from 8:30-11:45 a.m. Wednesday, Dec. 4, in 319 Rider Building. Cost: \$35.

Program/Project Management

Provides the knowledge and tools necessary to successfully manage complex technical projects. Emphasizes allocating and managing personnel, financial resources and time. Meets from 9 a.m.-4 p.m., Friday, Dec. 6, in 319 Rider Building. Cost: \$70.

Understanding Yourself & Others Using the Disc Dimensions of Behavior Model

By completing the Disc Personal Profile System, participants will be able to describe their individual work styles, appreciate others behavioral styles and maximize the potential for effective working relationships. Meets from 9 a.m. to 4 p.m. Tuesday, Dec. 10, in 319 Rider Building. Cost: \$67.

Creativity Unleashed: The Ultimate Tool

Methods explored in this new program have been used by companies such as Disney, AT&T and Proctor & Gamble. Meets for two sessions on Wednesday and Friday, Dec. 11 and 13, from 1:30-4:30 p.m. in 118 Agricultural Science and Industries Building. Cost: \$60.

Motivating and Empowering Employees for Success

Meets from 12:15-4:45 p.m. Monday, Dec. 18, in 319 Rider Building. Cost:\$35.

International Internet site

The University Office of International Programs announces the creation of an internationally focused Internet site, INTFUND, specifically designed to aid faculty in identifying international funding and networking opportunities. Individuals interested in or currently involved with international education and global issues are encouraged to take advantage of this regularly updated, internationally focused Penn State site.

On a daily basis, the Office of International Cooperative Programs monitors national electronic information bulletin boards including Commerce Business Daily, Federal Register, NIH and Office of Federal Programs and transfers any pertinent international opportunities to INTFUND in an abbreviated format. Conferences, workshops and exhibits with an international focus or theme are also posted.

Additionally, the office encourages individuals interested in posting internationally pertinent opportunities to INTFUND to submit the announcement via e-mail to **Tannaz Rahman**, director, Office of International Cooperative Programs, at tzr1@psu.edu. The announcement should be international in nature, include a brief summary of the opportunity or announcement, any applicable deadline and a contact name and telephone number, fax number or e-mail address.

Access to the Web site, INTFUND, may be gained through Penn State's home page <http://www.psu.edu/>. From there, click on the heading "Academics and Research," then click on the heading "Research." Next, under the heading "Other National Associations, Organizations, Institutes, Centers and Other Information," click on "Faculty Funding and Networking Opportunities." From here, you may select a particular geographic area or click on "All" to view the entire listing.

For more information, contact Rahman in 222 Boucke Building at (814) 865-0414, fax (814) 865-3336 or e-mail tzrl1@psu.edu, or visit the Web site at <http://blue.ue.psu.edu/psu/ip/oicp/Home.html>.

News in Brief

Seeing stars

The Penn State Astronomy Club will conduct its next public Astronomy Open House from 8 to 11 p.m. Friday, Nov. 15, on the roof of Davey Lab on the University Park Campus. (In the event of cloudy skies, observations will be attempted on Saturday evening.)

Featured objects for the evening will include the waning crescent moon and the planet Saturn. Other celestial objects may also be shown, depending on sky conditions. A planetarium show will be held in 541 Davey Lab. The next event will be Dec. 6. The open houses are free and everyone is welcome to join the Astronomy Club for a relaxing evening under the stars.

Health Promotion

The following sessions are being offered by the office of Faculty/Staff Health Promotion:

Enlightening Lunch — Healthful Holidays

Learn ways to incorporate lower-fat food preparation and eating practices into your plans for holiday meals and entertaining. Meets from noon to 1 p.m. Thursday, Nov. 21, in 110 Henderson Building (The Living Center). No cost. To register, contact Jan Hawbaker at 865-3085 or jqh3@psu.edu.

Free Blood Pressure Screenings

Free blood pressure screenings will be available at the Benefits Open House on Friday Nov. 22, from 8 a.m. to 4 p.m. in 101 Kern Building.

Open parking

As in the past, Friday, Nov. 29, (the day after Thanksgiving) will be considered open parking. Any faculty/staff and student permits will be honored to park in any legal parking spaces as long as they display a valid parking permit. "No Parking" areas as well as handicapped, reserved and metered spaces will be enforced.

Meats lab sales

The Penn State Meats Lab will have meat sales each Friday through Dec. 13. Sale hours are from 1:30 to 4 p.m. There is usually a selection of beef, pork and lamb cuts, as well as specialty items such as summer sausage, sausage, hot sausage, scrapple, cured ham and bacon. The Meats Lab is located directly across Fox Hollow Road from Beaver Stadium. For more information, call the lab at (814) 865-1787.

Open house

Peter Ippolito, consulting officer for TIAA-CREF, goes over some information with Marie Draguns, whose husband is employed at the University. Draguns attended a benefits open house Nov. 6 on the University Park Campus. The next open house is scheduled for 8 a.m. to 4:30 p.m. Friday, Nov. 22, in 101 Kern Building.

Photo: Greg Grieco

EMPLOYEE BENEFITS

A regular column provided by the Office of Human Resources

HealthAmerica Provider Directory update

Most of you should have received a "Time to Choose" packet for the 1997 switch enrollment period which began Nov. 4. A HealthAmerica Provider Directory of participating HMO and PPO providers was included in that packet. Changes have been made since the printing of that directory so HealthAmerica has prepared a "Provider Directory Update" which may be helpful to you in choosing the best plan for you and your family. These updates pertain to the HealthAmerica Central Pennsylvania Directory and may be obtained in any of the following ways:

- The provider directory changes are reflected on the Internet effective Nov. 11. You can access this site at www.ohr.psu.edu/benefits/directory.htm.
- Printed copies of the update will be available at the scheduled Benefits Open Houses.
- Human Resources representatives and directors of Business Services will maintain a supply of copies of the update.
- You may call HealthAmerica at (814) 231-8970 (University Park), or at (800) 366-6433, and an update will be sent to you.

Harrisburg and Dickinson School of Law join forces to offer cooperative degrees

The Dickinson School of Law and Penn State Harrisburg will create a program for a cooperative degree in law and public administration. The two schools will begin admitting degree candidates for the 1997-98 academic year.

"This program will permit students to earn a law degree from The Dickinson School of Law and a master's degree in public administration from Penn State Harrisburg in less time and at a lower cost than would be possible otherwise," said Dickinson Dean Peter C. Glenn. "It will be extremely useful for students who are pursuing careers for which both degrees are helpful."

According to officials, public administration graduates most often work in government positions that require some knowledge of the law.

To be admitted to the JD/MPA degree program, students must first be admitted to The Dickinson School of Law under its regular admission procedures. Dickinson will forward to Penn State Harrisburg applications of

students who are interested in and qualified for the program. Penn State Harrisburg will then make independent admissions decisions regarding these candidates. Some candidates will likely apply to and be admitted to both schools before their enrollment at Dickinson.

Under an agreement approved by officials at both schools, students will be required to complete the first year of the JD program at Dickinson before beginning the MPA program at Penn State Harrisburg.

A maximum of nine credits toward law school course work may be transferred for credit toward the MPA degree at Penn State Harrisburg and vice versa. Students in the program may complete six credits of relevant Law School clinic work in lieu of the field placement required for the MPA degree. All students in the program will have two advisers, one from Dickinson and one from Penn State Harrisburg.

CQI

CONTINUOUS
QUALITY
IMPROVEMENT

Re-engineering information systems

University Registrar James Wager, in a forthcoming edition of *Quality in Higher Education*, describes Penn State's "Comprehensive Academic Advising Information System," or CAAS (rhymes with jazz). In the past, advisers didn't have access to the administrative computing system and students could only request information from the Registrar's Office during business hours on weekdays.

CAAS, developed by a CQI team led by Gary Hile, has dramatically re-engineered the way the Registrar's Office now does business. Students can access information about their academic history, financial records, accounts payable, grades, transcripts and the status of loan applications. One drawback of the system, its relative limited availability, will be solved when access to CAAS will be deployed through the World Wide Web. In January 1997, the number of Web access sites will increase from 350 to approximately 70,000 workstations, which represents the entire student population. CAAS team members are Russ Brode, Jim Kelly, Alan Kepler, Michael Leonard, Jim Levin, Steve Littell, Scott Smith, Sue Winick, Anne Mycek-Memoli and Chris Brown.

New Web site features career programs

This fall, programs provided by Career Development and Placement Services are described on a Web site, thanks to the efforts of a CQI team sponsored by Jack Rayman, director of CDPS, and led by Ellen Houser, counselor. The team's goal was to provide a comprehensive informational summary of CDPS programs that would educate their customers about the process of career development. The site has been quite successful, with more than 10,000 "hits" received on a recent day. Team members are Phil Bucher, Cathy Dufour, Jim Ellis, Alex Kim, Christy Schiano and Diane Weller.

For more information please contact Louise Sandmeyer, executive director of the Center for Quality and Planning, (814) 863-8721 or les1@psu.edu.

Traditional dance

The Harvest Dance, a Diwali tradition, was performed during the Diwali Festival of Lights Saturday, Nov. 9] at the HUB Ballroom on the University Park Campus. The dance illustrates various steps involved in separating husk from grain using the traditional tool "supda" used by women farmers. Nearly 500 guests enjoyed this and other dances, and a traditional Indian dinner. The event was sponsored by the Indian Students Association.

Penn Staters

Larry Burton, professor and head of the department of electrical engineering, College of Engineering, was elected to the board of directors and as secretary/treasurer of the National Electrical Engineering Department Head's Association (NEEDHA) for 1996-97. He will assume the office of vice president of NEEDHA during 1997-98 and will become president during 1998-99.

Travis DeCastro, assistant professor of theatre arts and production manager for the University Resident Theatre Company and Pennsylvania Centre Stage, was a stage manager for "Broadway on Broadway" in New York City. The production featured Chita Rivera, Julie Andrews, Sarah Jessica Parker, Rosemary Harris and many other Broadway celebrities.

Helen Guthrie, professor emerita of nutrition in the College of Health and Human Development, was an invited speaker recently at an international food security symposium. The event, held in conjunction with the 10th anniversary of The World Food Prize, addressed "Food Security: New Solutions for the 21st Century."

Michael A. Haughton, a visiting research associate in The Smeal College's Department of Business Logistics, was the recipient of an Outstanding Paper Award at the 1996 Conference of the Western Decision Sciences Institute. His work was titled "Estimating Transport Distances Under Conditions of Unequal Delivery Quantities Across Customers."

Penny M. Kris-Etherton, professor of nutrition in the College of Health and Human Development, will serve as a member of the Nutrition Study Section, Division of Research Grants of the National Institutes of Health. Her membership term runs until June 30, 2000. As a member, Kris-Etherton will contribute to the national biomedical research effort with other study section members. She will review grant applications submitted to the NIH, make recommendations on these applications to the appropriate NIH national advisory council or board, and survey the status of research in the specified field of science.

Lawrence Muller, professor of dairy science, presented three seminars on dairy science in Northern Ireland and Ireland as part of a USDA exchange with Irish scientists.

Muller gave two seminars at a research center in Hillsborough, Northern Ireland, and presented another seminar at Moorepark in Fermoy, Ireland.

William Sharpe, professor of forest hydrology, has been named the Chesapeake Bay Advisory Committee.

Spiro Stefanou, professor of agricultural economics, has been appointed editor of the *American Journal of Agricultural Economics*, the journal of the American Agricultural Economics Association. Stefanou has been an associate editor since 1991 and will serve a three-year term as editor.

Joan Thomson, associate professor of rural sociology, will serve on a Pennsylvania Department of Education task force that is writing standards for home economics for grades K through 12.

The musical group "Simple Gifts," has released a new recording titled "Other Places, Other Times" featuring the works of several artists, including Smith Toulson, professor of music, Linda Littleton, senior research programmer, Celia Wyckoff, instructional publications designer, and Rachel Hall, graduate student in mathematics. It is the fourth release by the State College-based group, which plays traditional folk music from around the world plus original compositions.

James L. West III, distinguished professor of English and a Fellow in the Institute for the Arts and Humanistic Studies, was the invited speaker at the F. Scott and Zelda Fitzgerald Festival in Alabama, the Fitzgerald Centennial Celebration at Princeton University and the inaugural exhibition of F. Scott Fitzgerald's manuscripts and papers at Princeton. His address was titled "F. Scott Fitzgerald's (Posthumous) Career."

Donna S. Queeney, director of research and external relations for Continuing and Distance Education and affiliate associate professor of education, was the keynote speaker for the Invitational Interprofessional Workshop on Competence Assurance sponsored by the Saskatchewan Registered Nurses' Association, Canada. Her address was in two parts: "The What and Why of Competence Assurance" and "The How of Competence Assurance."

Study shows birds, mammals lived alongside the dinosaurs

A large gene study suggests that modern orders of birds and mammals evolved when the continents were separating 100 million years ago — much earlier than previous estimates based on fossil studies, which link the evolutionary event to mass extinctions 65 million years ago.

"We have substantial evidence that these modern groups of animals originated well before the extinction of the dinosaurs," Blair Hedges, assistant professor of biology, said.

In the largest genetic study of its kind, the researchers analyzed 79 genes from species representing six orders of mammals and seven orders of birds. Those species included primarily human, mouse, cow, chicken, pigeon, duck and ostrich.

"We analyzed a large amount of data — all the relevant information for these species now available in the world's genetic databases," Hedges said. "The widespread use of genetic model organisms for medical research is the reason why so many gene sequences are available."

By comparing individual genes in pairs of species, the researchers found that about half the genes in their study had accumulated mutations at a fairly constant rate relative to one another during their evolution, so they could use each mutation as a "tick" in a kind of molecular clock. The scientists calibrated their molecular clock to an evolutionary

Blair Hedges, assistant professor of biology, examines a chart of DNA sequences. Hedges and other researchers compared gene mutations to determine how long ago various species originated.

Photo: Greg Grieco

event well established by fossil studies. "A clock isn't any good unless it is calibrated to a time that everyone else agrees on," Hedges said, "and just about everyone agrees that the reptilian ancestors of birds and mammals appeared about 310 million years ago." Using this date as a secure calibration point — and the mutation rate for each of the constant-rate genes as a timing device — the researchers were able to determine how long ago each order originated.

"After averaging the time estimates for all the constant-rate genes, we traced back the origin of the orders to about 100 million years ago," Hedges

said. Most previous studies of this type involved only one or just a few genes, he said, and lack the statistical power and accuracy of this study.

"These results are unexpected," Hedges said, "because very few fossils resembling modern orders of birds and mammals have been found in rocks dating before 65 million years ago and paleontologists are in dispute over whether some of these specimens are of modern or ancient orders." The researchers speculate that these animals might not have been very abundant before 65 million years ago because the dinosaurs were so dominant then. "If there were not very many of

them, we might not even find the small proportion that became fossilized," Hedges said. "Our research is showing that the fossil record of the orders of mammals and birds apparently is very biased."

Hedges said scientists might someday be able to better determine when each order originated and on which continent it arose if they had gene sequences for more orders of mammals and birds plus more fossil discoveries.

In addition to Hedges, the research team includes Patrick H. Parker and Sudhir Kumar, graduate students in biology, and Charles G. Sibley, Yale University professor emeritus of biology.

Erie researcher earns NSF grant to study comets

Students at Penn State Erie, The Behrend College, are seeing stars — and comets, and planets — following the recent announce-

ment that a faculty member has been awarded a National Science Foundation grant of more than a quarter of a million dollars.

Maria Womack, assistant professor of physics and astronomy, received a grant of \$257,094 from NSF's Faculty Early Career Development Program to fund the proposal "Carbon Monoxide in Comets."

Maria Womack

Comets, said Womack, provide a unique opportunity to study the creation of the solar system. Comets are made from the same gases and grains from which the solar system formed, but have spent billions of years in the deep freeze of outer space.

Using the National Radio Astronomy Observatory at Kitt Peak, Ariz., Womack and her students will identify and measure the amounts of carbon monoxide, formaldehyde, hydrogen cyanide and methanol, or rubbing alcohol, emitted by several comets, including Comet Hale-Bopp, an extremely bright celestial visitor that will be seen as a naked-eye object through much of the winter and spring.

Womack's student researchers, or "comet watchers," as she calls them, will also conduct simultaneous optical observations and electronic CCD camera recordings of Comet Hale-Bopp using a new computer-driven, 16-inch telescope to be purchased with grant funds. Images of the comet will be made from the telescope to monitor the comet's brightness as it approaches and recedes from the sun.

Optical observations are important in that they offer explanations for unusual gas concentration readings recorded by the radiotelescope, and may detect outbursts or jets from the comet, Womack said.

Spanish is most common non-English language in Pa.

Spanish replaced Italian as the leading non-English language spoken at home in Pennsylvania in 1990, according to the Pennsylvania State Data Center at Penn State Harrisburg.

Drawing from 1990 U.S. Census figures, 2.4 percent of all households in the Commonwealth are Spanish speaking, the Data Center reports. Spanish was reported as the main second language by 213,096 Pennsylvanians (1.9 percent of the population) in 1990. This is a 59 percent

increase from the 1980 figure. Italian ranks second in Pennsylvania among non-English languages with 103,844 residents (0.9 percent) speaking it at home. In 1990, Italy was still the most frequently reported country of origin for foreign-born people in the Commonwealth.

In 1990, 7.3 percent of Pennsylvanians reported speaking a language other than English at home, an increase from 6.9 percent in 1980. The national average is 13.8 percent, plac-

ing Pennsylvania 24th (tied with Oregon) among the states for percentage speaking another language at home. New Mexico ranks first with 35.5 percent and Kentucky is last with 2.5 percent.

The state-sponsored Pennsylvania State Data Center is the Commonwealth's official source of population and economic statistics and services. It is based at Penn State Harrisburg's Institute of State and Regional Affairs.

International sites on the Penn State Web

Since 1982 the Penn State Australia-New Zealand Studies Center has been the leading North American institute dealing with the Southwest Pacific. During the last year the center has moved onto the World Wide Web and distributes electronic information about Australia, New Zealand and Oceania. Penn State is the "home" of the majority of major international Web sites related to the region.

The center's site (<http://www.psu.edu/research/ancz>) offers extensive information about the center and local activities. The official W3C World Wide Web virtual libraries for Australia (<http://www.psu.edu/research/ancz/austr.html>) and for New Zealand (<http://www.psu.edu/research/ancz/arean/nz.html>) are maintained at Penn State, as is the site for the Australian Studies Association of North America (<http://www.psu.edu/research/asana>). Numerous other "home" sites for centers and associations in the United States and Europe are also maintained at Penn State.

These sites are listed as major resources in more than 20 countries and receive hundreds of "visits" each day. Readers are invited to visit these sites and offer comments to **Frank Poyas** at e-mail fbp1@psu.edu.

Education site

Another site maintained at the University is one supporting the Pennsylvania Department of Education. The page has too much information to summarize here, except to say that it spans topics like "educational initiatives," elementary and secondary issues, post secondary and adult education, and includes links to other educational resources throughout the Commonwealth. URL: <http://www.cas.psu.edu/pde.html>

Server status page

So, you haven't received an e-mail message in what, five minutes, and panic has set in? You can quickly check the status of the several University-wide servers at <http://rip.saw.cas.psu.edu/statpage/statshml>.

If you see nothing but green lights there, at least you know where the problem isn't...

Transplant time

Office of Physical Plant employee Chuck Wedler was busy harvesting trees from the Department of Forestry for transplanting on the University Park Campus. The project is part of the \$100,000 initiative to replace trees damaged by the heavy snowfall last November.

Obituaries

Nationally known sociologist was 93

Jessie Bernard, professor emerita of sociology and nationally known sociologist and authority on women and the family, died Oct. 6. She was 93.

Bernard, who served 18 years on the faculty, had earlier served as professor of sociology at Lindenwood College for Women in St. Charles, Mo. Earlier, she was a statistical analyst for the Bureau of Labor Standards and a research investigator for the Railroad Retirement Board.

She was a graduate of the University of Minnesota, where she also received her master of arts degree. Her doctor of philosophy degree was conferred by Washington University.

Bernard, who retired in 1964, was the author of numerous books on family, community and feminism that established her as a premiere scholar of the women's movement. After her retirement, she turned out several works, among them *The Sex Game*, *The Female World* and *The Future of Motherhood*. She was a central figure in the feminist movement, studying subtle forms of sex discrimination as scholar in residence for the U.S. Commission on Civil Rights. She was a founding board member for the Center for Women in Policy Studies.

Former ORL employee, stadium usher was 69

Lawrence "Larry" Patrick Reilly, 69, died Oct. 9 at his home. He was employed at the Ordnance Research Laboratory (now the Applied Research Laboratory) in 1948. In 1952, he joined Haller, Raymond and Brown Inc. as publication manager until 1969, and was with Locus Inc. of Boalsburg for 10 years until his retirement.

For 10 years he was head usher at Beaver Stadium, missing only one game. He was given the Edward Sulkowski Award from the Wrestling Club in 1992. Memorial contributions may be made to the Dr. Jack Light and Homer Barr Scholarship Fund, in care of the Penn State Wrestling Club, Box 316, State College, PA, 16801.

Joyful noise

Student choir making sweet music

Heart and soul

Giving it their all during a recent rehearsal are members of the group "Essence of Joy," (from left) Ryan Booz, Jason LaMar Yates and Lachele Jack.

By LISA M. ROSELLINI
Public Information

For the members of the singing group "Essence of Joy," everything is about the music. Beautiful, soulful, moving music infused with the infectious rhythm of African American gospel.

What else but music could bring students from such an eclectic assortment of majors as nutrition science, theatre, vertebrate physiology and forestry into such a harmonious mix?

"It's uplifting, it's different, it's high-energy and it's fun," says Brian Gifford, a junior forestry major whose

In concert

You can catch "Essence of Joy" in concert at 6 p.m. Sunday, Nov. 24, in the School of Music Recital Hall. Tickets may be purchased at the door.

and how the audience can really get into it."

Gifford, who has been singing with the choral group for three semesters, smiles to himself as he

low, deep voice pegged him to sing bass for the group. "On stage, it's really hard to describe, but it's incredible the amount of adrenaline you can get going on

recalls a performance during a religious service at St. Paul's Baptist Church in Harrisburg. The congregation "got nuts."

"Clapping, standing up, singing," he says. "They were going crazy."

And that's what Anthony Leach, assistant professor of music and director of "Essence of Joy," calls "low-down church." The kind of performance his group thrives on.

"I try to engage the audience with the music I select," Leach says. "Until the audience gets over its own inhibitions or receives permission in

Students give service and so much more

By ALAN JANESCH
Public Information

Over the past two summers, four Penn State students logged a total of 3,600 hours of volunteer work in Philadelphia, bringing science, nutrition, art, dance and other programs to children and youth in Philadelphia. They also brought themselves a lasting sense of accomplishment and responsibility.

The four Penn Staters, all in the College of Agricultural Sciences, are Marney Dorsey, Shurl Harris, Karima Rose and Becky Vuong. They were the Penn State contingent of the Pennsylvania Service Scholar Program, which commits students to perform 900 hours of community service over a two- to three-year period.

Dorsey said that the program challenged her and taught her a lot about the kids she worked with—and herself.

"My background is in dance, and I worked with children suffering with sickle cell anemia, to help them learn how to express their feelings through art and dance," she said. "I really enjoyed working with the kids. Seeing them do something they didn't know how to do before and knowing I'd helped them, made me feel like we were part of the same family. It also made me realize it's important for me to share the things I've learned with others."

The Penn State program—the only multicultural service corps in Pennsylvania—is part of a statewide service scholar program supported by the Pennsylvania Campus Compact and the Corporation for National Community Service.

Statewide, it enables about 170 college and university students to work with community organizations and institutions to address unmet needs of

various kinds—such as educational, safety-related and environmental.

This summer, Dorsey, Harris, Rose and Vuong worked with local community groups in programs organized by the Penn State 4-H Extension Program in Philadelphia, in partnership with the Office of Volunteer Programs and Services, a division of Student Affairs at the University Park Campus. Among other things, they:

- Served as counselors in summer science day camps, leading projects in embryology, hydroponics, rocketry, wood science, nutrition, conflict resolution, leadership development and career exploration. Day camp participants, ranging in age from 5 to 16, represented many ethnic groups and income levels.

- Developed a training manual for more than 200 summer employees of the Philadelphia Department of Recreation, who work with 7,000 children and youth at 73 playgrounds throughout the city. The city recreation department was so pleased with the manual, it gave the service scholars a special commendation.

- Brought science and performing

Happy camper

Marney Dorsey spent her summer working with children with sickle cell anemia and/or the sickle cell trait at a day camp in Philadelphia.

arts activities to day camp participants with sickle cell anemia and/or the sickle cell trait.

- Worked with Southeast Asian youth on programs involving science, English as a second language, conflict resolution, music and nutrition.

The Pennsylvania Service Scholar Program is now in its second year. The Pennsylvania Campus Compact, which helps support the service

scholar program, is a private, not-for-profit program run by the Pennsylvania Association of Colleges and Universities. Created by college and university presidents, Campus Compact has helped higher education pursue both learning and community service.

Since 1989, Pennsylvania's institutions of higher education have donated nearly 10 million hours of service to surrounding communities.

Penn Staters

L. Eric Cross, Evan Pugh professor of electrical engineering, received the IEEE Ultrasonics, Ferroelectrics and Frequency Control (UFFC) Society's Achievement Award for 1996. The award, which recognizes his long-term contributions to the field of ferroelectricity, his accomplishments in education and his participation in the UFFC Society, was presented to him at the 1996 IEEE International Ultrasonics Symposium in November.

Fredina Ingold, director of recruitment and marketing and director of athletics at the Penn State Altoona Campus, recently received the Council of Chief Student Affairs Officers' "Outstanding Services to Students Achievement Award." The award recognizes Ingold's efforts in rebuilding Penn State Altoona's athletics program and her efforts toward increasing enrollment.

Dale Jacquette, professor of philosophy, presented a paper on "Sellers on the Intentionality of Thought and Language in Empiricist Philosophy of Mind" at the Conference on the Philosophy of Wilfrid Sellars: A Session on Empiricism and the Philosophy of Mind, in Dunabogdany, Hungary.

John H. Kramer, executive director of the Pennsylvania Commission on Sentencing and professor of sociology and criminal justice, has been named interim staff director of the U.S. Sentencing Commission in Washington, D.C.

Kramer, director of the Pennsyl-

vania commission since its creation in 1978, is on leave from his two Pennsylvania posts to work for the federal commission under a contract that ends in May.

The U.S. Sentencing Commission was created in 1985 as an arm of the federal judiciary to develop a sentencing policy for federal courts. The commission's sentencing guidelines, which went into effect Nov. 1, 1987, are formulas used by federal judges and probation officers to ensure that people who commit similar crimes are similarly punished.

Charles S. Prebish, associate professor of religious studies, was the invited guest editor of a special focus edition on "Buddhist Ethics" for the *Journal of Religious Ethics*.

Karl Stoenefalk, professor emeritus of exercise science and former acting dean of the College of Health and Human Development, received the Distinguished Service Award from the Phi Eta Sigma National Honor Society at its 33rd national convention. The award was given to recognize Stoenefalk's dedication and leadership.

Cary Libkin, associate professor of theatre arts, directed "Spikes Heels" at the University of Texas. The production received four nominations by the Austin Critics' Awards and won Best Comedy of 1995-96. It was the only university-produced project to receive a nomination. Libkin also directed a showcase performance of

"Fragrant Harbour" at the John Houseman Theatre in New York City. The musical is part of the National Alliance for Musical Theatre Festival of New Plays. The music for "Fragrant Harbour" was composed by Ed Linderman, visiting professor of the School of Theatre this year.

Austin J. Jaffe, holder of the Philip H. Sieg professorship of business administration, delivered a keynote address and two presentations on housing issues at two recent conferences in Denmark.

His keynote talk, "European Housing: Fact or Fiction?" was made before the International Housing Research Conference in Helsinki, Denmark. At the same event, Jaffe, a member of The Smeal College's Department of Insurance and Real Estate, presented a paper titled "Comparative Legal Systems as a Predictor of Housing Policy." He also served as an invited presenter at the Young Housing Researcher's program held in Horsholm, Denmark, where he spoke on "Housing and Real Estate Economics: An Overview."

Philip Mosley, associate professor of English, communications and comparative literature at the Penn State Worthington Scranton Campus, is translator of a novel by Guy Vae, *October Long Sunday*, published by Peter Lang in its Belgian Francophone Library series.

DuBois lends hand to local school

The Penn State DuBois Campus faculty and staff lent a helping hand to the Redbank Valley High School by providing nearly 250 books and 15 IBM computers to the school which was devastated by flood waters earlier this summer.

Shortly after the flooding occurred, **John Farr**, assistant professor of physics at DuBois Campus, heard of the school's plight and alerted the campus community.

"This seemed like an opportunity where the campus could do a great deal of good," says Farr. "It was our chance to help a school district which has sent us some very good students."

The drive began as an attempt to help Redbank Valley refurbish its library, which was destroyed. Books were secured from the gift room at Patee Library and from the Mathematics Department at University Park. In addition, campus employees donated a variety of titles to the collection. Later, the computers, which came from the engineering technology programs at the campus, were added to the campus' contribution.

Joyful noise

continued from page 1

some cases to clap or get up out of their seats, then we connect. Sometimes the response is very, very quiet. The listeners go deeper into themselves to find the connection. Sometimes they're flushed and there's lots of tears, and sometimes they're in the aisles. We don't do your normal, sit down, change the channel concert."

Definitely not.

Performing contemporary and gospel songs from the African American tradition, the group's concerts elicit a visceral response from listeners that forces them to tap their feet, clap their hands, close their eyes and "feel" the music. In addition, the composition of the choir is not what first-time listeners expect.

"It is unique and novel that the majority of the membership has been and is white," Leach says. "This is quite a mix of students, but it's not about your ethnic or cultural background or your religion. It's about the music."

"It is not our differences that come to the fore; it's the music we share," he says.

For Leach and other African Americans in the group like **Oriyama Lineberger**, a sophomore soprano majoring in voice, and **Sunday Rivers**, a junior nutrition science major who sings alto, the music is home. Having been raised

a singing most of the same melodies in their churches as youths, all three say the songs are comforting and personal. Songs like "Freedom Come," "Old Time Religion" and "St. Louis Blues."

"This is the kind of music I grew up on," Lineberger says. "It's so energizing for everyone and I believe in what I'm singing about."

Rivers said she is glad when she looks around the group and sees the diverse mix. "It really shows that other people are interested in my culture and that makes me feel good."

As a choir, "Essence of Joy" is still in its formative stages. Started by Leach in 1991 as a "pick-up choir" to fill a request to perform music for a Martin Luther King dinner at University Park, "Essence of Joy" has grown to a 35-member ensemble with a dedicated following. At a recent October performance in the Eisenhower Chapel on campus, the group voiced the crowd with an upbeat, almost hip-hop-like rendition of "Glory, Glory Hallelujah!"

"We are not Penn State's gospel choir," Leach emphatically declares. "We do so much more than gospel. Our songs encompass a wide range of genres—sacred and secular—and we try new things always. Because it is not the African American tradition to sit down with a score of music, but rather to be taught by rote, these students are learning something valuable about themselves: they can ad lib; they can use skills they may not otherwise have known they had."

The fact that there is no sheet music to follow is something that seems to intrigue members of the choir.

"This is a chance to sing freely, how I want to sing," **Shawn King**, a senior tenor with "Essence of Joy," says. "There is a lot of improv in this type of music and there isn't the hindrance of sheet music."

Leach also says his musicians are not only learning about themselves, but also learning about a culture and a musical repertoire they normally would have encountered.

This experience enables them to be sensitive and to appreciate something that is not in their background," Leach says. "Having undergone a music that is exciting and vibrant with wonderful nuances has to produce wonderfully, healthy human beings."

"This is one of the most challenging choirs I have ever

Music fills his life

From behind his closed office door in 212 Music Building on the University Park campus, **Anthony Leach** can be heard robustly singing the words to a gospel tune. At certain points, he punctuates his impromptu solo with bangs on his desk to help the young musician he is advising learn the proper count for holding the notes in this particular piece.

Students walking through the hall barely look in the direction of the sound. They're used to Leach unleashing his powerful voice into spontaneous bursts of song.

An assistant professor of music and music education, Leach is a seasoned performer. Originally hailing from Washington, D.C., Leach was a choral leader for a high school, minister of music and organist for the New Bethel Baptist Church in Washington and also accompanist for the Howard University choirs.

"I came here on a one-year leave of absence from my high school job in 1991 to work on my Ph.D.," he said. "I never intended to get a job, but that one-year leave stretched into a

three-year leave until I decided this was a commitment I wanted to pursue. I saw a real need here to share my expertise in choral music and education."

In 1991, Leach borrowed a page from his past to help students from a variety of backgrounds learn and perform in the African American tradition. He formed "Essence of Joy" from a handful of students he had recruited from various other choirs on campus. Taking their name from a now-defunct capella group from Harrisburg, "Essence of Joy" began performing for various events on campus. By 1994 when Leach was appointed to the faculty at Penn State as an instructor of music, the choir had evolved into a group of about 24 polished singers with name recognition. Leach proposed that the choir become a course offering and for the first time last year, "Essence of Joy" bore one academic credit.

"I feel honored that students want to interact with me," he said. "It's a lot of work...but it's a hoot!"

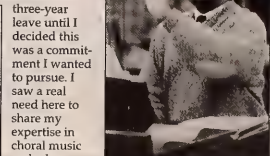

Leach also is director of the Penn State University Choir.

Countdown begins for United Way contributions

University Park employees have just two weeks to submit contributions for the 1996 United Way campaign. A joint celebration with Centre County United Way is planned for Dec. 11, at which time both the University and county hope to announce record-breaking donations. The University's goal is \$450,000.

Employees who have not yet responded to the annual fund-raising drive are reminded to forward contribution forms to the Payroll Office as soon as possible so totals can be included in the final announcement.

People now giving through payroll deduction who do not complete a new form indicating changes will continue to have deductions made at the previous amount.

Obituaries

Paul Scosah, an employee of Penn State for 16 years before retiring in 1980, died Oct. 9. He was 78. Scosah served in the Army during World War II and was a coal miner before working for the University.

Walter B. Storch, assistant supervising herdsman, Department of Dairy and Animal Science, died Oct. 5 at the age of 98.

Storch was a 1919 graduate of Troy High School. He attended Pennsylvania State College, where he studied dairy science. He was an official teacher for the Holstein Association and later a herdsman. On July 25, 1925, he was hired as a herdsman by Penn State, where he worked until his retirement May 1, 1959. He was a member of the St. Paul's United Methodist Church in State College.

Bernice E. Wasson, residence hall worker B, Housing and Food Services, from Oct. 16, 1960, until April 10, 1971; died Oct. 11 at the age of 86.

Therman W. Wiser, who retired in 1977 as supervisor of the research accounting department at Penn State after 19 years of service, died Oct. 18. He was 80.

Wiser, who also taught accounting and auditing at the University for six years before becoming supervisor, was a 1938 graduate of Penn State and received his master's degree in accounting from Penn State in 1952. He received a certified public accounting degree in 1958. He was a charter member of the Port Matilda Area Lions Club and served on the board of directors of the Bald Eagle Area School District, as well as taking part in other community groups.

directed. This choir just inhales music," he says. "You give it to them and they inhale it and they're ready to go. The energy I get from these kids—even when I'm dragging on a Sunday night."

"They nurture and stimulate me as much as I brow beat and intimidate them to perform with excellence."

It's the students' dedication, hard work and "sense of wonder," according to Leach, that has allowed "Essence of Joy" to achieve recognition across the University. But the group is only just beginning to stretch its wings and make a name for itself outside of University Park. Scheduled present its fall concert on Nov. 24 on campus, "Essence of Joy" also has been invited to sing at the Eastern Division Conference of Music Educators National Conference in Baltimore in February.

"These tours can be used as a measure of our success. But I don't want us to become too available. It's easy to become popular," Leach says, carefully emphasizing the last word.

As the visibility of the choir increases and our reputation truly does proceed us, it will remain to be seen what we will bring to Penn State."

LECTURES

Electrical engineer to speak on applying rules to the job

Jamie De La Ree Lopez, associate professor of electrical engineering at the Virginia Polytechnic Institute and State University, will give the Hispanics in Science and Engineering lecture at 7 p.m. Tuesday, Nov. 26, in Kunkle Lounge, Hammond Building on the University Park Campus. His lecture is sponsored by the Department of Electrical Engineering and is part of this month's Hispanic Heritage Celebration.

In his lecture, "Liability, Design and Education," De La Ree Lopez will discuss risk and creativity in problem solving and why some graduates have problems in their careers when they too rigidly apply the rules they've learned.

A native of Hermosillo, Mexico, De La Ree Lopez received his B.S. degree with honors in electrical engineering from Monterrey Tech, Mexico, in 1980, and his M.S. and Ph.D. degrees in electrical engineering from the University of Pittsburgh in 1981 and 1984, respectively. He received the title of University Scholar from the Uni-

versity of Pittsburgh in 1984. In 1984, he joined the faculty at Virginia Polytechnic Institute where he is currently an associate professor in the Center for Power Engineering in the Bradley Department of Electrical Engineering. His primary area of research is in power systems. De La Ree Lopez is a senior member of IEEE, Tau Beta Pi and Eta Kappa Nu.

De La Ree Lopez also will give a Department of Electrical Engineering graduate colloquium on "Phasor Measurement Systems: Theory and Implementation," at 2:30 Tuesday, Nov. 26, in room 371 Willard Building. The public may attend. Other events in Hispanic Heritage Month are a Puerto Rican Food Festival from 11 a.m. to 2 p.m. Friday, Nov. 22, at the Paul Robeson Cultural Center, and closing ceremonies and dance at 6 p.m. until midnight on Friday, Dec. 6, in the Nittany Lion Inn Ballroom.

For more information, contact **Latisha Mejias** at (814) 863-1412 or **Michael Blanco** at (814) 865-1773.

Managed care is topic of Dec. 2 talk

Lawton R. Burns, associate professor of health care systems at The Wharton School and director of research at the Leonard Davis Institute of Health Economics at the University of Pennsylvania, will give a lecture from 1 to 3 p.m. Monday, Dec. 2, in the Living Center in Henderson Building on the University Park Campus.

His lecture, "The Impact of Man-

aged Care on Integrated Delivery Systems," is part of the Issues in Health Policy and Health Administration seminar series and is co-sponsored by the Institute for Policy Research and Evaluation, the Center for Health Policy Research and the Department of Health Policy and Administration. The public may attend.

For more information, contact **Lee Carpenter** at (814) 865-9561.

Lecture focus is "Restoring Dignity"

Franciscan Brother **Bob Artman** will present a free lecture, "Restoring Dignity," at 7:30 p.m. Thursday, Nov. 21, in the Reed Union Building Lecture Hall at Penn State Erie, The Behrend College.

Artman has spent the last 16 years working with the homeless in Boston, New York and now Baltimore. He is coordinator of Our Daily Bread, a soup kitchen which has served more than 2 million meals. During his ministry, he has spent time working in the

former Yugoslavia as well as at this order's generalate in the Office for Justice and Peace.

Students at Penn State Behrend met Artman last spring when they traveled to Baltimore to work at Our Daily Bread as part of an Alternative Spring Break program. They have since formed an organization, Reality Check, supporting volunteerism.

For more information, contact the Penn State Behrend Office of Student Activities at (814) 898-6171.

Preservation of Civil War battlefields discussed Dec. 4

Gary W. Gallagher, professor of American history and former head of the history department at Penn State, will give the third Penn State Forum lecture at noon Wednesday, Dec. 4, at the Nittany Lion Inn on the University Park Campus.

The author or editor of 13 books in the field of Civil War history, he served as president of the Association for the Preservation of Civil War Sites, a non-profit organization with more than 11,000 members across the U.S., from 1987 to 1995.

His talk, "Civil War Battlefield Preservation: Should Americans Care?" will address the increasing confrontations between developers and preservationists, such as two that have erupted at Manassas, Va., (one involving Disney) and others centered around Brandy Station, Va., and sites in other states.

"My own view," Gallagher said, "is that we cannot understand the modern United States and its sectional and racial tensions without an understanding of the Civil War. Civil War sites are exceptional teaching tools, and we should preserve them as vehicles through which Americans can learn about the great issues of the mid-19th century that continue to reverberate in our current society."

Opponents of preservation argue that the National Park Service already protects enough Civil War sites; Civil War battlefields do little more than cel-

Gary W. Gallagher

brate war; the vast bloodletting and the institution of slavery are best forgotten; and Civil War sites tend to glorify the Confederacy and the slave-based system it represented. They also contend that preservationists want every inch of soil the war touched.

Preservationists, on the other hand, range from those who would protect every acre of every site to those who

look for a balance between protection and development. But nearly all insist that it is important to save Civil War sites to honor those who fought and died, and that without them our ability to understand the American past is diminished.

Gallagher is editor of *The Fredericksburg Campaign: Decision on the Rappahannock*; of the series, "Civil War America"; and of *Third Day at Gettysburg and Beyond*. He is author of *Stephen Dodson Ramseur: Lee's Gallant General*, among other works. Gallagher received a bachelor's degree from Adams State College in Colorado, and a master's and a doctorate from the University of Texas at Austin.

His talk is sponsored by the Penn State Bookstore and presented by the Penn State Faculty Staff Club. Lunch begins at 11:30 a.m. and the lecture with question-and-answer period begins at 12:10 p.m. Tickets are \$10 or at the Faculty Staff Club office at 110 HUB. For more information, call (814) 865-7590.

Dec. 3 lunch talk examines health care

"Trends in Health Care," the final noon talk in the 1996 Downtown Harrisburg Lecture Series, will be presented by **C.M. Gallagher**, director of regulatory affairs at Pennsylvania Blue Shield, on Dec. 3 at the Eastgate Center.

The talk will focus on the significant structural changes occurring in the marketing and financing of health care; the merging of hospitals; managed care trends; and legislative impacts on the market.

Gallagher, spokesperson and liaison

for Blue Shield in its dealings with various regulatory agencies, is responsible for new product, network and rate filings to the Pennsylvania Department of Health and Insurance. She also serves on a national advisory committee on insurance market issues with Blue Cross and Blue Shield Association.

She earned a bachelor of arts degree from Carnegie-Mellon University and an MBA from Penn State Harrisburg. To register for this free lecture, contact the center at (717) 772-3590.

Lecture, piano recital set for Nov. 22

Svetlana Brandt, graduate student of Penn State music professor **Marylene Dosse**, is giving a lecture and piano recital on the music of Russian composer Alexander Scriabin (1872-1915),

at 8 p.m. Friday, Nov. 22, in the College of Arts and Architecture School of Music Recital Hall on the University Park Campus. The lecture and recital are free to the public.

"Sharing the Dream; Living the Reality"

Jan. 20 dramatic presentation will commemorate Martin Luther King Jr. Day

Rehearsals have begun for "Sharing the Dream; Living the Reality," a dramatic presentation written and directed by Charles Dumas, associate professor of theatre arts, to commemorate University Park's 1997 Martin Luther King Jr. Day. It will be performed at 7:30 p.m. Monday, Jan. 20, in Eisenhower Auditorium. There is no admission fee.

The 45-minute drama chronicles how immigrants throughout history have come to Pennsylvania to fulfill their dreams of opportunity, freedom, democracy and nationhood.

"It focuses on the King dream of freedom and justice, and is set in the overall panorama of the American Dream, from the Native Americans through the founding of the Commonwealth by William Penn to its newest citizens," Dumas said.

The production features actors from the University Resident Theatre Company and Dumas' diversity theatre workshop, the Essence of Joy choir and the Community Children's choir, under the direction of music instructor Anthony Leach, and Native American dancers, step dancers and dancers from NOMMO Performing Arts Company.

"Throughout this year's activities, we will emphasize developing community and sharing Dr. King's dreams for intercultural understanding and civility on campus and in the community," James Stewart, vice provost for educational equity and chair of the 1997 Martin Luther King Jr. commemoration planning committee, said. "We also encourage faculty, staff and students to attend the volunteer fairs on campus or at the junior high school in January and commit themselves to community service in the spirit of Dr. King."

Earlier this month, Scott Kretchmar, chair of the University Faculty Senate, sent a letter to faculty who are teaching diversity-focused and related subjects next semester to encourage them to participate in and incorporate Martin Luther King Jr. programs in courses and out-of-class activities. For a list of readings for class discussions in conjunction with the play, contact the Office for Educational Equity at (814) 865-5906.

In a few days, posters, buttons and fliers designed by fifth-year senior graphic design major Amanda Barille will be in evidence across campus and in town announcing King activities. Buttons also are being sent to Commonwealth Campuses to promote King celebrations across the state.

In addition to the "Sharing the

Rehearsal

Charles Dumas, associate professor of theatre and author/director of "Sharing the Dream: Living the Reality," gives some pointers to Carla Hargrove, second from left, Madeline Gomez and Joyce Brew. The group was rehearsing the final scene of the play recently.

Photo: Greg Grieco

MLK commemoration planning committee members

Members of the 1997 Martin Luther King Jr. commemoration planning committee are:

James B. Stewart, chair, vice provost for educational equity; **Lydia Abdullah**, senior budget planning specialist; **Lea Asbell-Swanger**, events director, Eisenhower Auditorium; **Deborah Atwater**, head, Department of African/African American Studies; **Nikitra Bailey**, president, Black Caucus; **Rubin Bernejo**, president, Latino Caucus; **Patricia Best**, assistant superintendent, curriculum development, planning and research for the State College Area School District; **Julie Ann Bubolz**, president, Graduate Student Association; **Kenneth I. Clarke**, acting director, Center for Ethics and Religious Affairs; **Judith Curley**, executive director, Volunteer Center of Centre County; **Soumyalatha Dayananda**, undergraduate student government representative; **Charles Dumas**, associate professor of theatre arts;

James Elliott, director, human resources; **Melissa Marie Frank-Alston**, program director, volunteer services; **R. Scott Kretchmar**, chair, University Faculty Senate; **Anthony Leach**, assistant professor, School of Music; **Dorothy Lemeh**, administrative assistant, School of Visual Arts; **Robert Leonard**, professor of theatre arts; **William Gary Perdue**, senior producer/director, WPSX-TV; **Thomas G. Poole**, acting deputy vice provost, educational equity; **Christy Rameau**, news bureau manager, public information; **Karen Rugh**, director, university relations; **Arun Unni**, president, Asian American Student Coalition; **Lisa Wandel**, associate director, food services; **Susan Welch**, dean, College of the Liberal Arts; **William Welch**, mayor, State College; **Larry W. Young Jr.**, director, Paul Robeson Cultural Center; and **Eileen M. Williams**, staff support, Office of the Vice Provost for Educational Equity.

Dream; Living the Reality" production on Jan. 20, the following activities are scheduled at University Park:

■ **Wednesday, Jan. 15:** A commemorative bell ringing ceremony at noon in the lobby of Old Main.

■ **Friday, Jan. 17:** The Forum on Black Affairs Martin Luther King Jr. dinner will honor members of the community who embody King's principles—persistence, selflessness, love, risk, conviction, collaboration and faith. Ticket sales begin Dec. 2.

■ **Wednesday, Jan. 22:** Community Volunteer Fair from 6 to 8 p.m. at the

State College Junior High School, sponsored by the Volunteer Center of Centre County.

■ **Thursday, Jan. 30:** Student Volunteer Fair from 11 a.m. to 3 p.m. in the HUB Ballroom, where students can meet representatives of local human service agencies and organizations.

■ **Friday, Jan. 31:** Student Involvement Fair from noon to 6 p.m. in the HUB Ballroom. About 145 Penn State student organizations are expected to participate.

For more information, contact Stewart at (814) 865-5906.

Tickets

Tickets for the Forum on Black Affairs' Martin Luther King Jr. dinner to be held Jan. 17 will go on sale and can be picked up at the Paul Robeson Cultural Center on Dec. 2. Tickets for adults are \$20; for children age 12 and under, \$10. The price for a table of 10 people is \$210.

The dinner will be held in The Penn State Scanticon Presidents Hall. Guests will be seated beginning at 6:30 p.m. and dinner will be served at 7 p.m. If you have questions about tickets or would like to reserve a table, please call (814) 865-1779.

The ARTS

AT PENN STATE

Practice makes perfect

Hans Peter Nollert, left, and Niki Peterman perfect their technique under the direction of dance instructor KT Huckabee Milburn. The two dancers rehearsed recently for the newly choreographed piece "Simply Elemental," which will be performed Jan. 16-17.

Photo: Andrea Hurley

Display at Berks

A "New Acquisitions Display" will be on exhibit through Wednesday, Dec. 11, in the Freyberger Gallery on the Penn State Berks campus. Many of the works to be displayed were gifts to the campus from **Ruth Freyberger**, who established an endowment for the arts and art education for the campus in 1990. In addition to the "New Acquisitions Display," the gallery will feature a section on student photography.

Dance concert

The Penn State Dance Program will present "Choreographer's Showcase — Fall '96," on Thursday, Nov. 21, and Friday, Nov. 22, at 8 p.m., and Sunday, Nov. 24, at 2:30 p.m. The concert will be held in 132-133 White Building on the University Park Campus, and will feature Orchestral Dance Company, a student performing organization under the direction of **Patricia Heigel-Tanner**, assistant professor in the Department of Kinesiology.

The concert also will feature choreography by faculty member **KT Huckabee Milburn**, instructor in the Department of Kinesiology, as well as student choreographed works.

Tickets are \$5 for students and \$6 for the general public, and can be purchased at the door. For more information contact Heigel-Tanner at (814) 865-2720, or Kimberly Smith at (814) 867-3225. The Dance Program is housed in the College of Health and Human Development.

Bandorama '96

Bandorama '96 will take place in Eisenhower Auditorium at 8 p.m. Friday, Nov. 22. The entire marching Blue Band, with the Blue Band silks, Touch of Blue, feature twirler **Christine Wolfe** and Drum Major **Derrick Ometz**, will appear on stage.

The Symphonic Band will play a short concert of light selections. Following this, the Blue Band recreates its Beaver Stadium pregame entrance using the aisles and stage of Eisenhower Auditorium.

Reserved seat tickets are on sale now at Eisenhower Auditorium Box Office, or by calling (814) 863-0255. Adult tickets are \$11, students \$7, children \$5. Group rates are available.

Piano recital on Nov. 23

Pianist **Albert Frantz**, a student of Steven Smith, professor of music, will present a free recital at 8 p.m. Saturday, Nov. 23, in the College of Arts and Architecture School of Music Recital Hall on the University Park Campus.

Essence of Joy

Essence of Joy will present its annual fall concert at 6 p.m. Sunday, Nov. 24, in the School of Music Recital Hall on the University Park Campus.

The theme of the concert is "My Soul Doth Magnify The Lord." Settings of this text and related compositions by African American composers will be featured. **Anthony T. Leach**, assistant professor of music and music education, is the director.

Student tickets are \$2; non-student tickets are \$4. Tickets may be purchased at the door.

Singing Lions Christmas show

The Singing Lions, Penn State's traveling show choir, will present their Fall/Christmas Show on Sunday, Nov. 24, at 2 p.m. in the School of Music Recital Hall on the University Park Campus.

The ensemble consists of 10 singers supported by a three-piece combo and technical crew.

Tickets will be available at the Recital Hall box office before the show. Prices are \$4, general admission; \$3 students and senior citizens.

Colonial-style music at DuBois

Return to a simpler time through an evening of holiday carols and traditional favorites played Colonial-style by historical musician **Dean Shostak**. Shostak will appear in concert at 7:30 p.m. Monday, Nov. 25, in the Hillier Auditorium as part of the Penn State DuBois Campus Cultural and Performing Arts Series. Shostak's performance is free.

Shostak, a musician with Colonial Williamsburg since 1979 and a nationally recognized pioneer in American music, plays violin, hurdy-gurdy and Benjamin Franklin's glass armonica (he is one of only six glass armonists in the world today) to combine history and humor with period and original pieces.

Trumpet recital

Russ Perlman, a student of **John Daniel**, assistant professor of music, will present a free trumpet recital at 8 p.m. Tuesday, Nov. 26, in the School of Music Recital Hall on the University Park Campus. Perlman is a senior majoring in music performance.

Student sculpture exhibit

A sculpture exhibition featuring student artworks will be on display through Tuesday, Dec. 3, outside of the Visual Arts Building and Arts Building on the University Park Campus. The works to be exhibited are by both beginning and intermediate students in the School of Visual Arts.

Bach's Lunch

The Penn State Trombone Choir, directed by **Mark Lusk**, associate professor of music, will perform holiday music selections at the free Bach's Lunch concert at 12:10 p.m. Thursday, Dec. 5, in the Helen Eakin Eisenhower Chapel on the University Park Campus.

The 20-minute concert is part of the Bach's Lunch series sponsored by the College of Arts and Architecture and the University Lutheran Parish. The Trombone Choir consists of 25 undergraduate and graduate music majors.

Audience members may take a bag lunch to eat after the concert in the Roy and Agnes Wilkinson Lounge. Coffee and tea will be provided.

Art Alley designs

The HUB's Art Alley panels on the University Park Campus feature a collection of designs from Spain by internationally acclaimed artist **Perry Oliver**, through Dec. 8.

Oliver, born in Pennsylvania in 1941, eventually established his residence in Malaga, Spain. A professional architect, he taught himself printmaking and for almost 25 years his work has been exhibited throughout the world. His work can also be seen in editorial projects and commercial ventures, such as the book covers for *Theater of the Mind* by Joyce McDougal, and *Out of the Blue* by David Cohen.

Art Alley Panels are on the first floor of the Hetzel Union Building.

Jewelry and figurines on display at Kern

The Kern Graduate Building art cases feature two collections, handcast figurines by **Janice Gainer** and Southwestern jewelry by **Denise Arieu** through Dec. 8.

Gainer's figurinal art collection features unique chocolateware figurines handcast from antique moulds and tole painted. Her work is in the Smithsonian's permanent collection.

Arieu's original jewelry designs feature Southwestern motifs. Her collection is exhibited in this annual event. The Kern Exhibition Area is on the first floor in the Kern Graduate Building.

Wood artist shows work

The HUB's Art Alley on the University Park Campus features the art of **Andrew Hottenstein** through Dec. 8. The artist combines wood carving, wood burning and painting to create his work. Hottenstein, a native of State College, has been working with this medium for 10 years.

The HUB's Art Alley is on the first floor of the Hetzel Union Building.

Pennsylvania Dance Theatre

The Pennsylvania Dance Theatre will present "Beyond Bounds," a season premiere event at 8 p.m. Saturday, Jan. 23, in Eisenhower Auditorium on the University Park Campus. The event will feature new commissions by choreographers **David Dorfman** and **Colin Connor**. Tickets, available at the Schwab Auditorium Box Office or the Eisenhower box office, are \$15 for the general public and \$10 for students with I.D. A \$1 discount will be given for tickets purchased in advance of the show. For more information, call (814) 863-0255.

UNIVERSITY PARK CALENDAR

SPECIAL EVENTS

Friday, November 22

■ Palmer Museum of Art, 3 p.m., Christoffers Lobby. Gallery Talk, Catherine Cilenti on "Ancient to Renaissance Art at the Palmer Museum."

Graduate Student Association, 6:30 and 8:30 p.m., 112 Kern. Film, "Girl Six," through Nov. 23.

■ Graduate Student Association, 7 and 9 p.m., 101 Chambers. Film, "L'America," through Nov. 23.

School of Music, 8 p.m., Eisenhower Auditorium. "Bandorama '96" with O. Richard Bundy and Dennis Glocke, conductors. For tickets, call (814) 863-0255.

Health and Human Development, 8 p.m., 132-133 White Building. Penn State Dance Program presents "Choreographer's Showcase-Fall '96." For tickets, call (814) 867-865-2720 or (814) 867-3225.

Saturday, November 23

Friends of the Palmer Museum, 10 a.m. to 4:30 p.m., Palmer Museum. Ornament exhibition and sale, through Nov. 24.

School of Music, 8 p.m., Recital Hall. Piano recital by Albert Frantz.

Sunday, November 24

School of Music, 2 p.m., Recital Hall. "Singing Lions," Peter Kiefer, director. For tickets, call (814) 865-0431.

School of Music, 6 p.m., Recital Hall. "Essence of Joy," Anthony Leach, conductor. For tickets, call (814) 865-0431.

Tuesday, November 26

School of Music, 8 p.m., Recital Hall. Trumpet recital by Russ Perleman.

Sunday, December 1

Odyssey Through Literature, 6:30 p.m., WPSU-91.5 FM. Michael Anesko on "Badly Assorted Twins."

Monday, December 2

School of Music, 8 p.m., Recital Hall. "Penn State Philharmonic Students' Competition."

Tuesday, December 3

Kenny Rogers, 7:30 p.m., The Bryce Jordan Center. For tickets, call (814) 865-5555.

Wednesday, December 4

Stone Temple Pilots, 7:30 p.m., The Bryce Jordan Center. For tickets, call (814) 865-5555.

School of Music, 8 p.m., Recital Hall. "Jazz II and III."

Thursday, December 5

School of Music, 12:10 p.m., Eisenhower Chapel. Bach's Lunch Concert presents "The Penn State Trombone Choir (Christmas Music)."

Palmer Museum of Art, 2 p.m., Christoffers Lobby. Gallery Talk presents Glenn Williamson, curator, on "Contemporary Art from the Pincus Collection."

School of Music, 8 p.m., Recital Hall. "Student Composers' Concert."

Friday, December 6

Palmer Museum of Art, 2 p.m., Christoffers Lobby. Gallery Talk presents Jennifer Streib on "Highlights of the Palmer Museum."

School of Music, 7:30 p.m., Recital Hall, 110 Music Building I, 122 Music Building II and 128 Music Building II. "Winterfest Progressive Concert." For tickets, call (814) 865-0431.

On the schedule

The Pennsylvania Dance Theatre will present "Beyond Bounds," a season premiere event at 8 p.m. Saturday, Jan. 23, in Eisenhower Auditorium on the University Park Campus. For more information, call (814) 863-0255.

Photo: Linda Smith-Webster

Center for the Performing Arts, 8 p.m., Eisenhower Auditorium. University Resident Theatre Company presents "A Christmas Carol," through Dec. 7. For tickets, call (814) 863-0255.

SEMINARS

Friday, November 22

Faculty Staff Club, 11:30 a.m., The Nittany Lion Inn. John J. Curley on "The Role of the Press in the New Media Explosion." For tickets, call (814) 865-7590.

■ Economics, 3:30 p.m., 420 Kern. Giovanni Magli on "The Value of Trade Agreements in the Presence of Political Pressures."

Social Thought Program, 3:30 p.m., 406 Oswald Tower. Michael Lipscomb on "The Theory of Communicative Action and the Aesthetic Moment."

Geography, 4 p.m., 206 Walker. Gordon DeJong on "Motives for Migration: New Perspectives."

Monday, November 25

Economics, 10:30 a.m., 420 Kern. Derek Laing and Dan Henry on "Markets and Firms."

■ Comparative Literature, 12:15 p.m., 101 Kern. Philip Jenkins on "Fascist Writings Among Italians in Pennsylvania."

Agricultural and Biological Engineering, 12:20 p.m., 239 Agricultural Engineering. Sajid Alavi on "A Coupled Finite Element

and Dynamic Microbial Growth Model for Listeria Monocytogenes" and Neylor Calasans on "Effects of Incorporated Crop Residues on Evaporation and Soil-Water Movement."

Gravity Center, 2 p.m., 339 Davey Lab. Stephen Winters Hill on "Minisuperspace Quantization of a Spherically Symmetric Geometry with a Shell of Dust."

Physics, 3:30 p.m., 339 Davey Lab. Jeremy Baumberg on "Coherent Control of Electronic Processes in Nanocrystals."

Tuesday, November 26

Biology, 4 p.m., 8 Mueller Lab. Ralph Quatano on "Interaction Between the Cytoskeleton and Cell Wall in Establishing Polarity and the Plane of Cell Division."

Electrical Engineering, 7 p.m., Kunkle Lounge. Hammond Building, Jamie De La Hee Lopez on "Liability, Design and Education."

Monday, December 2

Comparative Literature, 12:15 p.m., 101 Kern. Jeffrey Walker on "What is, or was, Rhetorical Criticism? The View from Hecateus."

Continuing and Distance Education, 1:30-3:30 p.m., Studio D. Mitchell, Margaret Koble and Ellen Bunker on "Trends in Distance Education Research."

Institute for Policy Research and Evaluation, Center for Health Policy Research and Health Policy and Administration, 3 p.m.,

The Living Center, Henderson, Lawton R. Burns on "The Impact of Managed Care on Integrated Delivery Systems."

Tuesday, December 3

Biology, 4 p.m., 8 Mueller Lab. David J. Begun on "Origin and Evolution of a New Gene in *Drosophila*."

Geosciences, 4 p.m., 112 Walker. Roberta Rudnick on "Composition of Continental Crust: The View from Downunder."

Nutrition, 4 p.m., 110 Wartik Lab. Gordon Jensen on "The Geriatric Nutrition Research Alliance—Update and Future Directions."

4:30 p.m., 108 Boucke. Patricia Levin on "The Impact of Tourism on the Amish in Lancaster County" (with slides).

Wednesday, December 4

Gerontology Center, noon-1 p.m., 101 Health and Human Development East. Alan Booth on "Familial Influences on Young Adult Lives."

Thursday, December 5

Physics, 3:30 p.m., 101 Osmond Lab. Gordon Baym on "Recent Developments in Bose-Einstein Condensation."

■ Ecology, 3:45 p.m., 108 Boucke. Elisabeth Hale on "Feeding Behavior in Rock-dwelling Lake Malawi Cichlids."

Friday, December 6

Geography, 4 p.m., 206 Walker. "People's Coffee Hour."

CONFERENCES

Friday, December 6

The Penn State Scinticon, through Dec. 7. From "Disrupter to Achiever."

EXHIBITS

Outside Arts Building

Sculpture exhibition, through Dec. 3.

The HUB Art Alley

■ Collection of designs by Perry Oliver, through Dec. 8.

Wood art by Andrew Hottenstein, through Dec. 8.

The HUB Browning Gallery

Paintings by George Diaz, watercolors by Sofia Austin, paintings by Ramon Borges, paintings by Miriam Urquidí and photography by Willy Zayas. All are on through Dec. 8.

The HUB Formal Gallery

Photography by Ed Leos, through Dec. 7. Kern Exhibition Area.

The College of Arts and Architecture's Faculty Research and Creative Accomplishment Exhibition, through Nov. 30.

Jewelry by Denise Aries and figurines by Janice Garner, through Dec. 8.

Palmer Museum

■ "Cooking for the Gods: The Art of Home Ritual in Bengal," through Dec. 8.

"When Coal Was King: Paintings from the Steidl Collection, College of Earth and Mineral Sciences," through Dec. 8.

"Abstraction to Figurism: Selections of Contemporary Art from the Pincus Collection," through Dec. 15.

"The Wood Engravings of Warren Mack," through Jan. 5.

Zeller Gallery

"School of Visual Arts Faculty Exhibition," through Dec. 13.

■ Reflects an international perspective.

News in Brief

Tickets for talk available

Tickets for the second lecture in the Penn State Forum series to be given Nov. 22 by **John Curley**, founding editor of *USA Today* and CEO of Cunniff Co., Inc., are \$10. They are available in the Faculty Staff Club office at 110 HUB. For more information about the event, scheduled to begin at 11:30 a.m. at the Nittany Lion Inn, call (814) 865-7590.

People with bulimia nervosa sought

A study is currently being conducted to explore the personality characteristics of individuals with bulimia nervosa. You may be experiencing bulimia nervosa if you:

1. Are bothered by recurrent episodes of binge eating in which you feel you have little or no control over the amount of food you consume;
2. Are bothered by recurrent behavior to prevent weight gain from the binges (e.g., vomiting, misuse of laxatives, fasting, etc.).

Subjects (age 18 or older) will be asked to fill out questionnaires and take part in a brief interview. Those who participate will be paid \$10 and will be provided with referrals for the treatment of bulimia nervosa. A telephone screening will help determine whether the study is suitable for subjects. Strictest confidentiality will be maintained.

Anyone who would like to be considered for the study should call **Michele Kasoff** at (814) 863-4833. The principal investigator on this project is **Louis Castonguay**, assistant professor of psychology.

World AIDS Day

A number of events to highlight World AIDS Day and AIDS Awareness Week are planned for the University Park Campus.

■ Nov. 25-Dec 4: Two 12-foot-by-12-foot panels from NAMES quilt of San Francisco will be on display in the HUB Galleries.

■ Nov. 25-Jan. 3: A new NAMES panel being presented by Penn State University Health Services students and staff will be on display in the lobby of Ritenour Building.

■ Sunday, Dec. 1: Day Without Art — Palmer Museum and various locations around campus;

5:30 p.m. — Candlelight vigil meets at the corner of College Avenue and Allen Street at the entrance to campus; and

■ Monday, Dec. 9: AIDS information table in the ground floor of the HUB.

For a full listing of all related events, log-in to the Web site at <http://www.vicon.net/~vbrandt/tot/home.html>.

Craft sale

The members of the Hetzel Union Center for Arts and Crafts are holding their annual Holiday Craft Sale, Dec. 4, 5 and 6, from 10 a.m. to 5 p.m. in the HUB Fishbowl. Members will be selling their original arts and crafts which include pottery, jewelry, holiday ornaments and more. Contact the Arts Center if you have questions at (814) 863-0661.

Overweight females needed

Overweight female volunteers are needed to participate in a study at the Laboratory for the Study of Human Ingestive Behavior in Henderson Building. The study involves eating meals (breakfast, lunch, dinner) in the laboratory Monday through Thursday of every other week between Jan. 20 and March 21, 1997. Each test meal consists of a variety of commercially available foods. No experimental or test foods will be used. This study is not designed to affect weight gain or loss. Volunteers must be 18-45 years old, able to eat a wide variety of foods, non-smoking, non-drugging and not pregnant or lactating. If interested please call (814) 863-8482 and ask for the study coordinator. Participants in this study will earn up to \$300.

The principal investigator on this project is **B.J. Rolls**.

'Thon fund raising begins

Amanda Ersels, center, leads the crowd through the 'Thon '96 line dance. Amanda was one of more than 150 Four Diamonds Family members to attend the first annual 'Thon Family Reunion Carnival, held Nov. 10 in White Building on the University Park Campus. The carnival, which featured jugglers, gorillas, grapes, popcorn, ice cream, music and dancing, was the kick-off event for this year's Dance Marathon fund-raising campaign. The event will be held Feb. 14-16, 1997.

Photo: Andrea Hurley

Nominations sought for faculty and staff achievement awards

Nominations for the 1997 Faculty and Staff Achievement Awards are being sought from University and local community organizations and individuals. Nominators should contact the Office of Human Resources at (814) 863-6188 to request a copy of a standardized format for submitting nominations. Nominations should be sent to **Billie S. Willis**, Box 6, Rider Building, no later than Friday, Jan. 10. Supporting information which accompanies nominations should be as brief as possible.

The awards include:

■ The McKay Donkin Award, established in 1969 in honor of the late McKay Donkin who served as vice president for finance and treasurer of the University from 1957 to 1968, consists of a \$500 stipend. The award is presented to the full-time faculty or staff, or retiree who has contributed most to the "economic, physical, mental or social welfare of the faculty" of the University. The contributions of the nominee should be for duties or services which are above and beyond his or her regularly assigned duties.

■ The Administrative Excellence Award carries a stipend of \$500 and is made to a member of the staff whose performance, methods and achievements exemplify administrative excellence. Criteria considered in the evaluation of nominees include total experience in an administrative position, levels of responsibility and authority, years of service at the University and in present position, and impact on own organization and on the University in general.

■ The Staff Excellence Award, established in 1993, carries a stipend of \$500. The award is made annually to a member of the staff of the University who has demonstrated and practiced the philosophy of continuous quality improvement, team spirit and managerial excellence. In addition, the person should have provided leadership in establishing a quality service orientation in the performance of

assigned duties. To be eligible for the award, full-time staff must have at least five years of University service.

■ The Support Staff Award is new for 1997 and carries a stipend of \$500. This award recognizes the overall high-quality performance of a member of the support staff in fulfilling the mission of the University and of his/her college or administrative unit. The award will be given to a full-time member of the support staff in recognition of dedicated focus to customer service, commitment to quality improvement, outstanding skills and abilities, teamwork and professionalism.

To be eligible for this award, a staff member must have at least five years of active University service.

■ The Equal Opportunity Award is designed to recognize a University faculty or staff member who promotes the concept of equal opportunity through affirmative action and/or contributes to enhancing the educational environment of the University through improving cross-cultural understanding. To be eligible for this award, full-time faculty and staff must have at least two years of active University service.

The award, consisting of a \$1,500 stipend, is given in recognition of meeting one or more of the following criteria: demonstrated commitment to the spirit of equal opportunity through affirmative action; demonstrated leadership in the elimination of discrimination through encouragement of understanding between people of different races, sexes, age groups, sexual orientation, ethnicity or religious heritage; demonstrated commitment to meeting the special needs of students, faculty or staff who are members of traditionally underrepresented groups.

Willis, assistant vice president for Human Resources, is chairing a general committee to solicit nominations for the 1997 Awards. Five subcommittees will screen nominations and develop recommendations for the respective awards. Early submission of nomination forms is encouraged.

Faculty/Staff Alerts

"Glad You Asked." No kidding

Need a question answered? Don't forget about the *Intercom's* new column, "Glad You Asked," that will deal with the first issue of the new year, "Glad You Asked," which is soliciting questions now from the University community, is part of an ongoing initiative to increase and improve communication at Penn State. Questions will be directed to and answered by sources in the areas that encompass those particular responsibilities. To ask a question, simply send an e-mail message to ask@psu.edu in care of the "Glad You Asked." Anyone submitting a question should provide their name and phone number so that *Intercom* can verify the source of the question. For publication purposes, *Intercom* will use the initials of the individual sending the question and their campus location or department, depending on the nature of the question. Requests for anonymity will be honored.

Holiday mail service

Mail service to the University community will be suspended from 5 p.m. Friday, Dec. 20, until 8 a.m. Thursday, Jan. 2, 1997.

Only buildings that currently receive direct delivery from the U.S. Postal Service will be eligible to receive mail during this time. To find out if your building is eligible to receive incoming U.S. mail, please call Paul Felzer at (814) 865-9171 or Gregg J. Ascuitto at (814) 863-8153 before Dec. 9, or check with the facilities coordinator for your academic/administrative area. Arrangements will be made with the U.S. Postal Service for eligible buildings to receive mail if so desired. Buildings that do not receive direct delivery will receive mail after the University resumes operation on Jan. 2.

Interoffice envelopes

Mail Services requests that all excess interoffice envelopes be returned to 108 Business Services Building in order to facilitate equal distribution to all departments. Also, please return any mail tubs that are being used for office storage. A critical shortage has occurred with these items and your help is needed to keep these items in circulation and to avert unnecessary expense.

Stone Valley mail

Stone Valley interoffice mail should be addressed to: Stone Valley, 108 Business Svs.

UPS packages

To ensure same-day processing of UPS (United Parcel Service) packages, they must be in Mail Services by 3:30 p.m.

Intercom online readership survey

In an effort to gauge how many readers are viewing *Intercom* through its Web site and as part a process to evaluate the content, design and readership of the *Intercom*, the Department of Public Information is conducting an online survey in which readers are asked to answer a short series of questions. The survey can be found at URL: <http://www.ur.psu.edu/intercom/survey/consent.html>.

The information you provide will be kept confidential and will be helpful in guiding the *Intercom* staff in its work. So far, around 110 individuals, some from as far away as the United Kingdom, have taken part in the survey.

HRDC courses

The following courses are being offered by the Human Resource Development Center. To register for free courses, please call (814) 865-8216. Registration for fee-based courses requires a completed registration form on page 67 of the HRDC course catalog. For a full description of the courses, log-in to the Web site at <http://www.ohr.psu.edu/> and click on the button for HRDC.

■ Redefining Responsibilities in an Electronic Office

Meets from 1:15 to 4:30 p.m. Monday, Dec. 2, in 319 Rider Building. Cost: \$35.

■ Quality Service Self-Assessment and Action Plan

Meets from 9 a.m. to 4 p.m. Wednesday, Dec. 11, in 319 Rider Building. Cost: \$55.

Library hours for Thanksgiving

In observance of the Thanksgiving holiday, Pattee Library and the Architecture, Earth and Mineral Sciences, Education, Engineering, Mathematics and Physical Sciences libraries on the University Park Campus will close at 5 p.m. Wednesday, Nov. 27, and remain closed on Thursday, Nov. 28. On Friday, Nov. 29, and Saturday, Nov. 30, the libraries will be open from 8 a.m. to 5 p.m. The regular schedule for library hours will resume on Sunday, Dec. 1.

In addition, the Music Listening Room in Pattee Library will be closed on Friday, Nov. 29, and Saturday, Nov. 30. Pollock Library will close at 5 p.m. Wednesday, Nov. 27, and remain closed through Saturday, Nov. 30. It will resume 24-hour service at noon on Sunday, Dec. 1.

For more information, call (814) 865-3063, type HELP HOURS when using the Library Information Access System (LIAS), or visit the Libraries' home page at <http://www.libraries.psu.edu>.

Is your address correct?

Time is quickly approaching. To ensure there are no problems in receiving your W-2 in a timely fashion, the Payroll Office would like to remind you to make sure you have the correct address on file.

If your payroll check is direct deposited, your W-2 will be mailed to the office address shown on your deposit slip. If your payroll check is not deposited, the W-2 will be mailed to the address shown on the payroll check. If you need to make a change, please submit a new W-4 card as soon as possible.

Machine shop services available

The College of Engineering Machine Shop at University Park has added two new machines to its facility, both of which can be used by anyone in the University community. The wire EDM (electrical discharge machine) and rapid prototype machine are the newest additions to the shop's existing state-of-the-art equipment.

The wire EDM is similar to a jig saw in the way it cuts entirely through an object, but instead of using a blade, it uses a computerized numerical controller to guide an electrode wire through the object. This machine is popular because it can accurately cut all types of materials, is relatively easy to operate, and greatly reduces time and manufacturing costs.

The rapid prototype machine uses a technology known as laminated object manufacturing (LOM) to create prototypes from three-dimensional CAD specifications. Controlled by the computer image, the rapid prototype machine cuts thin sheets of paper and laminates them to produce a three-dimensional prototype which feels like wood. The LOM process may take up to 24 hours, depending on the complexity of the piece—a process which took up to several days using older technology.

Services provided by the College of Engineering Machine Shop are primarily intended to support the research activities of the College of Engineering. For the University community, all shop services such as projects involving the wire EDM or rapid prototype machine are available at the cost of \$25.34 per hour.

Anyone interested in using any services provided by the College of Engineering Machine Shop, contact George Field to discuss your needs. He can be reached by phone at (814) 865-4963, or by e-mail at george@engr.psu.edu. Additional information is also available on the Web at www.engr.psu.edu/esf/.

Nominations sought for Palmer mentoring award

Nominations for the Howard B. Palmer Faculty Mentoring Award honors are being accepted until Jan. 17. The award recognizes outstanding achievement by a faculty member who effectively guides and nurtures the collegial and professional development of junior faculty. The award was named in honor of the former senior associate dean of the Graduate School (1985-1991).

A committee appointed by the dean of the Graduate School, with the assistance of the senior faculty mentor in the Office for Minority Faculty Development, will select the recipient who will receive \$1,000 and recognition at the Faculty/Staff Awards event on April 6. Nominations may be submitted by faculty, staff and administrators.

To be eligible for nomination, a faculty member must meet the following criteria:

- Be a full-time University faculty member with five or more years of active service; and

- Exhibit exemplary achievement in the effective mentoring of junior faculty members.

Evidence of these criteria should be presented through a completed nomination form and statement of support that clearly identifies the outstanding qualities of the nominee. The statement should not exceed two single-spaced pages; supporting materials may include a biographical sketch or curriculum vitae, no more than three letters of support and other information pertinent to the nomination. Three copies of the nomination packet should be submitted to Blannie E. Bowen, 308 Kern Graduate Building, University Park, Pa. 16802. Nomination forms are available from Tammy Snook at (814) 863-1663. For more information, contact Bowen at (814) 863-1663.

Faculty Senate sets Dec. 3 meeting agenda

The University Faculty Senate will meet on Dec. 3 at 1:30 p.m. in Room 112 of the Kern Graduate Building on the University Park Campus. Items to be addressed include:

- Curriculum report of Nov. 19;
- Special Committee on General Education forensic session;

- Resolution from the Senate Committee on Student Life (legislative);

- Revision of policy (HR-23) to reflect the reorganization of the Commonwealth Educational System (advisory/consultative);

- Reserved spaces program (informational);

- Report on promotion and tenure recommendations and decisions in 1995-96 (informational);

- Phased retirement program (informational);

- Annual report of academic eligibility and athletic scholarships for 1995-96 (informational);

- Report on completion rates in independent learning courses (informational); and

- Grade distribution report (informational).

Members of the University community may attend. Anyone who is not a member of the Senate may ask to speak on any item of business already before the Senate. Such a request must be made to the chair, through the executive secretary of the Senate, at least four calendar days before the meeting.

Campaign enlists aid of four honorary chairs

Four honorary chairs have been named for the University's forthcoming capital campaign. They are **Robert E. Eberly**, Pennsylvania business leader; **Joseph Paterno**, head football coach; **William A. Schreyer**, chairman emeritus of Merrill Lynch & Co. and Penn State trustee; and **Frank P. Smeal**, retired Goldman, Sachs & Co. financial executive. All played key roles in The Campaign for Penn State, which raised \$352 million for academic programs between 1984 and 1990.

"Considered separately, each member of this group has contributed greatly to the betterment of Penn State with his leadership and philanthropy, not just in the last campaign, but in a variety of targeted fund-raising efforts before and since then," President **Graham B. Spanier** said. "Teamed together in support of what will be our most ambitious campaign to date, our honorary chairs will signal a strength of purpose regarding this venture to the public through both their vast expertise and loyalty to Penn State."

The campaign will aim to raise private funds for scholarships, graduate fellowships, faculty endowments and a variety of academic programs. The campaign's goal will be announced later, according to Spanier.

The honorary chairs will join campaign chair **Edward R. Hinz** in providing top volunteer leadership for the fund drive and soliciting major gifts.

Eberly is a 1939

Penn State chemistry graduate and chairman of the board of Eberly and Meade of Uniontown. He was treasurer of the previous Campaign for Penn State and treasurer of the National Development Council, Penn State's top fund-raising advisory body. He also has served as a member of the advisory board for the Penn State Fayette Campus near Uniontown since the board's founding in 1965.

After graduating from Penn State, Eberly worked as a chemist for the U.S. Navy and later became president of the Eberly Natural Gas Co. In 1969, he was named president and treasurer of the GNB Corp. and, in 1978, chairman of the boards of both GNB Corp. and Gallatin National Bank. He was named a Distinguished Alumnus of the University in 1972.

A \$10 million gift from the Eberly family during the last capital campaign endowed professorial chairs in every academic department of the College of Science, which was renamed the Eberly College of

Science to honor the family, and programs in biotechnology and a science endowment for the Fayette Campus. Other gifts from the family have supported the construction of the

William P. Hobby-Robert E. Eberly Telescope, built at the McDonald Observatory in Texas by Penn State and the University of Texas at Austin.

Paterno, Penn State's head football coach since 1966, has long been active in University philanthropic efforts, including service as a vice chairman of The Campaign for Penn State. He and his wife, **Suzanne**, met recently chaired the \$13.75 million Campaign for the Library, aimed at funding an addition to Pattee Library on the University Park Campus. In 1995, the University Board of Trustees announced that the addition will be named in the Paternos' honor.

One of the nation's winningest football coaches, Paterno has been a four-time choice of the American Football Coaches Association as Coach of the Year. Highlights of his tenure have been National Championships in 1982 and 1986, and a record 17 bowl game victories, including a win at the 1995 Rose Bowl.

A native of Brooklyn, N.Y., Paterno earned a bachelor's degree in English literature from Brown University before being selected as an assistant in the Penn State football program in 1950. He was named an honorary Penn State alumnus in 1973. He also has served on the National Development Council and the Libraries Development Advisory Board.

Schreyer, chairman of the previous Campaign for Penn State, grew up in Williamsport and earned his bachelor's degree in commerce and finance from Penn State in 1948. In his long career with Merrill Lynch & Co., he rose from executive trainee in the firm's Buffalo, N.Y., office to chairman and chief executive officer in 1985. He also has served as vice

chairman of the New York Stock Exchange and of the Securities Industries Association.

Schreyer was named a Distinguished Alumnus in 1979 and an Alumni Fellow of the Penn State Smeal College of Business Administration in 1983. He has chaired both the Penn State National Development Council and the Board of Trustees, of which he has been a member since 1986. As chair of The Campaign for Penn State, Schreyer headed a nationwide network of more than 1,000 volunteers whose aim was to make this one of America's finest public research universities.

During the campaign, Schreyer and his wife, **Joan**, endowed the William A. Schreyer Chair in Global Management Policies and Planning in the Smeal College. Notable gifts since then include a challenge grant designed to stimulate faculty/staff gifts to the Campaign for the Library and funding for the restoration and expansion of the Schreyer House, now used as the residence of University presidential families.

Smeal was born in rural Jefferson County and began his Penn State education at the DuBois Campus in 1939. Following his graduation with a degree in economics in 1942, he went on to earn an MBA from Harvard University and a law degree from New York University. He spent a 38-year career on Wall Street as an expert in the municipal bond market and remains a limited partner of the investment firm of Goldman, Sachs & Co.

He was named a Distinguished Alumnus in 1974 and an Alumni Fellow of the College of the Liberal Arts in 1986, and the DuBois Campus honored him as an outstanding alumnus in 1987. The Smeal College of Business Administration was named in honor of Frank and his wife, **Mary Jean**, also a 1942 University graduate, following their \$10 million gift to the college in 1989. It was this gift that put The Campaign for Penn State over the top of its \$300 million goal seven months before its scheduled end.

Other notable gifts by the Smeals include an endowed chair in literary theory and comparative criticism. They also kicked-off a fund drive for a new academic building at the DuBois Campus. In 1982, the couple endowed the **Katey Lehman Creative Writing Awards** in memory of Mrs. Smeal's sister, and in 1983, they endowed the **Henry W. Popp Graduate Assistantship in Botany and Plant Pathology** in honor of her father.

Schraer Mentor Award nominations deadline is Jan. 24

A selection committee to oversee the annual **Rosemary Schraer Mentor Award** has been established and the Commission for Women, sponsor of the award, is seeking nominations.

The award, created in memory of **Rosemary Schraer**, former associate provost for Penn State, honors a University employee who has excelled in helping others to recognize and achieve their potential professionally and personally. Schraer, who died in 1992, joined the University in 1959 as a faculty member in the Eberly College of Science and throughout her 26-year tenure, was

noted for her mentoring abilities. In 1985, she accepted a position as executive vice chancellor and then chancellor of the University of California, Riverside. The award recognizes individuals who have advised, facilitated, encouraged or paved the way for others. Consideration for the award will be given to any faculty or staff member who has a record of outstanding mentoring service going beyond the requirements of their employment. Nominations are due by Jan. 24, 1997 and should be returned to **Ellen Walker**, Commission for Women, 311 Grange Building,

University Park, Pa. 16802. Additional information and nomination forms are available by calling (814) 865-1683.

Members of the selection committee include: **Walker**, chair; **Ingrid Blood**, **Deborah Kleavans** and **Patricia Farrell**, all from University Park; and **Mila Su**, Penn State Altoona.

Contributions to help endow the award may be made payable to The Pennsylvania State University and sent to 1 Old Main, University Park, Pa. 16802, with an indication that contributions are to be credited to the Rosemary Schraer Fund.

Researchers find enzyme that may support life

BY BARBARA K. KENNEDY
Eberly College of Science

Researchers have discovered the function of an enzyme thought to control such life-sustaining processes as the clotting of blood, the secretion of cell products, and the safe disposal of dead cells.

"This research, plus additional work we have not yet published, indicates we may have found the first members of a previously unrecognized family of genes that code for these kinds of enzymes in all living cells," Robert A. Schlegel, professor of biochemistry and molecular biology, said.

Schlegel and his research team discovered that the enzyme's function is to control certain chemical reactions at the cell's surface. It moves one of the building blocks of the cell's double-layered protective membrane, a phospholipid molecule named phosphatidylserine (PS), from the outside to the inside layer of the membrane. When PS appears on the outside of the membrane, it serves as a foothold where other compounds can latch onto the cell, initiating reactions such as blood coagulation.

Schlegel and his colleagues determined that the enzyme, aminophospholipid translocase, pivots the cell membrane, flipping back to the inside any PS molecules that stray to the outside—unless they are needed for a particular reaction.

Robert A. Schlegel, professor of biochemistry and molecular biology, and his research team may have discovered the first members of a new family of genes.

Photo: Greg Gricio

"Researchers have found aminophospholipid translocase activity in every type of tissue where they have looked for it," Schlegel said. "It is of enormous importance in blood cells. We suggest it may have a common function in all cells—to trigger the recognition of dying cells that should be removed before their disintegration can do any damage—but that remains to be proven."

In blood cells, the enzyme keeps PS on the inside most of the time "so your blood clots only when you are cut, not when it is circulating in your veins," Schlegel said.

The enzyme also helps

certain cells die gracefully at the appointed time without causing harmful inflammation—a process known as programmed cell death or apoptosis.

"Apoptosis is one of the hottest topics in biology right now," Schlegel said. "It is a process in the development of adults from embryos and is very likely a process in such diseases as AIDS and cancer."

The function of the enzyme had been a mystery since it was first identified along with similar enzymes in red blood cells 20 years ago.

"We suspect that this enzyme is one member of a

whole family that controls a variety of important functions in all cells," Schlegel said. Because the function of an enzyme can affect how its gene is named, Schlegel said scientists probably will wait until they know what all the other members of this family of enzymes do before they give the new gene family a name.

Other members of the research team include Xiaojing Tang, postdoctoral fellow at the Fred Hutchinson Cancer Center; Margaret S. Halleck, senior research associate; and Patrick Williamson, professor of biology at Amherst College.

Poll phrasing can distort people's views

BY PAUL A. BLAUM
Public Information

The phrase "affirmative action" usually draws deep disapproval from white Americans during surveys. However, if pollsters explain specific affirmative action programs and their justifiable goals, white Americans respond more favorably.

This conclusion resulted from a comprehensive review of questions about affirmative action issues asked in national surveys. The study was conducted by Maria Krysan, assistant professor of sociology, and Charlotte Steeh, consultant at the Social Science Facility at the University of Wisconsin-Milwaukee.

"The way we frame questions can elicit certain answers," Steeh said. "Questions about affirmative action usually produce a negative response from white Americans, who either don't know much about affirmative action or equate it solely with preferences and quotas."

"Also, Americans have a tradition of individualism, which causes them to look askance at affirmative action," Krysan said. "On the other hand, when they understand the full range of affirmative action programs, then they become more supportive. This is in keeping with a second and in some ways contradictory American tradition: egalitarianism. In theory at least, Americans believe that everybody is entitled to a fair and equal chance to succeed."

"Affirmative action means more than quotas and preferences," Krysan said. "It also refers to open recruiting procedures, efforts to monitor progress in hiring and promoting underrepresented groups, contract set-asides for minorities and women and other proactive policies."

Unfortunately, a large number of Americans are not aware of the variety and purpose of most affirmative action programs. An April 1995 CBS/New York Times poll revealed that 34 percent of all white American respondents—55 percent of whom had not graduated from high school—could not think of any word or phrase when they heard the term "affirmative action."

"We suggest that survey questions can achieve greater validity by dropping the words 'affirmative action' altogether and describing instead the content of a specific affirmative action policy," Steeh and Krysan said.

Study may aid fight against ozone damage to plants

A cooperative research program between Penn State and the Swiss Federal Institute for Forest, Snow and Landscape Research in Birmensdorf, Switzerland is yielding interesting findings on ozone injury to forests.

Initiated in 1993, the program has just received another \$110,000 boost from the Swiss government to continue evaluating foliar sensitivity of nearly 50 species of plants found with ozone-like injury in the Swiss

forests. Headed by John Skelly, professor of plant pathology, and John L. Innes, section leader for the Forest Health Inventory and Intensive Monitoring Group in Switzerland, the project has already confirmed ozone as an injurious agent in the black cherry species. Ozone injury—marked by the dark red stippling on upper leaf surfaces—reduces the photosynthetic ability of an injured plant. Earlier ozone research by Skelly and colleagues on various tree species have

been confirmed by the symptom patterns seen on Swiss trees: black cherry trees are among the most sensitive to ozone.

Skelly's project is aimed at helping the Swiss government determine the proper standard to protect vegetation from foliar injuries. Skelly has worked similarly with U.S. agencies and says that because some species in the U.S. are the same as those in Switzerland, the results will be transferable.

ATHLETICS

A regular column provided by Intercollegiate Athletics

Tip-off time changed

ABC Television's decision to air the Penn State-Michigan State football game at 3:30 p.m. Saturday, Nov. 23, has forced a switch of the tip-off time for the opening men's basketball game of the season, vs. Mount St. Mary's, from 8 to 8:30 p.m. The move was made to allow for a more orderly arrival for basketball fans at The Bryce Jordan Center. Shuttle service will be available from Recreation Building beginning at 7:30 p.m. for those going to the hoops opener and wishing to avoid the football traffic exiting the vicinity.

Hall of famer

Men's lacrosse Coach Glenn Thiel recently was inducted into the Virginia Lacrosse Hall of Fame, which honors men and women who have made significant contributions to the sport of lacrosse. Thiel is a member of the hall's second class of inductees. He was head coach of the Cavaliers from 1970-78, a period during which his teams won two National Championships.

Hoops

Preseason magazines have a lofty opinion of the Penn State basketball programs. *Sports Illustrated* ranks the Nittany Lions No. 18 in the nation and No. 3 in the Big Ten (behind Michigan and Illinois). The Lady Lions are No. 12 in SI's preseason poll. The men entertain Mount St. Mary's in their first regular season game on Nov. 23 at 8:30 p.m. The women are host to Maryland on Nov. 22 at 7:30 p.m.

It's a big one

Tickets for Penn State's showdown with defending NCAA wrestling champion Iowa in The Bryce Jordan Center on the University Park Campus are now on sale. The Nittany Lions and Hawkeyes square off at 8 p.m. Friday, Dec. 6, in the first collegiate wrestling match in the 15,000-plus seat Jordan Center. For ticket information, call the center at (814) 865-5555.

Flamenco Ole!

The group Flamenca Ole! performed as the opening act of Noche de Estrellas at the Paul Robeson Cultural Center on the University Park Campus. The evening of entertainment, part of the monthlong celebration of Hispanic Heritage Month, was sponsored by the Latino Caucus. The event included music, dance, comedy, poetry and latin foods.

Planning Council updates schedule for open meetings

The following is an update on the remaining meetings scheduled by the University Planning Council to discuss the future of Penn State and to seek suggestions and comments from the University community.

Meetings at more than 20 locations across University Park and the Commonwealth have been held to date. In addition to these meetings, the UPC is also seeking suggestions via e-mail at Response@psu.edu.

Campus sessions

- Altoona
Nov. 26, noon-1 p.m.
- Harrisburg
Nov. 26
- The Hershey Medical Center
Dec. 4, noon-2 p.m.
- C2600 College of Medicine

- Allentown
Dec. 10, 1:30-3:30 p.m.
- 132 Academic Building
- Berks
Dec. 10, 9:30-11:30 a.m.
- 5 Luerssen Building

College sessions

- Agricultural Sciences
Nov. 25, 10:30-11:30 a.m.
- 324 ASI Building
- Communications
Nov. 22, 3-4 p.m.
- Carnegie Cinema

General sessions

- Office of Physical Plant
Nov. 22, 9-10 a.m.
- 105 Physical Plant Conference Room

Volume 26, Number 15

The Penn State Press: Going strong after four decades

By ALAN JANESCH
Public Information

The Penn State Press turned a robust 40 this year, and despite the challenges facing university presses across the country, it's fit and trim and working harder and smarter than ever before.

Over the past several years, since the arrival of director Sanford G. Thatcher in 1989, the Press has:

- increased its annual output from fewer than 30 books to an average of 70;
- added several titles to its lineup of scholarly journals (which now totals 10);
- more than doubled its annual net income (to nearly \$2 million); and

■ shared major awards for 15 books and dozens of other honors. Thatcher is quick to give a large part of the credit for the Press's increased output to the hard-working, efficient Press staff, which has increased only modestly in numbers since the end of the 1980s and which has an average output of 3.9 books per employee per year. (The average is 2.6 books per employee per year for university presses as a whole).

See "The Press" on page 3

New purchasing system should soothe headaches, speed process

The University is putting the final touches on a new program that will make ordering departmental goods and services a lot easier.

In a pilot program that began in October, about 100 employees at the University Park, Fayette, DuBois and Behrend campuses and The Hershey Medical Center have been using the Penn State VISA Purchasing Card to order items under \$1,000 from businesses that accept credit cards. Purchasing Services plans to phase in the program for pre-authorized users University-wide this winter.

"Under this new program, employees who are pre-authorized to use a VISA Purchasing Card can order supplies directly from a vendor and charge their purchases on the spot, as they might on their own personal card at home," Betty J. Roberts, assistant vice president for Business Services, said. "VISA-capable suppliers who accept these transactions should receive payment within two to three business days."

Last year, a task force representing several areas of the University interviewed purchasing card providers, visited several universities and institutions, and examined current purchasing practices to streamline University purchasing procedures. The goal was to develop a program that simplified the process, but it had to be one that could be integrated into IBIS—the existing electronic accounting system. It also had to be easily controlled for accountability and responsibility.

The VISA program met these criteria. PNC Bank was selected as Penn

University helping to build Internet II

By BARBARA HALE
Public Information

Internet II, the new, superfast, national computer network that U.S. universities are planning to create, has already started to take shape at Penn State. An Internet II-type link on campus is giving students a preview of the new network and the chance to use supercomputers, and one of Penn State's own is heading the national steering committee responsible for laying the ground work.

J. Gary Augustson, executive director of computer and information systems, is chairman of the national Internet II Steering Committee. He calls Internet II "the next stage of the Internet."

"Internet II is being developed primarily to address inter-institutional connectivity," Augustson said. "To give U.S. universities desktop-to-desktop, broadband connectivity—a step beyond what is available on today's Internet."

In practical terms, Internet II is being designed by Augustson and representatives of about 60 of the nation's leading research universities primarily to pick up where the original Internet left off. For example, Internet II will have much higher speeds—as much as 10 times faster than the current Internet— to enable better distance learning

presentations, video conferencing and online collaborative research.

As a side benefit, Internet II will enable students and faculty members to avoid the "traffic jams" that often clog the Internet today. The much-touted broadband-width connection of Internet II will allow more data to pass through than is currently possible.

Currently, there is already an Internet II-like link running between the Penn State Center for Academic Computing (in the Computer Building) and the Hammond Engineering Building on the University Park Campus.

The high-speed, broadband-width link—which at 600 million bits per second can send an entire encyclopedia in 10

seconds—is used by students and faculty members in the Institute for High Performance Computing Applications to transmit data to remote sites and between some sites on campus.

For example, nearly 3,000 undergraduate and graduate students in 15 different science and engineering courses and research projects are learning to use a wide variety of computer codes, algorithms and languages to solve problems in mechanics, chemistry, mathematics and fluid dynamics. Those students are using two IBM-SUR Unix classrooms which are connected on the high-speed link. Some students

Life Sciences Consortium

It's time to sit up and take notice

By BARBARA HALE
Public Information

A few months ago, Penn State's Life Sciences Consortium (LSC) consisted of little more than high hopes, a modest Web site and a few determined deans and professors.

Now, the LSC has nine student fellows, a fellows coordinator, two graduate program co-directors, as well as Ph.D. and M.S. degree programs in integrative biosciences. And it has given the go-ahead to departments in four colleges to hire 12 new faculty members during the current academic year, each to be co-funded by the Life Sciences Consortium.

If you haven't previously noticed the LSC, now is the time to begin paying attention. You're bound to start bumping into people who identify themselves with the consortium as faculty members, students or advisers.

Officially, the LSC came into being on July 1 of this year after being approved by the University Faculty Senate and the Board of Trustees. It is light on administrative structure: Nina Fedoroff, who holds the Willaman Chair of life sciences and is a member of the National Academy of Sciences, is director. The graduate program co-directors are C. Robert Matthews, professor of chemistry and Eberly family professor in biotechnology, and Judith Bond, professor and chairperson of the Department of Biochemistry and Molecular Biology and assistant dean for graduate education and the MD/PhD program in the College of Medicine.

The LSC concept has evolved over a two-year period. A steering committee of senior faculty members from colleges with a life science component was originally charged with devising new approaches to research and graduate education for what was then referred to as a division of biological sciences.

Today's Life Sciences Consortium is quite a different concept than an academic division. It is a virtual organization that has no faculty of its own, but spans six colleges: Medicine, Engineering, Science, Health and Human Development, Agricultural Sciences and the Liberal Arts. More than 150 faculty members from those colleges are working together to promote research between the life science disciplines and other disciplines, and to provide a learning environment that integrates research and teaching, theory and practice. All of this is accomplished while using the most contemporary techniques, equipment and electronic communication. Interactive video conferencing has removed the barriers to cooperation between faculty members on the University Park and Hershey campuses.

The LSC's new integrative biosciences degree program has been approved. Fedoroff said the new Ph.D. and M.S. curricula will strive to produce a new type of graduate: aware of and comfortable with multiple career options, experienced in non-academic as well as academic settings and able to function both as an independent scholar and a member of a problem-solving team.

Fedoroff noted that at a recent NSF-sponsored workshop, a graduate student said simply, "You're preparing us for careers that don't exist."

The goal of the LSC's graduate degree program is to change these expectations by preparing students for a much more varied career," Fedoroff said. "We will expose our students to the increasing variety of occupations that demand scientific and technical knowledge. We will teach them to be life-long learners and problem solvers able to work both as individuals and members of a team. I believe that these skills will be increasingly val-

Collaborative effort

Dorothy Sweeney, graduate fellows coordinator for the LSC, with graduate student Cheng Lu, one of the nine student fellows sponsored by the consortium.

Photo: Greg Grieco

ued in academia in the future as the availability of research funding continues to decline."

There are already nine LSC student fellows who were chosen last March and began arriving in September. These first fellows, who will receive two years of LSC support, were chosen from among students applying to existing departments and programs that had faculty members actively involved in developing new LSC options.

Matthews, co-director of the graduate program, said future fellows will not be chosen in this way. Rather, he and co-director Bond, together with Dorothy Sweeney, graduate fellows coordinator, will recruit them directly into the Integrative Biosciences Degree Program (IBDP). However, that doesn't mean that the IBDP will compete with existing life science degree programs.

"We're looking to complement existing programs and to work with them as much as we possibly can. What we've done in creating this new program is try to recognize the trends in research that have occurred over the last few decades," Matthews said. "Research activities and training experiences need to go beyond traditional departmental and disciplinary boundaries."

Current plans call for Integrative Biosciences Fellows to be funded by their faculty mentor or preceptor after the first two years of LSC support. LSC has funding for about 40 new students per year or up to 80 students at any one time. This will increase the demand for follow-up funding for the students' continuing years of study. To meet the demand, LSC expects to co-fund up to 50 new life science faculty hires, including 12 this year.

"The committee picked proposals that expanded interdisciplinary connections and added needed expertise," Fedoroff said. "For example, we approved two proposals for immunology faculty on the University Park Campus. Immunology is an area of strength in the Hershey Medical Center and the University Park positions will build new bridges, enabling our faculty to collaborate in ways they couldn't before."

Matthews said that, eventually, the LSC also would like to offer students the opportunity to pursue a traditional discipline as well as participate in one of the LSC's seven non-traditional integrative bioscience options.

"We're hoping that departments and existing programs will adopt these options, permitting students greater flexibility," he said. Dual advisers and internships are features that Matthews said he has talked with really like.

Fedoroff noted that internships offered through the IBDP will not necessarily be traditional co-op-style jobs. They may be shorter or intermittent. The student may go off campus for just three or four months or for a month at a time. The objective is to make the internship an integral part of the graduate degree program wherever possible. Both the timing and duration will be flexible.

Sweeney will be exploring possible internship opportunities in the pharmaceutical, biotechnology and agricultural companies, as well as opportunities in law firms, on Congressional staffs, at federal agencies and other science-based organizations.

"When a student comes in and says, 'I'd like a career in a certain company or field' but doesn't know how to get a job there, Dorothy Sweeney and I are willing to go right into the company, firm or agency and say, 'OK, we want to talk to you about the possibility of an internship,'" Matthews said.

Internet II

continued from page 1

J. Gary Augustson, chairman of the national Internet II Steering Committee

also are using the link to work interactively with computers at Penn State, the University of Illinois and Cornell to learn advanced programming for parallel computers using high-performance computer languages. Parallel computing allows students to solve problems at a faster rate because the configuration of the computer is such that portions of a particular problem are able to be worked on simultaneously.

"Students don't realize that the special link is there. They just know that they can run their code on those remote machines and see high performance," Lyle Long, associate professor of aerospace engineering and director of the Institute for High Performance Computing Applications, said. Long noted that the link was installed by a group led by Jeff Almstrong, CAC director of advanced information technologies, and has only been operational for a few months.

"We're still learning what we can do with it," he said. "We're trying to reach out to all disciplines at the University, not just science and engineering. There are some people in theatre arts, for example, who want to use simulations, which require massive computing power, to design 'virtual sets' for TV programs. The actors would perform in an empty room and the sets would be added later by computer simulation."

The Press

continued from page 1

"The staff has consistently performed at a high level of productivity, year in and year out, and works incredibly well as a team," said Thatcher. "Their dedication to their jobs is directly responsible for the Press's growing reputation as a 'class act,' which is so important in attracting future authors. It's my responsibility as director to set a course for the Penn State Press to pursue, but without the staff to implement our program, we wouldn't get very far."

By making the Press more efficient and effective, Thatcher and the Press staff have been able to consolidate the Press's historical strengths in core areas like art history and literary criticism and also to expand the scope of its publications within the liberal arts. When he joined the Press, Thatcher began the consolidation and expansion process by filling a few key positions, implementing the use of computer technology in editing and design, and keeping key functions, such as design and marketing, in-house.

"Not only have we been able to maintain our already solid reputation in literary criticism and art history," said Thatcher, "we've also become a major player in the fields of philosophy, religion, American and European history, and medieval studies." In the social sciences, Thatcher said, the Press has gone "from virtual invisibility to high visibility" in political science and has established a presence in sociology.

It's also published important and interesting works on Latin America, Russia and Eastern Europe, in Jewish studies and African American studies, and in the interdisciplinary field of studies in science, technology and society which has a long tradition at Penn State.

Thatcher said that the heyday of university presses was probably in the 1960s, when universities had lots of money available to subsidize university press operations and when many university presses substantially increased their publication lists, introduced paperback lines and began to publish reference works—an extremely expensive proposition.

But the tough times began to hit in the 1970s, Thatcher said, and have gotten even tougher since then. Over the last 10 years especially, with libraries buying fewer books and fewer journals and universities reducing their financial support, university presses have been forced to shift their focus from the books and journals that scholars need to the books that will appeal to a wider audience and will sell in a more commercial and competitive marketplace.

"It's been a steady but pretty serious decline," Thatcher said. "Like all university presses, we have had to make more and more of our decisions based on market criteria rather than on scholarly merit."

Thatcher said the traditional role of university presses in the United States, first set up in the late 19th century, was to disseminate the new knowledge created by university faculty teaching at the graduate level. But in order to successfully face the realities of scholarly publishing today, the Penn State Press has adopted several new

Sanford G. Thatcher, man at the helm of the Penn State Press.

Photo: Andrea Hurley

strategies. One is using computers for editing and design. Another is publishing a diverse range of books, so that those that appeal to a general audience and sell well can internally subsidize the more specialized books that sell to a smaller audience.

The Penn State Press, for instance, has taken on a function often associated with state university presses—serving state residents by publishing books about the state's history, culture, wildlife, plants and so on. "Those books provide a source of income that we can use to subsidize more specialized books," Thatcher said. Still another strategy is issuing hardcover (cloth-bound) and paperback editions of books simultaneously, rather than cloth first and paperback later.

"We distribute more copies that way, and we feel that—all other things being equal—if we can at least break even, we'll be serving scholarship and teaching better by taking that route."

The Penn State Press isn't currently doing any electronic publishing. But it is part of a major effort, with other presses and libraries of the Committee on Institutional Cooperation (the academic counterpart of the Big 10 athletic conference), to obtain a two-year planning grant to figure out the best ways to publish books and scholarly journals electronically. But in the meantime, one of the Press's key objectives is to operate on a break-even basis.

"We're getting close," Thatcher said. "Our forthcoming book on the origins and development of the Nittany Lion mascot (see box) will no doubt become our best-selling book ever, and we hope it will help put us into the black. The book will be published in time for our first home football game next year and we've got high hopes for it."

About The Press

■ The Press published its first book, *Toward Gettysburg: A Biography of General John F. Reynolds*, by Edward J. Nichols, in 1958.

■ The Press's biggest bestseller ever, at just more than 20,000 copies (and still selling), is *Afro-American Writing: An Anthology of Prose and Poetry*, 1985, edited by Richard A. Long and Eugenia W. Collier.

■ Over the years, Penn State Press books have received important awards from many prestigious groups, including the Middle East Studies Association, the Society of Architectural Historians, the American Academy of Poets, the American Political Science Association, and the Gustavus Myers Center for the Study of Human Rights in the United States.

■ Forthcoming from the Press: *The Nittany Lion: An Illustrated Tale*, by Jacques-Louis D'Esposito and Steven Herlihy, both Penn State librarians; and *Time for Life: The Surprising Ways Americans Use Their Time*, by Geoffrey Godesby, professor of leisure studies at Penn State, and John P. Robinson, professor of sociology at the University of Maryland.

VISA

continued from page 1

State's banking partner after the University issued requests for proposals to 12 potential providers.

Unlike the old procurement system where purchasing requests had to wind their way through a series of departments for approval before the order was actually placed, the new VISA Purchasing Card program allows individual departments to control their everyday purchases and interact directly with vendors. Not only will vendors receive payment faster, but other benefits of the program include a reduction in administrative costs for the University as a whole; a reduction in duplication of efforts; faster spending approval; better capability for better spending analysis and contract negotiation. The card may also replace limited and prepayment orders.

Under the VISA Purchasing Card program, a pre-approved employee will order goods or services directly. The supplier will deliver the goods and submit the credit charge to the card-issuing bank elec-

tronically as it does for any other type of credit card charge. The bank then sends an electronic notice to Penn State for transmission to the cardholder's administrative area via IBIS. Each month the department verifies its charges on IBIS, which then goes to Accounting Operations and the University pays a monthly consolidated bill reflecting all VISA charges from all departments during that period.

"The beauty of the new system is that instead of issuing thousands of checks throughout a month, Penn State's VISA charges are paid immediately from a fund at the bank and the University then pays its monthly VISA bill with one check, just like everyone else," Traci Mathis, purchasing card coordinator, said.

Cards will be assigned to individual current employees, not departments. Departments will be asked to identify appropriate staff who will then submit a card request through IBIS. This request will need to be approved by the department's budget executive or administrator and financial officer. The cardholder will be responsible for all transac-

tions on the card in compliance with University policy and procedures, and will manage all receipts for reconciliation. The cardholder also must complete training to be authorized.

After the pilot phase, daily and monthly dollar limits are likely to be set according to the type of administrative unit or purchase. The VISA Purchasing Card cannot be used for cash advances, alcohol, meals (unless they are authorized group meals), traveling or any entertainment expenses, personal purchases, consulting, maintenance agreements and several other categories of goods and services. Most of these expenses are handled in other ways.

For more information, contact Mathis at (814) 865-3903 or check the Penn State home page on the Web for PC09 at: www.ohr.psu.edu/pages/policies.htm under the "Index of All University Policies," then "Purchasing Policies." PC09 also can be found under Policy Manual in GURU at: <http://guru.sp.psu.edu>.

Faculty/Staff Alerts

University Libraries hours

The University Libraries on the University Park Campus will have an extended schedule for finals, beginning Friday, December 6, and an abbreviated schedule during intercession, beginning Sunday, Dec. 15. For complete information on hours of library service, call (814) 865-3063, type HELP HOURS when using the Library Information Access System (LIAS), or visit the Libraries' home page at <http://www.libraries.psu.edu>.

University Archives Penn State Room hours

The University Archives/Penn State Room (C107 Patten Library) will have new service hours beginning the week of Jan. 13. Spring and fall semester hours will be:

Monday, Tuesday, Thursday and Friday — 9:30 a.m. to 5 p.m.; and Wednesday — 9:30 a.m. to 5 p.m.

In addition, the University Archives/Penn State Room will also be open for visitors on the Saturdays of Parent's Weekend, homecoming and alumni reunions.

The University Archives house archival and manuscript collections related to the history of the University and the surrounding community. Materials can be used under supervision on site, but do not circulate.

HRDC course

The following course is being offered by the Human Resource Development Center. Registration for fee-based courses requires a completed registration form located on page 67 of the HRDC course catalog.

Motivating and Empowering Employees

Meets Dec. 18 from 12:15 - 4:45 p.m. in 319 Rider Building. Cost: \$35.

Golf course hours

The Penn State Golf Courses Walker Clubhouse December hours will be 9 a.m. to 5 p.m. Monday through Friday, and 9 a.m. to noon Saturday. January and February hours will be 9 a.m. to 5 p.m. Monday through Friday. For more information contact the golf shop at (814) 865-0257.

Call for artists' entries

Artists are invited to submit entries for the Nittany Lion Juried Exhibition to be held March 21 through April 17 at the Penn State Berks Campus Freyberger Gallery. This biennial exhibition highlights some of the most exciting artists of southeast Pennsylvania and beyond. The theme of the exhibit will be "time." Artists are encouraged to submit slides of works that connect with the idea of time. Working drawings that address the concept will also be accepted.

Cash merit awards will be presented and four to five artists will be invited to participate in the Groul-Kauffman Award Exhibition in the fall of 1997. For a prospectus or more information, contact Beverly Levine, gallery director, at (610) 320-4870.

Tempting feast

Robert Lima, professor in the Department of Spanish, Italian and Portuguese, looks over the dessert selections during the Puerto Rican Food Festival, held Friday, Nov. 22, at the Paul Robeson Cultural Center on the University Park Campus. The event, part of Hispanic Awareness Month, attracted more than 200 hungry guests.

Photo: Andrea Hurley

Winter parking regulations

Parking is prohibited in uncovered faculty/staff parking areas on the University Park Campus from midnight to 7 a.m. when snow accumulates, or when snow is predicted to accumulate in the evening or overnight. While some faculty, staff and students, for safety reasons, leave their vehicles on campus overnight when snow has fallen during their workday, those vehicles must be moved to one of the parking decks (Eisenhower, Nittany or HUB) if the vehicle is to remain on campus overnight. These vehicles must be back in their assigned lots by 8 a.m. the following business day to avoid ticketing or possible towing at the owner's expense.

Anyone with questions should contact Wanda Campbell in the Parking Office at (814) 865-1436.

Submission requirement for research studies

On occasion, the *Intercom* runs announcements of ongoing research studies in which subjects are being sought. Investigators wishing to submit information pertaining to the recruitment of human subjects must include not only the name and title of the principal investigator of the study, but also a copy of the approval letter from the University's Office for Regulatory Compliance. In the absence of such a letter, the assigned in-house tracking number given by the compliance office will be accepted. In addition, all announcements recruiting human subjects for study should comply fully with all guidelines set by the Office for Regulatory Compliance. For a copy of the guidelines, call (814) 865-1775.

News in Brief

Look to the sky

The Penn State Astronomy Club will conduct its last public Astronomy Open House for the season on Friday, Dec. 6, from 8 to 11 p.m. on the roof of Davey Lab. (In the event of cloudy skies, observations will be attempted on Saturday evening.)

Featured objects for the evening will include the planet Saturn and the Great Nebula in Orion. Other celestial objects also may be shown, depending on sky conditions. A planetarium show will be held in 541 Davey Lab.

The open house is free; everyone is welcome for a relaxing evening under the stars.

Tennis Center hours

The Penn State Tennis Center will be open 9 a.m. to 9 p.m. seven days a week through December and the holiday season, with the following exceptions:

- Dec. 24: Closes at 2 p.m.
- Dec. 25: The center is closed.
- Dec. 31: Closes at 2 p.m.
- Jan. 1: The center is closed.

Health program

The following health promotion program is being offered:

Weight Watchers AT WORK

The Weight Watchers AT WORK program will be available at University Park during the new year. The next series meets Wednesdays, Jan. 8-March 12, from noon to 1 p.m. in the Paul Robeson Cultural Center auditorium. Cost: \$115 (lifetime members, \$105). Members of the HealthAmerica HMO may be reimbursed for the cost of this program. New members are welcome at any time during the series.

Stressed and anxious?

Most people worry, but for some worrying is excessive, uncontrollable or overwhelming. The Stress and Anxiety Disorders Institute at University Park is conducting an ongoing research study which offers free therapy if:

1. You have experienced excessive and uncontrollable worry or anxiety for at least six months.

2. When worried or overly anxious, you also experience feeling keyed up or on edge, muscular tension, restlessness, difficulty concentrating, fatigue, sleep disturbance or irritability.

People ages 18-65 included in this study will receive 14 free sessions of psychotherapy, as well as assessments before and after treatment. A brief telephone interview will help researchers make a preliminary determination of the suitability of this program for participants. Strictest confidentiality is maintained. This National Institutes of Mental Health-funded study is being done under the direction of Thomas Borkovec, distinguished professor of psychology. Anyone interested in participating, should call 865-8201.

LECTURES

Modular math among Marker Lecture topics

Benedict Gross, professor of mathematics at Harvard University, will present the 1997 Russell Marker Lectures in the Mathematics in the Mathematical Sciences Series, titled "Modular Forms and Galois Representations," is sponsored by the Eberly College of Science and is free to the public.

Benedict Gross

The lectures, which will take place in 108 Warkitt Laboratory, include: "Polynomials with Rational Coefficients, an Introduction to Galois Theory" at 8 p.m. Monday, Jan. 13; "Algebraic Modular Forms" at 4:30 p.m. Tuesday, Jan. 14; "An Explicit Trace Formula" at 4:30 p.m. Wednesday, Jan. 15; and "Local and Global Galois Representations" at 4:30 p.m. Thursday, Jan. 16.

Gross is well known for his important contributions to the arithmetic of elliptic curves and modular forms. He also is known for his work

with a field of mathematics known as abelian integrals, which is at the crossroads of several major branches of mathematics.

A professor at Harvard University since 1985, Gross held professorial positions at Brown University from 1982 to 1985 and at Princeton University from 1978 to 1982. He has received a number of honors, including the Cole Prize in Number Theory from the American Mathematical Society in 1987. He was named a Fellow of the American Academy of Arts and Sciences in 1992 and held a MacArthur Fellowship from 1986 to 1991 and a Sloan Fellowship from 1980 to 1983.

Gross is editor of the *Journal of the American Mathematical Society*. He earned a bachelor's degree at Harvard University in 1971, a master's degree at Oxford University in 1974 and a doctoral degree at Harvard University in 1978.

Lecturer examines hazards of living in New Zealand

Helen Anderson, director of Earth and Ocean Sciences Research (Joint Government/University Research Institute) at the University of Otago, will give a seminar, "Is Living in New Zealand Hazardous? Coexisting with Plate Boundary Processes," at 3:30 p.m. Tuesday, Dec. 10, in 301 Steidle Building on the University Park Campus.

This talk will focus on the patterns and impacts of natural hazards in New Zealand. Anderson's research specialty is earthquake and related hazards in New Zealand, large-scale crustal deformation, and the impact of geologic hazards. Included will be examples from the general patterns of earthquakes and active faulting, the implications of the lack of recent earthquakes along the Alpine Fault in the South Island, recent/current volcanism of Ruape-

hu, landsliding at the Clyde Dam, and other landslides from within urban settings to huge landslides in mountainous areas. What does it mean for the country of New Zealand?

Anderson, who has extensive research experience, was educated at the University of Auckland and Cambridge, was a Fulbright Senior Research Scholar at U.C. Santa Cruz and was formerly president of the New Zealand Geophysical Society.

This seminar, co-sponsored by the Australian-New Zealand Studies Center and the Department of Geosciences, is open to the public. For additional information, please contact **Pat Corbett** at (814) 863-1603 (e-mail: pac9@psu.edu) or **Kevin Furlong** at (814) 863-0657 (e-mail: kevin@geodyn.psu.edu).

President's Awards nominations due soon

Nominations for any of the four annual President's Awards (for undergraduate students) and the Graduate Student Service Award to be given April 6 at the Faculty/Staff Awards event are being accepted until Jan. 17. The President's Awards include the Eric A. Walker Award, the Ralph Dorn Hetzel Award, John W. Oswald Award and the Jackson Lethbridge Tolerance Award.

A committee, composed of representatives from Student Affairs, the University Faculty Senate and the student body and headed by **Carol J. German**, associate director of student activities, will make a selection of recipients for these awards and forward them to the University president for approval. Completed applications, along with a supporting statement about a student's informal or personal contribution of time, energy, initiative, character and noteworthy items for consideration, should be sent to the Office of Student Activities in 225 HUB on the University Park Campus. Applications are available from that same office.

Award descriptions:

■ **Ralph Dorn Hetzel Award** —

Recognizes achievements and potential of outstanding undergraduate students who have demonstrated the qualities of leadership.

■ **Eric A. Walker Award** — Recognizes students in their senior year who have demonstrated leadership, citizenship, service and scholastic attainments.

■ **John W. Oswald Award** — Graduating seniors will be considered for this award based on their scholarship and involvement in athletics, social service, religious activity, student government, journalism, speech and the mass media, and creative and performing arts.

■ **Graduate Student Service Award** — Recognizes a graduate student who has best combined high academic achievement with leadership.

■ **Jackson Lethbridge Tolerance Award** — New this year, this award brings recognition to broad-minded students who openly promote responsible citizenship and civil respect for diversity within the Penn State community, while exhibiting a nature of respectful tolerance for the differences among our constituents.

Penn Staters

Ram B. Bhagat, senior research associate with the Applied Research Laboratory's Surface Engineering Center and an associate professor of engineering science and mechanics, helped organize the 1996 American Society for Materials International Surface Engineering Symposium in October. At the symposium, Bhagat presented three papers: "Finite Element Analysis of the Residual Stresses in Titanium Matrix Composites with FGM Interphase," "Wear Resistance of the WC-Based Cutting Tools in Machining Titanium," and "Low Temperature Coating of Nickel-Aluminum Bronze on 2618 Al for Wear Resistance."

Loukas N. Kalisperis, associate professor of architecture, delivered two keynote addresses on computer aided design and digital architecture at a recent conference and seminar in Brazil. His keynote talk, "Design Studio: Paperless and Digital," was presented at the NUTUA '96 (Núcleo de Pesquisa em Tecnologia da Arquitetura e Urbanismo) in Sao Paulo, Brazil. Kalisperis also presented the opening address, "Digital Architecture into the Millennium," at the First Semina de Informatica de Belas Artes, in Higienopolis, Brazil. While in Brazil, he presented an invited talk at the University of Sao Paulo's Department of Architecture.

Sridhar Komarneni, professor of clay mineralogy in the Department of Agronomy and the Materials Research Laboratory, gave a plenary lecture on "Low Temperature Routes to Solid State Materials" at the Third Interna-

tional Conference on Solid State Chemistry in Bratislava, Slovakia.

W. LaMar Kopp, former deputy vice president for International Programs and professor emeritus of German, was presented the Lifetime Achievement Award from the Pennsylvania Council for International Education (PaCIE) in recognition of his "outstanding leadership and contributions to international education in the Commonwealth." Kopp also was awarded the Charles B. Kiese Award for the nationwide Association of International Education Administrators for "outstanding contributions to international education."

Bruce A. McPherson, associate professor of entomology, presented two papers and chaired a session reviewing biology, taxonomy and genetics of economically important fruit flies at the Working Group on Fruit Flies of the Western Hemisphere in Vina del Mar, Chile. While in Chile, he also served as an invited panelist in a workshop on the importance of international efforts for the South American fruit fly, sponsored by the International Atomic Energy Agency.

Russell Messier, professor of engineering science and mechanics, has been named a Fellow of the American Vacuum Society in recognition of his "sustained contributions to the area of thin film science and technology with particular emphasis on evolutionary structure zone models and their relation to preparation-bombardment-morphology-property relations."

MOC holiday hours

During this holiday season, the Microcomputer Order Center's regular business hours of 8:30 a.m. to 5:30 p.m. will change as follows:

Dec. 16-20: 8:30 a.m.-4:30 p.m.;
Tuesday, Dec. 31—closed; and
Jan. 2 and 3—closed for inventory.

Site license software packaging

All site license software that is reproduced by the MOC will be distributed in sealed packages. Please note that all site license software is subject to the terms of the standard MOC return policy—opened packages cannot be returned or exchanged (defective media will be replaced).

Apple holiday savings

Apple Computers Inc. and the MOC are kicking off the holiday season with a special "Apple Holiday Savings" program. Now through Jan. 19, receive a \$150 mail-in rebate with the purchase of any qualifying Macintosh desktop computer, Apple display (if sold separately) and Apple printer.

Contact the MOC

You can contact the MOC by phone at (814) 865-2100, fax: (814) 863-7514, e-mail: moc@psu.edu, or stop by 12 Willard Building on the University Park Campus. Remember to check the MOC home page at <http://moc.cac.psu.edu> for the latest product and pricing information.

Night owls can compute anytime in some residence hall computer labs

As of Nov. 22, Penn State students at University Park had somewhere new to go on the weekends—24-hour computer labs in residence halls. Labs in Redifer, Findlay, Warnock and Waring residence halls are now open 24 hours a day, seven days a week, with student assistants or "rovers" to troubleshoot the equipment periodically throughout the day and night.

The move was made because of the increasing use of electronic technology in instruction that requires students to access information via computer, particularly the World Wide Web. In addition to the 24-hour service, the Center for Academic Computing has increased the number of part-time student computer consultants in East Halls, where many freshmen are housed, to help first-time computer users get up to speed. The consultants help students in labs and even do house calls to individual rooms.

The number of log-ins to CAC and the Internet from student computer labs for all of the fall semester last year was 948,000; as of Oct. 31, this year, that number had already reached 709,000 with nearly a month to go before the end of the exam period. In addition to these users, about 3,100 students have direct connections to the CAC backbone from their rooms. Nearly all residence halls at University Park are wired for direct e-mail and Internet connection and the rest will be by the end of next year. Students off campus also can dial into their CAC accounts by modem.

Driving the increase in use is the growth in CAC computer accounts for faculty, staff and students, which has gone from 23,000 in 1993 and 51,000 in 1994 to 76,000 in the spring of 1995. As of last month, there were 102,000 accounts. CAC provides more than 1,400 computers in 25 labs across campus, most of which are open until midnight, Sunday through Thursday, and until 9 p.m. on Friday and Saturday. In terms of sheer volume, Penn State nearly outdoes the commercial Internet providers.

According to John T. Harwood, director of Education Technology Services at CAC, "On a typical day about 1 million mail messages per day are sent to or from Penn State faculty, staff and students. In addition, the CAC home page on the Web receives more than 200,000 hits or requests for information every day. These figures attest to the fact that electronic communication is a way of life at Penn State."

Logged in

Students who need all night to get their computer work done—and those who are night owls by nature—may now log in 24 hours a day at several computer labs on the University Park Campus.

Photo: Greg Gricco

The 24-hour computer labs join the 24-hour Pollock Library and the 24-hour HUB in offering round-the-clock activities for students wondering what to do on the weekend.

National higher education association names Spanier to board of directors

President Graham B. Spanier was named to the board of directors of the National Association of State Universities and Land-Grant Colleges. NASULGC is the nation's oldest higher education association of 192 public research universities, including all the land-grant institutions and many state university systems in all 50 states, the District of Columbia and U.S. territories.

Spanier also begins a three-year term as chairman of NASULGC's Commission on Information Technologies, after having served as vice chair. One of NASULGC's largest and most active commissions, the CIT was created to identify and develop policy positions and advisory assess-

ment on information technology and related policy issues of concern to association members and to the nation. As an advocate for higher education, CIT participates in federal initiatives relating to the development of the national information infrastructure.

Spanier also serves on the Kellogg Commission on the Future of State and Land-Grant Universities, composed of presidents from state and land-grant universities and members of the Kellogg Foundation. In addition, he has served on the American Council on Education's Commission on Women, the NCAA Presidents Commission and the Joint Commission on Accountability Reporting.

WPSX project provides free books

The simple gesture of giving a child a new book creates a wonderful ripple effect of joy, self-esteem, family bonding and learning. That's why WPSX-TV has joined a partnership with First Book, a national non-profit organization committed to giving children the opportunity to read and own their first new book.

Through this partnership, WPSX-TV, which is broadcast in 29 central and northcentral Pennsylvania counties and carried on more than 125 cable channels, is now able to provide free books monthly to disadvantaged individuals throughout the viewing area. The first distribution is targeted for Cen-Clear Head Start in Philipsburg, Blair County Head Start in Altoona and ARIN Even Start in Shelocta. Books are slated for delivery this month. The distribution pro-

gram is part of The Ready To Learn Service on WPSX-TV.

To provide the free books to local children, First Book has created a series of critical national partnerships that include: Barnes & Noble; Scholastic Publishing; The Corporation for Public Broadcasting; the Association of Library Services to Children; a Division of the American Library Association; B. Dalton Booksellers; the Association of Junior Leagues International; Share Our Strength; and Mondo Publishing.

Locally, Murata Electronics of State College has provided funding to WPSX-TV to purchase books from Scholastic and Mondo publishers in the coming year. According to Bill Speakman, director of development for WPSX, local underwriting is critical to the success of this initiative.

■ Martin Luther King Jr. Day, Wednesday, Jan. 15 Student makes dream visible with poster

Fifteenth-semester graphic designer Amanda Barile from Auburn, N.Y., wanted to concentrate on Dr. Martin Luther King Jr.'s dream. She went to Pattee and read speeches, read accounts of his activities and focused on his words that have inspired hundreds of thousands to work toward freedom, solutions, promises, opportunities, justice, achieving together, being an American.

These are words she used to make visible the theme of this year's Martin Luther King Jr. Day commemoration, "Share the Dream, Live the Reality."

Early this fall, Robert Leonard, professor of theatre arts and a member of the Martin Luther King Jr. Day planning committee took the poster idea to art Professor Lanny Sommesse and, together, they developed the poster project for his senior design class in the School of Visual Arts. Once her design was selected, Barile continued to refine her design and work through the production process, with help from her classmates.

"This was such an interesting project because I learned about Dr. King as well as the various steps in the production process. Working every week with Bob and Lanny really helped me focus," she said. "Lanny really pushed me to refine my work and get the most out of the project."

Barile first became interested in graphic design when she was on the intercollegiate newspaper, the Tribeca Film Center during her sophomore year. At that time, she was a photography and film major, and, as an intern, she sometimes went to nearby design studios that specialized in magazine layout, CD cover designs and posters. She liked what she saw, switched her

Student Amanda Barile designed this poster to mark Martin Luther King Jr. Day. She and her classmates in Lanny Sommesse's senior design class produced it for a class project.

major and worked to follow her own dream. After graduation in May she plans to head West, maybe to California, to become what she saw — a designer of magazines, CD covers and posters in the fast-paced world of the entertainment industry.

Exhibits honor King's life

■ On Jan. 21, 1965, Dr. Martin Luther King Jr. spoke to an estimated crowd of 8,000 people in Penn State's Recreation Building. In remembrance of that historic visit and in tribute to King, the University Libraries will feature the exhibit, "Martin Luther King Jr. at Penn State: The Struggle for Equality," in Pattee Library's main lobby Jan. 11 through Feb. 1, 1997.

The exhibit will present notable highlights of King's visit, exploring the reasons why he chose to come to Penn State, and also why the planned visit for the fall of the previous year was postponed. It will address issues such as how the speech he gave related to the general historical events taking place at the time. The exhibit also will look at the larger historical context of the Civil Rights movement and the struggle for increased voting rights. A video recording of his speech will also be part of the exhibit.

■ In time for Martin Luther King Jr. Day celebrations and Black History Month, the HUB Formal Gallery has scheduled "Memories of Childhood. So We are Not the Brassy Bunch or the Cleavers," from the first week of classes in January through Saturday, Feb. 22.

It is an exhibit of how 15 photographers, print-makers and painters portray their childhood — images that celebrate diversity and multicultural heritage.

Artists from South and Central America, the United States, Africa, Asia and Europe, some of whom live abroad, have each created a set of childhood images that range from southern shanties, Japanese-American internment camps, artists studios and a Montana ranch, to Manchuria during the Chinese Civil War of 1948. The exhibit was put together by the Steinbaum Krauss Gallery, Ltd.

The HUB Formal Gallery is open from noon to 8 p.m. Tuesday through Thursday, and noon to 4 p.m. on Friday and Saturday. For more information, contact Ann Shields, head of the HUB and Kern Art Galleries.

Musical tribute rings out

Penn State and the community are collaborating in a musical celebration on Jan. 15, in honor of Martin Luther King Jr. It will be held in the Rotunda of Old Main on the University Park Campus at 11:30 a.m. with the bell ringing at noon. Students, faculty, staff and members of the community are invited to attend.

In addition to the Old Main chimes and bell-ringing instruments, students from the School of Music, local churches and the State College Area School District will join in the ringing celebration. President Graham B. Spanier will be the honorary bell ringer and those who attend will receive bells to ring as well. Both Spanier and James B. Stewart, vice provost for educational equity will give remarks.

The bell ringers will be joining hundreds of other bell ringers in communities across the country who are participating in a call from the King Federal Holiday Commission to ring in noon to "proclaim a day of Universal Peace and Nonviolence."

Closing the occasion at Penn State will be choirs from the community to sing "Let There Be Peace on Earth," a song that began with a group of teenagers in California in 1955 and has since journeyed around the globe through homes, schools, churches and clubs. It's been a theme for Veteran's Day, U.N. Day, 4H Clubs, the Kiwanis Clubs and CORE. Even the United Auto Workers began singing it. Since then it has spread abroad from New Zealand to Africa and has taken up by professional singers from Danny Kaye and Nat Cole to Rhonda Fleming and Stan Melton. The singers in Old Main will sing the Fred Warne song arrangement.

For information on how to participate, call Lydia P. Abdullah, senior budget planning specialist and member of the Martin Luther King Jr. Day Planning Committee, at (814) 865-7641.

EMT to the rescue — what a way to end the season

The football game with Northwestern was an important one for Penn State if there was to be a bowl game this year. But no one knew how important that game was for Vaughn Richard Packer, a 78-year-old season ticket holder.

"I've been going to games since the old Beaver Field with wooden bleachers on one side and woods on the other," Packer said. He has had season tickets for 25 years, but the game on Nov. 2 was nearly his last.

On this cold and wet day, his wife, Isabell, turned and saw him slumped over. "I said 'Dick,' and he didn't answer. Keith Darbin of Harrisburg and I screamed for the medics and they were there in a matter of seconds," she said.

When the first emergency medical technicians arrived, they found Packer was not breathing and had no pulse. The two crew members started CPR and called for advanced life support. As the Lions struggled on the field, the EMTs, paramedics and physicians of Emergency Medical Services began their fight to bring Packer back to life.

Dr. Richard Wuerz, medical director of the Advanced Life Support special events staff, arrived to direct the EMTs and paramedics from University Health Services.

As an emergency physician at The Hershey Medical Center, he has supervised hundreds of resuscitations, both in the hospital and during his seven years at Beaver Stadium. The special events Emergency Medical Services (EMS) system is a cooperative effort between The Hershey Medical Center Department of Emergency Medicine and the University Health Services Office of EMS. David Lindstrom is the Health Services staff member responsible for the administration and management of all special event EMS.

This time the EMS system worked perfectly. Packer was transferred to Centre Community Hospital breathing on his own and with a self-sustaining heartbeat. He was later moved to the Heart and Lung Center of the Williamsport Hospital and given a device that detects and corrects the life-threatening heart rhythm that caused his heart to stop beating.

The EMS staff was wondering how their patient was. They got their answer Nov. 23 just before the Michigan State game, when he appeared to introduce himself and to say thanks.

Packer was all smiles. "If I'd been anywhere else, I wouldn't be here now."

Packer's cardiologist, Dr. Joseph Calder of Williamsport, not only gave him permission to return to the stadium just three weeks after the heart stopped beating, but also gave the Packer tickets to attend. "They had given up their, assuming a long recovery."

"Mr. Packer lends a whole new meaning to the term die-hard Penn State fan. What a way to end the home game season," said Lindstrom.

The ARTS

AT PENN STATE

Guest conductor

President Graham B. Spanier took a turn at the conducting podium during the Penn State Blue Band's Bendorama '96 concert Friday, Nov. 22, at Eisenhower Auditorium on the University Park Campus.

Kwanzaa celebration

Penn State's NOMMO Performing Arts Company presents the 1996 Kwanzaa Community Celebration and Feast, an evening of African and African American dance, music and food, at 6 tonight in the HUB Ballroom on the University Park Campus. Tickets are \$7 and can be purchased from any member of NOMMO.

Jordan Center concerts

The Bryce Jordan Center has announced two upcoming concerts: Rusted Root will play on Jan. 18. Tickets at \$19.25, go on sale at 8 a.m. Friday, Dec. 6.

Gloria Estefan will be in concert Feb. 2. Tickets go on sale at 8 a.m. Saturday, Dec. 7. Ticket prices were not available at press time.

For more information, call (814) 865-5555.

Behrend Concert Choir

The Penn State-Behrend Concert Choir will perform a mix of contemporary and traditional songs at 3 p.m. Sunday, Dec. 8, in the Reed Union Building Commons.

Community Arts Center

Upcoming performances at the Community Arts Center, part of the Pennsylvania College of Technology in Williamsport, include:

■ Jan. 28 at 7:30 p.m. — "Kiss of the Spider Woman;" tickets are \$33, \$25.50, \$20.50.

■ Jan. 31 at 7:30 p.m. — "Royal Winnipeg Ballet;" tickets are \$25 for adults, \$20 for students.

■ Feb. 11 at 7:30 p.m. — "Singing in the Rain;" tickets are \$33, \$25.50, \$20.50.

■ March 12 at 7:30 p.m. — "Tommy;" tickets are \$33, \$25.50, \$20.50.

■ March 20 at 7:30 p.m. — Neil Sedaka; tickets are \$40, \$32.50, \$25, \$18.50.

■ April 4 at 7 p.m., and April 5 at 10:30 a.m., 2 p.m. and 5:30 p.m. — "Sesame Street LIVE;" tickets range from \$7.75 to \$12.75.

■ April 12 at 6 p.m. — "Enchanted Evening" presented by the Williamsport Symphony Orchestra; tickets are \$35, \$30, \$24, \$19, \$16, \$12.

■ April 17 — "To Kill A Mockingbird;" tickets are \$23 for adults and \$19 for students.

■ May 6 at 7:30 p.m. — "Pops Potpourri" presented by the Williamsport Symphony Orchestra; tickets range from \$12 to \$35.

■ May 7 at 7:30 p.m. — "Don Juan in Hell;" tickets are \$22, \$18.50, \$15.50. For more information about any of these performances or for tickets,

University Park Calendar December 6 - January 15

SPECIAL EVENTS

Friday, December 6

Palmer Museum of Art, 2 p.m., Christoffers Lobby. Gallery Talk presents Jennifer Sieb on "Highlights of the Palmer Museum."

School of Music, 7:30 p.m., Recital Hall, 110 Music Building I, 122 Music Building II and 128 Music Building III. "Winterfest Progressive Concert." For tickets, call (814) 865-0431.

Center for the Performing Arts, 8 p.m., Eisenhower Auditorium. University Resident Theatre Company presents "A Christmas Carol," through Dec. 7. For tickets, call (814) 865-0255.

Sunday, December 8

Odyssey Through Literature, 6:30 p.m., WPSU-91.5 FM. John Fyler and Leonard Rubinstein on "Chaucer's Fun-house."

Sunday, December 15

Odyssey Through Literature, 6:30 p.m., WPSU-91.5 FM. Pier Larson and Leonard Rubinstein on "Tales of Cold Ancestors."

Sunday, December 22

CONFERENCES

Friday, December 6

The Penn State Scanton, through Dec. 7. "From Drugler to Achiever."

The Penn State Scanton, through Dec. 7. "Creating a Space for Practitioners, Teachers and Researchers."

Monday, December 9

The Nittany Lion Inn, through Dec. 13. "Tax Week."

The Penn State Scanton, through Dec.

10. "Swallowed by a Snake: Healing through the Masculine Side of Grief."

The Penn State Scanton, through Dec. 11. "Traffic Engineering and Safety."

Tuesday, December 10

The Penn State Scanton. "The Psychology of Discipline."

Wednesday, December 11

The Penn State Scanton, through Dec. 13. "Wastewater Biology."

Thursday, December 12

The Penn State Scanton, through Dec. 13. "PASBO Food Service Directors Professional Development Program."

Monday, January 6

The Nittany Lion Inn, through Jan. 16. "Ice Cream Short Course."

EXHIBITS

The HUB Art Alley

■ Collection of designs by Perry Oliver, through Dec. 8.

Wood art by Andrew Hottenstein, through Dec. 8.

The HUB Browning Gallery

Paintings by George Diaz, watercolors by Sofia Austin, paintings by Ramon Borges, paintings by Miriam Urquidí and photography by Willy Zayas. All exhibits will be open through Dec. 8.

The HUB Formal Gallery

Photography by Ed Lees, through Dec. 7.

Ken Exhibition Arena

Jewelry by Denise Anrew and figures by Janice Gainer, through Dec. 8.

Palmer Museum

■ "Cooking for the Gods: The Art of Home Ritual in Bengal," through Dec. 8.

"When Coal Was King: Paintings from the Steidle Collection, College of Earth and Mineral Sciences," through Dec. 8.

"Abstraction to Figuration: Selections of Contemporary Art from the Pincus Collection," through Dec. 15.

"The Wood Engravings of Warren Mack," through Jan. 5.

Zoller Gallery

"School of Visual Arts Faculty Exhibition," through Dec. 13.

■ Reflects an international perspective.

Population Research Institute seeks proposals to fund research project

The Population Research Institute is requesting letters of intent for a proposal competition to fund pilot project research in the general area of biodemography. The research projects should focus on issues related to biobehavioral genetics, behavioral endocrinology and reproductive biology and health. Projects that combine aspects of biology and demography will receive special consideration. The goal of this funding initiative is to promote cross-disciplinary and innovative research that acknowledges both

the social and biological foundations of demographic phenomena (ie. fertility, mortality, fetal loss, risky behaviors). Funding for the one-year projects will be between \$15,000 and \$25,000.

Letters of intent are due Jan. 23. Full proposals will be due March 17. Contact Daniel T. Lichter at (814) 865-0486 (lichter@pop.psu.edu) or Diane K. McLaughlin at (814) 865-1833 (mclaughl@pop.psu.edu) if you have questions or to request a copy of the submission guidelines.

■ A holiday tradition

Collaborative effort gives new twist to the classic "A Christmas Carol"

By MATT MILLER

College of Arts and Architecture

Almost immediately after Charles Dickens wrote the holiday favorite "A Christmas Carol," it was adapted to the live theatre. Audiences found the story particularly suited to performance and over the years it has been performed in many theatrical versions, radio plays, films and even cartoons.

This holiday season, an all-new version of "A Christmas Carol" will be staged Dec. 6 and 7 in Eisenhower Auditorium on the University Park Campus, produced in a first-ever collaboration of the School of Theatre Arts and the Center for the Performing Arts.

But this won't be the usual production of the classic. With the talents of Penn State staff, students, alumni and others, the production will be full of special effects and holiday magic.

"The performance was conceived as a holiday gift to our community," Dan Carter, director of the School of Theatre Arts, said. "In order to accomplish a feat worthy of that goal, it was necessary to pool our resources and strive for something on a grand scale."

"Neither the Center for the Performing Arts nor the School of Theatre Arts could have done it on its own. Fortunately we live in an environment where collaboration is the order of the day. It is central to all we do and, consequently, second nature to us."

The hopeful message of "A Christmas Carol" will remain a large part of the story, and a creative team will design deliciously frightful effects the whole family will enjoy.

Practice makes perfect

Matthew Faison is Ebenezer Scrooge, left, and Jeremy Hall is Scrooge's nephew Fred in this scene from "A Christmas Carol." The two will perform in the show at Eisenhower Auditorium on the University Park Campus Dec. 6 and 7.

Photo: Andrea Hurley

"One of the things we struggled with was emphasizing the positive aspects of Scrooge's choice, rather than just his recoiling from the vengeance of hell-fire," Carter said. It is hoped the production will be staged again next year, and then on an every-other-year basis. Performance venues in Pennsylvania and elsewhere in the East have expressed interest in presenting the production in the future. Envisioned as a gift to Penn State and the community, the collaboration

involves a creative team full of talented alumni, staff and Pennsylvania Centre Stage regulars. Carter, theatre arts faculty Bob Leonard and Cary Libkin, and M.F.A. directing candidates Lewis Magruder, G. Valmont Thomas and Christine Wilson have written a memorable adaptation of the script in consultation with John Feimster, Penn State alumnus and author of the Oscar-nominated play "Agnes of God."

"The process of adapting the novel to the stage is one of the most exciting things I've ever done," Carter said.

Duke Durfee, a 1982 alumnus and associate designer of the Tony Award-nominated scenery for "Me and My Girl," "Nine," "M. Butterfly" and "Dancing at Lughnassan," will design the sets. Emmy-Award winner Dennis M. Sizemore will work as the lighting designer, Richard St. Clair, who has designed Centre Stage productions of "1776," "Funny Girl" and "Evita," will be the costume designer.

"This collaboration has given us a chance to work with some of our most accomplished alumni," Carter said.

If you go

"A Christmas Carol" will be performed at 8 p.m. Friday, Dec. 6, and 3 p.m. and 8 p.m. Saturday, Dec. 7, at Eisenhower Auditorium on the University Park Campus. Tickets may be purchased by calling the Arts Ticket Center at (814) 863-0255; toll-free (800) 278-7649.

CQI
CONTINUOUS
QUALITY
IMPROVEMENT

Communications dean sponsors CQI team

A new team in the College of Communications, Morale Movers, will study the results of the Faculty/Staff Survey and the comments the dean received in her lunches with the college staff last summer. The team will develop and pilot new processes and then recommend changes to improve employee morale. Dean Terri Brooks is the team sponsor, Sharon Symanovich is the leader. The role of facilitator will be shared among the members. Team members are Paulette Berner, Angie Bohon, Corinna Bressler, Beth Haupt, Amy Hensal, Leslie Hutchins, Lisa Richtscheit, Joseph Selden, Monica Spence and Simon Tarr.

Quality Expo '97 planning team meets

Planning team members for the April 17 Quality Expo are: Jean Barret, Gerry Browder, Larry Burton, David Dimmick, Jackie Esposito, Carol Everett, Alan Feimster, Dorothy Gay, Judith Hewes, Linda Klimczyk, Clare Kristofor, Monica Nachman, Dan Nugent, Sue Oram, Barbara Sherlock, Larry Spence, Karen Wagner, Ellen Walker and Betty Wilson.

Assessment and quality conference planned

The American Association for Higher Education Conference on Assessment & Quality will be held June 11-15, 1997, in Miami Beach, Fla. This year's conference theme, "Assessing Impact: Evidence and Action," considers the central question "What impact has evidence from assessment and quality improvement had on student learning, faculty and staff learning, institutional planning and operations, or society's views of higher education?" If you are interested in obtaining a conference session proposal form, please call the Center for Quality and Planning at (814) 863-8721. Proposals must be postmarked or faxed by Dec. 13.

For more information about Continuous Quality Improvement, please contact Louise Sandmeyer, executive director of the Center for Quality and Planning, (814) 863-8721 or e-mail LES1@PSU.EDU.

Costume fitting

Carrie Thomas, left, is fitted for her costume by draper Tracy Sherritt Gray. Looking on is Richard St. Clair, costume designer for "A Christmas Carol."

An army of undergraduates is at work in Human Development and Family Studies

From the College of Health and Human Development

Franks Coyne heard about the Family Relationships Project from friends during his junior year at Penn State.

"They were very excited about it and talked about it all the time," he remembers. "So I contacted one of the graduate assistants and got an interview, and was accepted into the project."

Coyne, who recently graduated, spent several semesters working as an undergraduate research assistant on the study. He served on the project's front lines, interviewing children and their parents in person and by telephone.

"It's something that's not typical for undergraduates to do," he said. "It's been interesting to get the hands-on experience, to be involved in the research rather than just reading about it in class."

What's especially unusual is that Coyne had lots of company: He was part of an army of more than 50 undergraduates who have been participating each semester in the project, which is based in the Department of Human Development and Family Studies. Most serve as interviewers, while help double-check the data; and a few are involved in data analysis. For many, it's changing their college experience, their view of research—and their future plans.

The idea of making research a part of the undergraduate student experience is not a new one for the study's co-investigators, Ann Crouter and Susan McHale, who have recruited undergraduates onto their research team in several previous studies. The current research, funded by the National Institute of Child Health and Human Development, actually involves two simultaneous studies: one composed of families of fourth or fifth graders who have younger siblings and one involving families of ninth- to 11th graders who also have younger siblings. Altogether there are 400 families in the study and the research team spends 15 or more hours collecting data on each family each year. Before the project is over in 1999, the team will have conducted more than 1,200 home visits, each lasting about three hours, plus 8,000 telephone interviews.

"The key question in our research is, 'What makes two children from the same family so different?'" McHale said. The researchers are looking at similarities and differences in the children's interests, experiences, psychological development, relationship with other family members, and other factors. They also hope to learn more about how the parents' work experiences affect family life.

Unusual opportunity

Undergraduates are gaining valuable hands-on experience in the Family Relationships Project, housed in the Department of Human Development and Family Studies. More than 50 undergraduates have participated each semester in the project by interviewing families, checking data and getting involved in data analysis.

Photo: Scott Johnson

The co-investigators screen each student carefully, looking for people who are interested in children, have strong interpersonal skills, and are conscientious and reliable. "We tell them it's more like a job than a course," McHale said. "You can't just decide not to come one day."

Students who are accepted into the project sign up for a three-credit special topics course in human development and family studies. They spend the first part of the semester in a rigorous training process in which they learn, among other skills, how to interact with the children and parents, how to deal with shy children or those who get bored

during the interview and how to fill out the interview forms with precision. The training also involves interviewing a "practice child" (sometimes it's one of Crouter's or McHale's own children). Each student spends several nights a week in Beecher House on campus, calling children and parents and conducting half-hour telephone interviews with several families per night.

In addition, the undergraduates join Crouter, McHale and graduate students on trips to the families' homes, where they conduct in-person interviews. Many of the families live an hour or more from University Park, in such communities as Bloomsburg, Hollidaysburg, Lewistown and Williamsport.

But even the car rides become an educational experience for the students: "When you spend two hours driving back and forth with them," McHale said, "you hear about what they want to do with their lives." Crouter adds: "I get a lot of questions, and I'm sure Susan does too, about what it's like to combine a career with a family. Students ask me about my kids, where I was in my career when I had them, what kind of obstacles I ran into. It's all very informal, in the car, and I think they find that sort of thing valuable."

"And it's not just faculty contact," Crouter adds.

"When we ask students what they've gotten out of the project, a lot of them mention the contact with grad students. They're able to ask graduate students about the career decisions they've made, when's the best time to go to graduate school, and so on."

The result of the experience often is that students finish the course and immediately sign up for independent study credits, in order to continue with the project the following semester. Crouter and McHale also see students beginning to talk about graduate school and taking courses (such as upper-level statistics) that they might not otherwise have chosen.

"To me, research was always bland and boring, stiff people in laboratory coats," Lisa Tretta, a freshman who was invited onto the project in her first semester, said. "This isn't like that at all. It's more interactive."

As for Frank Coyne, he plans to go to graduate school—something he thinks he might not have considered if it hadn't been for the Family Relationships Project. And he's also been passing the word: "I've recommended the project to other friends and they've signed on," he said.

Promotions

Staff

Linda A. Nafe, coordinator, pharmacy inventory at The Hershey Medical Center.

Brenda L. Nauman, staff assistant VI at The Hershey Medical Center.

Jeanne M. Nindl, development assistant in Division of Development and Alumni Relations.

Lori A. Nybeck, outpatient scheduling coordinator at The Hershey Medical Center.

Carol A. Ownbey, staff assistant VI at Penn State Great Valley.

Linda M. Padisak, staff assistant VI in Division of Development and Alumni Relations.

Kimberly L. Pennington, senior cardiovascular center technologist at The Hershey Medical Center.

Suzanne E. Pinkney, LPN/MEDS at The Hershey Medical Center.

Matthew D. Prophet, applications programmer/analyst in Computer and Information Systems-Administrative Systems.

Rosemary T. Pruyn, admissions counselor in Office of Vice Provost and Dean for Enrollment Management and Administration.

John M. Rafacz, writer-editor in College of Arts and Architecture.

Judith A. Raybeck, senior research coordinator in Division of Development and Alumni Relations.

Elizabeth M. Risser, staff assistant VI at The Hershey Medical Center.

Bobbi J. Robison, staff assistant VI in College of Education.

Helen M. Rudolph, accountant aide in Division of Development and Alumni Relations.

Gregory E. Seeger, assistant engineering aide in Applied Research Laboratory.

Kelly A. Shiffer, staff assistant V at The Hershey Medical Center.

Brian E. Siskora, director, WPSX-TV, Continuing and Distance Education.

Carol Spangler, staff assistant VI in Division of Development and Alumni Relations.

Don E. Stewart, supervisor, Computer and Information Systems in College of Engineering.

Lisa D. Stock, staff assistant VII in College of Earth and Mineral Sciences.

Lisa D. Strouse, staff assistant VI in College of Health and Human Development.

Lisa J. Taylor, staff assistant VI at the Penn State DuBois Campus.

Traci A. Wade, staff assistant V in Eberly College of Science.

Jennifer A. Yeagley, staff assistant VI at The Hershey Medical Center.

Martha A. Zimmerman, staff assistant VI in Continuing and Distance Education.

Private Giving

Three named vice chairs of upcoming campaign

Three vice chairs have been named for Penn State's forthcoming capital campaign, President **Graham B. Spanier** announced.

They are business executives **Edward P. Junker III** of Erie, **Robert Klein** of Philadelphia and **William Weiss** of Chicago. All three are University alumni who were active in The Campaign for Penn State, which raised \$352 million for academic programs between 1984 and 1990.

"These three men have led leadership positions in more than a dozen companies and worked in many worthy social causes, giving them a breadth of experience that is crucial to any major fund-raising campaign," Spanier said.

The campaign will aim primarily to raise private funds for scholarships, graduate fellowships, faculty endowments and a variety of academic programs. The campaign's goal will be announced later, according to Spanier.

Under the direction of campaign chair **Edward R. Hinz**, Junker will act as vice chair for trustee gifts, Klein will act as vice chair for college- and campus-specific fund drives and Weiss will act as vice chair for leadership gifts.

Junker, a native of Carnegie, is a 1960 Penn State hotel administration graduate and vice president of the University's Board of Trustees. A member of the banking community in Erie since 1964, he became president and chief executive officer of Marine Bank in Erie in 1983 and has been a PNC Bank Corp. vice chairman since 1985.

He is treasurer of the Erie-Western Pennsylvania Port Authority, a trustee of the Erie Community Foundation, president of the Erie Zoological Society

Edward P. Junker III

and president of the Erie Conference on Community Development.

Junker was a member of the executive committee of The Campaign for Penn State and served on the National Development Council, the University's top fund-raising advisory board. He is former chairman and a member of the Council of Fellows at Penn State Erie, The Behrend College, and an alumni fellow since 1987 of both Behrend and the College of Health and Human Development.

He and his wife, **Barbara**, a 1957 Penn State graduate in physical education, established a scholarship fund at the Behrend College in 1987, and have supported The Bryce Jordan Center and University athletics with other gifts. He is also a past president of the Pennsylvania Bankers Association and a past national vice president of the Muscular Dystrophy Association.

Klein is a 1948 Penn State commerce and finance graduate and a past president of the Penn State Alumni Association. Following college and service in the U.S. Marine Corps during World War II, the Philadelphia native began his career as an industrial engineer at his family's business, Caloric Corp., at Topton, Pa.

He advanced to the position of president, chairman and chief executive officer before leaving Caloric in 1969 to work with the Alliance Well Corp. in a variety of domestic and overseas settings. In 1985, having risen to chairman and CEO of Alliance Wall, he sold the firm but continued to serve as general manager before heading up the 3 Springs Water Co. in Laurel Run, Pa.

Klein and his wife, **Judith**, a 1947 Penn State graduate in psychology, served on the national com-

Robert Klein

mittee of The Campaign for Penn State and co-chaired the regional efforts in eastern Pennsylvania and southern New Jersey. In 1986, the couple endowed the Robert and Judith Klein Professorship of Management in The Smell College of Business Administration.

Klein recently served on the committee to raise funds for The Bryce Jordan Center. He is a 1994 winner of the Penn State Distinguished Alumni Award and was named an Alumni Fellow in 1981.

Weiss was born in Big Run, Pa., and is a 1951 Penn State graduate in industrial engineering. After service in the U.S. Air Force, he joined the Bell Telephone Co. of Pa. in 1953 and rose to the level of vice president in 1973. He also held executive positions with Wisconsin Bell and Indiana Bell before becoming chairman of Illinois Bell in 1982.

When the Ameritech Corp. was formed in 1984, he served as its chairman and chief executive officer until retiring in 1994. He remains on the board of directors of Abbott Laboratories, Merrill Lynch, Tenneco and the Quaker Oats Co. In recognition of his work with the company, the Ameritech Foundation in 1993 created the William L. Weiss Chair in Information and Communications Technology in the College of Engineering.

The Weisses have supported a number of faculty endowments in the Colleges of Engineering and the Liberal Arts, most recently the Josephine Berry Weiss Chair in the Humanities.

Weiss also serves as a Penn State trustee, and was vice chairman of the National Development Council and a member of the executive committee for The Campaign for Penn State.

William Weiss

Penn College receives \$100,000 from the Caterpillar Foundation

Pennsylvania College of Technology has received \$100,000 through the Caterpillar Excellence Fund, a partnership between the Caterpillar Foundation, participating dealers and schools. There are only three other regional partnerships in the country which were funded at this maximum amount.

The Caterpillar Foundation contributed \$50,000 and three dealers collectively matched the amount. The participating dealers are Cleveland Brothers Equipment Co. Inc., with company headquarters in Harrisburg; Giles & Ransome, based in Bensalem, and Alban Tractor Co. Inc., in Sterling, Va. The Penn College initiative will be targeted over the five-state area covered by the Caterpillar dealers, including Pennsylvania, Maryland, Virginia, Delaware and New Jersey.

The primary objective of the Caterpillar Excellence Fund is to increase the pool of qualified service technicians to meet foreseeable product support needs. Additionally, the money will benefit students, faculty and equipment acquisitions in Penn College's heavy construction equipment and diesel technology programs.

Penn College has previously received Caterpillar Dealer Excellence Funds from Caterpillar Inc. and Cleveland Brothers Equipment Co. Inc.

Endowment supports self-defense course

A \$100,000 endowment from Carl P. and Mary Ann Giardini of Houston, Texas, is supporting a new, free self-defense and assertiveness course for women students and other educational programming of the Center for Women Studies.

The Alyson Giardini Endowment for the Empowerment of Women Studies recognizes the couple's three daughters and, more specifically, their daughter Alyson's commitment to women's social issues. Alyson is a 1993 graduate of Stanford University with a bachelor's degree in human biology and a master's degree in anthropology. She has been active in teaching self-defense for eight years to women of all ages and will be attending the New College of California in 1997 as a master's candidate in feminist counseling psychology.

A native of Bradford, Giardini is executive vice president for exploration and production with the Marathon Oil Co. He earned his bachelor of science degree in petroleum and natural gas engineering from Penn State in 1957, joined Marathon that same year, and has worked for the company

in various U.S. and international locations. He is an Alumni Fellow of the College of Earth and Mineral Sciences, a member of the Society of Petroleum Engineers and a director of the American Petroleum Institute and of Marathon Oil Co.

At the University Park Campus, the first free self-defense course made possible by the Giardini endowment was conducted in October. It addressed such topics as assertiveness traits and how they apply to self-defense in any setting; factors that increase the chance of attack and how to recognize them; and realistic, usable fighting skills.

The course is intended as a basic introduction to these topics and is open to all women. Information on future courses, expected to be offered every semester, can be found in 102 Boucke Building, or by calling (814) 863-2027.

The center also provides educational programming on women's issues. In 1995-96, the center was involved in 134 programs attended by 9,588 students, faculty/staff members, and other interested individuals.

Fall 1996 commencement dates and locations announced

The University will hold its fall 1996 commencement ceremonies for approximately 3,400 associate, undergraduate and graduate degree students on Sunday, Dec. 15, at the University Park Campus.

The undergraduate and associate degree ceremony will be held at 1 p.m. in The Bryce Jordan Center, and the Graduate School ceremony will be held at 4 p.m. in Eisenhower Auditorium. As of mid-November, the number of students scheduled to receive degrees at the two University Park ceremonies is 3,491. That figure includes 348 associate, 2,451 baccalaureate, 494 master's and 198 doctoral degree students.

In addition to the degrees earned at University Park, 94 baccalaureate degrees and nine master's degrees were earned at Penn State Erie, The Behrend College, and 254 baccalaureate degrees, 65 master's degrees and one doctoral degree were earned at Penn State Harrisburg.

President **Graham B. Spanier** will confer degrees at both the baccalaureate and associate degree program and the Graduate School program. **John A.**

Brigitte, executive vice president and provost, will preside at the 1 p.m. undergraduate and associate degree ceremony, and **Rodney Erickson**, dean of the Graduate School, will preside at the 4 p.m. Graduate School ceremony.

U.S. Rep. **Robert S. Walker**, R-16th District, Pa., chairman of the House Committee on Science, will speak at the undergraduate and associate degree ceremony, and **Anne C. Petersen**, senior vice president for programs at the Kellogg Foundation, Battle Creek, Mich., and former dean of Penn State's College of Health and Human Development, will speak at the Graduate School ceremony.

Walker, who has served in Congress since 1977, has been a strong advocate of basic research. He is vice chair of the House Committee on Budget, chair of the Republican leadership group and a member of the Republican Steering Committee.

Raised and educated in Millersville, Walker has a B.S. degree in education from Millersville University and a master's degree in political sci-

ence from the University of Delaware. Walker's district includes Lancaster and Chester counties; he is retiring at the end of his current two-year term.

Petersen provides overall leadership for programming at the W. K. Kellogg Foundation, a private grantmaking foundation established in 1930 to "help people help themselves." Its current priorities include higher education, youth, leadership, volunteerism and community-based, problem-focused health services. Previously, she was deputy director of the National Science Foundation, Washington, D.C., and vice president for research and dean of the graduate school at the University of Minnesota, Minneapolis/St. Paul.

Petersen, who has an international reputation for her research into adolescence, was at Penn State for 10 years. She served as dean of the College of Health and Human Development from 1987 to 1992, before that she was head of the Department of Individual and Family Studies (now Human Development and Family Studies).

Search under way to find new director of financial management

Raymond D. Nargi, director of financial management/associate treasurer, has accepted the position of assistant to the senior vice president for finance and business. A search for a director of financial management will begin immediately under the leadership of **Daniel W. Sieminski**, director of finance and business. Committee members include: **Joseph T. Donceez**, financial/administrative services coordinator, **Edward E. Washell**, financial analyst, **Gail A. Hurley**, administrative fellow, **Janeen M. Grasser**, financial officer, **James A. Rhodes**, director of development, and **Todd Hershbine**, employment/classification specialist as staff support.

The position has responsibility for all treasury functions, including banking, cash planning and debt financing; and also is responsible for supervising the investment of endowed and non-endowed funds; selection of investment managers and monitoring of their performance; determination of asset allocation and mix for mid- and long-term investments; analysis of investment strategies; development of reports for the University's Investment Committee and the Board of Trustees; and administration of consultants. The position serves as the principal interface with University development representatives in matters concerning special gifts from alumni and friends of the University.

A bachelor's degree (or equivalent experience) in investments, finance, or related field, plus more than 10 years of directly related experience is required. A master's degree is preferred. The successful candidate must have superb communications skills, demonstrate excellent administrative ability, be an innovative problem solver, and adept at managing a multiple-tasking environment. Resumes will be reviewed beginning Dec. 9 until an appropriate candidate is identified. Interested candidates should send a resume and a cover letter to: Employment and Compensation, Box JTH, 120 South Burrows Street, University Park, Pa. 16801.

Obituaries

Professor emeritus was 86

Theodore S. Spicer, 86, of Punta Gorda, Fla., a Penn State professor emeritus of fuel science for 31 years, died Nov. 1 at his home.

Spicer received a bachelor of science degree in fuel technology from Penn State in 1934 and was the first student in the country to graduate in that curriculum. He worked first for the Pittsburgh Coal Co., then Link-Belt Co. in Chicago, before returning to Penn State to teach. He was a registered professional engineer since 1945 and fuels consultant and held several patents on stokers and coal burners. He retired from the University in 1970 with emeritus status.

He was a member of the American Institute of Mining, Metallurgical and Petroleum Engineers; the American Society of Mechanical Engineers; the National Society of Professional Engineers; the American Society for Testing Materials; and Sigma Xi. He was the author of numerous publications and for 17 years served as associate editor of *Coal Utilization and Mechanization*, two magazines published in Washington, D.C. He was cited in *Who's Who in Engineering*, *Who's Who in the East*, *American Men of Science* and *Who's Who in Education*.

He is survived by his wife of 60 years, **Frances**, and their daughter, **Jean Spicer White**. **Robert H. Akers**, area regional office supervisor in the Central Milk Testing Laboratory, College of Agricultural Sciences, from Dec. 9, 1957, until his retirement Oct. 1, 1991; died Oct. 14.

Deaths elsewhere

Margaret H. Buyers, assistant University editor in the Department of Publications, from Sept. 1, 1939, until her retirement July 1, 1966; died Oct. 12. She was 89.

Harold C. Clark, janitorial worker/group leader, Utilities, in the Office of the Physical Plant, from Aug. 5, 1968, until his retirement Oct. 30, 1991; died Oct. 27. He was 66.

Marian N. Fohringer, residence hall worker in Housing and Food Services, from Sept. 6, 1966, until her retirement Jan. 9, 1981; died Oct. 26 at the age of 78.

Gerald F. Hall, an instructor in the Department of Aerospace Engineering in the 1960s, died Oct. 20 at the age of 59. In 1980, he became assistant professor of aerospace engineering at Texas A&M University, and since 1984, was employed as associate professor of aerospace engineering at the United States Naval Academy.

He received his bachelor of science degree in aeronautical engineering in 1960, his master of science degree in 1965, and his doctor of philosophy degree in 1974, all from Penn State.

Earl G. Johnston, record supervisor, DHIA, in the College of Agricultural Sciences, from June 1, 1948, until his retirement Oct. 1, 1981; died Oct. 19 at the age of 78.

G. Dwayne Kidwell, materials processing engineer at the Applied Research Laboratory, from Feb. 15, 1984, until his death Oct. 30; he was 59.

Katherine H. Lauck, senior registration clerk in the Registrar's Office, from March 16, 1952, until her retirement Feb. 1, 1971; died Nov. 4. She was 85.

Marie C. Smith, staff nurse at The Hershey Medical Center, from June 29, 1991, until her death Sept. 27. She was 46.

Ray M. Smith, associate professor of engineering research in the Applied Research Laboratory, from Dec. 1, 1945, until his retirement Jan. 1, 1977; died Oct. 22 at the age of 80. Smith, who earned a bachelor of science degree in electrical engineering from the University of Kansas, was a volunteer for the Special Olympics, the American Red Cross, the Schlow Library and the Fred Waring Association.

Henry T. Sturcken, professor of romance languages in the College of the Liberal Arts, from Sept. 1, 1955, until his retirement June 30, 1986; died Nov. 14. He was 68.

Dorothy E. Whippo, residence hall worker in Housing and Food Services, from Oct. 16, 1960, until her retirement Sept. 11, 1973; died Nov. 18. She was 82.

Appointments

Health and Human Development names new external relations staff

Jean Erstling is the new coordinator of external relations for the College of Health and Human Development, where she will be responsible for communication and marketing efforts, including the publication of *Health & Human Development News* and the college's research magazine.

Stephanie Motschenbacher has been named assistant coordinator of external relations. She will assist in the development and implementation of external relations plans and will create marketing and promotional materials for the college.

Before joining the staff of the college, Erstling was development director for the Easter Seal Society of Central Pennsylvania, a position she held since 1992. At Easter Seals she was responsible for direct mail and special events fund-raising, as well as media and donor relations.

Jean Erstling

Stephanie Motschenbacher

tion and scheduling and for station promotion. She also coordinated on-air membership campaigns.

Erstling has a bachelor's degree in English and dramatic literature from the University of Western Ontario and has done graduate work in speech communication at Penn State.

Motschenbacher comes to the college from Juniata College in Huntingdon, where she served as associate director, marketing and external relations, since January 1995. She was responsible for strategic communications activities to support enrollment, alumni relations, development, athletics, international relations and the office of the president.

Before working at Juniata College, Motschenbacher was associate director, communications, for the Capital Area United Way in Lansing, Mich. From 1985 to 1993, she was graphic specialist with the Service Parts Operation Division of General Motors in Flint, Mich. As project manager for the corporate computer graphic system, she managed activities and system design with multiple GM divisions and Electronic Data Systems team leaders.

Motschenbacher graduated from the Michigan State University with a B.A. in graphic design and an M.A. in public relations.

Hazleton Campus welcomes new financial aid coordinator

A new financial aid coordinator joined the Penn State Hazleton Campus.

Mary C. Kosin has been named to the post. In that position, she is responsible for providing information and counsel about financial aid to students and their families. More than 75 percent of students who attend Penn State Hazleton receive some form of financial aid.

Kosin is a graduate of King's College, Wilkes-Barre, with a B.S. degree in accounting. Before joining Penn State Hazleton she had been a financial aid counselor at King's College, with responsibilities that included contacts with lending institutions, financial aid seminars and training for support staff in the Office of Financial Aid, and working with students and their families to provide financial aid information and assistance in application procedures.

Development and Alumni Relations appoints associate vice president

Peter Weiler has been appointed associate vice president for development and alumni relations. He held the position on an interim basis for more than five months. The Office of Development and Alumni Relations last year helped obtain a record \$82.3 million in private gift support.

In this role, Weiler will supervise managers and development officers responsible for the core functions of planned giving, annual giving, corporate and foundation relations and regional programs, as well as program support activity in information systems, administrative services and constituent relations.

He also will be responsible for college and campus development activity through the executive director for university development and the director for university development. The director of development for The Hershey Medical Center will continue to report to the position of associate vice president for development and alumni relations.

Since October 1989, Weiler has been a member of the senior management team within the division, serving for seven years as assistant vice president and executive director of the Alumni Association.

A Vermont native, Weiler received his bachelor's degree in psychology in 1977 and master's degree in higher education administration in 1979 from the University of Vermont.

Since 1979, Weiler has devoted his career to higher education administration. From 1979 through 1986, he served in several capacities at UCLA in the Dean of Students' Office, including that of associate dean of students. From 1987 to 1989, he served his alma mater by establishing a major gifts program and serving as alumni director during Vermont's first capital campaign.

Since coming to Penn State, Weiler has been active in leadership positions with CASE, and has served as a consultant to several universities in the area of institutional advancement. He has been active on the local level and currently serves on several boards.

Peter Weiler

H&HD honors two as distinguished professors

The College of Health and Human Development recently honored two of its faculty members with the title of distinguished professor. Jay Belsky, an expert on child development and family relationships, has been named distinguished professor of human development. Penny Kris-Etherton, an international authority on human nutrition, has been named distinguished professor of nutrition.

The title of distinguished professor, established by the Office of the President, recognizes a select group of professors with exceptional accomplishments in teaching, research and service.

Belsky joined the Penn State faculty in 1978 after receiving a doctorate in human development and family studies from Cornell University. He is an eminent scholar in the fields of developmental psychology and family studies. Belsky's research focuses on the ecology of early child development.

He has been honored with several awards. His early achievements resulted in the Boyd McCandless Award for Distinguished Early Career Contribution from the American Psychological Association and a Research Scientist Development Award from the National Institute of Mental Health. In addition, he has received an Outstanding Research Achievement Award from the College of Health and Human Development, and a Faculty Scholar Medal for Outstanding Achievement in the social and behavioral sciences.

Since joining the faculty in 1979, Kris-Etherton has developed an innovative research program focusing on the relationship between dietary habits and cardiovascular disease. Because her research considers both the chemical/biological and behavioral aspects of nutrition, it has important implications on the dietary recommendations for humans.

Kris-Etherton is a renowned clinical investigator in the area of dietary lipids and their effects on risk factors for cardiovascular disease. She has been invited to serve on several national advisory committees.

Recently, she accepted an invitation to serve as a member of the Nutrition Study Section, Division of Research Grants for the National Institutes of Health. In addition, she was appointed to serve on the Nutrition Committee of the American Heart Association.

Kris-Etherton has received the Golden Key Award for superior teaching, advising and service to students, was awarded the Evan Pattishall Outstanding Research Achievement Award from the College of Health and Human Development, and has twice received an outstanding service award from the American Dietetic Association.

Jay Belsky

Penny Kris-Etherton

Awards

Dietetic association awards highest honor to associate professor

Sara Clemen Parks, associate professor of hotel, restaurant and recreation management, and associate dean for outreach and international programs for the College of Health and Human Development, has been awarded the Marjorie Hulsizer Copher award by The American Dietetic Association (ADA).

The Copher award is the highest honor given by the ADA. It recognizes a preeminent member who has given years of expertise to the field of dietetics and time and energy to the ADA. The association especially recognizes Parks' "dedication and vision that have helped advance the dietetics profession into the future," and her "outstanding reputation as a mentor and champion of lifelong learning."

Parks, a national leader in dietetics, is a past president of ADA, as well as past president of the American Dietetic Association Foundation, an arm of the association promoting nutrition education to the public. She also has served as president of the foundation's board of directors and as secretary-treasurer of the ADA. A Penn State faculty member since 1971, Parks teaches undergraduate and graduate courses focusing on marketing and strategic planning within the hotel, restaurant and dietetic fields.

Sara Clemen Parks

DuBois Campus names Penn Stater of Quarter

Sherron McGowan, instructor in health education and program coordinator for the physical therapist assistance program at the Penn State DuBois campus, has been named Penn Stater of the Quarter.

The award recognizes, on a quarterly basis, a member of the DuBois Campus family who has rendered particularly noteworthy service to the campus and/or the community.

McGowan was chosen for her work as the leader of the successful physical therapist assistance program and for preparing and conducting the recent accreditation visit by the Commission on Accreditation in Physical Therapy Education of the American Physical Therapy Association, which resulted in the DuBois program being fully accredited.

PENNTAP wins national project of the year award

The University's Pennsylvania Technical Assistance Program (PENNTAP) has received national recognition for its work with Electri-Cord Manufacturing Co. The Outstanding Project of the Year award, presented by the National Association of Management and Technical Assistance Centers, was given to PENNTAP for the valuable assistance it offered to the Westfield, Pa.-manufacturer of power cords in solving a problem that resulted in potential savings of \$780,000.

PENNTAP is directed by Jack Gido. Sal Marisco, an instructor in engineering at the Penn State Wilkes-Barre Campus, and Hal Willis, PENNTAP technical librarian, were instrumental in the project.

McKeesport Campus CEO honored

JoAnne E. Burley, Penn State McKeesport campus executive officer, has been named the first Cecile M. Springer Womanpower Award recipient. The award recognizes an African American woman who demonstrates leadership and social concern.

Cecile M. Springer is known for her trailblazing leadership role in a major Pittsburgh corporation and is trustee emerita of Penn State. She is president of Springer Associates, a consulting firm which provides comprehensive strategic planning services to corporate and nonprofit organizations.

Burley holds a bachelor of science degree in elementary education from Penn State, a master's degree in education from Fairfield University and a doctor of philosophy in language communica-

JoAnne E. Burley

tions from the University of Pittsburgh.

Her research has focused on adult literacy and she heads the Pennsylvania Literacy Corps project at Penn State McKeesport, where college credit is given to students who perform community service as tutors of adults seeking literacy training. Burley trains the student tutors.

Before her appointment as Penn State McKeesport CEO in 1992, she served as assistant vice president for academic affairs and special programs at Chatham College. She is credited with developing the

Chatham College Adult Literacy Program.

Burley has authored many publications and serves on several boards of directors in the Greater Pittsburgh area.

Beaver associate professor earns excellence award

Emma S. Rocco, associate professor of music at the Penn State Beaver Campus, is the recipient of the Beaver Campus Advisory Board's 1996 Award for Excellence in Research. The award is presented annually by the advisory board, which solicits recommendations from Beaver Campus faculty and students.

Rocco, who began teaching at the Beaver Campus in 1967, is a summa cum laude graduate of Duquesne University, where she received a bachelor of science degree in music education and piano performance. She also received a master of fine arts degree in theory and composition from Duquesne University's School of Music, where she was an assistant professor of piano, theory and musicology, and directed several vocal music ensembles. She earned her doctorate in ethnomusicology from the University of Pittsburgh.

In 1990 she wrote a book, *Italian Wind Bands: A*

Emma S. Rocco

Surviving Tradition in the Milltowns of Pennsylvania, which was included in New York's Garland Publishing Company's series *European Immigrants and American Society: A 28-Volume Collection of Studies and Dissertations*.

Rocco has been the recipient of many awards and honors throughout her teaching and performing career, and in 1987 the first endowed scholarship in the history of the Beaver Campus was established in honor of Rocco and her frequent collaborator in campus community theatrical and musical productions, Harvey R. Kelly Jr., assistant professor of speech communication at the campus.

In 1990, Rocco was among the first five inductees of the Beaver Valley Musicians' Hall of Fame, and in 1992, received the Outstanding Teaching Award given by the College of Arts and Architecture.

Assistant professor earns general aviation award

Hubert C. "Skip" Smith, assistant professor of aerospace engineering, is the recipient of the 1996 American Institute of Aeronautics and Astronautics Piper General Aviation Award. The award is presented for outstanding contributions leading to the advancement of general aviation. William T. Piper Sr. made the name "Piper" synonymous with general aviation, and it is in his honor that the Piper General Aviation Award was established.

Smith serves as the director of undergraduate studies in aerospace engineering. He holds bachelor's and master's degrees in aeronautical engineering from Penn State, as well as a Ph.D. from the University of Virginia and a bachelor's degree from Gettysburg College. A pilot since 1952, Smith holds a commercial certificate, instrument rating and flight and ground instructor certificates.

Hubert C. "Skip" Smith

As a faculty member at Penn State since 1968, Smith formulated the course "Aerospace 200, Principles of Aviation," which he taught for a number of years, as well as other aviation ground school courses. In addition, he developed a series of illustrated lectures on aerodynamics and how they impact safety. These lectures have been presented at FAA safety seminars and have served as the basis for his book, *Illustrated Guide to Aerodynamics*. Smith wrote another text, *Introduction to Aircraft Flight Test Engineering*, which has been used by a number of universities for flight laboratory courses.

The American Institute of Aeronautics and Astronautics is the largest professional technical society, principal voice and information resource devoted to the progress of engineering and science in aviation and space.

Scientists discover how molecules turn on genes

By BARBARA K. KENNEDY
Eberly College of Science

Scientists have discovered some of the techniques cells use to control their genes, including processes important in leukemia and other cancers. The research demonstrates, for the first time, that high-powered, promiscuous proteins roam throughout a cell's nucleus. These proteins temporarily join with other molecules to find and turn on specific genes by permanently untangling the tightly knotted structures that prevent them from functioning.

This research concerns a central process in gene regulation — how energy-driven teams of molecules function as chromosome-remodeling machines that unlock the cell's genetic codes," **Jerry L. Workman**, associate professor of molecular and cell biology and the leader of the research group at the University, said.

A chromosome, the gene-containing structure in a cell's nucleus, is one long, rope-like molecule of DNA tangled up with proteins and intricately knotted, twisted and looped into a densely packed structure. Genes are sections of DNA that contain a cell's genetic codes. "All cells contain the same genes but each cell turns on only the particular genes it needs," Workman said.

A gene "turns on" when a transcription enzyme attaches to it and copies its genetic

code, which it then uses to make the cell's proteins and other molecules. The chromosome's dense packaging effectively locks up all the genes by tying them into knots, leaving no place for the transcription enzyme to attach.

The research reveals that a high-powered protein complex apparently untangles a knotted-up gene while other molecules called transcription activators slip in and securely attach themselves to a binding site on the gene. The combination of the temporary disruption caused by the powerful protein complex and the binding action of the transcription activator results in the permanent smoothing out of the previously knotted gene, clearing enough space for the transcription enzyme to attach.

Workman said his research also provides an alternative to the long-standing theory that genes can be turned on only as chromosomes duplicate prior to cell division, when they get pulled apart and their DNA knots untangle briefly. "This study shows that a cell can turn on the genes it needs even after they have been tightly knotted up inside chromosomes," he said.

Authors of this research include **Thomas A. Owen-Hughes**, postdoctoral fellow; **Rhea T. Utley**, graduate student; **Jacques Cote**, postdoctoral fellow; **Craig L. Peterson**, University of Massachusetts associate professor of biochemistry; and Workman. Peterson and Workman are Leukemia Society Scholars.

Jerry L. Workman, associate professor of molecular and cell biology, seated, goes over data from research into the central process in gene regulation.

Altering runoff patterns of major waterways could impact ocean circulation

Human alteration of major waterways may cause more problems than drought downstream, according to a geologist who is studying circulation models of the ancient oceans.

"We have already seen some of the consequences of changing surface waterways," **Karen L. Bice**, graduate student in geosciences, said. "The Colorado River barely flows to the ocean and the Aral Sea is drying up. We do have the capacity to alter the amounts of freshwater that run off into the oceans and that could alter ocean circulation patterns."

Bice, **Eric J. Barron**, professor of geosciences and director of Penn State's Earth System Science Center, and **William H. Peterson**, Earth System Science Center, are using a supercomputer-based model to look at the effects of continental runoff on ocean circulation patterns in the early Eocene, about 55 million years ago when the Earth was substantially warmer than it is now.

The reason continental runoff can change ocean circulation patterns is that the fresh water running out of continental rivers decreases the salinity of the oceans' surface. Natural evaporation tends to increase the salinity of the surface water. Circulation in the oceans can be caused by colder water sinking below warmer water or saltier, denser water sinking below less salty water. If runoff stops, new salty areas could form to produce new deep water formation sites.

Photo: Greg Grieco

ARL selected for national gear research program

Penn State's National Center for Advanced Drivetrain Technologies has been selected by the Gear Research Institute (GRI) to conduct the institute's program of research and training for the next three years.

GRI selected the Drivetrain Center, a unit of the Applied Research Laboratory, in an informal national competition after the institute's previous base of operations, at Northwestern's Basic Industries Research Laboratory, underwent restructuring. **Suren B. Rao**, director of the Drivetrain Center, will head GRI's Penn State-based activities, which will be known as the Gear Research Group.

GRI will support the Gear Research Group's programs of training and research on gear design, gear materials, gear processing and standards for gear testing. At the conclusion of the three-year period, GRI and the Drivetrain Center will review an option to merge.

The Gear Research Institute is an organization of the American Society of Mechanical Engineers and the American Gear Manufacturers Association. The sponsorship and membership of the GRI is made up of about 40 to 50 aerospace, vehicle and transmission manufacturers, including major corporations such as Boeing, Allied Signal, Ford, Chrysler and GM. Penn State's Drivetrain Center is sponsored primarily by the U.S. Navy Manufacturing Science and Technology Program. Its mission is to support the Navy and the Department of Defense by strengthening, revitalizing and enhancing the technological capabilities of the domestic gear and transmission industry.

Nominations due Jan. 10

Nominations for the 1997 Faculty and Staff Achievement Awards will be accepted until Jan. 10. (For a full listing of the awards, please see page 8 of the Nov. 21 issue of *Intercom*.) Nominations are encouraged from the University and local community organizations and individuals.

A general committee, chaired by Billie S. Willis, has been appointed to review nominations. Five subcommittees will screen nominations and develop recommendations for the respective awards. For a listing of committee members, please log-in to the Office of Human Resources Web site at URL: <http://www.ohr.psu.edu>.

Nominators should contact the Office of Human Resources at (814) 863-6188 to request a copy of a standardized nomination form. Send nominations to Billie S. Willis, Box 6, Rider Building.

Scientist discover smallest frog

This tiny Cuban frog is sitting on a Cuban 10-cent coin (about the size of a U.S. nickel) and is the smallest frog in the Northern Hemisphere. The orange and black-striped creature, about one centimeter long, was recently discovered by a team of biologists from Cuba and Penn State that included S. Blair Hedges, professor of biology in the Eberly College of Science. Hedges and Cuban scientist Alberto R. Estrada say the frog is in the genus *Eleutherodactylus* which in print is more than three times as long as the frog itself. This newly found frog is tied for the world record with the smallest frog in the Southern Hemisphere.

Videoconferencing session on Dec. 16 will connect campuses for discussion of University's strategic plans

Members of the University Planning Council will be available through the PictureTel videoconferencing system to discuss the five-year strategic planning process with faculty and staff at the Commonwealth Campuses.

The PictureTel session, scheduled for 8 to 9:30 a.m. Monday, Dec. 16, will include UPC members William Asbury, Karen Sandler and Scott Kretzmar. This session is in addition to dozens of open meetings members of the UPC have been conducting at University Park and other campuses during recent weeks. The council consists of faculty, staff, students and deans and is chaired by John A. Brighton, executive vice president and provost.

Council members will brief videoconference partici-

pants on the activities of the UPC during the past year, including current issues the group is considering. They will answer questions about the strategic planning process and are interested in hearing comments and suggestions from faculty and staff.

Campuses planning to take part in this videoconferencing session include Abington-Ogontz, Beaver, Delaware, DuBois, Fayette, Hazleton, McKeesport, Mont Alto, New Kensington, Schuylkill, Shenango, Wilkes-Barre, Worthington Scranton and York.

The council continues to accept comments and suggestions about the strategic planning process through e-mail, at Response@PSU.EDU.

Cooperative Extension, C&DE continue move toward restructuring

By LISA M. ROSELLINI
Public Information

While most of us were hurrying to finish year-end business in December, groundwork continued to be quietly laid for profound changes to one of

the University's most enduring ventures.

For the past six months, University administrators have logged more than 100 hours of meetings with both internal and external groups to design a better system for delivering research

findings, educating Pennsylvanians and aiding the state's residents and its economy. Since the announcement last August that Cooperative Extension will be enhanced as part of a major University-wide effort to

See "Restructuring" on page 3

University joins national fight against illiteracy

President Graham B. Spanier and 19 other college presidents across the country have pledged their support for "America Reads," President Clinton's campaign against illiteracy.

As part of the anti-illiteracy program, the 20 college and university presidents have agreed to dedicate half their new federally funded work-study slots to students who will work as reading tutors for young children. The program's overall goal is to enlist a million volunteer tutors to teach students to read.

Spanier said he was pleased the White House approached Penn State about supporting the campaign.

"Penn State's great advantage in mobilizing students to tutor children in reading is our system of 23 locations, which allows us to reach into virtually every corner of the state," Spanier said. "We will do as much as we can to make the program work, by allocating the work-study funds throughout the Penn State system and by giving some greater emphasis to our campuses near the state's major metropolitan areas."

The program is funded by entirely new funds that will come to Penn State from the federal government. In addition, the normal matching requirement has been waived for this program," he said. "Under these circumstances, this is a great opportunity for Penn State."

In October, Clinton said he hoped that up to half of the \$213 million increase in work-study funds appropriated by Congress for fiscal year 1997 would support the literacy program. Last month, in one of his

Things are really cooking now

By ANDREA HURLEY
Special to Intercom

At 4:30 a.m. in the early morning darkness, while the University is quiet and still, Heather Hobert, assistant pastry chef at the Penn State Bakery on Bigler Road on the University Park Campus, begins her day. Joined by bakery manager Reed Stouffer at 5:30 a.m. and pastry chef Lee Ann Lambert at 8 a.m., the three begin the ominous task of providing fresh bakery products to a campus the size of a small city.

The bakery's 15 full-time employees are gearing up for the return this week of students from semester break. The ovens are roaring, mixers are whirling, pie crust is being kneaded and cookies are baking. In addition to the ever-popular chocolate chip cookie, the bakery also makes almond, Heath bar, sugar, M&M, oatmeal raisin, macaroon, snickerdoodle, peanut butter and chocolate peanut butter chip, to name a few. Each year the University consumes nearly 90,000 dozen cookies of various sizes and flavors. But cookies are just the icing on the cake, so to speak.

The bakery also produces bread, rolls, croissants, cakes, doughnuts, cheesecakes, rice krispie treats and chocolate mountains... that's right, chocolate mountains. Fall semester proved to be a challenge for Lambert when she was

Letting them eat cake

Helen Rusnak (left) and Vicki Weston, bakery assistants, share a laugh as they work assembling orange mousse cake and chocolate crumb crust for hundreds of hungry students.

Photo: Andrea Hurley

asked to produce a chocolate mountain for the dining hall's chocolate week. Not only did she design and produce the mountain, but a local railroad club ran a train through it, proving that there is nothing you can't do with chocolate.

It may come as no surprise, but according to Stouffer, football season is his most difficult time of year. Along with thousands of hungry students heading for the dining halls, the crowd in Beaver Stadium manages to consume a lion's share of bakery products as well. Stouffer said that student

GLAD you asked

Welcome to the first column of "Glad You Asked"—a place where *Intercom* readers can ask a variety of questions and receive answers from those in charge. In November, we asked for your most pressing questions and received a lukewarm response. We hope the number of questions will grow over the coming months and that this column will become one of *Intercom's* most popular sections. After receiving your questions via e-mail, the *Intercom* staff directed them to the proper sources for quick and accurate responses.

If you have a question, don't be shy. Simply e-mail it to ask@psu.edu and we'll work to get you an answer.

Q. Why doesn't the *Intercom* encourage and print contributions by faculty and staff about internal University controversies and issues? The *Centre Daily Times* often prints such contributions.

—T.B.
University Park

A. T.B., I'm glad you asked. It just so happens that the *Intercom* is working in this direction. Coming this semester, the *Intercom* plans to launch an online Web version of a "Letters to the Editor" section, in which faculty and staff views can be read at its Web site. A hot "button" at the site will allow readers to submit their opinions. Since we have only one person to maintain our Web site every week, the timeframe for this project is not firm, but we hope that by the end of February you can begin reading some lively discourse, courtesy of the *Intercom*. In addition, plans for a letters column in the regular paper version of *Intercom* are also being mapped out. We look forward to hearing from you again!

—Lisa M. Rosellini
Editor

Q. Why doesn't Penn State offer benefits to same-sex partners of faculty/staff?

—D.S.
University Park

A. The Office of Human Resources has continued to examine the University's employee benefits programs, including the extension of health care benefits to same-sex domestic partners. Benefit program changes occur for a number of reasons, such as modification that would benefit many faculty and staff, change that would support new medical technology and procedures and, to some extent, change needed to support the budget.

At this point, the University hasn't determined a need for change as it relates to benefits for same-sex domestic partners. However, the OHR is working with a representative from the Commission on Lesbian, Gay and Bisexual Equity to identify other ways that such support may be made available.

—Billie S. Willis
assistant vice president for Human Resources

ask@psu.edu •

That's a lot of dough!

Kris Patterson "gets into his work" kneading pie crust. One tray of dough will yield 160 crusts — enough for 80 pies.

PENN STATE BAKERY TIDBITS

- Did you know that in one year the Penn State Bakery uses:
2,250 pounds of chocolate chips
170,800 pounds of flour
15,000 pounds of liquid eggs
36,000 raw whole eggs
1,470 pounds of peanut butter

- The bakery's most unusual product request:
A chocolate mountain
- The bakery's most demanding and challenging task:
Dessert for the re-opening of the Palmer Museum: 300 vertical desserts with an architectural motif.
- The bakery's signature item:
The chocolate-dipped cookie-on-a-stick.

Source: Penn State Bakery Manager Reed Stouffer

Obituaries

Marietta L. Criseman, administrative aide in the College of Engineering, from July 1, 1969, until her retirement June 30, 1983; died Nov. 27 at the age of 76. She was a 1937 graduate of Bellefonte High School and a member of the First Presbyterian Church in Bellefonte and on the church's board of trustees.

Martha G. Files, who worked at the Creamery and later as a clerk at Pattee Library before retiring in 1990 after 24 years of service to the University, died Jan. 1. She was 69 and a 1949 graduate of State College Area High School and a 1953 graduate of Penn State with a bachelor of science degree in nutrition.

Richard H. Korman, carpenter in the Office of the Physical Plant, from Oct. 19, 1981, until his retirement March 9, 1996; died Dec. 4. He was 60.

Jaclynn A. Livella, staff assistant V in the College of Engineering, from Aug. 15, 1984, until her death Nov. 24. She was 41.

Magdalen Mathews Meredith, who worked for Housing and Food Services before retiring in 1968, died Dec. 9 at her residence. She was 82. She was a member of Our Lady of Victory Catholic Church in State College.

Miriam Miller, nutrition adviser in the College of Agricultural Sciences, from March 12, 1973, until her retirement Oct. 1, 1988; died Dec. 2 at the age of 66.

Margaret E. Mills, nutrition aide in the College of Agricultural Sciences, from Feb. 15, 1971, until her retirement July 1, 1986; died Nov. 16. She was 80.

Bakery

continued from page 1

demand takes a nosedive in spring semester, which he attributes to pre-spring break dieting. Cultural events take up the slack and there is no true break in bakery action until May. With warmer weather comes sports camps, Pennsylvania Special Olympics and the Central Pennsylvania Festival of the Arts. These events, combined with demand from the Nittany Lion Inn, The Bryce Jordan Center and The Penn State Scenic, ensure a busy bakery year-round.

The bakery also is part of the educational process for chefs from the Culinary Institute of America in Hyde Park, N.Y. As host to chefs from the institute, the bakery offers a one-week program in skills, theories and goods handling. The chefs leave Penn State with the knowledge of how smoothly a well-organized, high-volume operation can run.

Stouffer and Lambert are quick to credit bakery employees for the success of the day-to-day operation, not to mention its high-quality product. The bakery is part of Housing and Food Services.

"We have a reputation across campus for working hard. Our people are self-motivated, hardworking people who take pride," Lambert said. "Without them, we couldn't do what we do."

"A lot of people don't even realize we are out here," Stouffer added. They both agree that the bakery is as much a service as a business. Because of all the effort that goes into producing these delectable desserts, Lambert feels that the students are the big winners. They can have their cake and eat it too.

Restructuring

continued from page 1

All in a day's work

strengthen its outreach services to the millions of people it serves. University leaders have been working to devise a comprehensive plan to make it happen.

Beginning this year, Penn State's Cooperative Extension will undergo some significant changes. With more than 75 years of outreach experience under its belt, Cooperative Extension will now find itself with a new director, new resources and additional support from throughout the University. Currently an internal search is under way for a director of Cooperative Extension (see box at right).

The changes planned are intended to augment Cooperative Extension's role and join it to other colleges and outreach units of the University so that research and expertise from throughout the University can find their way into the general population and be more easily used. This organizational restructuring which includes a coordination of services with Continuing and Distance Education, as well as other units within the University—should result in several advantages for both Pennsylvanians and Penn State.

"This restructuring will open up new opportunities for faculty members and will provide an expanded vehicle for research dissemination," James Ryan, newly named vice president for Outreach and Cooperative Extension, said. Ryan, whose former title was vice president for Continuing and Distance Education, will help oversee the endeavor along with the dean of the College of Agricultural Sciences. There is currently an external search being conducted to fill the open dean's post.

"For the University, it is a model that will enhance knowledge application, identify new research opportunities, help develop networks for support, enrich teaching, provide opportunities for undergraduates and graduate students, and provide increased visibility for faculty mem-

bers, departments and the University as a whole," Ryan said.

For the Commonwealth, an increased focus on outreach and service will mean that the state's No. 1 industry, agriculture, will remain a priority, and Penn State will continue to support Pennsylvania's many agriculture-related industries—like the multi-billion dollar food industry—through research and education programs. Tapping into other areas of expertise across the University will also mean that Outreach and Cooperative Extension can provide more firms with solutions to complex manufacturing problems and help them to retrain and retain more workers. It will provide better access to emerging technology, and better support youths, family and community development throughout Pennsylvania.

This expanded focus on aiding Pennsylvania and the nation through outreach ventures also means that in an era when the general public and government officials are calling for higher education to help answer society's pressing problems, Penn State will be in the forefront. This commitment to improving the quality of life in the state could translate into increased support from the state and its taxpayers.

"Cooperative Extension is a great success story and a wonderful model for us to build upon," Theodore Alter, interim dean of the College of Agricultural Sciences, said. "This new effort is designed to develop a partnership among Cooperative Extension and Continuing and Distance Education that will allow more faculty and staff to become involved in delivering educational programs and services to the public. Penn State has one of the most successful outreach operations in the country, but we want to be even more responsive to society's needs and have an even greater impact."

Some building blocks of the plan

Need more?

For more information on the changes, background, a Q&A or an update on the plan, get to the Web at URL:
<http://www.cde.psu.edu/Outreach>
or <http://www.cas.psu.edu>.

Internal search for director is under way

Historically, the dean of the College of Agricultural Sciences has directed extension efforts, but the increasing emphasis on service and outreach and the move to encompass more facets of the University means the endeavor requires separate leadership, according to James Ryan, vice president for Outreach and Cooperative Extension. The new director will also serve as an associate dean in the College of Agricultural Sciences.

The search committee, which will be overseen by O. Elwood Hatley, professor of agronomy in the College of Agricultural Sciences, has recently been named and includes these members: Cheryl Achterberg, professor of nutrition, College of Health and Human Development; William Asbury, vice president for student affairs; Craig A. Bernecker, associate professor of architectural engineering, College of Engineering; Patricia A. Book, associate vice president and associate dean, Continuing and Distance Education; Blannie E. Bowen, associate dean for graduate programs; Michael Martin, county extension director, Luzerne County; Robert E. Nicely, associate dean for outreach and faculty development, College of Education; David T. Rynd, acting regional director, Cooperative Extension; Aletha M. Schadler, county extension director, Lebanon County; Elwin L. Stewart, professor and head, Department of Plant Pathology, College of Agricultural Sciences; and Tami Torquato, staff assistant, Cooperative Extension.

Anyone interested in applying for the position, should contact a member of the search committee.

include, not only a new director, but also:

- Greater support, recognition and reward for faculty and staff engaged in outreach;
- Involvement of more academic and administrative units in the outreach mission;
- Development of new partnerships across colleges and campuses with agencies and others outside the state, such as foundations and corporations;
- Creation of councils for Outreach and Cooperative Extension; and
- A title change for the assistant/associate dean for Continuing and Distance Education in each college to reflect the new organizational structure for Outreach and Cooperative Extension.

Ryan admits that much of the foundation for the reorganization that has so far been put into place is not

readily apparent. It's been a lot of what he calls "process."

"We needed to consult with the people involved," he said. "We have talked with clients, faculty and extension staff. We have talked with any stakeholder who had opinions to share. We have gathered dozens and dozens of suggestions; we have benchmarked with other Universities."

While we are trying to learn from others, the size and uniqueness of Penn State means that we must mold something that is developed specifically for us.

"The beauty of this process is that it is being built by the people who are involved and affected," he said. "Naturally there is concern about change. There is always concern about change. People want to know just how they will be affected."

Ryan said that while many programs will not change, some will receive additional support. He also said that both Cooperative Extension and Continuing and Distance Education programs will be analyzed for unnecessary duplication of services and, while some realignment or redefinition of positions may occur, a reduction in the number of employees in either area is not anticipated.

"The plan is actually designed to enhance human resource capacity in program areas of most pressing need," Ryan said. "All of the University's programs, however, require continued public-funding support in order to remain fully functional."

According to Ryan, there are nearly 1,000 faculty members (about 25 percent of all Penn State faculty) who are engaged in outreach activities across the state. In total, Penn State's outreach and service efforts—which include Cooperative Extension, Continuing and Distance Education, Research and Technology Transfer Organization and specialized centers, including the Hershey Medical Center—serve half of Pennsylvania's nearly 11.9 million population.

"Right now, we're just working through the fundamentals of this plan, but this is a necessary first step to realizing the president's vision of becoming the best university in the world in the integration of teaching, research, and service."

The University community will know more later in February about how the reorganization will look and work. That's when the operational plan will be final, Ryan said. On February 20-21, Spanier, Ryan, Alter and others who are helping pioneer this change will hold a meeting at The Penn State Scanlon with the leadership of the units involved to discuss the pending changes.

■ Remembering Martin Luther King Jr.

Activities to mark his day planned University-wide

Several events are planned to commemorate slain civil rights leader Martin Luther King Jr.'s birthday. King's birthday is today; the official observance is Monday, Jan. 20. Here is a listing of the events planned:

■ Allentown Campus

- Film - "Martin Luther King: A Man of Peace," plus poetry readings by faculty, students and staff: noon on Monday, Jan. 20, in rooms 111-546
- Wednesday, Jan. 22, and Friday, Jan. 24, at noon: Two films from the series "Eyes on the Prize"

■ Altoona Campus

Yolanda King, the eldest daughter of Dr. Martin Luther King Jr. and Coretta Scott King, will visit the State-Altoona Campus at 3:30 p.m. Sunday, Jan. 19, to answer the question "Is Martin Luther King's Dream Alive in 1997?" Currently serving as a visiting professor at Fordham University's Theatre Department in New York City, Yolanda King has worked with a number of human rights organizations and causes and is committed to using her talents to affect social and personal change through the arts. Her talk will be held in the Community Arts Center.

■ Berks Campus

- Monday, Jan. 20: A lecture, "What Has Happened to the Dream When the Dreamer Is No Longer with Us?" presented by **Bryan H. Barrows III**, Prairie View A&M University's public information director, at 1 p.m. in the Perkins Student Center. In this one-man show, Barrows portrays a grandfather who is appalled to learn his grandson doesn't know who Dr. Martin Luther King Jr. was. He decides that it is his duty to educate the boy — and the audience. The performance includes King's famous "I Have a Dream" speech.
- Monday, Jan. 20: Berks Campus and Albright College in Reading are co-sponsoring the internationally acclaimed Louisiana Repertory Jazz Ensemble, which will perform at Albright College at 7 p.m. in Memorial Chapel.
- Wednesday, Jan. 22: Pin Points Theatre Company Presents "The Meeting" at 1 p.m. in the Perkins Student Center. What would have happened if Dr. Martin Luther King Jr. and Malcolm X were locked in a hotel room together for an hour? Witness this fictitious confrontation in the award-winning production of "The Meeting" by Jeff Stetson. Admission is \$3 for adults, \$2 for students and senior citizens. The performance is free to Penn State students, faculty and staff.

■ DuBois Campus

- Month of January: Dedicated as community service month in honor of Dr. Martin Luther King Jr.'s activities include:
 - Through Jan. 31: Penny Drive for the Leukemia Society
 - Monday, Jan. 20: Dr. Martin Luther King Jr. Commemorative Ceremony in the Hiller Auditorium at noon. Included will be a reading of Dr. King's famous "I Have a Dream" speech, followed by messages from various student government and student organization leaders
 - Wednesday, Jan. 22: Movie: "Malcolm X," at 7:30 p.m., Hiller Auditorium. Admission is free.
 - Friday, Jan. 24: Campus Clean-Up Day
 - Wednesday, Jan. 29: Pinpoints Theatre-Black History presentation, 7:30 p.m., Hiller Auditorium. Open to the public.
 - Friday, Jan. 31: DuBois Nursing Home Visit, 2:30-3 p.m.

■ Mont Alto Campus

- Monday, Jan. 20: Candlelight vigil from the Emmanuel Chapel to the auditorium, 7 p.m. Following the procession, African American poet **Gillie Hayes Joseph** will address the campus community in the auditorium, General Studies Building.
- Tuesday, Jan. 21: Blues artist **K.J. James** performs at 8 p.m. in the Game Room, Conklin Hall.
- Thursday, Jan. 23: The Pin Points Theatre of Washington, D.C., will present "The Meeting," at 8 p.m. in the auditorium, General Studies Building. Contact **Laura Frome**, (717) 749-6112, for more information.

■ New Kensington Campus

- Friday, Jan. 17: Penn State New Kensington, in conjunction with the Multicultural Club of Valley High School, will host a musical program at 7 p.m. in the Valley High School

auditorium. The program will feature two choirs: "Voices of Joy," Indiana University of Pennsylvania; and "W.A.M.O. Gospel Choir," Pittsburgh. An excerpt from King's "I Have a Dream" speech will be read and the Penn State New Kensington Multicultural Club will perform a skit dramatizing Rosa Parks' courageous protest of racial discrimination. The event is free. For more information, contact **Angela Fisher** at (412) 339-5405.

- Monday, Jan. 20, at noon in the Theatre Lobby: Free birthday cake and punch will be provided for students, faculty and staff.

■ Pennsylvania College of Technology

— Monday, Jan. 20, in Penn's Inn: Nontime celebration featuring a documentary and a student recital of King's "I Have a Dream" speech. This event kicks off an African American History Celebration which runs through Feb. 27 and features 14 other cultural events including performances by an African-Caribbean dance group, Women of the Calabash, and blues singer **K.J. James**. Also on tap are theatre performances, an African Heritage Fashion Show and "Gospel-O-Rama" featuring local gospel choirs.

■ Penn State Erie, The Behrend College

- Monday, Jan. 20: The fourth annual "Family Breakfast" will be held at 7:30 a.m. in the Dobbins Hall Gazebo. At 4 p.m. all offices and classes will be relocated to the Reed Union Building Commons for a campus-wide birthday celebration. This year's theme, "Dear Dr. King," will include the reading of a dozen letters written to Dr. King by faculty, staff and students. During this celebration, the St. James A.M.E. Church Male Chorus will perform; a reception will follow. The day will conclude with a lecture by **Robert D. Bullard**, director of the Environmental Justice Resource Center at Clark Atlanta University and an outspoken critic of environmental racism, on "Dumping in Dixie: Race, Class and Environmental Quality," at 7:30 p.m. in the Reed Union Building Commons.

■ Penn State Harrisburg

What would have happened if Malcolm X and Martin Luther King Jr. had been together before they were assassinated just three years apart? This intriguing idea is the subject of "The Meeting," a powerful drama about the lives, philosophies and times of Dr. King and Malcolm X. Penn State Harrisburg will host this free play on Monday, Jan. 20, at noon in the Gallery Lounge on campus.

■ Schuylkill Campus

- Wednesday, Jan. 22: "The Meeting," presented by Pin Points Theatre Company of Washington, D.C., at 7:30 p.m. in the John E. Morgan Auditorium of the Student-Community Center. Event is free to the public.

■ Shenango Campus

- Monday, Jan. 20: Noon in the Forum (in Forker Laboratory), speaker **Rev. Thomas J. Bolling**, pastor Second Baptist Church, Farrell, Pa., and soloist: **Tamara Robinson**, Student Affairs office.
- Throughout the week, a photo display of King memorabilia. In addition, books on the life and work of Dr. Martin Luther King Jr. will be on reserve in the campus library.

■ University Park

- Three exhibits on campus
 - "Martin Luther King Jr. at Penn State: The Struggle for Equality," through Feb. 1 in the main lobby, Pattee Library
 - "The Life of Dr. King" in drawings and paintings by **Samuel Benson**, at the Paul Robeson Center through Saturday, Feb. 1
 - "Memories of Childhood," an exhibit of how 15 ethnically diverse artists portray their childhood, in the HUB Formal Gallery
- Other activities:
 - Friday, Jan. 17: Martin Luther King Jr. Dinner Forum on Black Affairs sponsors dinner at 6:30 p.m. in The Penn State Scanticon Presidents Hall. Tickets are on sale at the Paul Robeson Cultural Center at \$65 a public ticket, Jan. 19. Artist **Samuel Benson** will give a lecture on his paintings and drawings of the life of Dr. King at 3 p.m. in the Paul Robeson Cultural Center, with a reception immediately following.

- Monday, Jan. 20: "Sharing the Dream: Living the Reality," a free dramatic presentation written and directed by **Charles Dumas**, associate professor of theatre arts, will be performed at 7:30 p.m. in Eisenhower Auditorium.

- Thursday, Jan. 30: Student Volunteer Fair from 11 a.m. to 3 p.m. in the HUB Ballroom, where students can meet representatives of 50 local human service agencies and organizations. Contact **Melissa Frank Alston**, program director for the Office of Volunteer Programs and Services at 863-4624.

- Thursday, Jan. 30: Students Work for Community Service. More than 100 students from 11 student organizations have signed up to volunteer for community service projects at several locations throughout the region. Contact **Alston** at 863-4624.

- Thursday, Jan. 31: Student Involvement Fair from noon to 6 p.m. in the HUB Ballroom. About 145 student and department organizations are expected to participate and provide information on their activities and speak to potential new members. Contact **Alston** at 863-4624.

■ Worthington Scranton Campus

- Monday, Jan. 20: The Penn State Worthington Scranton Campus Cultural Events Series will feature a performance of "The Meeting" by Pin Points Theatre at 7:30 p.m. in the Campus Study Learning Center. The program, a historical drama about the lives, philosophies and times of Dr. Martin Luther King Jr. and Malcolm X, is open to the public. For more information call 963-4311.
- Friday, Jan. 31: Penn State Worthington Scranton Campus Student Activities is sponsoring "Unity through Music," a free program combining lecture and music relating to cultural and ethnic diversity at noon in the Study Learning Center.

■ Penn State Great Valley

- Monday, Jan. 20: From 4-6 p.m. in the Main Lobby, Gospel Witnesses will perform. The group consists of three singers with keyboard and bass guitarist.
- Tuesday, Jan. 21: **Dane Tighman**, premiere painter of African American golf art and Negro League baseball images, from 4-6 p.m. in the Main Lobby.
- Wednesday, Jan. 22: Photographic history following Martin Luther King's vision for equality and human dignity, all day, Main Lobby.
- Thursday, Jan. 23: **Doris McGillan**, local doll maker known for her authentic African American dolls, from 4-6 p.m. in the Main Lobby.
- Friday, Jan. 24: **Yolanda King**, daughter of Martin Luther King Jr., speaks on "The Dream Deferred" from 12 p.m., Room 130-131. Private luncheon at noon by reservation only.

■ WPX, Channel 3

Penn State's PBS station, WPX, Channel 3, is presenting a series of "Take Note" programs that highlight the activities planned on the University Park Campus in celebration of Martin Luther King Jr. and looks at the impact of Dr. King. Hosted by **Patty Satalia**, the remaining special programs follow:

- 5:45 p.m. Thursday, Jan. 16, "Sharing The Dream" — Guest **Charles Dumas**, author of the play "Sharing The Dream: Living The Reality," talks about his play which will be performed the evening of Jan. 20 at Eisenhower Auditorium.

- 5:45 p.m. Monday, Jan. 20: "Martin Luther King Jr. Remembered" — Guest **Tom Poole**, acting deputy vice provost for educational equity, speaks about the impact King had in society.

■ York Campus

- Monday, Jan. 20: Nontime tribute "Remembering the Dream," Community Room, Student Center. The Rev. **William Curtis**, Shiloh Baptist Church, will share his thoughts on Dr. King and his work.

Stoking the fire

Jeff Seymour, boiler operator at the power plant on the University Park Campus, checks a boiler. He and others at the plant are making sure everything's fully stocked and in working order to keep buildings warm this winter.

BOOK SHELF

Stephen J. Cimbala, professor of political science at the Delaware County Campus, is the author of *The Politics of Warfare: The Great Powers in the Twentieth Century*, published by Penn State Press.

The book deals with the relationship between war and politics in the 20th century, with a special emphasis on intelligence wars, low-intensity conflicts, cyber wars and nuclear-crisis management.

The Politics of Warfare is divided into two parts. In the first part, Cimbala examines the relationship between policy and war in major 20th-century conflicts before the end of the Cold War. The second part covers the Gulf War, intelligence, special operations and low-intensity conflict as aspects of the new world order. A separate chapter on nuclear weapons and strategy focuses mostly on the Cold War period but also looks at the proliferation of nuclear arms in the post-Cold War era. The concluding chapter gives an overall assessment, including cautionary notes about the future of U.S. armed forces and military policy.

Rangachar Kasturi, professor of computer science and engineer-

ing, is the co-editor of *Graphics Recognition; Methods and Applications*, Volume 1072 of Lecture Notes in Computer Science, published by Springer. This book is a collection of papers from The First International Workshop on Graphics Recognition held at Penn State in August 1995. The 308-page book was co-edited by **Karl Tombre**, researcher in France for the INRIA Organization. This collection of papers from researchers across the globe looks at progress in graphics recognition, a subfield of document image analysis. Document image analysis involves optical character recognition, the analysis of physical and logical structures of scanned documents and, more generally, the interpretation of the document's contents.

Iam-Choon Khoo, professor of electrical engineering, has co-edited *Novel Optical Materials and Applications*, published by Wiley Interscience, with **Francesco Simoni** of the University of Ancona and **Cesare Umeton** of the University of Calabria.

This reference book covers the physical, optical and electronic

characteristics of novel optical materials for applications in optical communication, signal and image processing and information storage. It offers an up-to-date treatment of the major classes of these materials and their applications in nonlinear optics, integrated optics and electro-optics devices and systems with contributions from leading authorities in virtually every subdiscipline of the field.

James Levin, associate professor in the Graduate School, and **John Shanken-Kaye**, instructor in the Department of Continuing and Distance Education, are co-authors of the book *The Self-Control Classroom: Understanding and Managing the Disruptive Behavior of all Students Including Students with ADHD* (Kendall/Hunt: Dubuque, Iowa).

The Self-Control Classroom describes a highly effective classroom management system for all students which does not rely upon rewards and coercion, encourages intrinsic motivation, greatly decreases disruptive behavior and promotes long-term change. The book treats teachers as highly skilled decision makers who, if given the "whys" behind disruptive student behavior, are quite capable of designing the "hows" of effective interventions in the classroom. Levin is a former secondary school teacher of science and mathematics, while Shanken-Kaye is currently therapist for the Bucks County Juvenile Court.

Rhodes Scholar plays active role in school and her community

Tess Thompson of Boalsburg, Pa., a 20-year-old senior and English major at University Park, was named Penn State's first-ever Rhodes Scholar in December.

The daughter of Donald and Melody Thompson, she is one of 32 Americans named to the 1997 class of Rhodes Scholars at Oxford University. Her father is an associate professor of food science and head of the food science department

Tess Thompson

in the College of Agricultural Sciences and her mother is publications editor for the American Center for the Study of Distance Education at University Park.

Thompson is described by those who know her as outstanding, mega-bright, hard-working and motivated. She has won several writing awards for fiction and poetry, including *Seventeen* magazine's national fiction contest in 1995. In addition to acting, ballet and preparing high school students to take the Scholastic Assessment Test, her many other activities have included:

- helping to organize the "Take Back the Night" rallies at the University Park Campus;
- volunteering at the University's Women's Resource Center;
- tutoring in the English as a Second Language program; and
- writing a column for the *Daily Collegian*, Penn State's independent student newspaper.

Thompson will graduate from Penn State this semester. Starting in October 1997, she'll study English language and literature at Oxford. She plans to be a writer and teacher.

Rhodes scholarships were established at the turn of the century by the estate of Cecil Rhodes, a British philanthropist and colonialist. Winners receive scholarships to Oxford University in England. Besides tuition, the scholarships pay for living expenses and transportation. The competition was first opened to women in 1976.

The winners were announced Dec. 7 by the Rhodes Scholarship Trust at Pomona College in Claremont, Calif., near Los Angeles.

ARL signs five-year contract with U.S. Navy

The Applied Research Laboratory in December signed a new five-year contract with the Navy which budgets \$65 million for the first year, with options for four additional years of support, up to a total of \$330 million. The funds will be administered by the Naval Sea Systems Command.

The \$330 million has been earmarked for research in five "essential capability" areas including guidance and control of undersea vehicles, thermal power systems, hydrodynamics and hydroacoustics, manufacturing materials and communications.

L. Raymond Hettche, ARL director and professor of engineering research, said that in the current era

of "downsizing," the contract is a reaffirmation of the Navy's intent to keep ARL viable at Penn State.

ARL, the largest of Penn State's interdisciplinary research programs, has had continuous Navy funding since it was established by the Navy in 1945. The new contract is the fourth that Hettche has negotiated with the Navy since he became director of ARL in 1981. An internationally recognized research center for undersea science and technology, ARL contributes to the educational objectives and research goals of the University through graduate and undergraduate thesis supervision and teaching, through support of collaborative research and sharing of research facilities.

On average, ARL has supported about 90 graduate students with full research assistantships and 40 undergraduates each year for the past 15 years.

The laboratory was instrumental in establishing and supporting the graduate program in acoustics and Penn State's first satellite-delivered degree program, the master of engineering degree in acoustics, a national award winner in distance learning.

Within the last five years, ARL has performed research for 65 industrial sponsors and an additional 17 nonprofit organizations. About one-third of the industrial sponsors were Pennsylvania corporations.

Spanier to serve on NCAA board

President Graham B. Spanier has been appointed by the presidents of Big Ten universities to serve on the NCAA's Board of Directors. Spanier will be among 15 university presidents nationwide who will constitute the board, which beginning in August becomes the body that oversees the policies and operations of the NCAA Division I schools.

Spanier also will join the NCAA Presidents Commission in January, which will exist only for the few months until the new governance body is launched. Spanier's term on the Presidents Commission will run through January 2000. Spanier served on the Presidents Commission in 1995 as the Big 8 representative.

The president anticipates that under the new governance model, the board will look carefully at the structure, budget and policies of the NCAA. He predicts changes are likely.

The NCAA, the National Collegiate Athletic Association, is a membership organization of universities and colleges that participate in intercollegiate athletics. The primary purpose of the NCAA is to maintain intercollegiate athletics as an integral part of the student body. Activities of the NCAA membership include formulating rules of play for NCAA sports, conducting national championships, adopting and enforcing standards of eligibility and studying all phases of intercollegiate athletics.

Penn State is part of NCAA's Division I-A.

Versatile venue nominated for three awards

The Bryce Jordan Center has received four nominations for annual awards from three of the concert industry's leading publications, putting the center in the company of facilities like America West Arena in Phoenix, home of the NBA's Phoenix Suns, and Disney's Arrowhead Pond of Anaheim in Anaheim, Calif.

Leading the list is *Pollstar Magazine's* 1996 Arena Of The Year Award. This nomination is a reflection of the best facilities in the nation in the eyes of a diverse group of major agents, managers, promoters and industry professionals. Nominations are based on a combination of ticket sales and the nominator's feelings toward the quality of each facility's amenities and services.

Performance Magazine has also nominated the Jordan Center for New Venue of the Year and Arena of the Year in its size category. The Jordan Center is among six new facilities nominated for the honor this year. *Performance Award*

Performance Magazine's mid-year charts.

The center has been host to 31 touring shows averaging 10,000 people at every performance, with such entertainers as The Eagles, Rod Stewart, Reba McEntire, George Strait, Dave Matthews Band and Phish and family shows like the Harlem Globetrotters, David Copperfield and the World Gold Gymnastics tour. Additionally, the Penn State basketball programs have had successful seasons as well.

winners will be announced Jan. 18 and Pollstar Award winners will be announced Jan. 31.

Facilities Magazine, a bimonthly publication directing its attention to arenas, convention centers, stadiums and theaters, selected the Jordan Center as one of the 25 winners of the 1996 Prime Site Award.

In its first year of operation, the center has grossed more than \$6 million in ticket sales and was ranked as the top grossing U.S. venue in its respective category in

University Park surpasses United Way goal

University Park employees contributed more than \$452,000 to United Way, exceeding the goal of \$450,000. The record-breaking total includes retiree contributions of more than \$58,000 and funds raised from about 13 special projects or events. These contributions helped set a fund-raising record this year for the Centre County United Way of more than \$1.3 million.

In addition, an outpouring of community support during the 1996 United Way campaign at Penn State Harrisburg also broke previous records for participation and contributions. In the most successful appeal since the college was established 30 years

ago, Penn State Harrisburg's campaign reached its goal of \$16,500 with nearly 50 percent participation.

Athletic Director Tim Curley, who served as 1996 chairman of the University Park effort, cited the following areas at University Park for outstanding achievement:

- Highest increase in dollars raised (1 to 100 employees): College of Communications;
- Highest participation rate (1 to 100 employees): Finance and Business, General Operations;
- Highest increase in dollars raised (101 to 200 employees): Enrollment Management;
- Highest participation rate (101

to 200 employees): Development and Alumni Relations;

- Highest increase in dollars raised and highest participation rate (201 to 400 employees): The Smeal College of Business Administration; and

- Highest increase in dollars raised and highest participation rate (401 or more employees): College of Engineering.

For more specifics on the amounts raised through various events or a full listing of University Park units that exceeded their participation and funding goals, visit the *Intercom's* Web site at <http://www.ur.psu.edu/INTERCOM/Home.html>.

Center for Adult Learner Services seeks nominations for outstanding student

The Center for Adult Learner Services at University Park is accepting nominations for its 1997 Outstanding Adult Student Award.

Faculty, staff and currently enrolled adult students at Penn State may nominate an adult learner who has overcome obstacles and multiple roles to further his or her educa-

tion; served as a role model for other adult students; maintained high academic achievements; sensitized the University to adult learners' needs; and has clearly defined short- and long-term educational goals.

To qualify for this award, a student must have begun or resumed studies after the age of 24 or after

having been out of high school for four years. They also must have been enrolled at University Park as a full- or part-time undergraduate or graduate student within four months of nomination. Undergraduates must have completed 45 credits, taking at least 30 of them at Penn State. Graduate students must have earned a

minimum of 15 graduate credits. Undergraduate nominees will receive preference in consideration.

Nomination packets may be obtained by calling (814) 863-3887 or by stopping by the center at 323 Boucke Building. Completed packets must be returned to the center by Monday, Feb. 3.

Highlight on Undergraduate Education

Hazleton students gain hands-on experience

In an innovative partnership that combines teaching with hands-on experiences in television production techniques, WYLN-35, a subsidiary of Gans Multimedia Inc., and Penn State Hazleton will join forces as educational partners for sophomore students in the communications major at the campus.

Beginning this semester, 16

sophomore students will have weekly hands-on experiences at the WYLN-35 studios where they will learn television production techniques and produce programs as part of an innovative classroom and hands-on television studio experience. Instructor **Daniel Meltzer** will be joined by production and engineering staff at WYLN-35 to

teach elements of camera work, lighting, audio techniques, control room operations and videotape editing.

One of the goals of the program will be the production of a weekly program to be aired on WYLN-35 that will feature the students in the program, and will focus on events and people at Penn State Hazleton.

Advisory panel adds member, seeks input from employees

A new member has been appointed to a three-year term on the Human Resources Development Advisory Committee, a University-wide group of faculty and staff that act as a professional and organizational development and training advisory body to the Office of Human Resources.

Kathleen D. Matson, administrative assistant in the Department of Meteorology, has been named to the post. She also serves as a member of the Staff Focus Committee and its Training and Management Development Subcommittee. The appointment of a member of the Staff Focus Committee to the Human Resources Development Advisory Committee now links the organizations to allow both groups to share information and address similar concerns without duplicating efforts.

Any University staff member may contact Matson or other Staff Focus Committee members to discuss concerns of issues related to training and development or other human resources matters. Members of the Staff Focus Committee and their e-mail addresses are: **Lydia Abdullah** at lpal1@psu.edu; **Duane Bullock** at DNBS@psu.edu; **Kenneth Clarke** at kic2@psu.edu; **Yvelyn Delizia** at mlidelizia@psu.edu; **Evelyn Ellis** at emel1@psu.edu; **Dee Frisque** at dmlr10@psu.edu; **Kenneth Johnston** at knjl1@psu.edu; **Robert Kidder** at rlk1@psu.edu; and **Jenny King** at jk3@psu.edu.

Also included are: **Beverly Ladrido** at bml2@psu.edu; **Stan Latta** at slx11@oas.psu.edu; **Fred Loomis** at fdl1@cde.psu.edu; **Kathleen Matson** at matson@ems.psu.edu; **Lissa Olibeter** at lbo1@psu.edu; **Debra Putt** at dap3@psu.edu; **Danielle Richards** at dpr1@oas.psu.edu; **Kenneth Rudy** at kernuc@engr.psu.edu; **Frank Simmons** (none); and **Billie Willis** at bsw2@psu.edu.

Over easy

University President Graham B. Spanier cooked breakfast for students at a Midnight Study Break at Findlay Dining Commons in East Halls on the University Park Campus during finals week in December. The event was the first of its kind at University Park, and was so successful that it will now be held during final exam week each fall semester.

College of Medicine seeks department chair

The College of Medicine at The Hershey Medical Center is seeking a chair of the Department of Health Evaluation Sciences. This proposed new academic department, with a primary location at the medical center, will be active in clinical and patient-oriented research as well as methodological and applied research in epidemiology, biostatistics, clinical epidemiology, health services and health informatics. This department also will develop and implement educational programs in these scientific disciplines for attend-

ing physicians, fellows, and medical and graduate students.

The chair is expected to promote research in health services, population-based epidemiology and informatics, to support ongoing research in the methods and applications of biostatistics and, importantly, to lead the expansion of clinical epidemiology across all disciplines.

Currently, in the Center for Biostatistics and Epidemiology—considered an essential component of the new department—there are six tenure-

track faculty, four research faculty and 34 staff members. Last fiscal year, center faculty received 24 grants and contracts totaling \$2.8 million.

Penn State is an equal opportunity/affirmative action employer. Women and minorities are encouraged to apply. Anyone interested should send a current curriculum vitae by Feb. 14 to: Dr. Herbert Y. Reynolds, professor and chairman of the Department of Medicine, The Milton S. Hershey Medical Center, P.O. Box 580, Hershey, PA 17033.

WEB
BROWSER

By DOUG STANFIELD
Technology editor

Emptying the mailbox...

This week's offerings are a collection of suggestions from readers.

Shareware galore

It's a cliché, but the Internet is so crowded that a major headache is finding what you want. We've included links to search engines before, but if you are looking for software and don't have a lot of money to spend on a new application, update or utility, this site should help.

This site has thousands of shareware software titles. A really nice feature is that it's searchable in a number of different ways. You can look via a Quicksearch by platform (Mac, PC, etc.), by looking at a listing of the most popular downloads, by browsing through another listing of the new arrivals, by the "title of the day" and through a highlights section. But remember, this distribution idea only works if you pay your modest shareware fee!

<http://www.shareware.com/>

Resources for faculty

New instructional resources are also becoming available to faculty at Penn State. The current listing may be found under the Faculty and Staff Services listing on the main Penn State home page (<http://www.psu.edu/faculty.html>), along with many other items.

Two from this page are highlighted this week. The first site is presented by the Educational Technology Services unit. ETS, formed in 1986, is a faculty support unit dedicated to the effective use of teaching and learning technologies.

<http://ets.cac.psu.edu/>

The second is the site of the Center for Excellence in Learning and Teaching (formerly Instructional Development Program). This unit, part of the Office of Undergraduate Education, supports instructional improvement by providing programs, services and information to Penn State faculty, instructors and teaching assistants throughout the Penn State system.

http://www.psu.edu/80/academic/ue/IDP_Homepage.html

If you know of an unusual or particularly interesting use of the Web, send the URL to Doug.Stanfield@psu.edu.

FIRST LIGHT

Hobby-Eberly Telescope takes its initial peek at the universe

The largest and most powerful optical telescope in the continental United States took its first look at the universe in mid-December, demonstrating the feasibility of its novel design and ushering in a new era of cost-effective large telescopes.

The milestone event, known as "first-light," was announced Dec. 12 by board members, engineers and astronomers associated with the new William P. Hobby-Robert E. Eberly Telescope (HET) Project, a partnership involving Penn State, The University of Texas at Austin, Stanford University and the German universities Georg-August-Universität Göttingen and Ludwig-Maximilians-Universität München.

Other 10-meter class telescopes, like the Keck telescope in Hawaii, are not publicly accessible. With its visitors' gallery, the HET will be the largest telescope in the world visible to the public. It will be commissioned in late 1997 at McDonald Observatory in the Davis Mountains, a remote area of western Texas recognized as having the darkest skies in North America.

The \$13.5-million Hobby-Eberly Telescope, named for **Bill Hobby**, former Texas lieutenant governor, and **Robert E. Eberly**, a Penn State benefactor, gives the partner institutions access to one of the largest telescopes in the world at a construction cost that is one-fifth of what other telescopes in its class have cost to build. The HET's cost-saving design eliminates many of the expensive features that give a standard telescope its all-purpose flexibility. The telescope employs the largest primary mirror in the world—11 meters (432 inches) in diameter—and consists of 91 identical 1-meter hexagonal mirror segments that can be cost-effectively produced in quantity.

Another cost-saving feature is that, in contrast to most telescopes, the HET tracks objects as they move across the night sky—not by rotating the entire telescope, but by moving just a few

DID YOU KNOW

■ With the Hobby-Eberly Telescope, astronomers will be able to see a football that is twice as far away as the moon.

■ The telescope is one of the largest in the world, but its \$13.5-million cost is one-fifth of others in its class because of its design.

focusing instruments suspended above the primary mirror. This engineering concept reduces by more than 10 times the amount of telescope mass that must be moved under precise control. The telescope's schedule will be computer controlled to allow many different types of observations to be made in a single night. This design feature improves the overall efficiency of the telescope and allows the HET to seize opportunities to study short-lived astronomical events.

Astronomers are planning to use the Hobby-Eberly Telescope to search for planets around other stars, to study the origin of the elements in our own galaxy, to measure the properties of black holes, to probe for the existence of dark matter in and around galaxies and to investigate the early history of galaxies and the universe. During the commissioning period, expected to last until August 1997, **Thomas Sebring**, project manager, and **Lawrence W. Ramsey**, HET project

Operational

The Hobby-Eberly Telescope in Western Texas took its first look at the stars on Dec. 12, 1996. The telescope will be commissioned later this year.

scientist, will lead a team of engineers and astronomers as they refine the telescope's engineering performance and bring it into full operation. **Ramsey** and **Daniel Weedman**, both professors of astronomy and astrophysics at Penn State, are co-inventors of the HET concept.

New policy supports victims of sexual assault

Unfortunately colleges and universities, like communities in general, have to deal with the violence and painful aftermath of sexual assault. An ugly crime based in hate, it harms not only the victim but also the community in which it occurs.

"The strongest defense against such behavior is a community that clearly sends the message that sexual assault is not acceptable. At Penn State we have developed a new policy reaffirming that Penn State does not tolerate sexual assault, and will prosecute the perpetrators of such acts of violence to the fullest extent of the law," Dr. **Margaret Spear**, director of University Health Services and chair of Penn State's Sexual Assault Committee, said.

The University is also committed to supporting victims of sexual assault through a wide range of confidential primary health care and referral services.

According to Spear, the new policy, which is now in effect, more clearly identifies who is to be notified in the case of an assault, assigns responsibility to specific areas to provide services and ensures that such services for victims are in place at all Penn State campuses.

The policy specifies:

— Each University location will have primary care services for victims of sexual assault and/or appropriate referrals to community services.

— Any faculty or staff member in contact with a sexual assault victim should consult with counseling and/or health services and the offices of student affairs and human resources for assistance in providing appropriate services.

— The student affairs officer at each Penn State location will oversee local protocols and procedures and periodically review and update them; will orient and train staff who are most likely to have victim contact; collect data and monitor trends and use of services; and provide informational materials and educational programs.

— The student affairs officer at each Penn State location will also appoint an individual to serve as a victim or witness advocate to provide crisis counseling; assist victims with academic concerns; accompany victims to court or other legal proceedings; and act as a referral to other community resources.

Since sexual assault is not limited to students, the University also provides counseling services to faculty and staff through its Employee Assistance Program.

The Sexual Assault Committee, appointed by **William Asbury**, vice president for student affairs, provides University-wide oversight for policy and procedures relating to sexual assault. Last year, the committee developed and distributed the Sexual Assault Protocol, which provides information and guidance for individuals assisting victims. It is available on request from the committee or at 216 Ritenour Building.

The new sexual assault policy, AD12, is on Penn State's home page on the Web at <http://www.ohr.psu.edu/pages/policies.htm> and is listed under the Administrative Policies folder. Related policies, Sexual Harassment (AD41), Statement on HIV/AIDS (AD43) and Consensual Relationships (AD43), are also on the Web and may be of interest. For advice in the event of a sexual assault, see The Office of Student Affairs home page at <http://kac.psu.edu/~pmmn/7a.html>.

Faculty/Staff Alerts

President to discuss University's future on WPSU radio program

University President **Graham B. Spanier** will discuss the future of Penn State on his monthly radio show, "To the Best of My Knowledge," which will be broadcast on WPSU radio at 7 p.m. Thursday, Jan. 23. The public is invited to participate in the discussion and to ask questions by calling (800) 543-8242.

WPSU-FM can be heard in the State College area at 90.1 on your radio dial and in other parts of its wide listening area at 91.5 or 106.7. Hosted by **Patty Satalia**, "To the Best of My Knowledge" is a series designed to explore topics of concern to the University and community and allows listeners a chance to speak directly with Penn State's president.

Name change

Penn State's Instructional Development Program (IDP) has a new name: the Center for Excellence in Learning and Teaching.

Operating out of the Office of Undergraduate Education, the center supports instructional improvement by providing programs, services and information to faculty, instructors and teaching assistants throughout the Penn State system. **Diane M. Enerson**, the center's director, said the new name is intended to reflect changes that have already taken place at the center — among them its "increased breadth and enhanced ability to facilitate conversations about teaching and learning among Penn State teachers at all levels of expertise."

A full description of the center and what it does, as well as many of its resources, are online at http://www.psu.edu/idp_celt. For more information, or to be added to the center's mailing list, call (814) 863-2599 or e-mail IDP@psu.edu.

HRDC courses

The following courses are being offered by the Human Resource Development Center:

Movin' On: Developing Yourself for a New Position

This program is designed to help participants systematically prepare themselves for the next position in their careers. Meets on Thursdays, Jan. 16 and 23 from 11:30 a.m. to 1:30 p.m. in 319 Rider Building. Cost: \$35.

Writing, Editing and Managing Newsletters

Meets on Thursdays, Jan. 16 and 23 from 8:15 to 11:15 a.m. in 319 Rider Building. Cost: \$55.

25-year Awards

Comments, please

A special committee of the University Faculty Senate has extended its deadline for comments on a working document that assesses and recommends ways to change Penn State's general education program.

The deadline is now Jan. 24. Members of the University community are invited to submit comments in writing to **Robert Pangborn**, chair of the Special Committee on General Education and associate dean of undergraduate studies in the College of Engineering. Comments may be delivered to Pangborn at 101 Hammond Building, sent via e-mail to rmp10@psu.edu, or faxed to (814) 863-4749.

The committee's report and recommendations were discussed by the Faculty Senate in a forensic session at its Dec. 3, 1996, meeting.

The committee has actively solicited comment from the University community since it first met in February 1996. The committee has extended its deadline for comments because it has been receiving such substantial and useful input.

Copies of the committee's working document are available through the Office of Undergraduate Education, 417 Old Main, (814) 863-1864. The document also is available on the World Wide Web at <http://www.psu.edu/dept/edu/gened/report.html>.

A final document is expected to be voted on by the Faculty Senate by February. The Senate's next meeting is 1:30 p.m. Tuesday, Jan. 28, in Room 112, Kern Building on the University Park Campus.

Award deadline nears

The nomination deadline for the Rosemary Schraer Mentor Award, established by the Commission for Women, is Jan. 24. Any woman wishing to nominate a University employee who exemplifies the caring and mentoring displayed by Rosemary Schraer should submit a nomination form by that date to **Ellen Walker**, 311 Grange Building, University Park, Pa. 16802. Schraer was a faculty member in the Eberly College of Science and associate provost of the University from 1981-1985. She became the first woman chancellor in the University of California system in 1987. She died April 10, 1992.

Information and nomination forms can be obtained by calling the Commission for Women office at (814) 865-1683.

Grant money for study in Israel available for undergraduates

Penn State freshmen, sophomores and juniors are eligible to participate in the Dorot Foundation Trav-

el Grants for summer study in Israel sponsored by the Jewish Studies Program. Application deadline is March 25. Awards of up to \$1,000 will be made for qualifying academic activities on the basis of need. This summer program may be combined with a residential fall or spring semester program of study abroad.

For information on how to apply, contact the Jewish Studies Program office at (814) 863-8939. Applications should be submitted to the Jewish Studies Program, 103 Weaver Building, University Park, Pa. 16802. Announcements of awards will be made by April 3.

A reminder to electronic mail users

The Office of Administrative Systems (OAS) would like to remind all Emc2 users that this electronic mail system will no longer be available for use as of July 1997. OAS is recommending that all staff members who have not already replaced Emc2 with a pop-mail client (such as Eudora) should begin this process. In addition, any offices sponsoring Emc2 userforms, mail lists, bulletin boards and conferences will need to begin using alternatives to these functions as quickly as possible.

To help with this, the following OAS World Wide Web page is available to provide assistance at URL: <http://www.oas.psu.edu/compute/email/email.html>. For those who do not yet have access to the Web, this information also is available through the Emc2 Bulletin Board: #WB8 or through the Emc2 Conference: TAO.

Any questions can be directed to the following e-mail address: soas-ssc@psuvm.psu.edu.

Australia Day dinner planned

The Fifth Annual Australia Day Dinner will be held beginning at 6:30 p.m. Saturday, Jan. 25, at the Nittany Lion Inn on the University Park Campus. The event, sponsored by the Australia-New Zealand Studies Center and the Penn State Faculty Staff Club, is an observance of Australia's national day and commemorates the arrival of the First Fleet in 1788 at Sydney Cove, inaugurating European settlement on the continent. Penn State is one of only two American universities with a center dedicated explicitly to the study of the Antipodes.

The evening will include an Australian short film screening, with commentary. Preregistration is required. For additional reservation information, please contact **Patricia Corbett** at (814) 863-1603 or by e-mail at pac9@psu.edu or (fax) (814) 865-3336.

CHERYL A. BROWN

LEO R. MCGINNIS

NICHOLAS G. OTZEL

D. EUGENE RANNELS

SUSAN WORLEY

JANET V. WILSON

Observing 25 years of service at the University are (from left): Cheryl A. Brown, staff assistant VI, Environmental Resources Research Institute in the Office of the Senior Vice President for Research and Graduate Education; Leo R. McGinnis, warehouse worker A, Office of Business Services; Nicholas G. Otzel, director of administration, Family and Community Medicine; D. Eugene Rannels Jr., distinguished professor and vice chairman, Department of Cellular and Molecular Physiology, and senior scientist in pulmonary biology, Department of Anesthesia; and Susan Worley, nurse in the Division of Urology, all at The Hershey Medical Center; and Janet V. Wilson, staff assistant VI, Penn State Press, in the Office of the Senior Vice President for Research and Graduate Education.

The

ARTS

AT PENN STATE

"Dismal Science" opens at Palmer Museum of Art

"Dismal Science, Photo Works by Allan Sekula, 1972-1996," opened at the Palmer Museum of Art on the University Park Campus and will close Sunday, March 16. The exhibition is the first retrospective of this artist's work and includes eight installations of photographs, text, audio recordings and slide projection pieces. After closing at the Palmer Museum, "Dismal Science" will travel to Berlin and London.

Sekula's work, both in writing and photography, challenges the ways we confront contemporary visual culture. This California artist uses photographs, text and installation to engage viewers and encourage dialogue.

Although widely exhibited in Europe, Sekula's work is less well-known in the United States. This exhibition was organized by University Galleries of Illinois State University and is supported in part by grants from the National Endowment for the Arts and the Illinois Arts Council.

For more information, contact the museum office at (814) 865-7672.

Bach's Lunch

Saxophobia, a saxophone quartet, will open the Bach's Lunch concert series for the spring semester at 12:10 p.m. Thursday, Jan. 16, in the Helen Eakin Eisenhower Chapel on the University Park Campus.

The performers in Saxophobia include Dan Yoder, professor of music who plays soprano saxophone, and three undergraduate saxophone majors: Kyle Glaser, alto sax; Bill Ferguson, tenor sax; and Sue Kearney, baritone sax.

In the semester's second Bach's Lunch concert, five undergraduate voice students in the School of Music will perform Thursday, Jan. 23, in the Helen Eakin Eisenhower Chapel.

Theresa Park, Jesse Benz, Naisha Galloway, Kristin Lunetta and Kimberly Burkhard were chosen to sing in this concert because they performed exceptionally well in their voice juries in December.

The 20-minute concerts are part of the Bach's Lunch series sponsored by the College of Arts and Architecture School of Music and the University Lutheran Parish.

Audience members are invited to take their own bag lunches to eat after the concert in the Roy and Agnes

Wilkinson Lounge. Coffee and tea will be provided.

Simply Elemental

The Dance Program in the Department of Kinesiology will present a faculty choreographed performance of dances responding to the natural elements: earth, water, air and fire on Jan. 16 and 17. Simply Elemental uses Native American beliefs as a unifying force for the varying dances, which range from folk to modern.

Simply Elemental will be performed at 8 both evenings in the White Hall Dance Theatre (room 132-133 White Building), on the University Park Campus. Tickets will be sold at the door. General admission is \$5; student admission is \$4.

Performance added at Bryce Jordan Center

The alternative rock band Geggy Tah has been added as special guest for Rusty Root at the Bryce Jordan Center at 7:30 p.m. Saturday, Jan. 18. Tickets can be purchased at the center, selected Uni-Mart ticket outlets, Commonwealth Campus ticket outlets, or by calling (814) 865-5555 locally, or toll-free at 1-800-863-3336. Tickets are \$19.25.

For more information on Jordan Center events, visit the Web at <http://www.bjc.psu.edu/>.

Art song recital on Jan. 18

Baritone Matthew Shaw and pianist Stephen Grazzini will perform an evening of vocal music at 8 p.m. Saturday, Jan. 18, in the College of Arts and Architecture School of Music Recital Hall on the University Park Campus. The performance will feature a variety of music.

Shaw is a senior voice performance major at Penn State and studies with Richard Kennedy. He has received numerous awards and recently won the Penn State Philharmonic Soloists Competition.

The recital is free to the public.

Life of The Rev. Martin Luther King Jr. on display

The Paul Robeson Cultural Center on the University Park Campus is still featuring an exhibit of paintings and drawings depicting aspects of the life of Dr. Martin Luther King Jr. through Saturday, Feb. 1. The works are by Samuel Benson, who will give a public talk on his art in the Robeson Center

Exhibit, reception

Memories of Childhood, an exhibit of photographs, paintings and prints from fifteen artists, will be on display at the Hetzel Union Building Formal Gallery on the University Park Campus through Feb. 22. A free reception will be held from 6 to 8 p.m. Jan. 20 in the gallery, with The Strolling Strings and students from The Music Academy performing from 6 to 7 p.m.

ter at 3 p.m. Sunday, Jan. 19, with a reception to follow.

Benson, instructor of art in the Chester Upland School District, has his works included in the private collections of Bill Cosby and Patti LaBelle, among others. He has had exhibits at the October Gallery in Philadelphia, The DeShong Museum in Chester, Penn State Harrisburg and Lincoln University. He is a graduate of the Columbus College of Art and Design, Syracuse University and The University of Pennsylvania.

The Robeson Center Gallery hours are 8 a.m. to 10 p.m. Monday through Friday; 10 a.m. to 4 p.m. on Saturdays; and by arrangement on Sundays.

Lusk to perform Bach

Mark Lusk, associate professor of trombone, will present a free solo recital at 8 p.m. Sunday, Jan. 19, in the College of Arts and Architecture School of Music Recital Hall on the University Park Campus.

Lusk's program will consist of the Suites for *Unaccompanied Cello* by Johann Sebastian Bach. These pieces have been transcribed for the trombone in a new book, titled *The Trombonist's Guide to the Cello Suites* by Johann Sebastian Bach, by Lusk.

MetaStages registration

Registration is open for children's spring drama classes. MetaStages Theatre Centre, an outreach program, offers classes after school and on Sat-

urday for age groups from K-12th grade. Weekly sessions begin Saturday, Feb. 1, at the Paul Robeson Cultural Center on the University Park Campus.

Children receive performance training from professionals in acting, voice, movement, mime and masks as they rehearse and perform plays from various countries and cultures. Classes culminate with an afternoon of final performances. Class size is strictly limited. For more information, contact Joanne Leonard, MetaStages director, at (814) 867-8390.

Patty Loveless to play at Penn College Arts Center

New Country star Patty Loveless will perform at 7:30 p.m. Saturday, Feb. 8, at the Community Arts Center, part of the Pennsylvania College of Technology in Williamsport.

One of the first artists to arrive on the scene and combine traditional country, bluegrass and rock 'n' roll into what is now known as New Country, Loveless has had a distinguished decade-long national career. Her hits include "Hillbilly," "Halfway Down," "When Fallen Angels Fly," "You Don't Know Who I Am," "I Try To Think About Elvis," and many more.

Tickets for this event are \$28.50, \$23.50 and \$18.50. For more information, please call (717) 326-2424.

UNIVERSITY PARK CALENDAR

SPECIAL EVENTS

Saturday, January 18
School of Music, 8 p.m., Recital Hall. Student voice recital by Matthew Shaw.

School of Music, 8 p.m., 122 Music Building II. Student recital by Jennifer Updegrave, violin, and Gregory Woodbridge, piano.

Sunday, January 19
School of Music, 2 p.m., Recital Hall. Student recital by Nesrine Balbesi, violin.

Paul Robeson Cultural Center, 3 p.m. Samuel Benson speaks on Martin Luther King Jr.

School of Music, 8 p.m., Recital Hall. Faculty recital by Mark Lusk, trombone.

Monday, January 20
School of Music, 8 p.m., Recital Hall. Student recital by "Modern String Quartet."

Wednesday, January 22
School of Music, 6 p.m., Recital Hall. "Jury Recognition Recital."

Center for Women Students, 12-1 p.m., CWS Resource Room, 120 Boucke. Film and discussion on "That Ain't No Way To Treat a Lady."

Thursday, January 23
School of Music, 8 p.m., Recital Hall. Student recital by Daniel Weiner, trombone.

Friday, January 24
Palmer Museum of Art, 2 p.m., Christoffers Lobby. Gallery Talk presents Robin Seymour on "Nineteenth-Century American Art."

Center for the Performing Arts, 8 p.m., Eisenhower Auditorium, "Mummenshanz." For tickets, call (814) 863-0255.

Saturday, January 25
Center for the Performing Arts, 8 p.m., Eisenhower Auditorium, "Martha Graham Dance Company." For tickets, call (814) 863-0255.

School of Music, 2 p.m., Recital Hall. Student voice recital by Nicole Hyde.

■ Australia-New Zealand Studies Center and Faculty-Staff Club, 6:30 p.m., Nittany Lion Inn. "Fifth Annual Australia Day Dinner."

School of Music, 8 p.m., Recital Hall. Student recital by Julie Lybarger, french horn.

On display

"Man on bus passing abandoned waterfront factory" and other photographic works by Allan Sekula are on exhibit at the Palmer Museum of Art on the University Park Campus. "Disimal Science: Photo Works by Allan Sekula, 1972-1996" can be seen through March 16.

Sunday, January 26
School of Music, 8 p.m., Recital Hall. "Faculty Composer's Concert."

Monday, January 27
School of Music, 8 p.m., Recital Hall. Student recital presents a saxophone quartet.

Tuesday, January 28
Nittany Valley Symphony, 8 p.m., Eisenhower Auditorium. "A Symphonic Spectacular." For tickets call (814) 863-0255.

Center for Women Students, 7 p.m., Assembly Room, Hetzel Union Building. Theatre presentation on "Sex at 7."

Wednesday, January 29
School of Music, 8 p.m., Recital Hall. Student recital by Stephanie Pitsilos, piano.

SEMINARS

Monday, January 20
Agricultural and Biological Engineering, 12:20 p.m., 239 Agricultural Engineering. Helen Smith on "Computer Access to Library Resources."

Gravity Center, 2 p.m., 339 Davey Lab. Chopin Soo on "Invariant Regularization of Chiral Fermion Theories."

Thursday, January 23
Gravity Center, 11:30 a.m., 339 Davey Lab. Curt Cutler on "Pulsar Searches with LIGO."

Saturday, January 25
Office for Minority Faculty Development, 9 a.m., 114 Kern. Blannie Bowen on "Promotion and Tenure for Junior Faculty."

EXHIBITS

Zoller Gallery
Photo collage by Ken Graves, Jan. 18 through Feb. 13. Photography by Kristin Breslin Sommesse, Jan. 18 through Feb. 13.

Palmer Museum of Art
"Disimal Science: Photo Works by Allan Sekula, 1972-1996," through March 16.

"Capturing the Light: A Selection of 20th-Century American Watercolors" by Winslow Homer, Jan. 28 through May 18.

"The Wood Engravings of Warren Mack," through Jan. 26.

■ Reflects an international perspective.

JANUARY 16 - JANUARY 31

Administrative Fellows applications due March 1

The Office of the President is seeking applications and nominations for the Administrative Fellows Program for 1997-98. Three fellows are being sought, one to serve under the mentorship of John A. Brighton, executive vice president and provost, one to work with Gary C. Schultz, senior vice president for finance and business, and the third to serve with Robert E. Dunham, senior vice president and dean of the Commonwealth Educational System.

The Administrative Fellows Program provides career development opportunities for women and minority faculty and staff. By serving under the mentorship of a senior level administrator, Fellows who are seeking the background necessary to compete at higher levels of administration will have an opportunity to broaden their perspectives and experience in higher education administration. Such an experience is designed to allow Fellows to become more effective in their existing positions within the University and to provide a base for them to consider further advancement in the future.

Objectives of the program include:
— To identify women and minorities who have potential for effective leadership
— To increase the Administrative Fellows'

awareness of the complexity of issues facing higher education and to enhance their understanding of the environment in which decisions are made.

— To provide opportunities for Administrative Fellows to participate in a wide range of decision-making processes, learning activities and program management so they will be better equipped to understand the challenges of higher education administration upon completion of the fellowship.

Although completion of the program does not guarantee appointment to an administrative position at the University, people who complete the program increase the pool of women and minorities interested in pursuing careers in University administration.

The selection criteria are: Full-time faculty or staff members; demonstrated success in current positions and interest in an administrative career; evidence of leadership experience and decision-making ability; ability to relate effectively with students, faculty and staff, and an understanding and appreciation of cultural, ethnic and individual differences; willingness to accept a wide variety of assignments.

Women and minorities meeting these qualifications at all University locations are strongly

urged to apply. Each successful candidate will be placed on leave of absence from her or his current position and continue to receive a regular salary. The starting dates of each fellowship may vary depending on the office and the Fellow's commitments.

The successful Administrative Fellows will develop learning plans outlining activities for the year, in consultation with their mentors. This program is competitive. A screening and interview committee will recommend candidates to Brighton, Schultz and Dunham. Serving on the committee will be a representative from the Commission for Women, representatives from the offices where the Fellows will be placed, a past Fellow and a representative from the Office of Human Resources.

Applications for the Administrative Fellows Program are available from the Office of Human Resources at (814) 863-6188 or at the OHR Web site under "What's New" at URL <http://www.oohr.psu.edu>. Applications should be returned to the Office of Human Resources, Box 6, Rider Building, University Park, as soon as possible, but no later than March 1. For more information, call Robert L. Kinder at (814) 863-4606.

■ Virtual Reality in action

Alumni keep in virtual touch through the Web

On a cold Sunday morning not long ago, a first-year Penn State student stood on the Old Main lawn. The lawn was almost deserted and the building empty, so the one or two other people in the area may have wondered what she was doing when she abruptly turned toward the structure and began energetically waving her arms.

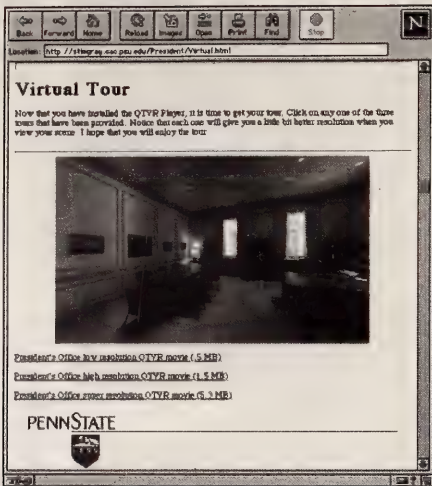

But her parents weren't wondering. In the student's hometown hundreds of miles away, under an arrangement they'd made previously by e-mail, the student's parents turned on their computer and pointed their Web browser to the Penn State home page. There they found the hot link to LionCam, (<http://www.psu.edu/ur/cam/lioncam.html>) a camera that since last summer has been placed in various locations around the University Park Campus.

On this particular Sunday morning, LionCam was pointed out a third-floor window to the spot on the Old Main lawn where the student was standing. Using their computer and Penn State's Web technology, the parents were able to see their daughter — live from Penn State.

Increasingly, Penn Staters are staying in touch with Dear Old State in many different ways via the Web. As an institution that is already leading national efforts on the Web, Penn State continues experimenting with even newer technology.

"We realize not everyone has the home or office computer to take advantage of all the technological advances we are able to support centrally here, but more and more people can and it is important for Penn State to be a leader in this technological revolution," Steve MacCarthy, executive director of University Relations, said.

Even as the general public and commercial world in larger numbers are just getting on to the information highway, Penn State is now chairing an effort by some of the top research universities in the United States to launch Internet II — an even faster, more

President's office

This virtual tour of President Graham B. Spanier's office can be found on the Web at <http://lstringer.cac.psu.edu/President/>

complex information technology network.

No matter where in the world you surf the World Wide Web from, increasingly you can see more of Penn State in ways that were not possible before. Photographs, video clips and virtual reality tours of landmark sites at University Park are now available on the Penn State home pages. And more ambitious ideas are on the drawing board for the months ahead.

The most recent addition is an expansion of so-called virtual reality photographs of Penn State sites. This endeavor follows on the heels of a project about a year ago that paired the Office of University Relations and the

Center for Academic Computing in a venture to provide a virtual reality tour of President Graham B. Spanier's office (<http://lstringer.cac.psu.edu/President/>). Visitors who point their Web browser to this site are treated to a view of the president's office in 201 Old Main. It's possibly the next best thing to actually being there.

In addition to that site, over the last few weeks the University has established virtual reality tours of another half dozen University Park locations. Now Web surfers can also take virtual spins at Pattee Library, University House, Old Main, Beaver Stadium, The Bryce Jordan Center and the Palmer Museum of Art.

Go to the University's home page (<http://www.psu.edu>) and look for the hot link for the virtual reality tours or go directly to the site at URL: <http://www.psu.edu/psuqtr/psuqtr.html>. Here you'll find a campus map along with icons indicating the buildings or areas where a virtual tour link has been established. Follow the instructions to download the images and the virtual reality software.

Doug Stanfield, coordinator of information technology in the Office of University Relations, has been working with Jim Molony in the Center for Academic Computing to develop and present the tours.

Thousands of pages of Penn State information are accessible through the Web, and much more will follow in the coming months, according to MacCarthy.

Stanfield, who also is the person who has lugged the camera and computer equipment to various locations around campus, has been receiving enthusiastic e-mail from alumni and friends of the University. E-mail fans of LionCam have written from as close as Harrisburg and as far away as California, Belgium, The Netherlands, Albania, Paris and Dubai, in the United Arab Emirates, to say the camera is a nice way for them to see what's happening back on campus, on demand, at any time. On the Web, distance and time don't matter.

LionCam will be moved around campus to other sites during the coming year and new camera sites are always being sought. Stanfield said one of the most requested views he receives from alumni around the world is for the Nittany Lion statue, but he is still working on identifying a suitable place to position the camera with a good view and a convenient connection to the Internet.

Stanfield would be happy to assist anyone who is thinking of putting up a camera on campus that could produce new LionCam images. Send him an e-mail at dws9@psu.edu with your ideas.

WISE awarded \$138,896 for fellowships and scholarships

The Women in the Sciences and Engineering (WISE) Institute has been awarded \$138,896 from the Clare Boothe Luce Program of the Henry Luce Foundation Inc. to support graduate fellowships and undergraduate scholarships for women in science and engineering at Penn State.

These Clare Boothe Luce Scholars Awards consist of two, two-year undergraduate scholarships and two, two-year graduate fellowships. The Clare Boothe Luce Program was established to encourage women to pursue science and engineering careers. Luce was born in 1903 and her career spanned seven decades until her death in 1987. Although her inter-

ests were broad, she chose to establish a legacy to benefit current and future generations of women in areas where they continue to be grossly underrepresented.

■ Application deadline for the Clare Boothe Luce Undergraduate Scholarship Award is March 7. Applicants must be full-time Penn State students and be sophomores or juniors in fall 1997 with at least a 3.3 GPA. The scholarship consists of two years of tuition/fee waiver, a \$6,000 stipend the first year and a \$7,000 stipend the second year. Students in pre-med are not eligible for this award.

■ The application deadline for the Clare Boothe

Luce Graduate Fellowship Award is Feb. 14. Applicants must be full-time students who have been admitted and will enroll in the Graduate School in fall 1997, or are currently graduate students with a minimum of two years to graduation and are seeking an M.S. or Ph.D. Medical school students are not eligible. The award consists of two years of tuition/fee waiver, a \$15,000 stipend for the first year and a \$16,000 stipend for the second year.

Application forms for both awards can be obtained by contacting the WISE Institute at 510 Thomas Building, University Park, Pa. 16802; (814) 863-0085; or e-mail to WISE@psu.edu.

Illiteracy

continued from page 1

weekly radio addresses, Clinton said the program's goal is for all American children to be able to read on their own by the third grade. Clinton said the support of the nation's colleges and universities should provide "thousands of new tutors, a down payment toward our goal of enlisting 100,000 work-study students to help America read."

The Penn State system's share of the increase in work-study funds is about \$800,000 for next year, meaning that \$400,000 could be designated for work-study students for "America Reads." With grants averaging about \$1,600, Penn State could use those funds to hire about 250 work-study students and pro-

vide about 80,000 hours of tutoring time.

Besides Penn State, the only other Pennsylvania institution taking part in the program is Gettysburg College. The other institutions are the Bank Street College of Education; the California State University System; the Community College of Denver; Chicago State University; Georgetown University; the University of Maryland at College Park; Miami-Dade Community College; the University of Mississippi; the University of Montana; Morehouse College; New York University; the University of North Carolina at Chapel Hill; The Ohio State University; Portland State University; San Francisco State University; Southern Illinois University; the University of Texas at El Paso; and the Vermont State Colleges System.

News in Brief

It's at the Nat

The following Aquacise programs are being offered this semester at the McCoy Natatorium and White Building Pool through May 2 (excluding the week of spring break from March 10-15):

■ **Low-impact:** 10 to 11 a.m., Tuesday and Thursday at the McCoy Natatorium;

■ **Water Exercise (more stretching):** 10:10 to 11 a.m., Monday, Wednesday, Friday at the McCoy Natatorium; and 1 to 2 p.m., Tuesday and Thursday at the White Building;

■ **Water Exercise (more activity):** 12:10 to 12:50 p.m., Tuesday and Thursday at the White Building;

■ **High-intensity Water Aerobics:** 8 to 9 a.m. and 5:30 to 6:30 p.m., Tuesday and Thursday at the McCoy Natatorium; 5:30 to 6:30 p.m., Monday and Wednesday at the McCoy Natatorium; 9:15 to 10:15 a.m., Saturday at the White Building.

The above programs cost \$20 per semester. When you purchase the Aquacise ticket, you may go to any Aquacise class as often as you like. You are not restricted to one class per semester.

Spring semester hours for the McCoy Natatorium and other fitness facilities follow:

McCoy Natatorium

7:15-9 a.m. — Monday through Friday (everyone); 9:45 to 11 a.m. — Tuesday and Thursday (special populations);

10 to 11 a.m. — Monday, Wednesday, Friday (special populations);

11 to noon — Monday through Friday (everyone); noon to 1:20 p.m. — Monday through Friday (faculty, staff, public);

5:15 to 6:30 p.m. — Monday through Friday (everyone); 6:30 to 9:50 p.m. — Monday through Friday (everyone incl. children);

noon to 9:50 p.m. — Saturday (everyone incl. children) and;

2:30 to 9:50 p.m. — Sunday (everyone incl. children)

Fitness Loft

6:30 to noon — Monday through Friday (everyone) noon to 1 p.m. — Monday through Friday (faculty, staff, public)

1 to 9:50 p.m. — Monday through Friday (everyone) noon to 9:50 p.m. — Saturday and Sunday (everyone)

White Building Pool

6:30 to 9 a.m. — Monday through Friday (everyone) 11 a.m. to 1 p.m. — Monday, Wednesday, Friday (everyone)

3:30 to 5 p.m. — Monday through Friday (everyone) 5 to 5:30 p.m. — Monday through Friday (faculty, staff, public)

7:30 to 8:30 p.m. — Tuesday and Thursday (everyone)

6:30 to 8 p.m. — Friday (everyone)

2:30 to 6:30 p.m. — Saturday and Sunday (everyone incl. children)

Wintertime fun

The Stone Valley Recreation Area, just 17 miles south of University Park off Route 26, provides a number of outdoor recreation opportunities, including:

■ **Ice skating:** Lake Perez annually freezes to provide ice skating opportunities (when ice thicknesses average at least six inches or greater). The use of the skating area is free of charge. Skate rentals are available weekends and on weekdays by appointment at the equipment rental at the Day Use Area.

■ **Cross country skiing:** Approximately 20 miles of trails are available for use. Use of the trails is free and group or private ski lessons are available.

■ **Ice fishing:** Lake Perez offers the opportunity to catch trout, pickerel and bass. While ice thickness normally exceeds 18 inches, caution should be used, particularly in the areas near the spillway and inlets. All regulations of the Pennsylvania Fish and Boat Commission apply. A Pennsylvania fishing license is required.

■ **Skating parties:** Night skating parties can be arranged by appointment. Postures included in this two-hour program are a lighted ice surface, a warm fire, indoor warming area and hot drinks. Group rates for skate rentals are available.

For information on any of these programs, contact Stone Valley at (814) 863-0762.

Winter blood drives

The American Red Cross, Center Communities Chapter, will conduct five blood drives on the University Park Campus this month to help rebuild depleted blood inventories from the Christmas-New Year holiday. All drives take place from 10 a.m. to 4 p.m.

- Jan. 16, Housing and Food Services Building.
- Jan. 21, HUB Ballroom.
- Jan. 23, Kern Building.
- Jan. 28, HUB Ballroom.
- Jan. 29, HUB Ballroom.

To give blood, you must weigh at least 105 pounds and be in generally good health. Donors may give once every 56 days. To confirm eligibility, call the regional Red Cross at (800) 54-BLOOD. The entire donation process takes a little more than an hour, including the health check and something to

eat. While walk-in donors are welcome, prior sign-ups help regulate donor flow. Appointments may be made by calling **Connie Schroeder**, campus coordinator, at 237-2713.

Nutrition plan for diabetic women

The Penn State Nutrition Center has developed a program to help women with diabetes understand and use the food label when grocery shopping. The program explains how to apply numbers and terms on the label to select appropriate products for people with diabetes. Women 40-60 years old with adult-onset diabetes are eligible for the program.

Participants will be assigned to one of two groups. The first group will participate in nine weekly group sessions beginning in March. The second group will receive all material in the mail. Participants will be reimbursed for completing the program. To learn more, call (814) 863-3930. This program is under the direction of **Cheryl Achterberg**, professor, Department of Nutrition.

Health Promotion Programs

The following programs are being offered by the Office of Human Resources:

Yoga Series

Two seven-week sessions are offered; each meets from noon to 1 p.m. in 110 Henderson Building (The Living Center). Cost: \$35 per session, reimbursable to HMO participants.

Session 1: Tuesdays, Jan. 28-March 11

Session 2: Tuesdays, March 18-April 29

Employee Assistance Program (EAP) Courses

Overview of Penn State's EAP services and a brief illustration of the counseling process. Meets Wednesday, Jan. 29, from 1:30-2:15 p.m., in 118 Reber Building, Cost: None.

EAP: The Supervisor's Role

Meets Wednesday, Jan. 29, from 1:30-3:30 p.m., in 125 Reber Building, Cost: None.

To register for any health promotion courses, contact **Jan Hawbaker** at 865-3085 or JQH3@psu.edu.

Join the Listserve

Stay informed about all health promotion programs and health information by joining the new Health Promotion Listserve. To join, send first and last name, and e-mail address to JQH3@psu.edu.

Colloquium offers chance for professional development

Continuing and Distance Education and the College of Education's Adult Education Program are sponsoring an Adult, Continuing and Distance Education Colloquium series during spring semester. This professional development opportunity is designed for Penn State faculty and staff, students and anyone interested in exploring issues relating to the field of adult, continuing and distance education.

The programs, open to the public, also will be available to participants at a distance by way of audio technology. The colloquia will be held on Mondays from 11:45 a.m. to 1 p.m. in 502 Keller Building on the University Park Campus. Participants are welcome to bring a bag lunch to the program.

The series includes these sessions:

— Jan. 20: **Georgia C. Abbey**, senior conference planner for C&DE's Conferences and Institutes, "Creative Component in the Development of Conferences."

— Feb. 10: **Sara J. Parks**, associate dean and associate professor, College of Health and Human Development, "Professional Perspective on Lifelong Learning."

— Feb. 17: **Kimberly A.**

Townsend, human resource development specialist and assistant professor of adult education, "Human Resource Development Function as an Adult Education Application."

— Feb. 24: **David Lewis**, visiting Fulbright Scholar and chief inspector and head of training, Durham Police Training Centre, "Continuing Professional Education in Great Britain."

— March 3: **Dale A. Moore**, research associate in veterinary science, College of Agricultural Sciences, "Continuing Professional Education Program for Veterinarians."

— March 24: **Ann H. Luck**, instructional design, C&DE's Department of Distance Education, "Nuts and Bolts of Distance Education Capabilities."

— April 14: **Wesley E. Donahue**, director of C&DE's Management Development Programs and Services, and **John E. Park**, assistant director of Management Development, "Management Development Program from an Adult Education Perspective."

For more information, contact **Donna S. Queney** at (814) 863-7752 or **Ginny Garza** at (814) 237-6375.

Lecture explores technology's role, market trends in food service industry

This year's "Food Service Manager 2002 Institute" explores the role of computer technology and innovation along with unfolding market trends in the food service industry. Slated for Feb. 17-18 on the University Park Campus, the conference will feature a host of speakers and topics, including:

■ **Keynote speaker Robert N. Grimes**, president of the Cyntergy Corporation of Gaithersburg, Md., who will discuss "Computer Technology: How Will Cyberspace and the Internet Impact Food Service?";

■ **Food Safety and Technology**, an overview of safe food handling practices presented by the USDA;

■ **A panel presentation on "Management Recruitment Model for the 90s: State of the Art Tools in Use"**, with panelists from the food service industry;

■ **A panel presentation on "Forging Partnerships: Association, Industry and Academia."** Among the panelists will be **Franco Harris**, owner of Super Bakery Inc. and Parks Sausages, and **Basil M. Cox**, president and CEO of Eat 'n' Park Restaurants.

■ **"Roles, Challenges and Opportunities for Executive Chefs: An Outlook for the Future,"** presented by **Paul Gotzman**, Marriott Corp., and **John Metz Jr.**, Friday's Restaurants.

The institute will be held at the Nittany Inn and both Mateer and Keller buildings. For more information about the program, send e-mail to **Peter L. Bordin** at PLB@PSU.EDU. For information on registration and fees, call **Suzanne N. Pierre**, conference planner, at (814) 863-5140, or visit the conference Web site at <http://www.cde.psu.edu/C&I/FoodService/>.

Motivational speaker to address Feb. 3 conference

Will Keim, a motivational speaker who has addressed more than 750 million students on 750 college and university campuses around the world, will be the keynote speaker at a Feb. 3 conference on service leadership at The Penn State Schuyl campus.

Keim is the author of *Life After College: Lessons for Students in Transition*, *The Education of Character: Lessons for Beginners* and *Spirit Journey: A Walk Through Matthew*. Named "outstanding professor of the year" at Oregon University State University for 1985-86, Keim has been an educator, residence hall director, educational program coordinator and campus minister. He has B.A. and M.A. degrees from the University of the Pacific, Calif., and a Ph.D. in education from Oregon State.

The theme of this year's conference, sponsored by the AT&T Center for Service Leadership at University

WILL KEIM

Park is "Serving the Community, Leading Each Other." The conference is designed for student leaders, human service agency representatives, student affairs administrators, faculty and others interested in integrating service or service-learning into college and university curricula. It has two tracks, one for

student participants (with eight workshops) and one for professionals (with 12 workshops).

Also, a poster session will allow participants an opportunity to display community service and/or service leadership projects led by their organizations. The registration deadline for the conference is Jan. 17. For more information on the program or on registration, contact **Melissa Frank-Alston** at (814) 863-4624.

Harrisburg business lectures tackle series of national, international topics

The 1997 Downtown Harrisburg Lecture Series, Current Issues in Business, has kicked off and will feature nine more talks throughout the year. Presented by the Penn State Harrisburg School of Business Administration, the series covers issues of both international and national importance. The talks, from noon to 1 p.m., are held at the Eastgate Center on North Seventh Street. For more information

about the series or to reserve seats, call the center at (717) 772-3590.

Events through March follow:
■ **"Doing Business in Japan: A Case Study,"** presented by **Shohei Yonada**, international sales manager for Masland Division of Lear Inc., on Feb. 11.

■ **"Economic Issues in Welfare Reform,"** given by **Jacob DeRooy**, associate professor of finance at Penn State Harrisburg, on March 11.

Olympic gold medal winner to give Luchinsky Memorial Lecture Jan. 29

Kurt Angle, who won an Olympic gold medal in wrestling in Atlanta during the 1996 Games, will give the 1997 Luchinsky Memorial lecture on how he overcame adversity to realize his goal of winning the gold. He will speak at 7:30 p.m. Wednesday, Jan. 29, in the HUB Assembly Room on the University Park Campus.

The annual lecture is sponsored by the University Scholars Program and is endowed by family and friends to honor the memory of **Mark Luchinsky**, a University Scholar and a biochemistry major who died in 1995.

For more information, contact **Martha Anandakrishnan** in the scholars office at 863-2635.

Series explains children's behavior

An upcoming three-part discussion series at the Penn State Downtown Center in Harrisburg is geared to help parents and teachers understand why children behave the way they do.

"Proud Adults, Proud Children" will be presented free on the evenings of Jan. 16, 30 and Feb. 6 and will feature two recognized experts in the field of education and behavior.

James Levin, associate professor with the Graduate School of the College of Education at the University Park Campus, and **John Shanken-Kaye**, a parent and educational consultant in private practice in Doylestown, will conduct the 7 to 9

p.m. session targeting the behavior of children and adolescents.

The first session will focus on "Understanding Why Children Behave as They Do." The topic of the second session is "Encouraging the Pro-Social Behavior of Children and Adolescents: From Disruption to Achievement," and the series concludes with "Managing the Anti-Social Behavior of Children and Adolescents: The Self-Control Child."

The presentations, featuring a workshop format, are free to the public. For information, call the Penn State Downtown Center at (717) 783-0433.

Getting ready

Faculty aren't the only ones who had to gear up for the students' return to the campuses for spring semester. Several departments across the University see an increased workload tied to the start of the semester. Todd Emel was busy at Copy Center Services on the University Park Campus, copying syllabi for instructors to hand out on the first day of classes Jan. 13. For a story about preparations in the Penn State Bakery, please see page 1.

Photo: Greg Grieco

More Lectures

Tenure-track faculty workshops

All junior faculty on tenure track are welcome to participate in a three-part series of workshops being offered on the University Park Campus this spring by the Office for Faculty Development. The workshops for this semester include:

- "Promotion and Tenure for Junior Faculty" Saturday, Jan. 25, from 9 a.m. to noon in 114 Kern Building; Blainie Bowen, senior faculty mentor and professor of agricultural and extension education, will be the speaker. Reservations must be made by Jan. 22.
- "Seeking Grant Funds Electronically" Saturday, March 1, from 9 a.m. to noon in 110 Agricultural Sciences and Industries Building; Robert Killore, director of sponsored programs, will speak. Reservations for this workshop must be made by Feb. 26.
- "Teaching and Mentoring Minority Undergraduates (Effective Approaches and Strategies)" Friday, March 21, from 2 to 4 p.m. in 301A Agricultural Administration Building; Fred Cannon, assistant professor of civil and environmental engineering; Dan Trevino, assistant dean, College of Health and Human Development; Lisa Williams Walton, assistant professor of business logistics; and Howard Wray, associate dean for undergraduate education, will speak. Reservations must be received by Tuesday, March 18.

For more information on these workshops or to make reservations, contact Tammy Snook at (814) 863-1663.

Fitness, nutrition program for women

For many women, balancing a busy, pressure-intensive lifestyle with good nutrition and proper amounts of exercise can sometimes be a daunting task. Two leading experts in the fields of strength training and nutrition will lead area women through interactive sessions at a one-day program, "Getting it Together: Fitness and Nutrition for Women," Saturday, Feb. 1, at The Penn State Scanticon.

This second annual program is divided into two primary focuses: 1) "Strength and Resistance Training and the Benefits for Women," led by Wayne Campbell from Penn State's Noll Laboratory for Human Performance Research; and 2) "Nutrition for the Busy Lifestyle," led by Star Campbell who will teach methods to make good nutrition an active part of a busy lifestyle.

Each session includes demonstration and participation. The strength training sessions include participation and demonstration of various exercises (comfortable dress and shoes are recommended). The nutrition sessions will include taste tests and recipe analysis.

The program begins at 9 a.m. and continues until 3:45 p.m. Handouts and lunch will be provided. Partial reimbursement for HealthAmerica members (HealthAmerica, HealthAssurance, Advantia) is available. For registration information, please call (800) 778-8632.

Libraries offer seminars on several LIAS databases

The University Libraries are offering the following series of seminars during the spring semester to help library users learn more about the growing number of databases accessible through the Library Information Access System (LIAS) and on CD-ROM. LIAS searching techniques that enable users to maximize their searching power also will be presented.

In an effort to accommodate as many participants as possible, some sessions are offered more than once. To register or learn more about the seminars, send an e-mail to signup@psulias.psu.edu. If you have any additional questions, contact Doris Herr at (814) 863-0325. Seating is limited, so register early. Information on the seminars can be found by typing HELP WORKSHOP when using LIAS or on the Libraries' Web site at <http://www.libraries.psu.edu>.

■ Penn State Libraries Catalog in LIAS

Jan. 21, Feb. 26: 10 a.m.-noon; Jan. 30: 4-6 p.m.; Feb. 7: 8:30-10 a.m.; Feb. 10: 3-5 p.m.; all in Tower Room 402, Central Pattee Library.

■ AGRICOLA electronic database

Jan. 28: 3-5 p.m. in Tower Room 402, Central Pattee Library.

■ Beilstein CrossFire (organic chemistry)

Feb. 10: 10 a.m.-noon in Room 5, Central Pattee Library.

■ Career Sources on the Web

Feb. 20: 5:30-7 p.m. in Tower Room 402, Central Pattee Library.

■ Career Sources on the Sciences on the World Wide Web

Feb. 14, 10 a.m.-noon, in Tower Room 402, Central Pattee Library.

■ Census Data on the Internet

Feb. 25: 8:30-10 a.m. in Tower Room 402, Central Pattee Library.

■ Chemical Abstracts

Jan. 27: 10 a.m.-noon in Reference Lecture Room, East Pattee Library.

■ Citation Indexes

Participants can learn techniques for searching Science Citation Index, Social Sciences Citation Index and Arts and Humanities Citation Index. Feb. 3: 10 a.m.-noon in Reference Lecture Room, East Pattee Library.

■ Congress and the Legislative Process on the Internet

March 25: 8:30-10 a.m. in Tower Room 402, Central Pattee Library.

■ Earth Sciences

Jan. 22: 5-7 p.m.; Feb. 21: 8-10 a.m.; in Tower Room 402, Central Pattee Library.

■ Education databases

Jan. 22: 1-3 p.m.; March 17: 10 a.m.-noon; in Tower Room 402, Central Pattee Library.

■ Electronic Text in the Humanities

March 27: 10-noon, Tower Room 402, Central Pattee Library.

■ Engineering databases

Feb. 11: 10 a.m.-noon; April 1: 6-8 p.m.; in Tower Room 402, Central Pattee Library.

■ History

Feb. 5: 10 a.m.-noon; Tower Room 402, Central Pattee Library.

■ Interlibrary Loan

Jan. 27: 3-5 p.m. in Tower Room 402, Central Pattee Library.

■ International Sources on the Internet

Jan. 21: 5:30-7:30 p.m. in Tower Room 402, Central Pattee Library.

■ Literary and Historical Manuscripts

Jan. 22: 10 a.m.-noon in Tower Room 402, Central Pattee Library.

■ Literature databases

March 20: 10 a.m.-noon in Tower Room 402, Central Pattee Library.

■ Literature Resources on the Internet

Feb. 27: 10 a.m.-noon in Tower Room 402, Central Pattee Library.

■ Maps and Spatial Data on the Web

March 6: 10 a.m.-noon in Tower Room 402, Central Pattee Library.

■ MEDLINE database

MEDLINE indexes more than 3,600 journals in the fields of health, biomedicine, clinical medicine, nursing, veterinary science and dentistry.

Jan. 29: 8-10 a.m. in Tower Room 402, Central Pattee Library.

■ Molecular Biology

Jan. 23: 3-5 p.m. in Tower Room 402, Central Pattee Library.

■ Multicultural and Diversity Resources

Jan. 23: 5:30-7:30 p.m. in Tower Room 402, Central Pattee Library.

■ Music

March 4: 10 a.m.-noon in Tower Room 402, Central Pattee Library.

■ NEXIS

Feb. 4: 1-3 p.m.; March 5: 10 a.m.-noon; in Tower Room 402, Central Pattee Library.

■ Psychology

Feb. 21: 10:30 a.m.-noon in Tower Room 402, Central Pattee Library.

■ Sociology and Anthropology

Feb. 13: 1-3 p.m. in Tower Room 402, Central Pattee Library.

■ Spanish & Latin American Resources

Feb. 26: 1-3 p.m.; March 18: 10 a.m.-noon; in Tower Room 402, Central Pattee Library.

■ Women's Studies

Feb. 6: 8:30-10 a.m. in Tower Room 402, Central Pattee Library.

Appointments

Interim director named for University's Disability Services

Diane Resides, counselor for the Center for Adult Learner Services, has been named interim director of Penn State's Disability Services.

The office helps students with disabilities make a successful transition to and through their University experience. The office also helps accommodate employees with disabilities; educates staff and students on the needs of people with disabilities; is an advocate for and on behalf of people with disabilities and fosters an accepting and affirming environment at the University.

As a counselor for adult learners since 1990, Resides managed the daily operations of the Center for Adult Learner Services in the director's absence, and provided professional assistance to adult students and referral services to those with academic, personal, social or psychological problems. She was the liaison with a number of student service offices and also has developed a seminar series on women's career and life planning.

In spring 1994, she served as assistant to the director of the Office for Disability Services, where she worked with students with disabilities on their needs assessments and arranged appropriate services. She worked with the scholarship selection committee, collaborated with other University offices to improve services to students, and developed a newsletter and brochure on disability services for students. Resides also has served as coordinator in the residence hall program, where she supervised the daily operation of a residence hall community of 860 students.

Before joining Penn State, she held several positions in the community. She is a 1981 graduate of Penn State with a bachelor's degree in education in administration of justice. She received an M.Ed. in counselor education with an emphasis in rehabilitation in 1989 and expects to receive her D.Ed. in adult education from Penn State this year.

Fayette announces holder of Elouise Ross Eberly Professorship

Theresa Balog, assistant professor of nursing at the Penn State Fayette Campus, has been named the holder of the Elouise Ross Eberly Professorship in the School of Nursing there. The position is one of two such professorships funded by the Robert E. Eberly Foundation of Uniontown, which in 1994 committed \$1 million to the School of Nursing. The school enrolls nearly 800 students statewide, including those in the associate degree nursing program at Penn State Fayette, where Balog's professorship is located.

Balog will retain the rank of assistant professor and will continue all associated responsibilities in her position at the campus. She originally joined the faculty as an assistant professor and coordinator of nursing in July 1994. She is a 1969 graduate of the Allegheny Valley Hospital School of Nursing and earned a bachelor's degree in nursing from Duquesne University in 1963. In 1968, she received a master's degree in nursing from the University of Pittsburgh and a doctorate in higher education administration in 1984.

She served as assistant vice president of academic affairs at Chatham College and served as a con-

sultant to that institution for the development of a four-year, baccalaureate-degree nursing program. Balog also served as an adjunct assistant professor in the graduate program in nursing education/administration at the University of Pittsburgh (1987-1990), and was an assistant professor and director of the pediatric affiliate nursing program there from 1977 to 1981. During that time, she designed and implemented a pediatric affiliate nursing program for 13 hospital schools of nursing in Western Pennsylvania. From 1972-1977, she was a tenured associate professor of nursing at Duquesne University. From 1968-1972, she was an instructor of maternal/child nursing with a joint appointment to the pediatrics and obstetrical faculty.

For seven years, Balog served as assistant dean of instruction, nursing, at the Community College of Allegheny County, Center-North Campus, where she developed and implemented a satellite program in nursing and redesigned its nursing program to a two-year associate degree program. Her clinical nursing experience includes several years as a staff nurse and nurse supervisor at Children's Hospital of Pittsburgh. She also was director of the Uniontown Hospital School of Nursing.

She is listed in several *Who's Who* guides and currently serves on the board of trustees and is chairwoman of the Scholarship Committee for the Nightingale Awards of Pennsylvania.

Graduate school dean is appointed interim vice president for research

In addition to his post as dean of the Graduate School, Rodney Erickson has been named interim vice president for research at Penn State. David Shirley, current senior vice president for research and graduate education, retired at the end of December and returned to Lawrence Berkeley Laboratory, where he is director emeritus.

In addition to his administrative positions, Erickson is a professor of geography and business administration. He was head of the Department of Geography in the College of Earth and Mineral Sciences from 1990-94. From 1981 to 1995, he served as director of the Center for Regional Business Analysis and, from 1984-1995, was associate director of the Division of Research in The Smeal College of Business Administration. He was appointed dean of the Graduate School on July 1, 1995.

Erickson has published widely in the areas of economic geography and regional science and is a member of the editorial boards of four major scholarly journals. He is a former Fulbright Research Scholar in the United Kingdom, a Simon Senior Research Fellow at the University of Manchester and a National Science Foundation/American Statistical Association Research Fellow at the U.S. Bureau of the Census. Currently, he is conducting research on the foreign trade and investment relationships of manufacturing and service industries across U.S. regions.

DuBois Campus welcomes new health services coordinator

Libeth "Libby" Hoover has been named health services coordinator at the Penn State DuBois Campus. In this position, she will oversee wellness activities to help ensure a safe and healthy environment for students, faculty and staff.

After receiving her R.N. from St. Luke's Hospital in Bethlehem, Pa., Hoover joined the Air Force, serving two years in Utah and New York before returning to Pennsylvania. She then worked with Parkersburg Medical Associates, Punxsutawney Home Health and the Pennsylvania Department of Health. During this time, she received her bachelor's degree in nursing from Indiana University of Pennsylvania and school nurse certification from Slippery Rock University.

McKeesport appoints director of development, university relations

Peter B. Irvine has been appointed director of development and university relations for the Penn State McKeesport Campus. The position has responsibility for all development functions, including grant writing, and oversight for university relations activities.

Irvine is a certified fund raising executive and gift planning consultant for educational, religious and nonprofit organizations. He is a member of the National Society of Fund Raising Executives and served as director of planned giving from 1992 to 1995 at the University of Pittsburgh, where he directed the raising of nearly \$5 million annually in planned gifts. During his tenure, the university completed a \$250 million capital campaign. From 1989 to 1992, he was associate director of planned giving there.

Irvine served as the director of development and grant writer/researcher from 1983 to 1989 at Seton Hill College. He holds a doctor of jurisprudence from the University of Tennessee College of Law and a bachelor of arts degree from the University of Tennessee at Chattanooga. He earned a certificate in theology from the University of the South School of Theology. He has served as president of the Pittsburgh Planned Giving Council and as president of the University of Pittsburgh Stock Club.

Interim dean named for Libraries

Gloriana St. Clair, associate dean for Information Access Services, has been appointed to serve as interim dean of the University Libraries. Former Dean Nancy Cline left to accept a position at Harvard.

As interim dean, St. Clair will lead the Libraries through a period of transition, focusing on construction of the new addition to Pattee Library and the creation of a five-year strategic plan. In addition to her duties as interim dean, she also will serve as interim associate dean of planning and administrative services.

In the past, St. Clair has taught as an assistant professor at Western Carolina University and the College of Charleston in Charleston, S.C. She also has served as an adjunct full professor at Walsh College in Troy, Mich., and a teaching associate at the University of Texas at San Antonio. Currently, St. Clair is editor of *The Journal of Academic Librarianship*. She also serves as a member of the Association of Research Libraries, the Coalition for Networked Information Task Force, the Committee on Institutional Cooperation (CIC) Library Directors' Group, the Research Library Group, the American Library Association, and the Association of College and Research Libraries, among others. From 1990-1996, she was editor of *College & Research Libraries*.

While at Penn State, St. Clair has served on several committees including the Council of Academic Deans, the Administrative Committee on the Commonwealth Educational System and the World Campus Study Team. She received a B.A. in English and a Ph.D. in literature from the University of Oklahoma, a master's of library science from the University of California, Berkeley, and an MBA in management from the University of Texas, San Antonio.

Gloriana St. Clair

Partings

Great Valley CEO heading to West Virginia

Lawrence S. Cote, CEO at Penn State Great Valley will leave effective March 15 to become associate provost for extension and public service at West Virginia University.

In his new post, Cote will lead West Virginia University's state-wide service mission, whose constituents include federal and state government agencies, business and industry, public and community organizations, local education boards and county commissioners and other colleges and universities. More specifically, he will provide overall leadership for the university's outreach programs, including general extension,

cooperative extension and the state 4-H Conference Center, as well as leading an aggressive, broad-based effort to enhance WVU's outreach across the state.

Cote, who joined Great Valley in the late 1970s, includes among his accomplishments at the campus the tripling of the graduate enrollment, the development of funded research and the establishment of an external support program. During his tenure, he spearheaded a high-profile outreach effort that included collaborations with area business and industry, chambers of commerce and local legislators.

Cote joined Penn State Great Valley after serving previously in administrative positions at several Penn State locations. He was named campus executive officer in 1983, when the campus was still based in King of Prussia, and led its expansion and relocation to the Great Valley Corporate Center in 1988. Cote is the graduate center's third executive officer.

A Phi Beta Kappa graduate of Penn State with a bachelor's degree in speech communications, Cote earned a master's degree from Lehigh University and a doctorate in educational administration from

Temple University. His service to the community includes sitting on the board of directors of the Western Main Line YMCA, serving as secretary, vice chair and on the board of directors of the Chester County Chamber of Business and Industry; as president, second vice president and on the board of the Great Valley Regional Chamber of Commerce; on the Chester County Council Executive Board of the Boys Scouts of America and on the board and as secretary/treasurer of the American Defense Preparedness Association's Philadelphia Chapter, among dozens of other roles.

Longtime professor of geology retires with emeritus rank

Albert L. Guber has retired with the rank of professor emeritus of geology after 34 years of service in the College of Earth and Mineral Sciences.

He joined the Penn State faculty in 1963 as an assistant professor and became associate professor in 1969 and professor in 1983. He served as chairman of the Geology Graduate Program from 1985 to 1988 and as associate head of undergraduate programs from 1991 to 1996. At the time of his retirement, he administered the geosciences undergraduate major and the earth sciences major.

Over the past five years, he has been involved in developing a new curriculum for program majors including a hydrogeology option, establishing a minor in geosciences, implementing a senior thesis requirement and establishing an undergraduate advisory board for students in geosciences, a graduate student mentor program, an undergraduate student research room and dedicated undergraduate computer laboratories.

For many years, he also has served as faculty adviser and friend to the Geosciences Club, the Marine

Science Society, Sigma Gamma Epsilon and Sigma Nu social fraternity.

Guber is widely known to alumni by his development of the Marine Sciences Program and his course on coastal geology. The course, given at Wallops Island, Va., was instrumental in attracting many students to the geosciences and encouraging them to adopt worthy field research habits. In 1994, he received the Provost's Award for Collaborative Teaching and, in 1996, was recognized by the Wilson Award for Outstanding Teaching.

He is author of a number of geological research papers and was elected as a Fellow of the Geological Society of America in 1988. Guber holds a B.S. in geology from the University of Pittsburgh and Ph.D. in geology from the University of Illinois at Urbana.

He is a member of the American Association for the Advancement of Science, the Geological Society of America, the Paleontological Society, the Society of Economic Paleontologists and Mineralogists, Sigma Gamma Epsilon and Sigma Xi.

Sports historian and critic retires after 28 years as University professor

In 28 years at Penn State, sport historian Ronald A. Smith, professor of exercise and sport science, earned a reputation as one of intercollegiate athletics' keenest critics. Perhaps that's because Smith, who has retired, is also a passionate fan.

Smith, author of dozens of articles and several books on intercollegiate athletics, including the landmark history *Sports and Freedom* (Oxford University Press) published in 1988.

No blind love, Smith's passion is born of both personal experience and historical perspective. Recruited by Northwestern University to play basketball and baseball, Smith graduated with a degree in history in 1958. A short stint with the Chicago White Sox minor league club followed. He then taught history and coached at the high school level before earning a master's in history from the University of Wisconsin in 1966. He followed that up with a Ph.D. in physical education from Wisconsin in 1969. The previous year, he had joined the Penn State faculty.

Ronald A. Smith

Since then Smith has trained an unflinching investigative eye on intercollegiate sports, exploring the history of the NCAA, and exposing what he sees as ongoing problems within the organization and its member schools.

Though officially retired, Smith continues to shepherd the four graduate students he advises through to the completion of their programs. He's also at work on several new books — one on the influence of radio and television on college sports, another volume on the history of intercollegiate athletics in the 20th century, and a collection of love letters by turn-of-the-century Harvard football coach Bill Reid, whose diary Smith edited in 1994.

A resident of Lemont, Smith also plans to spend more time on the Lemont Granary restoration project and to roll up his sleeves for Habitat for Humanity.

Smeal records manager ends years of service

Coleen M. Fornwalt, student records manager

for The Smeal College of Business Administration's undergraduate programs, has stepped down after nearly 30 years of service to Penn State. Fornwalt, who formally retired during the fall semester, was a member of the college's staff since 1977 and was responsible for the official materials of thousands of business students.

She began her career at the University in 1968 as a records clerk in the University's Transcripts Department, then moved to the Records Section. In 1969, she joined the College of the Liberal Arts, where she was supervisor of records in the dean's office until 1977 when she became a staff member of The Smeal College.

Coleen M. Fornwalt

Awards

Two on Eberly faculty garner national awards

Assistant professor is 1996 Searle Scholar

J. Martin Bollinger Jr., assistant professor of biochemistry and molecular biology, is one of 15 scientists nationwide to receive a 1996 Searle Scholar Award.

According to the Searle Scholar Program, this year's winners, chosen from 160 candidates at 86 universities, were selected for exhibiting "evidence of having the potential to make significant contributions to biomedical research over an extended period of time."

The awards are intended for young biomedical scientists who are newly appointed assistant professors. Each Searle Scholar is awarded a three-year grant of \$180,000 to support his or her research efforts. Bollinger's research concerns mechanisms of assembly of complex metal ion co-factors in enzymes and regulatory proteins. He works with several molecular systems that have relevance to human health.

Bollinger earned a bachelor's degree in chemistry in 1986 from Penn State and a doctoral degree in biochemistry in 1993 from the Massachusetts Institute of Technology. He was a postdoctoral fellow at Harvard Medical School before joining the Penn State faculty in 1995.

J. Martin Bollinger Jr.

Young scientist is named 1996 Cottrell Scholar

Karl Todd Mueller, assistant professor of chemistry, has been selected as one of 18 young faculty scientists nationwide to receive the 1996 Cottrell Scholar Award from the Research Corporation, a foundation for the advancement of science.

The recipients of the award this year include seven chemists, 10 physicists and an astronomer. They were selected from among university faculty nationwide because of their "excellent research proposal, good plans to improve science teaching and a vision for the improvement of the academic science community."

Mueller was recognized for his contributions to undergraduate and graduate teaching and for his commitment to pursuing a career as a teacher-scholar. This award will help support Mueller's research in nuclear magnetic resonance spectroscopy.

The Cottrell Scholar Award is named for Frederick Gardner Cottrell, the scientist, inventor and philanthropist who established Research Corporation in 1912. The foundation's goal is "to make inventions more available and effective in the useful arts and to provide means for scientific research and experimentation."

Karl Todd Mueller

Penn College center among top 10 facilities in nation

The Autodesk Authorized Training Center operated by the Pennsylvania College of Technology's Technology Transfer Center has been named one of the top Autodesk training centers in the nation. The local center received two awards by ranking in the "Top 10 Curriculum Rating" and "Top 10 Facilities and Equipment Rating" categories established by Autodesk. The ratings are tabulated with the assistance of a rating sheet filled out by each student who attends an Autodesk class.

There are 165 Autodesk authorized training centers in the nation. The centers provide instruction in Autodesk software products, including AutoCAD (computer-aided drafting), 3D applications and mechanical design. Penn College's center is managed by **Richard C. Mason II**, CAD specialist for the Technology Transfer Center.

Student Affairs recognizes five on staff for their outstanding service to students

Five staff members have received awards for outstanding service to students. Honored were **Maureen Gaffney**, Penn State Hazleton; **Fredina Ingold**, Penn State Altoona; **Terri Caputo**, Penn State Worthington Scranton; **Kathryn Watson**, Penn State Shenango; and **Margaret Spear**, University Park.

Student Affairs has recognized staff members for "Outstanding Services to Students" since 1991. Awards are made through the Council for Chief Student Affairs Officers and coordinated by University Park's Campus Student Affairs.

Gaffney, coordinator of Health Services at Hazleton, received an Achievement Award for her work in developing a total health services program, a campus counseling network, a women's health clinic and a self treatment station. She implemented the first Web site in the Commonwealth Educational System, is an advocate for sexual harassment victims and conducts seminars and workshops on health issues and wellness.

Ingold, currently director of athletics and assis-

tant director of marketing and recruitment, Altoona, won an Achievement Award for recruiting efforts that helped Altoona set enrollment records for the past two years.

Caputo, assistant to the director of student programs at Worthington Scranton, won the Campus Program Award for coordinating a scholars program, encompassing 22 school districts.

Watson, chief student affairs officer at Shenango, received the Outstanding Chief Student Affairs Officer Award for her work in identifying and assessing issues important to students throughout the Penn State campus system. She has chaired the Student Affairs Assessment Committee for the past two years.

Spear, director of University Health Services, won the award for Outstanding Service to the Campuses. Spear and her staff organized the Prematriculation Immunization Program that protects incoming students at all campuses. Full immunization began in the fall 1996.

Professor is 1996 Educator of the Year

John W. Tippecannc III, professor of education, has received the 1996 Educator of the Year Award from the National Indian Education Association. The award is presented annually to an outstanding educator in recognition of a commitment to excellence in learning and outstanding service to Indian education.

Tippecannc joined the faculty of the College of Education in 1996. He holds the position of professor, as well as director of the American Indian Leadership Program within the Department of Education Policy Studies.

Before coming to Penn State, Tippecannc served as professor of educational leadership and policy studies at Arizona State University. He also is former director of the Office of Indian Education Programs within the U.S. Department of the Interior, and director of the Office of Indian Education within the U.S. Department of Education. He earned both M.Ed. and Ph.D. degrees from Penn State's educational administration program, and holds a B.S. from Oklahoma State University. In 1995, he was recognized as a Penn State Alumni Fellow.

John W. Tippecannc III

Penn State Press is Employer of the Year

The Penn State Press received the Employer of the Year Award in Leadership/Work Experience from the Private Industry Council of Centre County Inc.

This award was made on the basis of a six-month internship coordinated by the marketing department of the Press.

The Private Industry Council offers a wide variety of programs that help citizens of Centre County obtain rewarding, full-time employment, from workplace literacy to on-the-job and classroom training.

Researchers study how sediment basins filter silt

By ANDREA ELYSE MESSER
Public Information

Muddy water. That's what you get when a typical summer thunder storm dumps on a construction site and that is why developers in Pennsylvania and many other states are required to dig sediment basins to remove silt from runoff.

"Typically, urban sediment basins are designed so that they can be converted to storm water retention basins when construction is completed," Albert R. Jarrett, professor of agricultural and biological engineering, said. "An outflow device, usually a perforated riser, is installed in the spillway of a basin to create a sediment basin during the construction phase and removed when construction is complete." A perforated riser is a vertical pipe with holes in it.

Storm water retention basins can be seen nearly everywhere and are used for dispersed flood control. Most of these storm water retention basins begin life with the aim of removing sediment from construction site runoff.

To test sediment removal methods, the researchers built their own 7,000 cubic foot sediment basin, the size prescribed for a one-acre construction site.

"We tested four sediment removal methods in the basin with 12 simulated

Albert R. Jarrett, professor of agricultural and biological engineering, checks the basin skimmer at the research sediment basin at the Russell E. Larsen Agricultural Research Center at Rock Springs.

Photo: Greg Grieco

runoff events, each equivalent to a two-year, 24-hour storm," Jarrett said. Such a storm is the capacity requirement for sediment basins in Pennsylvania.

The removal methods tested by Jarrett and graduate student J. Millen were the perforated riser, a skimmer system, a perforated riser with barriers and the

skimmer with barriers. Sediment basin technology is limited to equipment that has no moving parts. Filling and draining of the basin are aided only by gravity and physical design.

The researchers found that the skimmer allowed, the least amount of soil, about 37 pounds, to escape from the basin, but that the addition of barriers in the bottom of the basin did not improve or degrade the skimmer's efficiency. The perforated risers allowed 70 pounds of sediment to escape the basin. The barriers did, however, significantly improve the performance of the perforated risers allowing only 54 pounds of sediment to escape.

The skimmer, which was designed by J. W. Faircloth of the Orange County Planning Department in Hillsborough, N.C., consists of a device that floats on top of the water impounded in the basin and is probably more efficient because it removes water from the surface zone, which is the cleanest. The perforated riser removes water from near the bottom.

The researchers are also building a second, experimental basin that will hold only 1,800 cubic feet of water. This basin will help evaluate sizing requirements, which are currently 7,000 cubic feet per acre in Pennsylvania, but much smaller in other states.

Research

KISS
gene
promising
in battle
against
spread
of cancer

Researchers in the College of Medicine at The Hershey Medical Center discovered a new gene that suppresses the metastasis, or spread, of melanoma, an often-fatal skin cancer.

According to a report, the gene reduces the spread of melanoma in laboratory mice and may help in determining whether human melanomas are prone to spreading. The gene, called KISS-1, was isolated from the cells of malignant melanomas by Jeong-Hyung Lee, a postdoctoral pathology fellow from Korea, and Dan R. Welch, assistant professor of pathology at the College of Medicine's Jake Gittlen Cancer Institute.

Though the KISS-1 gene does not completely prevent metastasis, "it does keep it from spreading at least 50 percent of the time," Welch said. "KISS-1 may be the most potent gene to block or suppress metastasis in human cancer."

The name of the KISS-1 gene was inspired by the Hershey candy. The "SS" in KISS-1 stands for "suppressor sequences," according to Welch, and the rest "simply makes it easily identifiable with Hershey."

Reduced gender gap in wages is deceptive

The apparent shrinking of the gender gap in salaries is due less to improvement in women's wages than to a decline in the wages of many men due to structural changes in the labor force.

"Furthermore, the growing income inequality among men is being reflected also among women," Martina Morris, associate professor of sociology and statistics, said. "While a small number of women have moved into high-income brackets, most have not."

Morris conducted the research with Annette Bernhardt, senior research associate with the Institute on Education and the Economy, Teachers College, Columbia University, and Mark S. Hancock, associate professor of statistics.

America's shift to a service-based economy in the 1980s generated a striking increase in earnings inequality for American workers. Men were affected more than women.

"In the end, we find that in fact women's gains were often really men's losses in disguise," Morris said.

Tests of mental skills may predict dementia

A new study suggests that a series of fairly simple cognitive tests can predict which older adults will develop Alzheimer's disease or other dementia.

Those who scored poorly on the tests were 11 times more likely to show symptoms of dementia two years later than were their healthy counterparts.

"We're able to show that for the 'oldest old'—those age 85 and older—mild cognitive problems are reliable early markers of dementia," Steven H. Zarit, professor of human development and a co-investigator on the project, said.

The tests can help distinguish between ordinary forgetfulness and the beginning of more serious, disabling memory loss, Zarit said.

The research was conducted in Sweden by Boo Johansson of the University College of Health Sciences in Jonkoping, Sweden, and by Zarit.

Registered nurses examined the participants four times over a six-year period, collecting data on health, functional abilities, mood and related measures. They also gave each participant five tests of mental skills.

The researchers found that test scores not only could predict who

would become impaired, but also who was likely to die in the next two to four years. Participants who scored poorly on the tests at the beginning of the study were three times more likely to die within the next two years—and five times more likely to die in the next four years—than the others were.

Having early warning about the approach of dementia—or even death—can give physicians, psychologists, social workers and other clinicians an important tool in working with older adults, Zarit said.

■ Outreach

Students participate in urban renewal project

Both students and inner-city juvenile offenders benefit from cooperative effort

Students in the Department of Architecture in the College of Arts and Architecture are participating in an innovative educational project dealing with urban renewal. Bret Peters, part-time instructor of architecture and member of the Harrisburg architectural firm IBA (Benate), is bringing together architecture students with inner city juvenile offenders and school drop-outs involved with the Youth Build program in York, Pa., in a mutually educational experience.

Peters and IBA have been collaborating with Crispus Attucks, a community development organization in York, on revitalizing the downtown Boundary Avenue area. In an effort to involve his students with "real" issues, Peters recalled a wish of the Youth Build director Cynthia Dotson to build a facility which would include Youth Build's academic and vocational training, housing and administration, a Youth Build academy of sorts. Peters convinced Crispus Attucks to allow his students to offer designs for the building to help raise awareness of the positive potential the building could have on the York community. Most recently, Peters provided the students with "clients," young people from Youth Build, offering suggestions on the design of a residence for non-violent offenders to be incorporated into Youth Build.

In November, architecture

A keen eye

Penn State alum David McInlay serves as one of the jurors of the Youth Build project final critique.

Photo: Andrea Hurley

students met for the first time with Youth Build trainees to discuss preliminary plans and designs, seeking input and suggestions from the trainees. The students learned details they may never have considered.

"Gardens," one trainee said. "We like to make gardens at the buildings." Another offered, "Don't paint the inside the same colors they use in the prisons."

In December, the students

What is Youth Build?

Youth Build is a community rehabilitation program in York, Pa., that targets "at-risk" teens — high school drop-outs and non-violent juvenile offenders — offering them job-training and a second chance at life. According to Cindy Dotson, coordinator of Youth Build, the program "rebuilds lives by rebuilding the communities they live in."

Youth Build trainees work on renovation crews, learning aspects of construction and building for future job opportunities. Youth Build crews concentrate on rebuilding abandoned or run-down structures in York that are too large and expensive for developers to handle. Often the buildings are located in decaying neighborhoods where renovation is sorely needed but may be considered risky by developers.

The Youth Build program is part of the Crispus Attucks community development organization in York, a non-profit organization focused on various forms of community development. Since Youth Build provides positive incentive by locating the development efforts in areas where the trainees come from, the effects are important to the trainees, giving them a sense of relevance for what they do.

and trainees met on the University Park Campus to review final plans and discuss the project.

Peters advocates input from all sides in architectural design. "I see architects as the stewards of public space," he said. "We have a responsibility to all those whom the space will affect, and we should seek input from people of the communities where we build."

By involving members of Youth Build, many of whom were residents of the Boundary Avenue neighborhood, Peters provides an example of the type of interactive

design approach he wishes his students to consider.

Additionally, by involving the members of Youth Build, Peters, the architecture department and the students are providing a physical exposure to higher education in a positive and non-threatening way. Through this exercise, the Youth Build trainees have their opinions taken seriously on an issue important and personal to them, and the architecture students participate in a "real-life" project and receive direct feedback from a client with real concerns.

THE NEW PENN STATE

MORE INSIDE ON HERSHEY/GEISINGER MERGER

The new Penn State Geisinger Health System will serve 40 counties across the Commonwealth. For some vital statistics on the two merging organizations, turn to **pages 4 and 5.**

WHO'S RUNNING THE SHOW?

For a profile on Penn State's newest dean, see **page 3.**

MORE TO COME

For readers who want to know more, President Spanier will dedicate his Jan. 23 radio program on WPSU-FM to a discussion about Penn State's changes. To call in, dial (800) 543-8242. The show begins at 7 p.m.

Geisinger and Hershey join ranks

By LISA M. ROSELLINI
Public Information

Called the "most comprehensive undertaking in Penn State's history," the merging of The Milton S. Hershey Medical Center with the Geisinger Health System creates one of the state's largest not-for-profit health care systems, covering 40 counties. For Pennsylvania, the move creates more choices for consumers and employers who purchase health care coverage for employees.

The merger was motivated by Penn State's desire to provide a secure base of support for its College of Medicine, according to President **Graham B. Spanier**. Revenues from the \$1 billion health system will directly support the Uni-

versity's College of Medicine, which will remain under the ownership and operation of Penn State.

"The establishment of the Penn State Geisinger Health System is a marriage of two excellent health care enterprises, both committed to quality education, research and service," Spanier said.

The merger, which must undergo regulatory review, was approved by the Board of Trustees on Friday. It will increase access to a broader range of medical services, reduce costs for both organizations, and supply Pennsylvania's rural communities with better patient care. The new not-for-profit entity will include 77 clinics, 1,000 physicians and 1,345 hospital beds.

"With the creation of the Penn State Geisinger Health System, it will now be easier to get the

See "Geisinger" on page 5

OK given for redesign of University

In just a few short months, some of the University's Commonwealth locations will be offering four-year degrees and some will be calling themselves colleges of Penn State. In that same short timeframe, everyone from the campus executive officer on down will complete the work involved in making the transition smooth.

On Jan. 14, the University got the thumbs up from state Secretary of Education **Eugene W. Hickok** on its plans to reorganize the Commonwealth Educational System. Under the plan, 14 of Penn State's 17 Commonwealth Campuses are now authorized to offer baccalaureate degrees. Driven by changing demographics and a shift in the educational needs of Pennsylvania's residents, the comprehensive plan spells out the future structure of the University.

See "Redesign" on page 8

Penn State gains law school

By LISA M. ROSELLINI
Public Information

Nearly three decades after the possibility of an alliance was first considered, the University and the 163-year-old Dickinson School of Law in Carlisle, Pa., officially agreed to join ranks on Jan. 17 when the Penn State Board of Trustees unanimously voted to merge the two institutions. The trustees' action was the final approval needed to seal the deal.

Described as a "good marriage," the merger was approved Jan. 11 by Dickinson's 37-member board of trustees and will actually begin July 1. The law school will assume the name The Dickinson School of Law of the Pennsylvania State University.

Since the announcement of the merger, the reaction from trustees, administrators, employees, students and alumni of both institutions has been favorable. As the oldest independent law school in the nation, Dickinson has been a post-graduate choice for hundreds of Penn State alumni. About 10 percent of all Dickinson alumni also have a Penn State degree, making it the single largest supplier of students to the law school. Dickinson has approximately 5,700 living graduates.

"This action fills in a very important missing piece," President **Graham B. Spanier** said. "Over the years, Penn State has missed out on certain opportunities because we did not have a law

See "Dickinson" on page 2

Dickinson

School of Law of the Pennsylvania State University

Continued from page 1

school. Opportunities like joint research projects, joint community service projects or course offerings that would have benefited students."

Spanier said that he has been "flooded" by e-mail from Penn State faculty members who are interested in cooperating with the new law school faculty. **R. Scott Kretchmar**, chairman of the University Faculty Senate, said he too has received numerous telephone calls from Penn State's eager to interact with Dickinson faculty.

Faculty here with similar interests are anxious to discuss issues with faculty from Dickinson," Kretchmar said. "This has been a missing element at

Penn State and, given our fiscal constraints, it is probably the only way we could get a law school. I'm delighted about this merger and extremely pleased with the academic reputation of Dickinson law school."

One faculty member who believes the move will open up doors for both faculty and students is **Robert Richards**, associate professor of journalism and law in the College of Communications. For Richards, founding director of the Pennsylvania Center for the First Amendment, the resources provided by a law library for both himself and his students is unmatched, and the opportunities for collaboration are dizzying. Officials from the college have already been in touch with faculty at Dickinson to arrange a meeting.

"It will be nice to have the added resources of legal holdings and access to law professors and the program that law schools undertake," he said. "Law cuts across so much of our studies on this campus — like labor, business, health policy administration and education. Almost every program has some connection to law, and to have those resources now on hand will be a great asset."

In turn, Dickinson employees are looking forward to the added benefits of being affiliated with a large institution. In announcing the venture, law school Dean **Peter G. Glenn** stressed the savings Dickinson would accrue as a result of the "economies of scale" in areas such as purchasing, printing and other basic administrative services. Penn State also can lend its expertise in the area of risk management and fund raising.

In addition to the financial gains, Dickinson faculty, staff and students will now have access to Penn State's library with holdings of more than 3.7 million, various databases across the system and computing facilities. As part of the merger, Penn State has pledged to bring Dickinson up to Penn State's current technology level and will conduct a facilities review to take care of deferred maintenance items. The law school will also be included in Penn State's upcoming Capital Campaign.

"This is an almost perfect arrangement," said **Michael J. Navin**, professor of law and chairman of the admissions and financial aid committee at Dickinson. "I think the ideal situation is to take the advantages of a small student-centered legal education and combine it with the intellectual excitement and opportunities of a major university. That's now been done."

While Penn State faculty eagerly

Tickett Hall of The Dickinson School of Law in Carlisle, Pa.

await input from their counterparts at Dickinson, Navin pointed out that his law colleagues and students are also anticipating an active exchange of ideas and "ready access to some of the best minds anywhere."

"From our perspective, we have access to resources that we would never have at a free-standing law school — your library, collaborative programs and perhaps courses with other colleges within the University," **Peter C. Alexander**, associate professor of law, said. "Just the ability to interact with people doing cutting-edge research and to share our research and provide support is really a golden opportunity. I'm personally very excited about the possibilities I see for my own work with the business college and the women's studies program."

"And of course, we're all hoping for football tickets," he added.

From the student perspective, the law professors think Dickinson's affiliation with a major university with name recognition like Penn State's will enhance student degrees. Dickinson already has a joint program with Penn State Harrisburg, which enables stu-

dents to earn a law degree and a master's degree in public administration. It also has a joint JD/MBA program with The Smell College of Business.

"No matter where you go, if you say I'm a graduate of The Dickinson School of Law of the Pennsylvania State University, people will know where it is," Navin said. "Not only will they know where it is, it will come with an existing reputation for excellence."

Julie Bubolz, president of Penn State's nearly 7,000-member Graduate Student Association, thinks that any expansion of Penn State's professional offerings is a benefit to students.

"I think the general impression is good. It's a very positive thing for the students, but it's also a positive thing for the state as well," Bubolz said. "This will increase the services that are available to the residents of the Commonwealth."

According to law school Dean Glenn, Dickinson has a long history of providing continuing education for lawyers. Its faculty are also active participants on several working committees of bar associations and have an

HOW WILL IT OPERATE?

Although the full merger of Penn State and the Dickinson School of Law will take three years to complete, employees of Dickinson will become employees of Penn State effective July 1. The new school will operate similarly to the College of Medicine: it is a special mission college of Penn State that is operating at a site outside of University Park. In the coming three years, the law school, which will remain in Carlisle, will undergo a transition period in its governance. Dickinson's board of trustees will be augmented by the addition of **H. Jesse Arnelle**, chairman of Penn State's Board of Trustees, and two of Penn State's senior administrators. During the first stage of the consolidation, this board will oversee Dickinson's operations, but after the merger is complete, it will become an advisory board.

"At the end of the three years is when everything will really mesh, like budgets and governance, but the guidance and help of Dickinson's board will still be very valuable," **Christine Kellett**, Dickinson's associate dean for institutional planning, said. Dickinson's dean, **Peter G. Glenn**, will become a member of the Council of Academic Deans — an advisory body to Penn State's provost and president. Glenn will also become a member of the Big 10 Law Board, a consortium of deans of law schools of the Big 10.

Penn State is the tenth Big 10 institution to lay claim to a law school. Just two years ago, Michigan State University — which lacked its own law school — formed a partnership with the 290-student Detroit College of Law. Although the arrangement is different from Penn State's merger with Dickinson — the Detroit College of Law remained private and will move to a newly constructed building on MSU's East Lansing campus — it is bringing similar benefits as those expected to result from Penn State's recent merger. Now, the only institution in the Big 10 without a law school is Purdue.

The Penn State-Dickinson merger brings with it some costs, such as those associated with the upgrade of computer facilities for the law school, but offers vast opportunities for collaborative programs, research projects and service. President **Graham B. Spanier** said Penn State will not seek additional funds from the state as a result of the merger, but he hopes the alliance will "improve how Penn State is viewed by the state Legislature and the public, and will deem us worthy of continued or increased support."

Spanier said there are no plans to increase the nearly 530-student enrollment of The Dickinson School of Law and he does not foresee, as a result of the merger, any changes in the curriculum. **R. Scott Kretschmar**, chairman of the University Faculty Senate, said one of the first items of business for the Senate will be the delegation of curricular authority to the law school, much as the curricular decisions for the College of Medicine are handled. Dickinson will likely have two representatives to the Faculty Senate.

MEET PENN STATE'S NEWEST DEAN

Peter G. Glenn is a professor of law and dean of The Dickinson School of Law, a position he assumed July 1, 1994.

From 1987 to 1994, he was a partner in the international law firm of Jones, Day, Reavis & Pogue in Cleveland, Ohio. He also served in various capacities for the firm from 1969 to 1986. At the law firm, he was responsible for the development and administration of firm-wide lawyer training programs and for oversight of the firm's compliance with the mandatory continuing legal education regulations of more than 20 states.

From 1985-1988, and in 1993 and 1994, he was a lecturer at Case Western Reserve University School of Law in Cleveland. He was a professor of law at the University of South Carolina, Columbia, from 1980-1983. There he taught courses in civil procedure, professional responsibility and legal research and writing. He was an associate professor of law at Washington and Lee University, Lexington, Va., associate professor of law at the University of North Carolina at Chapel Hill, and a former law clerk to Judge Abraham L. Freedman of the U.S. Court of Appeals for the Third Circuit.

He earned his J.D. degree, cum laude, from the

PETER G. GLENN

University of Pennsylvania in 1968, and bachelor of arts degree in history from Middlebury College, Vt., in 1965.

He is a member of the American Bar Association and the Pennsylvania Bar Association and a former member of the Ohio Bar Association Legal Education Committee and Legal Ethics Professional Conduct Committee.

He also is a member of the American Bar Association Section on Legal Education and Admissions to the Bar New Deans Seminar Planning Committee, Independent Law School Committee and Continuing Legal Education Committee; the Association of American Law Schools Committee on Libraries and Technology; and former chair of the Judicial Campaign Monitoring Board of the Pennsylvania Bar Association.

He regularly serves as a participant in symposia or panels studying the future of lawyer education.

LAW SCHOOLS IN PENNSYLVANIA

The Commonwealth is home to seven law schools. In 1995, 86 percent of the graduating class of The Dickinson School of Law passed the Pennsylvania Bar Exam. The state's seven law schools are:

- Dickinson
- Duquesne University
- Temple University
- University of Pennsylvania
- University of Pittsburgh
- Villanova University
- Widener University

Dickinson
continued from page 2

extensive track record working with the Pennsylvania Legislature, government institutions and federal committees. Glenn also said Dickinson's clinical teaching facilities provide a significant amount of legal services to individuals across the state who would not otherwise be able to afford them.

In the past week, members of the alumni associations from both schools have expressed their approval of the move. Glenn said the vast majority of Dickinson alumni are pleased. Some of the more prominent graduates of Dickinson include **H. Jesse Arnelle**, chairman of Penn State's Board of Trustees and a 1955 graduate of Penn State and a 1962 graduate of Dickinson; U.S. Sen. **Rick Santorum**, an '86 Dickinson graduate and a Penn State alumnus; state Senate President **Pro Tem Robert C. Jubelirer**, who is also a Penn State graduate; and Gov. **Tom Ridge** from the class of 1972.

Questions and Answers

about the Penn State Geisinger Health System

Q: What will be the effect, if any, on Penn State employees and their benefits?

A: At this time we are anticipating offering the new Penn State Geisinger Health Plan to Penn State employees, where available, effective in 1998. As we go through the process, the University also will be considering the possibility of continuing to offer alternative health plans. It is not likely that employees will have to consider changing physicians as a result of this merger.

Q: How will the public benefit from the merger?

A: The merger will:

- make it easier for people to use a broader range of medical services, from family physicians and rural clinics to the most advanced specialists, without leaving Pennsylvania
- provide consumers and employers with more choices — people in the Geisinger area can more easily use the resources of another outstanding academic medical center, and people in The Hershey Medical Center's area can choose a new managed health care plan
- reduce costs while enhancing quality and service
- give patients the benefits of the latest research advances
- keep doctors serving rural areas
- protect the public interest in supporting medical education and research, which are becoming more difficult to fund as health care costs are cut.
- provide a stable and continuing base of support for Penn State's College of Medicine, which receives less support from the state than any other public university medical college in the country.

Q: How will the new organization be structured?

A: The Penn State Geisinger Health System will be based on geographic regions. Each region will be led by a physician/administrator team. The team will be responsible for identifying the health needs of the population, working with the health plan to enroll people, and then planning and distributing health services in that region to meet local needs. Each region has individual characteristics and needs, and we want to be very local in how we provide health care.

PENN STATE

Geisinger Health System

For more information

For more information on the merger, go to the World Wide Web at <http://www.hmc.psu.edu/> or <http://www.geisinger.edu/>.

Q: Geisinger Health Plan has almost 200,000 enrolled members. What will its role be?

A: We'll offer the plan in The Hershey Medical Center service area, helping to meet the health needs of more Pennsylvanians. We'll continue to grow through contractual relationships with other hospitals and physicians to handle services for the patients in our combined service area. We will move quickly to talk with physicians and hospitals in the Hershey area about working together and move forward with licensure in the south-central counties.

Q: Are state tax dollars involved in the merger?

A: No. At The Hershey Medical Center, facilities developed with state appropriations will remain under the ownership of the University. Other public funds, for research and education at Penn State's College of Medicine, will remain in the College of Medicine. On the Geisinger side, public funds that are given as grants for education and research will remain within Geisinger.

GEISINGER

FOUNDED in 1892, Geisinger is one of the nation's oldest hospitals. It has more than 700 beds, 1,000 full-time employees, and a wide range of medical specialties. The hospital includes a women's hospital, a children's hospital, and a training program for medical residents.

IN WILKES-Barre, Pa., Geisinger is the only hospital in the area that provides a full range of medical services, including surgery, obstetrics, and gynecology.

NEARLY 20 years ago, Geisinger began a program to pilot HMO and managed care.

DURING the past several years, research has shown that the hospital's approach to patient care is one of the best in the nation. Basic and

h System

Eastern ■ South Central

AT A GLANCE

Geisinger's regional health system serves more than 2 million patients in Pennsylvania and southern New York. There are more office practices serving 90 communities in the northern Commonwealth, with its 548-bed hospital—Geisinger in Danville. The medical center represents 75 medical specialties well known for its trauma center. The medical center at Weis Children's Hospital and treatment centers for cancer, kidney, heart and neurological disease, and infertility also is home to Geisinger's graduate medical program. It has 202 medical and surgical residents and fellows and subspecialty programs.

The 230-bed Geisinger Wyoming Valley Medical Center is part of the Geisinger system. Geisinger Wyoming Valley also has comprehensive emergency services, medical and surgery programs and pediatric care and complete cancer

Pennsylvanians have already chosen a managed-care Geisinger's Health Plans Division. It was the first rural health plan in the state and is the largest rural HMO in the nation. It has the lowest administrative cost of any HMO in Pennsylvania.

In 1996, 90 Geisinger researchers conducted 399 research projects, including research at the most basic molecular and cellular level. That same period, Geisinger researchers received grants totaling \$15 million from the American Heart Association and the National Institutes of Health to support Geisinger's nationally-recognized research programs.

Geisinger

continued from page 1

world's best care right here in Pennsylvania for most any medical condition," Spanier said. "It's vital that we retain community control of our health systems to make sure Pennsylvania doctors keep making health care decisions based on what's best for their patients."

Spanier said Penn State will also look to the merged entity to help control its own health care costs. Penn State spends approximately \$75 million per year on health care benefits for its more than 16,000 full-time employees.

While the College of Medicine remains with Penn State, it is actually Hershey Medical Center's patient care services and operations that will merge with Geisinger's patient care services. The merger is expected to take effect July 1 and will help the two organizations achieve their already planned cost reductions totaling \$105 million over the next three years.

In the past few years, both Hershey and Geisinger have been restructuring to improve efficiency in their operations. In 1993 alone, Hershey reduced expenses by more than \$37 million. Now through its new cost reduction program, the medical center is aiming at reducing its operating expenses by 12 percent, or \$50 million, by 1999. Officials predict an additional initial savings from the merger of \$10 million to \$20 million.

"In the near future, most health care in Pennsylvania will be provided by four or five large systems as organizations consolidate for more effectiveness and efficiency," Dr. Stuart Heydt, CEO of Geisinger, said. "This merger ensures that a Pennsylvania system, led by physicians and dedicated to quality care, will be one of the survivors. We'll continue to collaborate with our existing partners and look for opportunities to integrate other health care organizations into this partnership."

Frank Henry, chairman of the Geisinger Foundation Board of Directors, said that the merger will create a cost savings "simply by virtue of the two organizations not competing with one another."

While some reorganization of jobs has already taken place and will continue at both Hershey and Geisinger, no large number of job eliminations is anticipated as a direct result of this merger. No facility closings are planned, according to Dr. C. McCollister Everts, CEO of the Hershey Medical Center.

"Transition teams, including our physicians and employees, will work together to identify savings that will serve the needs of patients and employees. If jobs are lost, we'll help those people find other employment," Everts said. "For most people, this affiliation will increase job security as it strengthens our health system."

Everts said the merger will not only ensure that doctors continue to serve rural areas, but also will protect the public interest in supporting medical education and research, which are becoming more

difficult to fund as health care costs are cut.

Billie Willits, assistant vice president for human resources, indicated that Penn State has been in touch with union officials representing some Penn State employees concerning the implications of this merger.

"Discussions with the unions will continue until all matters are resolved," Willits said. "This will understandably take some time."

Geisinger's regional health systems serve more than 2 million people in Pennsylvania and southern New York. There are more than 70 Geisinger office practices in 90 communities in the northernmost tier of the Commonwealth. The Geisinger Health Plan is the largest rural HMO in the nation and has the lowest administrative cost of any HMO in the state. In addition to its office practices, Geisinger operates a 548-bed hospital in Danville, a regional trauma center, a children's hospital and a 230-bed medical center in Wilkes-Barre.

Hershey Medical Center, composed of the College of Medicine, the 504-bed University Hospital and Penn State University Children's Hospital, operates various specialized centers throughout the state. During 1995-96, University Hospitals admit-

Penn State's Hershey Medical Center
and Geisinger Health SystemStatistics
(1995-96 data)

Together, Geisinger and Penn State's Hershey Medical Center have embarked on a new physician-led health system to serve Pennsylvania with the best patient care, medical education and research available. The following table offers a look at the two institutions:

	Geisinger	Hershey
Net clinical revenue	\$567,217,000	\$389,475,000
Research grants	\$3.6 million	\$44.4 million
Licensed beds	841*	504
Surgeries	17,637	13,925
Employees	7,210	6,070
Physicians	559	376
Residents	202	358
Medical students	##	443

Intercom graphic by Antennae Mountz

ted nearly 20,800 inpatients and provided care to more than 356,000 outpatients and 25,600 emergency-service patients.

Providing physicians for rural areas with large populations of older residents is a major commitment of the new system, according to officials. The consolidated system will also focus its research efforts on finding solutions to health problems specific to Pennsylvanians.

Both institutions were originally established by philanthropic trusts, from Milton S. Hershey and Abigail Geisinger. The trusts will remain intact, and donations and research grants will continue to benefit the individual organizations receiving them. While the hospital names will remain the same, it is not yet known what departments or medical services — if any — will move as a result of this joint venture.

Hershey employees with questions may call 1-888-799-3484. Geisinger employees may call 1-888-856-7041. Employees at other Penn State locations who have questions should e-mail them to changes@psu.edu.

MISSION AND VISION OF THE NEW PENN STATE GEISINGER HEALTH SYSTEM

The Mission

To improve health of the people of the Commonwealth of Pennsylvania through an integrated system of health services based on a balanced program of patient care, education, research and community service.

The Penn State Geisinger Health System supports the mission through principles and commitments that guide physicians and staff in their endeavors.

PRINCIPLE: Excellence

COMMITMENT: We strive for the best, continuously improving quality in all our activities.

PRINCIPLE: Service Orientation

COMMITMENT: Our physicians and staff use their skills, creativity, energy and loyalty as resources for effective and quality services in every community and each setting in which we serve.

PRINCIPLE: Individual Dignity

COMMITMENT: We provide humane, compassionate and expert care, always emphasizing the dignity of the individual.

PRINCIPLE: Teamwork

COMMITMENT: We take pride in recognizing and empowering good people who demonstrate the importance and value of teamwork.

PRINCIPLE: Physician Leadership

COMMITMENT: We are physician-led, across our entire organization and within the many communities we serve.

PRINCIPLE: Diversity

COMMITMENT: Diversity among physicians, staff, students, and volunteers promotes an environment of mutual support and respect.

PRINCIPLE: Education

COMMITMENT: We believe in the intellectual and professional pursuit of new knowledge, and its dissemination to colleagues, students, and the public at large, as an instrument of our health system that adds value to all of our customers.

PRINCIPLE: Research

COMMITMENT: We believe that basic science, clinical, community health and health-services research advances the overall health and well-being of our patients and their communities.

PRINCIPLE: Fiscal Responsibility

COMMITMENT: We exercise prudent use of all resources as part of our stewardship responsibility for fiscal and organizational success.

PRINCIPLE: Tradition

COMMITMENT: We take pride in our history, for it is the foundation of our future and our long-standing commitment to your health.

The Vision

To be the health system of choice, advancing care through education and research.

This vision requires that we advance the ability of the health professions, and all whom we work with in the health care arena, to meet the health needs of individuals and communities throughout Central Pennsylvania and beyond. We will deliver choice to all customer groups, using top physician leadership in all specialties, providing quality and the full range of services throughout the entire continuum of care, while creating ease of access and highest satisfaction, all at an affordable price.

The Geisinger Medical Center in Danville

WHAT BROUGHT US TO THIS POINT

The decision to merge Penn State's Hershey Medical Center with the Geisinger Health System was done to guarantee the future of the College of Medicine and its academic mission, according to Dr. C. McCollister Everts, CEO of The Hershey Medical Center.

Although The Hershey Medical Center and Geisinger are financially sound, the ever-changing health care market was making it increasingly difficult for an academic medical center to compete while continuing to train future doctors and carry out life-saving research.

Everts explained the situation to Penn State's Board of Trustees last Friday after the announcement that Hershey would join forces with Geisinger to form the Penn State Geisinger Health System. Everts said that income from the clinical side of the medical center — its hospitals and clinics — was being used to subsidize the academic side — the College of Medicine. As health care reform and the movement toward managed care took hold over the last decade, the clinical undertakings of the Hershey Medical Center received smaller reimbursements. The not-for-profit medical center was forced to compete with for-profit systems. In 1995-96, more than 58 percent of Hershey's clinical income went to support its academic mission. Twenty years ago, only 10 percent of the clinical revenue was used for this purpose. Its reliance on clinical revenues was growing and its role as a medical educator was in jeopardy.

In addition, out of 75 public university medical schools across the nation that receive state support, Hershey is ranked last in the amount of funds it is appropriated. In 1995-96, only 3.5 percent of the College of Medicine's \$191.6 million funding came from the state.

"We decided we would like to act from a position of strength," Everts said. And the search began for a partner who could fill the bill.

Hershey's CEO said Penn State officials wanted to find a partner with a similar culture, a strong clinical orientation, one that was finan-

COLLEGE OF MEDICINE FUNDING FISCAL YEAR 1995-96

cially strong and had a common mission.

Geisinger is such an organization, according to Everts.

As part of the arrangement, Penn State will retain its hard assets, such as its endowment and its buildings. The majority of employees at The Hershey Medical Center who are involved in the clinical enterprise become employees of the Penn State Geisinger Health System. The system will be overseen by a new 18-member governing body composed equally of Penn State officials and Geisinger officials.

Everts said Penn State's College of Medicine was not alone in the difficult road it faced. Other institutions with medical colleges across the country have merged with "for-profit" organizations. Last year alone, 768 hospitals in the United States merged — between 14 and 16 of these were in Pennsylvania alone. Everts said he believes the joint venture with Geisinger, in which Penn State retains control and operation of the College of Medicine, is the first of its type in the United States.

"This is the most important and exciting event since the founding of The Milton S. Evers-Hershey Medical Center 30 years ago," he said.

PENN STATE'S HERSHEY MEDICAL CENTER AT A GLANCE

BEGINNINGS: Since its founding in 1963, as a result of a gift from The Milton S. Hershey Trust, Milton S. Hershey Medical Center of The Pennsylvania State University has grown and progressed, becoming a leading health care and research institution.

The Medical Center is composed of Penn State's College of Medicine, University Hospital and Penn State University Children's Hospital. The Medical Center has more than 6,000 employees and enrolls more than 500 students annually.

To accommodate continued growth in the number of patients who seek care at University Hospitals, the Medical Center this year established the Penn State Arthritis, Bone & Joint Center and opened four new family health centers — one each in Lower Paxton Township and Palmyra and two in State College. Additionally this year, the National Institutes of Health established a General Clinical Research Center at the Medical Center to create an environment where clinical investigators can observe and study human physiology and innovatively study and treat disease.

PENN STATE'S COLLEGE OF MEDICINE: Since the first students enrolled in 1967, the College of Medicine has graduated 2,182 physicians and 439 scientists with doctor of philosophy and master of science degrees in the 26 classes that graduated through May 1996. In conjunction with the University graduate school, the College of Medicine offers master of science degrees in laboratory animal medicine — the only such program in the state. This year, post-graduate education includes the training of more than 400 University Hospitals resident physicians and College of Medicine post-doctoral scholars and fellows.

The Medical Center's Biomedical Research Building is a 254,000-square-foot academic facility providing additional laboratory and office space for the Departments of Anesthesia, Medicine, Microbiology and Immunology, Pathology, Pediatrics and Surgery, as well as classrooms and student areas.

Total grant support for 1995-96 was \$44.4 million.

HOSPITALS: The 504-bed University Hospitals are responsible for providing high-quality medical care while serving as settings for educational and research programs. The hospitals are referral centers for patients sent by their own physicians in communities throughout Pennsylvania and also provide primary care for residents of the surrounding area.

The University Hospitals have a number of specialized centers, including the Cancer Center, Cardiovascular Center, Center for Emergency Medical Services, Center for Sports Medicine and Fitness, and Center for Primary Care, as

The Milton S. Hershey Medical Center in Hershey

well as others for newborn intensive and surgical care, hemophilia, breast care, sleep disorders, recovery from substance abuse, epilepsy, muscular dystrophy, and pain management and palliative care. The hospitals also have comprehensive programs in high-risk obstetrics, infertility, oncology, diabetes, ophthalmology, multiple sclerosis, genetics, and spinal cord injuries, and offers the unique services of the Lions Eye Bank of Central Pennsylvania and the Central Pennsylvania Poison Center.

The seven-story south addition houses the 36-bed University Hospital Rehabilitation Center.

TRAUMA CENTER: Within the Center for Emergency Medical Services, University Hospitals have a regional resource trauma center, with added qualifications in pediatric trauma. The LIFE LION aeromedical service, and the newly established University Hospitals' Emergency Medical Services, are also vital assets to the region.

During 1995-96, University Hospitals admitted nearly 20,800 inpatients and provided care to more than 356,000 outpatients and 25,600 emergency-service patients.

Official unveiling

Dr. C. McCollister Everts, chief executive officer of The Milton S. Hershey Medical Center, Penn State's senior vice president for health affairs and dean of its College of Medicine, left, joined University President Graham B. Spanier and H. Jesse Arnelle, president of the Board of Trustees, in displaying the new Penn State Geisinger Health System logo for the first time during a press conference Jan. 17. Officials at Geisinger and Hershey unveiled the logo simultaneously during a live satellite uplink.

MEET SOME OF THE PRINCIPALS

Penn State

■ **H. Jesse Arnelle** has been president of the Pennsylvania State University Board of Trustees for the past year. He has served on the board since 1969.

■ **Graham B. Spanier, Ph.D.**, became Penn State's 16th president in 1995. He is also professor of human development and family studies, sociology, and family and community medicine.

■ **C. McCollister Everts, M.D.**, is chief executive officer of The Milton S. Hershey Medical Center, Penn State's senior vice president for health affairs and dean of its College of Medicine.

■ **Bruce H. Hamory, M.D.**, has been chief operating officer of Penn State's Milton S. Hershey Medical Center and executive director of University Hospitals since February 1996. He is also professor of medicine.

■ **George W. Blankenship Jr., M.D.**, is associate dean for external affairs at Penn State's College of Medicine and professor and chair of ophthalmology at The Hershey Medical Center.

Geisinger

■ **Frank M. Henry** has been chairman of the Geisinger Foundation Board of Directors since 1995.

■ **Stuart Heydt, M.D.**, has been president and chief executive officer of the Geisinger Foundation since 1991. He has served in various management positions since joining Geisinger in 1973.

■ **Frank J. Trembulak** has been executive vice president, operations/treasurer of the Geisinger Foundation since 1993; and senior vice president and treasurer of the various Geisinger entities since 1984.

■ **Howard G. Hughes, M.D.**, senior vice president, health plans, has led the GHP management team since 1987. He is a member of the Board of Directors of GHP. Dr. Hughes has served in various positions since 1977.

■ **Charles W. Maxin, M.D.**, has been senior vice president, clinical operations, for Geisinger's western region since 1992. He has served in other management positions since joining Geisinger in 1987.

Redesign

continued from page 1

"We are extremely pleased by this decision," President Graham B. Spanier said. "This reorganization will allow us to function more effectively and provide our own students with the opportunity to complete their education at a Penn State campus of their choice."

"This has been a tremendous and historical week for Penn State," he said. "These changes bring with them many opportunities, and I am looking forward to a future for this University that I believe is exciting, well-planned, forward-looking and keeps in mind the needs of students, the Commonwealth and the University."

According to the plan, 12 campuses will join together to form the Commonwealth College, which will be overseen by a dean. As the largest college in the Penn State system, it will include: Beaver, Delaware County, DuBois, Fayette, Hazleton, McKeesport, Mont Alto, New Kensington, Shenango, Wilkes-Barre, Worthington-Scranton and York campuses. The Penn State Abington-Ogontz Campus will become Abington College and the Altoona Campus becomes Altoona College, able to offer baccalaureate degree programs; Penn State Harrisburg and the Schuylkill Campus will merge to form an expanded Capital College, and Berks and Allentown campuses will unite to form Berks-Lehigh Valley College. These new entities join the existing Penn State Erie, The Behrend College, and will provide additional four-year programs. The campus executive officers at these college locations will acquire the title of dean.

Following feedback from Secretary Hickok about insufficient documentation of program need at three Pittsburgh-area campuses, University officials agreed to withdraw the request for new four-year degree programs at Beaver, New Kensington and McKeesport campuses. The plans for these campuses will be resubmitted following the development of further documentation. The New Kensington campus already offers four-year programs in nursing and electromechanical engineering technology, and those programs will continue.

One additional modification to the plan calls for any enrollment growth at the Abington and Delaware County campuses to be at the upper-division level. The change was requested, according to Spanier, because of concern about unnecessary program duplication and competition with Philadelphia area colleges. The University has agreed to cap total freshman enrollment at the 1995 levels at both campuses for five years.

"Our goal is to allow our Penn State students to continue their education at Penn State and earn a Penn State degree," Spanier said. "This plan

allows us to assume that there will be some stability for campuses and course offerings. It also allows us to engage in some long-range planning."

Spanier, who is pleased with the state's decision, said the plan will not cost taxpayers any additional money, because the programs will be funded by tuition revenues from increased enrollments at the campuses.

Hickok, who attended the Jan. 17 Board of Trustees meeting, said Penn State did a "great job of advocating its position."

"This is such a comprehensive change and really a redefinition of Penn State that will change the face of education in this state," Hickok said. "We undertook a rigorous analysis

and looked at the broader context of the Commonwealth. This has never been done before and we feel good about the analysis and the outcome."

Hickok's analysis of the plan, which took six months, involved looking at the use of taxpayer dollars — not just at Penn State but across the state of education said his staff had to analyze the use of grants by students, the use of funds by other institutions, the duplication of services and the possible competition among schools. Penn State has been criticized by some institutions who fear the University will grow at their expense. Hickok said that a project the scope of Penn State's plan was bound to make

some institutions unhappy.

"This is not a plan to grow," Spanier said, "so much as a plan to serve our students and communities across the Commonwealth. In the first two years, we anticipate a cumulative enrollment increase of only 2.6 percent or a few hundred students in total. This is a small growth in comparison to the anticipated number of additional high school graduates who will be entering college."

The president said the restructuring, which begins immediately, is critical to the University's future and the future of higher education in Pennsylvania. Spanier said Penn State is still looking to collaborate with other institutions in the state.

Students help win designation for Clarion River

The work of Penn State landscape architecture students has made it to Capitol Hill, influenced federal law, and protected the heritage and ecology of a scenic portion of northwestern Pennsylvania.

Throughout the fall of 1995, the students in the third-year landscape architecture design studio gathered information on more than 100 miles of the Clarion River. The research, conducted in conjunction with Allegheny National Forest officials, was compiled in an effort to gain consideration to designate the Clarion River as a national wild and scenic river under the national Wild and Scenic Rivers Act. The act protects and preserves American rivers for future generations. Professors **Dan Jones** and **Mark Battaglia** and **Tom Yahner**, assistant professor, organized the cooperative endeavor with ANF officials so their students would gain experience on a project with regional implications.

"The Clarion River study is the kind of project that we in the Department of Landscape Architecture greatly value — an opportunity for students to gain 'real world' experience while providing significant service to the Commonwealth," said **Eliza Pennypacker**, professor and head of the department. "And how many college students can say that the president of the United States signed legislation based, in part, on their school work? I am very proud of our students' excellent contribution to this effort."

Former Congressman **Bill Clinger** said, "For me, H.R. 3568 is an especially meaningful piece of legislation

See "Clarion River" on page 16

University is tops in R&D expenditures

Penn State ranked No. 1 in Pennsylvania and 10th in the nation among American universities in total science and engineering research and development (R&D) expenditures in 1995, according to new figures posted by the U.S. National Science Foundation (NSF).

The ranking represents a return to the top 10 nationally for Penn State, which was 12th in 1994. Total science and engineering R&D expenditures in 1995 were \$330.8 million.

"Penn State's research funding is derived primarily from federal sources and is spent almost entirely in the Commonwealth. This funding provides jobs for Pennsylvanians and generates tax revenues through salaries paid to residents and by payments for Pennsylvania products," President **Graham B. Spanier** said.

"You would be hard-pressed to find a community anywhere in the Commonwealth where Penn State's enormous research enterprise is not having an impact on the local economy, on jobs and, through our research, on the betterment of people's lives," he said.

Penn State also continued in the No. 2 position nationally, behind the Massachusetts Institute of Technology, in

Statewide tour for administrators in full swing

By VICKI FONG
Department of Public Information

Traveling from a dairy farm to a classroom of first-graders, Penn State senior administrators and deans are hitting the road to University campuses and talking face-to-face with the people of Pennsylvania.

The tour is similar to the statewide tour conducted last year by University President Graham B. Spanier and part of his initiative to rededicate the University to the people it serves, and to increase understanding of Penn State and higher education in general. On that tour, it was new faculty members who got a first-hand view of the Commonwealth and Penn State's involvement in a variety of areas across the state.

On the latest tour, so far three campuses have sponsored visits by several administrators, and 19 more visits are planned for spring semester, resulting in campus/community visits to 25 University locations. The agendas include meetings with campus students, faculty and staff, and area community and business leaders.

Karen Sandler, Abington-Ogontz campus executive officer, invited representatives of the area school district,

township government, the chamber of commerce and the public library to meet with **Gloriana St. Clair**, interim dean of University Libraries, and **Gregory Geoffroy**, dean of the Eberly College of Science.

"Both deans were very helpful to us in promoting the quality of Penn State and the centrality of the campus to the local community," Sandler said. "The University's commitment to community partnerships and academic quality was actively reinforced during the visit. This reinforcement has a long-term benefit for the campus and the University."

St. Clair noted, "Two very lively students met with us to discuss their educational initiatives; some other students demonstrated the use of computers in science experiments at the campus. We had some excellent interchanges with faculty about the changes in the campuses."

At the Berks Campus in Reading, **Gary Schultz**, senior vice president for business and finance and treasurer, and **Neil Portfield**, dean of the College of Arts and Architecture, walked through a dairy farm and Carpenter Technology, a specialty steel firm, and stopped by the Police Athletic League facility, which sponsors programs for

who have a success story to tell, like Carpenter's CEO Bob Cardy who drew parallels between the management strategies for industry and academic institutions.

John Romano and **James Stewart** enjoyed listening to stories being read by first-graders in Allentown's Central Elementary School, which has a large minority representation and which will be going to a year-round calendar. They also met with area high school guidance counselors and shared lunch with students who had participated in pre-college programs sponsored by the Allentown Campus with support from the University's Equal Opportunity Planning Committee.

"It was heartwarming to see how our programs have provided access to a significant group of students who might not otherwise have had the opportunity to pursue their dreams of going to college," said Stewart, vice provost for educational equity.

Romano, vice provost and dean for enrollment management and administration, said, "The value of trips of this kind is that it strengthens the forces that unite the University as one academic community spread across the entire Commonwealth of Pennsylvania."

disadvantaged children.

"For me, the best part of the tour was the visit to the PAL facility, which provides a positive alternative for children," Schultz said. "After school, they come and have homework centers staffed by volunteer tutors. There also are ample recreation opportunities. The mood in this place was fabulous."

Porterfield noted that the visit to Carpenter Technology reinforced his belief that academe should be listening carefully to those in the real world

Appointments

Arts and Architecture has new associate director of development

Lewis Ricci has been named associate director of development for the College of Arts and Architecture. Ricci, former executive director of the Columbus Arts Council in Columbus, Ind., will work with the Center for the Performing Arts, Pennsylvania Centre Stage and Pat Healy Museum of Art boards as well as support the director of development and the dean of the College of Arts and Architecture in academic field raising.

As executive director of the Columbus Arts Council, Ricci was responsible for all operations of a regional arts council serving the city of Columbus and a six-county region of southern Indiana. Ricci administered an annual united arts fund drive and services for five general members and 40 affiliate organizations while managing and programming two public performance and exhibition facilities.

Before his position in Columbus, Ricci was director of special projects for Cathedral Arts Inc./1990 International Violin Competition of Indianapolis/Cole Porter Centennial, and before that, was promotions and public information director for the Indiana University's public radio station, WFU-FM.

A member of the Board of the Indiana Assembly of Local Arts Agencies since 1991, Ricci was its president from 1992-1994. He holds a bachelor of science degree in biology from Bucknell University and a master's degree in arts administration from Indiana University.

DuBois Campus names financial aid counselor

Janet Searly has been named financial aid counselor at the Penn State DuBois Campus. She holds a

bachelor's degree in business administration, with an emphasis in marketing, from Penn State and is currently working on an M.Ed. in adult education, also at Penn State. She worked with the admissions office at DuBois Campus for nine years before accepting the current appointment.

As financial aid counselor, Searly will answer questions about federal, state, University-wide and DuBois Campus-specific aid programs including scholarships, loans and grants. She also will help students apply for funding and help them discover outside sources of funding, and will continue her duties as the veterans affairs coordinator. Financial aid plays an important role in helping nearly 80 percent of DuBois Campus students finance their college educations.

Hazleton brings CEO on board

Karen Doyle Walton, vice president for academic affairs at the Allentown College of St. Francis de Sales, has been named campus executive officer for the Penn State Hazleton Campus. The new appointment is effective June 1. Hazleton is one of the 12 campuses that now fall under the Commonwealth College umbrella.

Walton, a tenured professor of mathematics and resident of Bethlehem, Pa., has been with Allentown College since 1976. Her latest responsibilities include overseeing undergraduate and graduate programs for 2,200 students.

She joined Allentown College first as an assistant to the academic dean, then served at various times as a lecturer and acting chairwoman for the department of mathematics/computer science, associate academic dean, director of planning and academic dean, before being named to the vice presidential

KAREN DOYLE WALTON

chairwoman from 1970 to 1975. She earned her bachelor's degree from Vassar College in 1965, an M.A.T. at Harvard University the following year and a master's degree at the University of Pittsburgh in 1971, all in mathematics.

In 1983, she completed an Ed.D. in higher education administration at Lehigh University and she also has studied at the University of Haifa, in Israel, the University of Paris at Sorbonne and the University of Vienna. In addition to her Allentown College and Seton Hill College teaching, she has taught at Muhlenberg College, in Allentown, and at Newton High School, in Newton, Mass.

Her many publications include the 1996 book, *Against the Tide: Career Paths of Women Leaders in American and British Higher Education*. She has directed projects with grants from such sources as the National Science Foundation, the U.S. and Pennsylvania Departments of Education, the Eisenhower Mathematics and Science Education Act and the Woodrow Wilson Foundation.

post in 1993. In late 1992, she was a Fulbright Administrative Fellow at La Sainte Union College of Higher Education in Southampton, England, and a visiting scholar at the Wolfson College of Cambridge University.

Before her work with Allentown College, she was on the mathematics faculty at Seton Hill College, in Greensburg, Pa., for nearly 10 years and served as department

GLAD YOU ASKED

In light of the recent announcement of the merger between The Hershey Medical Center and Geisinger Health System, this special "Glad You Asked" column is dedicated to some of the questions being heard most frequently in relation to the impact on employee benefits. Answers to these questions have been provided by Billie Willis, assistant vice president for Human Resources.

Q. I have a question about the recent merger between Hershey and Geisinger. My mother is currently an employee at The Hershey Medical Center and I am receiving the tuition discount. How will my discount status be affected by this merger?

— G.B.

University Park

A. As I am sure you can appreciate, many of the details of the merger have yet to be worked out. However, the current thinking on this matter is that a transitional tuition benefit program will be provided for children of employees. One year of benefit continuation will be provided for each year of service with Penn State, up to a maximum of six years. As an example, if your mother has been a full-time employee with Penn State for six years or more and you are a student, you would have that benefit for six years or until you complete your first undergraduate degree, whichever occurs first.

Q. What benefits may change in the merger? What is the difference in pay scales and how will this affect HMC employees? Will we lose our PTO and CAT fund time?

Deb in Hershey

A. The benefits and pay scales for employees at Geisinger and the clinical employees at The Hershey Medical Center do differ. There will need to be some adjustments to make all the employees of the new Penn State-Geisinger Health System equitable. The details of this have not been completed and transition teams will be studying these issues in the coming weeks. Whatever details are worked out, we do anticipate that benefits for employees of the new health system will remain at industry standards and we are doing what we can to provide long-term job security.

In relation to the PTO (paid time off) fund, the new health system will recognize and credit employees' accruals and years of service with Penn State. Employees have the option of deciding to "cash out" their accrued days with Penn State and receive no credit for years of service. A determination on the CAT (catastrophic time off) fund has not yet been made.

Q. I am working in my ninth year as a Penn State staff member. We were informed that we will no longer be University employees as of July 1, 1997. I would like to know what retirement plan will be offered under the new system (will TIAA-CREF be an option?). What percentage, if any, will the new employer be contributing? I would also like to know what type of vacation and health care packages will be offered.

—J.G.

Hershey

A. We are working through some of those details right now and will continue to do so in the weeks to come. TIAA-CREF may be a pension option of choice, but we will not know that until eligibility in TIAA-CREF for the new health system is established. TIAA-CREF has eligibility standards that must be met. The employer contribution to the retirement package will be 5 percent up to the social security maximum. For 1996, that maximum was \$62,760. This figure changes annually with the cost of living.

Above that level, the contribution rate will be 7.5 percent. These employer contributions are generally comparable to those offered by other medical facilities.

In relation to your question on vacation and health care packages, the new system will have a vacation and health care package similar, but not identical, to those offered by Penn State. For example with health care packages, benefits may be similar, but employee premiums and or co-payments may vary by type of plan offered.

In relation to your question on vacation, it is my understanding that there is a program, again similar—but not identical—to the Penn State PTO/CAT program that is available.

Details on all of these matters are being worked through and will be communicated to employees as available.

On a personal note, I am concerned that providing this partial information, while we are still working out the details may be a frustrating process for employees. Details of these many issues as they are finalized will be communicated to employees as quickly as possible through meetings, *Vital Signs* and other publications.

For additional information, employees at the medical center may want to use the toll-free telephone number available to them (888-799-3484) or e-mail questions to changes@psu.edu.

Candidates being sought for federal relations post

A search committee has been appointed to identify candidates for the position of director of federal relations in the Office of Governmental Affairs.

The director of federal relations reports directly to the special assistant to the president for governmental affairs and serves as a liaison between the University and federal government with primary emphasis on Capitol Hill.

This individual should have the ability to determine the potential opportunities and/or impact of federal activities for the University; must interact with elected and appointed officials and their staff as well as with other university representatives in Washington, D.C.; must be able to represent the University on a broad range of issues, as well as monitor, interpret and analyze federal legislative initiatives for University administrative and academic officials.

Knowledge of the federal legislative process is essential and working knowledge of the University is desirable. This individual must have demonstrated the ability to articulate complex policy issues to federal legislators and their staff. The position involves a willingness to reside in the State College area with regular travel to Washington, D.C. A bachelor's degree is required. Excellent oral and written communication abilities are necessary. A major emphasis will be placed on excellent interpersonal skills.

Letters of interest and accompanying resume, together with three current letters of reference, should be sent to Gloria D. Briggs, Human Resources coordinator, 1-A Old Main, no later than Feb. 28.

Members of the search committee are Peter Luckie, associate dean for research, College of Earth and Mineral Sciences; Carol Hermann, senior vice president for administration; and Bobby L. White, assistant to the athletic director.

From the Trustees Docket

Arnelle, Junker re-elected to top board posts

San Francisco-based corporate lawyer H. Jesse Arnelle, who is senior partner at Arnelle, Hastie, McGee, Willis and Greene, and Erie-based banker Edward P. Junker III, vice chairman of PNC Bank Corp. and vice chairman of PNC Bank, NA, were re-elected president and vice president, respectively, of the Board of Trustees on Jan. 17.

Arnelle and Junker will each serve a second one-year term that will expire in January 1998.

Arnelle has served on the 32-member Board of Trustees at Penn State since he was first elected to it in 1969 by the alumni. A 1955 graduate of Penn State, a 1962 graduate of The Dickinson School of Law and a native of New Rochelle, N.Y., Arnelle served in the Peace Corps and was later admitted to practice before the U.S. Supreme Court, the Pennsylvania Supreme Court and the California Supreme Court.

He entered law practice in San Francisco as a sole practitioner in 1971 and, in 1985, with William Hastie, he founded the firm of Arnelle and Hastie that merged with McGee, Willis and Greene in 1994. The 30-attorney firm represents many major U.S. corporations.

Arnelle serves on the board of directors of Wells Fargo & Co. and Wells Fargo Bank, N.A., WNDX Technologies Inc., Eastman Chemical Co., Union Pacific Resources Corp., TETRACON Corp., and Armstrong World Industries, among others, and has been a director of the San Francisco Opera Board, World Affairs Council, Commonwealth Club, and president of the African-American Historical and Cultural Society.

In 1994, Arnelle was elected to the board of directors of the National Football Foundation College Hall of Fame and received the Dr. Martin Luther King Jr. Medal for Outstanding Professional Service in Civil

H. JESSE ARNELLE

EDWARD P. JUNKER III

and Human Rights from George Washington University in 1995. Last year, he received an honorary doctorate of law from The Dickinson School of Law.

For Penn State, Arnelle is a past president and co-founder of the Penn State Renaissance Fund; a life member of the Alumni Association; and a member of the President's Club. He also was a member of the National Development Council.

Edward P. Junker III has served on Penn State's board since 1986 when he was first elected by the delegates of the industrial societies and has been re-elected for succeeding terms. He is a 1960 graduate of Penn State and a 1969 graduate of the Stonier Graduate School of Banking at Rutgers University. He is a native of Carnegie.

Junker joined Marine Bank — predecessor to PNC Bank, Northwest PA — as an assistant vice president in 1964 and rose through the ranks to become chief executive officer in 1983. In 1985, Junker was elected chairman of PNC Bank, Northwest PA, and vice chairman of PNC Bank Corp. He served as president of the Pennsylvania Bankers Association in

1988-89. In Erie, he is a member and treasurer of the Erie-Western Pennsylvania Port Authority; president of the Erie Zoological Society; president and a member of the board of directors and executive committee of the Erie Conference on Community Development; and a trustee of the Erie Community Foundation. He is a former chairman of the board of trustees and a member of the board of corporators, Hamot Health Foundation, and a member of the board of incorporators for Saint Vincent Health Center.

He received The Americans For Competitive Enterprise System, Inc. Outstanding Citizen Award in 1992; the Alexis de Tocqueville Society Award-United Way of Erie County; and, in 1995, the Cannon University Distinguished Pennsylvanian Award.

Active in the development of the University, he was a member of the executive committee of The Campaign for Penn State and served on the National Development Council. He is former chairman and a member of the Council of Fellows at Penn State Erie, The Behrend College. Junker received the Philip Philip Mitchell Alumni Service Award in 1984. In 1987, he was selected as an Alumni Fellow in the College of Health and Human Development and at Penn State Erie.

Other board officers include University President Graham B. Spanier, who serves as ex officio secretary of the board. Officers who also were re-elected to one-year terms on the board are:

— Gary C. Schultz, treasurer; Raymond D. Nargi, associate treasurer; Janet L. Krone, assistant treasurer; Paula R. Ammerman, associate secretary; and Carolyn A. Dolbin, Joan L. Coble and Linda L. Cartright, assistant secretaries.

Retired state senator, former trustee awarded the rank of trustee emeritus

Edward P. Zemprelli, retired state senator and former member of the Board of Trustees, was awarded the rank of trustee emeritus on Jan. 17 in recognition of his meritorious service as a board member for 18 years.

"Ed Zemprelli has been a loyal and hard-working member of our board, and we are very pleased that he will continue to share his advice and expertise with Penn State in the years ahead," said H. Jesse Arnelle, president of the Board of Trustees. Although retired from voting and serving as officers, Penn State's trustee emeriti continue to serve on the board as their schedules permit.

In 1978, Zemprelli was appointed to the board by Gov. Milton Shapp and was re-appointed by Gov. Tom Ridge in 1995. He held the office of vice chairman for the Committee on Physical Plant in 1987-88, and chairman of the Committee on The Milton S. Hershey Medical in 1989-90. He also served on the committees on Educational Policy, Finance, Physical Plant, The Milton S. Hershey Medical Center and the Distinguished Alumni Award Screening Committee.

A practicing attorney and formerly a partner in the law firm of Zemprelli, Clipper and Campedel, Zemprelli retired from the Pennsylvania State Sen-

H. Jesse Arnelle
president
Board of Trustees

ate in 1988 after 26 years of service, and having served as both Senate majority and minority leader. He also served six years in the House of Representatives.

He is a 1945 graduate of Penn State with a B.A. in liberal arts, and received his LL.B. from the University of Pittsburgh Law School in 1950. Admitted to the Allegheny County Bar, he began private practice as an attorney in 1950. Before his election to the General Assembly, he served as selector to the City of Clairton for eight years and as chairman of the Democratic Party of Clairton for four years.

May 15 approved as delegate election date

Thursday, May 15 has been approved as the date for the delegate election of trustees and for counting the ballots in the alumni election.

Six trustees are elected by delegates from organized agricultural societies within the Commonwealth of Pennsylvania; and six trustees are elected by delegates from organized engineering, mining, manufacturing and mechanical (referred to as "industrial") societies within the Commonwealth of Pennsylvania. The term of service is three years and two terms from each category expire each year. Nine trustees are elected by the alumni for three-year terms, with three terms expiring each year.

To participate in the election of trustees by delegates from agricultural and industrial societies, societies must be organized and in existence at least three months preceding the election, and notify the University of this fact at least 60 days before the election.

All graduates of Penn State who have received an associate degree, bachelor's degree or an advanced degree, and former students (some restrictions apply) are eligible to participate in the election of trustees by the alumni.

Questions regarding the elections processes and/or eligibility should be directed to the associate secretary of the Board of Trustees, 205 Old Main, University Park, Pa.; (814) 865-2521.

From the Trustees Docket

Eight lauded with Distinguished Alumni Award

Eight Penn State alumni have been selected by the Board of Trustees to receive the Distinguished Alumni Award, the University's highest award for an individual.

Following are the 1997 Distinguished Alumni, year or years of graduation, and current title:

■ **John Olson Almqvist** of State College, a 1947 doctoral degree graduate in dairy science from the College of Agricultural Sciences. He is a retired professor of dairy physiology at Penn State.

■ **James Balog** of Vero Beach, Fla., a 1950 bachelor's degree graduate in premedicine from the Eberly College of Science. He is the retired chairman of Lambert Brussels Capital Corp. and 1838 Investment Advisers.

■ **James S. Broadhurst** of Pittsburgh, a 1965 bachelor's degree graduate in economics from the College of the Liberal Arts. He is chairman and chief executive officer of Eat'n Park Restaurants.

■ **Richard E. Grubb** of State College. He received his bachelor's and master's degrees in agricultural economics and rural sociology from the College of Agricultural Sciences in 1958 and 1961, respectively, and his doctorate in higher education in 1971 from the College of Education. He is senior vice president and dean emeritus for the Commonwealth Educational System, and former Pennsylvania secretary of agriculture.

■ **William H. Joyce** of Newtown, Conn., a 1957 bachelor's degree graduate in chemical engineering from the College of Engineering. He is president,

chief executive officer and chair of Union Carbide Corp.

■ **Raymond E. Schultz** of Memphis, Tenn., a 1955 graduate in labor management relations, College of the Liberal Arts. He is president and chief executive officer of Promus Hotel Corp.

■ **Thomas W. Tewksbury** of Wheaton, Ill., a 1954 master's degree graduate in physical education from the College of Health and Human Development. He is executive vice president and senior partner of The Callahan Group Inc.

■ **Sen. Hardy Williams** of Philadelphia, a 1952 bachelor's degree graduate in political science and history, College of the Liberal Arts. He is a state senator in Pennsylvania's 8th District, and an attorney.

Study shows students emphasize civility and respect

Recent national debates have focused on the rise of incivility and intolerance in America and finding possible solutions, but a University study shows that many Penn State students do place an emphasis on civility and respect.

In the report "Penn State As a Community of Learning" compiled from student surveys done at University Park as part of an Alumni Teaching Follow project, most students saw themselves as acting in ways that endorse an open community. They also indicated that they feel they are treated with respect and permitted to express their ideas. The findings were presented to the Board of Trustees at its January meeting.

"Ninety percent said their own actions respect the rights and dignity of others; 73 percent said they try to understand differing points of views; 44 percent admitted to protesting hurtful language by others," said Fern Willits, the 1995-1996 Alumni Teaching Fellow and professor of rural sociology, who coordinated the survey research.

The two surveys were developed to further

define the six principles for a civil community of learning, as set forth in a study of campus life in the U.S. by the Carnegie Foundation for the Advancement of Teaching in the early 1990s. The Carnegie Foundation suggested a definition of enduring principles for an ideal community of learning: educationally purposeful, open, just, disciplined, caring and celebrative. Willits explained. The Penn State project comprised a telephone survey of 362 undergraduates and a mail survey of 589 faculty, all at University Park. The surveys included a wide range of questions about student and faculty experiences or behaviors at Penn State.

The report also showed that about 72 percent of those surveyed denied that they have been treated with a lack of respect or courtesy, and 61 percent disagreed that they have been prevented from expressing controversial points of view because of fear of reprisals.

"The vast majority of students indicated that they support a just community, work to protect the rights

of others, and have not been unjustly excluded at Penn State," Willits said. "Sixty-five percent have developed a close relationship with someone from a background different from their own."

"The report hopefully will provide information that can help to define some of those areas most in need of improvement and provide a benchmark against which future change can be assessed," said co-author **Betty Moore** of the Penn State Pulse Project and of Student Affairs Research and Assessment. **Diane Enerson**, director of the IDP Center for Excellence in Learning and Teaching, is another co-author.

Authors of the report are: Willits, Moore, **Diane Enerson**, director of the IDP Center for Excellence in Learning and Teaching, and **Jeanette O. Janota** formerly of the Penn State Pulse Project.

The report was prepared in collaboration with The Office of Student Affairs' Penn State Pulse Project, and the IDP Center for Excellence in Learning and Teaching and is available from the IDP in 401 Grange Building on the University Park Campus.

Nominations sought for prevention award recipients

The Penn State Commission for the Prevention of Alcohol, Tobacco and Other Drug Abuse needs your help in identifying and rewarding individuals in our community who are making a significant contribution toward the prevention of alcohol, tobacco and other drug abuse.

The following is a brief description of the criteria and eligibility related to the "Outstanding Contribution Award."

Criteria:

Dedication to the prevention of alcohol, tobacco and other drug abuse for staff, faculty, students and community members demonstrated by innovation, enthusiasm and leadership beyond the expectations of their position/organization.

Eligibility:

Any Penn State faculty, staff, student organization, individual student or member of the local community. Past awardees may be recognized for their work with new programs, but may not receive an award for the same program twice. For a complete list of past award recipients or information on nominating someone, please contact **Natalie Croll** at (814) 863-0461.

All applications must be received by Feb. 3. You may e-mail or mail the information required to Croll, 237 Rittenour Building, University Park, or nxc2@psu.edu.

Research

continued from page 1

industry-sponsored science and engineering R&D expenditures, according to the NSF. MIT reported science and engineering R&D expenditures from industry sources of \$52.7 million and Penn State reported \$50.2 million. Penn State has held the No. 2 spot since 1988.

Robert Killoren, director of sponsored programs, said if all sources of support are considered—including federal appropriations, University infrastructure support and institutional cost sharing—total expenditures for organized research at Penn State were \$344.3 million in 1995. The comparable figure for 1996 is \$348.4 million.

Penn State research in recent years has resulted in the discovery of new planets, experiments aboard the space shuttle, and discoveries about airplane safety, insect flight, artificial heart design, the development of better golf greens, lung disease, software

development, volcano eruptions, care of the elderly, brain tumors, reduction of waste water, injuries among the elderly, breast cancer treatment, the proper use of asthma drugs, single parenthood, the causes of autism and the state's honey bee crisis.

"Faculty at Penn State are engaged in research that changes people's lives and changes the understanding of the world we live in," Spanier said. "They are supported by graduate students in their labs and, in recent years, thousands of our undergraduate students have begun to engage in critical research projects as part of their Penn State education."

"A Penn State undergraduate education is not a passive experience. It may, for example, involve building an important experiment that flies on the space shuttle or working with a team exploring the causes of cancer," Spanier said.

Killoren noted that NSF will report rankings on 1996 expenditures in December 1997.

Behrend captures calls

Prospective students who telephoned the admissions office at The Behrend College had a one in four chance of receiving a busy signal or being disconnected. Thanks to the work of a CQI team, a voice automated system is now in place that allows admissions counselors to connect with callers more easily and to better serve their needs. Team members are: Deanna Alexander, Patricia Melzer, Carol Peterson and Michelle Slagle. The team leader is Donna Fuller and the facilitator is Robert Light. Mary-Ellen Madigan, Behrend's director of admissions and financial aid, sponsored the team.

Benchmarking report

A new research report from ASHE-ERIC touts the use of benchmarking in higher education as an easily understood and effective tool for staying competitive. In the monograph, *Benchmarking in Higher Education: Adapting Best Practices to Improve Quality*, Jeffrey Alstete addresses benchmarking issues like building core competencies and creating an institution more capable of learning how to respond to uncertainty. The report is available from ASHE-ERIC Higher Education Reports, George Washington University, One Dupont Circle, Suite 630, Washington, D.C. 20036; (800) 773-ERIC. The cost is \$18.

Virginia Tech benchmarks Penn State

On Jan. 31, a team of eight administrators from Virginia Tech will spend the day at Penn State benchmarking with their counterparts in research, information technology, student affairs, outreach education, international studies, budgeting and strategic planning. Penn State has been selected as one of six universities Virginia Tech is visiting.

For more information about continuous quality improvement, please call Louise Sandmeyer, executive director of the Center for Quality and Planning, (814) 863-8721, or e-mail LES1@PSU.EDU; or look to the Web at <http://www.psu.edu/president/cqi>.

Faculty/Staff Alerts

Conflict of interest reminder

As a reminder of the conflict of interest disclosure policy, employees of the University should exercise the utmost good faith in all transactions in their duties to the University and its property. In their dealings with and on behalf of the University, they should hold to a strict rule of honest and fair dealings between themselves and the University. They should not use their positions, or knowledge gained in those positions, in such a way that a conflict of interest might arise between the interest of the University and that of the individual. Employees should disclose to the administrative head of the college or other unit in which they are employed, or other appropriate superior officer, any potential conflict of interest of which they are aware before a contract or transaction is consummated.

Library hours

University Libraries on the University Park Campus will maintain the following schedules through May 1: All areas of Pattee Library will be open Monday through Thursday from 7:45 a.m. to midnight; Friday, 7:45 a.m. to 9 p.m.; Saturday, 8 a.m. to 9 p.m.; and Sunday, noon to midnight with the following exceptions:

- Historical Collections and Labor Archives, Interlibrary Loan, Pattee Copy Center and the Rare Books Room will be open Monday through Friday, 8 a.m.-5 p.m.
- University Archives / Penn State Room will be open Monday, Tuesday, Thursday and Friday from 9:30 a.m.-5 p.m.; Wednesday from 9:30 a.m.-9 p.m.; and closed Saturday and Sunday.
- The Music Listening Room will be open Monday through Thursday from 9 a.m.-11 p.m.; Friday, 9 a.m.-6 p.m.; Saturday, noon to 6 p.m.; and Sunday, noon to 11 p.m.
- The Architecture, Earth and Mineral Sciences, Education, Engineering, Mathematics and Physical Sciences Libraries will be open Monday through Thursday 7:45 a.m.-11 p.m.; Friday, 7:45 a.m.-9 p.m.; Saturday, 8 a.m.-9 p.m.; and Sunday, noon to 11 p.m.

- Pollock Library will be open 24 hours a day, seven days a week.

For more information on hours of library service, call (814) 865-3063, type HELP HOURS when using the Library Information Access System (LIAS), or visit the Libraries' home page at <http://www.libraries.psu.edu>.

In addition, during spring semester three floors in West Pattee Library will remain open an additional two hours. Students can continue studying from midnight to 2 a.m., Sunday through Thursday evenings, on the ground, first and second floors of West Pattee. Included in this section of the building are the Periodicals Room, the Reserve Reading Room and a computer lab.

Applications due

■ NASA Space Grant Fellowship

Penn State seniors and graduate students are invited to apply for the NASA Space Grant Fellowships. Supplemental stipends of \$5,000 will be awarded to students pursuing graduate studies at Penn State in fields that, broadly interpreted, promote the understanding, assessment and use of the national space program. Fields of study in most departments are eligible.

■ Sylvia Stein Memorial Space Grant Scholarship

Undergraduate students are invited to apply for the Sylvia Stein Memorial Space Grant Scholarship. One recipient will receive a scholarship of \$7,500 each year for two years. The award will be given to a sophomore

student who will be a junior in fall 1997 with an outstanding academic record enrolled in science, engineering or mathematics.

Application deadline for both of these grants is Feb. 28. For more information on who is eligible and how to apply, contact your department of study or The Pennsylvania Space Grant Consortium, 101 S. Frear, University Park, Pa. 16802; (814) 863-7688; or e-mail pspace@psu.edu.

Proposal deadline

The deadline for proposals to be submitted to the Institute for the Arts and Humanistic Studies for the next funding period (July through December) is 5 p.m. Monday, March 3. Proposals for research fellowships, faculty research groups and funded programs are due at Ihlseng Cottage on the University Park Campus by this date. Guidelines can be obtained from 103 Ihlseng Cottage or by calling (814) 865-0495.

Know someone outstanding in the University Libraries?

Nominations are being sought for candidates for the 1997 University Libraries Award. The award is given in recognition of the achievements or performance of any person holding an academic or staff appointment in the Libraries who meets one or more of the following criteria:

- professional contribution which has a significant influence on the operations of the Penn State Libraries;
- significant professional contribution which earns the respect of the University community for the Libraries;
- significant contribution to the profession which reflects achievement in librarianship at Penn State;
- or outstanding service to the Libraries as shown by continuing leadership and innovation.

Any member of the Penn State community may make a nomination. Forms are available at various locations throughout the Libraries. All nomination forms are due on or before March 14 and should be sent to: Sandy Stauffer, Office of the Dean, E505 Pattee Library, University Park, Pa. 16802.

Deadline for entries nears for Katey Lehman Creative Writing Award

Feb. 3 is the deadline for submitting entries in the annual Katey Lehman Creative Writing Awards contest. Sponsored by the colleges of the Liberal Arts and Communications, this competition is open to all Penn State undergraduates from any location, who have at least sophomore standing. Winners will be announced March 15.

The Katey Lehman Creative Writing Awards are made annually in poetry, fiction and journalism. Application forms are available by mail or in person from the Department of English, 116 Burrows Building, University Park, Pa. 16802.

For more information on prizes, submissions or rules, contact Steve Grecco in the English department at (814) 863-0595.

Student award in East Asian studies

The second annual competition for students working on or developing an interest in some aspect of the cultural traditions of China, Japan or Korea, is under way. Students are invited to submit an application by March 31 for an opportunity to receive \$300. Anyone interested in East Asian studies is eligible to apply. For information on the application process, contact Steven Heine, chair of the East Asian Studies Committee, at (814) 865-3403 or by e-mail at shx23@psu.edu.

News in Brief

Health Promotion Programs

The following Health Promotion Programs are being offered:

Relax and Enjoy Series

During this four-week series, learn to manage everyday stress through the use of meditation, relaxation therapy and gentle stretching. Meets Wednesdays, Feb. 5 through 26, from noon to 1 p.m., in 110 Henderson Building (The Living Center). Cost: \$10, reimbursable to HMO participants. To register, contact **Jan Hawbaker** at (814) 865-3085 or JQH3@psu.edu.

Conscious Eating

Learn how to turn lunch time into a powerful opportunity to break the stress cycle of your day and return to work refreshed and rejuvenated. Meets Thursday, Feb. 6, from noon to 1 p.m. in 125 Reber Building. Cost: none. To register, contact **Jan Hawbaker** at (814) 865-3085 or JQH3@PSU.EDU.

Adult Children of Alcoholics

This support/discussion group now meets at University Park Campus. First session is Thursday, Jan. 30, from noon to 1 p.m. in the Harshbarger Room of Eisenhower Chapel. No prior registration required and there is no cost.

HRDC courses

The following courses are being offered by the Human Resource Development Center. To register for free courses, please call (814) 865-8216. Registration for fee-based courses requires a completed registration form on page 63 of the HRDC course catalog. For course descriptions, log in to their Web site at <http://www.ohr.psu.edu>.

■ Introduction to American Sign Language

Meets Feb. 7, from 8:30-11:30 a.m., in 319 Rider Building. Cost: \$35.

■ Getting Organized!

Meets Feb. 13, from 9 a.m. to noon, in 319 Rider Building. Cost: \$35.

■ Designing Effective Computer-Based Presentations

Meets Feb. 17, from 10 a.m. to noon, in 141 Computer Building. Cost: \$35.

■ Writing on the Run

This program is a quick, easy-to-learn and easy-to-read system of note-taking based on SuperWrite course materials. Meets for 10 sessions on Tuesdays, Feb. 18-April 22, from 11:30 a.m.-1 p.m., in 319 Rider Building. Cost: \$154.

Career sites needed for Take Our Daughters to Work Day

The Commission for Women is now in the planning stages for a morning program for Take Our Daughters to Work Day, which will be held on April 24. Letters were sent to all administrative units at University Park to solicit areas interested in being career sites for the program. Each young woman participating in the program will be able to select and visit three career sites; the visits will provide a chance to explore career opportunities in that area. The young women (grades six through 12) will visit each site for 45 minutes.

If your department is interested in being a career site for Take Our Daughters to Work Day and would like more information, please contact **Debbie Meder** at (814) 865-1821 or by e-mail at dmm4@psu.edu. More information will be provided at a later date on how University Park employees and their daughters can participate in this program.

Library materials can be recalled

Any registered user of the University Libraries is now able to personally recall books that are currently charged out to another person. Patrons can place a personal reserve through The CAT in the Library Information Access System (LIAS) from any library location at University Park.

For more information on the use of the personal reserve command, type help reserve at any LIAS prompt (>>>), or call the Library at (814) 865-2112.

Nature's sculptures

When the weather's bad, there's a place to turn ... for emergency closing information, that is. WPSU-FM (90.1, 91.5 and 106.7) is the center for all information about weather-related class cancellations and office closings at University Park, Altoona College and DuBois Campus. With its three transmitters, the station reaches listeners throughout central and northern Pennsylvania. For more information, check out "Handling Weather Day Absences" on the Web at <http://www.ohr.psu.edu/pages/policies.htm> under Human Resources Guidelines, HRG-10.

Faculty retiree luncheon

Penn State faculty retirees meet at 11:30 a.m. Mondays at the Cadillac Room of the Autopark in State College for lunch and a speaker on a topic of general interest. Retired members of the faculty and their spouses are welcome to join this group. For more information, call **Frank Mallette** at (814) 237-2021.

Looking for "depressed" people

Most people feel depressed at some time or another in their life, but some experience major depression. A study being conducted at Penn State is designed to help people with this problem. You may be experiencing major depression if you:

- Feel depressed most of the day, nearly every day;
- Experience a marked decrease of interest and pleasure in almost all activities;
- Feel fatigue or loss of energy most of the day;
- Feel worthless or excessive guilt; or
- Feel a decreased ability to think or concentrate.

Subjects (ages 18-55) included in the study will receive 12 to 20 free sessions of individual psychotherapy either immediately after being assessed for depression or 12 to 20 weeks later. Subjects also will be asked to complete various questionnaires during and after treatment. A brief telephone interview will help researchers determine the suitability of this treatment for you. If you cannot be included in this treatment, alternate referral suggestions will be made. Strictest confidentiality is maintained.

If you believe that you are experiencing major depression and would like to be considered for this treatment, please call (814) 863-4833. **Louis Castonguay**, assistant professor of psychology, is the principal investigator in this study.

EMPLOYEE BENEFITS

A regular column provided by the Office of Human Resources

Benefits reminders

Faculty and staff members are reminded of the following:

■ Flexible benefits reimbursements

Requests for reimbursement for services incurred in 1996 must be submitted on or before March 31. Reimbursements are based on the date the service occurred not on the date of payment, so only services from Jan. 1, 1996 through Dec. 31, 1996 are eligible.

■ 1996 Medical Claims

March 31 also is the last date HealthAmerica and Corporate Health Administrators will accept medical claims for Healthpass and Plan A for 1996 charges.

■ Employee Assistance Program

The Employee Assistance Program (EAP) provides confidential counseling sessions for University faculty, staff and members of their households. Up to three visits per problem situation are paid for by Penn State. To receive a free consultation, contact the Penn State EAP at 1-800-858-2778, (employees at The Hershey Medical Center, call 1-800-543-5080).

■ SERS Retirement Account Statements

The annual statement of account that each State Employees' Retirement System (SERS) participant receives will be mailed to the participant's home address again this year. To receive your statement in a timely manner, your home address must be current. Please note that the only method for changing a home address is to complete a new W4 form through the Payroll Department.

The

ARTS

AT PENN STATE

Artist to give workshop

New York City dance artist **Pilar Pascual** will be the guest of the Penn State International Dance Ensemble on Saturday, Feb. 1, when she oversees a workshop on Spanish dance. Pascual will give a talk at the beginning of the workshop.

Guests are invited to observe the day's activities, scheduled from 9 a.m. to 6 p.m. in Room 133 White Building on the University Park Campus.

Anyone with questions should contact **Elizabeth Hanley**, director of the Ensemble and assistant professor of kinesiology, at (814) 863-3467.

Opera Gala

The Penn State Opera Theatre will present its Fourth Annual Opera Gala in the College of Arts and Architecture's School of Music Recital Hall at 3 p.m. Sunday, Feb. 2, on the University Park Campus.

In the gala concert, produced by opera director and associate music professor **Susan Boardman**, School of Music faculty members, alumni and students will perform arias, ensembles and choruses from the world's most beloved operas. Penn State's Concert Choir, directed by professor **Douglas Miller**, will participate, and pianist **Matthew Doebler** will accompany the concert.

Tickets for the Opera Gala are \$4 and may be purchased at the School of Music Office or at the door before the performance.

Pre-Carnegie Hall concert

The Castalia Trio will present a concert of chamber music at 8 p.m. Wednesday, Feb. 5, in the College of Arts and Architecture's School of Music Recital Hall on the University Park Campus. The trio is comprised of pianist **Marlyne Dosse**, professor of music; violinist **Jamie Lyon**, associate professor of music; and cellist **Kim Cook**, associate professor of music.

The concert is one of six concerts the resident artists are performing in preparation for their recital at Carnegie Hall's Weill Recital Hall on Saturday, Feb. 15. Tickets for the Carnegie Hall performance may be purchased by calling (212) 247-7800.

Bach's Lunch

The Penn State Chamber Singers, directed by professor **Douglas Miller** of the School of Music faculty, will perform for the free Bach's Lunch concert at 12:10 p.m. Thursday, Feb. 6, in the Helen Eakin Eisenhower Chapel on the University Park Campus.

The 20-minute concert is part of the Bach's Lunch series sponsored by the College of Arts and Architecture and the University Lutheran Parish.

Audience members may take a bag lunch to eat after the concert in the Roy and Agnes Wilkinson Lounge. Coffee and tea will be provided.

The Chamber Singers will present their 11th Celebration of Love concerts in the Old Main lobby Feb. 14 and 15.

"La Boheme"

The New York City Opera National Company's performances of "La Boheme" at 9 p.m. Saturday, Feb. 8 and 3 p.m. Sunday, Feb. 9 in Eisenhower Auditorium on the University Park Campus will feature an accompanying orchestra. The opera is sponsored by the Center for the Performing Arts.

The performance will be sung in the original Italian with English subtitles projected above the stage.

Tickets are \$33.50, \$28.50 and \$23.50 for non-students, \$28.50, \$24.50 and \$21.50 for students.

For tickets or more information, contact the Arts Ticket Center, open Monday through Friday, 8:30 a.m. to 4:30 p.m., at (814) 863-0255. Outside the local calling area, phone (800) 278-7649.

Several exhibits at University Park

■ HUB Art Alley Cases

The HUB's Art Alley Cases feature an exhibit of Nigerian artifacts through Feb. 16.

The collection includes original designs of native dress, jewelry, musical instruments, swords, pipes and bells. Most of the artists are Hausa from the Congo State, Nigeria. The exhibit is on loan to the HUB Galleries from Sharon and Jim Mortensen.

■ HUB Art Alley Panels

The HUB's Art Alley Panels feature *Imagine a World* by graphic design students from The School of Visual Arts in The College of Visual Arts and Architecture through Feb. 23.

The exhibit represents the students' interpretation of Unity Days through graphic design. With vivid photography and darkroom manipulation the students explore the issues of racism, sexism, homophobia, gender and disability.

■ HUB Browsing Gallery

The HUB's Browsing Gallery features the exhibit *Our Land by Jay Sieminski* through Feb. 23.

At the Jordan Center

Singer **Gloria Estefan** will be in concert Feb. 2 at the Bryce Jordan Center on the University Park Campus. Tickets are \$35 and \$25 for reserved seating.

Sieminski traveled to South Africa to research the land rights restitution process. A Penn State political science senior with a minor in photography, he photographed several claimant communities. The exhibit depicts life in the homelands and the process of reclaiming land rights.

■ HUB Formal Gallery

The Formal Gallery at The Hetzel Union Building features *Memories of Childhood* through Feb. 22.

This exhibit originated at the Steinbaum Krauss Gallery in New York City. Fifteen artists — photographers, painters, printmakers — created images of their childhoods. Representing "American melting-pot kids," the artists' stories are told in words and visuals.

■ Kern Exhibition Area

The Kern Graduate Building Art Cases feature the designs of **Chip Kidd** through Feb. 16 and the prints of **Perry Oliver** through Feb. 20.

Kidd, a Penn State alumnus in visual arts, is well known for his dust-jacket designs. He is the head designer at Alfred A. Knopf and recently published his art book, *Batman Collected*.

Oliver, born in Pennsylvania in 1941, eventually established his residence in Nerja, Spain. A professional architect, Oliver taught himself printmaking and for almost 25 years his work has been exhibited throughout the world.

Previously exhibited in the HUB Art Alley, Oliver's show has been extended to Kern.

■ Palmer Museum of Art

"Capturing the Light: A Selection of 20th-Century American Watercolors," an exhibition of watercolors by American masters, is on view at the Palmer Museum of Art on the University Park Campus through Sunday, May 18.

Beginning with a late 19th-century seascape by Winslow Homer, the exhibition traces the development of the watercolor through the 1940s. The works range in subject matter from landscape to still life.

Watercolorists such as Charles Burchfield, Charles Demuth, Arthur

BYRCE JORDAN CENTER

Upcoming events

- Feb. 2
Gloria Estefan, 8 p.m.
Tickets: \$35 and \$25 for reserved seating, on sale now.
- Feb. 20
Harlem Globetrotters, 7:30 p.m.
Tickets: \$13; \$2 discount for youth and senior citizens; \$5 discount for faculty and staff with ID and for groups of 15 or more. Penn State students may purchase half-price tickets. Penn State ID ticket purchases may be made at the Bryce Jordan ticket center only, and there is a limit of two tickets per ID. VIP seating is \$20; Magic Circle seating is \$70 and includes an authentic Globetrotter jersey. Special discounts do not apply to VIP and Magic Circle seating. Tickets are on sale now.

■ Feb. 22
John Michael Montgomery with **Ricochet**, 8 p.m.
Tickets are \$25, \$22.50 and \$20 and go on sale Feb. 25 at 8 a.m. John Michael Montgomery has stormed to the top of both the country and pop album charts with hits like his 1995 Grammy Award-winning "I Swear." He was also named Billboard's Top Country Artist for 1995.

For more information on Bryce Jordan Center events, visit the Web at <http://www.bjc.psu.edu/>.

G. Dove, John Marin and Maurice Prendergast will be represented by multiple examples of their work.

The Palmer Museum of Art on Curtin Road is open Tuesday through Saturday, 10 a.m. to 4:30 p.m., and Sunday, noon to 4 p.m. Admission to the museum is free.

■ Zoller Gallery

"Photo — First half: Collage, second half: Applied" is an exhibit in the Zoller Gallery in the College of Arts and Architecture School of Visual Arts Building on the University Park Campus. The exhibition focuses on two different aspects of photography.

The first half, curated by photographer and art professor **Ken Graves**, is a selection of fine art work by nationally known photo collage artists; the second half of the exhibit, curated by **Lanny Sommese**, professor of art, and **Kristin Sommese**, associate professor of art, will feature photography as it is applied in graphic design. The artists included in the second part of the exhibition are all Penn State graphic design alumni.

The exhibition is free to the public.

UNIVERSITY PARK CALENDAR

SPECIAL EVENTS

Saturday, February 1

School of Music, 3 p.m., 122 Music II. Student Recital presents Teri Stephens, percussion, and Renee Guarnieri, flute.

Center for the Performing Arts, 8 p.m., Eisenhower Auditorium. "Kiss of the Spider Woman." For tickets, phone (814) 863-0255.

Palmer Museum of Art, 2 p.m., Christoffers Lobby. Gallery Talk presents Katherine Bente on "Italian Baroque Painting at the Palmer Museum."

Sunday, February 2

School of Music, 3 p.m., Recital Hall. "Opera Gala." Susan Boardman, director. For tickets, phone (814) 865-0431.

School of Music, 8 p.m., Recital Hall. Student Recital presents Audrey Rottschaefer, clarinet.

Monday, February 3

School of Music, 8 p.m., Recital Hall. Student Recital presents Annie Burridge, soprano, and Tracy Geesaman, mezzo-soprano.

Wednesday, February 5

School of Music, 8 p.m., Recital Hall. "Castalia Trio."

Thursday, February 6

Center for the Performing Arts, 8 p.m., Eisenhower Auditorium. "Mazowsze—The State Folk Song and Dance Ensemble of Poland." For tickets, phone (814) 863-0255.

School of Music, 8 p.m., Recital Hall. Student Recital presents Gary Yaple, percussion.

Friday, February 7

Palmer Museum of Art, 2 p.m., Christoffers Lobby. Gallery Talk presents Catherine Ciferri on "American Watercolors at the Palmer Museum."

School of Music, 8 p.m., Recital Hall. "Celebration of African-American Spirituals." Anthony Leach, director. For tickets, phone (814) 865-0431.

Saturday, February 8

Palmer Museum of Art, 11:30 a.m., Christoffers Lobby. Gallery Talk presents Horne Seymour on "Nineteenth-Century American Art."

Center for the Performing Arts, 8 p.m., Eisenhower Auditorium. "La Bohème—New York City Opera National Company." For tickets, phone (814) 863-0255.

School of Music, 8 p.m., Recital Hall. "Celebration of African-American Spirituals." Anthony Leach, director. For tickets, phone (814) 865-0431.

Sunday, February 9

Center for the Performing Arts, 3 p.m., Eisenhower Auditorium. "La Bohème—New York City Opera National Company." For tickets, phone (814) 863-0255.

On display

The HUB Browsing Gallery on the University Park Campus features the exhibit "Our Land" by Jay Sieminski through Feb. 23.

School of Music, 8 p.m., Recital Hall. "Celebration of African-American Spirituals." Anthony Leach, director. For tickets, phone (814) 865-0431.

Monday, February 10

School of Music, 8 p.m., Recital Hall. Graduate Recital presents Celia Teh, piano.

SEMINARS

Monday, February 3

The Institute for High Performance Computing Applications, 3:35 to 4:25 p.m., 215 Hammond. Carolina Cruz-Neir on "Interactive Visual Supercomputing: Immersed in Science and Engineering."

Tuesday, February 4

Geoscience, 4 p.m., 112 Walker. Jeff Severinghaus on "Thermal Fractionation of N₂ and Ar isotopes: A gas-phase stratigraphic marker of abrupt temperature change in ice core records."

Nutrition, 4 p.m., S-209 Henderson. Don Wojcowski on "Diverse Roles for EPO in Erythroid Development: A Paradigm for Signaling via Type 1 Cytokine Receptors." Biology, 4 p.m., 8 Mueller Lab. Dan Jay on "Laer Inactivation of Proteins During Growth Cone Motility."

Art History, 7:30 p.m., Palmer Lipson Auditorium. Elizabeth Cropper on "Italian Renaissance/Baroque Art."

Wednesday, February 5

Center for Russian and East European Languages, noon, 124 Sparks. Barry W. Ickes on "After Stabilization: Prospects for Economic Recovery." Gerontology, 12:15 to 1:15 p.m., The Living

Center, 110 Henderson Building. Frederick G. Ferguson on "Age-Related Alterations in Immune Parameters and Possible Relationships to Survival."

Center for Women Students, noon, 120 Boucke. Melissa Martiotta on "Don't Weigh Your Self-Esteem: It's What's Inside that Counts."

Thursday, February 6

Gravity Center, 11:30 a.m., 339 Davey Lab. Andrew Strominger on "Black Hole Thermodynamics."

Physics, 3:30 p.m., 101 Osmond Lab. Andrew Strominger on "Black Holes and String Theory."

Friday, February 7

Geography, 4 p.m., 206 Walker. John Cromar on "Defining Metropolitan Areas and the Rural-Urban Continuum."

Sunday, February 9

Archaeological Institute of America, 4 p.m., 101 Kern. Dennis Dirkmaat on "Archaeological Osteology."

Monday, February 10

Continuing and Distance Education and the College of Education's Adult Education, 11:45 a.m. to 1 p.m., 502 Keller. Sara J. Parks on "Professional Perspective on Lifelong Learning."

The Institute for High Performance Computing Applications, 3:35 to 4:25 p.m., 215 Hammond. Vigor Yang on "Combustion Instabilities in Propulsion Systems."

CONFERENCES

Saturday, February 1

Fitness and nutrition program for women, The Penn State Scanticon. Wayne Campbell on "Strength and Resistance Training

and the Benefits for Women" and Star Campbell on "Nutrition for the Busy Lifestyle."

Penn State International Dance Ensemble, 8 a.m., 132 White. Pilar Pascual presents a Spanish dance workshop.

Monday, February 3

Will Keim at The Penn State Scanticon on "Serving the Community, Leading Each Other." To register, phone (814) 863-4624.

Thursday, February 6

Agricultural Economics and Rural Sociology, Nittany Lion Inn. "Beginning Farmer Workshop."

Friday, February 7

Agricultural Economics and Rural Sociology, Nittany Lion Inn. "Sustainable Agriculture (PASA)" through Feb. 8.

Sunday, February 9

Poultry Science, Nittany Lion Inn. "Game Bird Conference" through Feb. 11.

EXHIBITS

HUB Art Alley Cases

African artifacts by Sharon and Jim Mortensen, through Feb. 16.

HUB Art Alley Panels

Unit Days and graphic design "Imagine a World," through Feb. 23.

HUB Browsing Gallery

Photography exhibit titled "Our Land" by Jay Sieminski, through Feb. 23.

HUB Formal Gallery

"Memories of Childhood" through Feb. 22.

HUB Sculpture Corner

"American Gothic Revisited" by Jane Richey, through May 21.

Kern Panels

Perry Oliver, international printmaker, displays works, through Feb. 20.

Kern Tail and Flat Cases

Visual art display "Dust-Jackets" by Chip Kidd, through Feb. 16.

Palmer Museum of Art

"Dismal Science: Photo Works by Alan Sekula, 1972-1996" through March 16. "Capturing the Light: A Selection of 20th-Century American Watercolors" by Winslow Homer, through May 18.

Zeller Gallery

Photo collage by Ken Graves, through Feb. 13.

Photography by Kristin Breslin Sommesse, through Feb. 13.

Reflects an international perspective.

For a full listing of University Park activities, including sports events, go to the Web at URL <http://cac.psu.edu/calendar/>

FEBRUARY 1 - FEBRUARY 10

Programs designed to help adult learners with their financial strategies

The Center for Adult Learner Services on the University Park Campus is sponsoring several programs in February on financing an education. The first program, titled "Student Aid: Making Money Stretch," is set for 6 p.m. Wednesday, Feb. 5, or noon Thursday, Feb. 6, in 310 Shields Building.

The program, presented by Jim Fay, financial planner, and Jo Nwankwesi, program officer for Student Aid, will focus on developing a personal budget, application deadlines, financial aid sources, cost-saving tips and the cost of attendance.

"Searching for Graduate School Financial Support," the second pro-

gram planned for February, will be held Wednesday, Feb. 19, in 109 Boucke Building from 6 to 9 p.m. The program is intended for graduate students looking for external graduate school support. It will show students how to search for financial support for graduate studies, and give an overview of the dif-

ferent types of programs available. Jeff Ritchey from the Office of Fellowships and Awards will present the workshop.

For more information on either program, contact the center at (814) 863-3887 or stop by 323 Boucke Building.

LECTURES

Frontiers of Science lectures focus on "Becoming Human"

"On Becoming Human" is the topic of the spring semester 1997 Penn State Lectures on the Frontiers of Science. Designed for the enjoyment and education of central Pennsylvania residents, the lectures are taking place on six consecutive Saturday mornings from 11 a.m. to noon on the University Park Campus.

The second lecture in the series, "Discoveries and Discoverers: How the Sequences of Discoveries and the Personalities of the Discoverers Changed the Field," will be given on Feb. 1 by **Pat Shipman**, adjunct associate professor of anthropology at Penn State, in 101 Thomas Building. Shipman's research has focused on reconstructing the lifestyles of our earliest ancestors and the animal communities in which they lived. Also an expert on the history of ideas about human origins, she will discuss in her lecture how our views of our evolutionary past have been shaped and changed by fossil discoveries and by the people responsible for those discoveries.

The remaining events in the series include:

—Feb. 8: "Histories of Human Genes and Populations: Signatures of

PAT SHIPMAN

Ancient Population Dynamics in Gene Differences," by **Henry Harpending**, distinguished professor of anthropology and human development at Penn State, in 101 Thomas Building.

—Feb. 15: "Human History as Seen Through Genetics: Ancient and Modern DNA Sequences Reveal New Aspects of Our History," by **Svante Paabo**, professor of biology at the University of Munich, Germany, in 101 Thomas Building.

—Feb. 22: "Behavior from Bones: The Diet, Locomotion and Sex Lives of Our Ancestors," by **Alan Walker**, distinguished professor of anthropology and biology at Penn State, in 101 Thomas Building.

—March 1: "The Evolution of the Mind: Speculations from Contemporary Biology Based on the Musings of a Young British Victorian Naturalist," by **Jeffrey A. Kurland**, associate professor of anthropology and human development at Penn State, in 111 Warkit Laboratory.

The Penn State Lectures on the Frontiers of Science are sponsored by the Eberly College of Science. For more information, call (814) 863-8453.

Explore the future of land-grant institutions at inaugural Hill Seminar

C. Eugene Allen, provost for professional studies and director, Minnesota Agricultural Experiment Station, will present the inaugural Hill Seminar, "Land Grant University Program Adaptations Needed For The Next Decade," at 3 p.m. Friday, Feb. 7, in 101 Agricultural Sciences & Industries Building on the University Park Campus.

Allen joined the University of Minnesota faculty in 1967 and became dean of the College of Agriculture in 1984. From 1990-1995, he served as vice president of the Institute of Agriculture, Forestry and Home Economics, and director of the Minnesota Agricultural Experiment Station. In February 1995, he was named provost for professional studies. Before becoming dean in 1988, Allen was a faculty member in two departments — animal science and food science and nutrition. His research

on animal growth is internationally recognized as being at the forefront of understanding the cellular growth and metabolism of muscle and adipose tissue.

At the national level, Allen has played a key leadership role in advancing the role of food and agriculture in the National Research Council (NRC). These efforts led to the establishment of the NRC Board of Agriculture in 1981. More recently, he served as chair of the agricultural, food and renewable resource section of the American Association for the Advancement of Science.

For further information, contact **Terry D. Etherton** at (814) 863-0658. This annual lecture is funded through an endowment established by Otto J. and Opal I. Hill. Hill received his master's degree in Dairy Science from Penn State in 1930.

Learn about fitness and nutrition for women Feb. 1

"Getting It Together: Fitness and Nutrition for Women," a program for women of all ages and all fitness levels, will be presented from 9 a.m. to 3:45 p.m. Saturday, Feb. 1, at The Penn State Scanticon at University Park.

Sessions planned include:

■ "Strength and Resistance Training: Benefits for Women," presented by **Wayne Campbell** from Penn State's Noll Laboratory for Human Performance Research. This session will outline and explain how to begin a basic strength-training program. Dress comfortably, and

■ "Nutrition for a Busy Lifestyle," given by **Star Campbell**. This session will show participants how to fit good nutrition into a busy lifestyle, how to add variety to meal planning and nutrition over the lifespan.

The fee for this program is \$89 (with partial reimbursement for HealthAmerica members). For more information, contact (800) 778-8622.

Maxine Kumin poetry symposium planned for Feb. 1

A one-day symposium on the poetry of **Maxine Kumin**, who has won nearly every literary prize offered in the United States — including the Pulitzer Prize, will be held on Saturday, Feb. 1, on the University Park Campus.

The free symposium will focus on Kumin's work, which encompasses rural as well as urban issues. A highlight of the symposium will be a reading of her poetry by **Maxine Kumin** herself.

For more information on the event, contact **Emily Groszold** at 865-1676 or **Robin Becker** at 863-3606.

Free computing seminars scheduled weekly

The Institute for High Performance Computing Applications is offering a free seminar every week during spring semester on the University Park Campus. The following seminars are for the months of January and February. All seminars listed, unless otherwise noted, will be held in Room 215 Hammond Building from 3:35 to 4:25 p.m.

—Feb. 3: Professor **Carolina Cruz-Neir**, Center for Emerging Manufacturing Technology and Electrical and Computer Engineering, Iowa State University; "Interactive Visual Supercomputing: Immersed in Science and Engineering."

—Feb. 10: **Vigor Yang**, professor of mechanical engineering at Penn State, will discuss "Combustion Instabilities in Propulsion Systems."

—Feb. 17: **Norman Swanson**, professor of economics at Penn State, will talk about "Computing Issues in Econometrics."

—Feb. 24: **Dan Lenosi** of Silicon Graphics Inc. is tentatively scheduled to speak on "cc-NUMA and Origin 2000 Architecture."

For a full listing of seminars planned this semester, visit the institute's Web site at <http://cac.psu.edu/~lnl/ilhpcaspring597e97.html>.

Lecture, reception planned on African American history

"African American History: Undercover Underground," a lecture featuring **Charles Blockson**, curator of the Charles L. Blockson Afro-American Collection at Temple University, will be held at 3:30 p.m. Thursday, Feb. 6, on the University Park Campus in Pattee Library's West Wing Staff Lounge, third floor. A reception will follow.

Blockson has spent more than 40 years amassing one of the nation's largest private collections of black history. The collection contains more than 150,000 books, pamphlets, manuscripts, prints and drawings, sheet music, posters and artifacts. He lectures in both foreign and domestic schools, colleges and universities, and has traveled extensively in Europe, the Caribbean and Africa. He has organized exhibitions and black studies programs throughout the United States.

Blockson holds an honorary doctorate from Villanova University and is listed in *Who's Who Among Black Americans*. He is chairman of the National Park Service Underground Railroad Advisory Committee and project director of the Pennsylvania African American State Historical Marker Program for the City of Philadelphia. Former president of the Pennsylvania Abolition Society, he has served as a director of the state Historical and Record Advisory Board and its Black History Advisory Board. Blockson has served as a past member of Penn State's Alumni Council and received the honor of Alumni Fellow in 1981. Currently, he participates as a member of the Libraries' Development Advisory Board.

Population Research Institute seminars continue

The Population Research Institute, sponsor of a seminar series on issues relating to population research, continues its talks with two more seminars on March 18 and April 16 on the University Park Campus. Mark your calendars for:

■ **Michael Flinn**, associate professor of anthropology at the University of Missouri, will present his population research at 11:45 a.m. Tuesday, March 18;

■ **Charles Weinberg**, Statistics and Historical Demography Branch, National Institute of Environmental Health Sciences, will give a seminar at 11:45 a.m., Wednesday, April 16. Both seminars will be in room 406 Oswald Tower.

More Lectures 1994 Nobel Laureate to speak on Feb. 13

The 1994 Nobel Laureate, **Kenzaburo Oe**, will present a lecture on the University Park Campus on Thursday, Feb. 13.

Oe, a world-famous novelist, was described by the Nobel committee as "one who with poetic force creates an imagined world, where life and myth condense to form a disconcerting picture of the human predicament today."

Born in 1935 in a rural island village, he won Japan's premiere literary honor, the Akutagawa Prize, with his novel *The Catch*. His subsequent literary endeavors have been described as "magical realism," although his novels and stories also express his ongoing critique of Japanese society and politics.

Oe's international reputation

began to grow after the translation of *A Personal Matter*, a poignant tale about a father's dealing with the birth of a mentally handicapped child — fiction that was clearly connected to Oe's real-life experiences with Hikaru, his own son. Some of Oe's other books translated into English include: *Nip the Buds, Shoot the Kids*; *A Quiet Life*; *The Silent Cry*; and *Hiroshima Notes*.

The lecture begins at 5:30 p.m. in 112 Kern Building. It is sponsored by the East Asian Studies Committee, the Office of International Programs, the departments of Religious Studies, Comparative Literature and History, and other units.

For more information, contact **Steven Heine** at (814) 865-3403; or by e-mail at shx23@psu.edu.

Symposium celebrates African American spirituals

At Penn State's symposium on African American spirituals participants will hear more than 100 of the thousands of soulful gospel. They also have an opportunity to learn more about the historical and societal contexts that influenced its development. Penn State's School of Music and the Office of Continuing and Distance Education will present a symposium Feb. 7-9 in celebration of African American spirituals. The event will feature concerts, lectures, demonstrations and choral reading sessions on the historical and philosophical aspects of this music genre.

Topics include: *The Solo Spirituals of African American Women Composers: The Golden Era of the Solo Spiritual: The Works of H.T. Burleigh and Hall Johnson*; *The Hambidge Spirituals*; *Unpublished Editions and the Works of Wendell Whalum*; and *The Spiritual: The Slaves' Response to Culture and Society*.

The symposium will be held at The Penn State Scenic Center at University Park. Registration is \$25 for students and \$100 for non-students.

Public performances surrounding this event include:

— a faculty/guest artist recital Feb. 7 at 8 p.m.,

— a student recital Feb. 8 at 8 p.m. and the Essence of Joy choral group — and guest artists' recital Feb. 9 at 3 p.m.

These performances will be held in the recital hall of the School of Music. Student tickets are \$2; non-student tickets are \$4.50. A special worship service will be held Sunday, Feb. 9, at 11 a.m. at the Albright-Bethune United Methodist Church on the corner of Beaver and Burrows avenues in State College. The service will be conducted by Revs. **Kenneth and Yolanda Clarke**.

Guest performers include **J. Weldon Norris**, director of the School of Music, Howard University; **Raymond Tynes-Jones**, director of the School of Music at The University of Northern Iowa; **Marymal Holmes**, associate professor of music, Bowie State University, Md.; **Edward Jackson Sr.**, retired music teacher, Washington, D.C.; public schools; **Rebecca Ott-McFate**, soprano, Pittsburgh; and **Bruce Trinkle** and **Carl Blake**, associate professors of music, Penn State.

For more information on this event, contact **Anthony Leach**, coordinator, at (814) 865-6521, or by e-mail ATL105@psu.edu.

Max Kade lecture series continues

Continuing its three-lecture series, the Max Kade German-American Research Institute presents the following lectures on the University Park Campus:

— *"The Trials and Tribulations of German Family Names in America"* presented by **Juergen Eichhoff**, Department of German, Penn State, 4:30 p.m. Tuesday, Feb. 25, in 109 Boucke Building;

— *"Pennsylvania's Crazy Quilt of German Religious Groups"* presented by **Donald F. Durnbaugh**, Juniata College and **Juergen Eichhoff**, Department of German, Penn State, at 4:30 p.m. Tuesday, March 18, in 109 Boucke Building.

Anthropologist to talk about women in science

The Penn State Forum, a speaker series sponsored by the Faculty Staff Club and the Penn State Bookstore, kicks off the spring semester with a talk on women in science beginning at 11:30 a.m. Thursday, Feb. 13, at the Nittany Lion Inn on the University Park Campus.

Reviewing the Issue of Women in Science and Engineering" will be presented by **Sue V. Rosser**, professor of anthropology at the University of Florida-Gainesville and director of its Center on Women's Studies and Gender Research. In her talk, Rosser will touch on whether there is room for feminism in science, integrating curriculum to be more "female-friendly" and new ways to attract women to science.

Rosser received her Ph.D. in zoology from the University of Wisconsin-Madison in 1973. From 1986 to 1995, she served as director of women's studies at the University of South Carolina, where she also was a professor of family and preventive medicine in the medical school. In 1995, she was a senior program officer for Women's Programs at the National Science

SUE V. ROSSER

Foundation and since January 1996, she has served as director of the Center on Women's Studies and Gender Research in Gainesville.

Rosser has written nearly 70 journal articles on the theoretical and applied problems of women and science and women's health. She is the author of several books, including *Teaching Science and Health from a Feminist Perspective: A Practical Guide* (1986); *Female-Friendly Science* (1990); *Feminism and Biology: A Dynamic Interaction* (1992); and *Teaching the Majority* (1995). She also served as the Latin and North American co-editor of *Women's Studies International Forum* from 1989-1993 and was a visiting distinguished professor for the University of Wisconsin system's "Women in Science" project.

The event begins at 11:30 a.m. with lunch, followed by the speech at noon. Tickets are \$10 and include lunch. Reservations can be made by mail or by stopping by the Faculty Staff Club office at 110 HUB. For more information, call (814) 865-7590.

Associate director of NIH to discuss health science during Feb. 5 lecture

Norman B. Anderson, associate director of the National Institutes of Health, will deliver the 1997 Sol Kramer Lecture of the College of Health and Human Development at 3 p.m. Wednesday, Feb. 5, in 101 Kern Building on the University Park Campus.

Anderson, who also serves as director of the NIH Office of Behavioral and Social Science Research, will speak on "Bridging the Chasm Between Social, Behavioral and Biomedical Research: An Integrated Multi-Level Approach to Health Science." The event is open to the public.

The Office of Behavioral and Social Sciences Research is charged with facilitating growth in behavioral and social research across all of the 24 institutes and centers of the NIH. Since joining the office, Anderson has initiated a number of activities aimed

NORMAN B. ANDERSON

at removing the artificial separation between biomedical research and behavioral and social science research. In addition to his work at NIH, Anderson is associate professor in psychiatry and psychology at Duke University and founder and director of the university's program on health, behavior and aging in black Americans, and director of Duke's

Exploratory Center for Research on Health Promotions in Older Minorities. He is also a senior fellow at Duke's Center for the Study of Aging and Human Development.

He earned his doctorate in clinical psychology from the University of North Carolina at Greensboro. He then completed a clinical psychology internship at Brown University School of Medicine and two postdoctoral fellowships at Duke.

More Lectures

Forestry lecture slated for Feb. 6

R. Scott Wallinger, senior vice president, international, Westvaco Corp., will present the School of Forest Resources Distinguished Lecture, "An Optimistic View of Sustainable Forestry," at 7 p.m. Thursday, Feb. 6, in 101 Agricultural Sciences and Industries Building on the University Park Campus. The School of Forest Resources Distinguished Lecture is an annual event sponsored by the Glatfelter Pulp Wood Co.

R. SCOTT WALLINGER

The lecture will describe sustainable forestry initiatives at the national and international level and discuss their potential for improving the management of private and public forest lands and reducing the environmental impacts of timber harvesting.

Wallinger has executive responsibility for the company's international product sales, its Brazilian paperboard and container subsidiary, and its domestic forest management and related real estate business. He is a member of the International Business Committee and the Forest Resources Group of the American Forest and Paper Association.

Wallinger has been with Westvaco since 1965, beginning as a forester in the Cooperative Forest Management Program with private landowners. For additional information on the lecture, please contact **Caren Glogofsky** at (814) 863-2506 or by e-mail at ceg12@psu.edu.

Forensic anthropologist to speak on Feb. 9

Dennis Dirkmaat of Mercyhurst College in Erie, who spends his spare time helping the FBI, police and coroners' offices identify and analyze skeletal remains, will discuss forensic anthropology at 4 p.m. Sunday, Feb. 9, in Kern Building on the University Park Campus.

Dirkmaat received his Ph.D. in anthropology from the University of Pittsburgh and participated in the excavation of the Meadowcroft rock shelter, one of the oldest sites inhabited by Native Americans. His archaeological training has been invaluable in police work and the investigation of accidents.

The talk is sponsored by the Archaeological Institute of America, with support from Penn State's Institute for the Arts and Humanistic Studies and the Department of Art History.

Catholic fellowship to meet during lunch

Penn State Catholic Faculty and Staff Fellowship meets periodically throughout the year from noon to 1 p.m. in 212 Eisenhower Chapel. Scheduled talks for the spring semester include:

- Feb. 10: "Are the Media Anti-Catholic?" presented by **P. Jenkins**, director of religious studies;
- Feb. 17: "Lunch with the Bishop: Open Forum," with the Rev. **Joseph Adamec**, bishop of the Altoona-Johnstown Catholic Diocese;
- March 18: "Physical Aspects of the Death of Christ," presented by **Dr. E. P. Roy III**, Internal Medicine Associates;
- April 7: "The Saints of Naples," given by **J. Porter**, associate professor of art history; and
- April 22: A tentative talk titled "Social Teachings of the Church," to be presented by **L. Iwanis**, associate professor of Russian and comparative literature.

Participants are invited to bring a brown-bag lunch. For more information, call the Eisenhower Chapel at 865-4281.

Students to gather for science symposium

Pennsylvania high school students and teachers will gather at University Park for the 33rd Annual Pennsylvania Junior Science and Humanities Symposium on Feb. 27-28.

Students from across the Commonwealth will be presenting research on such topics as behavioral and physiological biology, chemistry and engineering. The student presenting the best research paper will win a \$400 scholarship and will be invited to present his or her paper at the National Junior Science and Humanities Symposium in North Carolina in May.

The 1997 symposium will include lectures by scientist, visits to research laboratories and informal discussions. For more information, contact **Kristin Owens**, conference planner, at (814) 863-5100.

Celebrating King

Bell choir from Our Lady of Victory Catholic Church, Mount Nittany Christian School and Unity Church of Jesus Christ gathered in the Old Main Lobby at noon Jan. 15 to lead faculty, students and members of the community in a bell-ringing ceremony to honor the birthday of Martin Luther King Jr. This tribute at University Park was just one of many events planned system-wide to honor King.

Applicants sought for leader of Outreach/Cooperative Extension

As reported in the Jan. 15 issue of *Intercom*, a search committee has been appointed to identify candidates for the position of associate vice president for Outreach and director of Cooperative Extension. **O. Elwood Hatley**, professor of agronomy, is committee chair.

The associate vice president for Outreach and director of Cooperative Extension reports to the vice president for Outreach and Cooperative Extension and to the dean of the College of Agricultural Sciences; and serves as an associate dean for the College of Agricultural Sciences, with primary responsibility for Cooperative Extension.

The position involves policy, program and administrative leadership and liaison responsibilities for Penn State Cooperative Extension, as well as extension and outreach responsibilities University-wide. A list of spe-

cific responsibilities is available upon request.

Candidates should have an earned doctorate in an agricultural or other appropriate discipline; demonstrated ability to provide programmatic leadership; effective interpersonal skills; an ability to communicate effectively with diverse audiences; and a commitment to the extension education, international, research and resident education functions and land-grant philosophy.

Nominations, applications and inquiries should be submitted to Hatley, chair of the search committee, The Pennsylvania State University, 201 Old Main, Box PS1, University Park, Pa. 16802. The search committee will review applications and nominations beginning March 1, and will continue to receive them until the position is filled. For a listing of committee members, please see the Jan. 15 issue of *Intercom*.

IDP grant proposal deadline is Feb. 14

The IDP Center for Excellence in Learning and Teaching seeks grant proposals for projects to improve undergraduate education at Penn State. The deadline for proposals is Feb. 14.

The center hopes to make many awards in the range of \$3,000 to \$5,000, although requests for up to \$10,000 will be considered. The source of the grants is the Office of Undergraduate Education's Fund for Excellence in Learning and Teaching, which is overseen by the center.

The center is looking for proposals for projects that could make a lasting

impact on undergraduate education. The projects should involve a range of good practices, including:

- increasing student-faculty contact;
- encouraging active learning;
- collaborating across disciplines at the general education level; and
- making smart use of information technology.

Proposals will be reviewed by a committee consisting of representatives from various colleges and the Commonwealth Educational System. For guidelines and applications forms, contact the center at (814) 863-2599.

■ BLACK HISTORY MONTH

Campuses have wide variety of activities planned

February is designated as Black History Month in the United States. In celebration and recognition of this, several Penn State campuses have planned the following events:

■ Altoona

- Sunday, Feb. 2: The campus is hosting an appearance of the Massachusetts-based Project Concern dance troupe. This "hip hop" dance company will perform free at 7:30 p.m. in the Slep Student Center.
- Wednesday, Feb. 5 and Friday, Feb. 7: The films "Get on the Bus" will be shown at the Slep Student Center.
- Friday, Feb. 7: An African American/Asian New Year Food Festival from 11 a.m. to 2 p.m., Slep Student Center.
- Monday, Feb. 10: Black History Month Art Exhibition - Jerry Zolten's African American movie/music poster collection.

■ Berks

- Wednesday, Feb. 5: At 7:30 p.m. in the Perkins Student Center, Project Concern dance troupe will perform. Join this group of 18 young ethnic dancers as they bring "hip hop" to campus with their upbeat performance style. Admission is \$3 for adults; \$2 for children and senior citizens. The performance is free to Penn State students, faculty and staff.

■ McKeesport

- Seven performances of "The Sojourner Truth Story" by the Prime Stage Theatre Company of Pittsburgh will be held on the Buck Union Building stage at 8 p.m. Feb. 5 through 9, as well as matinees on Feb. 7 and 8.
- Thursday, Feb. 13: A student poetry reading of works by African American poets is set for 8 p.m.
- Wednesday, Feb. 19: Project Concern, a troupe of young performers of dance and music, at 8:30 p.m.
- Thursday, Feb. 27: The Metamorphosis Performance Company, an interactive theatre group, will perform "Strange Like Me" at 8 p.m. The play deals with issues of racism, sexism and homophobia.

■ Mont Alto

- Tuesday, Feb. 4: Project Concern, an inner-city step dance group, will perform at 8 p.m.
- Saturday, Feb. 15: Trip to Harper's Ferry Black History Museum, 10 a.m.
- Friday, Feb. 21: The film "Kansas City" will be shown at 8 and 10:15 p.m.

■ New Kensington

- Art exhibit featuring Pittsburgh artist Daran Alexander at the Penn State New Kensington Art Gallery, from Feb. 1 through 28.
- Wednesday, Feb. 12: From 10:30 a.m. to 1 p.m. in the Theatre Lobby, faculty, staff and students participate in an African American Read-in Chaim by reading works by African American writers.
- Wednesday, Feb. 19 at noon: Project Concern Youth Dance Group will perform.
- Wednesday, Feb. 26 at 1 p.m.: The African Drum and Dance Ensemble of Pittsburgh will perform in the Valley High School Auditorium.

■ Penn College

- An African American History Celebration is under way at Pennsylvania College of Technology. The celebration kicked off on Jan. 20 and continues with "Multi-Cultural Story Salad," on Saturday, Feb. 1. Part of the college's Children's Series, the performance begins at 11 a.m. in the Academic Center Auditorium. The show, staged by Max-milition Productions, whips together eight children's books about variety of countries.
- Additional activities on the celebration roster include:
 - Monday, Feb. 3: Mamie Diggs, a local descendant of an Underground Railroad conductor, will give a presentation at 11 a.m. in Penn's Inn.
 - Tuesday, Feb. 4: Silina Garette, evangelist with the local

- New Way of Life Regeneration Assemblies of Christ, discussing African American women's issues at 12:30 p.m. in Penn's Inn.
- Thursday, Feb. 6: "Women of the Calabash," musicians with percussive beauty performing music from Latin America, Africa and the Caribbean, 7 p.m. in Penn's Inn.
- Monday, Feb. 10: "Gospel-O-Rama," local choirs and soloists rejoice in gospel music, 7 p.m. in the Academic Center Auditorium.
- Tuesday, Feb. 11: K.J. James, noted blues musician, 7 p.m. in Penn's Inn.
- Thursday, Feb. 13: "Womyn with Wings," a play about the triumph of "womynhood," 7 p.m. in Penn's Inn.
- Tuesday, Feb. 18: African heritage fashion show, 12:30 p.m., Penn's Inn.
- Thursday, Feb. 20: "Our Young Black Men are Dying and Nobody Seems to Care," a choreopoem telling stories of disappointments and dreams and celebrating the resilience of the African American male.
- Monday, Feb. 24: African-Caribbean dance group, 7 p.m., Academic Center Auditorium.
- Thursday, Feb. 27: Closing luncheon featuring African American cuisine and a sampling of African folktales with the storyteller Shanta, 11 a.m., Penn's Inn.
- Thursday, Feb. 27: Storyteller Shanta, 7 p.m., Penn's Inn. All events are open to the public with admission varying from free to \$7. Call the College Activities Office at (717) 327-4763 for more information.

■ Penn State Erie, The Behrend College

- Wednesday, Feb. 12: The Rev. Jesse Jackson will be a guest in the college's Speaker Series. His presentation, "Keep Hope Alive," will be held at 7:30 p.m. in Erie Hall. The event is free to the public and seating will be handled on a first-come, first-served basis.
- Thursday, Feb. 20: Project Concern, an urban youth dance troupe, will perform at Bruno's Cafe on campus. Free to the public.

■ Penn State Harrisburg

- Wednesday, Feb. 5: The campus is hosting an appearance of the Massachusetts-based Project Concern dance troupe. This "hip hop" dance company will perform free at noon in the Gallery Lounge.
- Project Concern is a non-profit organization which serves inner-city children in Massachusetts. Established in 1989, Project Concern uses dance therapy as one of the ways in which it engages youth. The dance program has proven successful in diverting children from inner-city problems.

■ Shenango Campus

- A display honoring Penn State Shenango Campus African American alumni will be on display in Sharon Hall throughout February.
- Friday, Jan. 31: At 7 p.m. Pin Points Theatre will present "The Meeting," a theatrical performance based on a fictional meeting between Martin Luther King Jr. and Malcolm X.
- Sunday, Feb. 16: PSU Shenango Minority Affairs will with the Shenango Valley Urban League co-host a gospel program at 4 p.m. at the Valley Baptist Church.
- Thursday, Feb. 20: "Project Concern," a Pittsburgh area dance troupe, will perform at 10 a.m. in the auditorium.

■ University Park

- The Paul Robeson Cultural Center, in conjunction with other units and student organizations is offering a number of activities in celebration of Black History Month. Using the theme, "African Roots Yield Western Fruits," the Robeson Center programs and events reflect commonalities among Africa, the Caribbean and North America.
- These and other events are open to the public and are listed below. For more information, contact the center at (814) 865-1779.
- Now through Feb. 16: African Artifacts in the HUB Art Cases.

- Now through Feb. 22: "Memories of Childhood—So We Are Not the Brady Bunch or the Cleavers," in the HUB Formal Lounge.
- Now through Feb. 23: Unity Days and Graphic Design Imagine a World, Photography on the HUB Art Panels.
- Sunday, Feb. 1: The Caribbean Student Association will host a dance and concert at 9 p.m. in the Paul Robeson Cultural Center. Admission will be charged.
- Thursday, Feb. 6: The Rev. James Forbes of Riverside Baptist Church in New York City will give a talk on "Emancipation From Poverty" at 7:30 p.m. in the Paul Robeson Cultural Center. A reception will follow.
- Thursday, Feb. 6: Charles Blockson, curator of the Charles L. Blockson Afro-American Collection at Temple University will give a lecture on "African American History: Undercover Underground," at 3:30 p.m. in Pattee Library's West Wing Staff Lounge on the third floor. A reception will follow.
- Thursday, Feb. 13: The Multicultural Resource Center will present Teye Adudela in "Ethnic Man" at 8 p.m. in the Paul Robeson Cultural Center. Admission is free.
- Friday, Feb. 14: "A Tribute to Black Music" by local area musicians at noon, Kern Graduate Commons. Free.
- Sunday, Feb. 15: The Annual African Student Association "A Touch of Africa," dinner and dance at 8 p.m. in Fridley-Johnson Commons, East Halls. Tickets are \$10 in advance, \$12 at the door.
- Monday, Feb. 17: "Sankofa," film by Hale Gerima about a mystic voyage for a self-centered young woman back to her African heritage, 7:30 p.m., Paul Robeson Cultural Center. Free.
- Wednesday, Feb. 19-28: "A Raisin In The Sun," by Lorraine Hansberry and directed by Charles Dunson, features Frances Foster. University Playhouse. Tickets available at the Playhouse.
- Thursday, Feb. 20: Dr. Shahid Athar, clinical associate professor at Indiana University and U.S. representative for World Muslim Congress, will give the 7th Annual Malcolm X Memorial Lecture on "Malcolm X: A Perspective from the Islamic Community" at 7:30 in the Paul Robeson Cultural Center.
- Friday, Feb. 21: Anthony Cohen, who retraced, on foot, the routes used to escape from slavery, will give a talk on "The Underground Railroad Walk to Canada," at 3:30 p.m., 26 Hesler Building.
- Sunday, Feb. 23: Paul Robeson Jr., will give a lecture, which marks the opening event in the Paul Robeson Cultural Center 25th anniversary, at 4:30 p.m. in the Cultural Center. A reception will follow.
- Thursday, Feb. 27: "Quilombo," a Brazilian film on the successful revolt of enslaved Africans and the establishment of their independent homeland, at 7:30 p.m., Paul Robeson Cultural Center.

■ Worthington Scranton

- Monday, Feb. 3: A performance by Project Concern Youth Dance Company at 7:30 p.m. in the Campus Study Learning Center.
- Friday, Feb. 7: Blues singer, songwriter, and guitarist K.J. James will perform at noon in the Study Learning Center.
- Wednesday, Feb. 26: 1996-97 Lecture Series will offer a presentation by Louise P. Bias at 7 p.m. in the Campus Multipurpose Building. Bias is the mother of the late Len Bias, the University of Maryland basketball player who died from a drug-related death after being drafted by the Boston Celtics. The Bias family also suffered the loss of a second son, Jay, in a drive-by shooting at a shopping mall. Bias will address adults' responsibilities to our nation's youth.
- Through February:
 - The Penn State Worthington Scranton Campus Library will display books and audio and video cassettes by and about the late Dr. Martin Luther King Jr.

Eberly College looking for math department head

The Eberly College of Science invites applications and nominations for the position of head of the Department of Mathematics. Candidates for the position should have a distinguished record of mathematical research and teaching, and should have demonstrated superior administrative or leadership skills, qualifying them to play a key role in the further development of the department.

Applications and nominations will be reviewed beginning Feb. 10 and continue until a suitable candidate is identified. Applications and nominations should be sent to Myra Bowling, 517 Thomas Building.

The University is an equal opportunity employer. Women and minorities are encouraged to apply.

Obituaries

Retired speech communication professor was 84

Carroll C. Arnold, a professor of speech communication from 1963 until his retirement in 1977, died Jan. 12. He was 84.

He received a bachelor of arts degree in English and history from Sioux Falls College in 1933; a master's degree in speech history in 1940; and in 1941 received a Ph.D. in speech and English literature from the University of Iowa. Arnold taught elementary school in South Dakota for two years and taught English, speech and history at Washington High School in Sioux Falls, S.D., from 1935 to 1939. From 1940 to 1942, he taught speech at the University of Akron and at Chatham College.

From 1942 to 1945, he served as a non-commissioned officer in the Air Corps Intelligence in the United States and Panama. In 1946, he became an instructor in speech at Cornell University, then professor and chair of the Department of Speech and Drama, before being named a professor at Penn State. In 1976, he received the Distinguished Teacher Award from the College of the Liberal Arts Alumni Association and in 1984 received the association's Distinguished Emeritus Award. He wrote approximately 50 articles and books and was co-founder and associate editor of the journal *Philosophy and Rhetoric*, published at Penn State. After retiring, he was named the first A. Craig Baird Visiting Professor in Communication Studies at the University of Iowa and served as visiting professor at the universities of Delaware, California-Davis, Washington, Colorado-Boulder, Georgia and Arizona.

Memorial contributions may be made to the Department of Speech Communications, in care of the Office of Gifts and Endowments, University Park, Pa. 16802.

Former professor of English, comparative literature was 88

Samuel Preston Bayard, former professor of English and comparative literature, died Jan. 10 at the age of 88.

Born in Pittsburgh, he was a 1934 graduate of Penn State with a bachelor of arts degree in English, and a 1936 graduate of Harvard University with a master of arts degree. He taught at Penn State from 1945 until his retirement in 1973 with emeritus status.

Photo: Greg Grieco

Neither cold, nor snow ...

Cold, snowy weather is no deterrent to Brian Balonick and fellow students in Bruce Lord's elementary survey course Forestry 366. They were out and about recently, surveying the fields north of Park Avenue on the University Park Campus.

An internationally known folklorist and musicologist, he contributed to the cultural history of the United States through his collection and notation of fiddle and life tunes, particularly in western Pennsylvania. He published two books, *Hill Country Tunes and Dance to the Fiddle, March to the Fife*, and hundreds of articles in scholarly publications. At the time of his death, he was finishing work on another book, which will be published posthumously.

Memorial contributions may be made to the Samuel P. Bayard Scholarship Fund, College of the Liberal Arts, Department of Comparative Literature, 101 Sparks Building, University Park, Pa. 16802.

Erie athletic director dies at 55

Herbert Lauffer, 55, longtime athletic director at Penn State Erie, The Behrend College, died Jan. 10 at the Cleveland Clinic, where he had undergone heart surgery in November.

For 29 years, Lauffer was a vital member of the athletic department at Penn State-Behrend, from his first days as the head men's tennis coach through his 23 years leading the men's soccer program.

Lauffer earned his B.S. in health, physical education and recreation from Slippery Rock State in 1963 and his M.S. in physical education from West Virginia University in 1968.

Lauffer tallied 131 victories as soccer coach at Penn State-Behrend, making him the all-time winningest coach in the college's soccer history. He earned NAIA "Coach of the Year" honors in 1976 and 1978. He was the founder and president of the Erie Youth Soccer Association; directed soccer camps and youth programs throughout his career; and was the co-director of the Wolverines soccer camp at Grove City College.

Lauffer served as Penn State-Behrend's athletic director for the past 16 years. During his tenure, he guided the program from NAIA Junior College status to NCAA Division III and Eastern College Athletic Conference membership. The number of athletic teams grew from eight to 12 sports under his guidance. In 1991, Lauffer initiated the Penn State-Behrend Athletic Hall of Fame.

A Herbert J. Lauffer Memorial Fund has been established at Penn State-Behrend. Contributions may be sent to the Development Office, Penn State-Behrend, Station Road, Erie, Pa. 16563-0107.

Other deaths

Paul L. Blair, plumber-fitter in the Office of Physical Plant, died Jan. 1. He was 86. He worked at the University from May 12, 1947, until his retirement May 26, 1973.

Robert Lancelot Clewett, former director of the MBA program and director of graduate studies in business administration, died Jan. 18. He was 85.

Clewett began working at Penn State in 1959. In 1974, he served on the organizing committee of the Faculty Club and served as first vice president. Before coming to Penn State, he was employed at the University of Pennsylvania Wharton School of Business. He received his bachelor's and master's degrees in economics from the University of California-Berkeley, and his Ph.D. in business administration from the University of Michigan.

Francis C. Kidd, maintenance worker, utility, at the Penn State Shenango Campus, from Sept. 17, 1970, until his retirement Dec. 7, 1978; died Jan. 10. He was 72.

William H. Patton II, assistant professor of veterinary science in the College of Agricultural Sciences, from Dec. 1, 1962, until his retirement Jan. 1, 1991; died Jan. 5. He was 71.

Joyce J. Reddick, nutrition adviser in the College of Agricultural Sciences, died Dec. 25, 1996. She worked in the college from July 5, 1988. She was 48.

Howard W. Sharpless, supervisor, Maintenance Food Service in Housing and Food Services, from Jan. 6, 1964, until his retirement March 1, 1989; died Dec. 16, 1996, at the age of 69.

Mary Alice Shea, a secretary in the Department of Biology for 17 years, died Jan. 18 at the age of 69. She retired from her University post in 1990. Before that, she worked at Wesvaco in Tyrone, Pa.

Betty S. Walker, secretary, Academic Services, from April 1, 1976, until her retirement May 1, 1986; died Dec. 14, 1996. She was 76.

Divorce affects children's lifelong views of marriage and families

 By PAUL A. BLAUM
 Public Information

Over the past 35 years, the increased number of divorces and changing attitudes toward divorce have affected not only children's attitudes toward marriage and divorce, but also on having families and living together, a study reports.

"Parental divorce influence children's attitudes, and parents' own attitudes seem to be one of the key mechanisms producing this result," William C. Axinn, associate professor of sociology, said.

Axinn worked with Arland Thornton, professor of sociology and research scientist with the Survey Research Center, Institute for Social Research, at the University of Michigan.

The researchers took their data from an 18-year longitudinal study of mothers and children in the metropolitan Detroit area, the mothers being selected from a sample of 1961 birth records.

"Maternal divorces not followed by remarriage have a strong negative influence on children's atti-

Research done by William C. Axinn, associate professor of sociology, indicates that parental divorce affects children's attitudes and actions into adulthood.

Photo: Greg Grieco

tudes toward marriage," said Axinn, also a research associate with Penn State's Population Research Institute. "Perhaps partly because of their disillusionment with marriage, the children of divorce often adopt other forms of intimate unions, especially cohabitation."

The children of divorce may view "living together"

as a form of trial marriage which will help them make better choices than their own parents about a mate. However, marriages following cohabitation themselves often result in divorce.

"Because the children of divorce marry later in life, they also have fewer children. At the very least, children of divorce, even if

they do not divorce themselves, are more accepting of divorce as an option," Axinn said.

"The norm of tolerance is strong in American society," he noted. "The increasing tolerance for divorce over the past three decades suggests, that even with changes in divorce laws, the cycle of divorce is not likely to be reversed."

Joint replacement requires post-operative test for blood clots

Short hospital stays may endanger some patients unless effective screening for blood clots is performed following joint replacement, according to a medical study.

More than 100,000 patients undergo hip and knee replacements every year in the United States, and these patients are at greater risk for potentially life-threatening blood clots than ever before. Shorter hospital stays and ineffective tests are seen as the culprits.

Dr. Vincent D. Pellegrini Jr., chair of the Department of Orthopedics and Rehabilitation at The Hershey Medical Center, did the study because of his concern that sending patients home only four days after surgery puts them at serious risk for blood clots. However, most clots can be detected if patients are screened with contrast venography, a dye study with an x-ray, Pellegrini said.

The risk period for clotting, or thromboembolic disease, extends for six weeks after surgery and is most like-

ly to develop within the first three weeks, Pellegrini said.

"We needed guidance on how to deal with these patients," he said. The study analyzed data from more than 1,600 consecutive patients undergoing total hip or knee replacement between 1984 and 1992.

Approximately 20 percent of the patients who have hip joint replacement surgery also have clots which should be treated with blood thinner. "Yet if you send everyone home with blood thinner, then 80 percent die, and that's risky," Pellegrini said.

Co-investigators in the studies were: Dr. C. McCollister Everts, dean of the College of Medicine; Dr. Greg S. Keller, formerly a medical student at Hershey and now with the Department of Orthopedics at Albany Medical Center; and William Ciccone II, a resident in orthopedics at Hershey.

Gangster images help Americans understand changing times

 By NANCY CRABB
 The Philadelphia Region

The gun-toting, big-spending gangster of the 1920s and 1930s was little more than a figment of the collective American imagination, writes a professor in a recently released book.

"The significance of this book is that it shows how Americans' understanding of crime — often highly distorted — shapes their ideas about society and the problems it faces," said David Ruth, assistant professor of history at Abington College. "Crime fascinates us because it tells us who we are and where we are going. Today's 'gangsta' rappers also reflect a message of identity and empowerment."

Despite his well-documented existence in scores of films, newspaper and magazine articles, novels and plays, the gangster figure is less a reflection of reality than an illustration of society's anxieties and beliefs about a rapidly changing America, writes Ruth in *Inventing the Public Enemy, The Gangster in American Culture* (University of Chicago Press).

"The underworld dramatized the development of an impersonal, highly organized, consumption-oriented urban society," the historian said. "Al Capone and his fictional peers were cast, in turns, as efficient businessmen, hedonistic spenders and playboys. They rebelled not only against the law, but against established moral codes."

Created largely by the media, the gangster helped Americans cope with their changing social world, and thus performed a useful function, he argues in *Inventing the Public Enemy*.

Crime films in the 1950s and 1960s explored youthful rebellion, while the "Godfather" series examined familiar themes of family responsibility, greed and sexual morality. Ruth sees similarities in current portrayals of today's urban gangs.

"At the end of the century as at its beginning, some observers are using crime to mark large groups as fundamentally different, dangerous and unworthy," he wrote. "Meanwhile, disaffected youths see in the video images of 'gangsta' rappers a violent message of identity and empowerment. Underworld imagery and its messages have changed, but their potency remains."

ATHLETICS

A regular column provided by Intercollegiate Athletics

Surgeon earns honors

Former Penn State football and wrestling All-America Dr. David M. Joyner received the NCAA Silver Anniversary Award. The award recognizes former student-athletes who have distinguished themselves since completing their college careers 25 years ago. A native of State College, Joyner was a co-captain and first team All-America for the PSU football team in 1971. He also earned All-America honors in wrestling. Now a nationally-known orthopedic surgeon, Joyner has been active in the Olympic movement, serving as head team physician for the U.S.A. in the 1992 Winter Games in Albertville, France.

Coach of the Year

Women's volleyball coach Russ Rose has been selected as the 1996 District Two Coach of the Year by the American Volleyball Coaches Association. Rose directed the Lady Lions to the NCAA Tournament for the 16th consecutive time, reaching the regional final before losing to host Nebraska. Penn State finished 31-3 overall and earned a share of the Big Ten title, the third time the Lady Lions have been conference champions since joining the league in 1991.

Powerhouse

The Penn State football team won the Lambert-Meadowlands Trophy, emblematic of Eastern football supremacy, for an unprecedented 23rd time. Penn State has won the prize seven times in the last 12 years. After Penn State, Army has the most Lambert Trophy wins with seven.

Top honors

Penn State assistant track and field Coach Bill Whittaker has been named as one of four coaches for the USA National Track and Field team which will compete at the World Championships in Athens, Greece, this August.

Timing is everything

The men's swimming 400-yard medley relay team earned a world ranking of No. 19 after posting a time of 3:49:19 at the U.S. Open in December. It was the third fastest time recorded in the USA in 1996. The medley relay quartet includes Brian Falme, David Boardman, Justin Martens and Greg Stacey.

Clarion River

continued from page 1

because it stands to benefit all of us in our part of Pennsylvania. By the same token, it was because of the work of so many Penn State students studying under the Department of Landscape Architecture worked so hard, as did local businesses, landowners and other interested parties, and it was a pleasure to see this community effort come full circle."

ANF personnel oriented the students with the river and provided needed funds for research practicalities such as canoes, film and gas money. In exchange, the students volunteered labor and expertise, surveying ability and a final report to accompany ANF findings to be presented for legislation. With the help of the Penn State students, the study was completed on April 2, 1996. The whole project took 4 1/2 years, much quicker than past studies which have reportedly taken up to 12 years.

"Rivers capture all kinds of things in people's imaginations, and this project was a very exciting event for the students," Yahner said. "Here they are, still students, and they have already contributed something significant to a real-life situation."

On Oct. 19, 1996, legislation declaring more than 50 miles of the Clarion River suitable for Wild and Scenic River designation was signed into federal law by President Clinton after unanimous approval in both the Pennsylvania State Senate and the U. S. Congress. Such a designation is designed to maintain the existing conditions of a river, including natural resource values, scenery, recreational uses, historical values, local communities and existing land use within the river corridor.

"The Clarion is a classic eastern river that has traveled the path of massive destruction to near miraculous recovery," Jones said. "Logging, tanneries, roads, factories, coal mines and settlements made the Clarion one of the most polluted rivers in America in the early 20th century. Today, the forest has returned and the quality of the water supports a significant trout population."

The legislation signed in October will ensure the Clarion's present condition, providing money and the development of a cooperative management plan for the designated areas of the river. In addition to the Department of Landscape Architecture, the study involved input from the Western Pennsylvania Conservancy, the Invertebrate Zoology Section of the Carnegie Museum and the Clarion University Department of Biology.

Senior vice president announces retirement

Robert E. Dunham, senior vice president and dean of the Commonwealth Educational System, announced that he will retire from Penn State effective Jan. 15, 1998, completing a career of more than 38 years at the University Park Campus.

After receiving his Ph.D. from Ohio State, Dunham began his academic career at Penn State on Sept. 1, 1959, as an instructor of speech. He received tenure and became a full professor of speech, and was named acting department head in 1965.

In 1966, Dunham moved into administration, becoming assistant to the vice president for residential instruction. He went on to become acting vice president for academic affairs, then vice president for undergraduate studies, vice president for academic services, vice president and vice provost, and in 1991, he was named senior vice president and dean of the Commonwealth Educational System.

In his role as senior vice president, Dunham was responsible for developing the recently approved plan to redesign CES. The plan will permit more four-

See "Dunham" on page 3

Making the transition

Come July 1, the Commonwealth College comprised of 12 campuses scattered across Pennsylvania should have a new leader and be springing to life as a new academic entity within Penn State.

With the announcement of Robert E. Dunham's retirement next year, the search will begin shortly for someone to serve as dean of what will be the University's largest college. A search committee is expected to be formed this month and Dunham

Monroeville courses to move to McKeesport campus

Penn State is moving the graduate courses in health education, adult education and counselor education (chemical dependency) and continuing education classes from its Monroeville Center to the Penn State McKeesport Campus — only 10 miles away — at the end of the spring semester.

"The Monroeville Center will be discontinued as we will see increased efficiency by offering courses at another established University location," said James H. Ryan, vice president for Outreach and Cooperative Extension.

Students relocating to the McKeesport Campus will have the advantage of better library services, better and increased computer services and an overall improved learning environment. Currently enrolled students will be able to complete their degree or certificate program at McKeesport."

Penn State McKeesport is located in suburban McKeesport and White Oak. A residential 52-acre campus with about 950 students, the campus offers both undergraduate programs and continuing education. About 500

■ Penn State Executive Programs

A 'Best Kept Secret' with a world-class reputation

By CHARLES C. DUBOIS
The Smeal College

Located in a deceptively quiet, shingle-sided building on the north side of The Nittany Lion Inn is one of the University's best kept secrets — Penn State Executive Programs, an arm of The Smeal College of Business Administration. Here at the Executive Education Center is where the Global Fortune 500 companies send promising, upwardly mobile executives to hone their skills for major steps up the corporate ladder. It also is where the leading firms from the U.S., Middle East, Africa, South America, Europe and Asia come for advice on how to transform themselves to compete in the rugged global marketplace.

Training and development for practicing business people is a multibillion dollar industry of international scope where the top business schools vie with consultants and in-company educational programs. A major shakeout is on the horizon in this intensely competitive arena and Penn State Executive Programs, now 40 years old, is striving to be one of the handful of full-line, major players left standing.

The *New York Times*, *The Wall Street Journal*, *Business Week* and *U.S. News and World Report* all rank providers of executive education and each publication rates Penn State among the highest. Along with such institutions as MIT, Columbia and the London Business School, Penn State is a founding member of the International Consortium of Executive Development Research.

As solidly positioned as these Smeal College programs are, its leadership is anything but complacent.

"We cannot be content with what we have achieved over the years," Albert A. Vicerre, associate dean for executive education, said. "We must be constantly ahead of the curve in meeting the real needs of the business community."

Penn State Executive Programs began in July 1956 during the administration of University President Milton S. Eisenhower. Under the leadership of

Teamwork

As part of one of the courses, participants in the Executive Programs participate in team-building exercises like this one held over the summer at Stone Valley Recreation Area. Programs at the Executive Education Center on the University Park Campus are set to begin again in mid-February.

Earl P. Strong, professor emeritus of management, the first Executive Management Program was held in the Beta Theta Pi house on Burrows Road. Today, the Executive Education Center (EEC) welcomes clients year-round. In the past three years alone, more than 2,000 people have traveled to University Park to attend programs from the United States and 45 other nations on six continents.

Originally built as the Penn State Faculty Club, the EEC now includes a state-of-the-art classroom which seats 40, the Glenn O. Hawbaker Reading Room, a half-dozen small meeting rooms, offices and lounges where participants and faculty can meet informally. While Smeal College professors predominate on the executive programs platform, scholars from other top schools and industry experts lead sessions as well.

In addition to its flagship four-week Executive Management Program, the

University now offers 11 other programs in general management, operations, marketing and human resources management, sessions which vary in length from one to three weeks. All are intensive, high-involvement programs in which participants work closely with faculty members and with each other.

Penn State Executive Programs reaches beyond the Nittany Valley to deliver programs overseas, most recently in Singapore and the United Kingdom.

Custom programs, an area in which Penn State is a recognized leader, have helped such companies as ARAMARK and Carpenter Technologies, the Reading, Pa.-based specialty steelmaker, with strategic overhauls. ARAMARK CEO Joseph Neubauer publicly credits Penn State with playing a major role in the transformation his company has undergone.

Similar praise has been heard from Conrail, which over the course of a 13-

year relationship with Penn State, has sent more than 700 of its managers to sessions specifically designed to meet the transportation company's needs. The consensus among Conrail executives is that Penn State has been a catalyst for needed company-wide communications and integration, as six once-independent rail firms have been consolidated into one organization.

As much as Penn State Executive Programs benefits its participants and client companies, rewards also are being reaped elsewhere in The Smeal College.

"Teaching business people is one of the toughest assignments any faculty member can have. It tests and sharpens your skills like nothing else," said Vicerre. "Smeal College students are major beneficiaries because they are being taught by the very same people who teach in the Executive Programs."

Research, central to the college's mission, gets a major boost from Penn State's Institute for the Study of Organizational Effectiveness (ISOE), whose primary mission is to improve the effectiveness of business operations through relevant studies, education and interaction between industry and the University community. Current work being carried out by ISOE researchers delves into executive leadership development, human resource management, global organizational structures and continuous improvement and innovation.

Penn State Executive Programs also provides The Smeal College with important financial tools to attract and retain outstanding faculty members and students. Revenue from the Executive Programs has been used to create the Earl P. Strong Executive Education Professorship of Marketing and the David H. McKinley Executive Education Professorship, in addition to scholarships which have benefited 20 Smeal MBA students, and fellowships which have supported 13 of the college's doctoral candidates. A third professorship is currently being created.

25-year Awards

SUSAN E. BRILHART

LINDA GUMMO

Observing 25 years of service at the University are, from left: Susan E. Brilhart, library clerk in Pattee Library on the University Park Campus; Charles Brueggebores, University architect; Daniel Fritton, professor of soil physics in the College of Agricultural Sciences; Larry D. Gamm, associate professor of health policy and administration, and Stanley P. Mayers Jr., professor of health policy and administration, both in the College of Health and Human Development; and Linda Gummo, staff assistant V in Housing, University Apartments.

Dunham

continued from page 1

year degrees to be offered at Penn State's campus locations through the creation of a 12 campus Commonwealth College; the establishment of two four-year colleges at Altoona and Abington; the merger of the Berks and Allentown campuses into the Berks-Lehigh Valley College; and the merger of the Schuylkill and Harrisburg campuses into the Capital College.

"It is simply impossible to list all of Bob's accomplishments," said President Graham B. Spanier. "Bob has played a central role in virtually all of the important changes that have brought about the evolution of Penn State into a university of national prominence. His work in redesigning the Commonwealth Educational System will have an enormous impact on students for generations to come. He has made higher education better in this state, and along the way made an enormous number of friends."

"If there is anyone at Penn State who I consider my mentor, it is Bob Dunham," said Spanier. "When I became an associate dean 18 years ago, and in every administrative position since then, Bob greatly influenced me and encouraged me. He was a key reason I wanted to return to Penn State, and I will feel something of a void not having him working with me in the administration."

ROBERT E. DUNHAM

A search committee will be formed this month to begin the process of finding a dean of the new Commonwealth College, which becomes official on July 1 as a result of the plan to reorganize CES. (See "Transition" story below.)

"When I first came to Penn State, I was convinced I would only be here a year or two," said Dunham. "But I really fell in love with this university and with the community. I was lucky enough to have jobs within Penn State that brought me great satisfaction and excitement, and you really can't ask for more than that. It has been a heck of a run, and I wouldn't have traded it for anything."

Dunham and his wife, Maureen, plan to continue living in the State College area. "I don't know for sure what we'll be doing after I retire," said Dunham. "I will probably work on my golf game and sail more, and we will certainly travel more. But we plan to stay involved with the University. It is such an important element in both of our lives, we will always be a part of Penn State."

Monroeville

continued from page 1

full- and part-time graduate students who are currently enrolled in the College of Education programs at the Monroeville Center could transfer to McKeesport.

Following a two-year internal review, Penn State announced last winter that it would discontinue using the Monroeville Center for continuing and graduate education, which is located in a converted elementary school building that the University purchased from the Gateway School District in 1988. No faculty or staff layoffs are expected as a result of the move, and the building is being offered for sale.

"The move is a result of our strategic planning process in which we continuously evaluate programs to be sure that they are delivered in a high-quality and cost-effective way, and to make changes as necessary," said Ryan. "We did not want to expand an outdated facility when we have excellent facilities nearby that will enhance the quality of our programs."

Consolidation

At the end of the spring semester, the University will move its graduate courses offered in health education, adult education and counselor education (chemical dependency) and continuing education classes from its Monroeville Center to the Penn State McKeesport Campus — only 10 miles away.

Obituaries

Lynn Christy, associate professor of English composition in the College of the Liberal Arts, from Feb. 1, 1938, until his retirement July 1, 1976; died Jan. 14. He was 86.

Robert L. Clewett, professor of business administration in The Smear College, from Sept. 1, 1959, until his retirement July 1, 1976; died Jan. 18. He was 85.

Maile A. Lindsey, driver/courier at The Hershey Medical Center, from Oct. 5, until her death Jan. 16. She was 55.

Alice V. Vingle, counter attendant, Housing and Food Services, from Dec. 20, 1955, until her retirement May 1, 1967; died Jan. 3 at the age of 93.

Luella M. Ripka, clerk typist B, Continuing Education, from Aug. 9, 1948, until her retirement Jan. 1, 1971; died Jan. 14 at the age of 88.

Mary Alice Shea, secretary B in the Eberly College of Science, from Sept. 27, 1974, until her retirement June 30, 1990; died Jan. 18. She was 69.

Transition

continued from page 1

will continue as senior vice president until mid-July 1998. The CES will be phased out.

The timing of Dunham's retirement is no accident. In fact, Dunham said his decision to step down from his post as senior vice president and dean of CES is part of his vision for Penn State's smooth transition to its redesign. After working at the University for nearly four decades, Dunham said he knew he did not have sufficient time to devote to the operation of the new college.

"It is a good time to make this type of move," Dunham said. "The plan has been approved and we're moving ahead, but Penn State needs someone in the leadership of this college who will be here for five or more years. In any position, it takes at least five years to begin to have influence and work with members of the community."

"I've worked here for a long time and I knew I didn't have five years to give this," he said. "But I'll be helping during the transition to help it move from the old system to the new."

Dunham said the search for a dean of the Commonwealth College will primarily focus on internal candidates.

"It's our feeling that we have a lot of good people right here who understand this complex organization and who know the background of CES and Penn State," he said. "It's reasonable to

expect that this post can be filled by July. This dean will then become part of the Council of Academic Deans, an advisory body to the president."

During the coming year, Dunham said his plan will be full as he helps implement the redesign plan for all new colleges, not just the Commonwealth College. He will also be pursuing the implementation of a management information report and will make it a "top priority" to rework the plans for Beaver, New Kensington and McKeesport campuses for their re-submission to the secretary of education. Those three campuses did not receive approval to offer additional four-year degrees. (See page 11 for an update.)

In addition, Dunham has been asked to act as a liaison with other colleges and universities across Pennsylvania during the transition period. In his liaison role, Dunham will look for opportunities to collaborate with other colleges and universities. He also will continue as vice chairman of the Penn College Board of Directors.

The senior vice president said most of the changes at the 12 campuses would go unnoticed by students, the general public and the majority of the employees. The change from the old system, CES, to the new Commonwealth College is in large part an internal restructuring, according to Dun-

ham.

"The Commonwealth College will have an academic focus and that's significant," Dunham said. "How faculty are organized by discipline and how those divisions relate to discipline faculty in other colleges will be important changes. You probably won't notice changes on an individual campus in the near future. They will evolve in time."

Since last year when the plan to reorganize Penn State's complex statewide campus system was outlined, creators of the plan have touted its capacity to provide more freedom to campuses, more control over academic affairs and more decision making at the local level.

Dunham said the 12 campuses under the Commonwealth College umbrella will come together to discuss promotion and tenure issues, as well as make curricular decisions. This new-found authority will now help Penn State locations be more responsive to community needs, which vary from region to region. It will also allow location-bound students to complete their course of study at Penn State.

The plan as approved recently by the state secretary of education authorizes 14 of the University's 17 Commonwealth Colleges to offer baccalaureate degrees. Campuses within the Commonwealth College include: Beaver, Delaware County, DuBois, Fayette, Hazleton, McKeesport, Mont Alto, New Kensington, Worthington, Scranton, Wilkes-Barre, Shenandoah and York.

LECTURES

Science lecture discusses humans' endangered past

"On Becoming Human" is the topic of the spring semester 1997 Penn State Lectures on the Frontiers of Science. Designed for the enjoyment and education of central Pennsylvania residents, the lectures take place on six consecutive Saturday mornings from 11 a.m. to noon on the University Park Campus.

The third lecture in the series, "Histories of Human Genes and Populations: Signatures of ancient Population Dynamics in Gene Difference," will be given by **Henry Harpending**, distinguished professor of anthropology and human development, on Saturday, Feb. 8, in 101 Thomas Building.

Harpending is known for his studies of the genetics and demography of contemporary human populations, especially in Africa, and for his

HENRY HARPENDING

current research on methods for reading population history from genes. During his lecture, he will discuss the origins of fully modern humans, including evidence from archaeology, fossils and genes. This evidence suggests the population ancestral to all modern humans was endangered for thousands of years or more, having only several thousand members.

The Penn State Lectures on the Frontiers of Science are sponsored by the Eberly College of Science. Parking is available at the HUB Deck parking garage on Shortlidge Road. For more information, contact the college at (814) 863-8453 or (814) 863-4682, or by e-mail at science@psu.edu.

Computing seminars run through April

The Institute for High Performance Computing Applications will hold a series of seminars on algorithms and architectures. Seminars are held from 3:35 to 4:25 p.m. every Monday in 215 Hammond Building on the University Park Campus, unless otherwise noted, and are open to the public. The speakers are:

■ **Feb. 10: Vigor Yang**, professor of mechanical engineering, on "Combustion Instabilities in Propulsion Systems."

■ **Feb. 17: Norm Swanson**, assistant professor of economics, on "Computing Issues in Econometrics."

■ **Feb. 24: Dan Lenoski**, Silicon Graphics Inc., on "cc-NUMA and Orion 2000 Architecture." (tentative)

■ **March 3: James Anderson**, Evan Pugh professor of chemistry, on "Quantum Monte Carlo."

■ **March 17: Iain Boyd**, professor of aerospace engineering, Cornell University, on "Parallel Implementation of a Monte Carlo Method for Nonequilibrium Gas Dynamics."

■ **March 24: George Karniadakis**, professor of applied math, Brown University, on "Spectral/hp

Element Methods for Parallel Computers."

■ **March 31: D. Yung**, IBM, Toronto, on "High Performance Fortran and Java Compilers." (tentative title)

■ **April 7: Farid Abraham**, IBM Almaden, on "Cracking a Tough Nut with a Big Computer: Studying Materials Failure using Millions of Atoms." This seminar will be held at 3:30 p.m. in 339 Davey Lab.

■ **April 14: Luigi Martinelli**, professor of aerospace engineering, Princeton University, on "Numerical Simulation of Viscous Flow for Aerodynamic Analysis and Design."

■ **April 21: Jeff Nucciarone**, Center for Academic Computing, and **Yusuf Ozyoruk**, postdoctoral scholar in aerospace engineering, on "High Performance Fortran: Status and Future."

■ **April 28: Gita Talmadge**, mechanical engineering, on "The Effects of Magnetic Fields on Electrically Conducting Fluids: An Introduction for Terrestrial Applications."

For more information, visit the institute's Web site at <http://icac.psu.edu/~lnh/ipca/spring597c97.html>.

Operetta lecture, recital

David Halin, baritone, and **Michael Rider**, piano, will give a lecture/recital at 8 p.m. Monday, Feb. 10, in Eisenhower Chapel on the University Park Campus. The lecture on the history of musical theatre through operetta will consist of works by such composers as Jacques Offenbach, Victor Herbert, Sigmund Romberg, Rodgers and Hammerstein, and Stephen Sondheim. The lecture/recital is given in partial fulfillment of the requirements of a bachelor of arts in music. The performance is free to the public.

Technology commercialization topic of lunch talk

Thor Bewulf, chairman of the U.S.-Australia Trade and Business Council in Canberra, Australia, will discuss "Maralinga and In-Situ Vitification: A Case Study in Technology Commercialization and Deployment in an Export Market" at a brown-bag, lunchtime discussion at 12:15 p.m. Monday, Feb. 10, in 201 Kern Building on the University Park Campus.

Canberra-based Bewulf, who was a visiting Myer Fellow at Penn State's Australia-New Zealand Studies Center in 1993, recently negotiated a multimillion dollar contract between the government of Australia and Ohio's Battelle Research Laboratories for the clean up of the former Maralinga nuclear test site in Australia. His discussion will include the implications of the nuclear waste at Maralinga, and the process of negotiating the deployment of innovative American technologies in an export market. The lecture, which is open to the public, is co-sponsored by the Australia-New Zealand Studies Center and the Penn State Research and Technology Transfer Organization. For more information, contact **Pat Corbett** at (814) 863-1603.

Harrisburg lectures examine future of health, disease

"Prognosis for the Decade: The Future of Health and Disease in Pennsylvania," an ongoing series of lectures, continues Tuesday, Feb. 11, with a presentation by **Michael J. Chorney**, associate professor of microbiology and immunology in the College of Medicine.

The lectures, held at the Penn State Downtown Center in Harrisburg, are designed to inform legislators, state government agencies and those involved in health care policy about projections on health and disease in the state. Chorney's talks will focus on "Diagnosis of Diseases: Current Realities and Future Promises," from 8 to 9 a.m.

At the same time on Tuesday, March 11, **David J. Hufford**, professor of humanities, will discuss "The Current Status of Alternative Medicine in American Society," on Tuesday, April 15, **Nancy R. Kruger**, director, Department of Nursing, will talk about "Health Promotion/Disease Prevention;" **Toni Miles**, director of the Center for Special Populations and Health, will address "Projections on the Health Care Needs of Pennsylvania's Minority Populations" in a May 6 talk from 8 to 9 a.m.; and **Dr. Julien F. Biebuyck**, associate dean for academic affairs and professor and chair of anesthesia, will wrap up the series with an hour-long talk on "Health Care Providers: Will the Demand Equal the Supply?" from 8 to 9 a.m. Monday, June 2.

To register for one or more of these lectures, call the center at (717) 783-0433. This series is sponsored by The Milton S. Hershey Medical Center.

Lecture focuses on doing business in Japan

The Feb. 11 installment in the Current Issues Lecture Series at the Penn State Harrisburg Eastgate Center will provide an inside look at doing business in Japan from a cultural and historical viewpoint.

Shohei Yoneda, international sales manager for Masland Division of Lear Inc., is the featured speaker for the noon public presentation sponsored by the Penn State Harrisburg School of Business Administration.

A graduate of Doshisha University in Kyoto, Yoneda earned a master's degree in business administration at Penn State Harrisburg and a master of science degree from the University of Arizona. For the past decade, he has worked in areas of manufacturing, quality and sales with Lear Corp., the world's largest independent automotive interior parts manufacturer. Most of his customers are from Japan, Korea and other Asian countries.

During his presentation, Yoneda will compare Japanese business with American business based on his experiences in automotive industries in Japan and the U.S., and make suggestions on what and how to prepare to do business with the Japanese. To register for his presentation, call the Eastgate Center at (717) 772-3590.

Geoscience talk dissects ice-core records

Richard B. Alley, professor of geosciences, will discuss "Ice-Core Records of Large, Rapid Climate Changes: The One-Year End of the Ice Age," at noon Thursday, Feb. 13, in 110 N. Henderson (The Living Center) on the University Park Campus.

Alley's talk, part of the lecture series offered by the Penn State Chapter of Sigma Xi, will focus on ice cores and what they can tell us about climate changes. The talk will include a brief overview of how cores are recovered and analyzed on top of a frozen ice sheet.

All lectures are free to the public. For more information, call **Pat Gong** at (814) 863-9963.

More Lectures

Acclaimed author to present dramatic reading March 19

The author of the acclaimed choreopoem, "for colored girls, who have considered suicide/when the rainbow is enuf," **Ntozake Shange**, will present a dramatic reading at Penn State Harrisburg on March 19.

Shange, one of America's most lyrical black voices as a playwright, novelist, poet and performer, will appear at 7 p.m. in the college's Student Center in the Capital Union Building.

Widely acclaimed as a representative for blacks, for women and for all those struggling to find their own voice, Shange has earned countless awards for her works, which include three novels, several books of poetry and many extraordinary plays.

She burst onto the New York literary scene in 1976 with her innovative and widely acclaimed "for colored girls..." which became a best-selling book and later an critical acclaim in a television version for PBS. She received an Obie Award off-Broadway for "for colored girls..." which also received a Tony nomination after

enjoying a lengthy stint on Broadway.

With *Liliane*, her newest and most provocative novel, she continues to explore the female intellect and sensuality by weaving together love, self-discovery, sex and race. An educator as well as an author, she has taught courses in the literature of people of color, feminist, aesthetics, writing and performance art at Rice University, Villanova University and the Maryland Institute of Art. As the Taos Heavyweight Poetry Champion of the World for three consecutive years, she continues to produce theatre pieces and do poetry readings and guest lectures. She is currently working on a project for HBO about the history of jazz.

Shange earned a bachelor's degree in American studies from Barnard College and later a master's degree from the University of Southern California. For information on the performance, which is open to the public, call (717) 948-6273.

Malcolm X Memorial Lecture is Feb. 20 at Robeson Center

The Center for Ethics and Religious Affairs will present its seventh annual Malcolm X Memorial Lecture at 7:30 p.m. Thursday, Feb. 20, at the Paul Robeson Cultural Center on the University Park Campus.

Dr. **Shahid Athar**, clinical associate professor at the Indiana University School of Medicine and U.S. representative for World Muslim Congress, will speak on the Islamic community's perspective on Malcolm X.

Athar, a native of India and U.S. citizen since 1978, has written and published more than 60 articles on Islam and is a recognized expert on Islamic studies. Some of his publications include: "Islamic Perspectives in Medical Ethics," "The Gulf Crisis and American Muslims" and "Mal-

colm X — Prince of Islam in North America."

After studying medicine in Pakistan, Athar completed his residency in internal medicine at Cook County Hospital, Chicago. A seven-time recipient of the American Medical Association's Physician Recognition Award, Athar continues in private practice, specializing in endocrinology, diabetes and internal medicine. Past chairman of Interfaith Alliance, Athar is an active member of the Council for National Interest, Christians and Muslims for Peace, Amnesty International, Physicians for Human Rights and the Islamic Medical Association.

For more information, call the Center for Ethics and Religious Affairs at (814) 865-6548.

Breakfast lecture presents information on fiscal impact of various land uses

The Breakfast with Penn State Series at the Berks campus of the Berks-Lehigh Valley College will present "The Fiscal Impact of Different Land Uses: Farmland Versus Development" on March 11 in the Forks Student Center Theatre. Continental breakfast will be served at 7:30 a.m., and the discussion will be held from 8-9 a.m.

Timothy W. Kelsey, assistant professor of agricultural economics at Penn State, has done extensive

research on various issues involving rural communities and local government in Pennsylvania including farmland preservation, population growth and decline in rural areas, and conflicts between farmers and non-farming neighbors. In addition, Kelsey also works with Cooperative Extension to help citizens and local government officials understand local public finances and the impact of population changes in rural areas.

Conference geared toward teachers, librarians, parents

Teachers, librarians, parents and others who help children discover the joys of reading may want to attend the annual "Children's Literature Matters" conference, April 11-12 at The Penn State Scenic.

Speakers include: — **Michael Dorris**, author of *Morning Girl*, *Quests and Sins Behind Trees*, winner of the Scott O'Dell Award for distinguished historical fiction.

— **Floyd Cooper**, author/illustrator of *Langston Hughes*, *Illustrator of Satchmo's Blues*, *Coyote Walks on Two Legs*, *Meet Danitra Brown*, *Brown Honey in Broomhedge Tea* and *The Girl Who Loved Caterpillars*.

— **Katherine Paterson**, author of *Lyddie*, *Jip: His Story* and the Newbery Award winning *Bride to Terabithia* and *Jacob I Have Loved*.

Distance education forums set

The American Center for the Study of Distance Education, in cooperation with the College of Education and Continuing and Distance Education, sponsors a series of discussion forums for faculty at Penn State.

The next event in the Faculty Forum series will be held from 3:30 to 5 p.m. Thursday, Feb. 13, in Studio D Mitchell Building on the University Park Campus. It is titled "Interaction in Distance Education: Transactional Distance and Interactive Television in the Distance Education of Health Professionals." **Whitney Rogers Bischoff**, assistant professor, Department of Nursing and Health Sciences, Texas A&M University-Corpus Christi, will be the guest speaker.

Bischoff's presentation is based on the research article "Transactional Distance and Interactive Television in the Distance Education of Health Profes-

— **Tom Feelings**, author/illustrator of *Middle Passage*, *Mojo Means One*, and *Illustrator of Soul Looks Back in Wonder*. Winner of the Coretta Scott King Award for distinguished illustration.

— **Jon Scieszka**, author of *Math Curse*, *The Sticky Cheese Man*, *The Truck Stop of the Three Little Pigs* and *The Time Warp Trio* series.

For more information about program content, contact: **Dan Hade**, associate professor of education, at (814) 865-2161. For information about registration, contact: **Carolyn Andersen**, conference planner, at (814) 865-5140 or by e-mail: Confenceinfo1@cde.psu.edu.

On the deadline to register is March 28. To receive a brochure call (800) PSU-TODAY (778-8632) or visit the Web at: <http://www.cde.psu.edu/C&I/ChildrensLiterature/>

sionals" (1996) Bischoff, Bisconer, Kooker, & Woods that appears in the latest issue of *The American Journal of Distance Education*. Registrants for the discussion forums will receive a copy of the article before the session.

Bischoff teaches in the undergraduate and graduate nursing programs at Texas A&M and is a leader in the educational use of electronic communications in nursing. She also will discuss the use of the Internet to foster interaction and welcomes your visit to the following sites before the forum: <http://www.sci.tamucc.edu/nursing/> and <http://www.sci.tamucc.edu/~bischoff/whr.html>.

To register, please contact **Nancy Hallberg** at (814) 865-5403; e-mail: ndw1@psu.edu, or use the World Wide Web registration form at <http://www.cde.psu.edu/D/E/FacDev/signup.html>.

Harrisburg business lectures continue

The 1997 Downtown Harrisburg Lecture Series, Current Issues in Business, continues with seven more talks throughout the year. Presented by the Penn State Harrisburg School of Business Administration, the series covers issues of both international and national importance. The lectures, from noon to 1 p.m., are held at the Eastgate Center on North Seventh Street. For more information about the series or to reserve seats, call the center at (717) 772-3590.

Upcoming events follow: ■ "A Harrisburg Firm Goes Global: A Case Study," presented by **Sheila Flick**, project manager with Global View, Adding Management Team AMP Inc., on April 8. ■ "International Investing: Understanding Foreign Financial Statements," presented by **Robert Larson**, assistant professor of accounting at Penn State Harrisburg, on May 13.

■ **Role of Social Ties in Corporate Competitive Strategy**, presented by **Carolyn R. Dextor**, professor of management at Penn State Harrisburg, on June 10.

■ "Making Money the Old Fashioned Way: A Case Study," given by **John Ritson**, vice president and chief financial officer, Walnut Acres Inc., on Sept. 9.

■ "Waiting in Line: Do I Have a Choice?" presented by **Karen Brown**, assistant professor of management science at Penn State Harrisburg, on Oct. 8.

■ "The Impact of Global Forces on Domestic Tax Policy," given by **Jeann Harris**, associate professor of accounting at Penn State Harrisburg, on Nov. 11.

■ "The Role of Higher Education in Community Development," presented by **Mukund S. Kulkarni**, associate professor of finance at Penn State Harrisburg, on Dec. 9.

Physical Plant develops master plan

In its Strategic Plan for Continuous Improvement, the Office of Physical Plant states that one of its objectives is to make CQI part of daily business in OPP. First, under the leadership of **Bill Anderson**, assistant vice president, the unit established a master plan to serve as the road map to fully implement CQI. Second, in order to get results using CQI, the unit trained and chartered nine teams to improve specific processes. Anderson's end objective is to have self-directed, high performance teams everywhere throughout the organization. Recently formed CQI teams include:

— Facility Documentation Process Action Team: sponsor, **Doug Donovan**; leader, **Rob Cooper**; facilitator, **Sue Petro**.

— Board of Trustees Presentation Material Preparation Team: sponsor, **Charlie Brueggebois**; leader, **Dave Breen**; facilitator, **Dot Green**.
 — Design, Construction and Facility Support "Standards" Process Action Team: sponsor, **Jeff Mallory**; leader, **Steve Maruszewski**; facilitator, **Candy Wert**.

— Restroom Cleaning/Restocking Process Action Team: sponsor, **Doug Donovan**; leader, **Dave Martin**; facilitator, **Larry Bair**.

— Litter Pickup Process Action Team: sponsor, **Doug Donovan**; leader, **Ron Eckenroth**; facilitator, **Dennis Smith**.

— Administrative and Financial Services Material Shipments Team: sponsor, **Carl Williams**; leader, **Joe Cessna**.

— Facilities Resources and Planning Waste Busier Team: sponsor, **Deborah Howard**; leader, **Jim Lettiere**.

— Materials and Equipment Requisition Team: sponsor, **Carl Williams**; leader, **David Stoner**.

— Design, Construction and Facility Support Renovation Crew Team: sponsor, **Jeff Mallory**; leader, **Chet DeFurio**.

For more information about CQI, please call **Louise Sandmeyer**, executive director of the Center for Quality and Planning, (814) 863-8721 or e-mail **LE518@PSU.EDU**.

Gift from the heart

Laura Gindesperger of the Red Cross checked freshman architecture student **Carmen Gerdes**' blood pressure before Gerdes gave blood at the Hetzel Union Building on the University Park Campus recently. The Red Cross will hold by-appointment-only blood drives at University Park from 10 a.m. to 4 p.m. Feb. 14 at Applied Research Laboratory and from 9 a.m. to 3 p.m. Feb. 17 at Reber Building. For an appointment, please call **Connie 237-2713**.

Photo: Greg Grieco

Dairy and Animal Science launches search for new department head

The College of Agricultural Sciences is conducting a national search for the position of head of the Department of Dairy and Animal Science. Responsibilities include administration of the budget, management of human resources, academic affairs and physical facilities. Other responsibilities will include recruitment, development and retention of highest quality faculty, staff and students, and encouragement of their professional development in an interdisciplinary environment.

Candidates must have a Ph.D. degree in an appropriate animal sciences field or a closely related discipline. Eligibility for tenured rank of full professor is required. An understanding of the land-grant system is essential. Demonstrated expertise or interest in University teaching, research and extension is expected. Excellent leadership, administrative, communication and

outreach abilities are essential. A strong commitment to scholarly achievement and educational excellence, as well as appreciation for the diverse interests and technical missions of the department, must be demonstrated.

Qualified individuals should send a letter of application; complete curriculum vitae; a statement of personal leadership philosophy; and the names, addresses, telephone numbers and e-mail addresses (if available) of five people who may be contacted for letters of reference to: **Gabriella A. Varga**, chair, Department of Dairy and Animal Science, 324 Henning Building, Department E, University Park, Pa. 16802; phone — (814) 863-4195; fax — (814) 865-7442; e-mail — **GVarga@das9.cas.psu.edu**. Application deadline is April 30 or until a suitable candidate is selected.

College of Agricultural Sciences seeks head for the Department of Horticulture

The College of Agricultural Sciences is conducting a national search for the position of head of the Department of Horticulture. The head serves as departmental administrative officer and program leader, and reports directly to the dean of the college.

Candidates should possess an earned doctorate in horticulture or a closely related discipline; a significant period of professional experience; administrative and program leadership experience with the ability to communicate effectively and serve as an advocate for the

department; experience working with agricultural industries; and experience in or knowledge of research, extension and resident education functions in the land-grant university system.

Applicants should submit a resume with the names of five references to: **Dan Stearns**, chair, 103 Tyson Building, University Park, Pa. 16802. Applications will be accepted until the position is filled, however, initial review will begin March 15. For more information, contact **Stearns** at (814) 863-6167.

Highlight on Undergraduate Education

Technology changing how engineers are taught

The GE Fund and the College of Engineering and Eberly College of Science have established a partnership to improve engineering education.

"Pathways to Effective Learning in Engineering," a \$431,734 three-year curriculum development grant from the GE Fund, will help integrate engineering problems and applications into two foundation physics courses for engineering students in a new "studio physics" format. It will also help develop a model for converting traditional engineering courses to Web-assisted classes.

Both facets of the grant will involve students in course changes, will integrate industrial partners' projects and mentoring into active-learning classroom problems, and will creatively exploit technology to facilitate cross-disciplinary interaction and learning.

"As engineering educators we wrestle with the challenge of keeping our students motivated during the early phase of their education while they master the scientific foundation they need in mathematics, chemistry and physics," said David Wormley, dean of engineering. "Support from the GE Fund for this project helps us address this critical challenge immediately, and will lay the

groundwork for integrating engineering applications into other base science courses in the future.

"The interdisciplinary nature of the project—in which faculty from our college will work closely with faculty from the Eberly College to develop the new courses—is important to the future of engineering education."

In studio physics, students attend several two-hour class sessions per week, or "studios," instead of standard lectures or recitations. Each session presents students with a new problem or "module," for which student teams must find a solution and submit a written report. The module problems are open-ended and require each team to bring many tools and concepts to bear in determining the solution. Learning is active and emphasizes teamwork, collaborative learning, writing skills and problem solving. Since lecturing on new material is kept to a minimum, students are expected to read assigned material in the textbook. At Penn State, studio physics was implemented for selected first-year physics courses in the fall of 1996.

Engineering and physics faculty will create modules integrating engineering mechanics into a physics course, and electrical engineering and electronics into the second physics course. In the first year of the grant, participants will develop:

- two pilot studio physics courses
- techniques or "models" for sharing interdisciplinary course materials on the Internet
- a student teaching intern program for the studio courses
- faculty development seminars in new teaching methods, such as multimedia presentations or using the Internet.

Subsequent years will see the pilot courses and Web techniques expanded to include additional engineering and science courses and faculty; evaluations and refinements will be ongoing.

Also in the GE Fund grant is an annual contribution of \$15,000 for two GE Learning Excellence Awards, to be presented to interdisciplinary faculty teams who promote learning excellence across traditional college boundaries. The College of Engineering also will contribute approximately \$454,000 to the project over the three-year period.

Principal investigators for the project are Dushy Sathianathan, assistant professor of engineering design and graphics, and Robert Pangborn, professor of engineering mechanics and associate dean for undergraduate studies, in the College of Engineering, and Howard Grotch, head of the Department of Physics in the Eberly College of Science.

Faculty/Staff Alerts

Chefs visiting Penn College

This month, two renowned chefs will visit the Pennsylvania College of Technology and work side-by-side with the college's hospitality students and faculty. On Saturday, Feb. 8, popular cajun and creole chef John Folse and a number of guest chefs will create a "Wild Beast Feast." On Friday, Feb. 21, the country's top female chef, Traci Des Jardins of Rubicon in San Francisco, will be the featured chef of the college's popular Visiting Chef Series dinner. Both dinners will be held in Le Jeune Chef restaurant on the Pennsylvania College campus.

For more information on the two Penn College dinners or tickets, contact Dawn Wolfe at Penn College at (717) 320-8000. Proceeds from the dinners benefit a scholarship fund for students enrolled in the college's culinary programs.

Talk to the president

The rapid changes in technology and how it affects higher education is the focus of the next edition of "To the Best of My Knowledge," the radio show featuring President Graham B. Spanier on WPSU-FM, 90.1, 91.5 and 106.7 The show, airing at 7 p.m. Tuesday, Feb. 18, gives the public an opportunity to call in and discuss this issue with Spanier during the one-hour program. The number to call is (800) 543-8242.

Award nominations sought

The Penn State Educational Office Professionals seek nominations for its Outstanding Office Professional Award. The award recognizes office employees who provide exceptional service to Penn State. All University office employees are eligible, except officers and board members of PSEOP. Selection criteria include professionalism, industriousness, job competency, leadership skills, resourcefulness, continuous quality improvement, teamwork, problem-solving skills, reliability, quality of work, positive attitude, professional development and volunteer service on University committees and University supported charities.

Contact Ronda Markley, chair of the Outstanding

ing Office Professional Award Committee, at (614) 865-1750 or by e-mail at rkh1@psu.edu for a nomination form or more information. Nominations are due by March 21.

Quality Expo '97

Don't forget to mark your calendars for the Fifth Annual Quality Expo on Continuous Quality Improvement from 11 a.m. to 3 p.m. April 17 in the Nittany Lion Inn Ballroom. Exhibitor registration forms are due Feb. 14. For more information, contact Louise Sandmeyer, executive director of the Center for Quality and Planning, (614) 863-8721 or e-mail LES1@PSU.EDU.

Do-it-yourself searching

Now through Wednesday, May 7, the University Libraries Do-It-Yourself Searching Service will be available Monday and Wednesday evenings from 6 to 9 p.m. in 105 East Pattee Library. This service gives students, faculty and staff a chance to do their own computer searching using a choice of more than 150 dial-up databases in a variety of subjects. Self-study guides provide users with the basic skills needed to do searches, but for best results users are advised to consult a librarian in their subject area. For Penn State students, faculty and staff, many searches are provided free of charge.

For more information, contact the Pattee Information Desk at (614) 865-2112 or the search service coordinator at (614) 865-3705.

Learn about electronic resources

The University Libraries are offering the following series of seminars in February to help library users learn more about the growing number of databases accessible through the Library Information Access System (LIAS) and on CD-ROM. LIAS searching techniques that enable users to maximize their searching power also will be presented.

In an effort to accommodate as many participants as possible, some sessions are offered more than once. To register or learn more about the seminars,

send an e-mail to signup@psulias.psu.edu. If you have any additional questions, contact Doris Herr at (614) 863-0325. Seating is limited so register early. Seminars are held in Tower Room 402, Central Pattee Library, unless otherwise noted.

More information on the seminars can also be found by typing HELP WORKSHOP when using LIAS or on the Libraries' Web site at <http://www.libraries.psu.edu>.

- Penn State Libraries Catalog in LIAS
Feb. 10: 3-5 p.m.; Feb. 26: 10 a.m.-noon
- Beilstein CrossFire (Organic Chemistry)
Feb. 10: 10 a.m.-noon, in Room 5, Central Pattee Library
- Career Sources on the Web
Feb. 20: 5:30-7 p.m.
- Career Sources in the Sciences
Feb. 14: 10 a.m.-noon
- Census Data on the Internet
Feb. 25: 8:30-10 a.m.
- Earth Sciences databases
Feb. 21: 8-10 a.m.
- Engineering databases
Feb. 11: 10 a.m.-noon
- Literature Resources on the Internet
Feb. 27: 10 a.m.-noon
- Psychology databases
Feb. 21: 10:30 a.m.-noon
- Resources in Sociology and Anthropology
Feb. 13: 1-3 p.m.
- Spanish & Latin American Resources
Feb. 26: 1-3 p.m.

Enlightening lunch offering

For women who are confused by the current information regarding hormone replacement therapy, come to the brown-bag discussion "Hormone Replacement Therapy (HRT)—Who, Why and When" from noon to 1 p.m. Friday, Feb. 14, in 110 Henderson Building (The Living Center) on the University Park campus. Cost: None. To register, contact Jan Hawbaker at 865-3085 or JQH3@PSU.EDU.

The ARTS

AT PENN STATE

Fun with basketball

The Harlem Globetrotters will perform at 7:30 p.m. Feb. 20 at The Bryce Jordan Center on the University Park Campus. For information, or to find out about other events at the Jordan Center, visit the Web at <http://www.bjc.psu.edu/>.

Works on paper

On Feb. 11, the Palmer Museum of Art on the University Park Campus will open "Recent Gifts and Acquisitions: Works on Paper," an exhibition of works on paper, all of which have been added to the collection in

the last two years. The exhibition will focus on works from the 20th century, but will include two notable pieces from the 19th century.

Photography is particularly highlighted in the exhibition and will include printed photographs by

Walter Rosenblum and selections from a color portfolio by photojournalist and Penn State graduate Steve McCurry. "Recent Gifts and Acquisitions" will be on view through June 15.

Film festival at Hazleton

The Highacres Film Festival, a series of six films to be shown at the Hazleton Campus, continues Feb. 12.

All films will be shown in Room K-1 of the Kostos Classroom Building and will begin at 7 p.m. There is no cost and a discussion will follow.

— Wednesday, Feb. 12: "The Gods Must Be Crazy," hosted by Michael Santulli, associate professor of philosophy;

— Wednesday, Feb. 26: "Hoffa," hosted by Harold Aurand, professor of history;

— Wednesday, March 26: "He Said, She Said," hosted by Molly Wertheimer, associate professor of speech communication;

— Wednesday, April 2: "The Verdict," hosted by Ken Dudeck, associate professor of engineering; and

— Wednesday, April 16: "The 400 Blows," hosted by Stuart Erwin, instructor in French.

Bach's Lunch

The Penn State Bassoon Ensemble, directed by Daryl Durran, associate professor of bassoon in the College of Art and Architecture's School of Music, will perform for the 20-minute Bach's Lunch concert at 12:10 p.m. Thursday, Feb. 13, in the Helen Eakin Eisenhower Chapel on the University Park Campus.

The ensemble will perform works by baroque composer David Funck and Franz Schubert, whose 200th birth anniversary is being celebrated this year.

Audience members may take their own bag lunches to eat after the concert in the Roy and Agnes Wilkinson Lounge. Coffee and tea will be provided.

"Blue and White Montage"

The School of Music will present its annual extravaganza, "The Blue and White Montage," at 8 p.m. Friday, Feb. 14, in Eisenhower Auditorium on the University Park Campus. The "Montage" will feature 60 minutes of uninterrupted music presented by about 21 performing groups who will be placed in various locations around the auditorium.

Some of the units scheduled to participate are the University Symphony Orchestra, the Symphonic Band, Centre Dimension Jazz ensemble, Singing Lions, violin ensemble, horn ensemble, Orianna

BRYCE JORDAN CENTER

Heavy metal act Metallica coming

Metallica, American Music Award Heavy Metal/Hard Rock Artist of the Year for 1997, will perform at The Bryce Jordan Center on the University Park Campus at 7 p.m. Sunday, March 2, with special guest Corrosion of Conformity.

Metallica's success dates back to their debut album in 1983, Kill 'Em All, and is still continuing with the recent success of their new CD titled Load.

Tickets are \$35.50 and \$25.50, and are available at the Jordan ticket center, selected Uni-Marts, Penn State campus outlets in Altoona, Erie, Hazleton and Reading, or by calling (814) 865-5555 or toll-free at (800) 863-3336.

For more information on Bryce Jordan Center events, visit the Web at <http://www.bjc.psu.edu/>

Singers, Concert Choir, percussion ensemble and others.

Tickets are available from the Arts Ticket Center at (814) 863-0255. Tickets for non-students are \$4.50; students and senior citizens \$3.

"Celebration of Love"

The Penn State Chamber Singers, conducted by D. Douglas Miller, professor of music, will present their 11th annual "Celebration of Love" performance at 7:30 p.m. Saturday, Feb. 15, in the Lobby of Old Main on the University Park Campus.

The evening consists of vocal chamber music sung by the 16 members of the Chamber Singers, interwoven with poetic readings of love texts by professors emeriti of theatre, Helen and Lowell Manfull, and two student actors.

This year's celebration also will involve all 50 members of the Penn State Concert Choir for certain portions of the vocal music.

Tickets are \$10 and should be secured in advance by calling (814) 863-2142 or by writing to Celebration Tickets, 114 Arts Building, The Pennsylvania State University, University Park, Pa. 16802. There will be a reception in the balcony after the concert.

UNIVERSITY PARK CALENDAR

SPECIAL EVENTS

Friday, February 7

Palmer Museum of Art, 2 p.m., Christoffers Lobby. Gallery Talk presents Catherine Ciferri on "American Watercolors at the Palmer Museum."

■ School of Music, 8 p.m., Recital Hall. "Celebration of African-American Spirituals," Anthony Leach, director. For tickets, phone (814) 865-0431.

Saturday, February 8

Palmer Museum of Art, 11:30 a.m., Christoffers Lobby. Gallery Talk presents Robin Seymour on "Nineteenth-Century American Art."

■ Center for the Performing Arts, 8 p.m., Eisenhower Auditorium. "La Bohème—New York City Opera National Company." For tickets, phone (814) 863-0255.

■ School of Music, 8 p.m., Recital Hall. "Celebration of African-American Spirituals," Anthony Leach, director. For tickets, phone (814) 865-0431.

School of Music, 8 p.m., Recital Hall. Student Recital presents Michael Hooper, percussion.

Sunday, February 16

■ Center for the Performing Arts, 3 p.m., Eisenhower Auditorium. "Nai-Ni Chen Dance Company." For tickets, phone (814) 863-0255.

School of Music, 8 p.m., Recital Hall. Graduate Recital presents Tim McKay, trombone.

SEMINARS

Friday, February 7

Dairy Science, 3 p.m., 101 Agricultural Sciences and Industries. C. Eugene Allen on "Land Grant University Program Adaptations Needed for the Next Decade."

Geography, 4 p.m., 206 Walker. John Cromar on "Defining Metropolitan Areas and the Rural-Urban Continuum."

At the Palmer

"Dismal Science: Photo Works by Alan Sekula, 1972-1996" on display at the Palmer Museum of Art on the University Park Campus through March 16.

Sunday, February 9

Archaeological Institute of America, 4 p.m., 101 Kern. Dennis Dirkmat on "Archaeological Osteology."

Monday, February 10

Continuing and Distance Education and the College of Education's Adult Education, 11:45 a.m. to 1 p.m., 502 Keller. Sara J. Parks on "Professional Perspective on Lifelong Learning."

Distance Education, noon, Studio D, Mitchell. "Creating Interaction in the Virtual Classroom."

■ Australia-New Zealand Studies Center and Penn State Research and Technology Transfer Organization, 12:15 p.m., 201 Kern. Thor Bewoul on "Maralinga and In-Situ Vitification: A Case Study in Technology Commercialization and Deployment in an Export Market."

Agricultural and Biological Engineering, 12:20 p.m., 239 Agricultural Engineering. Matt Newton on "Calibrating Three Sediment Delivery Functions for Different Physiographic Regions in Pennsylvania" and Zhijie Wang on "Vision-Guided Separation of Micropropagated Sugarcane Shoots."

Penn State Catholic Faculty and Staff Fellowship, 1 p.m., 212 Eisenhower Chapel. P. Jenkins on "Are the Media Anti-Catholic?"

Gravity Center, 2 p.m., 339 Davey Lab. John Baez on "Spacetime Aspects of the Loop Representation of Quantum Gravity-Part I."

Physics, 3:30 p.m., 339 Davey Lab. David Goodstein on "From Two Dimensions to Three Dimensions."

The Institute for High Performance Computing Applications, 3:35 to 4:25 p.m., 215 Hammond. Vigor Yang on "Combustion Instabilities in Propulsion Systems."

Tuesday, February 11

School of Visual Arts, 1 p.m., Palmer Lipson Auditorium. Printmaker Melissa Harshman will discuss her work.

Computer Science and Engineering, 4 p.m., 302 Pond Lab. Tzvetan Drashansky on a topic to be announced.

Geoscience, 4 p.m., 112 Walker. Gordon Jacoby on "Long-Term Paleoclimatic Trends from Tree Rings."

Nutrition, 4 p.m., S-209 Henderson. Donald Beitz on "Cholesterol Reductions through Diet Manipulation."

Wednesday, February 12

Gerontology Center, 12:15 to 1:15 p.m., 110

Henderson Building. Donald A. Streit on "Femur Fracture and the Penn State Safety Floor."

Engineering Science and Mechanics, 3:35 p.m., 212 Hammond. Robert Haythornthwaite on "Yield Criteria and Flow in Granular Media."

Thursday, February 13

Faculty Staff Club and the Penn State Bookstore, 11:30 a.m., Nittany Lion Inn. Sue V. Rosser on "Reviewing the Issue of Women in Science and Engineering."

Gravity Center, 11:30 a.m., 339 Davey Lab. John Baez on "Spacetime Aspects of the Loop Representation of Quantum Gravity-Part II."

Physics, 3:30 p.m., 101 Osmond Lab. David G. Haase on "The Science House-Education Outreach from University Science Departments."

Computer Science and Engineering, 4 p.m., 302 Pond Lab. G. W. Stewart on "Hyperbolic Triangularization."

■ East Asian Studies, 5:30 p.m., 112 Kern. Kenzaburo Oe to present a lecture.

Friday, February 14

Geography, 4 p.m., 206 Walker. Cynthia Brewer on "Killer Cartography: Map Design Research for the NCHS Atlas of United States Mortality."

Philosophy, 4 p.m., 124 Sparks. Joseph Play on "Difference and Identity."

CONFERENCES

Friday, February 7

Agricultural Economics and Rural Sociology, Nittany Lion Inn. "Sustainable Agriculture (PASA)," through Feb. 8.

Sunday, February 9

Poultry Science, Nittany Lion Inn. "Game Bird Conference," through Feb. 11.

EXHIBITS

HUB Art Alley Cases

■ African artifacts by Sharon and Jim Mortensen, through Feb. 16.

HUB Art Alley Panels

Unity Days and graphic design "Imagine a World," through Feb. 23.

Jay Browsing Gallery

■ Photography exhibit titled "Our Land" by Jay Sieminski, through Feb. 23.

HUB Formal Gallery

"Memories of Childhood," through Feb. 22.

HUB Sculpture Corner

"American Gothic Revisited" by Jane Richey, through May 21.

Penn Panels

Perry Oliver, international printmaker, displays works, through Feb. 20.

■ Outreach

Partnership results in reusable karate kick plates

"Kicking around a new idea" is a phrase which took on a literal meaning when the Pennsylvania College of Technology's Plastics Manufacturing Center assisted a southeastern Pennsylvania entrepreneur in developing a new product.

Through a partnership funded by the Northeast Tier Ben Franklin Technology Center, the Plastics Manufacturing Center helped research and design the "Brak Point Jr.," a product fielded by Timothy McCorry, president of The McCorry Group Inc., in Berwyn, Pa.

A company which relies heavily on outside agencies, consultants and manufacturers to provide products to meet market demand, The McCorry Group develops and markets reusable, patented "Brak Point" karate kick plates for adults, among other products. The "Brak Point" plastic kick plates are an alternative to the solid pine boards normally used to demonstrate and practice karate techniques. The reusable nature of the plate results from a unique, patented hinge structure that is molded into the plastic.

The "Brak Point" kick plates are marketed internationally through master distributors of karate and martial arts supplies. That same market called for a beginners or youth version of the product which led McCorry to seek assistance in designing

the "Brak Point Jr." In stepped Penn College's Plastics Manufacturing Center with its capabilities ranging from plastics materials research to computer-aided drafting (CAD).

The Plastics Manufacturing Center was involved in three major phases of the project: product research and design; materials research and testing; and product prototyping and market evaluation.

"Penn College was not shy about exposing me to all of their capabilities," McCorry said. "Often you go to an organization and they'll say, 'Yes, we can do that.' But, at Penn College they said, 'Yes, we can do that... and we can do this too ... and now, how about that?' The project couldn't have gone smoother. And, now, the junior kick plate is selling like hotcakes!" Among its international supporters are youngsters in Japan.

Proud of how his product has gained mass appeal, McCorry is likewise proud of the fact that the kick plates use post-consumer recycled plastic. To complete the picture of this Pennsylvania product, the kick plates are manufactured by Selmax Corporation Inc. of Selingsgrove, an injection molder. Funding for the project came from Ben Franklin's Environmental Technology Research and Development Fund in the amount of \$78,000. Both Penn College and The McCorry Group also committed "in-kind" support.

Working together

The "Brak Point Jr." reusable karate kick plate enables students to practice their kicks without using solid pine boards.

Nursing students help to improve quality of living

Penn State Harrisburg students earning their bachelor of science degrees in nursing are working with the Housing Authority of Dauphin County and Pineale Health Home Care Agency on a unique project in the Harrisburg area.

These agencies were awarded a three-year grant to provide assessment and intervention to Housing Authority residents, who are often elderly and disabled. These residents often become isolated from friends, family and the community and develop health problems that can go undetected. To halt this cycle, the Housing Authority will use Penn State Harrisburg nursing students to identify both existing and potential problems among residents. Then they will develop an effective plan of care and provide case management services that link residents to the appropriate community service agencies for necessary services.

The grant, received jointly by the county's housing authority and Pineale Health Home Care Agency, is being provided by the Pennsylvania Department of Housing and Urban Development and will be used to fund the position of a senior citizen coordinator to oversee the project. Penn State students will be working together with nursing students from Messiah and York colleges.

Although the grant extends only over a three-year period, it is hoped that the schools will continue working together on this and future projects.

Harrisburg, PENNTAP combine to curb pollution and lower manufacturing costs

Penn State Harrisburg is teaming with the University's Pennsylvania Technical Assistance Program (PENNTAP) to undertake a project designed to help manufacturers lower their operating costs by eliminating pollution and minimizing waste.

With a \$50,000 grant from the Environmental Protection Agency, PENNTAP and Penn State Harrisburg's Environmental Technology Center will complete a two-year study on pollution prevention. The study will help three Pennsylvania manufacturers find and implement cost-savings opportunities through the reduction of waste and the lowering of emissions. The intent is to use recent developments in pollution prevention and sustainable engineering methodology to assist manufacturers. Businesses interested in participating are being sought.

"In the past, we looked a lot at treating waste at the end of the pipe," said Penn State Harrisburg's Charles Cole, acting director of the School of Science, Engineering and Technology. "We looked to lead industrial processes produce waste materials and then deal with it. Now, the emphasis is on moving the thought process and treatment of waste back into the project. It's called green engineering and sustainable engineering."

"In recent years, sustainable development has become a major focus of public policy makers," said Warren Weaver of PENNTAP's Southeastern Pennsylvania office. "In coming years, the business community will be talking about sustainability. They are already changing products and manufacturing processes to increase their product quality and reduce their wastes, their inefficiencies and therefore their costs. Leaders of world-class manufacturers have set goals that are characterized by Zero Inventory, Zero Defects and Zero Emissions."

The State Department of Environmental Protection has emphasized that businesses can save money by adopting a pollution prevention plan and striving for zero discharge. For every dollar spent on pollution prevention, a company saves at least \$5 in raw materials, time associated with meeting, reporting and permit requirements and in waste treatment and disposal costs, according to a 1993

"(The business community is) already changing products and manufacturing processes to increase their product quality and reduce their wastes, their inefficiencies and therefore their costs."

Warren Weaver
PENNTAP

New Jersey study. The elimination of waste reduces risk, so, for example, banks are willing to provide financing at better rates, or insurance rates drop when workers are no longer exposed to hazardous substances, or liability costs drop as fewer dangerous substances are kept on site, according to DEP.

DEP is a strong supporter of this project and helped convince EPA to fund the study. The study team consists of three Penn State Harrisburg engineering faculty: Cole, R. Scott Huebner and George Partridge; Andrew Donaldson, a Penn State Harrisburg research assistant; and two PENNTAP environmental specialists: Sharath Annamandala and Weaver. There is no charge to the participating companies.

One product that will come out of this program is a workbook and guidelines for industry to use, which will provide tips and a check list approach for businesses to rate their systems.

"The businesses targeted by the project will be smaller ones that do not have the resources to do it themselves," Cole said.

"The region's residents will be able to see how this effort benefits them," Huebner said. "Basically it's a quality of life issue. The net result of all these activities is to ensure the quality of life for future generations."

Anyone who would like more information or who may be interested in participating in the study should contact Huebner at (717) 948-6127. <http://www.pennstate.edu/interac>

Grant will allow update of historical databases

By STEVEN HEVNER
Penn State Harrisburg

Federal and state agencies will benefit from easier access to information on Pennsylvania's cultural and historic resources thanks to a project in progress at Penn State Harrisburg's Institute of State and Regional Affairs. The Pennsylvania Department of Transportation has awarded a grant of nearly \$100,000 to the institute to update database records at the Pennsylvania Historical and Museum Commission. The commission houses information on the 103,000 historic structures, 16,000 archeological sites and 1,700 archeological surveys.

According to the National Environment Policy and National Historic Preservation acts, federal agencies and their designees have a responsibility to consider historic and archaeological resources that may be affected by their projects. For example, before building a road, PennDOT must research the area for historic properties.

"The current method to retrieve information is a very labor-intensive process," said Ron Uroda, project manager at the institute.

Uroda explained that the original documentation on the historic properties consists of single copies of survey forms, maps, reports and related materials housed in a small search room in the Bureau for Historic Preservation at the commission. The institute is charged with developing a Cultural Resource Geographic Information Systems database to facilitate the retrieval process. Using this format, information will be virtually a keystroke away.

"The GIS map combines graphic elements with the data base," Uroda said. "You can do sorts and queries with GIS and in addition, the results show up on a map, so you can see visually where they are all."

The map will be designed with different layers of information including topics such as: roads, zip codes, county lines, highway systems, municipalities and markers showing the locations of historic sites. As an information retrieval system, the GIS can substitute for the paper files to rapidly locate what is already known about a specific project area, including inventory and location of known resources within the project, as well as key attributes.

"This is a five-month pilot program," Uroda said. "We picked one county to try to determine how long it will take to do the entire state."

In May, the institute will evaluate the final product, the time involved and any problems encountered, and make an estimate of staff and resources necessary to complete the rest of the state. At that time, PennDOT will decide whether to continue the project with the institute.

All in a day's work

Penn State telephone operator Cathy Rhoads checks a phone number for a caller. University operators handle an average of two calls per minute to check numbers in the directory, which is updated weekly. Last year, they handled roughly 600,000 calls for directory assistance.

Center requests fellowship nominations

The Australia-New Zealand Studies Center will nominate one person for the Ian Axford (New Zealand) Fellowships in Public Policy, which were established by the New Zealand government in 1995 to reinforce the links between New Zealand and the United States.

These Fellowships give outstanding American professionals the opportunity to spend six to nine months studying, traveling and gaining practical experience in public policy in New Zealand, including first-hand knowledge of economic, social and political reforms, and management of the government sector.

Jan Axford Fellowships are open to United States citizens with at least five years' experience in their professions. The focus of the fellowship is on mid-career development; these awards are not intended for basic

research or the earning of a degree. Candidates will put forth proposals for study in New Zealand, in any field of public policy including, but not limited to, health care, welfare reform, legal and judicial issues, community development, education, employment, environmental policy, public sector reform, economic management, and program evaluation in the government sector.

Nominations (including self-nominations) or curriculum vitae should be submitted to the Australia-New Zealand Studies Center, The Pennsylvania State University, 427 Boucke Building, University Park, Pa. 16802, by Friday, Feb. 21. Questions should be directed to Patricia Corbett: telephone — (814) 863-1603; fax — (814) 865-3336; or e-mail — pac@psu.edu.

■ Faculty Senate news

Plan OK paves way for other proposals

Withdrawing its request for new four-year degree programs at Penn State's three Pittsburgh-area campuses allowed state Education Secretary Eugene W. Hickok to give his approval to the University's modified plan to reorganize the Commonwealth Educational System, University President Graham B. Spanier emphasized at the Jan. 28 University Faculty Senate meeting.

"Nothing in the modified plan was turned down," Spanier told the Senate.

The University hopes to prepare a fully-documented proposal for new four-year programs at the Beaver, New Kensington and McKeesport campuses in the future.

"We want to make a very persuasive case (about increasing four-year offerings at the three campuses), and we intend to do so," Spanier said.

On Jan. 14, the University got Hickok's approval for its plans to reorganize CES. Under the plan, 14 of Penn State's 17 Commonwealth campuses are now authorized to offer baccalaureate degrees. Driven by changing

demographics of Pennsylvania's residents, the comprehensive plan spells out the future structure of the University (Intercom, special edition, Jan. 20).

After hearing Hickok express his feelings that there was insufficient documentation of the need for new four-year programs at Beaver, New Kensington and McKeesport, University officials decided to withdraw those requests. Plans for the three campuses will be resubmitted following the development of further documentation. The New Kensington campus already offers four-year programs in nursing and electromechanical engineering technology, and those programs will continue.

In other business, the Senate heard reports on several topics, including a report from Philip Klein, outgoing chair of the Senate Committee on Faculty Rights and Responsibilities, and a report on the use of about \$7.8 million for computing facilities and related programs and services. The funds were generated by student computer fees.

Appointments

Agricultural Sciences names coordinator of science information

Charles D. Gill has been named science information and news coordinator in the College of Agricultural Sciences. In this position, he will provide direction for news and public information efforts in connection with college research, teaching and cooperative extension programs and will coordinate staff assignments, publicity and special projects.

CHARLES D. GILL

From 1990 until his appointment, Gill was a writer-editor in Agricultural Information Services, where he was responsible for writing press releases, providing publicity support for Ag Progress Days and other special events, and coordinating statewide radio coverage of the Pennsylvania Farm Show. Before joining Penn State, he was public relations manager for Hobby House Press Inc. in Cumberland, Md., where he planned and executed public relations and publicity outreach for books, magazines, authors and special events. He previously was news director for radio stations WFRB-AM/FM in Frostburg, Md., and was a stringer for United Press International.

Gill attended Allegheny College in Meadville, Pa., and has a B.A. in communication studies from Penn State.

Arts and Architecture welcomes new director of alumni affairs

Joyce Hoffman has been named the new director of alumni affairs and special events for the College of Arts and Architecture. Hoffman, former assistant to the dean of The Smeal College of Business Administration, will work with the Arts and Architecture Alumni Board, serving as a liaison between the College of Arts and Architecture and the Penn State Alumni Association. Hoffman will be responsible for planning, implementing and managing all activities of the college's alumni relations programs.

As assistant to the dean in The Smeal College, Hoffman coordinated activities of the college's board of visitors, planned and managed special events for alumni and friends of the college, and served as a liaison between the dean and students, faculty and external constituents.

Before joining Penn State in 1991, Hoffman spent more than 10 years in the banking industry. From 1986 to 1991, she was a private banking

JOYCE HOFFMAN

and sales coordinator with SunTrust Bank in Nashville, Tenn., managing both a sales incentive program for bank customer service representatives for offices throughout the bank's 33 offices; and a group of private bankers assigned to work with the bank's affluent clientele. Before that, Hoffman worked in SunTrust's Marketing Division as public relations/special events coordinator.

Hoffman was a volunteer for the board of the Tennessee Performing Arts Center and has served as membership chair for one of its affiliate programs, Bravo!Nashville. She also volunteered for Senior Citizens Inc., a Nashville-based, not-for-profit organization serving the senior citizen population of Davidson County, Tenn.

Several key positions filled at Philadelphia region campuses

Several key appointments for the Philadelphia region have been made recently.

Lynn Marie Johnson, formerly director of development for the three Penn State Philadelphia-area campuses, has been named director of development for the Delaware County campus. **Gerald T. McLaughlin**, director of development and University relations, Penn State Great Valley, comes director of development for the Great Valley Graduate Center. **Joseph G. Bisconti**, formerly director of development and University relations for the Philadelphia region, becomes director of University relations, Philadelphia Region.

Johnson, a Philadelphia native, joined Penn State in 1994 after serving as executive director of the Philadelphia branch of the NAACP. Before that, she was special assistant to the president and director of public relations for Cheyney University of Pennsylvania. She is a graduate of the Delaware County Campus and Temple University, where she received a bachelor's degree in communications.

McLaughlin also joined Penn State in 1994. Before coming to the University, he served as director of annual fund and alumni affairs at Gwynedd-Mercy College in suburban Philadelphia. McLaughlin also served in key leadership roles for nearly 15 years at the American Red Cross in Philadelphia. There, he held positions as director of branch management, supervising 10 field offices across the region, and assistant director of human resources, among other posts. He received a bachelor's degree in English from Mansfield University of Pennsylvania and a master's degree in English from Kansas State University. Johnson and McLaughlin will report to **Elaine Rhodes**, director of University development.

Bisconti, a Penn State veteran of more than 25 years, has served in a variety of leadership positions with the University. Before his most recent regional roles, he was director of University relations at the Delaware County campus. He holds a bachelor's degree in journalism from Penn State and a master's degree in public relations administration from Syracuse University.

Bisconti has played a key role in developing and implementing the University's first efforts toward regionalization. In his revised role, he will report directly to **Steve MacCarthy**, executive director of University Relations.

Pool coordinator to oversee several programs at University Park

Jon B. Larson, a former PIAA, YMCA and high school All-American swimmer from Bethlehem, Pa., has been named pool coordinator in charge of the Nittany Lion Aquatics Swimming and Diving Programs. His major responsibilities include overseeing the comprehensive training program for competitive swimmers of all ages living within a 50-mile radius, springboard diving for novices through junior Olympic caliber divers, Aquasize classes taught in the Natatorium and White Building and developing a master's swimming program for individuals older than 25.

As a swimmer and a coach, he has been involved in swimming programs at Mission Viejo, Calif., Arizona State University, the University of Alabama, Mission Bay Makos, Boca Raton, Fla., and Coronado Navy Swim Association in San Diego.

Larson has been involved in all areas of competitive swimming and has worked with former Olympic head swimming Coach **Don Gambril**. He has received numerous coaching awards and honors including "Coach of the Year" and President of the Swimming Coaches Association in San Diego, where he has spent the last seven years.

Materials Research Laboratory welcomes programs director

Gary L. Messing, professor of ceramic science and engineering in the Department of Materials Science and Engineering, has been named intercollege research programs director for the Intercollege Materials Research Laboratory. For the past five years, Messing has served as director of the Particulate Materials Center.

Messing received his B.S. in ceramic engineering from the New York State College of Ceramics at Alfred University and his doctorate in materials science and engineering from the University of Florida. He was a research scientist at Battelle Columbus Labs for two years before joining Penn State in 1980. He was promoted to professor in 1989. During his tenure at Penn State he has served as a visiting professor at the University of Patrice and a research Fellow at Curtin University of Technology, Perth, Australia.

He has published more than 140 papers on various aspects of ceramic processing and has co-edited nine books. He has been a co-organizer of the International Ceramic Processing Science Conference since 1986. Messing is co-editor of the *Journal of the American Ceramic Society* and is on the editorial board of the *Journal of Sol Gel Science and Technology*. He received the Wilson Research Award of the College of Earth and Mineral Sciences and the Richard M. Fulbright Pacific Award for his research on seeding of high temperature transformations. He was named a Fellow of the American Ceramic Society in 1990, and currently serves on its board of trustees. He is a member of the Materials Research Society, American Ceramic Society, American Chemical Society and the American Institute of Chemical Engineers.

GARY L. MESSING

Partings

Eberly dean heads to University of Maryland

Gregory L. Geoffroy, dean of The Eberly College of Science since 1989, has been named vice president for academic affairs and provost of the University of Maryland at College Park, effective June 1.

Geoffroy joined the Penn State faculty in 1974 as an assistant professor of chemistry and went on to hold Guggenheim and Sloan Foundation faculty fellowships and a Dreyfus Teacher-Scholar grant, in recognition of his abilities as a researcher and educator. He became

GREGORY L. GEOFFROY

head of the chemistry department in 1988.

During his administration as dean, the college became Penn State's first academic unit to be named in recognition of a benefactor: the Eberly family of Uniontown, which endowed eight faculty chairs and provided other faculty, student and program support. His tenure also witnessed significant strengthening of the national reputations of individual departments, increases in research funding and new initiatives aimed at boosting the quality of undergraduate education.

Longtime professor of French has emeritus status

Richard L. Frautschi, professor emeritus of French, has retired. His association with Penn State spanned 26 years and included departmental administrative management along with teaching and research.

Frautschi received his B.A. degree in French and English in 1949 from the University of Wisconsin, his M.A. degree in French from Harvard University (1953), and his Ph.D. degree in French and Italian from Harvard University (1958). He also holds two licence certificates from France, one in literature from the Université de Bordeaux and one in history from the Université de Paris. He joined the Penn State faculty in 1970 as the head of the Department of French, a position which he held for 19 years.

As a scholar, Frautschi has published five books and textbooks and more than 70 articles in European and

RICHARD L. FRAUTSCHI

American journals on 18th-century French literature. One of his major works, the *Bibliographie du genre romanesque, 1700-1800* (with Angus Martin and Vivienne Mylne) will be published by the Voltaire Foundation (Oxford) in 1998. Another book project is in progress.

As a teacher, Frautschi taught French language and literature at all levels. As department head (1970-1989), he continued his teaching and publication activities while, at the same time, initiating a number of curricular innovations both at the undergraduate and graduate levels.

Although officially retired, Frautschi not only continues his research but also is actively involved in Penn State's study abroad programs.

Associate professor retires after 37 years

Robert J. Foster, associate professor and chair of engineering design and graphics in the College of Engineering, has retired after 37 years with Penn State. All of Foster's undergraduate and graduate degrees were earned at Penn State.

Starting his career as an instructor in 1959, Foster provided many years of strong leadership and teaching for the University's engineering program. He served the University Faculty Senate Committee on Curricular Affairs through membership on various committees, and served as program chairman for engineering graphics. During his career, he taught an estimated 6,600 students and made notable contributions to the first-year engineering program, and also was active in developing an experimental first-year engineering course. Foster was instrumental in the development and implementation of the first-year curriculum at 19 Penn State campuses.

Over the years, he has authored many papers and four McGraw-Hill

ROBERT J. FOSTER

texts on the subject of engineering design graphics. He has been involved with the *Engineering Design Graphics Journal* as contributing author, reviewer and associate editor. Interested in studies of student retention, Foster was a member of a national Research Council Task Force on Retention. He

also served as a visitor for the Accreditation Board for Engineering and Technology. In addition, Foster was actively involved in the American Society for Engineering Education (ASEE), where he served as the chair of Engineering Design and Graphics Division in 1985-86, and was the recipient of the ASEE-EDGD Distinguished Service Award. Foster is affiliated with the Tau Beta Pi and Pi Tau Sigma honoraries.

Foster and his wife, Maggie, will continue to reside in the State College area where he plans to do volunteer work in the church and community, and be an active grandfather.

Food laboratory attendant retires after 29 years service

Geraldine M. Rose, food laboratory attendant, has retired after more than 29 years of service.

Rose began her career at the university working in food service at Redifer Dining Hall. After seven years, she moved to the nutrition department, assisting students and faculty in the preparation and clean

up of all of the food labs. She also purchased supplies for various research projects.

Originally from Mississippi, Rose plans to visit her family and become involved with volunteer programs during her retirement. She says she misses the nutrition department and especially the students.

Several on staff retire from University after long careers

Dorothy Campolongo, research nurse for the Noll Physiological Research Center, has retired after more than 21 years of service.

Jean A. Coover, staff assistant V at Penn State Harrisburg, from July 24, 1972, to Nov. 1, 1996.

Patricia K. Erdman, staff assistant VI in the Corporate Controller's Office, from Sept. 20, 1973, to Oct. 1, 1996.

Charles Galgoczi, director of graduate admissions and programs, Research and Graduate School, from July 1, 1970, to Oct. 1, 1996.

Patricia L. Groves, staff assistant VI at the Penn State DuBois Campus, from Sept. 27, 1976, to Oct. 1, 1996.

Linda M. Grove, marketing coordinator I for The Hershey Medical Center, from July 1, 1970, to Sept. 7, 1996.

Ronald G. Hoover, manager, data administration in Computer and Information Systems-Administration, from June 15, 1970, to Oct. 1, 1996.

Claire E. Markham, staff assistant VI in the College of Education, from Nov. 1, 1982, to Oct. 1, 1996.

Charles W. Naspinsky, purchasing agent, Business Services, from July 1, 1972, to Nov. 1, 1996.

Donald F. Wilkinson, supervisor, Airport Operations, from Sept. 1, 1992, to Oct. 1, 1996.

Arlene R. Barnes, staff nurse at The Hershey Medical Center, retired Oct. 26, 1996.

Ruth P. Bowman, staff assistant VIII at The Hershey Medical Center, from Nov. 1, 1971, until Nov. 9, 1996, 1996.

Humphrey Fellowships' benefits far-reaching

The University, community government and the local school district are cooperating in a program to teach and mentor rising administrators from developing countries and in the process, are reaping the benefits of new perspectives.

"This academic year, we have 11 Hubert H. Humphrey Fellowship professionals from Asia, Africa, Europe, the Middle East and the Caribbean working with faculty, State College Borough officials and State College Area School District administrators," said Syedur Rahman, who is program coordinator along with Nancy McDonnell. "The fellows are working in areas from computers and university administration, to school management, local government and industrial management."

The Hubert H. Humphrey Fellowship Program for International Visiting Scholars provides mid-career professionals from developing countries with opportunities for advanced study and professional work-related experiences. Sponsored by the United States Information Agency, the program is administered nationwide by the Institute of International Education. Penn State's program, hosted by the Institute for Policy Research and Evaluation, is one of only 11 nationwide where Humphrey Fellows pursue individualized programs of study.

The Humphrey Fellows take on yearlong professional affiliations with a unit in their field of interest, which provide an opportunity to learn about U.S. organization and management. At both the University Park Campus and Commonwealth Campuses, administrative and academic units provide professional affiliation opportunities.

Fellows' placement in University offices, or local businesses or local government offices also adds valuable learning experiences to both the fellows and the offices with which they are affiliated. Every attempt is made to link the fellows with a professional experience in their primary area of interest.

"The fellows are working in areas from computers and university administration, to school management, local government and industrial management."

Syedur Rahman
program co-coordinator

In addition, Humphrey Fellows are a valuable resource to the Penn State community. Either individually or in groups, they make presentations on topics of national and international interest and serve as guest lecturers in classrooms and before community groups. As a result, organized exchanges have been set up with student bodies, faculty committees and community organizations. Both the State College Area and Bellefonte Area School Districts in Centre County have received funds from the Humphrey program to enable the districts to honor high school seniors who make significant contributions to increasing international understanding.

Since the beginning of the program, Penn State has hosted 140 Humphrey Fellows from 65 countries in Africa, Asia, the Caribbean, Eastern Europe, Latin America and the Middle East.

This year's fellows, their titles, country of origin and where they are working with on campus or in the community are:

■ Elena Galinova, director of studies, Pharos School of Languages and Computing, Bulgaria, working with Daniel Walden, American Studies Program, and Michael Nayden, Department of Slavic and East European Languages.

■ Ibrahim Diallo, director of Private Primary Education, Ministry of Basic Education, Burkina Faso, working with William Opendhoff, superin-

tendent, State College Area School District.

■ Benjamin Eghan, principal program officer, Integrated Community Centres for Employable Skills, Ministry of Employment and Social Welfare, Ghana, working with Edwin Herr, associate dean for Graduate Programs, research and technology, College of Education, and Paul Mazza, president and owner, South Hills Business School.

■ Vorasone Dengkayaphichit, head, Computer Science Center, National Polytechnic Institute, Laos, working with Russell Vaught, director, Center for Academic Computing.

■ Abdel-Halim El Hilu, assistant accounting control officer, United Nations Relief & Works Agency, Gaza, the Palestine National Authority; working with Gary Schultz, senior vice president for finance and business and treasurer.

■ Alexander Razumov, chief of staff, President's Office, Government of Chuvashia, Russia, working with Peter Marshall, manager, State College Borough.

■ Ismael Mbaye, assistant director, Secondary Education, Ministry of National Education, Senegal, working with William Opendhoff, superintendent, State College Area School District.

■ Mohamed El Gasim, deputy executive director, Vice-Chancellor's Office, University of Khartoum, Sudan, working with Robert Secor, vice provost, and James Rameau, associate dean for Undergraduate Education.

■ Hisham Al-Khayat, head of Industrial Planning Directorate, State Planning Commission, Syria, working with Robert Bini, director, Centre Region Council of Governments.

■ K. M. Edem Adubra, vice principal, Tokoin High School, Lome, Togo, working with the State College Area High School.

■ Andrew Mangoro, headmaster, Mahusewa Secondary School, Zimbabwe, working with Peter Rubba, Department of Curriculum and Instruction.

Penn State supplies students with two daily newspapers

Hundreds of students at University Park are waking up this spring to find two daily newspapers delivered free of charge to their residence hall doors.

A pilot program involving the distribution of both *The New York Times* and the local *Centre Daily Times* was launched at the suggestion of University administrators.

Students have been hired to deliver the newspapers to almost 940 students occupying 550 rooms. The pilot program involves three co-ed residence halls on the University Park Campus.

President Graham B. Spanier introduced the students to the program with a letter welcoming them back to campus after the winter break.

"As president, I am committed to enhancing the intellectual and social development of each student. I am therefore pleased to announce that your residence hall has been selected for a pilot program in which you will receive selected newspapers in the hope that they will further your education," Spanier said in the letter.

Lou Heldman, publisher of the *Centre Daily Times*, agrees that newspaper readership can enhance student development.

"There is significant research on voting behavior and other aspects of citizenship that show a direct correlation between newspaper readership and community involvement," Heldman says. "The stronger connections that will be forged between students and this community by newspaper readership will help lead them to develop long-term ties with the communities they settle in and the newspapers serving those communities."

Following the semester-long experience, students will be surveyed to find out if the personal newspaper service proved useful and it is something they would like to see happen all the time at Penn State.

"One of the real benefits we expect from this program is the potential to encourage the formation of readership habits that students will carry with them throughout their lives," Spanier said.

"This is absolutely the best time for students to begin taking newspaper reading seriously, and to program such as this is the perfect way to introduce newspapers to them," Heldman said.

Tim Williams, executive director of the Pennsylv-

ania Newspaper Publishers Association based in Harrisburg, said the program has obvious ramifications for the newspaper industry by helping create "lifetime readers."

"Studies indicate that college students are not among our strongest readers. Normally, people begin regularly reading the paper at around the age of 35," Williams said. "If you begin developing students' interest in reading current events on a daily basis, you not only get them to be habitual readers but you also get a more well-rounded, knowledgeable person."

If the experiment works, Penn State officials would like to see the doorway delivery of newspapers for all 14,000 students who live on campus at University Park. Officials expect that only one newspaper would be selected for permanent delivery, with the choice centering on the advantages of a major national newspaper versus a local paper that might help students feel a greater sense of involvement with and responsibility for the surrounding community. Williams said it would be interesting to see which students become "regular" readers of newspapers.

In announcing the new program to the University's Board of Trustees recently, Spanier joked that "Both the newspapers involved, as you can imagine, hope this experiment is successful."

The cost to the University for the semester long program is approximately \$25,000. Students who take part in the survey following the experiment will have a chance to win \$100 in merchandise from the Penn State bookstore.

Most right-wing extremists live and work in mainstream America

By PAUL A. BLAUM
Public Information

A profile of right-wing extremists shows that they are not an isolated group of people but are probably our neighbors.

"They tend to be male, white, outspoken in their convictions and at least as well-educated as the person next door. They are not confined to one socio-economic class and range from very poor to very rich. They do not cluster together in sub-cultural enclaves, and they apparently do not try to win over neighbors to their beliefs," said Howard Schuman, professor of sociology at the University of Michigan, and Maria Krysan, assistant professor of sociology at Penn State.

"In sum, except for age and gender differences, supporters of far right political candidates do not seem to differ greatly from the rest of the white population," the researchers said.

Krysan and Schuman drew their data from a survey of 157 contributors to the campaign of David Duke, former American Nazi and Ku Klux Klan activist who sought the governorship of Louisiana in 1991. The contributors

Maria Krysan, assistant professor of sociology, said her research shows that right-wing extremists may very well be our next door neighbors.

Photo: Greg Grieso

lived in three counties in the metropolitan Detroit area.

The researchers also surveyed neighbors of every Duke contributor, as well as a random sample of the general population in those three counties. The ques-

tionnaire was mailed to respondents.

"In most demographic characteristics, Duke contributors do not differ significantly from either their neighbors or the general white population," the researchers said. "One

exception is that contributors are some 10 years older than both their neighbors and the overall white population. Ordinarily, this would mean that they would be less-educated also, but that is not the case. There is no difference in education between any of the samples, which implies that Duke contributors are actually better educated than the average white person, once age is held constant."

The Duke supporters, like right groups as a whole, expressed a distinct lack of confidence in all branches of federal government, as well as opposition to specific policies such as affirmative action for minorities and women, gun control and the primary of environmental concerns over unfettered economic growth.

"However, we found no evidence that Duke contributors moved to their present neighborhoods to be near like-minded ideologies or have attempted to exert an ideological influence on their neighbors," Krysan said. "Our survey results indicate that Duke supporters live side-by-side or even surrounded by people who do not espouse their political positions."

In each area, De Walle is comparing five urban watersheds with five rural watersheds. Analysis of data for the Northeastern sector is complete.

"It is obvious that stream flow increases with an increase in precipitation, but in the Northeast, we find that with a higher population and the same precipitation, stream flow increases more," De Walle said.

Increases in stream flow boost the potential for flooding and the most developed areas are those that stand to lose the most in property and human life if flooding occurs.

higher when they were undersized compressive shorts.

"Compressive material enhances the body's awareness of where it is and what it is doing," said William J. Kraemer, professor of applied physiology, who headed the study.

Research

Hershey offers new cardiac bypass procedure

A different type of cardiac bypass surgery that is less painful, and offers patients faster recovery time and reduced trauma to the body, is now being offered at University Hospital at the Milton S. Hershey Medical Center.

The procedure, known as minimally invasive direct coronary artery bypass (MIDCAB) surgery, is performed through a small incision on the beating heart, eliminating the need for physicians to stop the heart and put patients on a heart-lung machine. The incision is one-third the size of incisions used in traditional bypass surgery and the hospital stay and recovery time for patients is considerably shorter.

Physician receives Cancer Society grant

Dr. Waldemar Debinski, director of tumor research and assistant professor of surgery and microbiology, has been awarded a \$383,000 three-year research grant from the American Cancer Society for the project "Immunotherapy for Cancer Treatment."

Debinski's laboratory is working on several innovative approaches to the treatment of solid tumors with emphasis on brain tumors. It is expected that some of these new strategies will be evaluated clinically at The Hershey Medical Center. Debinski's recent work also focuses on molecular targeting for cancer treatment.

Meals on Wheels clients at risk for iron deficiency

Rural, homebound, elderly people, particularly women, who participate in Meals on Wheels Programs, are at risk for iron deficiency, a study has shown.

John L. Beard, professor of nutrition and leader of the study, said the meals people received were adequately designed by a professional nutritionist. However, one home-delivered meal a day was not enough to provide 100 percent of the recipients' daily needs, and their other food intake did not compensate.

Beard worked with Rebecca E. Richards, research associate; Helen Smicklas-Wright, professor of nutrition; Valerie Bernardo, research associate; and Sue Kordish, who is affiliated with the Clearfield County Area Agency on Aging.

Urbanized watersheds are more sensitive to climate change

By ANDREA ELYSE MESSER
Public Information

A regional investigation of stream flow in urbanized areas could help planners, hydrologists and climate modelers predict future effects of increased precipitation and temperatures, according to a researcher.

"There have been a great many studies of stream flow, temperature and precipitation, but they have all been done on undeveloped watersheds that are minimally impacted by

humans," David De Walle, professor of forest hydrology, said. "No one, to our knowledge, has formally looked at urban watersheds in this way."

De Walle is trying to see how urbanization affects sensitivity of stream flow to climate change. Using population data from the U.S. Census Bureau, precipitation information from the National Weather Service and stream flow data from the U.S. Geological Survey, he is reviewing the past 50 years for four regions of the United States — the Northeast, Southeast, Northwest and Southwest.

Feb. 9 is 4-H Day with the Lady Lions

Nearly 2,300 young people and their families from 34 counties will cheer the Penn State women's basketball team Sunday, Feb. 9, at The Bryce Jordan Center during 4-H Day with the Lady Lions. The event is sponsored by the Pennsylvania Association of Extension 4-H Agents and the Department of Intercollegiate Athletics.

Administered by Penn State Cooperative Extension, 4-H is the University's largest youth outreach program, involving more than 130,000 young Pennsylvanians — both urban and rural — in informal educational programs in such areas as plant and animal science, engineering, life sciences, citizenship and leadership skills development.

From 12:30 p.m. until the 2 p.m. game with Indiana University, the College of Agricultural Sciences' Office for Resident Education will coordinate a Penn State Information Fair between gates A and B on the concourse level of the Jordan Center. Representatives from each academic college, undergraduate admissions and the financial aid office will be on hand to help participants learn more about post-secondary education choices. Short bus tours of campus also will be offered on a limited basis. Preregistered 4-H members and their families will be admitted free to the game.

"Many people, even 4-H'ers and their families, don't make the connection between 4-H and Penn State," William Hosler, the event's coordinator and Huntingdon County youth development extension agent, said. "By bringing them to campus, we hope to broaden their awareness of 4-H and Penn State."

For more information, contact Hosler in the Huntingdon County office of Penn State Cooperative Extension at (814) 643-1660 or **Mari-ann Fivick** in the college's Office for Resident Education at (814) 865-7521.

For the record

A "News in Brief" item from the Jan. 30 issue on a retiree group that meets Mondays at the Autopoint requires clarification. There are two retiree groups — one open to former faculty members and their spouses and the other open to all former employees of the University. The group open to all employees meets every other month at The Penn State Scenic Center. For more information on this group, contact **John Ziegler** at 867-7931. For information on the faculty retiree group, contact **Frank Mallette** at 237-2021.

When it rains it pours....

Harold Doll from the Office of Physical Plant makes sure the surface in front of Recreation Building on the University Park Campus is safe for pedestrians. In an average winter season, OPP workers spread about 250 tons of salt and anti-skid material on sidewalks on campus and an additional 250 tons of the same on roadways.

Submissions sought for technology symposium on teaching

Penn State faculty are encouraged to submit a presentation proposal for the fifth annual Teaching and Learning with Technology Symposium to be held from 9 a.m. to 4:30 p.m. Saturday, April 5, in the Joab L. Thomas Building at University Park. In addition to faculty submissions, proposals from graduate students and undergraduates who wish to share exemplary course projects that involve information technology are welcome. The symposium, sponsored by Education Technology Services of the Center for Academic Computing, is a forum for sharing ideas and experience in using technology for University-level instruction.

Proposals are due by Feb. 21 on topics such as:

- Active and Collaborative learning environments

- Effective use of video, graphic, VR, morph and sound resources for instruction

- Increasing course-based communication through e-mail, the World Wide Web and other Internet applications
- Innovative models for delivery at a distance

- Any use of technology to enhance teaching and learning.
- All presenters should plan to demonstrate their instructional methods. Each session will be 60 minutes long.

To request a printed presentation proposal, please contact **Karen Peters** at kmpl38@email.psu.edu or call (814) 863-7763 or (814) 863-5770. Proposals also may be submitted via the Web at: <http://ets.cac.psu.edu/seminars/TLT/rfp.html>.

Proposed state budget falls short of University needs

By LISA M. ROSELLINI
Public Information

Despite Gov. Tom Ridge's proposed 2 percent increase in state funding for Pennsylvania's public universities this year, the money just doesn't cover the financial obligations Penn State faces. In fact, for Penn State alone, there's an \$18.5 million gap between what is being offered and what is needed.

On Feb. 4, the governor unveiled his proposed \$16.9 billion spending plan for 1997-98 for the state that boosts appropriations for Pennsylvania's public universities by \$22.9 million. Penn State's share of that increase is

\$5.68 million. This increase brings Penn State's total 1997-98 proposed state appropriation to about \$286.7 million, although University administrators were seeking a \$24.2 million increase this year, or about \$305 million.

"We applaud, that for the first time in several years, the executive budget proposal provides for an increase for Penn State's base budget," John A. Brighton, executive vice president and provost, said. "But the governor's proposal will not cover the financial obligations we face this year in mandated retirement benefits, regulatory compliance and basic operating costs. Nor will it allow us

Court upholds Penn State's tax status

Dauphin County Court of Common Pleas ruled Monday in favor of Penn State in a case that had questioned the tax-exempt status of the University and The Milton S. Hershey Medical Center.

"We are gratified that the Dauphin County Court today upheld Penn State's tax-exempt status as an instrumentality of the Commonwealth," said Gary C. Schultz, senior vice president for finance and business/treasurer. "Penn State and the Commonwealth have a long history of working together in service to the people of Pennsylvania. It is heartening that the court recog-

nizes that a state-supported institution like Penn State should not be subject to local taxation."

At issue was the tax-exempt status of The Medical Center properties in Derry Township, including the University's College of Medicine, various research facilities and the University hospitals. The court recognized that these properties are an integral part of the University, and they are used in furthering the educational and research missions of Penn State.

The University's tax-exempt status also

Matters of the heart

Valentine's Day: Candy and flowers say it best

By ANNEMARIE MOUNTZ
Public Information

Tomorrow is Valentine's Day, so you're probably either hoping for some flowers and candy, or rushing out to buy some for someone else. But did you ever stop to think

why we give chocolate and roses on this romantic holiday?

"We usually give rare, unusual, luxury items to people when we want to communicate our admiration," Gregory Ziegler, associate professor of food science, said. "When someone gives chocolate for Valentine's Day —

especially expensive chocolate — much like a diamond or a dozen roses, what that person is saying is that 'I have an excess of resources and I can afford to spend them on these unnecessary, luxury items.'"

In addition, there's a widely circulated belief that chocolate can potenti-

ate amorous feelings, said Ziegler.

"That idea goes back at least as far as the Aztecs in Mesoamerica. It's been said that the emperor Motecuhzoma II would drink chocolate before entering his harem, so it has a long history as an aphrodisiac," he said.

Valentine's Day

continued from page 1

Unfortunately, there appears to be no truth to the rumors.

"I think the properties it has in that regard are psychological, rather than physiological, although they are finding hundreds of compounds in chocolate, and certainly some of them are physiologically active. But as of yet they have not been able to ascribe either aphrodisiac properties or even addictive properties to any one of those chemicals, other than a small amount of caffeine," he said.

Ziegler, whose research includes both the history of chocolate and its physical properties, said we crave chocolate because humans have a penchant for sweets, and, frankly, because it tastes so good. Even if you're counting calories, one or two pieces of the treat won't do much harm.

"A Hershey's Kiss has only 25 calories," he said.

As much as we love chocolate, manufacturers have predicted a 10 percent drop in candy sales this Valentine's Day, however. This year, the holiday falls on the first Friday of Lent, the 40 weekdays from Ash Wednesday to Easter observed by the Roman Catholic, Eastern and some Protestant churches as a period of penitence and fasting.

"Anyone observing Lent will have to switch to roses," Ziegler said.

And what about those roses? A dozen long stem red American Beauties sends an unmistakably romantic message. And the average consumer will plunk down between \$50 and \$60 to have them delivered on Valentine's Day. But flowers that start to droop and die soon after they're given can put a damper on things.

Kathleen Brown, associate professor of postharvest physiology who has studied ways to genetically alter roses to make them less susceptible to disease, has some tips to help your roses last as long as possible.

Take that preservative packet that

came with your flowers and mix it in with tepid water according to the directions. Before putting your flowers into the solution, recut the stems about an inch from the bottom with a sharp knife, and remove all leaves that would be under water.

"If you leave them on, they'll decay in the water and cause bacteria to grow," said Brown, who is an expert on roses and storage of cut flowers. "That could make it harder for the flowers to absorb the solution, and they'll die sooner."

Some people recommend cutting the flower stems under water. "If you're not going to put the flowers immediately into their vase, that's a good idea. But it's better to get your flowers into the solution as soon as possible," Brown said.

If you don't have a packet of preservative, don't use sugar in its place because plain sugar could cause bacteria to grow.

"Instead, use a half-and-half solution with lemon and Sprite or another lemon-lime soda," Brown said. "Don't use diet soda because you need the combination of the acids and the sugar in the soda. Mix the soda with an equal amount of water, and then let it sit to get some of the carbonation out."

Although the television may be the best place to put your flowers from a decorator's point of view, the heat given off by the TV could spell an early demise for your flowers.

"Keep flowers in a cool place to make them last longer," Brown said. "If their heads seem floppy, put the flowers in a warm solution and then put them in a cold place for a few hours to help them absorb the solution. You could even put them on the porch for an hour or two if it's not too cold out."

If you follow these tips, your flowers should last seven to 10 days—maybe even longer, depending on the quality.

If you're the one buying the roses, pick flowers that look fresh, with the petals separated a bit at the tips. In

For more information

For more information about chocolate, visit the Cocoa Chocolate and Confectionery Research Group Web site at <http://www.cde.psu.edu/ccr/ry/>. If that doesn't satisfy your appetite, visit the International Symposium on Confectionery Science Web site at <http://www.cde.psu.edu/C&I/CocoaResearch/>.

What does it mean?

Different colored roses mean different things to different people. A sampling of Web sites has turned up these fairly common rose colors and their meanings:

- Red: true love or passion
- White: innocence, purity
- Yellow: friendship; can also mean jealousy
- Light pink: grace, gladness, joy or simplicity in love
- Dark pink: thankfulness

addition, you may want to buy domestic roses instead of imported varieties.

"Domestic roses last longer than imported as a rule," Brown said. "They don't have to travel as far and can be picked much closer to delivery time, so they're fresher. Imported roses are less expensive because they're grown in warmer climates and can be produced more cheaply. However, they have to travel a long way to get here and their quality is not usually as high as that of roses grown domestically."

Keeping all of this in mind, choose your gifts carefully. And remember, while neither chocolate nor roses has a proven effect on amorous feelings, neither one hurts the cause.

Tax status

continued from page 1

has been questioned in Centre County, and the University has responded with in-lieu-of tax agreements with local taxing bodies. The University remains committed to those settlements, which have been recently revised and are currently undergoing review.

"We hope that this decision brings to an end attempts to impose taxes on the University. This decision is significant in recognizing the University's status as an instrumentality of the Commonwealth and affirming that University property is immune from taxation," said Schultz.

In Centre County, the University has entered into in-lieu-of tax agreements with local taxing bodies and has proposed that the agreements be revised this month be binding on all parties for 20 years. Centre County, the State College Area School District, the Borough of State College and Patton, Harris and Ferguson townships are considering the revised agreement. The University reached a separate in-lieu-of taxes agreement with College Township earlier this year.

Obituaries

B. June Emanuelson, campus registrar for the Penn State New Kensington campus, from Dec. 9, 1968, until her retirement July 1, 1993; died Jan. 9, 1996. She was 63.

Martha G. Files, clerk, University Libraries, from Dec. 3, 1973, until her retirement April 1, 1994; died Jan. 1 at the age of 65.

Marva J. Hunt, nutrition education adviser in the College of Agricultural Sciences, from Feb. 3, 1969, until her retirement July 1, 1990; died Jan. 16. She was 58.

Oscar W. Jones, resident assistant/housekeeping supervisor in Housing and Food Services, from March 1, 1973, until his retirement May 31, 1986; died Jan. 24. He was 77.

Helen Rice, janitorial worker, Office of Physical Plant, from Oct. 19, 1981, until her retirement Oct. 22, 1991; died Jan. 19. She was 70.

Gilbert J. Rider, supervisor of auxiliary equipment in Management Services, from July 1, 1949, until his retirement Jan. 3, 1976; died Jan. 20 at the age of 81.

Victor L. Waite, plumber-fitter with the Office of Physical Plant, from Oct. 28, 1969, until his retirement Jan. 5, 1995; died Jan. 7. He was 61.

Paul Wegman, utility worker at The Hershey Medical Center, from Sept. 28, 1970, until his retirement Aug. 30, 1986; died Dec. 25, 1996 at the age of 73.

How America loves chocolate...

- On average, each American ate 11.5 pounds of chocolate in 1995. That's over 3 billion pounds total.
- The retail chocolate industry in the U.S. is worth \$13 billion per year.
- Americans spend \$665 million each Valentine's Day on candy, making it the fourth biggest holiday of the year for confectionery purchases after Halloween, Christmas and Easter.

- Chocolate manufacturers use 40 percent of the world's almonds, 20 percent of the world's peanuts and eight percent of the world's sugar. Members of the Chocolate Manufacturers Association use about 3.5 million pounds of whole milk each day to make milk chocolate.

State budget

continued from page 1

to address critical needs to further our missions of teaching, research and outreach."

Brighton also said the shortfall will further widen the affordability gap that students face in paying for a college degree and could halt the University's plans for hiring more faculty. Although a 2.9 percent increase in

tuition is already planned for next year, the provost could not say if a larger tuition increase would now be considered. Currently, the state's appropriation contributes 16.8 percent to Penn State's total operating budget.

In the coming weeks, University officials will continue working with legislators as the state Senate and House of Representatives holds its own budget hearings on the governor's proposed fiscal blueprint. Last year, Ridge recommended only increasing Penn State's appropriation by \$762,000 over the previous year to reach \$277.4 million. After budget hearings, however, the Legislature agreed to up that amount to nearly \$281 million. The Senate holds its budget hearings at 11 a.m. Tuesday, Feb. 25; the House will hold its hearings at 3 p.m. Monday, March 3.

"Underfunding continues to be one of the University's most serious problems as we continue to operate with fewer dollars per student than our peer institutions," Brighton said. "Within Pennsylvania, Penn State receives a lower educational and general appropriation per student than any other public college or university."

Brighton was referring to the latest data available which shows that in 1995-96, Temple received from the state \$5,630 for each of its full-time students; the University of Pittsburgh received \$4,750; the 14 state-owned universities received an average of \$4,580, while Penn State received \$3,350. The 14 state-owned schools include Bloomsburg, California, Cheyney, Clatsop, East Stroudsburg, Edinboro, Indiana, Kutztown, Lock Haven, Mansfield, Millersville, Shippensburg, Slippery Rock and West Chester.

According to figures provided by the University's budget office, it would take an increase of approximately \$94 million to bring Penn State's funding up to the average of Pennsylvania's other public universities.

When compared with the average of the Big 10 public universities, Penn State receives nearly \$88 million less in state appropriations, while serving nearly 18,000 more students.

Early projections of a possible surplus in the state coffers led Brighton to hope that there will be room to adjust the increase to include additional support for the University's basic educational mission.

"Underfunding continues to be one of the University's most serious problems."

— John A. Brighton
provost

Professor recognized as biochemical pioneer

For pioneering the modern field of biochemical engineering, which is greatly influencing the traditional chemical engineering field, **Arthur E. Humphrey**, professor of chemical engineering, was recently awarded the 1997 John Fritz Medal. Presented at a meeting of the American Institute of Chemical Engineers, the award is given to one person annually and recognizes notable scientific or industrial achievement. Previous recipients of the Fritz Medal include Alexander Graham Bell, Thomas Alva Edison, Orville Wright and Herbert Hoover.

In his more than 43-year career, Humphrey's research has concentrated on biotechnology and the design, monitoring, and control of bioprocesses. His work has resulted in four patents, more than 275 research papers and three

ARTHUR E. HUMPHREY

books. The first textbook in bioengineering was co-authored by Humphrey. During the formative years of biotechnology, Humphrey provided an important "information bridge" leading the collaborative effort to explore and apply the new technologies that became the basic tenets of biochemical engineering. His work has shown clearly how chemical engineering principles can be applied to the production of pharmaceuticals, particularly process scale up. Humphrey developed and patented a method for computer control of fermentation systems, which is now used by virtually all biotechnology firms to monitor and control bioreactors.

He is a member of the National Academy of Engineering and a Fellow and past president of the American Institute of Chemical Engineers. He has received numerous honors from that institution including the Professional Progress Award; the AIChE Founders Award for outstanding contributions to chemical engineering literature; and the F.J. & Dorothy Van Antwerp Award for service to the institute. He has received the James M. Van Lanen Distinguished Service Award and the Marvin Johnson Award from the American Chemical Society and the Distinguished Service Medal from the University of Pennsylvania.

Astronomy professor earns national award for discoveries

Alexander Wolszczan, distinguished professor of astronomy and astrophysics, has received the 1996 Casimir Funk Natural Sciences Award from the Polish Institute of Arts and Sciences of America. The institute annually honors a distinguished natural scientist of Polish origin, living in North America, who has made an outstanding scientific contribution.

In 1992, Wolszczan became the first person to discover planets outside our solar system when he used the 1,000-foot Arecibo radiotelescope to detect three planets orbiting a rapidly spinning neutron star. He currently is one of the leaders in the effort to discover extrasolar planets.

Wolszczan also has received the Beatrice M. Tinsley award from the American Astronomical Society in 1996; the Penn State Faculty Scholar Medal for Outstanding Achievement in 1994; the Popular Science Grand Award for "Best of What's New" in 1994; the Annual Award of the Foundation presented by the Kosciuszko Foundation in 1994; and the Alfred Jurdzyski Foundation award in 1993.

Wolszczan received a master's degree in astronomy in 1969 and a doctoral degree in physics in 1975, both from Nicholas Copernicus University in Poland. He was a visiting professor at Princeton University before joining the Penn State faculty as professor of astronomy and astrophysics in the fall of 1992.

Geosciences professor lauded for contributions to climate research

Richard B. Alley, professor of geosciences, has received the Robert E. Horton Award of the American Geophysical Union in recognition of his outstanding contributions to the study of ice and its relationships with climatic change. The award citation highlights Alley's service to the science community engaged in ice research and the high quality of his research contributions.

ALEXANDER WOLSZCZAN

Alley, a member of the faculty since 1988, established Penn State's ice study group and developed laboratories and facilities for studying ice cores received from research drill sites in Greenland and Antarctica. His research group has pioneered advances in ice core analysis that are transforming it from a qualitative to a quantitative science.

Faculty honored for promising career starts

Five University faculty members have been honored with 1996 National Science Foundation Faculty Early Career Development (CAREER) grants.

The recipients are **Thomas E. Boothby**, assistant professor of architectural engineering, for "Assessment, Maintenance, Repair and Rehabilitation of Historic Structures"; **David A. Edwards**, associate professor of chemical engineering, for "Osmotically-Driven Intracellular Transport"; **David J. Miller**, assistant professor of electrical engineering, for "Supervised Learning by Statistical Physics"; **Suzanne Mohney**, assistant professor of metals science, for "Native Oxides on the III-V Nitrides and Chemical Cleaning of the Semiconductor Surfaces"; and **Maria Womack**, assistant professor of physics, Penn State Erie, The Behrend College, for "Carbon Monoxide in Comets."

NSF established the awards to help scientists and engineers develop simultaneously their contributions to research and education early in their careers. CAREER funds are awarded to junior-level faculty at colleges and universities. These four- to five-year awards range from \$200,000 to \$500,000.

NSF awarded 346 CAREER awards nationwide in 1996 totaling \$40 million in new grants. The awardees were selected from 1,865 applicants.

LECTURES

Lecturer looks at our past through DNA

The fourth lecture in the spring semester 1997 Penn State Lectures on the Frontiers of Science series is "Human History as Seen Through Genetics: Ancient and Modern DNA Sequences Reveal New Aspects of Our History." The talk at 11 a.m. will be given Saturday, Feb. 15, by **Svante Paabo**, professor of biology at the University of Munich in Germany, in 101 Thomas Building on the University Park campus. Paabo pioneered the study of DNA from archaeological remains of human and extinct animals. During his lecture, he will discuss what modern genetics tell us about the origin of our species

SVANTE PAABO

and more recent history, such as the invention and spread of agriculture in the Middle East and Europe.

These lectures are designed for the enjoyment and education of Pennsylvania residents, and are sponsored by the Eberly College of Science. Parking is available at the HUB Deck parking garage on Shortlidge Road. For more information, contact the college at (814) 863-8453 or (814) 863-4682, or by e-mail at science@psu.edu.

Harrisburg institute to help academic professionals

The Pennsylvania Black Conference on Higher Education (PBCOHE) is sponsoring a two-day Institute for Educational Management and Leadership that will give academic professionals of color an opportunity to develop their leadership abilities and administrative skills.

The institute will be held Feb. 25-26 in Harrisburg and will cover a range of skills, including identifying and analyzing changes affecting higher education, becoming familiar with the budget process in higher education, and examining various leadership styles and their effectiveness.

The institute will include a keynote address on leadership in higher education by **John A. Brighton**, executive

vice president and provost at Penn State, and a session on technology and higher education research by **James H. Ryan**, vice president for Outreach and Cooperative Extension. Other sessions will cover the budgetary process, communication in higher education, management and academic protocols, leadership and management styles, development and use of research, and job seeking and interviewing skills.

PBCOHE, the sponsor of the institute, is a professional association whose purpose is to ensure that African Americans and other people of color have access to higher education in Pennsylvania. For more information, contact **Grace Hampton**, chair of the institute's planning committee, at (814) 863-5408.

Newspaper executive leads talk on Black History Month

Charles B. Fancher, vice president for communications and public affairs of Philadelphia Newspapers Inc. (PNI) — the publisher of *The Philadelphia Inquirer* and the *Philadelphia Daily News*, will lead a discussion on "Who Needs Black History Month: A Media Executive's Perspective," at 5 p.m. Tuesday, Feb. 18, in Carnegie Cinema on the University Park campus.

The event, sponsored by a variety of organizations and hosted by the College of Communication, is in celebration of Black History Month. After the discussion, a special performance of the United Solo Ensemble will be presented and a buffet of ethnic food prepared by College of Communications faculty and students will be served.

Fancher, who is responsible for internal and external communications, government relations, community relations and corporate giving for PNI, worked as a reporter and later as an editor at *The Inquirer*. He moved on to spend five years at the *Detroit Free*

CHARLES B. FANCHER

Press, where he was promoted through several positions, ranging from assistant to the executive editor to editor of the *Free Press*' Sunday magazine. During his time there, he was the recipient of a National Endowment for the Humanities Fellowship for Journalists, and took time off for study at the University of Michigan from 1981-82. He returned to Philadelphia in 1989 to become director of communications for PNI, and was promoted to his current position in 1990.

Today, despite his busy schedule, Fancher is active in civic affairs. He is secretary of the board of directors of the Community College of Philadelphia Foundation, vice chairman of the Communications Academy Board of Governors of the Philadelphia High School Academies, former chairman of the Board of Freedom Theatre, and a member of the Board of the Corporate Alliance for Drug Education, in addition to other civic and cultural committees.

Olympic diver Louganis to speak at Altoona on Feb. 27

Greg Louganis, Olympic champion and AIDS activist, will discuss his life when he visits Penn State Altoona College on Tuesday, Feb. 27. The talk will be held at 7:30 p.m. in the Community Arts Center. An autograph signing session will follow in the Titelman Studio immediately after his presentation. His talk is part of the college's Distinguished Speaker Series.

Louganis, whose autobiography *Breaking the Surface* is one of the best-selling books ever written by an athlete, is open concerning his sexuality, his difficulties in the past, and his hope for the future, despite having AIDS. The diver has won the World Championship five times and was the first man to win double gold medals for diving in two consecutive Olympics. Since the 1988 Olympics, Greg has been pursuing his life-long dream of an acting career, and a movie surrounding his life, "Breaking the Surface: The Greg Louganis Story," will air on March 19 on the USA network.

The Distinguished Speaker Series is provided as a student and community service by the Division of Student Affairs at Penn State Altoona. The series is partially sponsored by the Margery Wolf Kuhn Fund, the John and Ann Wolf Family Speaker Series Fund, the Edward B. Felty Endowment for the All Faiths Chapel, and the Student Activities Fee. Tickets for this free lecture may be obtained at the Penn State Altoona Bookstore, (814) 949-5121.

Maternal employment, child development link probed

Kathleen Mullan Harris, associate professor of sociology and Fellow of the Carolina Population Center, University of North Carolina, Chapel Hill, will give a seminar titled "The Consequences of Maternal Employment and Welfare Receipt for Children in Poor Families" at 11:45 a.m. Tuesday, Feb. 18, in 406 Oswald Tower on the University Park campus.

Harris' research examines the interrelationship

among mother's work, poverty and child well-being in the United States. She and her colleagues argue that decisions regarding maternal employment and welfare receipt involve trade-offs between mother's time and money, and that these trade-offs have consequences for the well-being of children and children's development.

The findings from this study have important implications for understanding the consequences

of recent welfare reform which calls for more stringent work obligations of welfare mothers, without understanding the consequences for children.

The seminar is co-sponsored by the Population Research Institute and the Department of Sociology. Please contact **Laura Zimmerman** by e-mail at lzimmer@pop.psu.edu or by phone at (814) 865-0486 for more information.

More Lectures

Issues affecting New Zealand are topic of Feb. 17 lecture

Barry Gustafson, professor of political studies at the University of Auckland and a visiting Fulbright professor at Georgetown University, will give a seminar titled "Race, Land and Politics in New Zealand: Compromise or Confrontation?" at 3:30 p.m. Monday, Feb. 17, in 102 Weaver Building on the University Park campus.

Gustafson, a widely published author on topics affecting New Zealand, will discuss the political and societal implications, not only of Maori-European relations relating to land and other controversies, but of resparked national debate over South Pacific Islander and Asian migrants.

Gustafson has written key books on New Zealand's political parties and on political biography. He also has been involved with parties at the organizational level, and has been in frequent demand as commentator on a wide range of New Zealand issues.

The lecture, which is open to the public, is being sponsored by the Australia-New Zealand Studies Center. For more information, contact **Pat Corbett** (e-mail: pac@psu.edu; phone: (814) 865-1603; fax: (814) 865-3356).

Mont Alto lecture series will focus on change and challenge

Penn State Mont Alto campus announces its spring lecture series, "Change and Challenge: Mont Alto and Beyond." All lectures are free to the public.

—Wednesday, Feb. 19 at 1:30 p.m., **Mary Jane Henderson**, nurse at Applewood Women's Care Center in Carlisle, speaks on "Birth: A Lifetime Experience," in the auditorium, General Studies Building.

—Tuesday, Feb. 25 at 2:30 p.m., **Joan Applegate**, professor emerita of music at Shippensburg University, lectures on "Women, Music and Change," auditorium, General Studies Building.

—Wednesday, March 5 at 1:30 p.m., **Claudia Limbert**, director of academic affairs, Penn State DuBois campus, addresses the campus community on the topic of "Lifetime Learners." Multipurpose Room, Multipurpose Activity Center.

Congressman to speak, answer questions at Shenango forum

Penn State Shenango campus will hold a forum at noon Wednesday, Feb. 19, in the campus auditorium with Congressman **James A. Traficant Jr.** as guest speaker. Rep. Traficant will speak and then turn the forum over to the audience for a question-and-answer period.

The campus's student organization, Adults Seeking Knowledge (ASK), will host the event. The group asked Traficant to speak to hear his views and ideas on how individuals and families can work within the system and with the elected administration.

Traficant is a native of Youngstown, Ohio. Before being elected to Congress in 1985, he was the sheriff of Mahoning County for four years from 1981-85, and director of the Mahoning County Drug Program from 1971-81. Traficant last spoke at the Shenango campus in the fall of 1993.

The forum is free to the public. For more information contact **Diana Rankin** at (412) 983-5832 or the University Relations Office at (412) 983-5812.

Wharton School professor to explain how you can make every value count

Thomas Donaldson, holder of the Mark O. Winkelman endowed professorship at the University of Pennsylvania's Wharton School, will deliver the 1997 G. Albert Shoemaker Lecture in Business Ethics at the Nittany Lion Inn at University Park on April 8.

Titled "Making Every Value Count," Donaldson's talk is the ninth in a series made possible in 1986 through the generosity of **G. Albert Shoemaker**, the late coal industry executive, and his wife, **Mercedes**. The Shoemaker Lecture is a program of The Smell College of Business Administration.

Donaldson was the John F. Connelly professor of business ethics at Georgetown University for six years before he joined the faculty at Wharton.

THOMAS DONALDSON

While at Georgetown, he was voted Distinguished Professor of the Year by MBA students and Distinguished Researcher of the Year by fellow members of the business school faculty.

Donaldson has written broadly in the area of business values and professional ethics. Books that he has either written or edited include: *Ethics in International Business*, *Ethical Issues in Business* (fifth edition), *Issues in Moral Philosophy*, *Case Studies in Business Ethics* (fourth edition), and *Corporations and Morality*. He is a

senior fellow of the Olsson Center for Ethics at the University of Virginia's Darden School, and he is a founding member and past president of the Society for Business Ethics.

Explore education in the new millennium Feb. 26-March 1

The 27th annual conference of the Pennsylvania Black Conference on Higher Education (PBCOHE), "Standing on the Shoulders of Others: Education in the New Millennium" will be held Feb. 26-March 1 in Harrisburg.

The purpose of the PBCOHE conference is to emphasize that higher education is an essential tool for professional development.

"We know that in 1997, higher education is still unattainable for many African American youth in the Commonwealth of Pennsylvania," said PBCOHE President **Andre P. Hart**, continuing education representative at Penn State Abington College. "Additionally, we know that faculty and staff hiring of African Americans, and promotion and tenure, are still not at acceptable levels in the Commonwealth. We seek to right historical wrongs that continue and gain greater access in the state."

PBCOHE is a professional association whose purpose is to ensure that African Americans and other people of color have access to higher education in Pennsylvania. The association's incoming president is **William Asbury**, Penn State's vice president for student affairs.

The conference's education/developmental sessions, for professionals and students, will focus on the ABCs of an undergraduate education; attaining a master's degree; the why's and how's of the terminal degree; and professional development. The conference also features a general assembly meeting, regional meetings, workshops, in-service training sessions, program planning activities, student scholarship presentations, an awards banquet, and social and cultural events.

Learn how to create high-performance teams in your organization on Feb. 26

Gary Latham, secretary of state professor of organizational effectiveness at the University of Toronto, will present the 1997 Lydia S. and Samuel S. Dubin Lecture at University Park. He will discuss "Creating High-Performance Teams" at 4 p.m. Wednesday, Feb. 26, in Presidential Room 3 at The Penn State Scanticon. The lecture is free to the public and will be followed by an informal reception.

Before assuming his endowed chair at the University of Toronto, Latham was the Ford Motor Research Professor and chairman of the Department of Management and Organization in the Business School at the University of Washington. He is a Fellow of the American and Canadian Psychological Associations and consults widely in industry. Some of his long-term clients include Scott Paper, Seattle First Bank and Weyerhaeuser Co. He also is the author of several books on performance

appraisal, goal-setting and task performance, and developing and training human resources.

This lectureship was established by the late Samuel S. Dubin of Continuing and Distance Education in 1992. He was internationally renowned for his expertise in the field of retraining. A psychologist, consultant and lecturer on industrial and organizational psychology, retraining and continuing education research topics, Dubin retired from Penn State in 1979 as professor emeritus of psychology. He spent 18 years at the University as a teacher of industrial organizational psychology and project director in planning studies.

The 1997 Dubin Lecture will be presented in conjunction with the annual C&DE Systemwide Conference, a professional development program for C&DE faculty and staff members.

The ARTS

AT PENN STATE

At the Jordan Center

John Michael Montgomery will perform at The Bryce Jordan Center on the University Park campus at 8 p.m. Feb. 22. For information on this and other events at the Jordan Center, check the Web at <http://www.bjc.psu.edu/>

Pennsylvania Dance Theatre

Pennsylvania Dance Theatre will open its home mainstage concert performance, "Winter Concert of World Premieres," at 8 p.m. Friday, Feb. 14 and Saturday, Feb. 15, at the Pavilion Theatre on the University Park campus.

Now celebrating its 18th season and its sixth under the direction of Ann Van Kuren, Pennsylvania Dance Theatre has become known for its diverse artistic forays. This is its first concert in the Pavilion, and two pieces created for the company this year will see their first performances in this program.

Tickets are \$12 from the Eisenhower Ticket Center or by calling (814) 863-0255. Seating is limited. Students and seniors may purchase tickets at half price one-half hour before the performance.

Trumpet recital

John Daniel, assistant professor of music, will present a free recital of 20th-century trumpet music on Monday, Feb. 17, at 8 p.m. in the College of Arts and Architecture's School of Music Recital Hall. Assisting him will be pianist Timothy Shafer, associate professor of music.

Music recital

Tim Hurtz will present a recital of music for oboe with a variety of other instruments at 8:30 p.m. Tuesday, Feb. 18, in the Helen Eakin Eisenhower Chapel on the University Park campus.

Several of the College of Arts and Architecture's School of Music faculty members will collaborate with Hurtz in works by Bach, Ginastera, Jacobs,

Wilder and the premiere of "Artica" for oboe and electric guitar by Paul Barsom, instructor of music in the School of Music. In addition, Hurtz will perform a jazz ballad. Joining him on the 12-string guitar will be Michael Dennis.

Faculty joining Hurtz in the recital are Eleanor Duncan Armstrong, flute; Dan Armstrong, percussion; Susan Bowdman, soprano; and June Miller, harpsichord.

The concert is free to the public.

Piano recital

Douglas Fisk will present a free piano recital on Tuesday, Feb. 18, at 8 p.m. in the College of Arts and Architecture's School of Music Recital Hall on the University Park campus. Fisk is a student of Timothy Shafer, associate professor of music at Penn State.

Bach's lunch

The Penn State Clarinet Ensemble, directed by Smith Toulson, professor of music, will perform at the Bach's Lunch concert at 12:10 p.m. Thursday, Feb. 20, in the Helen Eakin Eisenhower Chapel on the University Park campus.

The 20-minute concert is part of the Bach's Lunch series sponsored by the College of Arts and Architecture and the University Lutheran Parish.

The Clarinet Ensemble consists of 11 undergraduate clarinet majors.

Audience members may take their own bag lunches to eat after the concert in the Roy and Agnes Wilkinson Lounge. Coffee and tea will be provided.

International Festival

The International Festival XXIII at University Park, a celebration of the many cultures represented at Penn State, begins Saturday, Feb. 15, with a 6 p.m. dinner at Johnston-Findlay Common in East Halls and culminates with an International Fair on Sunday, Feb. 23. Scheduled events for the festival include:

■ Saturday, Feb. 15: "Touch of Africa," presented by the African Student Association. Begins with 6 p.m. dinner at Johnston-Findlay Commons in East Halls. Tickets for non-students are \$10 at the Paul Robeson Cultural Center before the event or \$12 at the door.

■ Wednesday, Feb. 19: Italian Dance Group (I Guiliardi di Piazza), 7 p.m., Paul Robeson Cultural Center. Sponsored by the International Student Council. The event is free.

■ Friday, Feb. 21: International Coffee House — free performances by international student clubs and the Penn State International Dancers, 7 p.m., HUB Ballroom.

■ Saturday, Feb. 22: Barrio Fiesta to be presented by the Penn State Filipino Association in 102 Kern beginning at 5 p.m., with dinner followed by cultural performances. Tickets are \$5. Call Ed Tapan at (814) 867-7166 or Bernie Liang at (814) 234-6267.

BRYCE JORDAN CENTER

Upcoming events

■ Feb. 20: Harlem Globetrotters, 7:30 p.m. Tickets: \$13; \$20 for V.I.P. seats; \$70 for Magic Circle seats, including a Reebok Globetrotters jersey; \$2 discount for youth and senior citizens; \$3.50 discount for Penn State faculty and staff with I.D. and groups of 15 or more; Penn State students half price with ID. Penn State discounts redeemable only at the Bryce Jordan Ticket Center. Limit two tickets per I.D. Discounts apply to \$13 tickets only. Tickets on sale now.

■ Feb. 22: John Michael Montgomery, with special guest Ricochet, 8 p.m. Tickets: \$25, \$22.50, \$20 for reserved seating. Penn State students get a \$5 discount on \$22.50 and \$20 tickets, redeemable only at the Bryce Jordan Ticket Center. Limit two tickets per I.D. Tickets on sale now.

■ March 2: Metallica with special guest Corrosion of Conformity, 7 p.m. Tickets: \$35.50, \$25.50 for reserved seating. Tickets on sale now.

For more information on Bryce Jordan Center events, visit the Web at <http://www.bjc.psu.edu>

■ Sunday, Feb. 23: International Fair with food, crafts and children's activities begins at 11:30 a.m. in the HUB and ends with a concert by the Irish folk-singing group "The Whole Shebang." There is no admission fee and tickets may be purchased for food.

Odyssey on WPSU

On the next episode of Odyssey Through Literature, Mark Fearnow of the Penn State Theatre Arts Department speaks about the life and work of playwright Claire Boothe Luce. Fearnow discusses how Luce lost her "talent for cruel wit" because of three major events that occurred in her later life. She became involved in politics, lost her daughter in a car accident and converted to Catholicism.

Odyssey Through Literature is produced as a continuing education service of the Department of Comparative Literature. It airs Sundays at 8:30 p.m. on WPSU, 91.5 FM, from University Park, 106.7 FM in Altoona and on WFSB, 90.1 in northern Pennsylvania. The complete semester's schedule can be found on the World Wide Web at <http://mickley.la.psu.edu/compilit/odyssey/odyssey.htm>.

Faculty/Staff Survey

This Intercom insert describes efforts by the University to address issues raised by Survey respondents in the area of professional development and training.

Penn State must be recognized as a community that encourages professional development

As an educational institution that fosters the intellectual and social development of students, we must have a culture that also encourages the professional development of faculty and staff. An informed and knowledgeable work force is essential in meeting the challenges of preparing students for the 21st century. We must provide learning opportunities that prepare faculty and staff for the current and future challenges in their careers. It is imperative that we exemplify the same commitment to life-long learning that we advocate for our students.

In a large, complex institution such as Penn State, professional development will be approached differently unit by unit. That withstanding, a fundamental principle of an academic community is fostering and nurturing human potential. Although translating this principle into action may occur differently from faculty to staff and from college to college, we want Penn State to be recognized by faculty, staff and students as a community that fosters continuous learning.

Dr. John A. Brighton
Provost and Executive Vice President

Professional development: Whose responsibility is it?

Commitment must occur at all levels

"Interest in professional development — in business and industry, in health care organizations, education and government — is at an all time high," according to James H. Ryan, vice president for outreach and cooperative extension. "Employee education, training and development is now a \$100 billion industry."

"But I can recall," Dr. Ryan continues, "that as recently as 20 years ago when we talked about lifelong learning, people would ask, 'What's that?'"

"Widespread acceptance of the concepts of knowledge-change and continuous quality improvement has helped people realize that there is always something new to be learned on an on-going basis."

"It's essential," Dr. Ryan continues, "that employees in all organizations be committed to their own self development and recognize that this is a fundamental part of their commitment to the organization and to their job."

But employee commitment is only half of the picture, Dr. Ryan points out. The other half is the commitment the employing organization makes to the personal and professional development of its staff.

"One way to do this," Dr. Ryan continues, "is by clearly identifying the core capabilities or competencies that an organization needs and the parts of these competencies individual employees are contributing. Then, after assessing how well these competencies are developed, programs can be created

to help employees become more proficient."

Applying this model to Penn State, Dr. Ryan sees a good deal of progress, especially on the staff side.

"While the process is still a bit cumbersome," he says, "we are attempting to fully involve our unit heads, supervisors and employees in a dialogue and a plan, not only about their effectiveness but also about improving themselves both professionally and personally."

"I think one of our big challenges in the University is to get everybody to recognize how important comprehensive human resource development is to the long-term health of the organization. Supervisors must be willing to support released time for staff to participate in classes or programs and to reward and recognize the performance improvement that emerges."

"We also must appreciate the value of supporting employee growth. When people perceive that the University is willing to make an investment in their development, it's a powerful motivator."

Dr. Ryan sees no slowdown in the growth of lifelong education programs. He points out that by the year 2005, 85 percent of the people in today's workplace will still be there, and of this number, more than 90 percent will have had to undergo some kind of education or training to maintain their jobs or careers.

"My personal reading of the Faculty/Staff survey," he says, "is that we need to make professional development a higher priority for all faculty and staff

The individual and the organization both share responsibility

Who bears the most responsibility for professional development?

"Professional development is the responsibility of both the individual employee and the organization as represented by the employee's immediate supervisor," according to William J. Rothwell, associate professor of education.

Among Dr. Rothwell's most recent publications are the book, *Beyond Training and Development* (Amacon), and a training package, *The Self-Directed On-The-Job Training Workshop* (HRD Press), both issued in 1996.

"Sometimes, however," Dr. Rothwell continues, "a supervisor figures that employees will just come and ask if they need coaching to learn something and thus develop themselves professionally."

"Such a view is often mistaken. Employees want to look competent and are thus somewhat hesitant to request help for professional development

because they fear that such a request will be misinterpreted as an admission of incompetence and will be used against them at performance appraisal time."

Dr. Rothwell points out that one key to good coaching and to effective professional development is TRUST between workers and their immediate superiors. A second key is the willingness of individuals to take the initiative to seek out their own mentors and to take an assertive role in their own professional development.

"One of the essential differences between successful and unsuccessful people," Dr. Rothwell points out, "is

that the former do not sit around waiting for someone to tell them what they need to do to develop themselves. They are instead willing to take the initiative to find out. If workers do not want to approach their supervisor, then they should network with other competent, experienced coworkers who can supply immediate, specific coaching."

Dr. Rothwell notes that for those who aggressively seek out professional development the most important gain is mobility. But individuals must first spell out for themselves where they want to go in life, generally, and in their career, specifically.

Someone who is interested, for example, in moving from staff assistant to administrative aide should make the effort to locate and talk to an aide about the work requirements.

"Most people are more than willing to describe what they do on their jobs," Dr. Rothwell says. "However, it might take a year to acquire the skills one needs to advance. Simply to sit around and wait for an opening may mean not being ready to bid when it occurs."

If employees should take responsibility for pursuing their own professional development, what are the responsibilities of a coach or mentor?

"The coach will evaluate an individual's strengths and weaknesses relative to the position he or she seeks," Dr. Rothwell points out. "This assumes that the job description is accurate, which is not always the case, and that a sound performance appraisal system is in place."

Negative feedback from an appraisal often makes subsequent performance worse. Positive feedback

HRDC responds to the University's

The results of the Faculty/Staff Survey highlight the growing importance of professional development in today's rapidly changing world of work, according to Lenny Pollack, manager of Penn State's Human Resource Development Center (HRDC).

"More than ever," Dr. Pollack points out, "continuous development is essential for individual and organizational effectiveness. Success today depends, in part, on the ability to quickly acquire and apply new knowledge and technology as chang-

ing needs and expectations emerge. HRDC is committed to facilitating the University's development toward this end."

HRDC supports the vision of a multi-faceted professional development system designed to provide all employees with convenient access to relevant learning opportunities.

"To provide such access in an institution as large as Penn State, a variety of models or avenues for professional development are desirable," Dr. Pollack

About half of all University employees responded favorably to the statement: "In my department, we receive the necessary training and professional development to do high quality work efficiently." University Park Academic Areas express the greatest satisfaction with access to training and professional development.

WORK UNITS PROVIDE ONE ROUTE

College creates programs for faculty and staff

Creating opportunities for both faculty and staff to enhance their professional development is a priority of the College of the Liberal Arts, according to Raymond E. Lombra, associate dean for research and graduate studies.

One such opportunity, a mentoring program for new faculty was put in place last fall as the direct result of suggestions received by Dean Susan Welch during the course of a series of lunches she arranged with College faculty.

"The feeling was that since junior faculty are being held to higher and higher standards," Dean Lombra explains, "it isn't fair just to bring them in and expect them to swim upstream by themselves."

In addition to pairing more experienced faculty volunteers with newcomers who have indicated they would appreciate some guidance from the trenches, the College supports junior faculty with seed money for research.

"My office also sponsors a competition each semester for research funding," Dean Lombra notes, "and our guidelines give special consideration to proposals

submitted by junior faculty."

"Our view is that new faculty are essential to the future progress of the College, and it's important to invest in them."

Liberal Arts is also investing in workshops for both faculty and staff in the area of computer and information technology.

To emphasize its commitment to professional development at all levels, the College has created a Staff Fellowship Program. The first recipient, whose proposal was recommended by a staff committee, is Connie L. Moore, staff assistant in the Department of Psychology.

"I wanted to observe the best practices in use among the College's units," she explains, "with the eventual goal of gaining the experience I would need as an administrative aide."

CES empowers faculty to make learner-centered education the norm

By the year 2000, CES expects that no fewer than 80 percent of its faculty will have had the opportunity to convert at least one module of a course to active and collaborative learning, supported by technology.

"This is a major effort to help faculty build a contemporary learning environment in which students can participate

emphasizes.

Some opportunities — such as programs offered by HRDC, the Center for Excellence in Learning and Teaching (formerly the Instructional Development Program), and the Diversity Support and Education Center — are offered centrally. Other options are administered by work units such as campuses, colleges, and departments. Examples include college-sponsored internships, participation in conferences and other professional

association activities, and coaching from supervisors. Finally, some University groups and organizations, such as Penn State Educational Office Personnel and the diversity commissions, offer professional development opportunities for their membership and others in the University community.

"A comprehensive, multi-faceted professional development system allows employees to address their needs in any of several ways," Dr. Pollack notes.

Penn State has many avenues

any time and anywhere," according to CES Senior Associate Dean Jack P. Royer.

Under the code name, Project Empower, some 200 CES faculty have already used the Center for Learning and Academic Technologies (CLAT) to acquire the skills they need to prepare learner-centered courses.

Dean Royer points out that at most of the campuses CES provides Instructional Development Specialists (IDS) who are qualified instructional designers with multimedia production skills.

"Our IDS personnel," he notes, "run on-campus workshops to reduce outside trips for training and also work one-on-one with faculty who have been through Project Empower."

Two Project Empower convocations are held annually, CLAT Director Ann Deden reports, to allow faculty to share experiences and provide help in developing Empower proposals for classroom technologies.

Improving training and development a major Physical Plant goal

"Improving employee training and development is one of the four major goals we have incorporated into our next five-year strategic plan," says Office of Physical

Plant assistant vice president William J. Anderson.

To oversee progress toward these goals, OPP has established four Quality Management Boards, plus a fifth one that will focus on diversity.

Steering the board to improve training and development is Dorothy Green, OPP's manager of training education and development. Her program offers dozens of training courses annually, with topics ranging from safety, cable splicing and writing skills to coping with conflict in the workplace.

Cathy Aukerman, a janitor and 15-year employee, has participated in a number of these training sessions.

"This past November," she reports, "all three of our shifts attended a program that helped us look at ways to improve working with others. For example, we took turns trying out different approaches to getting along with a co-worker who had a hot temper."

When she gets more training, Mrs. Aukerman wants it to be in the area of safety procedures, as she believes cleaning personnel need to be aware of any potentially harmful condition in campus laboratory research areas.

"A training needs assessment is part of the annual performance appraisal of technical service personnel," Ms. Green

professional development needs

A division in the Office of Human Resources, HRDC is helping to meet the increased demand for professional development that was highlighted in the Faculty/Staff Survey results. During the last four years, the Center accommodated an average annual increase in attendance at HRDC programs of about 20 percent, according to Dr. Pollack.

"HRDC is responding to faculty and staff interest in professional development," he says, "by offering programs that are relevant, addressing barriers that impede professional development, and capitalizing on the University's wealth of expertise as a resource for professional development."

To ensure the availability of relevant opportunities, the Center prepares a comprehensive schedule of noncredit courses. Last fall HRDC offered more than 275 different workshops, including 40 new programs.

Offerings are tailored each semester to accommodate current needs and preferences. For example, to help faculty and staff adapt to today's rapid rate of change, HRDC is presenting a new series of programs this spring on "Indispensable Skills in a Rapidly Changing University."

Again, because of the increased

Barriers to professional development identified

As a follow-up to the Faculty/Staff Survey, HRDC is gathering data to identify obstacles to professional development at Penn State and will develop strategies to eliminate them.

The survey results suggest that there are barriers to convenient access that should be addressed," Dr. Pollack emphasizes. To better understand possible barriers, HRDC conducted a focus group that identified such factors as:

- Difficulty in obtaining release time
- Inadequate financial resources
- Inadequate coaching from superiors
- Lack of management support
- Failure to address development issues in annual performance reviews
- Lack of rewards and recognition for acquiring new skills
- Inconsistent professional development policies and practices

As a next step, HRDC plans to administer a questionnaire to assess the magnitude and importance of the barriers and then recommend ways to eliminate them.

importance of funded research to the University, HRDC is building partnerships with other units to offer programs of value to those active in research. Last fall it helped support a program on grant writing skills that was sponsored by the Faculty Senate Committee on Research. Spring offerings include "Landing the Big One: Techniques for Pursuing Large or Multi-disciplinary Research Opportunities"

and "Surfing for Gold: Using Electronic Sources to Identify Research Funding Opportunities."

"To capitalize on University expertise as an internal professional development resource," Dr. Pollack explains, "HRDC also strives to build partnerships to that faculty and staff with specific skills can use HRDC programs to disseminate their knowledge to others in the University."

sity." Currently this is exemplified by a variety of courses in which faculty and staff with expertise in such areas as marketing research, accounting, and communications teach HRDC courses to colleagues who need that expertise to do their work more effectively.

In addition, HRDC programs provide other Penn State units with a means of disseminating specific knowledge and skills throughout the University. Toward this end, HRDC collaborates with many partners throughout the University, among them the Center for Quality and Planning, Continuing and Distance Education, and the Center for Academic Computing to name just a few.

"By working together to share our respective talents," Dr. Pollack concludes, "we can help each other and the entire University to adapt quickly to rapidly changing demands and priorities. This requires faculty and staff to be active participants in the professional development process, both as learners and as instructors. If we pool our collective knowledge, we can help one another learn how to meet the challenges of today and tomorrow." ■

professional development

says, "and comments like Cathy's are helpful in establishing the direction additional training programs should take."

Susan M. Rutan, human resources manager, has responsibility for a board monitoring efforts to improve leadership and accountability by developing programs to boost supervisory skills. She notes that her board is building on a baseline philosophy established after a major training effort for supervisors was instituted several years ago.

"Given budgetary restraints," Mr. Anderson says, "our dilemma is how much of our resources should be used to prepare our work force for future jobs as opposed to concentrating on improving

the skills we currently need."

"Can the University afford to wait three years to fill a position while the candidate completes a demanding apprenticeship program? There are no easy answers to these questions."

OPP's apprenticeship program offers participants unparalleled opportunities. Licensed by the state's Bureau of Apprenticeship and Industry, the program develops workers with limited skills into journeymen in such trades as electrical, elevator, heating and ventilating, and refrigeration.

Keith McWilliams came to Penn State in 1974, as a receiving clerk in Food

Services. Progressing through a series of jobs, he qualified for one of the slots in the seven-year program, emerging as a refrigeration and air conditioning journeyman.

"It took me four years to complete the 8000 hours of coursework required by the state and three more for on-the-job training at Penn State," he says, "but anyone lucky enough to get into this program gets more education than if they went to a technical school."

Continuous training and development at The Nittany Lion Inn

The aim of GuestPride, the Penn State Hospitality Services Strategic Development Plan, according to Michael C. Conti, Nittany Lion Inn operations manager, is to reinforce the fact that excellence is achieved through people, and that training and developing people is more of a process than an event.

To this end, all Inn employees attend an intensive job orientation program as well as GuestPride core course training, supplemented by daily team briefings and annual refresher sessions. Managers are expected to attend a minimum of 16 hours a year of management development training.

To help reinforce training behaviors,

the Inn will recognize exceptional performance with PRIDE POINTS tickets, and winners' names will be posted on a prominently displayed Winners Wall of Fame.

Additional Avenues to Professional Development continued on page 4

"I believe it is most important to anticipate the training and development needs of staff when new systems or procedures are introduced if we are to maximize our investment in both people and technology."

David Wormley
Dean, College of Engineering and
Chair, University Council on
Continuous Quality Improvement

Administrators and executives rated access to training and professional development more favorably than other groups—particularly technical service employees.

Commitment at All Levels*continued from page 1*

within the University.

"Looking ahead to the next decade in higher education, I am convinced that we must increase our lifelong learning activities throughout the entire University community so that the education and training we provide is of the highest quality and delivered in the most creative and effective way possible."

"I firmly believe that employees have an inherent right to expect development activities and support from the organizations in which they work and that organizations have the right to expect their employees to make a similar commitment in terms of a willingness to grow and develop."

"Organizations," Dr. Ryan concludes, "get better by people getting better." ■

Staff Non-Exempt, Staff Exempt, and Faculty show the greatest interest in increased rewards for personal and professional development.

**Avenues to Professional Development**
*continued from page 3***CENTRALLY ADMINISTERED PROGRAMS
ADD TO OPTIONS****Academic Leadership Forum designed for department heads**

Because department heads have some of the most significant leadership responsibilities in the University, but frequently assume their positions without a great deal of administrative experience, a seminar series, the Academic Leadership Forum, has been established at the initiative of Executive Vice President and Provost John A. Brighton.

After an orientation session last spring to discuss what topics might be of interest, two seminars a semester were scheduled. Vice Provost Robert Secor is co-chairing the forums with Louise E. Sandmeyer, executive director, Center for Quality and Planning.

The first Fall '96 session was designed for new department heads, with President Graham Spanier and Provost Brighton as principal speakers. "Working with Change" was the topic of the second program, to which all department heads were invited. Michigan State's Provost was the guest speaker.

Participants meet from 8 a.m. to 1 p.m., according to Dr. Secor. After a continental breakfast, a guest speaker presents an overview of the topic. Then the group may break into small work units for discussion or hear the views of panelists. Everyone gets together for a final group discussion, and the program concludes after a lunch and conversation with President Spanier.

One of the forums this semester will consider how department heads can respond to concerns raised by the Faculty/Staff Survey.

Diversity Center tailors training

Established in October, 1995, the Diversity Support and Education Center, while housed in the Office of Affirmative Action, is now a separate entity. Sandra Vector serves as its coordinator and Beth McLaughlin is a diversity specialist.

The Center offers a set of programs through the Human Resources Development Center, dealing with issues of race, gender, disabilities, sexual harassment and sexual orientation. However, it also tailors programs to fit specific requests from various units at Penn State.

"The goal of diversity training," Ms. McLaughlin explains, "is to help organizations improve the climate in the workplace, by making both management and employees more aware of their feelings and ultimately more comfortable with one another."

Instructional improvement focus of Center

Operating out of the Office of Undergraduate Education, the Center for Excellence in Learning and Teaching supports instructional improvement with a variety of programs for faculty, instructors and teaching assistants throughout the Penn State system.

Among its services, according to associate director Kathryn Plank, are orientation programs for new instructors, preparing publications on teaching and learning, a ten-week college teaching course, workshops and individual consultations.

Teachers of large classes can share

Faculty and technical service employees are the least satisfied with the ideas they receive from the person to whom they report on how to improve their work.

**Shared Responsibility**

that offers information on how an employee might change and develop is much more effective."

Coaching can be informal — one employee seeking information from another — or structured. The coach's role, just as in sports, will vary depending on the experience of the employee-player.

Above the coach and the employee

pedagogical techniques in an online forum, and the Center also maintains a file of activities to help instructors obtain effective student feedback.

The Center has a continuously updated Web site, which can be accessed at www.psu.edu/idp_cclt.

Administrative Fellow prepared for new role

Claudia Limbert started college at age 35, the mother of four children. After graduating, she went on to earn her master's and Ph.D. and then took a position as an assistant professor of English at the Shenango Campus.

But that's not the end of the story.

In addition to her research and teaching commitments, she served as ombudsman and also as chair of the Senate at Shenango before getting tenure and being promoted to associate professor. At that point, friends began to urge her to apply for one of the three administrative fellowships offered annually by the central administration at University Park. These fellowships were established as a result of a recommendation by the Commission for Women.

"I wasn't very hopeful," Dr. Limbert recalls, "but I had a wonderful interviewing experience, and when I was accepted, working on the CES staff turned out to be the best year of my life. Halfway through it, I knew that being an administrator was what I wanted to do, so I applied for the position of director of academic affairs at DuBois and here I am."

"I think that too often women have what I call a 'Cinderella Complex.' They believe that if they work hard, some prince will discover them."

"But that's not enough. You also have to move forward on your own. If you have a dream, get out there and find out what your options are, apply for them

is the organization, which also has a role to play in professional development, according to Dr. Rothwell.

"The management of any organization," he concludes, "has an obligation to make clear what requirements are really necessary at different levels. It is also good management to help individuals who are willing and capable to develop themselves in line with those requirements." ■

SOME MAY CHOOSE INTEREST GROUPS

Many groups and organizations across the University provide learning opportunities, sometimes not only for their members but also for other campus constituencies.

As an example, Penn State's Commission for Women, as one of its activities, is planning its second annual Workshop for Technical Service Workers, to be held in February. The one-day program is designed to help women explore non-traditional occupations and to assist them in developing strategies for balancing their work and personal lives.

Increasing the level of professionalism of University office personnel is one of the major objectives of Penn State Educational Office Professionals (PSEOP).

With 121 members drawn from University Park and the campuses, PSEOP offers opportunities for both continuing education and informal peer interaction.

Not only does it provide up-to-date information on relevant workshops, conferences and seminars but it also has a Grant-in-Aid program to help with out-of-pocket expenses for those registering in University and professional development courses.

Still another example of an interest group that provides learning opportunities is Professional Women at Penn State. This organization holds monthly meetings with the goal of providing a setting within the University community where all Penn State women can develop both professional and personal skills. The group also seeks to develop and maintain a communications network for members.
